Focus on the cross-fertilization between literature and the visual arts in various periods. Topics include the rhetoric of images; the connections that link image and text in high and popular art; poetry and painting; art criticism, and hybrid forms such as comic strips.

153A. Studies in Medieval Literature**(4) BROWN, ENDERS**

Prerequisite: Department approval to finalize registration.

Same course as English 119X.

A study of one or more major medieval works in translation such as The Song of Roland, the romances of Chretien de Troyes, the Lais of Marie de France, or The Romance of the Rose.

153B. French Theatre in Translation**(4) SKENAZI**

A study of French theatre through the centuries, considered within the cultural context of the day (Classicism, the Enlightenment, Romanticism, the Absurd, etc). Plays by Molière, Marivaux, Beaumarchais, Hugo, Musset, Ionesco, and Beckett. Lectures and readings in English.

153C. Autobiographies and Life Stories**(4) JULLIEN, MALEUVRE**

French autobiographies in translation, from Rousseau, Chateaubriand and Sand to Colette, Sartre, Sarraute, Perec, Duras and Nothomb. Topics include autobiography and self-portrait, autobiography and fiction, the portrayal of childhood and family, women's autobiography. Content will vary according to the instructor.

153D. Fantasy and the Fantastic**(4) JULLIEN, LÉVY***Same course as Comparative Literature 191.*

Course explores the creation of a space where a fantastic perception of reality developed and thrived, hesitating between the real and the supernatural, in the intermediate space of the unexplained and unexplainable. Works by Balzac, Poe, Stevenson, James, and Borges.

153E. The Power of Negative Thinking: Sartre, Adorno, and Marcuse**(4) STURM**

Critical perspectives on man and culture by three of the great myth-shattering thinkers of the century. Topics: the social function of art, the Freudian legacy, utopia revisited, work and play, etc. In English.

153F. Existentialist Literature in Translation**(4) MALEUVRE, STURM**

How much freedom can you take? The course explores the quandaries of the twentieth-century individual, free and self-created, in the world of responsibilities and attachments. Readings include fiction, drama, and philosophical essays by Jean-Paul Sartre, Albert Camus, Simone de Beauvoir.

154A. Voyages to the Unknown**(4) SKENAZI***Prerequisite: Writing 2 and 50.**Same course as Comparative Literature 107.*

The impact of the voyages of discovery on late 15th- and 16th-century Europe. Readings on real and imaginary voyages: Columbus, Cartier, Lery, More, Rabelais, Montaigne.

154B. Creativity in Renaissance Europe**(4) SKENAZI**

Explores the renewed sense of human achievement and limitation in Renaissance Europe. Focus on the meanings of creativity in the religious, philosophical and artistic contexts of the time. Authors include Petrarch, Pico Della Mirandola, Erasmus, Castiglione, Ronsard, Montaigne.

154C. History of France from 1500-1700**(4) BERNSTEIN***Prerequisite: History 4B or upper-division standing.**Same course as History 121C.*

Politics, religion, and society in France from the reign of Francis I to Louis XIV. Special emphasis on religious disputes and questions of power.

154D. Torture: Theory, History, Practice**(4) BROWN, ENDERS**

An investigation into the history of torture from classical antiquity to Amnesty International. Discussions focus on its interrelations with literature, law, art history, gender, and violence in the media. Guest lecturers, as available.

154E. Holocaust in France**(4) DERWIN, NESCI***Same course as Comparative Literature 122B.*

Through analysis of testimonies, memoirs, fiction, and film, this course focuses on France under the Nazi occupation. Topics include the Vichy Regime (1940-1945), The Resistance Movement, the Church under Vichy, anti-Semitism, deportations and concentration camp imprisonment, and national memory after World War II.

154F. Time Off in Paris!**(4) JULLIEN, NESCI, PRIETO, SCHULTZ***Not open for credit to students who have completed French 169BX.*

Paris and Parisian life in nineteenth- and twentieth-century literature, art and cinema. Drawing upon history, architecture, and art history, we explore the shock of urbanization, the relations between the culture and life of the city, and the rise of avant-garde aesthetics.

154G. Post-Colonial Cultures**(4) PRIETO***Same course as Comparative Literature 171.*

Study of fiction from the Caribbean, West Africa, and the Maghreb. Provides insights into the vibrancy of contemporary post-colonial societies, the ongoing legacy of colonialism, and the meaning of multiculturalism born of the conflict between and

hybridization of widely differing cultural traditions. In English.

154H. Honors Section**(1) STAFF***Prerequisite: Concurrent enrollment in one of the French 154 series; honors standing.*

Eligible students are invited to enroll in the honors seminar, which is generally taught by the course instructor.

155A. Women in the Middle Ages**(4) BROWN, ENDERS**

A study of the socio-political role of women in France from the twelfth to the fifteenth centuries through an examination of their image in literary texts written by both sexes. Lectures and readings in English.

155B. Women on Trial**(4) ENDERS, BROWN**

A study of the cultural construction of femininity through an examination of legal proceedings (actual and literary) in France initiated by or against medieval women for such "crimes" as witchcraft, adultery, pride, theft, vainglory, and seduction. In English.

155C. French and Francophone Women Writers**(4) BROWN, JULLIEN, NESCI, SCHULTZ**

French-speaking women writers from the Middle Ages to the present. The connections between gender and genre, sexual identity and literary practices, politics and poetics in Marie de France, Lafayette, Staël, Sand, Simone de Beauvoir, Marguerite Duras, Assia Djebar, among others.

155D. Citoyennes! Women and Politics in Modern France**(4) NESCI***Same course as Women's Studies 171CN.*

Focuses on women's fights for the rights of equality and liberty, their exclusion from the public sphere and their access to citizenship (1789-2001). Women's evolving personal and collective aspirations, and the creation of a republican womanhood in modern culture. Taught in English.

156A. French Cinema: History and Theory**(4) MALEUVRE, NESCI***Not open for credit to students who have completed French 178X.*

History of French cinema from 1895-present, covering the silent period, the early classic era, the war years, and the New Wave, with a survey of the major French film theories since the 1920s. In English.

156B. French and Francophone Cinema**(4) BLOOM***Prerequisite: Film Studies 46 or upper-division standing.**Same course as Film Studies 134.*

Addresses the interaction between the institutions of French and Francophone culture through cinema. The shifting terms of French identity in France and among French-speaking communities are examined through national, regional, and immigrant discourse. In English.

156C. Modern Images of the Middle Ages: The Intersection of Text, History, and Film**(4) BROWN, ENDERS**

Modern images of the Middle Ages: the intersection of text, history, and film. Course will examine major cultural aspects of the Middle Ages, including courtly love, the Arthurian myth, the legend of Robin Hood, witchcraft, scholasticism, the Inquisition, war and death, through the dual optic of medieval literature and modern film. Taught in English.

156D. Technology and Cinema**(4) STAFF***Same course as Film Studies 178Z.*

Cinema fulfills and breaks down the technological project of "framing" the whole of existence. Themes: humanity and/as technological threat, the decline of language and ethics, the culture industry, science fiction. Screenings include Tarkovsky, Kubrick, Star Wars, Marker, Godard, Méliès, Lang. Lectures and readings in English.

197. Senior Seminar**(4) STAFF***Prerequisite: Senior standing or division courses in French.*

As a culmination of study in the major, this seminar enables students to synthesize knowledge gained in French courses, at UCSB and through the Education Program. It involves investigations theoretical issues related to French literature and culture.

197H. Senior Seminar, Honors Section**(1) STAFF***Prerequisite: Concurrent enrollment in French 197; honors standing.**Designed for majors.*

Eligible students are invited to enroll in the honors section, which is taught by the course instructor. It involves discussion of selected texts, students' presentations, and the completion of an independent project on any aspect of the course's chosen theme.

198. Senior Honors Seminar**(4) STAFF***Prerequisite: Consent of instructor; honors standing.*

This seminar is concurrently offered with graduate seminars. It is designed to expand research skills through an investigation of theoretical issues and readings of both literary and critical texts. It involves extensive research, sophisticated analysis, and creative reflection. In French.

199. Independent Studies in French**(1-5) STAFF***Prerequisites: upper-division standing; completed at least two upper-division courses in French.*

Students must have a minimum 3.0 grade-point average for the preceding three quarters and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined.

Individual investigations in literary or linguistics fields.

199RA. Independent Research Assistance**(1-5) STAFF***Prerequisites: upper-division standing; completed at least two upper-division courses in French; consent of instructor.*

Students must have a minimum 3.0 grade-point average for the preceding three quarters and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined.

Independent research, under the supervision of a consenting faculty member.

GRADUATE COURSES**2165S. French Linguistics II: Syntax and Semantics****(4) STAFF***Prerequisite: Graduate standing.*

Emphasis is on syntax and semantics, with attention to current linguistic theories and language use.

226AA-ZZ. Literary and Critical Theory**(4) STAFF***May be repeated for credit provided letter designations are different.*

Comparative examination of contemporary continental philosophy and of the canonical texts that have defined literary criticism and cultural theory. Critical reevaluation of the field of French studies.

- A. Modern Literary Theory
- B. Feminist Theory and Gender Studies
- C. Rhetoric and Literature

227AA-ZZ. Medieval and Renaissance Studies**(4) BROWN, ENDERS, SKENAZI***May be repeated for credit provided letter designations are different.*

Close literary investigation and cultural analysis (theoretical, rhetorical, codicological, artistic, performative, political and religious) of the most exciting literatures and critical trends in this burgeoning field.

- A. Introduction to Old French
- B. Courtly Love and Courtly Romance
- C. Medieval Theater and Theatricality
- D. Late Medieval Textuality and Poetic Authority
- E. Representations of Medieval Gender
- F. Religion and Skepticism in Renaissance Europe

- G. Renaissance Poetry
- H. Irony in the Renaissance

228AA-ZZ. Seventeenth and Eighteenth-Century Studies

(4) STAFF

May be repeated for credit provided letter designations are different.

Study of early modern French literature at a time of cultural and political transformation. Practice of theoretical approaches to early modern aesthetics, from Baroque and Classical theater and philosophy to Enlightenment fiction and epistemology.

- A. Classical Tragedy
- B. Classical Comedy
- C. Les Moralistes
- D. Topics in the French Classical Age
- E. The Libertine Novel
- F. "Les Lumières": Fiction and Philosophy
- G. Topics in Enlightenment Studies

229AA-ZZ. Modern and Contemporary Studies

(4) STAFF

May be repeated for credit provided letter designations are different.

Close readings of nineteenth and twentieth-century literary texts; multi-disciplinary inquiry into the art and character of modernity. Practice of critical approaches for achieving an understanding of the literary, cultural, and social aspects of modernity and post-modernity.

- A. Studies in the Novel
- B. The Theory of Fantastic Literature
- C. Poetry and Poetics
- E. Autobiography, Autoportrait, Autofiction
- F. Topics in Modernism

230AA-ZZ. Post-colonial and Francophone Studies

(4) STAFF

May be repeated for credit provided letter designations are different.

Study of the literature and culture from French-speaking countries around the world, with emphasis on post-colonial politics and interactions between widely divergent cultural traditions. Theoretical examination of the epistemological issues raised by the introduction of non-Western perspectives.

- A. Post-Colonial Francophone Narrative
- B. Francophone Literature: The Caribbean
- C. Francophone Literature: West Africa
- D. Francophone Literature: The Maghreb
- E. Literature of Immigration and the Minority Experience

231AA-ZZ. Cultural Studies and Intellectual History

(4) STAFF

May be repeated for credit provided letter designations are different.

Analyses of literary, historical and philosophical readings that have shaped the ways in which French and European writers represent the human experience of time and space. Close look at the political, moral, and philosophical functions of art and literature.

- A. The French Nation
- B. Modernity and the City
- C. Literature and Travel
- D. The Historical Imagination
- E. Poetics and Politics of Place
- F. The Intellectual
- G. Literature, Philosophy and Religion

232AA-ZZ. Literature, Science, and the Arts

(4) STAFF

May be repeated for credit provided letter designations are different.

Interdisciplinary studies of the cross-fertilization between literature, the performative and visual arts, and other disciplines.

- A. Topics in Theater Studies
- B. Literature and the Visual Arts
- C. The Medieval Book as Literary Artifact
- D. French Film and Theory
- E. Literature and Science
- F. Music and Literature

233AA-ZZ. Applied Linguistics, Instructional Theory, Professional Training

(4) ENDERS, SCHULTZ

May be repeated for credit provided letter designations are different.

Theoretical and practical issues in critical reading and writing research with a particular focus on the development of advanced academy literacy skills.

- A. Advanced Critical Writing
- B. Theories of Foreign Language Writing
- C. Literary Theory and Literacy
- D. French Language and Culture

299. Topics in Applied Linguistics

(4) STAFF

Same course as Education 299, EACS 299, German 299, Linguistics 299, and Spanish 299.

Specialized topics in the study of applied linguistics.

500. Apprentice Teaching

(4) STAFF

Units earned in this course, which are required of all teaching assistants, do not apply toward degree.

Includes orientation week, weekly meetings with supervisor, preparation of examinations, class visitations and discussions, videotaping of classes followed by review with supervisor, occasional workshops.

596. Directed Readings and Research

(2-12) STAFF

Prerequisites: graduate standing; consent of instructor.

Individual tutorial. Instructor is usually student's thesis advisor. Students doing initial research on the doctoral dissertations may sign up for this course.

597. Independent Study

(4) STAFF

Prerequisite: consent of graduate advisor.

Individual research projects, supervised by a faculty member. Requires permission of graduate advisor to enroll.

598. Master's Thesis Research and Preparation

(1-12) STAFF

No unit credit allowed toward degree. SIU grade.

Only for research underlying thesis, writing thesis. Instructor should be chair of student's thesis committee.

599. Dissertation Research and Preparation

(1-12) STAFF

Reserved for writing of the doctoral dissertation once the student has advanced to candidacy. Instructor should be chair of student's doctoral committee. A progress report must be turned in in order to receive a satisfactory grade for the course.

Italian Courses

Courses whose numbers are followed by X, Y, Z are taught in English.

LOWER DIVISION

Italian 1-6 and 26: Students in all sections of a given level progress at the same rate and cover the same amount of material. Students who have studied Italian at other institutions and wish to continue their study at UCSB are urged to take the placement examination given by the department.

Any two courses in the series Italian 1-6 must be taken in sequence and not simultaneously. Also, students may not enroll in a lower level Italian course than was previously taken in the Italian 1-6 series.

1. Elementary Italian

(4) STAFF

Introduction to the most basic elements of Italian grammar. Articles, adjectives, gender. Verbs in the present tense.

2. Elementary Italian

(4) STAFF

Prerequisite: Italian 1.

Logical continuation of Italian 1. Direct and indirect pronouns. Verbs in the past tense and the imperfect. Emphasis on the correct writing and speaking of Italian.

3. Elementary Italian

(4) STAFF

Prerequisite: Italian 2.

Continuation of Italian 2. Verbs in the future, conditional. Introduction to subjunctive. Further emphasis on the correct writing and speaking of Italian.

4. Intermediate Italian

(4) STAFF

Prerequisite: Italian 3.

Intended to develop the linguistic skills of students who have completed the first year. Review of basic grammar structures with emphasis on exceptions, enrichment of vocabulary, reading comprehension and discussion of modern short stories. In Italian.

5. Intermediate Italian

(4) STAFF

Prerequisite: Italian 4.

Increases the students' reading, writing, and speaking skills. Review more complex grammar structures through written exercises, enrichment of vocabulary, reading comprehension and discussion of contemporary short stories. In Italian.

6. Intermediate Italian

(4) STAFF

Prerequisite: Italian 5.

Further develops the students' reading, writing, and speaking skills. Intensive review of the most advanced grammar structures: subjunctives, passive voice, indirect discourse. Readings and discussion of contemporary short stories. In Italian.

8A. Italian Conversation

(2) STAFF

Prerequisites: Italian 1; concurrent enrollment in Italian 2 or 3.

Improves comprehension and conversational skills through the discussion of contemporary issues selected by the instructor.

8B. Italian Conversation

(2) STAFF

Prerequisites: Italian 3; concurrent enrollment in Italian 4 or 5.

Improves comprehension and conversational skills through the discussion of contemporary issues selected by the instructor.

20X. Introduction to Italian Culture

(4) FOGU

A sweeping inquiry into Italian culture, from its origins to its current trends. Exploration of the media, sports, gastronomy, art, music, politics, language, regional and ethnic identity, sexuality, the family, and urban life. In English.

20XH. Introduction to Italian Culture, Honors

(1) FOGU

Prerequisites: concurrent enrollment in Italian 20X; honors students only; consent of instructor.

Eligible students are invited to enroll in the honors seminar, which is generally taught by the course instructor.

26. Advanced Grammar and Composition

(4) ELLIS, BOVIO-ARNOLD

Prerequisite: Italian 6 or equivalent.

Serves as introduction to upper-division courses; designed to develop students' comprehension and writing skills through readings of contemporary Italian literature. Focuses on expansion of vocabulary and review of advanced Italian language structures. Prerequisite to UD courses taught in Italian.

99. Independent Study

(1-4) STAFF

Prerequisite: Italian 3 with a minimum grade of B.

Students must have a minimum 3.0 GPA for the preceding 3 quarters and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined.

Individual research project supervised by a faculty member.

99RA. Independent Research Assistance (1-4) STAFF

Prerequisite: Italian 3 with a minimum grade of B.

Students must have a minimum 3.0 GPA for the preceding 3 quarters and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined.

Independent research project supervised by a faculty member.

UPPER DIVISION

Courses whose numbers are followed by X, Y, Z are taught in English.

Italian 1-6 is prerequisite to all upper-division courses taught in Italian.

101. Advanced Reading and Composition: Modern Italy

(4) STAFF

Prerequisite: Italian 26.

Interdisciplinary introduction to modern Italian culture, art, and society from unification (1870) to the present, through readings, oral presentations, and composition. Advanced grammar topics are coordinated with cultural themes, such as nationalism, war, religion and politics.

102. Advanced Reading and Composition: Medieval and Renaissance Italy

(4) STAFF

Prerequisite: Italian 26.

Interdisciplinary introduction to Medieval and Renaissance Italian culture, art, and society, through readings, oral presentations, and composition. Advanced grammar topics are coordinated with cultural themes, such as courtly love, the development of Italian city-states, humanism, the role of women, art and artists.

109. Advanced Italian Conversation

(4) STAFF

Prerequisites: Italian 5; concurrent enrollment in Italian 6 or upper-division standing.

Discussion of contemporary issues selected by the instructor. Emphasis on idiomatic speech and vocabulary building.

111. Italian Short Fiction

(4) SNYDER, FOGU

Prerequisite: Italian 26.

Recommended preparation: Italian 101 or 102.

A study of the briefest forms of Italian narrative fiction ranging from the *exemplum* to the TV script, the short story, and the novella.

112. Italian Narrative Fiction

(4) SNYDER, FOGU

Prerequisite: Italian 26.

Recommended preparation: Italian 101 or 102.

A study of the longer forms of Italian narrative fiction, particularly the prose romance and the novel.

114X. Dante's "Divine Comedy"

(4) SNYDER

Dante's masterpiece, *The Divine Comedy*, remains among the most astonishing works of world literature. This course follows the pilgrim's progress through *Inferno*, *Purgatorio* and *Paradiso* in search of "the love that moves the sun and the other stars." In English.

119. The Art of Translation

(4) STAFF

Prerequisite: Italian 26.

Recommended preparation: Italian 101 or 102.

An intensive workshop exploring the theory and practice of translation. Students work at translating texts from Italian to English and vice versa.

121. The Art of Italian Drama (Page to Stage)

(4) ARNOLD

Prerequisite: Italian 26.

Intensive study of a single text for the Italian theater leading to its staging in the original language with students as actors.

123X. Italian Opera

(4) STAFF

Studies Italian operas, from the eighteenth to the twentieth centuries. Students learn to appreciate these musical masterpieces as literary works as well, through analyzing plots, studying the librettos, and listening to the music. In English.

124. Italian Theater

(4) SNYDER

Prerequisite: Italian 26.

Recommended preparation: Italian 101 or 102.

A study of the most important Italian theatrical texts and practices from the Renaissance comedy and the "commedia dell'arte" to contemporary works for the stage.

124X. Italian Theater in Translation

(4) SNYDER

A study of the most important Italian theatrical texts and practices from the Renaissance comedy and the *commedia dell'arte* to contemporary works for the stage. In English.

125. Italian Contemporary Writing

(4) STAFF

Prerequisite: Italian 26.

Recommended preparation: Italian 101 or 102.

A study of current practices of writing in Italy ranging from autobiography to cultural journalism to new avant-garde fictions.

126AA-ZZ. Literature in Italian

(4) STAFF

Prerequisite: Italian 26.

May be repeated for credit to a maximum of 16 units provided letter designations are different.

The literatures of Italy do not constitute a single canon but include many overlooked regional, migrant, and postcolonial texts all written in various forms of Italian. Consult the department office for specific topics.

138AA-ZZ. Cultural Representations in Italy

(4) STAFF

Prerequisite: Italian 26.

May be repeated for credit to a maximum of 16 units provided letter designations are different.

An interdisciplinary study of the ways in which representational practices (texts, images, sounds) have affected Italian culture over the ages. Topics include the body, power and politics, science and new media, and revolution.

138XX. Cultural Representations in Italy

(4) STAFF

May be repeated for credit to a maximum of 12 units provided letter designations are different.

An interdisciplinary study of the ways in which representational practices (texts, images, sounds) have affected Italian culture over the ages. Topics include the body, power and politics, science and new media, and revolution.

142. Women in Italy

(4) STAFF

An intensive study of writings by and about women from the early modern and modern eras.

142X. Women in Italy

(4) STAFF

An intensive study of writings by and about women from the early modern and modern eras. In English

144AA-ZZ. Gender and Sexuality in Italian Culture

(4) STAFF

May be repeated for credit to a maximum of 8 units provided letter designations are different.

Studies in the production of gender and the functions of sexuality in Italian culture including plays, films, paintings, and literary texts. In Italian.

144AX-ZX. Gender and Sexuality in Italian Culture

(4) STAFF

May be repeated for credit to a maximum of 8 units provided letter designations are different.

Studies in the production of gender and the functions of sexuality in Italian culture including plays, films, paintings, and literary texts. In English.

148X. Cities of Italy

(4) SNYDER

A close-up look at the great texts, histories, and cultures of Italian cities such as Rome, Venice, Florence, Ferrara, and Naples. In English.

160. Senior Seminar

(4) STAFF

Prerequisite: Italian 101 or 102.

Seminar for Italian majors wishing to participate in intensive study of a major work of Italian culture (filmic, literary, or artistic) of the past or present. See department for further information.

161AX-ZX. The European Union

(4) PADULA

Italian 161AX is the same course as Political Science 145.

Introduction to the history and organization of the European Union (the institutions, policies, goals, and successes in the EU). Focus on the ongoing process of economical, political, social, and cultural integration in Europe since the Second World War. In English.

162AX-ZX. Comparative Cultures: France and Italy

(4) STAFF

May be repeated for credit to a maximum of 8 units provided letter designations are different.

Interdisciplinary comparative study of selected cultural and social issues in France and Italy from the early medieval period to the present day. In English.

AX. From Decadence to Modernism

CX. Early Modern Epic

163X. Early Modern Epic

(4) STAFF

Class investigates myths of national foundation and the literary representation of colonial/imperial enterprises, and problems of narrative and political authority. Problems of cultural continuity and difference are explored through readings in Virgil, Dante, Camoens, Tasso, Rabelais, and Cervantes.

178B. Italian Cinema

(4) FOGU

Prerequisite: upper-division standing.

Not open for credit to students who have completed Italian 178.

Contemporary Italian cinema from neorealism to the present, in light of the themes of Mafia, camorra, 'ndrangheta.

179X. Fiction and Film in Italy

(4) STAFF

Not open for credit to students who have completed Italian 152.

An analysis of the relationship between narrative fiction and film in modern Italy ranging from the great works of Antonioni, Visconti, and Rossellini to recent versions of "literary classics" shot for television. In English.

180Z. Italian Cinema

(4) FOGU

A survey of the major trends and directors in Italian cinema since World War II. Directors to be studied include: Rossellini, De Sica, Visconti, Fellini, Antonioni, and Rosi. In English.

199. Independent Studies in Italian

(1-5) STAFF

Prerequisites: upper-division standing; completed at least two upper-division courses in Italian.

Students must have a minimum 3.0 grade-point average for the preceding three quarters and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined.

Individual investigations in literary fields.

199RA. Independent Research Assistance

(1-5) STAFF

Prerequisites: upper-division standing; completed at least two upper-division courses in Italian; consent of instructor.

Students must have a minimum 3.0 grade-point average for the preceding three quarters and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined.

Independent research, under the supervision of a consenting faculty member.

GRADUATE COURSES**500. Teaching Assistant Practicum****(4) STAFF**

Units earned in this required course for all teaching assistants do not count toward degree.

Supervised teaching of lower-division Italian courses. Includes orientation workshop, weekly meetings with supervisor, preparation and correction of examinations, preparations of discussion sections, class observations.

596. Directed Reading and Research**(1-6) STAFF**

Prerequisites: graduate standing and consent of instructor.

May be repeated for credit.
Individual tutorial.

Freshman Seminars

Freshman Seminars

Office of Student Academic Affairs

College of Letters and Science

Cheadle Hall 1117

Telephone: (805) 893-5258

E-mail: freshsem@LTSC.ucsb.edu

Freshman seminar courses are designed to give freshman students an opportunity to study with distinguished faculty in low-enrollment classes called seminars. Typically, enrollment in freshman seminars does not exceed 20 students.

These one-unit courses, graded P/NP only, touch upon current controversial issues or review interesting research in a narrow field. Recent seminars have included "Case Studies in Medical Ethics," "Musical Instruments of the World," and "Experimental Economics." Freshman Seminars are offered as Interdisciplinary 94AA-ZZ. Students may earn a total of 3 units from all INT 94AA-ZZ courses. No seminars with the same suffix (AA-ZZ) may be repeated. Visit www.freshsem.ucsb.edu for complete details and a listing of current topics. These courses apply purely as elective credit toward the degree. The College of Letters and Science publishes a list of the topics and instructors for each quarter's freshman seminar courses just before registration for that quarter. For more information, please visit our Web site at www.freshsem.ucsb.edu.

Chair: *Oliver Chadwick*

Faculty

Bodo Bookhagen, Ph.D., Potsdam University, Assistant Professor (quaternary climate change, geomorphic processes, landscape evolution, and tectonic processes)

David L. Carr, Ph.D., University of North Carolina, Chapel Hill, Assistant Professor (fertility, migration, population-environment linkages, land use/cover change in Latin America)

Oliver Chadwick, Ph.D., University of Arizona, Professor (pedology, soil geomorphology, soil geochemistry, quaternary geology, organic and mineral fluxes during soil, atmosphere, water and vegetation interaction)

Richard L. Church, Ph.D., Johns Hopkins University, Professor (facilities location and related computational algorithms, urban and regional modeling/planning, water resources)

Keith Clarke, Ph.D., University of Michigan, Professor (cartography and geographic information systems)

Helen Couclelis, Ph.D., Cambridge University, Professor (spatial cognition and behavioral geography, urban and regional theory and modeling, planning, the philosophy of science)

Tommy Dickey, Ph.D., Princeton University, Professor (atmosphere-ocean interactions and upper ocean mixing; turbulence and internal waves)

Hallie Eakin, Ph.D., University of Arizona, Assistant Professor (environmental hazards, economic globalization, human dimensions of global environmental change, agriculture, international development)

Catherine Gautier, Ph.D., University of Paris, Professor (earth radiation budget and cloud processes, radiative transfer and remote sensing, global climate change and earth system science education)

Reginald G. Golledge, Ph.D., University of Iowa, Professor (spatial cognition, behavioral geography, decision making, disability, transportation modeling, human wayfinding)

Michael F. Goodchild, Ph.D., McMaster University, Professor (spatial analysis and geographic information systems)

Konstadinos G. Goulias, Ph.D., University of California, Davis, Professor (transportation systems planning and modeling, applied econometrics and statistics, travel behavior dynamics and microsimulation)

Phaedon Kyriakidis, Ph.D., Stanford University, Associate Professor (geostatistics and spatial analysis)

Hugo A. Loaiciga, Ph.D., UC Davis, Professor (water resources, surface and groundwater hydrology)

Joel Michaelsen, Ph.D., UC Berkeley, Professor (climatology/meteorology, climate change; temporal and spatial statistics)

Daniel Montello, Ph.D., Arizona State University, Professor (spatial and geographic perception/cognition/behavior, cognitive issues in cartography and GIS, spatial aspects of social behavior, environmental psychology and behavioral geography)

Martin Raubal, Ph.D. Techn., Vienna University of Technology, Assistant Professor (cognitive engineering for geospatial services, cognitive semantic interoperability, location-

based decision services, spatial cognition and wayfinding, time geography, agents and artificial intelligence)

Dar Roberts, Ph.D., University of Washington, Professor (remote sensing of vegetation and soils, geobotany and spectroscopy, geology, ecology and ecophysiology)

David Siegel, Ph.D., University of Southern California, Professor (interdisciplinary marine science. Coupling of physical, biological, optical and biogeochemical marine processes on micro to ocean basin scales using satellite remote sensing, field observations and numerical modeling)

Terence R. Smith, Ph.D., Johns Hopkins University, Professor (spatial data processing, spatial analysis, spatial databases, knowledge-based approaches to geographic information systems)

Christopher J. Still, Ph.D., Stanford University, Assistant Professor (global ecology and biogeography, isotope biogeochemistry, plant ecophysiology, biosphere-atmosphere interactions)

Stuart Sweeney, Ph.D., University of North Carolina, Chapel Hill, Associate Professor (urban and regional modeling/planning, human migration, local economic development, spatial statistics)

Libe Washburn, Ph.D., UC San Diego, Professor (physical oceanography, ocean turbulence and mixing processes, ocean bio/optics, air-sea interaction and marine pollution)

Emeriti Faculty

Raymond C. Smith, Ph.D., Stanford University, Professor Emeritus (remote sensing of the oceans)

Waldo R. Tobler, Ph.D., University of Washington, Professor Emeritus (cartography)

Affiliated Faculty

David A. Cleveland, Ph.D. (Environmental Studies)

Frank Davis, Ph.D. (Donald Bren School of Environmental Science and Management)

Jeff Dozier, Ph.D. (Donald Bren School of Environmental Science and Management)

Thomas Dunne, Ph.D. (Donald Bren School of Environmental Science and Management)

James Frew, Ph.D. (Donald Bren School of Environmental Science and Management)

Mary Hegarty, Ph.D., Department of Psychology

Edward Keller, Ph.D., Department of Earth Science

John M. Melack, Ph.D. (Ecology, Evolution, and Marine Biology)

Susan S. Stonich, Ph.D. (Environmental Studies)

Christina Tague, Ph.D., Donald Bren School of Environmental Science and Management

Geography is the study of the Earth as the home of humanity. As such, it involves analysis of the spatial and temporal phenomena that make up the human and natural environment of Earth, from multiple disciplinary perspectives. The Department of Geography at UCSB is on the cutting edge of geographic research, technologies, and interdisciplinary studies.

The Department of Geography, founded over three decades ago, is now one of the crown jewels of UCSB. With 23 tenure-track faculty, 10 affiliated faculty, 22 administrative and 25 research staff, almost 100 graduate and 200 undergraduate students, the department is not only among the largest geography departments in the country, but it is also one of the highest ranked graduate departments at UC Santa Barbara, according to the National Academy of Sciences.

The department offers two undergraduate and two graduate degrees: Bachelor of Arts (B.A.) in Geography, Bachelor of Science (B.S.) in Physical Geography, Master of Arts (M.A.) in Geography, and Doctor of Philosophy (Ph.D.) in Geography. The majors are designed to provide a fundamental background for students seeking an interdisciplinary understanding of our planet and the varied human and natural systems that interrelate within it.

Undergraduate courses are arranged into four main areas: physical systematics, human systematics, techniques, and regional courses. Physical systematics courses teach students how the Earth's systems work in conjunction with each other. A variety of oceanography, meteorology, hydrology, soil science, and biogeography courses are offered each year. Human systematics courses cover the myriad ways that humans interact with each other and with their environment. These issues are discussed in courses on population, migration, and economic geography; transportation systems; urban and regional planning and modeling; human-nature relationships; and behavioral and cognitive geography. Geographic techniques involve the collection, processing, and interpretation of information about geo-referenced phenomena, and are studied in courses on remote sensing, geographic information systems (GIS), cartography, and spatial statistics. The department is well known for its technical training in these rapidly expanding fields, and a number of students from other departments take advantage of our technical courses. Regional courses discuss in an integrated way the physical, human, and historical characteristics of various regions of local and global interest.

The B.A. in Geography is an interdisciplinary program that offers students maximum flexibility with a minimum number of units. This major permits students the freedom of choosing their own path through various courses offered in the human, physical, and technical areas. The interdisciplinary nature of the major is supported by a Related Course List, which contains over one hundred classes from 20 different departments which students can apply towards their upper-division electives. These courses allow students to apply their geographic knowledge toward specific areas like archaeology, land use and planning law, plant ecology, or social change in developing nations. The low unit requirement makes this an ideal major for students wishing to pursue multiple objectives. Many geography students complete double majors with related disciplines such as business economics, environmental studies, anthropology, and global studies; others pursue such diverse double majors as geography and art history, renaissance studies, or microbiology.

The B.A. in Geography with an emphasis in Geographic Information Science is intended to build upon the Geography B.A. in the science behind spatial information technologies. The understanding of this science is imperative to the evolution of the technologies and advancement of the fundamental theories that arise from their use. The specialization of Geographic Information Science includes both the methods of geographic information technologies (geographic information systems, computer cartography, remote sensing, global positioning systems, visualization), and the bodies of theory that relate the tools to problem solving in geography. Students will choose one or more tracks in GIS science specializations, can combine tracks for coverage in breadth and depth, and pursue interests in particular technologies, methods or approaches. Graduates from the emphasis will find themselves well prepared to start a career in any of the geographic information technology fields, or to continue their education in graduate school.

The B.S. in Physical Geography provides majors with rigorous training in earth and environmental science. The degree offers students the option of choosing a more structured, directed program which emphasizes the quantitative and scientific approaches to studying the Earth's physical environment. At the same time, the major offers the flexibility of deciding on which areas of systematics the student wants to focus on: soils and hydrology, oceanography and meteorology, biogeography and soils or any other combination. B.S. students are offered a specific list of related courses from biology and geology to supplement their selection of systematics courses.

To declare geography as a major, students need to have completed two geography classes and have at least a 2.0 overall grade-point average. All major courses must be completed for a letter grade. The department undergraduate program assistant is available for counseling on matters such as major requirements, quarterly scheduling, honors programs, petitions, internships, career planning, and graduate school information.

Research Opportunities

Students are encouraged to take part in research within the department. Faculty and graduate students welcome assistance on various research projects. Many faculty members integrate their research projects into teaching and independent studies, and the large number of geography majors participating in internships shows that geographers engage well with the workplace. Our students find employment in a variety of fields in industry, government, and academia. Consult the undergraduate advisor for more information regarding Independent Studies (Geography 199), Independent Research Assistance (Geography 199RA), and Internships (Geography 193).

Study Abroad

Geography is the study of the Earth, and because of this, geographers need to get out into the world and explore. Our students are encouraged to take part in study abroad opportunities offered by the Education Abroad Program, and

field research programs like UCSB Extension's *Wildlands Studies Program*. Similar programs from other schools offer excellent experiential learning opportunities, although degree credit cannot be assured without prior approval.

Distinction in the Major

Students who maintain a 3.5 overall grade-point average and a 3.6 grade-point average in the major are welcome to pursue Distinction in the Major. In addition to maintaining the GPA, by the time of graduation, students must have completed 8 units of Independent Studies (Geography 199), graduate-level courses, or a combination of the two. Students must obtain permission from a faculty member and the department chair to take part in these courses. Please see the undergraduate advisor for more information.

Careers in the Major

The undergraduate major is designed to prepare students for careers in many different fields. Geographers find work as meteorologists, cartographers, ecologists, demographers, hydrologists, urban and regional planners, soil conservationists, aerial photo interpreters, marketing analysts, intelligence analysts, transportation planners, GIS technicians, and educators, among numerous other professions.

Undergraduate Program

Bachelor of Arts—Geography

Preparation for the major. Geography 3A and 3B and 5, and Geography 12. One course from either Area A – Natural Science, Area B – Social Science, or Area C—Geography. Area A: Chemistry 1A/1AL; EEMB 2 or 20 or 21; Environmental Studies 2; Geology 2 or 4; MCDB 20; Physics 10. Area B: Anthropology 2 or 5; Communication 1; Economics 1 or 2; Environmental Studies 3; Linguistics 20A; Political Science 7; Psychology 1; Sociology 1. Also required, one introductory statistics course from Communication 87, EEMB 30, PSTAT 5A or 5E, or Psychology 5. Area C: Geography 2, 7, 8, 20; Strongly recommended: Mathematics 3A, and one course in computer programming.

Upper-division major. Forty upper-division units in geography are required, distributed as follows:

- A1. 4 units from physical geography courses: Geography 102, 104, 110, 112, 114A, 114B, 116, 133, 134, 144, 162A, 163, 165, 166, 167, 170, 175;
- A2. 4 units from human geography courses: Geography 101, 108, 109, 111A-B, 141A, 141C, 145, 153A-B-C-D-E, 180, 185A-B-C-D, 190;
- A3. 4 additional units from either A1 or A2 above;
- B. 8 units from techniques courses: Geography 115A-B-C, 117, 118, 126, 128, 168, 172, 176A-B-BL-C, 184A, 184C, 191, 191L, 193;
- C. 8 units from integrative and regional courses: Geography 135, 135S, 140, 141B, 148, 149, 150, 155, 158, 159, 161, 169, 171BT, 171FP, 182;
- D. 12 units of upper-division geography electives taken from Areas A-C to bring unit total to 40.

Note: Geography 193, 194, 195, 198, 199, 199RA

can be applied to Area A1 or A2 by petition, depending on the subject matter. A maximum of 8 upper-division units from related fields can be counted towards the 40 unit total, if (a) they are selected from an approved list of alternatives, or (b) are approved by petition. The list of alternatives is available in the department office. Geography 193 (Internship) can count at most 4 units towards the major.

Bachelor of Arts—Geography—Geographic Information Science Emphasis

Preparation for the major. Geography 3A and 3B and 5 and 12. One course from area A - Natural Science and one course from area B - Social Science. Area A: Chemistry 1A/1AL; EEMB 2 or 20 or 21; Environmental Studies 2; Geology 2 or 4; MCDB 20; Physics 10. Area B: Anthropology 2 or 5; Communication 1; Economics 1 or 2; Environmental Studies 3; Linguistics 20A; Political Science 7; Psychology 1; Sociology 1. One introductory statistics course from the following: Communication 87; EEMB 30; PSTAT 5A or 5E; Psychology 5. One computer programming course: CS 5AA-ZZ or by petition. Strongly recommended: Geography 2, Math 3A.

Upper-division major. Forty to forty-seven upper-division units in Geography are required, distributed as follows:

- A. 24 -29 units from technical courses to be fulfilled by 1) completing two full sequences below or 2) completing one full sequence and at least one course from the remaining three sequences (*one sequence equals three courses plus associated lab sections*).
 - Sequence 1 – Remote Sensing:** Geography 102, 115A-B-C
 - Sequence 2 – Cartography:** Geography 118, 126, 128, 184A, 184C
 - Sequence 3 – Geographic Information Systems:** Geography 176A-B-C
 - Sequence 4 – Quantitative Techniques and Theoretical Methods:** Geography 117, 168, 172, 190, 191, 191/L, 194;
- B. 4 units from physical systematics courses: Geography 102, 104, 110, 112, 114A, 114B, 116, 126, 133, 134, 144, 162A, 163, 165, 166, 167, 168, 170, 175;
- C. 4 units from human systematics courses: Geography 108, 109, 111A-B, 141A, 141C, 145, 153A-B-C-D-E, 180, 185A-B-C-D, 190 (if not used in Area A);
- D. 4 additional units from either B or C above;
- E. 4 units from integrative and regional courses: Geography 135, 135S, 140, 141B, 148, 149, 150, 155, 158, 159, 161, 169, 171BT, 171FP, 182.

Note: Geography 194, 195, 198, 199, 199RA can be applied to Area B or C by petition depending on the subject matter.

Bachelor of Science—Physical Geography

Preparation for the major. Fifty-three lower-division units are required, as follows. Geography 3A-B, 5; Mathematics 3A-B-C; Physics 6A-B-C or Physics 1, 2, 3, 3L, 4, 4L, PSTAT 5A or EEMB 30; Chemistry 1A-AL or 2A-AC. In addition, students must select a minimum of

12 units from the following courses: Chemistry 1B-BL, 1C-CL; 2B-2BC, 2C-2CC, 95; Geology 2, 3, 14, 15; Astronomy 1, 2; Math 5A, 5B, 5C, 8; MCDB 1A-AL, 1B-BL, EEMB 2-2L, 3-3L, 21, 24. Strongly recommended: Computer Science 12; Geography 8, 12; and any additional courses from those listed above.

Upper-division major. Forty-six upper-division units are required, as follows. Ten units from Geography 102, 172. Twelve units from Geography 115A-B-C, 117, 118, 126, 128, 168, 176A-B-BL-C, 184A-C. Twelve units from Geography 104, 110, 112, 114A, 134, 167. Twelve units from Geography 114B, 116, 133, 135, 135S, 144, 149, 158, 162A, 163, 165, 166, 170, 175, 185D.

Note: Up to 4 units of Geography 193, 194, 195, 198, 199, 199RA can be applied to the B.S. Upper Division Requirements (excluding Geog 102 and 172) by petition depending on the subject matter.

Graduate Program

In addition to departmental requirements, candidates for graduate degrees must meet university degree requirements found in the chapter "Graduate Education at UCSB."

The Geography Department offers specialized graduate training leading to the M.A. and Ph.D. degrees in a selection of areas including the following:

Earth System Science (ESS): This systematic area emphasizes the measurement, analysis, and modeling of hydrologic, atmospheric, oceanic, and terrestrial systems and the interaction between systems. A large proportion of the problems addressed by researchers in ESS involve three common elements: large regional issues; mathematical and computational modeling; and large, spatially-indexed datasets.

Human-Environment Relations (HER): This systematic area covers the major components of human geography offered by the department, including human spatial behavior, spatial decision making and decision support, urban and regional modeling, planning and policy, human movement and transportation systems, resource and environmental management, environmental ethics, and human response to the changing environment.

Modeling, Measurement and Computation (MMC): This area involves the investigation of those sets of techniques from the areas of analysis, statistics and computation that are particularly well-suited to the modeling of the complex, geographic phenomena that are the subject of investigation in both ESS and HER. Important sub-areas include numerical modeling, spatial statistics, remote sensing, computational modeling and database systems (including GIS), and visualization, all of which are increasingly dependent on knowledge of computational theory and practice.

Admission

In addition to the university requirements for admission to graduate status described in the chapter "Graduate Education at UCSB," the department requires a high undergraduate grade-point average, particularly during the last two years of study. An undergraduate degree in geography is not required. Applicants with strong academic backgrounds in specific

systematic study areas are strongly encouraged to apply. All applicants are required to submit verbal, quantitative, and analytical Graduate Record Examination scores; total combined scores on the verbal and quantitative portions of the exam should exceed 1100. Some undergraduate preparation in mathematics, statistics and computer programming is encouraged.

Students applying to the department with an undergraduate degree only are encouraged to apply for the M.A./Ph.D. program if the Ph.D. is their final degree objective. Upon completion of the M.A. thesis, the student's thesis committee chair will submit a recommendation to the department Graduate Committee regarding admission to the Ph.D. program. The Graduate Committee makes the final decision on admission or denial for those M.A. students wishing to continue into the Ph.D. program. Students who have been enrolled in the M.A./Ph.D. program for at least three regular academic quarters may petition to skip the M.A. and go directly into the Ph.D. program. The petition requires the approval of the student's committee and the graduate advisor.

Applications are accepted for Fall only; the application deadline is December 15.

Master of Arts—Geography Degree Requirements

Course Requirements: All M.A. students are required to take Geography 201 (every quarter offered), 200A-B-C, 210A-B-C, and 500 if they will be teaching assistants.

Unit Requirement: The M.A. degree may be obtained under either of two plans. Plan I requires 34 units, at least 20 in 200- and 500-level geography courses exclusive of Geography 201, 200A-B-C, 500, 597, 598, and 599; no more than half may be in 596. A thesis is required. Plan II requires 46 units, at least 24 in 200- and 500-level geography courses exclusive of Geography 201, 200A-B-C, 500, 597, 598, and 599; no more than half may be in 596. A final examination assessing general knowledge of geography and knowledge of the candidate's chosen specialty area is required.

Doctor of Philosophy—Geography Degree Requirements

All Ph.D. students must major in a systematic area of study and are expected to develop great depth in techniques areas but will be tested only in one technical area. No foreign language is required.

All doctoral candidates must serve as teaching assistants for at least one quarter.

Students will be required to take a diagnostic interview to assist in the preparation for undertaking a doctoral program in geography. Normally, students are required to take 201 every quarter offered, 200A-B-C and 210A-B-C. Before advancement to candidacy, students must pass both a written and an oral qualifying examination and secure approval of a dissertation proposal.

Following completion of doctoral research, students will prepare a dissertation which must be approved by each member of their Ph.D. committee.

After receipt of the final draft of the dissertation, a formal oral defense will be scheduled and announced to the department as a whole. The purpose of the defense will be to clarify segments of the dissertation and/or acquaint the candidate with the nature of any further work that needs to be undertaken prior to approval of dissertation.

Course Requirements: All Ph.D. students are required to take Geography 201 (every quarter until advanced to candidacy), 200A-B-C, 210A-B-C, and 500.

Optional Ph.D. Emphasis in Cognitive Science

Students pursuing a Ph.D. in this department may petition to add an emphasis in cognitive science. The interdisciplinary program in cognitive science involves faculty from the Ph.D. programs in Anthropology, Computer Science, Education, English, Electrical and Computer Engineering, Geography, Linguistics, Psychology, Sociology, and Statistics and Applied Probability. Its goal is to give students an appreciation of the interdisciplinary study of thinking, perception, and intelligent behavior, as determined jointly by the nature of the environment and by the internal architecture of the intelligent agent, whether human, animal, or machine. The program features a structured set of courses which are taught individually and collaboratively by faculty from a variety of disciplines.

Students who petition to add the emphasis in cognitive science must fulfill the following requirements in addition to the requirements of the Ph.D. in their home department: (1) participation for at least three quarters in proseminar Interdisciplinary 200; (2) completion of at least three cognitive science elective courses with one each in three different departments; (3) completion of either (a) a research project, completed before the dissertation, resulting in a publishable paper, or (b) an extramural grant proposal for a study in cognitive science suitable for submission to an identified granting agency; (4) presentation of a research paper in a suitable academic forum, such as an emphasis or departmental colloquium, or a professional meeting; and (5) a Ph.D. dissertation centrally focused on a question emerging from cognitive science with at least two committee members representing faculty participating in the cognitive science interdisciplinary emphasis.

Optional Ph.D. Emphasis in Quantitative Methods in the Social Sciences

Students pursuing a Ph.D. in this department may petition to add an interdisciplinary emphasis in quantitative methods in the social sciences (QMSS). This new interdisciplinary emphasis involves faculty from the Ph.D. programs in Communication, Economics, Education, Geography, Political Science, Psychology, Sociology, and Statistics and Applied Probability. The areas of specialization of the participating faculty include advanced regression modeling techniques, multivariate statistics, bootstrap estimation methods, demography, econometrics, psychometrics, social network theory, mathematical psychology, spatial statistics, survey research, and educational and psychological assessment.

The QMSS emphasis helps students to attain the competencies needed to conduct quantitative social science research through core design and analysis classes, courses in advanced and specialized methodologies, and participation in interdisciplinary colloquia and research projects.

Each admitted student will develop, with his or her advisor, an individual contract listing the QMSS requirements to be completed. The contract must include the following:

- Two quarters of calculus, one quarter in linear algebra, and a one-year statistics sequence (These requirements can be waived if equivalent courses have already been completed).
- Attendance for at least three quarters at the ongoing QMSS seminar series, including presentation of at least one paper.
- Completion of at least three quantitative methods courses (excluding those listed above) or at least two of which are outside the student's home department.
- A Ph.D. dissertation that is centrally focused on an issue that is appropriate to the QMSS emphasis. The dissertation may make a contribution to methodological theory or may involve an advanced or innovative application.
- A dissertation committee that includes at least one QMSS faculty member from outside the student's home department.

Consult the department for additional information.

Optional PhD Emphasis in Transportation

Transportation Modeling and Simulation (TMS) is a specialty in the geography department integrating the three principal areas of training: Earth System Science (ESS), Modeling, Measurement, and Computation (MMC), and Human Environment Relations (HER). This special emphasis provides training in the methods used in transportation systems planning, design, and operations with key focus areas on data collection, modeling, and simulation. A variety of courses are available within the specialty, and students belonging to the specialty have many opportunities for fellowships and research grants supporting their dissertation research. The specialty has required courses that are tailored to individual student background and research plan. Admission to this specialty follows the same criteria as the department of geography.

For more information, please contact coordinator: Kostas Goulias at goulias@geog.ucsb.edu.

UCSB/San Diego State University Joint Ph.D. Program

The Departments of Geography at San Diego State University (SDSU) and UCSB have joined resources to offer a distinctive doctoral program. It brings together the faculties and facilities of two outstanding institutions. Students will spend a minimum of one year on each campus and will normally finish their work at SDSU. The joint program will complement but not duplicate the existing Ph.D. program at UCSB, which will continue to function separately from the joint doctoral program. Applicants should see the joint doctoral program coordinator at SDSU.

Geography Courses

LOWER DIVISION

2. World Regions

(4) **EAKIN**

Open to non-majors. Lecture, 3 hours; discussion, 1 hour.

An examination of the interdependency, connectivity and diversity that characterizes world regions. The course explores the interactions of processes of global change with the environmental and social identities of individual landscapes, cities and peoples.

3A. Oceans and Atmosphere

(4) **DICKEY, SIEGEL, STILL**

Lecture, 3 hours; discussion, 1 hour.

Introduction to the oceans and atmosphere and their role in the Earth's climate and its weather patterns. Focus on the flows of solar energy through the ocean and atmosphere systems. Human impacts of the Earth's climate are also introduced. (F, W)

3B. Land, Water and Life

(4) **CHADWICK, ROBERTS, SMITH, STILL**

Lecture, 3 hours; discussion, 1 hour.

Study of the interactions among water, landforms, soil, and vegetation that create and modify the surface of the Earth. Impacts of physical environment on human societies and humans as agents of environmental change. (W, S)

5. People, Place and Environment

(4) **CARR, EAKIN, MONTELLO, SWEENEY**

Lecture, 3 hours; discussion, 1 hour.

Survey of spatial differentiation and organization of human activity and human interaction with the Earth's biophysical systems. Sample topics include human spatial decision-making behavior, migration, population growth, economic development, industrial location, urbanization, and human impacts on the natural environment.

7. Oil and Water

(4) **GAUTIER**

Lecture, 3 hours; discussion, 2 hours.

Oil and water are two key strategic resources dominating the international scene. This class provides an overview of global distribution of oil and water resources and analyzes some of the social, economic, and geopolitical ramifications of these distributions.

8. Living with Global Warming

(4) **GAUTIER**

Lecture, 3 hours; laboratory, 3 hours.

Overview of global warming and climate change processes. Description of complex relationships between scientific, technological, economic, social, political, and historical facets of global warming and climate change. Introduction to the concept and practice of climate modeling.

12. Maps and Mapping

(4) **CLARKE**

Lecture, 3 hours; laboratory, 3 hours.

Surveys properties of maps, emphasizing map use and interpretation. Lecture topics include map abstraction, generalization, map projections, and symbolization. Special purpose maps, thematic maps, and the display of quantitative and qualitative information is considered.

20. Geography of Surfing

(4) **SWEENEY**

Lecture, 3 hours.

Social and physical science concepts manifested in the sport of surfing. Topics include wave generation and forecasting, economics of the surf industry, spatial search, strategic behavior under crowding, territorialism, and the generation/diffusion of regional surf cultures.

20H. Field Studies in Surfing

(1) **SWEENEY**

Prerequisite: concurrent enrollment in Geography 20.

Open to non-majors. Fieldwork, 1 hour.

Field study methods from physical, human, and regional geography applied to surfing. Physical methods focus on coastal engineering: hydrographic surveys, wave measurement, etc. Human methods

include spatial population distribution, attitude surveys, etc. Project or term paper, and presentation required.

95AA-ZZ. Basic Topics in Geography (2-4) STAFF

May be repeated once for credit provided subject matter differs. Tutorial, variable hours.

Geographic curriculum content that lies outside regularly scheduled courses. New classes under development or taught temporarily. Course number-letter combination reflects instructor. Content varies.

98. Basic Reading in Geography (1-2) STAFF

Prerequisite: consent of instructor.

Students must have a minimum 3.0 grade-point average. May be repeated to a maximum of 6 units. Students are limited to 2 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined. Tutorial, variable hours.

Provides introductory directed inquiry into a topic of interest to the student.

99. Basic Independent Studies (1-3) STAFF

Prerequisite: consent of instructor.

Students must have a minimum 3.0 grade-point average. May be repeated to a maximum of 6 units. Students are limited to 3 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined. Tutorial, variable hours.

Independent geographical research conducted under the guidance of Geography faculty. Topic and scope varies, to be specified by student and supervisory faculty member prior to registration.

UPPER DIVISION

101. Transportation Futures (4) CHURCH

Recommended Preparation: Geography 5.

Lecture, 3 hours.

Introduction to transportation related problems, involving energy, the environment, congestion, infrastructure, and future trends. Begin with a historical perspective of transportation innovations and their impacts on urban form, and then review current problems from the movement of freight, to the development of transit oriented neighborhoods.

102. Introduction to Environmental Optics in Physical Geography (5) ROBERTS

Prerequisites: Geography 3A-B and 115A.

Recommended preparation: high school trigonometry. Lecture, 3 hours; laboratory, 2 hours.

Basic physical principles of electromagnetic radiation in the environment and their application to physical geography and remote sensing. Radiative transfer in atmosphere, oceans, snow and ice, inland waters, rock, soil, and vegetation. Spectral signatures in remote sensing.

104. Physical Geography of the World's Oceans (4) WASHBURN

Lecture, 3 hours; discussion, 1 hour.

Recommended Preparation: Geog 3A Introduction to the processes which control the circulation of the world's oceans. Topics include: wind driven circulation, thermohaline circulation, water masses, waves, and tides.

108. Urban Geography (4) COUCLELIS

Prerequisite: Geography 5. Lecture, 3 hours; discussion, 1 hour.

Introduction to the study of the economic geography of cities and regions and its relation to planning: urbanization, internal structure of cities, settlement systems, regional growth and development, migration, transportation, housing.

109. Economic Geography (4) SWEENEY

Recommended Preparation: Geography 5.

Lecture, 3 hours; discussion, 1 hour.

Introduction to the study of spatial economic theories with applications at the urban, regional, and global scales. Topics include settlement system

dynamics and regional development, land economics and land use policies, and regional inequality and poverty.

110. Introduction to Meteorology (4) MICHAELSEN

Prerequisite: Geography 3A. Lecture, 3 hours; discussion 1 hour.

An introduction to the dynamics of the earth's atmosphere. Topics include: energy exchange mechanisms, energy balance, condensation and precipitation processes, the dynamics of pressure and wind systems, and the distributions of weather disturbances.

111A. Transportation Planning and Modeling (4) GOULIAS

Prerequisite: Geography 5.

Recommended preparation: Geography 117 or equivalent, introductory probability and statistics. Lecture, 3 hours; laboratory, 2 hours.

Issues, problems, technologies, policies, plans, programs, and the transportation-environment relationship. Transportation systems simulation, trip-based and activity data collection and modeling. Applications in planning, design and operations. Lab: Critically examine transportation plans and programs; explore and analyze travel surveys.

111B. Transportation Modeling and Simulation (4) GOULIAS

Prerequisite: Geography 111A.

Recommended preparation: A prior course in probability & statistics and regression methods; Economics 140A-B. Lecture, 3 hours; laboratory, 2 hours.

Multilevel data in time use, activity, and travel surveys. Revealed and stated choice data collection in laboratory/field studies. Regression models. Systems simulation. Applications in policy analysis and traffic operations. Lab: Data analysis to develop models for typical regional simulations. (W,S)

112. Environmental Hydrology (4) LOAICIGA

One one-day weekend fieldtrip required.

Recommended preparation: Geography 3B.

Lecture, 3 hours; laboratory, 1 hour.

Analysis of the water cycle with emphasis on land-atmosphere interactions; precipitation-runoff, flood, snowmelt, and infiltration processes.

114A. Soil Science (5) CHADWICK

Prerequisites: Chemistry 1A-B; and, Geography 3B or Geology 2.

Same course as Environmental Studies 114A.

Lecture, 3 hours; laboratory, 3 hours.

Introduction to the chemical, hydrological, and biological characteristics of soils, their global distribution, and their response to management. Field and laboratory projects are designed to provide an understanding of soil-landscape distribution, soil morphology, and the physical and chemical properties that influence management decisions.

114B. Soil Genesis and Classification (5) CHADWICK

Prerequisites: Geography 114A.

Same course as Environmental Studies 114B.

Lecture, 3 hours; laboratory, 3 hours.

Introduction to the chemical, physical, and biological processes that produce soil and influence their management. The morphology, genesis, classification, and global distribution of soil will be emphasized. Labs cover field site selection, soil description, sampling, laboratory preparation of soil samples, and selected chemical and physical analyses.

115A. The Earth from Above (5) CLARKE

Prerequisite: Geography 3A-B.

Recommended Preparation: Geog 12. Lecture, 3 hours; laboratory, 4 hours.

Introduction to physical and cultural geographic phenomena as recorded by airborne and satellite remote sensing systems, with emphasis on photo interpretation skills. Lab involves analysis of current and historical aerial photographs and satellite images

in hard copy and digital formats.

115B. Introduction to Remote Sensing (5) CLARKE

Prerequisites: Geography 115A with a minimum grade of C. Lecture, 3 hours; laboratory, 4 hours.

A basic understanding of the acquisition and nature of satellite imagery and the tools required to process data from remote sensing systems. Topics include spectral and spatial enhancement, image classification, geometric and radiometric correction, with emphasis on applications. Lab: Analysis of Landsat and SPOT digital image data using image processing software.

115C. Intermediate Remote Sensing Techniques (5) CLARKE

Prerequisite: Geography 115B with a minimum grade of C.

Lecture, 3 hours; laboratory, 4 hours.

Examines information extraction and radiative transfer relevant to remote sensing, focusing on applications for environmental monitoring and natural resource management. Lab exercises develop skills for advanced processing of satellite data, including linear transforms, image correction, and change detection. Both commercial and public-domain software packages are employed.

116. Groundwater Hydrology (5) LOAICIGA

Same course as Geological Sciences 173.

Recommended preparation: Geography 3B.

Lecture, 3 hours; laboratory, 3 hours.

Analysis of groundwater flow in aquifers, aquifer properties, study of wells and groundwater contamination, surface water-groundwater interactions. The laboratory: basic groundwater experiments, Darcy's Law, flow nets, solute dispersion, field measurements of bedrock groundwater characteristics, computer analysis of pumping-test data.

117. Scientific Research Methods in Geography (4) MONTELLO

Prerequisites: Geography 5; and, Geography 3A or 3B.

Lecture, 3 hours; laboratory, 1 hour.

Introduction to scientific research methods in human, physical, and techniques geography. Topics include: scientific logic and philosophy, physical measurement, surveys, experimental and nonexperimental research designs, computational modeling, sampling, data analysis and display, written and oral communication, and research ethics.

118. Cartographic Design (4) CLARKE, RAUBAL

Recommended Preparation: Geography 12 or 176A.

Lecture, 2 hours; laboratory, 4 hours.

Technical introduction to graphic representation of spatial information. Lectures cover principles of graphic design, coordinate systems and map projections, thematic mapping, and geographic visualization. Labs provide hands-on experience in designing different kinds of thematic maps with current GIS software.

126. History of Cartography: Maps in Science and Society (4) CLARKE

Lecture, 3 hours.

The growth of geodesy, printing, and technology; exploration of the earth and near planets; topographic surveys and photogrammetry; LANDSAT; relation of contemporary thematic cartography to statistics and graphic science.

128. Analytical and Computer Cartography (4) CLARKE

Prerequisite: Geog 12.

Lecture, 3 hours; laboratory, 2 hours.

Using computers to create and analyze maps. Coding, storing and representing geographical data. Accessing spatial data over the internet. Map data structures and transformations. Design and programming issues in map production.

133. Tropical Meteorology (4) MICHAELSEN

Prerequisite: a grade of C or better in Geography 110.

Lecture, 3 hours; laboratory, 1 hour.

Description of tropical atmosphere. High and low frequency variability: hurricanes, monsoon, El Niño, satellite observations, and modeling.

134. Earth System Science

(4) GAUTIER

Prerequisite: Geography 3A or Geography 8.

Recommended Preparation: Two prior upper-division courses in physical geography. Lecture, 3 hours; laboratory, 2 hours.

Description of various components of earth system: climate and hydrologic systems, biogeochemical dynamics, ecological dynamics, human interactions, and global change with an emphasis on the climate components. Observations and modeling of earth system.

135. Mock Environmental Summit

(4) GAUTIER

May be repeated for credit to a maximum of 12 units, but only 4 units count toward the major. Lecture, 3 hours.

A mock summit in which students act as representatives of different countries participating in environmental treaty negotiations. Students work in teams of four or five to prepare a presentation and discussion of environmental issues of concern to the world (e.g., energy, greenhouse gasses, etc.).

135S. Mock Environmental Summit

(4) GAUTIER

May be repeated for credit to a maximum of 12 units, but only 4 units count toward the major. This intensive course is taught for three weeks during the summer quarter only.

A mock summit in which students act as representatives of different countries participating in environmental treaty negotiations. This three-week course immerses students in the topic of global change and its associated policies thereby mimicking the pressures and intensity that exist at a real environmental summit.

140. Environmental Impacts in Human History

(4) ROBERTS

Recommended Preparation: Geography 3A or 3B; and Geography 5. Lecture, 3 hours; discussion, 1 hour.

Interactions between human history and the environment are explored. Example topics include early Earth history, long term climate change, the origin of agriculture, short term climate change, the origin of importance of disease and invasive species.

141A. Population Geography

(4) CARR

Prerequisite: Geography 5 or equivalent course.

Lecture, 3 hours; discussion, 1 hour.

Various geographic dimensions of human population dynamics: fertility, mortality, and migration. The concepts and language of demography are introduced. The causes and consequences of population dynamics are investigated, including links among population, environment, and development.

141B. Population and Development

(4) SWEENEY

Prerequisite: Geography 141A. Lecture, 3 hours; discussion, 1 hour.

A survey of global and regional of demographic change and their connection to significant economic development issues. Basic methods demographic analysis are introduced study historical and current issues population and development.

141C. California Population Analysis and Policy

(4) SWEENEY

Prerequisite: Geography 141A. Lecture, 3 hours; laboratory, 1 hour.

Introduces methods of demographic analysis used in local/regional policy analysis and planning. Course modules focus on population policy issues in California; such as, immigration, K-12 enrollment planning, affordable housing/land preservation, and planning for an elderly population.

144. Form, Process, and Human Use of Rivers

(4) KELLER, LOAICIGA

Prerequisite: Mathematics 3A-B or 34A-B.

Recommended Preparation: Physics 1 or 6A-AL or Geology 117, Geography 3B. Same course as Environmental Studies 144. Lecture, 3 hours; laboratory, 3 hours.

Basic understanding of fluvial (river) hydrology. In-depth evaluation of channel form and fluvial processes and impact of human use on rivers.

145. Society and Hazards

(4) EAKIN

Open to non-majors. Lecture, 3 hours.

Presents geographic approaches to the study of environmental hazards, exploring the evolution of theory and key concepts, causal processes, trends and patterns in the spatial distribution of vulnerability and hazard impacts, and the challenge of management and adaptation.

148. California

(4) MICHAELSEN

Lecture, 3 hours.

The unique landscapes of California and the physical, cultural, and biotic processes which have produced them.

149. The California Channel Islands

(4) STILL

Prerequisites: MCDB 1A-1AL and EEMB 2; or MCDB 20 or EEMB 20 or Geography 3A or 3B or Geology 2 or Environmental Studies 2.

Same course as Environmental Studies 111.

Lecture, 3 hours.

Discussion of biological, geological, ecological, anthropological, and oceanographic characteristics of the Channel Islands area as well as the management and human uses of this region. Emphasis on islands and ocean waters off Southern California.

150. Geography of the United States

(4) MONTELLO

Lecture, 3 hours.

Intensive study of the physical and cultural processes that have shaped and are shaping the landscapes of the United States.

153A. Behavioral Geography

(4) GOLLEDGE, MONTELLO

Lecture, 3 hours; laboratory 1 hour.

This course examines aspects of the human-environment interface, emphasizing behavioral processes in spatial contexts including spatial choice and decision making, consumer behavior, migration and other episodic movements, time budgets, spatial cognition, and cognitive mapping.

153B. Introduction to Spatial Decision Making and Behavior

(4) GOLLEDGE

Recommended Preparation: Geography 5 or equivalent.

Gateway for the spatial decision making and behavior field. Includes environmental cognition; consumer spatial behavior; migration; space-time budgeting; destination and mode choice; risk and hazard perception; spatial preference. Laboratory sessions involve locational and city management simulation games.

153C. Environmental Perception and Cognition

(4) MONTELLO

Prerequisite: Geography 5.

Research and theory on human perception and cognition of environments. Topics include spatial perception, spatial learning, knowledge structures, navigation and wayfinding, language and spatial cognition, map use, the spatial skills of special populations, and other issues.

153D. Spatial Decisions in Retailing

(4) CHURCH, GOODCHILD

Lecture, 3 hours.

Applications of spatial decision-making and behavior to retail systems: site selection, site evaluation, trade area estimation, spatial dimensions of retailing, and bricks vs. clicks retailing.

153E. The Geography of Everyday Life

(4) GOLLEDGE

Prerequisite: Geography 5. Lecture, 3 hours; discussion, 1 hour.

People have a common sense understanding of

geographical environments. This course explores such understandings, formalizes the spatial dimensions and relations of everyday activities, and relates them to human spatial abilities.

155. Geography of Latin America

(4) CARR

Prerequisite: Geography 5 or Global Studies 1 or 2 or Environmental Studies 1 or 2 or 3. Lecture, 3 hours.

El Pueblo, a vila, li tenamit: however you call where you live, geography matters. Why are human and physical patterns inscribed where they are on the Latin American landscape? And what are the economic, political, social, and environmental causes and consequences of human-environment interactions across the diverse regions of Latin America?

158. Geography of the California Current

(4) SIEGEL

Prerequisites: Geography 3A-B.

Recommended preparation: Geography 104. Lecture, 3 hours; discussion, 1 hour.

Introduction to the marine resources off the California coast. The interplay of oceanographic, climatic, biogeochemical and geologic factors and the influences of humankind will be addressed. Topics include: climate, circulation, biogeography, fisheries, marine mammals, petroleum, pollution, and exploration history.

159. Geography of Europe

(4) COUCLELIS

Lecture, 3 hours.

A systematic approach to the study of the human and physical resources of Europe. Special emphasis placed on the spatial aspects of urban, economic, and social processes.

161. World Agriculture, Food, and Population

(4) CLEVELAND

Prerequisite: upper-division standing.

Same course as Anthropology 149 and Environmental Studies 149.

Evolution, current status, and alternative futures of agriculture, food and population worldwide. Achieving environmentally, socially, and economically sustainable food systems; soil, water, crops, energy and labor; diversity, stability and ecosystems management; farmer and scientist knowledge and collaboration; common property management.

162A. Environmental Water Quality

(4) LOAICIGA

Same course as Environmental Studies 162A.

Recommended preparation: Geography 3B, lower-division biology, and chemistry. Lecture, 3 hours; laboratory, 2 hours.

Study of the physico-chemical and biological characteristics of natural waters, analysis of water pollution and treatment, water-quality regulation. The laboratory: independent research and supervised research of water pollutants and water treatment, quantitative analysis of water-quality data and one-day field work.

163. Ocean Circulation

(4) SIEGEL, WASHBURN

Prerequisite: Geography 104.

Not open for credit to students who have completed Geography 163A. Lecture, 3 hours.

Examination of the general circulation of the oceans and its impact on global climate and climate change. Topics include properties of seawater, forces driving ocean currents, wind and buoyancy generation of basin scale circulations, and their impact on global climate.

165. Waves and Tides in the Ocean

(4) WASHBURN, SIEGEL

Recommended Preparation: Geography 104. Offered in even-numbered years.

Examination of waves and tides in the ocean. Topics include surface waves, wave generation, internal waves, tides, and tide raising forces. Measurement techniques are also discussed. (S)

166. Physical Climatology

(4) MICHAELSEN

Prerequisite: Geography 110 with a minimum grade C.

Recommended preparation: Mathematics 3C or

equivalent. Lecture, 3 hours; laboratory, 1 hour.

Study of the processes which create the earth's climate. Flows of energy and material in the atmosphere and interactions with the surface. Large-scale atmospheric circulation patterns. Spatial and temporal variability. Climate modeling.

167. Biogeography: The Study of Plant and Animal Distributions

(4) STILL

Prerequisite: Geography 3A or 3B or Environmental Studies 2 or EEMB 2 or Geology 2.

Same course as Environmental Studies 167.

Recommended preparation: a prior course in EEMB. Lecture, 3 hours; discussion, 1 hour.

Basic processes governing geographic distribution patterns of biota, including migration, evolution, isolation, and endemism. Biogeographic regions and their histories and an introduction to island biogeography. Emphasis on plants and plant geography. One all-day field trip.

168. Field Studies in Biogeography

(4) STILL

Recommended Preparation: Geog 167 or Geog 114A or Env S 100 or EEMB 141.

An intensive field and laboratory course focused on ecological and biogeographical phenomena, including plant and soil processes and microclimate variations. Course will utilize UC Natural Reserves, primarily Sedgwick and Coal Oil Point. Students will be taught field measurements, including vegetation and soil sampling, as well as dendrochronology, ecophysiology, and basic micrometeorology.

169. Cultural and Biological Diversity of Food Plants

(4) CLEVELAND

Prerequisite: upper-division standing.

Same course as Anthropology 158 and Environmental Studies 158.

Recommended preparation: Geography 161 or Environmental Studies 149 or Anthropology 149. Lecture, 3 hours; laboratory, 3 hours.

The evolution of food plants from domestication to genetic engineering. Patterns of diversity around the world in small-scale, traditionally-based and industrial communities. Class participation in project on local olive diversity includes field work.

171BT. Biotechnology, Food, and Agriculture

(4) CLEVELAND

Prerequisite: upper-division standing.

Same course as Anthropology 166BT and Environmental Studies 166BT. Course offered every other year.

Recommended preparation: Geography 161 or Environmental Studies 149 or Anthropology 149. Lecture, 3 hours; laboratory, 3 hours. Letter grade only.

Social, cultural, ethical, biological, and environmental issues surrounding biotechnology (BT) and the food system. Includes theory and method of BT; scientific, social and political control of BT; effect of BT on genetic diversity, small-scale farmers, the environment, food supply, consumer health.

171FP. Small-Scale Food Production

(5) CLEVELAND

Prerequisite: Geography 161 or Environmental Studies 149 or Anthropology 149.

Same course as Anthropology 166FP and Environmental Studies 166FP. Lecture, 3 hours; laboratory, 3 hours.

Biological, ecological, social, and economic principles of small-scale food production and their practical applications. Includes each student cultivating a garden plot; lab exercises, field trips to local farms and gardens.

172. Intermediate Geographical Data Analysis

(5) KYRIAKIDIS

Prerequisites: PSTAT 5AA-ZZ or EEMB 30 or Psychology 5 or Communication 87. Lecture, 3 hours; laboratory, 3 hours.

Statistical analysis of geographical data. Topics include spatial auto-correlation, multiple regression in a spatial context, and introductory methods for the statistical analysis of point, area (lattice) and

continuous spatial data. Lab includes the use of statistical software for carrying out analyses of various spatial data types.

175. Environmental Data Analysis

(4) ROBERTS

Prerequisites: Geography 3A, 3B, and 110.

Recommended preparation: Geography 102.

Lecture, 3 hours; laboratory, 2 hours.

Introduction to measurement and interpretation of physical-environmental data (temperature, humidity, precipitation) and integrated environmental measures (e.g. potential evapotranspiration). Working with micrometeorological towers deployed across an environmental gradient, students develop and test hypothesis using real-time tower data.

176A. Introduction to Geographic Information Systems

(4) CLARKE, GOODCHILD, RAUBAL

Recommended Preparation: Geography 12. Lecture, 3 hours; laboratory, 2 hours.

Comprehensive overview of Geographic Information Systems and Science. Topics include geographic data collection, modeling, and representation; geographic databases; cartographic issues; spatial queries; mobile GIS and GI Services; cognitive and social aspects. Labs provide hands-on experience with GIS software.

176B. Technical Issues in Geographic Information Systems

(4) GOODCHILD

Prerequisites: Geography 176A with a minimum grade of C; concurrent enrollment in Geography 176BL.

Lecture, 3 hours.

Study of the technical issues underlying Geographic Information Systems, including coordinate systems and analytic geometry, database models and structures, algorithms and analytical procedures.

176BL. Lab in Geographic Information Systems I

(1) GOODCHILD

Prerequisites: Geography 176A with a minimum grade of C; concurrent enrollment in Geography 176B.

Laboratory, 3 hours.

Laboratory analysis of digital geographic information from physical and social sources, emphasizing the use of standard geographic information system software to illustrate techniques of spatial analysis, map digitizing, digital map display, and decision support.

176C. GIS Design and Applications

(5) CLARKE, GOODCHILD

Prerequisite: Geography 176B with a minimum grade of C.

Applying GIS theory and techniques to solve spatial problems in land and resource management, utilities, and municipal government. Lectures cover all stages of a GIS project, e.g., planning, design, analysis, and presentation of results. In labs, students collaborate in groups to design, develop, and present a GIS pilot study.

180. Geography of the Information Society

(4) COUCLELIS

Prerequisite: Geography 5; upper-division standing.

Recommended preparation: Geography 108.

Lecture, 3 hours; discussion, 1 hour.

Examination of urban, regional, and global trends in human activity and interaction caused by the spread of electronic technologies. Topics include land-use change, telecommuting, the "virtual geographies" of the Internet, issues of democracy and power, planning in the information age.

182. Global Cities in the Information Age

(4) COUCLELIS

Prerequisite: Geography 5.

Study of the economic, social, and political networks that link together cities of global importance. Specializations and roles of global cities in the information age economy. Examination of individual cities at the top tiers of the global urban hierarchy.

184A. Introduction to Cartographic Programming

(4) CLARKE

Prerequisite: Computer Science 5AA-ZZ and Geography 12.

Lecture, 3 hours; laboratory, 4 hours.

Introduces the student to cartographic programming principles. Instruction will emphasize structured decomposition, device independence and reusability in cartographic software. Lab work will provide students with hands-on experience with implementing a reusable cartographic library.

184C. Geographic Visualization

(4) CLARKE, RAUBAL

Prerequisite: Geography 12 or 118 or 176A.

Lecture, 3 hours; laboratory, 2 hours.

Introduction to visualizing geographic information. Focus on representation theories and methods for GeoVis tools and displays (advanced computer cartography, interface design, animation, multimedia, multivariate displays, 3D). Labs provide hands-on experience in constructing basic geographic visualization tools, including web-based maps.

185A. Geography Planning and Policy Making

(4) COUCLELIS

Prerequisite: Geography 5 or Environmental Studies 116. Lecture, 3 hours; discussion, 1 hour.

Relevance of geographic knowledge and skills to aspects of planning and policy making. Includes review of core concepts in decision making, planning theory, systems analysis, information systems, urban and regional modeling, forecasting, impact analysis, implementation of decisions, planning policies.

185B. Environmental Issues and Location Decision Making

(4) CHURCH

Prerequisite: Geography 3A or 3B or 5 or Environmental Studies 135A. Lecture, 3 hours; laboratory, 1 hour.

Introduction to decision making techniques with regard to land use allocation and planning. Special emphasis on addressing conflicts involving environmental concerns and multiple objectives. Examples involving water resources development, corridor location (rights-of-way, e.g., transmission lines), preservation of endangered species, disposal of solid waste, and power plant siting are presented.

185C. Local and Regional Economic Analysis

(4) SWEENEY

Recommended Preparation: Geography 108 or 109.

Lecture, 3 hours; laboratory, 1 hour.

Introduces methods of economic analysis used in local/regional policy analysis and planning. Course modules focus on planning and policy issues in California related to interregional income inequality, industry structure/competitiveness, and regional occupational labor markets.

185D. Urban and Environmental System Analysis

(4) CHURCH

Prerequisite: Geography 3A or 3B or 108 or 109.

Recommended Preparation: Mathematics 3A or 34A. Lecture, 3 hours; laboratory.

Applications of operations research techniques and decision analysis in structuring approaches to urban and environmental problems. Examples are drawn from problems in facility location, regional models, transportation and other networks, utility corridors and similar problems.

190. Location Theory and Modeling

(4) CHURCH

Prerequisite: Geography 5 or 108 or 109.

Recommended Preparation: Mathematics 3A or 34A. Lecture, 3 hours; laboratory.

A survey of the basic types of location problems encountered in the modern world and techniques used by analysts in government and industry to solve such problems. Relationships to classic location theory and models will be stressed. Students will have the opportunity to experiment with actual location models on a computer.

191. Introduction to Optimization Methods for Geographic Problems**(4) CHURCH***Prerequisite: Mathematics 3A, or 34A; upper-division standing.**Offered in even-numbered years. Lecture, 3 hours.*

Introduction to "Operations Research" methods that are used in the analysis of geographic problems, including linear programming, network programming, integer programming, and dynamic programming. Example problems involving spatial temporal decision making are emphasized. (W)

191L. Laboratory in Optimization Methods for Geographic Problems**(1) CHURCH***Prerequisite: Geography 191 (may be taken concurrently). Laboratory, 1 hour.*

Computer laboratory utilizing special optimization programs and computer graphics devices.

193. Internship in Geography**(1-4) STAFF***Prerequisites: upper-division standing in geography;**consent of department.*

Students must have an overall grade-point average of 3.0. May be repeated for credit to a maximum of 12 units but only 4 units may count toward the major. Field, 3-12 hours.

Practical experience and research on geographical problems under faculty direction as interns with local, state, and federal agencies, with private research and development firms, and with other business organizations. Periodic and final reports required.

194. Field Studies in Geography**(1-4) STAFF***Prerequisite: consent of instructor.**May be repeated for credit. May require course fee. Field, 10-40 hours.*

Field-based investigation of the geographic characteristics of specific places and regions. Human and/or physical phenomena may be emphasized. Field trips may include visits to parks, industrial sites, government facilities, wildlands, or urban areas. Scope, emphasis, and requirement subject to change.

195AA-ZZ. Selected Topics in Geography**(2-4) STAFF***Prerequisite: upper-division standing in geography.**May be repeated once for credit provided subject matter differs. Lecture, 2-4 hours.*

Geographic curriculum content that lies outside regularly scheduled courses. New classes under development or taught temporarily. Course number-letter combination reflects instructor. Content varies.

198. Readings in Geography**(1-2) STAFF***Prerequisites: upper-division standing; completion of at least two upper-division courses in geography; consent of instructor.*

Students must have a minimum 3.0 grade-point average. May be repeated to a maximum of 10 units; no more than 5 may be applied to the major. Students are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined.

Designed to provide in-depth directed inquiry into a topic of interest to the student.

199. Independent Studies in Geography**(1-5) STAFF***Prerequisites: upper-division standing; completion of at least two upper-division courses in geography; consent of instructor.*

Students must have a minimum 3.0 grade-point average. May be repeated to a maximum of 10 units; no more than 5 may be applied to the major. Students are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined. Geography 199 is considered an honors course and is required for those seeking distinction in the major.

Independent geographical research conducted under the guidance of Geography faculty. Topic and scope varies, to be specified by student and supervisory faculty member prior to registration.

199RA. Independent Research Assistance in Geography**(1-5) STAFF***Prerequisites: upper-division standing; completion of at**least two upper-division courses in geography; consent of instructor.*

Students must have a minimum 3.0 grade-point average. May be repeated to a maximum of 10 units; no more than 5 may be applied to the major. Students are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined.

Selected research under the direction of a faculty member.

GRADUATE COURSES**200A. Introduction to Geographic Research****(2) STAFF***Required of all geography graduate students.**Normally taken in fall quarter of entering academic year. Lecture, 2 hours.*

Presentation and discussion by department faculty of research areas in the department. Systematic and technique areas of emphasis will be presented, as well as department facilities and research collaborations with other institutions.

200B. Introduction to Geographic Research**(4) STAFF***Prerequisites: Geography 200A or approval of Graduate Committee.**Required of all geography graduate students.**Normally taken in winter quarter of entering academic year. Seminar, 3 hours.*

Fundamental issues of research in geography and related areas: the geographic perspective, scientific reading/writing and problem formulation, research techniques, the scientific enterprise, and science and society.

200C. Introduction to Geographic Research**(2) STAFF***Prerequisites: Geography 200A or approval of Graduate Committee; and Geography 200B.**Required of all geography graduate students.**Normally taken in spring quarter of entering academic year. Seminar, 2 hours; tutorial, 1 hour.*

Directed readings and research leading to a draft thesis proposal (MA students) or a systematic literature review in prospective dissertation area (Ph.D. students); participation in seminars discussing ongoing graduate research.

201. Seminar in Geography**(2) STAFF***Required of all geography graduate students every quarter offered. Seminar, 3 hours.*

A series of lectures and seminars on diverse research topics in human and physical geography, by visiting speakers or department faculty.

201Q. Quantitative Methods in the Social Sciences Colloquium**(2) SWEENEY***Same course as Sociology 212Q, PSTAT 250, and ED 212. May be repeated for credit. Lecture, 2 hours.*

Required course for students in the Interdisciplinary Quantitative Methods in the Social Sciences emphasis.

202A. Remote Sensing and Environmental Optics**(5) ROBERTS***Prerequisites: Geography 115A. Lecture, 3 hours; laboratory 3 hours.*

Principles of radiation emission; radiative transfer equation and some solution methods; surface interactions; instrumentation; applications to remote sensing and energy budgets in atmosphere, ocean, and other media.

208. Water Resource Systems Analysis**(4) LOAICIGA***Recommended preparation: Geography 112 and 116; upper-division calculus and statistics; computer programming or object-oriented programming desired (Matlab, Mathematica, Excel). Lecture, 3 hours.*

Quantitative methods (operations research, applied mathematics and statistics, numerical simulation) are used to analyze and synthesize complex water resources systems. Topics include economic analysis, hydropower, flood control, groundwater management, and reservoirs.

209. Pedology**(4) CHADWICK***Prerequisite: concurrent enrollment in Geography 209L. Lecture, 3 hours.*

A process-based quantitative study of soil development as driving variables of climate, biota, lithology, topography and geologic time. Emphasis on interactions among soil and other earth system components: atmosphere, lithosphere, biosphere, hydrosphere.

210A. Analytical Methods in Geography I**(4) SIEGEL***Prerequisite: Geography 172-172L or equivalents. Lecture, 3 hours; discussion, 1 hour.*

Introduction to analytical methods for geography research. Topics include: calculus, differential equations and linear algebra. Emphasis is placed on solving geographically relevant problems and their documentation.

210B. Analytical Methods in Geography II**(4) MICHAELSEN***Prerequisite: Geography 210A.**Not open for credit to students who have completed Geography 206. Lecture, 3 hours; laboratory, 1 hour.*

Statistical principles and practice of analyzing geographical data. Topics include bivariate and multiple regression and other multivariate techniques. Emphasis on exploratory data analysis and graphical techniques.

210C. Analytical Methods in Geography III**(4) KYRIAKIDIS***Prerequisite: Geography 210B. Lecture, 3 hours.*

Overview of key concepts in spatial statistics, including measures of spatial association and models for spatial regression, point processes and random fields. Geostatistical methods for analysis and interpolating continuous and area (lattice) data.

211A. Transportation Planning & Modeling**(4) GOULIAS***Prerequisite: introductory probability and statistics. Lecture, 3 hours; discussion, 2 hours.*

Issues, problems, technologies, policies, plans, and the transportation-environment relationship. Transportation systems simulation, trip-based and activity data collection and model building. Applications in planning, design and operations. Lab: Critically examine transportation plans and programs and explore travel surveys. Lectures same as 111A; graduate students write an issue paper on modeling and discuss it in class.

211B. Transportation Modeling & Simulation**(5) GOULIAS***Prerequisite: Geography 211A.**Recommended preparation: Geography 210B-C or equivalent. Lecture, 3 hours; laboratory, 2 hours.*

Transportation data collection and travel survey design. Revealed and stated choice data and their collection in laboratory and field studies. Regression models and systems simulation. Applications in policy analysis and traffic operations. Lab: Data analysis to develop models used in typical regional simulation.

211C. Activity and Travel Behavior Analysis**(4) GOULIAS***Prerequisite: Geography 211B.**Recommended preparation: Geography 210C or equivalent. Seminar, 3 hours.*

Time-use, activity analysis, and travel behavior in space, time, and social context. Cross-sectional and longitudinal data collection and data analysis with emphasis on the use of time, travel, technology, information, and telecommunication. Applications using simultaneous equations, multilevel, latent class, and structural equations models.

214A. Advanced Remote Sensing: Passive**(5) ROBERTS***Recommended Preparation: At least one prior course in remote sensing advised.*

Passive remote sensing (VIS/NIR, Thermal

microwave). Discussion of advanced sensors, techniques, modeling and applications in each spectral region. Includes a set of computer-based laboratory exercises. A final paper and oral presentation of a research project using remote sensing is required.

214B. Advanced Remote Sensing: Active (5) ROBERTS

Recommended Preparation: At least one prior course in remote sensing advised.

Active remote sensing. Discussion of advanced sensors, techniques, modeling and applications of active remote sensing including Synthetic Aperture Radar (SAR) and Light Detection and Ranging (LIDAR). Includes a set of computer-based laboratory exercises. A final paper and oral presentation of a research project using remote sensing is required.

220. Seminar in Regional Analysis (4) COUCLELIS

Prerequisites: Geography 172-172L. Seminar, 4 hours.

Study of current research in regional analysis. The topic will differ each year and will be announced in advance.

221. Research Methods in Human Geography (4) MONTELLO

Prerequisites: Geography 200A-B-C (may be taken concurrently). Lecture, 3 hours; laboratory, 1 hour.

Logic and techniques of conducting empirical research in human geography. Covers hypothesis formulation, literature sources, data collection (including surveys), experimental and non-experimental design, data analysis, and ethical treatment of human subjects.

224. Methods of Regional Analysis (4) SWEENEY

Prerequisites: Geography 108 and 185B. Seminar, 3 hours; laboratory, 3 hours.

Advanced seminar in methods of regional economic and population analysis. The population module covers the theory and construction of the multi-regional life table and projection model. The economic module reviews input-output models, regional econometric models, and CGE models. Other topics include data availability, incomplete data analysis, and demo-economic models.

225. Urban Problems (4) COUCLELIS

Recommended preparation: Geography 108 and 153B. Lecture, 1 hour; seminar, 2 hours.

Detailed studies of selected social, economic, and physical problems related to modern cities.

229. Environmental Perception and Cognition (4) MONTELLO

Prerequisite: graduate standing. Lecture, 2 hours; laboratory, 1 hour.

Theories and methods related to acquiring, representing, and analyzing knowledge of complex large-scale environments.

230. Behavioral Geography (4) GOLLEDGE, COUCLELIS

Recommended preparation: Geography 153A and/or 153C. Seminar, 3 hours.

Survey of behavioral approaches in a variety of areas of geography.

231. Cognitive Issues in Geographic Information Science (4) COUCLELIS, MONTELLO

Prerequisite: graduate standing. Seminar, 3 hours.

Theory and research on cognitive issues in geographic information science. Perception, memory, reasoning, communication, human factors in digital worlds.

234. Seminar in Cartography (4) CLARKE

Prerequisite: Geography 118. Seminar, 4 hours.

Study and critique of advanced research work in cartography. Topic will vary from year to year.

240. Mock Environmental Summit (5) GAUTIER

Prerequisites: Geography 3A-B, or equivalent with a grade of C or better; and 2 upper-division geography

courses.

Intensive course lasting 3 weeks during the summer and 5 weeks during the winter quarter.

Summit in which students act as expert scientists of different countries that participate in environmental treaty negotiations. Graduate students advise undergraduates, write documents, write presentations, ensure that science is understood and play a role in the negotiations.

241A. Population Geography (4) CARR

Not open for credit to students who have completed Geography 241. Lecture, 3 hours; discussion, 2 hours.

Advanced substantive investigation of the geography of human population. The geographical dimensions of fertility, mortality and migration are explored. Important recent and classic demographic literature is reviewed.

241B. Population, Development, and the Environment (4) SWEENEY, CARR

Lecture, 3 hours.

Exploration of global and regional patterns of demographic change especially as they relate to significant economic development or environmental issues. Course readings are selected to provide a broad overview of current research frontiers in addition to classic readings.

241C. Spatial Demography (4) SWEENEY

Prerequisites: Geography 210A, 210B, and 210C or equivalent.

Lecture, 3 hours; laboratory, 1 hour.

An introduction to mathematical and statistical demography. Primary emphasis is on spatially-explicit methods: multiregional life tables, multiregional projection, spatial statistics/econometrics applied to population, and life course analysis of migration. Matlab and SAS are used for applications.

242. Land Use - Land Cover Change (4) SCHNEIDER

Seminar, 3 hours.

Examines land use-land cover changes across ecosystems. Theoretical and methodological challenges to linking biophysical, socio-economic, and remote sensing/GIS analysis. Seminar includes review of current literature focusing on detection and monitoring, driving forces, and impacts of land modifications.

244. Society and Hazards (4) EAKIN

Prerequisite: graduate standing. Lecture, 3 hours; discussion, 1 hour.

Reviews of the contribution of human geography to the study of hazard risk, vulnerability, mitigation and adaptation. Classic and new theoretical and empirical literature is explored, emphasizing the connection between development processes, social equity and hazard vulnerability.

246. Earth System Science: Hydrologic Modeling (4) LOAICIGA

Recommended preparation: Geography 112 and 116; upper-division calculus and statistics; computer or object-oriented programming desired (Matlab, Excel). Lecture, 3 hours; Laboratory, 2 hours.

Quantitative and computational study of land-atmosphere hydrologic interactions; modeling of surface water and groundwater processes, regional groundwater systems and solute transport.

253. Global Warming: Causes and Consequences (4) GAUTIER

Prerequisite: Geography 134.

Physical processes involved in global warming: carbon dioxide increase and uptake; role of clouds, oceans and biosphere; consequences: sea level changes, hydrological cycle intensification, etc. Climate modeling and predictions.

255. Geography of Latin America (4) CARR

Lecture, 3 hours.

This graduate seminar supplements Geography

155 with a further exploration of primary texts probing historical and spatial patterns of society, politics, demographics, and the environment with an emphasis on human-environment interactions. Students are responsible for participating in class discussions on the assigned readings, for a term paper, and class presentation.

260. Seminar in Global Biogeochemical Cycles (4) STILL

Prerequisite: graduate standing. Seminar, 3 hours.

Examination of the global cycles of carbon, oxygen, nitrogen, and water; focus is on terrestrial environments; topics include photosynthesis, respiration, and interactions of humans with these cycles.

261. Ocean Optics (4) DICKEY, SIEGEL

Lecture, 3 hours.

An examination of the optical properties and radiative transfers in natural waters. Applications discussed include modeling of solar radiation penetration, reflectance and transmittance at the air-sea interface, and ocean color remote sensing.

262. Upper Ocean Physical Processes (4) SIEGEL, WASHBURN

Prerequisite: Geography 263.

May be repeated for credit with changes in content and methods. Lecture, 3 hours.

Detailed studies of upper ocean dynamics and physical processes. Topics may include mesoscale dynamics, mixed layer modeling, radiative transfer, turbulent mixing processes, and internal waves.

263. Introduction to Physical Oceanography (4) DICKEY, SIEGEL, WASHBURN

Lecture, 3 hours.

A graduate-level introduction to physical oceanography. Topics discussed include: properties of sea water, derivation and application of the equations of motion for a rotating planet, and the dynamics of wind- and buoyancy-driven general circulation.

264. Seminar in Oceanography (2) DICKEY, SIEGEL, WASHBURN

Prerequisites: Geography 163 or 263; and, Geography 265. Seminar, 2 hours.

Graduate seminar in physical, optical, and biological oceanography.

266. Introduction to Atmospheric Sciences (4) MICHAELSEN

Prerequisite: graduate standing. Lecture, 3 hours; seminar, 1 hour.

Fundamentals in atmospheric processes that are important for understanding the role of the atmosphere in earth's climate and biogeochemistry. Graduate-level introduction to radiation, dynamics, clouds, chemistry, and how they interact.

275. Seminar in Geographical Information Systems (4) GOODCHILD

Seminar, 4 hours.

Study of current trends in geographically oriented information processing systems.

276. Geographical Time Series Analysis (3) WASHBURN

Prerequisite: Geography 172.

Not available for credit to students who have completed Geography 276B. Lecture, 3 hours.

Introduction to time series analysis in geography. Topics will include spatial and temporal sampling, fast fourier transform techniques, linear systems, and digital filtering.

277. Spatial Environmental Modeling (4) ROBERTS

Prerequisite: Consent of instructor.

May be repeated for credit provided topics are different. Seminar, 3 hours.

Seminar covering topics in spatial environmental modeling. Integrates techniques such as remote sensing and GIS into modeling of spatial processes. Topics include biogeochemical cycles, hydrology, species distribution and habitat disturbance.

278. Practice of Geostatistical Modeling of Spatial Data**(5) KYRIAKIDIS***Prerequisites: Geography 172 or equivalent, and Geography 274.**Not available for credit to students who have completed Geography 276A. Lecture, 3 hours; laboratory, 2 hours.*

Practice of geostatistics on large environmental data sets using MATLAB. Methods for modeling spatial patterns, integrating spatial data across multiple spatial scales, and simulating complex spatial distributions.

279. Seminar in Geostatistics: Advanced Topics in Spatial Statistics**(3) KYRIADKIDIS***Prerequisite: Geography 278 or equivalent.**Not available for credit to students who have completed Geography 276C. May be repeated for credit. Seminar, 3 hours.*

Research frontiers in geostatistics, and innovative application of spatial statistics to the analysis of geographical data.

280. Seminar on Climate Change**(2-4) GAUTIER, SIEGEL, STILL***Seminar, 3 hours.*

A series of lectures and seminars on diverse research topics on climate change.

288AA-ZZ. Special Topics in Geography**(2-4) STAFF***Prerequisite: graduate standing. Seminar, variable hours.*

Geographic curriculum content that lies outside regularly scheduled courses. New classes under development or taught temporarily. Course number-letter combination reflects instructor. Content varies.

290. Urban and Environmental Systems Analysis**(4) CHURCH***Prerequisite: Geography 185B or Economics 1. Lecture, 4 hours.*

Applications of operations research techniques and decision analysis in structuring approaches to urban and environmental problems. Examples are drawn from problems in facility location, regional models, transportation and other networks, utility corridors, and similar problems.

291. Optimization Models for Geographic Problems**(4) CHURCH***Prerequisite: Mathematics 3A or 5A or 34A. Lecture, 3 hours.*

Survey of advanced optimization techniques with applications to geographical problems. Methods include advanced topics in linear programming, dynamic programming, integer programming, networks, and queuing.

294. Advanced Topics in Location and Transportation Systems**(4) CHURCH***Prerequisite: Geography 190 or 191 or 291.**May be repeated for credit with changes in content, methods, and applications areas examined. Lecture, 4 hours.*

Study of current research and application of systems models in the analysis, design, operation, and scheduling of transport and location problems.

295. Advanced Topics in Pedology**(4) CHADWICK***Prerequisite: Geography 209.**May be repeated for credit with changes in content, methods, and applications areas examined. Seminar, 3 hours.*

Intensive reading and discussions of current topics in soil-geomorphology, soil-geochemistry, and quantitative modeling of soil processes.

295A. Soils and Ecosystems**(3) CHADWICK***Prerequisite: graduate standing.**Same course as EEMB 295A. Seminar, 3 hours.*

Development of the links between the biological and inorganic components of the soil. Water availability and nutrients control plant and soil

microbial communities. These in turn affect the soil by enhancing weathering and modifying the local chemical environment.

296. Technical Issues in Geographic Information Systems**(5) GOODCHILD***Lecture, 3 hours; laboratory, 3 hours.*

Study of the technical issues underlying Geographic Information Systems, including coordinate systems and analytic geometry, database models and structures, algorithms and analytical procedures.

500. Teaching Assistant Training**(4) STAFF***May be repeated for credit. Seminar, 2 hours; laboratory, 1 hour; preparation, 1 hour.*

Compulsory course for new teaching assistants to examine geographic teaching methods. Emphasis on use of special equipment and facilities in the department, teaching aids, examination preparation and grading, student advising, and special problems.

595. Seminar in Marine Science**(2) DICKEY, ALLDREDGE**

A series of lectures and seminars on diverse research topics in marine science.

596. Directed Reading and Research**(2-8) STAFF***Prerequisites: consent of instructor and department chair.**No more than half the graduate units necessary for the master's degree may be taken in Geography 596. Preparation, 2-8 hours.*

Individual tutorial. Instructor is usually student's major professor.

597. Individual Study for Ph.D. Examinations**(1-12) STAFF***Prerequisites: consent of instructor and graduate advisor.**S/U grade. Maximum of 12 units per quarter; enrollment limited to 24 units total. Variable hours.*

Instructor should be student's major professor or chair of the doctoral committee.

598. Master's Thesis Research and Preparation**(1-12) STAFF***Prerequisites: consent of instructor and grad advisor.**S/U grading. Preparation, 1-12 hours.*

Research toward and writing of thesis.

599. Ph.D. Dissertation Research and Preparation**(1-12) STAFF***Prerequisites: consent of instructor and graduate advisor.**S/U grading. Preparation, 1-12 hours.*

Research toward and writing of dissertation. Instructor should be chair of student's doctoral committee.

Geological Sciences

For Geological Sciences, see Earth Science.

Germanic, Slavic, and Semitic Studies

Department of Germanic, Slavic, and Semitic Studies

Division of Humanities and Fine Arts

Phelps Hall 6206

Web site: www.gss.ucsb.edu

Department Chair: Elisabeth Weber

Faculty

Cornelia Becher, Ph.D., UC Santa Barbara, Lecturer (German language, 18th- and 19th-century literature)

Dorothy M. Chun, Ph.D., UC Berkeley, Professor (German linguistics, second language acquisition, intonation and discourse, computer-assisted language learning)

Susan Derwin, Ph.D., Johns Hopkins University, Associate Professor (holocaust studies, 19th- and 20th-century European and American novel, psychoanalysis)

Jocelyn Holland, Ph.D., Johns Hopkins University, Assistant Professor (German literature, romanticism, history of science)

Wolf D. Kittler, Ph.D., University of Erlangen-Nürnberg, Professor (18th-, 19th-, and 20th-century literature and philosophy, critical theory, deconstruction, history of science and media technology)

Katia McClain, Ph.D., UC Los Angeles, Lecturer (Slavic linguistics, discourse and pragmatics, language acquisition, language and gender, folklore, women in Eastern European culture and literature)

Larry McLellan, M.A., UC Berkeley, Lecturer (Slavic linguistics, language pedagogy)

Laurence A. Rickels, Ph.D., Princeton University, Professor (critical theory, psychoanalysis, deconstruction, 18th-, 19th-, and 20th-century literature)

Sven Spieker, Ph.D., Oxford University, Associate Professor (critical theory, psychoanalysis, deconstruction, 19th- and 20th-century literature, especially East European and Russian)

Evelyn Wade, Ph.D., UC Santa Barbara, Lecturer (German Language)

Elisabeth Weber, Ph.D., University of Freiburg, Professor (18th, 19th and 20th century literature and philosophy, German-Jewish culture, critical theory, deconstruction, psychoanalysis, trauma studies)

Sara Wheeler, M.A., UC Santa Barbara, Lecturer, (Hebrew linguistics, syntax discourse, language pedagogy, modern Israeli literature)

Emeriti Faculty

Richard C. Exner, Ph.D., University of Southern California, Professor Emeritus

Gunther H. Gottschalk, Ph.D., University of Southern California, Professor Emeritus

Gerhart Hoffmeister, Ph.D., University of Maryland, Professor Emeritus

Donald B. Johnson, Ph.D., UC Los Angeles, Professor Emeritus

Albert Kaspin, Ph.D., UC Berkeley, Professor Emeritus

Roselinde Konrad, Senior Lecturer Emerita

Torborg Lundell, Ph.D., UC Berkeley, Professor Emerita

Ursula R. Mahlendorf, Ph.D., Brown University, Professor Emerita

Devora Sprecher, Lecturer Emeritas

The Department of Germanic, Slavic, and Semitic Studies offers programs of study leading to the B.A. in German, M.A. and Ph.D. degrees in Germanic languages and literatures, and the B.A. in Slavic languages and literatures. Students in each program acquire an appropriate linguistic background in lower-division courses, study the historical development of the language, and are exposed to the modern language in most upper-division classes. The curriculum for each program is designed to provide a thorough survey of the literature.

Two years of Hebrew language courses are offered, with additional offerings in literature.

Qualified students majoring in Germanic languages and literatures may spend their junior year at the University's Education Abroad Center at Göttingen. In addition, there are opportunities for students to study for a semester in Potsdam, Göttingen, or Berlin. Qualified students majoring in Slavic languages and literatures are strongly encouraged to spend a semester at UC's Education Abroad Program in Moscow. Hebrew language and literature students are prepared for study in the University of California's Center for Education Abroad in Jerusalem. Prior study of the relevant language is either required or recommended in every case.

Undergraduate and graduate students have access to staff and faculty advisors throughout their studies. Students with a bachelor's degree in Germanic or Slavic languages and literatures who are interested in pursuing a California Teaching Credential should contact the credential advisor in the Graduate School of Education as soon as possible.

Senior Honors Program in German—Requirements

Students may request nomination for the senior honors program by filing an application form, or they may be nominated by faculty. Qualifying requirements include an overall grade-point average of at least 3.0, with 3.5 in the German major, and at least 105 units completed, including at least two upper-division courses in German.

To earn departmental senior honors, students will work with a professor of their choice for two quarters to complete a senior thesis, while receiving course credit for German 197 (Senior

Honors Project). No more than 4 units of 197 credits may be applied to the major requirements. Students who complete departmental honors will receive the notation of "Distinction in the Major" on both official transcripts and their diploma. Students interested in departmental honors should consult with the undergraduate advisor.

Senior Honors Program in Slavic—Requirements

Students may request nomination for the senior honors program by filing an application form, or they may be nominated by faculty. Qualifying requirements include an overall grade-point average of at least 3.0, with 3.5 in the Slavic languages and literatures major, and at least 105 units completed, including at least two upper-division courses in the Slavic undergraduate program.

To earn departmental senior honors, students will work with a professor of their choice for two quarters to complete a senior thesis, while receiving course credit for Slavic 197. No more than 4 units of 197 credits may be applied to the major requirements. Students who complete departmental honors will receive the notation of "Distinction in the Major" on both official transcripts and their diploma. Students interested in departmental honors should consult with the undergraduate advisor.

Bachelor of Arts—German

Preparation for the major. Required with grades of C or higher: German 1, 2, 3, 4, 5, 6, or placement beyond German 6 in the departmental placement examination. Recommended: German 8A-B-C.

Note: Students who have completed a more advanced course in a lower-division sequential series will not be permitted to take a course that is lower in the series.

Upper-division major. The major is designed for students who are interested in a rigorous liberal arts education. Forty-four upper-division units are required, including 2 courses from German 101A or 101B or 101C; 107A and 107B and 107C; 103 or 104; and 115A or B or C; and 190. The remaining electives will be selected from upper-division German offerings, with no more than 8 units from courses taught in English.

Four units of upper-division electives may be taken in a comparative literature course provided that it is taught by a faculty member of the Department of Germanic, Slavic, and Semitic Studies. In addition to that, another 4 units of upper-division electives in related fields may be accepted into the major by petition. Courses which are taught in English, but where the readings and other requirements, such as papers, are done in German do not fall under this limitation.

A year of study abroad at a German-speaking institution of higher learning is highly recommended. Students are encouraged to supplement their major by completing 20 or more upper-division units in another discipline such as political science or history.

Education Abroad Program participants, working in advance with their advisors, should determine credit and unit limitations for their

proposed work at Göttingen, Potsdam, or Berlin, Germany.

Bachelor of Arts—Slavic Languages and Literatures

Preparation for the major. Required with grades of C or higher: Slavic 1, 2, 3, 4, 5, 6, or equivalent. Students with proficiency in spoken Russian should not enroll in courses lower than Slavic 4. Recommended: Slavic 33, History 4A-B-C. Students transferring from other institutions may take the Russian Placement Exam for appropriate language placement.

Note: Students who have completed a more advanced course in a lower-division sequential series will not be permitted to take a course that is lower in the series.

Upper-division major. Forty upper-division units in Slavic courses are required, including 12 units from Slavic 101A-B-C-D-E-F, a minimum of 4 units selected from Slavic 145, 152B; a minimum of 4 units selected from Slavic 121, 122, 124; a minimum of 4 units selected from Slavic 130A-B-C-D-E, and a minimum of 4 units selected from History 135A-B-C, 191C; Political Science 128, 143. The remaining electives will be selected from upper-division Slavic offerings. Up to 4 units of upper-division electives in East/Central European or Russian studies in such areas as comparative literature, political science, history, film and media studies, economics, anthropology, or music may be accepted for the major by petition.

UCSB participates in the University of California Education Abroad Program through which UC students spend a semester in Moscow. Qualified students are strongly encouraged to take advantage of this opportunity; financial assistance is available. Additional information is available in the department office.

Minor—German Studies

All courses to be applied to the minor must be completed on a letter-grade basis. This includes both courses offered in German and those offered by other departments and applied to the minor.

Preparation for the minor. German 1, 2, 3, 4, 5, 6 or equivalent (0-24 units).

Upper-division minor. Twenty units, including 2 courses from German 101A or B or C (8 units); and 12 upper-division units selected from courses in German culture, linguistics, or literature. (Courses outside the department must be approved by the department before enrolling to ensure that content is relevant.)

Note: Substitutions and waivers are subject to approval by the chair of the department. Please see page 118 for special conditions governing minors in the College of Letters and Science.

Minor—Russian

All courses to be applied to the minor must be completed on a letter-grade basis. This includes both courses offered in Slavic and those offered by other departments and applied to the minor.

Preparation for the minor. Slavic 1, 2, 3, 4, 5, 6 or equivalent (0-30 units). Students with proficiency in spoken Russian should not enroll in courses lower than Slavic 4.

Upper-division minor. Twenty units, including 4 units from Slavic 101A-B-C-D-E-F, 121, 122, 124, and 16 units of upper-division electives selected from courses in Slavic languages, cultures, linguistics, or literatures.

Note: Substitutions and waivers are subject to approval by the chair of the department. Please see page 118 for special conditions governing minors in the College of Letters and Science.

Graduate Program

Admission

Admission is based on six kinds of evidence: (1) grade transcripts; (2) three letters of recommendation; (3) scores on the GRE and, if the applicant is not from an English-speaking country, TOEFL; (4) an audio sample of spoken English or German (tape, CD, digital) not longer than fifteen minutes; (5) a writing sample in German or English; and (6) a statement of purpose. The writing sample should be a substantial essay written in the context of an upper-division or graduate-level course. In addition to departmental requirements, candidates for graduate degrees must meet university degree requirements. Applicants should consult the newest *General Catalog* for possible changes in requirements.

Master of Arts—Germanic Languages and Literatures

Degree Requirements

The M.A. requires thirty-six units of graduate-level course work. Twenty of these units (equaling five courses) must be taken from the department's two-year series of basic graduate courses (numbered 200 or higher) in German literary studies and must be completed with a grade of B or better. During the second year students will take an Independent Study course on a topic of their choice. In addition, students may take one course each quarter in theory or a related field in Germanic, Slavic, or Semitic Studies or in another department, with approval of the graduate advisor. There is a residency requirement of three quarters, and students must maintain a cumulative GPA of at least 3.0.

In addition to their regular course work students must fulfill the foreign language requirement. They can either complete, with a grade of B or better, one upper-division course in a language other than German, or they can take the written exam administered by the department.

In addition to the course work and foreign language requirements, candidates for the master's degree must (1) complete a master's thesis that is acceptable to a supervisory committee of at least three ladder faculty members, two of whom must be from the graduate faculty in German, and (2) pass an oral examination covering three areas: two subjects chosen in consultation with the student's master's committee, and a third subject of the student's thesis topic.

Doctor of Philosophy—Germanic Languages and Literatures

Degree Requirements

Students entering the program with a B.A. need

a total of sixty units of graduate-level course work before advancing to candidacy. Thirty-six of these units are required before passing the M.A. examination. The remaining twenty-four units must be completed with a grade of B or better before beginning work on the dissertation. Additional course work may be deemed necessary to make up for deficiencies. Students must be in residence for six quarters excluding summers, and maintain a cumulative GPA of at least 3.0. The Ph.D. language requirement is competency in two languages in addition to German and English. It can be fulfilled under the conditions described in the section on the M.A. degree (above).

After passing the M.A. examination, Ph.D. students must complete a series of tutorials and/or courses in two areas, one of which may be in comparative literatures (studies of different national literatures, e.g. English/German or French/German), the other in an area of German literature. At this point in the academic program (years two through four), the student should work on an emphasis as well, such as comparative literature, media technology, theory, etc. The student's course work should be chosen in consultation with his/her advisory committee, which will be selected by the end of the first year of study following the award of the M.A.

This advisory committee, which administers the oral and written doctoral candidacy qualifying examinations and supervises the research and writing of the dissertation, must consist of at least three ladder faculty, of whom at least two will be affiliated with the graduate faculty in German.

Once this part of the course work is completed, the student must pass three field examinations on topics chosen in consultation with the advisory committee from the following list:

(1) German Linguistics or History of Language; (2) Literary Period and/or Genre; (3) Theory and Philosophy (such as German Idealism, Psychoanalysis, the Frankfurt School, Deconstruction); (4) Media Technology; (5) Holocaust Studies; (6) Special Field defined by the candidate in close consultation with the graduate advisor and at least one additional faculty member.

If necessary, students may retake each field exam once. The written examinations are to be followed by an oral examination on the student's proposed dissertation topic administered by the dissertation committee. Students who pass this examination will be advanced to candidacy. The final requirement is the successful completion of a doctoral dissertation including, in conclusion, the oral defense.

Optional Ph.D. Emphasis in Women's Studies

The Women's Studies Program, with almost fifty core and affiliated faculty members in over nineteen disciplines, serves as a model of interdisciplinary work and scholarly collaboration at UCSB. Women's Studies doctoral emphasis students are required to complete successfully four seminars that will enhance their understanding of feminist pedagogy, feminist theory, and topics relevant to the study of women, gender and/or sexuality. Women's Studies as

an inter-departmental set of conversations and intellectual questions supports a multifaceted undergraduate curriculum at UCSB. Graduate emphasis students are encouraged to apply to teach Women's Studies courses as teaching assistants and associates as part of their Women's Studies training.

Applicants must first be admitted to, or currently enrolled in, a UCSB Ph.D. program participating in the Women's Studies graduate emphasis: Anthropology; Comparative Literature; Counseling, Clinical, and School Psychology; English; French and Italian; Germanic, Slavic and Semitic Studies; History; History of Art and Architecture; Political Science; Religious Studies; Sociology; Spanish and Portuguese; or Theater and Dance. Candidates complete four graduate courses and select a member of the Women's Studies faculty or affiliated faculty to serve on their dissertation committees. Applications to the Women's Studies Doctoral Emphasis may be submitted at any stage of Ph.D. work, and applications will be considered throughout the year.

The Graduate Curriculum

Students pursuing the emphasis in Women's Studies will successfully complete four graduate courses. Only one may be taken in the student's home department.

- 1. Issues in Feminist Epistemology and Pedagogy (Women's Studies 270).** A one-quarter seminar that considers Women's Studies as a distinct field. It offers an interdisciplinary exploration of feminist theories of knowledge production and teaching practices. Readings cover past and present critical debates and provide theoretical approaches through which to analyze interdisciplinary epistemological and pedagogical issues.
- 2. Special Topics in Women's Studies (594 AA-ZZ).** A one-quarter seminar offered by a Women's Studies faculty member on topics of central concern to the field of Women's Studies.
Or,
Research Practicum (Women's Studies 280). A cross-disciplinary seminar in which fundamental questions in contemporary feminist research practice are considered in light of students' own graduate projects. Students may fulfill the Area 2 requirement by taking either a Special Topics Seminar or the Research Practicum.
- 3. Feminist Theories.** A one-quarter graduate seminar in feminist theory offered by any department, including Women's Studies.
- 4. Topical Seminar.** A one quarter graduate seminar, outside the student's home department, that addresses topics relevant to the study of women, gender, and/or sexuality.

Optional Ph.D. Emphasis in Applied Linguistics

The field of applied linguistics is a growing and vibrant one in universities nationally and internationally. Applied linguistics is an interdisciplinary field of research and instruction that provides theoretical and descriptive foundations for the empirical investigation of language-related issues, especially those of language

education (first-language, second-language, foreign-language, and heritage-language teaching and learning), but also issues of bilingualism and biliteracy, language planning and policy, language assessment, translation and interpretation, lexicography, rhetoric, and composition.

Students pursuing a Ph.D. in the Departments of Education, French and Italian, Germanic, Slavic, and Semitic Studies, Linguistics, and Spanish and Portuguese may petition to add an emphasis in applied linguistics. The interdisciplinary program in applied linguistics involves over 35 faculty members in 12 departments on campus.

Students who petition to add the emphasis must fulfill the following requirements in addition to the requirements for the Ph.D. in their home department: (1) a minimum of two courses taken from the core group of applied linguistics courses, which provide them with the basics of linguistics, second language acquisition theories, second/foreign language teaching methodologies, and practical applications of theory to teaching (Second Language Acquisition Theory and Research; Second Language Teaching Methodology; Foreign/Second Language Teaching Practicum; Topics in Applied Linguistics); (2) a minimum of two courses in one of five sub-areas (Linguistics, Discourse, Second Language Acquisition; Language and Society, Socio-cultural Perspectives, Multilingualism and Multiliteracy; Language, Literacy and Composition Studies; Language and Cognition, Psycholinguistics; Language Acquisition Using Technology); (3) required independent study (4 units), taken with an appropriate faculty member, leading to a research paper describing theoretical, empirical, or applied work in applied linguistics.

In addition to the course and unit requirements described above (including the research paper), a Ph.D. qualifying examination (or a separate exam) will test the student's knowledge within the applied linguistics emphasis. At least one faculty member of the applied linguistics program shall participate in the qualifying (or separate) examination.

Additional information may be found at: www.appliedlinguistics.ucsb.edu. Questions may be directed either to a participating faculty member or to Applied Linguistics, c/o Department of Germanic, Slavic, and Semitic Studies, UCSB, Santa Barbara, CA 93106-4130.

German Courses

LOWER DIVISION

Any two courses in the series German 1-6 must be taken in sequence and not simultaneously. Also, students may not enroll in a lower level German course than was previously taken in the German 1-6 series.

1. Elementary German

(4) BECHER

Beginning course in German. Student acquires the basic structure of the language, communicative skills, a limited general vocabulary, correct pronunciation, and an ability to read and understand simple cultural texts. Weekly laboratory assignments support and enhance classroom learning.

1G. Introduction to Reading German (for graduate students)

(4) BECHER

Prerequisite: graduate standing.

May be repeated for credit.

A brief introduction to the essentials of German grammar with emphasis on aspects of structure that are indispensable for reading skills (while deemphasizing those that are not). Reading texts are included from the beginning.

2. Elementary German

(4) BECHER

Prerequisite: German 1 with a grade of C or better.

Continuation of German 1.

2G. Introduction to Reading German (for Graduate Students)

(4) BECHER

Prerequisite: graduate standing.

Course is a continuation of German 1G, using the same approach, with reading texts on a more complex level. (W)

3. Elementary German

(4) BECHER

Prerequisite: German 2 with a grade of C or better.

Continuation of German 2.

4. Intermediate German

(4) BECHER

Prerequisite: German 3 with a grade of C or better.

Continuation of German 3. Introduction of the last few major points of grammar. Web-based Intercultural Exchange (ICE) with university students in a German-speaking country: On-line discussions about a variety of cultural topics, text-based chat sessions, oral interactions in virtual classrooms.

5. Intermediate German

(4) BECHER

Prerequisite: German 4 with a grade of C or better.

Expansion and refinement of linguistic and communicative skills learned in Beginning German. Greater focus on speaking German with fluency and accuracy, reading short authentic texts, and writing coherent, organized essays.

6. Intermediate German

(4) BECHER

Prerequisite: German 5 with a grade of C or better.

Continuation of German 5.

8A-B-C. German Conversation

(2-2-2) STAFF

Prerequisite: German 2.

May be repeated for credit to a maximum of 4 units each. Discussion, 2 hours.

Course designed to offer beginning and intermediate German language students communicative strategies needed by speakers and listeners in face-to-face interaction.

31. Doubles: Film and Literature

(4) RICKELS

When the double is visualized in film, the double's mention or description disappears from the typeface of literature. At the same time it takes center stage or screen in psychoanalytic theory.

43A. Dreaming Revolutions: Introduction to Marx, Nietzsche and Freud

(4) WEBER

Introduction to the revolutionary theories of Karl Marx, Friedrich Nietzsche, and Sigmund Freud. Explorations of three authors whose writings have profoundly changed our world.

43B. German Childhood and Youth

(4) STAFF

Not open for credit to students who have completed German 44.

Analyzes the positive (idyllic Heidi happy childhood) and the negative (cruelty of Grimm tales) myths which are popularly attributed to German childhoods through the lens of historians, filmmakers, and writers.

43C. Germany Today

(4) HOLLAND

Not open for credit to students who have completed German 49.

Covers Berlin Wall in 1989 through today to explore how writers, artists, musicians, intellectuals, and politicians respond to the question of who or

what is "German."

50A-B-C. Reading Texts of German Culture

(4-4-4) BECHER

Introductory reading class designed to accompany lecture classes. Meant for students who would like to explore original German text and film materials related to the topics discussed in the lecture classes. No prior knowledge of German is required.

55A-B. Contemporary German Pop Culture

(4-4) HOLLAND, WEBER

Study of contemporary film, music, and other facets of pop culture that have shaped the lifestyle of today's nation of Germany.

A. Study of pop music from 1989 to today, and its impact on the new emerging society of post-Wall Germany, focusing on the pointed, humorous, and sometimes scathing lyrics and pop music's ties to German youth culture.

B. Study of contemporary German cinema since 1970, exploring cinematic representations of issues such as immigration, opposition to East Germany's regime, National Socialism and the Shoah, racism, and sexuality.

95A. Elementary Yiddish

(4) STAFF

An introduction to the Yiddish language. The goal is to convey the rudiments of the grammar, and to acquire the ability both to read printed Yiddish and to read and write cursive Yiddish.

95B. Intermediate Yiddish

(4) STAFF

Prerequisite: German 95A.

Continuation of German 95A with further exposure to the grammar of Yiddish. More attention given to standard literary figures (Sholem Aleichem, Peretz, etc.) and their easier works.

95C. Advanced Yiddish

(4) SCHWARTZ

Prerequisite: German 95B.

Continuation of German 95B with advanced grammatical study. Emphasis on literary texts of some maturity and difficulty as well as contemporary Yiddish in this country, both journalistic and literary.

99. Introduction to Research

(1-4) STAFF

Prerequisite: consent of department and instructor.

Students must have an overall GPA of 3.0. May be repeated to a maximum of 8 units, but only 4 units may be applied toward the major. Students are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined.

Independent research under the guidance of a faculty member. Exceptional students are offered an opportunity to undertake independent or collaborative research or to act as interns for faculty-directed research projects.

UPPER DIVISION

German majors please note that no more than 8 units of German courses taught in English may be applied toward the major.

101A-B-C. Advanced German

(4-4-4) BECHER

Prerequisite: German 6.

Speaking, listening, reading, and writing on an advanced level, while exploring contemporary German culture. Systematic review of grammar material. Additional focus on vocabulary building. Written and oral discussions based on newspaper articles, literary texts, German films, and Web sites.

103. Phonetics and Phonology

(4) CHUN

Prerequisite: German 6.

Introduction to the German sound system and to pronouncing German words and sentences. Focus on describing and producing vowels and consonants, and on improving pronunciation, including attention to rhythmic, stress, and intonational differences between German and English. Taught in German.

104. German Language and Society

(4) CHUN

Prerequisite: German 6.

Discussion of the dialects of German spoken in Germany, Austria, and Switzerland. Topics include: geographical and social varieties of standard and colloquial German (e.g., Jugendsprache); the language of email and the Internet; “linguistic” problems after reunification. Taught in German.

105A-B-C. Advanced Conversation
(2-2-2) STAFF

Prerequisite: German 6 (may be taken concurrently).
May be repeated for credit to a maximum of 4 units each.

Emphasizes interactional strategies needed for communication in German, while also giving intermediate and advanced students the opportunity to discuss a wide variety of topics.

107A-B-C. History and Culture
(4-4-4) STAFF

Prerequisite: German 6.

Careful and close readings from the cultural history of German speaking countries. Materials, which may be revised each academic year, include documents from literature, philosophy, art, music, architecture, science, politics, and law. Taught in German.

115A-B-C. Survey of German Literature
(4-4-4) STAFF

Prerequisite: German 6.

A. Survey of the literary movements of the twentieth century.

B. Survey of the literature of classicism and romanticism.

C. Survey of the literary movements of the nineteenth century.

116A. Representations of the Holocaust
(4) WEBER, DERWIN

Prerequisite: upper-division standing.

Same course as *Comparative Literature 122A*.

Close reading of post-Holocaust literature. Taught in English.

138. Psy Fi: German Science Fiction
(4) RICKELS

Prerequisite: upper-division standing.

In German culture and thought science fiction provided owner's manual instruction to technologization, modern total war, and psychological warfare. Taught in English.

143. The Superhuman
(4) RICKELS

Prerequisite: upper-division standing.

Our ongoing technologization received two theoretical frames by the end of the nineteenth century: first the theory of evolution, then psychoanalysis. In this double setting, the fantasy of the superhuman has been opening up new prospects for man-and-God.

145. Second Language Acquisition
(4) CHUN, SCHULTZ

Prerequisite: upper-division standing.

Same course as *Linguistics 141 and French 107X*.

An introduction to the theories and principles of how adults acquire a language other than their mother tongue, why it is more difficult than acquiring their first language, and what needs to be learned, from linguistic, psychological and social perspectives.

151C. Literature of Central Europe
(4) SPIEKER

Prerequisite: upper-division standing.

Same course as *Slavic 151C and Comparative Literature 161*.

Investigation of the prolific literatures of central Europe, one of the culturally and linguistically most diverse regions of the European continent that has produced writers such as Italo Svevo, Franz Kafka, Robert Musil, Bruno Schultz, and others. Readings in English.

164E-G. Great Writers in German Language
(4-4-4) STAFF

Prerequisite: Upper-division standing.

May be repeated for credit to a maximum of 32 units provided letter designations are different, but only 12 units may be applied toward the major.

One or more major figures will be studied each

quarter. Readings and lectures in English.

E. Kafka

F. Nietzsche in Literature

G. Freud

164I. Modern Autobiography and Memoir: Texts and Contexts
(4) STAFF

Prerequisite: Upper-division standing.

Not open for credit to students who have completed German 141.

How do life's events shape autobiographical writing? Conversely, how does the writing about a life actually shape its meaning? These and other questions are explored in the works of modern writers and filmmakers. Taught in English.

166. Grimm
(4) STAFF

Prerequisite: upper-division standing.

Not open for credit to students who have completed German 133.

Explores the Grimm tale of childhood bedtime stories from Germany to Disney.

170. Women Writers
(4) HOLLAND

Prerequisite: upper-division standing.

Focus on the female voices in German literature, from romanticism to our days: Rachel Varnhagen, Bettina von Arnim, Dorothea-Hulshoff, Sabine Spielrein, Ingeborg Bachman, Nelly Sachs, and others. Lectures and readings in English.

179B. Mysticism
(4) WEBER

Prerequisite: upper-division standing.

Same course as *Comparative Literature 179B*.

Not open for credit to students who have completed German 169.

Analysis of German mystical writing, its roots in ancient Greek texts, revolutionary impact, links with other mystical traditions, influence on secular literature. Texts include Hildegard von Bingen, Meister Eckhart, Mechthild von Magdeburg, Novalis, Rilke, etc. Taught in English.

179C. Mediatechnology
(4) STAFF

Prerequisite: upper-division standing.

Same course as *Comparative Literature 179C*.

Not open for credit to students who have completed German 180.

Telegraph, telephone, phonograph, and film are techniques that have engendered new forms of representation, communication, and thinking. Course studies the impact of these transformations in literature and on literature. Taught in English.

182. Vampirism in German Literature and Beyond
(4) RICKELS

Prerequisite: upper-division standing.

From the earliest eye-witness accounts of vampire attacks in ancient Rome to the novels of Stoker and Ewers, the films of Dreyer and Browning, and the interpretations of Voltaire and Freud, bloodsucking has remained, in our culture, our premier and oldest legacy. Taught in English.

183. The Horror Film
(4) RICKELS

Prerequisite: Film Studies 46 or upper-division standing.

Same course as *Film Studies 144*.

Study of the horror film genre and the reasons for its popularity, including new interest in psychoanalysis and reaction to modern mass society and consumerism. Covers issues of sacrifice, simulated catastrophic loss, and other themes of catharsis.

187. Satan in German Literature and Beyond
(4) RICKELS

Prerequisite: upper-division standing.

Explores the rich popular literature dealing with making deals with the devil with focus fixed on the German contributions (for example the Baroque *Trauerspiel*, Luther, versions of *The Faust Legend*).

190. Proseminar
(4) STAFF

Prerequisite: German 6.

May be repeated for credit to a maximum of 12 units, but only 4 units may be applied toward the major.

Intensive advanced seminar on topic to be determined on a quarterly basis. Taught in German.

193. The Creature in German Literature and Beyond
(4) RICKELS

Prerequisite: upper-division standing.

Through Freud's *Totem and Taboo* the creature is explored in the long history of fictions of becoming animal and of surviving the threat of evolutionary mutations of “animals.”

197. Senior Honors Project
(4-8) STAFF

Prerequisites: open to senior majors only; consent of instructor.

Students must have a 3.0 overall grade-point average and a 3.5 grade-point average in the major. May be repeated twice.

An independent study course (one to three quarters) directed by a faculty member with a carefully chosen topic and bibliography which will result in a documented project or a senior thesis.

198. Readings in German
(1-5) STAFF

Prerequisites: upper-division standing; completion of two upper-division courses in German.

Students must have a minimum 3.0 grade-point average for the preceding three quarters and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined. May be repeated for credit to a maximum of 8 units.

Independent studies in German. Individual investigations in literary fields.

199. Independent Studies in German
(1-5) STAFF

Prerequisites: upper-division standing; completion of two upper-division courses in German.

Students must have a minimum 3.0 grade-point average for the preceding three quarters and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined.

Individual investigations in literary fields.

199RA. Independent Research Assistance in German
(1-5) STAFF

Prerequisites: upper-division standing; completion of two upper-division courses in German; consent of instructor and department.

Students must have a minimum 3.0 grade-point average for the preceding three quarters and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined.

Coursework shall consist of faculty supervised research assistance.

GRADUATE COURSES

203. German Phonetics and Phonology
(4) CHUN

Introduction to the German phonological system and to pronouncing German words and sentences. Focus on describing and producing vowels and consonants, and on improving pronunciation, including attention to rhythmic, stress and intonational differences between German and English. Taught in German.

204. German Language and Society
(4) CHUN

Discussion of the dialects of German spoken in Germany, Austria, and Switzerland. Topics include: geographic and social varieties of standard and colloquial German (e.g., Jugendsprache); the language of email and the Internet; “linguistic” problems after reunification. Taught in German.

210. Seminar in Literary Theory and Criticism
(4) STAFF

Prerequisite: consent of instructor.

Topics in literary theory to be determined on a quarterly basis. Taught in English or German—determined quarterly.

214. Greek Myths in German Tragedy

(4) WEBER

Prerequisites: graduate standing; consent of instructor.

The tragedies of Antigone, Penthesilea, Medea as read by Hölderlin, Kleist, Grillparzer. Readings by Lessing, Hegel, Nietzsche, Heidegger, and others.

222. Deconstructions

(4) WEBER

Prerequisite: consent of instructor.

"Deconstruction" is one of the most controversial contemporary theoretical approaches to texts.

According to Derrida, "deconstruction" exists only as deconstructions, replacing one solution with a multiplicity of questions, leading to other questions, and to a radically new ethics of multiplicity.

227. Reading Goethe

(4) RICKELS

Prerequisite: graduate standing.

The problematic reception of Goethe from Schlegel through Thomas Mann to Germanistics today as a crisis in reading allegorized in advance in Goethe's works.

229. Faust Tradition

(4) RICKELS

Prerequisite: graduate standing.

The legendary figure of German letters is at the same time master of the university. Seminar doubles as exploration of genealogies of modern institutions (the university, the press, commodity and stock markets, the nuclear family, and so on).

230A. The Romantic Movement

(4) HOLLAND

Prerequisites: German 201A-B or equivalent.

Early German romanticism, with emphasis on theoretical premises and their literary expression.

242A. Back to Frankfurt School

(4) RICKELS

Prerequisite: graduate standing.

Topics include "The Case of California," quarrels with Habermas, Benjamin's ghosts, and the merger proposals between Marxism and psychoanalysis.

243. German Judaism in Literature and Philosophy

(4) WEBER

Prerequisites: graduate standing and consent of instructor.

Analysis of German eighteenth-, nineteenth-, and twentieth-century texts on Judaism. Exploration of historical, philosophical, political contexts of desire for/resistance against "German-Jewish symbiosis." Discussions include German, French, and Israeli commentaries.

262A. Applied Linguistics

(4) CHUN

Same course as Interdisciplinary 262A.

Overview of the basic theoretical principles of second language acquisition as they apply to language teaching and learning. Discussion of different methodologies of foreign language teaching and the history of those used in the U.S.; special emphasis on current methodologies.

262B. Second Language Acquisition

(4) CHUN

*Prerequisite: graduate standing.**Same course as Interdisciplinary 262B.*

Overview of second language acquisition theories from a range of perspectives (e.g., psychology, linguistics, cognitive science, sociology). Focus on adult SLA including role of the native language, universal grammar, acquisition vs. learning, interlanguage, input and interaction, learner processes and strategies.

270. Theories of the Modern

(4) SPIEKER

*Prerequisite: graduate standing.**Same course as Art History 296A.*

Analysis of theories and critiques of modernism and modernity from Benjamin Adorno and Derrida, with special focus on the historical avantgarde.

299. Topics in Applied Linguistics

(4) STAFF

Same course as Education 299, EACS 299, French 299, Linguistics 299, and Spanish 299.

Specialized topics in the study of applied linguistics.

500. Practicum for Teaching Assistants

(2-4) BECHER

Subject oriented, designed to relate directly to the teaching of a particular course in progress, to improve the skills and effectiveness of the department's teaching assistants. Units earned in this course, which is required of all teaching assistants, do not apply toward completion of the M.A. or Ph.D. requirement.

596. Directed Reading and Research

(2-4) STAFF

Prerequisites: graduate standing; consent of instructor, graduate advisor, and department chair. Letter grade only.

Individualized instruction. A written proposal must be approved by department chair, to include a description of the course content and a reading list.

597. Individual Study for Master's Comprehensive Examinations and Ph.D. Examinations

(1-12) STAFF

Prerequisites: graduate standing; consent of graduate advisor.

No unit credit allowed toward advanced degree(s). Enrollment limited to 12 units per examination.

Instructor should normally be the student's major professor or chair of the doctoral committee. Enrollment must be approved by graduate advisor.

598. Master's Thesis Research and Preparation

(1-6) STAFF

Prerequisite: consent of instructor.

May be repeated for credit to a maximum of 12 units, but only 4 units may apply toward masters degree in German.

Instructor should be chair of student's thesis committee.

599. Ph.D. Dissertation Research and Preparation

(2-8) STAFF

Prerequisites: advancement to candidacy; consent of graduate advisor. S/U grading only.

Only for preparation of the doctoral dissertation. Instructor should be the chair of the student's Ph.D. committee.

Hebrew Courses

LOWER DIVISION

Any two courses in the series Hebrew 1-6 must be taken in sequence and not simultaneously. Also, students may not enroll in a lower level Hebrew course than was previously taken in the Hebrew 1-6 series.

1. Elementary Hebrew

(4) WHEELER

The beginning course in Hebrew. Starting with the study of the alphabet, the student is initiated into the rudiments of the language. Basic grammar, vocabulary, and conversation.

2. Elementary Hebrew

(4) WHEELER

Prerequisite: Hebrew 1.

Continuation of Hebrew 1.

3. Elementary Hebrew

(4) WHEELER

Prerequisite: Hebrew 2.

Continuation of Hebrew 2.

4. Intermediate Modern Hebrew

(4) STAFF

Prerequisite: Hebrew 3 or equivalent.

Continuation of Hebrew 3 with emphasis in writing, composition, and reading of Hebrew newspapers. Introduction to modern Hebrew literature: prose and poetry.

5. Intermediate Modern Hebrew

(4) WHEELER

Prerequisite: Hebrew 4.

Continuation of Hebrew 4.

6. Intermediate Modern Hebrew

(4) WHEELER

Prerequisite: Hebrew 5 or equivalent.

Continuation of Hebrew 5.

UPPER DIVISION**114A-B-C. Readings in Modern Hebrew Prose and Poetry**

(4-4-4) WHEELER

Prerequisite: Hebrew 6.

Improve language ability and acquire knowledge in Hebrew literature. Reading/analyzing literary texts of modern and contemporary major Hebrew writers. Relationships between land, people and history, social, political, spiritual, and gender issues; impact of war.

Slavic Courses

LOWER DIVISION

Any two courses in the series Slavic 1-6 must be taken in sequence and not simultaneously. Also, students may not enroll in a lower level Slavic course than was previously taken in the Slavic 1-6 series.

1. Elementary Russian

(5) MCCLAIN, MCLELLAN

Comprehensive introduction to Russian. Focus on developing basic communicative skills (speaking, listening comprehension, reading, writing) within the framework of contemporary Russian culture. Students acquire a basic grammatical framework for further language study. Audio, visual, and web-based materials included.

2. Elementary Russian

(5) MCCLAIN, MCLELLAN

Prerequisite: Slavic 1.

Continuation of Slavic 1.

3. Elementary Russian

(5) MCCLAIN, MCLELLAN

Prerequisite: Slavic 2.

Continuation of Slavic 2.

4. Intermediate Russian

(5) MCCLAIN, MCLELLAN

Prerequisite: Slavic 3.

Focuses on developing fluency, expanding vocabulary, and acquiring basic reading and writing skills. Comprehensive review of basic Russian grammar; introduction to participles and verbal adverbs. Audio, video, and web-based materials are an integral part of the course.

5. Intermediate Russian

(5) MCCLAIN, MCLELLAN

Prerequisite: Slavic 4.

Continuation of Slavic 4.

6. Intermediate Russian

(5) MCCLAIN, MCLELLAN

Prerequisite: Slavic 5.

Continuation of Slavic 5.

8A-B-C. Russian Conversation

(2-2-2) STAFF

Prerequisite: Slavic 2.

Not open for credit to students who have completed Russian 8A-B-C.

Course designed to offer beginning and intermediate Russian language students communicative strategies needed by speakers and listeners in face-to-face interaction. Not appropriate for students with a background in spoken Russian.

33. Russian Culture

(4) STAFF

Analyzes crucial trends and issues in Russian culture in their historical, social, and technological settings, from the rise of Moscow in the fifteenth century to post-Soviet Russia. All lectures and readings are in English.

99. Introduction to Research

(2-4) STAFF

Prerequisites: consent of department and instructor.

Students must have an overall GPA of 3.0. May

be repeated to a maximum of 8 units, but only 4 units may be applied toward the major. Students are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined.

Independent research under the guidance of a faculty member. Exceptional students are offered an opportunity to undertake independent or collaborative research or to act as interns for faculty-directed research projects.

UPPER DIVISION

101A-B-C-D-E-F. Advanced Russian

(4-4-4-4-4-4) MCLELLAN

Prerequisite: Slavic 6.

Continued development of oral and written fluency. Special attention to development of reading skills through a variety of texts related to Russian culture. Systematic review of advanced grammar. Compositions, translations, and oral presentations required. Periodic screenings of Russian films.

110A-B-C. Advanced Russian Conversation (2-2-2) STAFF

Prerequisite: Slavic 5 (may be taken concurrently).

Each course may be repeated for credit to a maximum of 4 units.

The advanced conversation series gives advanced students an opportunity to discuss a wide variety of topics. The course is based on active participation and includes individual presentations. Assignments and testing given orally.

117AA-ZZ. Great Russian Writers

(4) STAFF

Prerequisite: upper-division standing.

May be repeated for credit in combination with Russian 117AA-ZZ to a maximum of 24 units provided letter designations are different, but only 12 units may be applied toward the major.

Intensive study of one writer. Readings supplemented by selected criticism. Taught in English.

- A. Writings of Pushkin
- B. Writings of Gogol
- C. Writings of Leskov
- D. Writings of Turgenev
- E. Writings of Goncharov
- F. Writings of Chekhov
- G. Writings of Dostoevsky
- H. Writings of Tolstoy
- I. Writings of Nabokov
- J. Writings of Bulgakov

120. Russian Drama

(4) STAFF

Prerequisite: upper-division standing.

Plays from the classic, romantic, and realistic periods; Chekhov's innovative works, as well as dramas representative of various trends before and after 1917. Readings and discussion in English.

121. The Russian Short Story

(4) STAFF

Prerequisites: Slavic 6; upper-division standing.

May be repeated for credit to a maximum of 8 units.

Analysis and discussion of various forms of the short story by Russian writers. Readings in Russian.

122. The Russian Novella

(4) STAFF

Prerequisites: Slavic 6; upper-division standing.

May be repeated for credit to a maximum of 8 units, but only 4 units may be applied to the major.

In Russian literature the novella is a genre quite distinct from the short story and the novel. All major writers of the nineteenth and twentieth centuries created important works in this form, so that a vast field for exploration and examination exists for such a genre course. Taught in Russian.

123A. Nineteenth-Century Russian Literature I

(4) STAFF

Prerequisite: upper-division standing.

Not open for credit to students who have completed Slavic 115A.

Introduction to Russian literary culture from 1800-1850. Readings by Pushkin, Lermontov, Gogol, Dostoevsky, and others. In English.

123B. Nineteenth-Century Russian Literature II

(4) STAFF

Prerequisite: upper-division standing.

Not open for credit to students who have completed Slavic 115B.

Introduction to Russian literary culture from 1850 to 1900. Readings by Dostoevsky, Tolstoy, Goncharov, Turgenev, Leskov, Saltykov-Shchedrin, Chekhov. Taught in English.

123C. Twentieth-Century Russian Literature I

(4) STAFF

Prerequisite: upper-division standing.

Not open for credit to students who have completed Slavic 125A.

Intensive study of particular authors, genres, literary movements, and selected topics in Russian literature from 1900-1954. Taught in English.

123D. Twentieth-Century Russian Literature II

(4) STAFF

Prerequisite: upper-division standing.

Not open for credit to students who have completed Slavic 125B.

Intensive study of particular authors, genres, literary movements, and selected topics in Russian literature after World War II. Taught in English.

124. Twentieth-Century Poetry

(4) STAFF

Prerequisites: Slavic 6; upper-division standing.

Introduction to twentieth-century Russian poetry. The "Silver Age" and Russian Modernism. Avantgarde poetry. Post-war trends in Russian poetry. Readings by Briusov, Blok, Akhmatova, Mandelstam, Esenin, Mayakovsky, Pasternak, Brodsky, and others. Readings in Russian.

130A. The Avantgarde in Russia

(4) SPIEKER

Prerequisite: upper-division standing.

Same course as Art History 144A. Not open for credit to students who have completed Russian 144A or Slavic 144A.

The Russian Avantgarde in its European context. The avantgarde and the revolution of 1917. Analysis of key figures and movements within the Russian Avantgarde. Taught in English.

130B. Russian Cinema

(4) SPIEKER

Prerequisite: upper-division standing.

Not open for credit to students who have completed Slavic 119.

Introduction to the development of Soviet cinema from the early days to the present. A focal point is the interaction between politics/ideology and film in Russia. Major directors such as Eisenstein and Tarkovski are covered extensively. Readings and lectures in English.

130C. Contemporary Art in Russia and Eastern Europe

(4) SPIEKER

Prerequisite: upper-division standing.

Same course as Art History 144C. Not open for credit to students who have completed Russian 144C or Slavic 144C.

Study of central intellectual and aesthetic trends in the late Soviet period and in contemporary post-Soviet Russia and Eastern Europe. Analysis of literary texts and the visual arts. Taught in English.

130D. Russian Art

(4) SPIEKER

Prerequisite: upper-division standing.

Same course as Art History 144D. Not open for credit to students who have completed Russian 118 or Slavic 118.

Introduction to Russian art and aesthetic theory from the beginning to the present. Readings and lectures in English.

130E. Masters of Soviet Cinema

(4) SPIEKER

Prerequisite: upper-division standing.

Not open for credit to students who have completed Slavic 167C.

Introduction to some of the great directors in

Russian cinema. Analysis of films and theoretical writings. Study of key theoretical concepts. Taught in English.

136. Eighteenth-Century Culture

(4) SPIEKER

Prerequisite: upper-division standing.

Introduction to eighteenth-century Russian literature, philosophy, and the visual arts. Taught in English.

145. Introduction to Slavic Languages and Linguistics

(4) MCCLAIN

Prerequisite: upper-division standing.

Introduction to the history and development of the Slavic languages. Topics include dialects, language contact, sociolinguistics, gender issues, and language policy. Taught in English.

151C. Literature of Central Europe

(4) SPIEKER

Prerequisite: upper-division standing.

Same course as Comparative Literature 161 and German 151C.

Investigation of the prolific literatures of central Europe, one of the culturally and linguistically most diverse regions of the European continent that has produced writers such as Italo Svevo, Franz Kafka, Robert Musil, Bruno Schultz, and others. Readings in English.

152A. Slavic and East European Folklore

(4) MCCLAIN

Prerequisite: upper-division standing.

Not open for credit to students who have completed Slavic 151.

Introduction to the calendar cycle, rituals, dance, music, and folkcraft of the Slavs and other East European peoples.

152B. Language and Cultural Identity

(4) MCCLAIN

Prerequisite: upper-division standing.

Not open for credit to students who have completed Slavic 163.

Exploration of the way language is used to help construct cultural identity in Eastern Europe. Topics include the relationship between language and dialect and the use of language and other cultural symbols to identify self and others. Taught in English.

152C. Ideology and Representation

(4) MCCLAIN

Prerequisite: upper-division standing.

Not open for credit to students who have completed Slavic 180.

How does the representation of the "enemy" during a conflict influence our attitudes toward that conflict? An examination of the images of the opponent in literature, film and journalism. Special emphasis on Eastern Europe.

156. Concepts of Nothingness

(4) SPIEKER

Prerequisite: upper-division standing.

Not open for credit to students who have completed Russian 156.

"Nothing" is one of the central concepts of Russian culture and civilization throughout the centuries. The class analyzes "nothingness" in orthodox religion, nineteenth and twentieth-century literature, avantgarde art, and Soviet popular culture. Taught in English.

164A. Death and Representation

(4) SPIEKER

Prerequisite: upper-division standing.

Not open for credit to students who have completed Slavic 141.

How do we represent what presupposes our own absence, death? What is the relationship between death, language, and experience? Do texts allow us to "imagine" death? Analysis of these issues through readings of key works of literature and philosophy.

164B. Science Fiction in Eastern Europe

(4) MCCLAIN

Prerequisite: upper-division standing.

Same course as Comparative Literature 154. Not open for credit to students who have completed Slavic 154.

The genre of science fiction and its development in literature and film in the various cultures of Eastern Europe. Topics include utopia, dystopia, technology, the "mad" scientist, etc. Taught in English.

164C. Women in Russian Literature

(4) MCCLAIN

Prerequisite: upper-division standing.

Not open for credit to students who have completed *Slavic 162*.

A survey of the roles of women in Russian literature. Course analyzes both the presentation of women by male writers and works by women writers. Authors: Durova, Pavlova, Mandelstam, Chukovskaya, Ginzburg, Akhmatova, Tsvetaeva, and others. Lectures and readings in English.

168. Russian Thought and Philosophy

(4) SPIEKER

Prerequisite: upper-division standing.

Study of key texts and movements in the development of Russian thought, from the Enlightenment to the revolution: Enlightenment, Mysticism, Schellingianism, Chaadaev, Slavophilism, Hegelianism, the 1860's, Populism, Soloviev, Marxism. Taught in English.

182. On the Margins

(4) MCCLAIN

Prerequisite: upper-division standing.

An analysis of the representation of marginalized populations in Europe and the United States. How do the stereotypes in literature, film, and journalism help to create and maintain marginalized status?

197. Senior Thesis in Russian

(4-8) STAFF

Prerequisites: senior standing; consent of instructor.

Students must have a 3.0 grade-point average.

May be repeated for credit to a maximum of 8 units.

Not open for credit to students who have completed *Russian 197*.

An independent study course (one or two quarters) directed by a faculty member with a carefully chosen topic which results in a documented project or a senior thesis.

198. Readings in Russian

(1-5) STAFF

Prerequisites: upper-division standing; completion of two upper-division courses in *Slavic*.

Students must have a minimum 3.0 grade-point average for the preceding three quarters and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined. May be repeated for credit in combination with *Russian 198* to a maximum of 6 units.

Guided reading on a subject not covered in the regularly offered courses.

199. Independent Studies in Russian

(1-5) STAFF

Prerequisites: upper-division standing; completion of two upper-division courses in *Slavic*.

Students must have a minimum 3.0 grade-point average for the preceding three quarters and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined.

GRADUATE COURSES

596. Directed Reading and Research

(2-4) STAFF

Letter grade. Minimum of 2 units per quarter. No more than half the units necessary for the master's degree may be taken in *Slavic 596*.

Individual tutorial. A written proposal for each tutorial must be approved by department chair and filed with Graduate Division.

Graduate Programs

Master of Arts—Global and International Studies

The two-year M.A. program in global and international studies combines courses from the social sciences and humanities with practical training and real-world experience. Students typically spend the summer of their first year and fall quarter of their second year abroad, taking courses and/or doing internships with nongovernmental organizations, governmental bodies, or businesses. The program has established partnerships with other globally oriented educational institutions abroad, and a range of international non-governmental organizations (NGOs), for study and intern placements. Students will also take workshops oriented around their internship experience. Workshops will also be available for interested students, providing opportunities to learn about such practical matters as grant writing and foundation funding, tracking organizational finances, information management, and computer-based technologies.

The curriculum consists of three courses per quarter. The first year includes required courses on Micro/Macro Economics, Global Trade and Development, Organizational Policy and Management, Global Organizations and Civil Society, Transnational Forces and Political Systems, Global Governance and World Order, and Theories of Intercultural Understanding. Students are also required to take a course on Research Methods in Global and International Affairs, participate in a policy analysis and exercise seminar, and attend a seminar that focuses on contemporary issues and internship preparation.

The second year allows students to choose courses that provide background in particular cultural/geographic regions, and focus on a career emphasis in either global social and economic development or global culture and human rights. Students are also required to take courses in an area specialization of their choice: East Asia, South and Southeast Asia, the Americas, the Middle East, Africa, or Europe. The course on managing development Organizations, Non-Profits, and Other NGOs: Theory and Practice is also offered as an elective. The second year culminates with a required policy workshop.

In consultation with their advisors, students can select either Master's Plan I (thesis) or Master's Plan II (comprehensive project).

Optional Ph.D. Emphasis in Global Studies

The Global and International Studies Program also offers an optional Ph.D. emphasis for students pursuing the Ph.D. in anthropology, English, history, political science, religious studies, and sociology. To be eligible for admission to the Ph.D. emphasis, students must be admitted to the Ph.D. program in one of the departments choosing to offer this emphasis with their existing Ph.D. program and petition successfully to add the optional emphasis.

The student's dissertation committee must have one member from a participating department other than the student's own department.

The student may also elect a global emphasis for his or her department field/area/specialization exam, if such an emphasis is offered within the department. The chair of the Coordinating Committee will determine when the student has successfully completed all of the requirements for the emphasis.

By “global” we refer to transnational economic, political, environmental, social, and cultural interactions and flows that operate at a global (i.e., trans-continental) scale. Global Studies views the world as comprised of increasingly interdependent processes, rather than as shaped exclusively or even primarily by the interplay of discrete nation-states.

Petitions for adding the emphasis can be made at any time in a student’s graduate career, but typically will be made after at least one successful year of study in the home department. Work completed prior to admission in the emphasis that meets emphasis requirements (as determined by the Ph.D. Emphasis Coordinating Committee) may be counted towards completion.

To satisfy the Ph.D. emphasis in global studies, students are required to take four one-quarter graduate level courses. One course is Global 201, the introductory gateway seminar, offered by the Global and International Studies Program. A second course is a capstone pro-seminar, typically taken when the student is nearing completion of his or her dissertation, in which students present their work-in-progress for critical feedback.

Two additional courses must be chosen from among qualifying global theory and global issues courses offered by these participating departments: Anthropology, English, History, Political Science, Religious Studies, and Sociology. These courses will be selected from an approved list of global theory and global issues graduate courses prepared by the Ph.D. emphasis Coordinating Committee each spring, for the following academic year. At least one of these two courses must be a global theory course, and at least one must be a global issues course. Courses will typically be taken for a letter grade. One will be taken from the student’s home department, and the other from one of the five other participating departments or the global & international studies program. The two seminars must be taken from different instructors. Courses that qualify during each academic year will be posted to the Global & International Studies Program Web site during early fall. Courses not listed on the Web site may occasionally be approved, by petition to the director of the Ph.D. Emphasis.

For additional information, please contact the graduate advisor in one of the participating departments or Global Studies.

The Global Peace and Security (GPS) Program at UC Santa Barbara is an affiliated unit of UCSB’s Global and International Studies Program. The GPS Program offers students from any discipline the opportunity to complement their major(s) with a challenging interdisciplinary minor in global security issues.

Minor—Global Peace and Security

All courses to be applied to the minor must be completed on a letter-grade basis.

Preparation for the minor. There are no required courses in preparation for the minor.

Upper-division minor. Twenty-four units, distributed as follows: Twelve units selected from Global Peace and Security 136, 137, 140, 194, 196, and Global Studies 102, 104; and twelve units selected from GPS courses or electives from Anthropology 104H, 130A-B (same as Environmental Studies 130A-B), 142, 185 (same as Environmental Studies 185); History 105, 106D, 135C; Political Science 118, 121, 124, 125, 127, 128, 136, 143, 150A, 176, 186; Religious Studies

131H (same as Sociology 131H), 140B, 140F, 143; Sociology 130, 130LA, 134, 134T, 166W.

Note: Although electives from other departments are listed for the Global Peace and Security minor, many of the courses have prerequisites or other departmental restrictions. Check catalog course descriptions for details.

Note: Substitutions and waivers are subject to approval by the chair of the department. Please see page 118 for special conditions governing minors in the College of Letters and Science.

Global Peace and Security Courses

UPPER DIVISION

136. Theories of Peace, Conflict and Violence

(4) BOURAAD-NASH

Prerequisite: upper-division standing.

Not open for credit to students who have completed Interdisciplinary 197A.

Fundamental issues relating to global peace and security: focus on “negative peace”—the problem of war and organized violence; peace as the avoidance of war.

137. World Society in Transformation: Building Enduring Peace

(4) BOURAAD-NASH

Prerequisite: upper-division standing.

Not open for credit to students who have completed Interdisciplinary 197B.

Fundamental exploration of issues relating to global peace and security with a focus on “positive peace:” peace as human rights, sustainable development, ecological balance, political participation, and other positive aspects of human security.

140. Theory and Practice of Nonviolence

(4) BOURAAD-NASH

Prerequisite: upper-division standing.

Not open for credit to students who have completed Interdisciplinary 140.

Critical examination of nonviolence as a philosophy of life and as a pragmatic approach to conflict resolution. Philosophical, psychological, cultural, and political aspects. Major theorists of nonviolence, including Gandhi, King, and Sharp. Application to conflict at all levels: interpersonal, intergroup, and international. Case studies.

194. Group Studies for Global Peace and Security

(4) BOURAAD-NASH, JUERGENSMEYER

Prerequisites: upper-division standing.

May be repeated for credit in combination with Interdisciplinary 194GP to a maximum of 12 units, but only 4 units may be applied toward the minor.

Intensive analysis of topics and themes in global peace and security. Topics will vary with instructor and year.

196. Global Peace and Security Seminar

(4) BOURAAD-NASH, JUERGENSMEYER

Prerequisite: upper-division standing.

May be repeated for credit to a maximum of 12 units, but only 4 units may be applied toward the minor. Not open for credit to students who have completed Interdisciplinary 196GP.

Intensive analysis of methods and problems of global peace and security. Topics will vary with the instructor and quarter.

Mayfair Yang, Ph.D. (Religious Studies and East Asian Languages and Cultural Studies)

Global Studies was established as an interdisciplinary major within the Global and Interna-

tional Studies Program in 1998. It provides an undergraduate major that is distinctive in its emphasis on transnational processes and interactions that bring the world together across traditional national boundaries. It is one of the first programs in the nation to offer a degree with contemporary as well as historical globalizing trends as the central organizing theme.

The major includes two introductory gateway courses on global history, culture, and ideology and on global socioeconomics and politics and is built around three upper-division core courses that provide a coherent introduction to global culture and ethics, global ideologies and world order, and global economy and development. Through its elective requirements, the major also affords students an opportunity to take additional courses offered by other departments and programs in the university: three in global issues and another three in one particular region of the world (Africa, the Middle East, South/Southeast Asia and the Pacific, East Asia, Europe and Eurasia, Latin America, or North America).

The Global Studies major requires three years of language study, which can be fulfilled all in one language or by taking two years of one language and an additional year of a second language. This requirement is consistent with the program's belief that language study is essential to the study of the global and the international, whether it leads to greater facility in a single language or broadened familiarity with the way two different languages can open windows on the world.

The Global Studies major provides a well-rounded liberal arts degree that will help prepare students for a variety of careers in the international arena. It will also help prepare students for further graduate study in international affairs, international business, peace and world order studies, area studies, and the emergent global civil society.

Undergraduate Program

Bachelor of Arts— Global Studies

Preparation for the major. Global Studies 1 and 2; one course (4 units) chosen from Anthropology 2, Economics 1 or 2, Environmental Studies 1 or 3, Geography 5, Political Science 6 or 7, Religious Studies 1, Sociology 1, or Women's Studies 20 or 30; one course (4 units) chosen from Art History 6C-D-E-I-K, East Asian Cultural Studies 3, 4B, 80; History 4C, 8, 17C, 46, 49B, Middle East Studies 45; completion of quarter six (or equivalent) of a modern foreign language; and study for one additional year (at least 12 units) either in the same language or beginning year of a second modern foreign language.

Upper-division major. Thirty-six upper-division units, distributed as follows (no more than 12 of the 36 units may be from the same department, excluding global studies courses and courses cross-listed with global studies): Global Studies 110, 120, 130; three courses (12 units) selected from the following: Anthropology 102, 110, 113BF, 114, 116, 120, 122, 125, 146, 148A, 170, 172, 173, 185DS; Art History 119A-B-D, 136E, 143C; Asian American Studies 110; Black

Studies 152, 161; Chicana/o Studies 177, 178A, 189B; Economics 114, 128, 180, 181; English 186; Environmental Studies 103, 130A-B-C, 131, 132; Film Studies 163; Geography 141A, 141B, 156, 180 182; Global Studies 111, 134, 180A-B, 197; History 105, 130Y, 191A-B-C; Linguistics 130; Political Science 109, 118, 119, 121, 124, 146, 147, 171, 172, 175, 186B; Religious Studies 106, 113, 118A, 131D, 134, 193B; Slavic 182; Sociology 130, 130GR, 130SG, 134R, 153, 166, 185, Women's Studies 150.

Students must also complete three courses (12 units) selected from one of the following geographic regions:

- A. *Africa*: Art History 127A-B; Anthropology 156; Black Studies 100, 104, 130A-B, 162, 171; French 192X; Geography 157; History 142, 143, 144, 147A-B, 147G, 155F; Portuguese 180.
- B. *The Middle East*: Art History 132G; History 145D, 146, 146T-W; MES 145; Political Science 150A-B-M; Religious Studies 131H, 140A-B-F, 185, 189A.
- C. *South Asia, Southeast Asia, and the Pacific*: Anthropology 136, 140, 142, 142B, 186; EACS 189A; Film Studies 124; Geography 154; Global 140, 141, 142; History 138B, 155F, 189E 189M; Political Science 139; Religious Studies 140D, 158B, 162A-C, 164A-B, 169, 170.
- D. *East Asia*: Anthropology 126, 138A-B, 157; Art History 134D-F; Chinese 112A, 140, 141, 166A, 170 171, 172, 173, 183B; EACS 186; Film Studies 120, 121; History 182B, 185B, 186D-M, 187B-C; Japanese 112, 162, 164, 165; Korean 113, 120, 139; Political Science 129, 135, 136, 138.
- E. *North America*: Art History 121C-D-E; Asian American Studies 100AA-ZZ, 111, 118, 122, 127, 128, 132; Black Studies 127, 142, 169CR; Chicana/o Studies 138, 168B, 180; English 104A, 191; Environmental Studies 122NE; Geography 150; History 106D, 159C, 164IA-IB, 166A-B-C, 167B-C-D, 168F, 171B, 174C, 175A-B, 179B; Interdisciplinary Studies 150; Music 114; Political Science 127, 129, 134; Religious Studies 152, 153, 155; Sociology 155A; Spanish 109.
- F. *Latin America*: Anthropology 104H, 134, 135, 141; Art History 123A-C; Chicana/o Studies 168B, 177; Film Studies 126, 127; Geog 155; History 151B-C-W, 153L, 154LB, 156B-C, 157B, 158B; Latin American and Iberian Studies 101, 102; Political Science 101, 134, 148A-B; Portuguese 115AA-ZZ, 125B; Sociology 130LA; Spanish 120A-B, 190.
- G. *Europe and Eurasia*: Anthropology 132, 152; Comparative Literature 122A, 161; Economics 112B; English 104B, 150, 184, 185; Film Studies 136; French 106X, 122X, 160X, 171X, 178BX-CX-DX; Geography 159; German 138, 151C; German 179C; Global 151; History 123A-B-C-F, 124B, 126A-B, 130A-B, 131F, 133Q, 135B-C, 137B, 141B; Italian 112X, 125X, 142X, 161AX, 179X, 180Z; Portuguese 120AA-ZZ, 125A; Political Science 128, 129, 140, 141, 142, 143; Slavic 123C-D, 130A-B 152B, 152C, 164C; Spanish 115B, 153.

Global Studies Courses

LOWER DIVISION

1. Global History, Culture and Ideology (4) GUNN, LEZRA

A survey of the historical processes that have brought different areas of the world into closer contact. Topics include ideologies of nationalism, democracy, and liberalism; international trade and migrations; technological changes; colonialism; the globalization of culture; and the reactions to them.

2. Global Socioeconomic and Political Processes (4) APPELBAUM, JUERGENSMEYER

Examination of contemporary social, economic, political, and environmental change in a global context; the emergence of a global economy and new systems of world order; and the debate over "globalization" and whether or not it is desirable.

UPPER DIVISION

101. Global Literatures

(4) GUNN

Prerequisite: upper-division standing.

Same course as English 190GL.

Examination of how recent world literature has contributed to, interpreted, and evaluated globalizing processes. Some attention paid to the relations between literature and other expressive forms such as film, photography, and journalism.

102. Global Religion

(4) JUERGENSMEYER

Prerequisite: upper-division standing.

Same course as Religious Studies 108 and Sociology 118GR.

Examination of the globalization of religious traditions in the modern world. Topics include the polarities between homeland and diaspora, the relationships between transnational religions and nation-states, and how these dynamics change the very nature of religious traditions.

103. Global Ideologies

(4) JUERGENSMEYER

Prerequisite: upper-division standing.

Introduction to the major systems of ideas promoting global unity, their attempted implementation, and their critics. Includes Enlightenment Humanism, secular nationalism, colonialism, Marxism, National Socialism, the UN movement, World Federalism, politicized versions of Christianity and Islam, and an emerging globalism.

104. Global Diasporas and Cultural Change

(4) MANN

Prerequisite: upper-division standing.

Globalization of the world's population through international migrations; the emergence of diasporic cultures and their relationship to the countries of origin; interactions between immigrant/ethnic cultures and the dominant cultures of the host societies; the nature of transnational identities.

110. Global Culture and Ethics

(4) GUNN, LEZRA

Prerequisites: Global Studies 1 and 2; upper-division standing.

Explores connections over the last century between global cultural developments and the quest for normative values on a global level. Topics include the communications revolution, cultural ideologies, international migrations and diasporas, the human rights movement, and new cosmopolitanisms.

111. Human Rights in World Affairs

(4) STAFF

Prerequisite: upper-division standing.

Examination of the U.N. Declaration of Human Rights as a universal "sacred text," and the responses to it from Islamic, Buddhist, Hindu, Christian, Jewish, and secular philosophic traditions.

120. Global Ideologies and World Order

(4) JUERGENSMEYER

Prerequisites: Global Studies 1 and 2; upper-division standing.

Deals with conceptions of the world as a unitary political system and how these views come into confrontation with one another. Topics include the nation-state system, political ideologies, international organizations, global conflict, and the emergent civil society.

121. Conceptions of World Order

(4) STAFF

Prerequisite: upper-division standing.

Conceptions of world order from the birth of the nation-state to the end of the Cold War. Includes both global systems and regional structures in areas such as East Asia, the Americas and the Indian Ocean.

122. The Contemporary World System

(4) APPELBAUM

Prerequisite: upper-division standing.

Same course as Sociology 166W.

Seminar addressing various theoretical perspectives and empirical issues and aspects of the contemporary world system, with emphasis on political, economic, cultural, and social processes and relations.

123. Introduction to International

Political Economy

(4) COHEN

Same course as Political Science 186. Not open for credit to students who have completed Political Science 186A.

Introduction to the politics of international economic relations. Examination of alternative analytical and theoretical perspectives for their value in helping to understand and evaluate the historical development and current operation of the world economy.

124. Global Conflict

(4) JUERGENSMEYER

Prerequisites: upper-division standing.

Same course as Sociology 138G. Not open for credit to students who have completed Global Peace and Security 138 or Interdisciplinary 197C.

Exploration of some of the major points of tension in global society since the end of the Cold War, with emphasis on the rise of religious nationalism and ethnic strife in the Middle East, South and Central Asia, and Russia.

130. Global Economy and Development

(4) APPELBAUM, MEHTA

Prerequisites: Global Studies 1 and 2; upper-division standing.

Examines recent theories and perspectives on global political economy and development studies. Topics include, among others, the new global economy, transnational corporations, transnational labor markets, international trade and finance, social and economic development, and North-South relations.

134. Social Analysis of Terrorism

(4) JUERGENSMEYER

Prerequisites: upper-division standing.

Same course as Sociology 134T.

A study of terrorist movements and actions, especially those involving religious militants in the Middle East, South Asia, Europe, and the Americas. An exploration of their social causes and effects, and the relationship between religion and violence.

140. Development and Social Change in South and Central Asia

(4) JUERGENSMEYER

Prerequisites: upper-division standing.

Same course as Sociology 130SA.

An exploration of post-colonial social changes in India, Pakistan, Sri Lanka, and other South and Central Asia societies, with emphases on the rise of ethnic nationalism, the impact of international economic and communication systems, and indigenous forms of development.

142. Modern South Asia

(4) MANN

Prerequisite: upper-division standing.

Selected aspects of the modern history of South Asia, focusing on India and Pakistan. Topics include:

religious traditions, British colonialism, the 1947 "Partition," political change, economic development, population pressures, the "Green Revolution" and its social impacts.

151. Europe in a Global Context

(4) STAFF

Prerequisite: upper-division standing.

Focuses on the changing meaning of Europe from the seventeenth century to the European Union. Images of Europe among European intellectuals, politicians, and travellers are contrasted with visions from other cultures such as China, India, and the Middle East.

180A. Introduction to Women, Culture, and Development

(4) BHAVNANI, HANCOCK

Prerequisite: upper-division standing.

Same course as Sociology 156A and Anthropology 102A.

Critical examination of relations among women, culture, and development. Topics include colonialism, violence, globalization and the state, health and reproduction, biotechnology, representation, and resistance movements.

180B. Seminar in Women, Culture, and Development

(4) BHAVNANI, HANCOCK

Prerequisites: Global Studies 180A; upper-division standing.

Same course as Sociology 156B and Anthropology 102B.

Critical examination of the interrelationship between women, culture and development through individual research projects.

194. Group Studies

(4) STAFF

Prerequisites: upper-division standing; open to Global Studies majors only.

May be repeated for credit to a maximum of 12 units, but only 8 units may be applied toward the major.

Themes will vary according to instructor.

195. Seminar in Global and International Studies

(4) STAFF

Prerequisites: upper-division standing; open to Global Studies majors only.

May be repeated for credit to a maximum of 12 units, but only 8 units may be applied toward the major.

Topics will vary according to instructor.

196. Field Studies in Global and International Studies

(4) STAFF

Prerequisites: consent of instructor; open to Global Studies majors only.

May be repeated for credit to a maximum of 12 units, but only 8 units may be applied toward the major.

On-site examination of organizations, agencies, or locales in a region of the world relevant to the student's field of study involving the application of methods and techniques of investigation in global and international studies.

197. Special Topics in Global and International Studies

(4) STAFF

Prerequisites: upper-division standing.

May be repeated for credit to a maximum of 12 units, but only 8 units may be applied toward the major.

Topics will vary according to instructor.

198. Directed Readings in Global and International Studies

(1-5) STAFF

Prerequisites: upper-division standing; consent of instructor.

Students must have a minimum 3.0 grade-point average for the preceding three quarters. Proposal for study must be submitted to and approved by the program chair. Global Studies 198 may be repeated for credit to a maximum of 15 units, but only 8 units may be applied toward the major. Students are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined.

In-depth directed inquiry into a topic of interest to the student.

199. Independent Studies**(1-5) STAFF**

Prerequisites: upper-division standing; consent of program and instructor.

Students must have a grade-point average of 3.0 (minimum) for the preceding three quarters and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined. Global Studies 199 may be repeated for credit to a maximum of 15 units, but only 8 units may be applied toward the major. Students must be majors in global and international studies or present justification to the program for diverting from this norm.

Independent studies in global and international studies.

GRADUATE COURSES**201. Gateway Seminar****(4) STAFF**

Prerequisite: for graduate students doing the Ph.D. emphasis in Global Studies.

Provides an overview of globalization while at the same time reflecting the specific concerns and key debates within the participating disciplines. Seminar is led by one participating faculty member responsible for content and continuity but involves faculty from participating disciplines.

202. The Concept of Modernity—A Global History**(4) STAFF**

Prerequisite: mainly for Ph.D.-emphasis in Global Studies.

A transcultural perspective of notions of modernity starting from the mid-eighteenth century. Enlightenment, colonial, Marxist, liberal, and cultural programs are related to their historical backgrounds. The course regards how modernization visions were appropriated in different cultural contexts.

211. Research Seminar**(4) STAFF**

Prerequisite: for graduate students doing the Ph.D. emphasis in Global Studies.

Provides students with an opportunity to discuss and work on their research-in-progress (most likely, but not exclusively, their dissertations).

230. Research Methods in Global and International Affairs**(4) APPELBAUM**

Prerequisites: graduate standing; consent of department.

An introduction to basic research skills required in the policy- and decision-making undertaken in international organizations, drawing on a variety of methodologies. Introduction to basic research approaches drawing on a variety of research methodologies. (F)

231. Theories of Intercultural Understanding**(4) GUNN**

Prerequisites: graduate standing; consent of department.

Introduction to the theories and concepts required for better understanding the importance of culture in shaping ethical, political, economic and social behavior including an exploration of the challenges of cross- and intercultural interpretation and translation. (F)

232A. Contemporary Issues**(1) APPELBAUM**

Prerequisites: graduate standing; consent of department.

Course is taken by all first year students during fall quarter. It focuses on issues of practical and professional concern to MAG&IS students, including seminar discussions with visiting faculty and practitioners. (F)

232B. Contemporary Issues**(1) APPELBAUM**

Prerequisites: graduate standing; consent of department.

Course is taken by all first year students during winter quarter. It focuses on issues of practical and professional concerns to MAG&IS students, including seminar discussions with visiting faculty and practitioners. (W)

232C. Contemporary Issues**(1) APPELBAUM**

Prerequisites: graduate standing; consent of department.

An optional course recommended to first year students during the spring quarter. It focuses on issues of practical and professional concerns to MAG&IS students, and includes seminar discussions with visiting faculty and practitioners.

233. Transnational Forces and Political Systems**(4) JUERGENSMEYER**

Prerequisites: graduate standing; consent of department.

Exploration of global trends and rise of global civil society responding to population mobility and diasporas, erosion of national cultures, political authority, global communications media, transnational environmental issues, international drug and sex trade, and increased antiglobal protest and religious conflict. (F)

234. Micro-Macro Economics**(4) MEHTA**

Prerequisites: graduate standing; consent of department.

Introduction to principles of microeconomic and macroeconomic analysis used in evaluating and forming public policy. Topics include the operation and regulation of product and labor markets, issues of social welfare, income distribution, and the management of monetary and fiscal policy. (F)

235. Organizational Policy and Management**(4) STAFF**

Prerequisites: graduate standing; consent of department.

A foundational understanding of organizational theories, including scholarship of international management and leadership, that focuses on the challenges facing organizations in a rapidly globalizing world. (W)

236. Global Trade and Finance**(4) STAFF**

Prerequisites: graduate standing; consent of department.

Introduction to concepts and theories relevant to the analysis of problems in the world economy. Topics include international trade and investment, foreign exchange, financial markets, and economic development, with emphasis on both states and non-governmental actors. (W)

237. Global Organizations and Civil Society**(4) STAFF**

Prerequisites: graduate standing; consent of department.

A basic understanding of the development of global organizations, from multinational corporations to global civil society. The course covers the history of governmental organizations and the changing features of NGOs. (S)

238. Global Governance and World Order**(4) FALK**

Prerequisites: graduate standing; consent of department.

Exploration of various solutions to the challenge of providing global governance for world order, including changing role of sovereign states, emerging roles of regional actors, international institutions, NGOs, globalizing market forces, international law and morality, religious movements and geopolitical ambitions. (S)

239. Policy Analysis and Exercise Seminar**(4) STAFF**

Prerequisites: graduate standing; consent of department.

Group projects draw on knowledge acquired in the core courses to address policy issues facing hypothetical clients in a simulated organizational setting. Students are encouraged to identify the kinds of issues they might encounter in their internships. (S)

240. Internship Preparation**(1) STAFF**

Prerequisites: graduate standing; consent of

department.

Taken by all first year graduate students spring quarter. Focuses on preparation for the internships and study abroad programs. (S)

241. Critical Development Studies**(4) BHAVNANI**

Prerequisites: graduate standing; consent of department.

Explores the implications of centering culture as lived experience within development issues such as women/gender and 'race'/ethnicity and women. Culture and development paradigm using readings, films, case studies, policy writings, and, where appropriate, outside speakers. (W)

250. Managing Development Organizations, Non-Profits and other NGOs: Theory and Practice**(4) STAFF**

Prerequisites: graduate standing; consent of department.

The practical application of organizational theories to the non-profit sector and global civil society, particularly organizations concerned with grassroots or sustainable development. (W)

251. Policy Workshop**(4) STAFF**

Prerequisites: graduate standing; consent of department.

Group projects that provide an opportunity to apply the knowledge and skills students have acquired throughout the program to practical problem-solving, drawing especially on their internship experiences. (S)

292AA-ZZ. Special Topics**(4) STAFF**

Prerequisites: graduate standing; consent of department.

Seminar in special areas of interest in Global and International Studies. Specific course titles to be announced by the Program each quarter offered. Course content varies.

501. Teaching Assistant Practicum**(4) STAFF**

Prerequisite: appointment as a teaching assistant in Global and International Studies.

No unit credit allowed toward degree.

Analyses of texts and materials, discussion of teaching techniques, conducting discussion sections, formulation of topics and questions for papers and examinations. Designed to meet the needs of the graduate student who serves as a teaching assistant.

593. Colloquium**(1-4) STAFF**

Prerequisites: graduate standing; consent of department.

A series of discussions involving panels, debates, special speakers, etc. at which the presence of all enrolled graduate students and selected faculty is required.

595AA-ZZ. Group Studies**(1-12) STAFF**

Prerequisites: graduate standing; consent of department.

Critical review of research in selected fields.

596. Directed Reading And Research**(2-5) STAFF**

May be repeated for credit upon approval of department chair.

Individual tutorial. Plan of study must be approved by department chair or MAGIS director.

597. Independent Study M.A. Examinations**(4-8) STAFF**

Individual study for M.A. examination. Normally taken with the student's committee chair.

598. Master's Thesis Research and Preparation**(1-12) STAFF**

Prerequisites: graduate standing; consent of department.

Master's Thesis research and preparation.

Faculty

Anthony Barbieri-Low, Ph.D., Princeton University, Assistant Professor (pre-modern China)

Randolph Bergstrom, Ph.D., Columbia University, Associate Professor (American social policy)

Hilary Bernstein, Ph.D., Princeton University, Associate Professor (European renaissance)

Debra G. Blumenthal, Ph.D., University of Toronto, Associate Professor (medieval Europe)

Sarah Cline, Ph.D., UC Los Angeles, Professor (Mexico, Latin America, Christianity)

Patricia Cline Cohen, Ph.D., UC Berkeley, Professor (women, social history)

Douglas H. Daniels, Ph.D., UC Berkeley, Professor (American and Afro-American history)

Elizabeth De Palma Digeser, Ph.D., UC Santa Barbara, Associate Professor (ancient Rome and late antiquity)

Harold A. Drake, Ph.D., University of Wisconsin, Professor (Rome)

Francis A. Dutra, Ph.D., New York University, Professor (Brazil, Portugal)

Adrienne L. Edgar, Ph.D., UC Berkeley, Associate Professor (modern Russia and the Soviet Union, central Asia)

Sharon Farmer, Ph.D., Harvard University, Professor (medieval Europe)

Mary O. Furner, Ph.D., Northwestern University, Professor (19th- and 20th-century U.S. history, history of public policy)

Nancy E. Gallagher, Ph.D., UC Los Angeles, Professor (Middle East)

Gregory R. Graves, Ph.D., UC Santa Barbara, Lecturer (environmental/public history)

Anita Guerrini, Ph.D., Indiana University, Professor (early modern Europe, history of science)

Pekka Hämäläinen, Ph.D., University of Helsinki, Associate Professor (Spanish Borderlands of North America)

Mary E. Hancock, Ph.D., University of Pennsylvania, Associate Professor (ideology and cultural practice, South Asia, social theory, nationalism, cultural studies, feminist theory, public memory)

Carl V. Harris, Ph.D., University of Wisconsin, Professor (American South)

Tsuyoshi Hasegawa, Ph.D., University of Washington, Professor (modern Russia)

R. Stephen Humphreys, Ph.D., University of

Michigan, King Abdul Aziz Ibn Saud Professor of Islamic Studies (Islamic studies)

Lisa Jacobson, Ph.D., UC Los Angeles, Associate Professor (U.S. social and cultural history)

Laura Kalman, Ph.D., Yale University, Professor (20th-century U.S. legal and political history)

Carol L. Lansing, Ph.D., University of Michigan, Professor (medieval Europe)

John W. I. Lee, Ph.D., Cornell University, Associate Professor (ancient Greece)

Nelson N. Lichtenstein, Ph.D., UC Berkeley, Professor (U.S. labor history, 20th-century U.S.)

John D. Majewski, Ph.D., UC Los Angeles, Associate Professor (19th-century American history)

Harold Marcuse, Ph.D., University of Michigan, Associate Professor (modern central/eastern European history)

Patrick W. McCray, Ph.D., University of Arizona, Professor (history of the physical sciences)

J. Sears McGee, Ph.D., Yale University, Professor (Tudor and Stuart Britain)

S. Cecilia Mendez, Ph.D., State University of New York at Stony Brook, Associate Professor (Latin American history)

Stephan F. Miescher, Ph.D., Northwestern University, Associate Professor (African history)

Kenneth J. Mouré, Ph.D., University of Toronto, Professor (European economic history)

Alice M. O'Connor, Ph.D., The Johns Hopkins University, Associate Professor (20th-century U.S. history of public policy)

Michael A. Osborne, Ph.D., University of Wisconsin, Associate Professor (history of biological sciences)

Ann M. Plane, Ph.D., Brandeis University, Associate Professor (U.S. colonial history)

Erika D. Rappaport, Ph.D., Rutgers University, Associate Professor (modern Britain)

Luke S. Roberts, Ph.D., Princeton University, Associate Professor (history of Japan)

David P. Rock, Ph.D., Cambridge University, Professor (Latin America and Argentina)

Paul M. Sonnino, Ph.D., UC Los Angeles, Professor (early modern Europe)

Gabriela M. Soto Laveaga, Ph.D., UC San Diego, Assistant Professor (modern Latin America and Mexico)

Paul Spickard, Ph.D., UC Berkeley, Professor (20th-century American social and cultural history)

John E. Talbott, Ph.D., Stanford University, Professor (modern Europe, war and society)

Stefania Tutino, Ph.D., Scuola Normale Superiore, Italy, Assistant Professor (early modern England)

Zaragosa Vargas, Ph.D., University of Michigan, Professor (modern U.S., labor, Chicano)

Salim Yaqub, Ph.D., Yale University, Associate Professor (U.S. policy in the Middle East)

Emeriti Faculty

Lawrence Badash, Ph.D., Yale University, Professor Emeritus (history of science)

F. A. Bonadio, Ph.D., Yale University, Professor

Emeritus (Civil War and Reconstruction)

W. Elliot Brownlee, Ph.D., University of Wisconsin, Professor Emeritus (American economic history)

Alexander B. Callow, Ph.D., UC Berkeley, Senior Lecturer Emeritus (American urban history)

Chi-yun Chen, Ph.D., Harvard University, Professor Emeritus (ancient China)

Robert O. Collins, Ph.D., Yale University, Professor Emeritus (Africa)

Alexander DeConde, Ph.D., Stanford University, Professor Emeritus (foreign relations)

Jane S. DeHart, Ph.D., Duke University, Professor Emeritus (modern U.S., women, public policy)

Dimitrije Djordjevic, Ph.D., University of Beograd, Professor Emeritus (Balkans and Eastern Europe)

Harold Drake, Ph.D., University of Wisconsin, Research Professor Emeritus (Rome)

Abraham Friesen, Ph.D., Stanford University, Professor Emeritus (Reformation)

Frank J. Frost, Ph.D., UC Los Angeles, Professor Emeritus (Greek history)

Jonathan A. Glickstein, Ph.D., Yale University, Professor Emeritus (U.S. intellectual history)

Otis L. Graham, Jr., Ph.D., Columbia University, Professor Emeritus (recent U.S. history)

Harold C. Kirker, Ph.D., UC Berkeley, Professor Emeritus (U.S. culture)

Albert S. Lindemann, Ph.D., Harvard University, Research Professor Emeritus (modern European socialism)

Leonard M. Marsak, Ph.D., Cornell University, Professor Emeritus (modern European intellectual history)

Roderick W. Nash, Ph.D., University of Wisconsin, Professor Emeritus (American environmental history)

Richard E. Oglesby, Ph.D., Northwestern University, Professor Emeritus (American West and California)

Jeffrey B. Russell, Ph.D., Emory University, Professor Emeritus (medieval Christianity)

Affiliated Faculty

Gerardo Aldana, Ph.D. (Chicana and Chicano Studies)

Catherine L. Albanese, Ph.D. (Religious Studies)

Eileen Boris, Ph.D. (Women's Studies)

Brice Erickson, Ph.D. (Classics)

Claudio Fogu, Ph.D. (French and Italian)

Sabine Frühstück, Ph.D. (East Asian Languages and Cultural Studies)

Mario Garcia, Ph.D. (Chicana and Chicano Studies)

Allan Grapard, Ph.D. (East Asian Languages and Cultural Studies)

Richard D. Hecht, Ph.D. (Religious Studies)

Gaye Theresa Johnson, Ph.D. (20th-century U.S. History)

George Lipsitz, Ph.D. (Black Studies)

Gurinder Singh Mann, Ph.D. (Religious Studies)

Robert Morstein-Marx, Ph.D. (Classics)

Hyung Pai, Ph.D. (East Asian Languages and Cultural Studies)

Horacio Roque Ramirez, Ph.D. (Chicana and Chicano Studies)

Leila J. Rupp, Ph.D. (Women's Studies)

Ann Taves, Ph.D. (Religious Studies)

Christine Thomas, Ph.D. (Religious Studies)

Xiaojian Zhao, Ph.D. (Asian American Studies)

History is studied to enhance the quality of life for the individual. Without any knowledge of the past, the individual becomes a prisoner of the present—able neither to comprehend the present circumstances and their causes nor to deal intelligently with present problems. As a liberal discipline, history aims to permit students to transcend their own cultural limits and, by the study of other societies in other ages, to open their eyes to the diversity of the human environment. It has often been noted that history is the first truly “interdisciplinary” discipline. This is true because everything, no matter how specialized, has a history, and therefore everything is a proper subject of study for the historian. In this department, for instance, the course offerings range not only from the ancient world to modern times, but also from the history of philosophy and ideas to the history of science and its role in society, from governmental elites to popular culture.

The Department of History offers two undergraduate degree programs: the bachelor of arts in history, and the bachelor of arts in the history of public policy.

The B.A. in the history of public policy, the first to be offered in American higher education, combines comparative studies in history with studies in related academic disciplines. Students are expected to acquire competence in a foreign language, in statistics and computer operations, and in research and writing skills, culminating in the preparation of a senior thesis. An internship in governmental and public affairs is strongly recommended.

The department offers the M.A. and the Ph.D. in history within two parallel curricula. One, traditional in nature, prepares students primarily, though not exclusively, for teaching careers in higher and secondary education. The second, pioneered at UCSB, is a graduate program in public historical studies, which aims at training historians for careers not in teaching, but in the community at large, primarily as researchers and writers.

Although personal enrichment is the prime reason that students choose history as a field of study, the nature of the discipline makes it highly desirable as a training ground for many professional fields. The traditional career for the history major has been in teaching, but the breadth of knowledge acquired by studying history is an advantage to those intending a career in business and government service. The stress on the development of research skills, as well as on the ability to think and write clearly, has proven to be excellent preparation for law school and for a wide variety of research and writing jobs.

Students with a bachelor's degree in history who are interested in pursuing a California Teaching Credential should contact the credential advisor in the Graduate School of Education as soon as possible.

The Department of History designates one of its members each year as principal undergraduate advisor; in addition, certain members of the department are appointed undergraduate advisors, each specializing in one of the two majors. Separate advisors are provided for M.A. and Ph.D. candidates. Publications describing both undergraduate and graduate programs are available from the department.

Prizes and Awards

(1) The annual J. Bruce Anderson Fellowship award is endowed by the parents of Dr. Anderson; recipients must be in the Ph.D. program in history. (2) The A. Russell Buchanan Award is presented annually to the graduating senior majoring in history deemed most outstanding. (3) The Richard Kent Mayberry Prize is awarded annually to a history graduate student who has completed at least two years in the doctoral program.

Phi Alpha Theta

Membership in the Gamma Iota Chapter of Phi Alpha Theta, the national history honorary society, is open to students who have completed at least five courses in history with a grade-point average of 3.4 or better. Graduate students and faculty also belong to the organization. In addition to regular meetings on campus, the society sponsors student papers at regional and national meetings. Further information about the organization is available at the department office.

Undergraduate Program

Bachelor of Arts—History

Preparation for the major. Thirty-two lower-division units, including (1) two of the following sequence of History 2A-B-C, 4A-B-C, and 17A-B-C; (2) 4 units of lower-division units in Asian, African, Latin America, or Middle Eastern history; (3) 4 lower-division units in any history course.

Upper-division major. Forty units of upper-division work in history, at least 4 units of which must be in proseminar courses (any course with the letter P after its number). Four units of History 194AH-BH may substitute for the proseminar requirement, but additional units earned in 194AH-BH may not be applied to the major.

The proseminar. The particular skills of historians are the ability to define issues, to gather information pertinent to a solution, and to digest and report that information in a clear and well-conceived argument. These skills, which are summed up by the word “research,” are especially cultivated in undergraduate proseminars, in which the entire term is devoted to preparing a paper on a specialized topic of research. Majors are required to take at least one such course during their career here, but students serious about developing their research and writing skills are urged to take more than one. Proseminars and their subjects may be readily identified by the letter P after their course number, and by the course title. Since most faculty offer no more than one proseminar a year and enrollment is restricted, advance planning is essential. A list of proseminars to be offered in the current year is available at the Department of History office. Once students have chosen a field

for the proseminar, they should approach the faculty to determine when such a proseminar will be offered, so they may plan their schedules well in advance.

Foreign language. Election to Phi Beta Kappa requires proficiency in one foreign language, normally demonstrated by completion of the fourth quarter or its equivalent. Students contemplating graduate study should consult their prospective graduate schools to determine whether specific languages are required.

Graduation with Distinction in History (The Undergraduate Honors Program)

The Department of History at UCSB is committed to excellence in undergraduate education. In addition to the lower-division survey courses in world, American, and European history, the department offers equivalent 5-unit honors courses, History 2AH-BH-CH, History 4AH-BH-CH and History 17AH-BH-CH, for students interested in undertaking additional reading and writing assignments. There are also similar upper- and lower-division levels offered.

Students who have successfully completed at least two such courses, or who have completed the department's lower-division historiography course, History 6 (Historical Reasoning), are eligible to enroll in History 100H (Historical Writing). This is an intermediate-level departmental seminar in which major works from a variety of historical periods and regions are studied. Qualified students who have not been able to satisfy the honors prerequisite (transfer students, for instance) may petition the department's honors committee for admission to History 100H.

In their junior year, students who have maintained a grade-point average in the major of at least 3.5 will be invited to join the department's Senior Honors Seminar, History 194AH-BH, in which students pursue research on a topic of considerable depth and complexity. Students who have successfully completed History 100H will be given priority for this course.

Students admitted into the program will enroll in History 194AH-BH for the two quarters of their senior year. History 194AH-BH may be used to satisfy the proseminar requirement for majors. No more than 4 units earned in this seminar may be applied to the 40 upper-division units required of all majors. In the fall quarter, honors candidates will read, write papers, and build a working bibliography for their thesis. The remaining quarter of the seminar will be devoted to independent research, conducted in consultation with the thesis advisor. At the end of the seminar, students will submit three copies to the department of the thesis. Students who have completed the honors sequence are eligible for graduation with Distinction in the Major.

Students who have not completed the honors seminar will not normally be eligible, although under unusual circumstances, supported by evidence of superior research and writing done in other history courses (such as the proseminars), a student may petition the department's honors committee. In order to graduate with Distinction in the Major, a student must complete a paper that is recognized by a history faculty

member (normally the honors seminar director) as distinguished. The department honors committee will be responsible for verifying the final list of students nominated for graduation with Distinction in the Major.

Bachelor of Arts— History of Public Policy

Preparation for the major. A total of 32 lower-division units in history, composed of the following: (1) History 7; (2) two of the following sequence: History 2A-B-C, 4A-B-C, 17A-B-C; (3) 4 additional units in history which must be in the history of countries or cultures outside of Europe and the United States.

Required work in cognate disciplines: 16 units (four courses) chosen from among the following, with at least one course in each of three of the disciplines indicated: Economics 1, 2, or 109; Political Science 1, 6, 7, 12; Philosophy 3 or 4; Environmental Studies 1 or 3; Sociology 1; Anthropology 2; Black Studies 5, 6, 20; Global Studies 2; Law and Society 1; Women's Studies 10, 20, 30, 60, 70 (these may also satisfy the General Education requirements).

Recommended for students who intend graduate study in the field: PSTAT 5A or 5E or 5S or Sociology 3. Foreign language: 0-25 units (i.e. completion of course 5) in a foreign language appropriate to the area of historical emphasis chosen in the major. Internship: History 196; History 199 (may be fulfilled by UC Washington Center internship).

Upper-division major. Required work in history: 40 upper-division units including 8 units from History 163A-B, 170A-B, 171A-B and 172A-B; 24 units including 12 units in the history of one nation, continent, or period, and 12 units in the history of a contrasting nation, continent, or period (exclusive of courses used to satisfy the 8-unit requirement above), selected with the approval of the departmental advisor for public policy students; 8 units of History 195IA-IB (senior seminar).

Required work in cognate disciplines: 20 units, taken in one of the following related fields (inclusive of lower- and upper-division courses): Asian American studies, Black studies, Chicana/o studies, global studies, law and society, women's studies, economics, political science, environmental studies, philosophy, or sociology. Courses should be selected with the approval of the departmental advisor to public policy students. (Courses taken during the lower-division preparation for the major may be counted in satisfaction of this requirement.)

Note: Public policy students must secure the departmental advisor's approval for their program each quarter.

Graduation with Distinction in History of Public Policy (The Undergraduate Honors Program)

History of public policy majors may also enroll in the Honors Program in History, described above. They will do so by fulfilling the listed requirements as to 1-unit honors courses or History 6 (Introduction to History); History 100H; and grade-point average. When invited to join the department's Senior Honors Seminar (History 194AH-BH), which runs for three quarters in the student's senior year, they will do so with

the understanding that History 194AH-BH will substitute for History 195IA-IB, the required 8-unit senior thesis requirement in the history of public policy major.

Minor—History

Students majoring in other disciplines who have an interest in history may gain, albeit less intensively, the benefits described above by completing a minor in history. The minor consists of any 12 units of lower-division history courses and any 20 units of upper-division history courses. Publications suggesting ways to choose courses so as to focus on particular aspects of history (e.g., women, religion, science, ethnicity, East Asia, the United States, Europe, Africa, Middle East) are available from the department.

All courses to be applied to the minor must be completed on a letter-grade basis, including both courses offered in history and those offered by other departments and applied to the minor.

Preparation for the minor. Twelve lower-division units in history.

Upper-division minor. Twenty upper-division units in history. The department strongly recommends that one of the upper-division courses be a proseminar (undergraduate research seminar).

Note: Substitutions and waivers are subject to approval by the chair of the department. Please see page 118 for special conditions governing minors in the College of Letters and Science.

Minor – Labor Studies

Although housed in the Department of History, the Labor Studies Minor is interdisciplinary in scope, incorporating a variety of courses throughout the humanities and social sciences to offer students an integrated understanding of work, labor, ethnicity, politics and economy. The Minor combines academic study with an internship experience to prepare students for a variety of relevant careers and/or graduate study. All courses that apply to the minor must be taken for a letter grade.

Preparation for the minor. One course from history 2C, 4C, or 17C

Choose one: Asian American Studies 1, Sociology 1, Black Studies 1, Women's Studies 20 or 40, Chicano Studies 1A, Economics 1 or Global Studies 1.

Upper-division minor. 24.0 units required distributed as follows: History 167Q; Choose one History 167CA, 167CB, 174B or 174C; Choose 4 from 2 different disciplines: History 165, 166B, 166LB, 167CP, 167E, 168A, 168B, 168LA, 168LB; Sociology 131, 134, 157, 185D; Economics 100A, 150A, 150B, 152; English 133GC, 165BC; Black Studies 102, 104, 193Y; Women's Studies 120, 153; Chicano Studies 171, 174A, 177, 178A, 189; Global Studies 130; Asian-American Studies 113, 130, 132.

Note: Substitutions and waivers are subject to approval by the chair of the department. Please see page 118 for special conditions governing minors in the College of Letters and Science.

Graduate Program

In addition to departmental requirements, candidates for graduate degrees must fulfill the university degree requirements found in the chapter "Graduate Education at UCSB."

In addition to departmental admission requirements, applicants must also meet the university requirements for admission described in the chapter "Graduate Education at UCSB."

Master of Arts—History

Admission

The M.A. degree in history is looked upon as a valuable stage on the path to the doctorate. Although it is understood that some students may choose not to continue beyond the M.A., and that others may not be permitted to do so, the aim of the program is to provide students with research training leading to the doctoral degree. Consequently, the department does not admit students solely for the purpose of obtaining a master's degree. All applicants are admitted to a single M.A./Ph.D. program.

Applicants to the graduate program in History are expected to show high potential for engaging in advanced historical research and analysis. Applicants must meet general university requirements for admission to graduate standing and should have completed an undergraduate major in History or related fields (approximately 40 upper-division quarter units or approximately 24 upper-division semester units). History is a discipline that benefits from training in other fields, so applicants who do not meet these requirements are still encouraged to apply, but are also strongly urged to contact faculty in their proposed field of study for advice. If admitted, applicants who were not History majors may be required to do some additional course work, which must be completed in the first year and does not count in satisfaction of graduate degree unit or course requirements.

Applicants must submit a suitable sample of historical writing, such as a term paper or equivalent, and three letters of recommendation. These should address the applicant's academic qualifications for graduate work in history. In addition, applicants ordinarily are expected to have a minimum grade-point average of 3.5 in upper-division history courses (or 3.75 in master's courses), and minimum scores on the Graduate Record Examination (GRE) of 85th percentile in verbal and either 70th percentile in quantitative or 5.0 in analytical writing.

Applications for the fall, winter, and spring quarters must be received by December 5. Applicants requesting Graduate Division and/or history department financial assistance must have their application in to the department by December 5, including the necessary support materials.

It should be stressed that admission to the program is competitive, and satisfying these minimum requirements does not, by itself, guarantee admission. At the same time, the decision to admit is based on consideration of the entire file, and promising applicants in unusual circumstances whose records fall below the minimum should not be discouraged from applying.

Applicants must be accepted by a major professor with whom they wish to work. Applicants unsure of how to choose a major professor should inquire by letter or telephone to the graduate program assistant, Department of History, as to how to proceed. No student will be admitted or allowed to continue without a faculty sponsor.

Degree Requirements

The M.A. degree will be awarded to students who satisfy the requirements prescribed by the Graduate Council and who, in addition, meet the following requirements:

Foreign language. Students must pass a written translation examination in at least one foreign language within one calendar year after taking the M.A. comprehensive examination.

Unit requirements. Students must pass a minimum of 36 units of upper-division and graduate history courses. No course will count for the degree if the grade earned in the class is valued at less than a B grade. At least 24 of these units must be in graduate courses numbered between 200 and 292, with 4 units of History 202 (required of all students who have not had a graduate course in historiography) and at least 8 units in research seminars, which will result in the preparation of an original research paper. Papers produced in these seminars lay the foundation for doctoral work and are taken into account along with the results of the comprehensive examinations in evaluating students for admission to the Ph.D. program. History 596 does not apply to the research seminar unit requirement, but 8 units will apply toward the 36-unit requirement. All research seminars last two quarters. Check with the graduate program assistant for credited seminars.

Students in American history must take History 292A-B-C as part of their 36 unit requirement. All coursework must be completed before a student may take the M.A. comprehensive exam.

Comprehensive examinations. The student must pass one three-hour written examination in one of the graduate fields listed below. The department offers reading courses in many of these fields to help students prepare for the examination. History 200 courses are designed to cover large, general fields; History 201 courses cover more specialized fields.

United States*
 Colonial Latin America
 National Latin America
 East Asia (pre-1600)
 East Asia (post-1600)
 Africa
 History of Science
 Early Modern Europe (1450-1815)
 Modern Europe (1789-)
 Medieval Europe
 Middle East (600-1700)
 Middle East (1700-)
 Ancient Mediterranean World
 History of Public Policy

*An Afro-American, Chicano, Asian American, or American-Indian emphasis is acceptable in this field.

Doctor of Philosophy—History

Admission

The M.A. degree in history or a cognate field is normally required for admission into the Ph.D. program. Applicants who do not meet this requirement must complete the M.A. in history before continuing to the Ph.D. The application deadline for those applying with an M.A. degree from another institution is December 5. Students taking the master's examination at UC Santa Barbara must achieve an average grade of A- or higher. In addition, the candidate must acquire a minimum of three satisfactory recommendations from professors within the department, including at least two from professors who have supervised or reviewed the candidate's graduate seminar research papers and one from a faculty member who will serve as major professor. These letters must be on file by the third week of the quarter following award of the M.A.

The General Fields of History

The Department of History at UCSB offers doctoral study in eleven general fields of history:

United States
 Latin America
 East Asia
 Africa
 The Middle East
 History of Science
 Ancient Mediterranean World
 Medieval Europe
 Early Modern Europe (1450-1815)
 Modern Europe (1789-)
 History of Public Policy
 *Comparative Gender
 *World

*Comparative gender, world history, and comparative history of race and ethnicity are offered only as a third field, and not as a possible first or second field. Please refer to "Degree Requirements: General Examinations" for further description of field 3, the outside field in history.

Students will study, and in due time present themselves for examination, in four examination fields, two of them chosen from one of the above general fields, and the third chosen from a second general field. The fourth examination field will be in an outside academic department or in history (see below, under "General Examinations"). The four professors under whom the students study as they prepare for their examinations constitute their doctoral committee. One of its members is the student's major professor, who presides.

Program Supervision

Once admitted to the Ph.D. level, each student will be systematically advised by his or her major professor, who will submit a review of the student's progress and prospects annually in the spring quarter. The results of the annual review will be individually communicated to the student in writing by the director of graduate studies. If the student's progress is unsatisfactory, the department will recommend to the Graduate Dean that the student be placed on academic probation. If at the end of that year progress is still unsatisfactory, the department chair will recommend to the Graduate Dean that the student be dismissed from graduate study.

Degree Requirements

Unit requirements. Students in the doctoral program must enroll for at least six regular academic quarters (not summer sessions) on the UCSB campus pursuing a program of full-time study (12 units each quarter) and research. Three consecutive quarters of this residency must be completed in regular session before advancement to candidacy. Students must complete 24 units of history research seminars, 8 units of which can be taken from the M.A. requirements. Check with the graduate program assistant for credited seminars. History 596 does not count as a research seminar. Students must take at least one graduate course in each of the four areas presented for examination (research seminars and courses taken while in the M.A. program satisfy this requirement), and a graduate course in historiography (History 202) if such a course has not been taken prior to admission to the doctoral program. Doctoral students in American history must take History 292A-B-C, in addition to the 24 units of research seminars.

Foreign language. The department requires candidates for advanced degrees to demonstrate research proficiency in at least one foreign language. Many sub-fields require additional languages at the Ph.D. level, for which they set their own criteria. Candidates are strongly urged to satisfy the departmental requirement in their first year of study. The student must pass at least one foreign language examination, a requirement which may be satisfied by passing the foreign language examination for the UC Santa Barbara M.A. in history, or, with the approval of the graduate committee, an examination at another institution. Additional language requirements pertinent to the field of research may be specified by the major professor with the approval of the graduate committee. Preparation and supervision of these additional language examinations are the responsibility of the major professor, who may or may not use the regular departmental foreign language examinations.

Students should plan to satisfy the departmental foreign language requirement as soon as possible, but no later than the end of the second year in the doctoral program. No student will be allowed to take the general examinations for the Ph.D. without having completed the departmental language requirement, as well as any additional language requirements required by the major professor.

General examinations. Upon satisfying the unit and foreign language requirements, students will be eligible to take their general examinations. Candidates are required to present themselves for examination in four fields of study—three within history and the option of taking either a cognate field outside the history department or a fourth history field. Examination in the three history fields will be both written and oral; the examination in the cognate field or fourth history field will be oral only. The four fields are:

1. The major field, taken under the student's major professor. It will be in that professor's special field, or, with the approval of the graduate committee, in a closely related field. The

major field ordinarily provides the intellectual basis for the dissertation and the student's later emphasis in teaching and research, and the student is expected to achieve depth and breadth of scholarly sophistication and mastery in this field.

2. The general field is the field within which the student's major field is located (e.g., U.S. history is the general field if the major field is U.S. diplomatic history). The student is expected to show breadth and perspective in this field in order to set his or her specialty within its encompassing framework and to be able to teach survey courses.

3. The outside field in history, chosen from a second of the department's graduate fields (see above). This field may be either specialized (as in 1 above) or general (as in 2), depending on the mutual decision of the student, the major professor, and the supervisor of the outside field. This requirement affords the student, for comparative purposes, a deep encounter with the history of a period or culture distinct from that studied in Fields 1 and 2 and also enables him or her to offer survey courses in this field.

4A. A cognate field outside the discipline of history is chosen from within another academic department. This field should strengthen the student's grasp of Field 1 and be comparable in depth and richness to Fields 2 and 3.

4B. With the approval of the major professor and the director of graduate studies, students may substitute for the cognate field a fourth history field from among a number of other topics. These topics must be sufficiently distinct from the other three fields as to constitute a separate historical specialty. Examples of such topics are environmental history, women's history, native American history, military history, and religious history.

Doctoral students should select their four fields in consultation with their major professor during their first quarter of study. The three written examinations in history must all be completed within a period of one month from the date of the first examination. Each of these examinations will be of three hours' duration. Within one week of passing the last of these examinations, the student must take an oral examination in all four fields. The minimum time allotted to this examination is two hours, but the time period may be extended as warranted by the four examiners. Before a student can advance to candidacy, a dissertation prospectus must be approved by the dissertation committee.

The doctoral dissertation. The doctoral dissertation must be an original work of historical research in the field of the candidate's specialization. It must be in clear prose, have intellectual depth, and demonstrate a mastery of historical methodology. When the dissertation is approved, the candidate will be asked to appear for an oral examination in the field of the dissertation.

Teaching assistantship. A candidate will be required to qualify for and (subject to the availability of funds) to hold a teaching assistantship or a research assistantship as part of the preparation for the Ph.D. degree.

Optional Ph.D. Emphasis in Women's Studies

The Women's Studies Program, with almost fifty core and affiliated faculty members in over nineteen disciplines, serves as a model of interdisciplinary work and scholarly collaboration at UCSB. Women's Studies doctoral emphasis students are required to complete successfully four seminars that will enhance their understanding of feminist pedagogy, feminist theory, and topics relevant to the study of women, gender and/or sexuality. Women's Studies as an inter-departmental set of conversations and intellectual questions supports a multifaceted undergraduate curriculum at UCSB. Graduate emphasis students are encouraged to apply to teach Women's Studies courses as teaching assistants and associates as part of their Women's Studies training.

Applicants must first be admitted to, or currently enrolled in, a UCSB Ph.D. program participating in the Women's Studies graduate emphasis: Anthropology; Comparative Literature; Counseling, Clinical, and School Psychology; English; French and Italian; Germanic, Slavic and Semitic Studies; History; History of Art and Architecture; Political Science; Religious Studies; Sociology; Spanish and Portuguese; or Theater and Dance. Candidates complete four graduate courses and select a member of the Women's Studies faculty or affiliated faculty to serve on their dissertation committees.

Applications to the Women's Studies Doctoral Emphasis may be submitted at any stage of Ph.D. work, and applications will be considered throughout the year.

The Graduate Curriculum

Students pursuing the emphasis in Women's Studies will successfully complete four graduate courses. Only one may be taken in the student's home department.

- 1. Issues in Feminist Epistemology and Pedagogy (Women's Studies 270).** A one-quarter seminar that considers Women's Studies as a distinct field. It offers an interdisciplinary exploration of feminist theories of knowledge production and teaching practices. Readings cover past and present critical debates and provide theoretical approaches through which to analyze interdisciplinary epistemological and pedagogical issues.
- 2. Special Topics in Women's Studies (594 AA-ZZ).** A one-quarter seminar offered by a Women's Studies faculty member on topics of central concern to the field of Women's Studies.
Or,
Research Practicum (Women's Studies 280). A cross-disciplinary seminar in which fundamental questions in contemporary feminist research practice are considered in light of students' own graduate projects. Students may fulfill the Area 2 requirement by taking either a Special Topics Seminar or the Research Practicum.
- 3. Feminist Theories.** A one-quarter graduate seminar in feminist theory offered by any department, including Women's Studies.
- 4. Topical Seminar.** A one-quarter graduate seminar, outside the student's home depart-

ment, that addresses topics relevant to the study of women, gender, and/or sexuality.

Optional Ph.D. Emphasis in European Medieval Studies

The Medieval Studies Program offers an interdisciplinary doctoral emphasis to students previously admitted to a Ph.D. program in the Departments of Theater and Dance, English, French and Italian, History, History of Art and Architecture, Music, Religious Studies, and Spanish and Portuguese. Students pursuing the emphasis in European medieval studies must receive a grade of B or better in each of the following: Medieval Latin (Latin 103); one course in a vernacular, western European or Middle Eastern medieval language (English 205, English 230, French 206, Spanish 222A, Spanish 222B, Portuguese 222, Religious Studies 148A, Religious Studies 148 B, Religious Studies 210); Paleography and/or Diplomatics (History 215S, History 215T); Medieval Studies 200A-B-C; and 8 additional units in graduate courses on medieval topics. Students may petition to have appropriate courses from other institutions, or independent study, substituted for these requirements. Medieval Studies 200A-B-C is the program's colloquium series; graduate students in the emphasis attend the series and write brief papers on each colloquium (one per term), to be reviewed by the chair of the program (2 units). To qualify for the emphasis, at least one member of a Ph.D. candidate's dissertation committee must be an affiliated faculty member of the European Medieval Studies Program. Contact the European Medieval Studies Program for additional information on faculty interests, course offerings, and program requirements, or visit our Web site at www.medievalstudies.ucsb.edu.

Optional Ph.D. Emphasis in Global Studies

Students pursuing a Ph.D. in certain departments may petition to add an emphasis in global studies. The departments for which the emphasis is available include anthropology, English, history, political science, religious studies, and sociology. To be eligible for admission to the Ph.D. emphasis, students must be admitted to the Ph.D. program in one of the departments choosing to offer this emphasis with their existing Ph.D. program and petition successfully to add the optional emphasis.

The student's dissertation committee must have one member from a participating department other than the student's own department. The student may also elect a global emphasis for his or her department field/area/specialization exam, if such an emphasis is offered within the department. The chair of the Coordinating Committee will determine when the student has successfully completed all of the requirements for the emphasis.

By "global" we refer to transnational economic, political, environmental, social, and cultural interactions and flows that operate at a global (i.e., trans-continental) scale. "Global studies" views the world as comprised of increasingly interdependent processes, rather than as shaped exclusively or even primarily by the interplay of discrete nation-states.

Petitions for adding the emphasis can be made at any time in a student's graduate career, but typically will be made after at least one successful year of study in the home department. Work completed prior to admission in the emphasis that meets emphasis requirements (as determined by the Ph.D. Emphasis Coordinating Committee) may be counted towards completion.

To satisfy the Ph.D. emphasis in global studies, students are required to take four one-quarter graduate-level courses. One course is Global 201, the introductory gateway seminar, offered by the Global and International Studies Program. Three additional courses must be chosen from among qualifying global theory and global issues courses offered by participating departments. These courses will be selected from an approved list of global theory and global issues graduate courses prepared by the Ph.D. Emphasis Coordinating Committee each spring, for the following academic year. At least one of these three courses must be a global theory course, and at least one must be a global issues course. Courses will typically be taken for a letter grade.

At least one of these three courses will be taken from the student's home department, and at least two must be taken from the six other participating departments or the Global and International Studies Program. No more than one of the three seminars (excluding Global 201) can be taken from a single instructor.

For additional information, please contact the graduate advisor in one of the participating departments or global studies.

Optional Ph.D. Emphasis in Technology and Society

Students pursuing a Ph.D. in this department may petition to add an emphasis in technology and society. The emphasis brings together doctoral students in engineering, social sciences, and the humanities to engage in multidisciplinary coursework and research into the cultural and societal changes resulting from the use of new information technologies. The emphasis features a structured set of courses that may be taught individually and collaboratively by faculty across disciplines: Anthropology, Communication, Computer Science, English, History, Media Arts and Technology, Political Science, and Sociology.

To be eligible for admission to the emphasis, students must be enrolled in good standing in the department. Petitions for adding the emphasis can be made at any time in a student's graduate career, but typically will be made after at least one successful year of study in the home department. Work completed prior to admission that meets emphasis requirements (as determined by the Ph.D. Emphasis Faculty Executive Steering Committee) may be counted towards its completion.

Requirements for completing the optional emphasis in technology and society include:

1. Gateway Technology and Society Colloquium. Students must complete a 1-unit colloquium that brings together students and faculty from multiple disciplines to explore various approaches to studying technology and society. In addition to helping students understand similarities and differences in

conceptualization and knowledge production across disciplines, the seminar promotes interaction among students from different departments.

2. Graduate Coursework. Students must complete four 4-unit courses with a grade of B or better, two each from Area 1 (Culture and History) and Area 2 (Society and Behavior). Area 1 courses explore the humanistic study of cultures, histories and meanings as they intersect with technology. Area 2 investigates the social scientific study of technology in relationship to human behavior, organizations, and social structures.

One course from the student's home department can be applied toward meeting this requirement. Students can petition to substitute a non-listed course, subject to approval by the Technology and Society Faculty Executive Committee.

3. Dissertation. A student's dissertation must have relevance to at least one of the two Emphasis areas. In addition, the student's dissertation committee must include a member from another department participating in the emphasis. Exceptions are subject to approval by the Technology and Society Faculty Executive Committee.

Graduate Program in Public Historical Studies

The Department of History has established within its graduate program a public history emphasis at the doctoral level and offers that emphasis in a unique joint doctoral program with the Capital Campus program of California State University in Sacramento, which brings together public history faculty of the two universities to form one faculty offering doctoral instruction between the two campuses.

Public Historical Studies trains professional historians to serve as research historians working within the community at large, rather than in academic institutions. Either as persons in various types of private practice, or on the staffs of public agencies—as in city, county, state, and federal governments—public historians will research and write historical studies of problems of concern to particular communities or political jurisdictions; aid them in recapturing and in recording and understanding their histories as communities and as organizations; and serve in a variety of other professional employments, such as giving testimony in court proceedings, preparing family histories, preparing environmental impact statements, conducting surveys of historic properties and other cultural resources, and working in historical agencies.

Students will specialize in (1) the history of policy, (2) community history, or (3) cultural resources management. Courses are also available in such fields as business history, women's history, historical editing, and legal history.

Students already holding an M.A. in public history or its equivalent apply directly to the joint UCSB-CSU Sacramento Ph.D. program or the current UCSB Ph.D. program. Students with a B.A. (or M.A. in another field) apply to the M.A. program at CSU Sacramento.

For further information, request from the Department of History a copy of the public historical studies brochure, which describes

curriculum and other aspects of the program in detail.

History Courses

LOWER DIVISION

1AA-ZZ. Freshman Seminar in History

(1) STAFF

Prerequisite: lower-division standing.

May be repeated for credit to a maximum of 3 units provided letter designations are different. Letter grade required for majors.

A seminar for lower-division students with an interest in history. Content will vary with instructor.

2A-B-C. World History

(4-4-4) STAFF

Not open for credit to students who have completed History 2AH-BH-CH.

Survey of the peoples, cultures, and social, economic, and political systems that have characterized the world's major civilizations in Europe, Asia, Africa, the Americas, and Oceania.

- A. Prehistory to 1000 CE
- B. 1000 to 1700 CE
- C. 1700 CE to present

2AH-BH-CH. World History Honors

(5-5-5) STAFF

Prerequisites: consent of instructor; honors standing.

Not open for credit to students who have completed History 2A-B-C.

Lecture is in conjunction with History 2A-B-C along with a weekly two hours honors seminar.

3AA-ZZ. Special Topics

(1-4) STAFF

Topics will vary per instructor.

4A-B-C. Western Civilization

(4-4-4) STAFF

Not open for credit to students who have completed History 4AH-BH-CH.

General survey courses, designed to acquaint the student with major developments that have influenced the course of western civilization since the earliest times. These developments are as likely to be in religion, the arts, and sciences as in the more traditional political field. Weekly discussion sections are an important feature of this course, enabling the student to develop and expand upon material presented during the lecture hour.

- A. Prehistory to A.D. 1050 (F)
- B. 1050 to 1715 (W)
- C. 1715 to present (S)

4AH-4BH-4CH. Western Civilization-Honors

(5-5-5) STAFF

Prerequisite: honors standing.

Not open for credit to students who have completed History 4A-B-C.

Lecture will be concurrent with History 4A-B-C, along with a weekly two hour honors seminar.

5. The History of the Present

(4) MOURE

Provides essential historical context for understanding major issues and developments in contemporary life; topics vary each year. Coverage ranges from the local to the global, and encompasses current events in politics, economics, social relations, welfare, science, religion, and popular culture.

6. Historical Reasoning

(4) DRAKE

Prerequisites: a lower-division course in history and consent of instructor.

Introduction to the development of the history profession, with special attention to the methods and goals of historical research. To develop criteria for judging the value of historical scholarship. Strongly recommended for students considering the Honors Program in History.

7. Great Issues in the History of Public Policy

(4) BERGSTROM

Broad exploration of great issues in the history of public policy from ancient times to the present, to understand basic ways in which societies make their

major decisions, the shared dynamics in the process, and how varied settings affect it.

7H. Great Issues in the History of Public Policy-Honors

(1) BERGSTROM

Prerequisites: concurrent enrollment in History 7 and consent of instructor.

Students will receive 1 unit for the honors seminar (7H) or a total of 5 units for History 7.

8. Introduction to History of Latin America

(4) CLINE, ROCK, MENDEZ

Deals with major issues in Latin America's historical formation: pre-Hispanic cultures, the Spanish conquest, the role of colonial institutions, the development of trade, eighteenth-century reform, independence, the formation of nations; and identify major issues in current Latin American affairs.

8H. Introduction to History of Latin America-Honors

(1) CLINE, ROCK, MENDEZ

Prerequisites: concurrent enrollment in History 8; honors standing; consent of instructor.

Students will receive 1 unit for the honors seminar (8H) for a total of 5 units for History 8.

17A-B-C. The American People

(4-4-4) STAFF

Not open for credit to students who have completed History 17AH-BH-CH.

A survey of the leading issues in American life from colonial times to the present. The course focuses on politics, cultural development, social conflict, economic life, foreign policy, and influential ideas. Features discussion sections.

- A. Colonial through Jacksonian era
- B. Sectional crisis through progressivism
- C. World War I to the present

17AH-17BH-17CH. The American People-Honors

(5-5-5) STAFF

Prerequisites: honors standing; consent of instructor.

Not open for credit to students who have completed History 17A-B-C.

Lecture will be concurrent with History 17A-B-C, along with a weekly two hour honors seminar.

25. Violence and the Japanese State

(4) FRUHSTUCK

Examines historiographically and sociologically the Japanese State's various engagements in violent acts during war and peace times.

33D. The Holocaust: Interdisciplinary Perspectives

(4) MARCUSE

Basic introduction to the history of the Nazi Holocaust. The examination of approaches taken by other disciplines, such as sociology, psychology, and literary studies, is designed to help students understand how history relates to other disciplines.

46. Survey of Middle Eastern History

(4) GALLAGHER

Course themes include rise of Islam, development of Islamic civilization, the western impact, and current struggles and conflicts.

49A-B. Survey of African History

(4-4) MIESCHER

Same course as Black Studies 49A-B. Not open for credit to students who have completed History 49.

An introduction to the history of Africa from the earliest times to the present. Course themes include: organization of production, state formation, Africa and the world economy, colonialism, resistance, power and identities in African societies, current struggles and conflicts.

- A. Prehistory to 1800CE
- B. 1800CE to the present

50. Labor Studies

(4) LICHTENSTEIN

Examines the historical meaning of work and how workplaces have been a terrain of struggle for human rights and democracy in the United States. Also explores what it takes to organize and run a union.

56. Introduction to Mexican History

(4) CLINE

An introduction to the basic issues and themes of Mexican history, from the pre-Hispanic era to the present.

80. East Asian Civilization

(4) BARBIERI-LOW

Same course as East Asian Cultural Studies 80.

A basic introduction to the history of East Asia focusing on the emergence and evolution of Chinese civilization and its impact upon the distinctive indigenous cultures of Japan, Korea, and Vietnam.

82. The Anthropology of Korea

(4) PAI

Same course as Korean 82. Not open for credit to students who have completed History 80K or Korean 80K.

Introduction to the various features of traditional Korean civilization and society covering its history and topics in anthropology (kinship, inheritance, customs, religion, rice production, and peasant economy).

83. Chinese Thought

(4) STAFF

Examines the main Chinese and philosophical traditions from the ancient period through to the present. Focuses on specific themes in the writings of individual thinkers including just rule, human nature, and gender relations.

87. Japanese History Through Art and Literature

(4) ROBERTS

Not open for credit to students who have completed History 90.

A basic introduction to the history of Japanese culture from its origins to the present day, with particular emphasis on the evidence of architecture and painting (presented through audiovisual modules). Selected examples of fiction and poetry will also be used.

88. Survey of South Asian History

(4) HANCOCK

An introduction to the history of the South Asian subcontinent, with emphasis on the period from 1500 CE to the present.

99. Introduction to Research

(1-4) STAFF

Prerequisites: consent of department and instructor.

Students must have an overall grade-point average of 3.0. May be repeated for credit to a maximum of 8 units, but only 4 units may be applied toward the major. Students are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined.

Independent research under the guidance of a faculty member. Exceptional students are offered an opportunity to undertake independent or collaborative research or to act as interns for faculty-directed research projects.

UPPER DIVISION

100H. Historical Writing

(4) TALBOTT

Prerequisite: consent of instructor.

Students are required to take two courses from the following: History 2AH, 2BH, 2CH, 4AH, 4BH, 4CH, 6, 7H, 8H, 17AH, 17BH, 17CH, 49AH, or 49BH.

Intermediate-level honors seminar in which students read and critique major primary and secondary works from a variety of periods and regions.

101. Historical Fiction

(4) STAFF

Examines the relationship between history and fiction through a close readings of a number of historical novels (such as those of Herman Wouk) and viewing a number of historical dramas (such as *Amistad* and *Gandhi*).

101G. Comparative Histories of Contested Sexualities and Same-Sex Practices

(4) LANSING/MIESCHER

Exploration of same-sex behavior in ancient Greek, pre-modern Oceania, medieval Europe, modern Africa, and North America. Introduction to the theoretical questions in the study of sexuality and how scholars have used these tools.

102AA-ZZ. Special Topics

(4) STAFF

Course is designed for visiting instructors so that they may teach a course in their special field. May be repeated for credit provided letter designation is different.

Topics may vary per instructor.

103S. History of Surfing

(4) STAFF

Same course as Environmental Studies 103s.

The history of surfing from its Polynesian origins to today's global, commercial, and cultural force, with perspectives from history of politics; economics; science and technology; the developing world; sex, ethnicity, gender; popular culture; and special focus on the environment.

105A. The Atomic Age

(4) MCCRAY

Prerequisite: History 4C or 17C or upper-division standing.

Not open for credit to those who have completed History 105.

The history of military uses of nuclear energy and the attendant problems. Topics included: Manhattan project, decision to use the bomb, legislation, AEC, arms race, testing, fallout, civil defense, disarmament efforts, foreign programs, espionage.

105B. The Space Age

(4) MCCRAY

Prerequisite: History 4C or 17C or upper-division standing.

Course examines history of spaceflight and space exploration in the twentieth century with emphasis on US experience. Considers social, political, and technological aspects of the Space Age with especial consideration to the Cold War era.

105P. Proseminar in Atomic Age Problems

(4) MCCRAY

Prerequisite: upper-division standing.

May be repeated for credit to a maximum of 8 units.

Recommended preparation: History 105 or 106C; and Writing 109HU.

Seminar, with research paper, on relationship between science and technology and society. Topics, one each course, will include Hiroshima and Nagasaki, Arms Race, arms control, science and social responsibility, politics of science, scientific advice to government, civilian uses of nuclear energy.

105Q. Readings on the Atomic Age

(4) MCCRAY

Prerequisite: upper-division standing.

May be repeated for credit to a maximum of 8 units.

Reading seminar on relationships between science, technology and society. Topics include Hiroshima and Nagasaki, arms race, arms control, science and social responsibility, politics of science, scientific advice to government, and civilian uses of military.

106A. The Origins of Western Science, Antiquity to 1500

(4) OSBORNE

Prerequisite: History 4A or 4B or Environmental Studies 1 or 2 or 3 or Philosophy 1 or 3 (any course may be taken concurrently), or upper-division standing.

Same course as Environmental Studies 108A.

Examines the emergence and development of science through an examination of ancient cosmology, medicine, natural history, philosophy, and environmental ideas.

106B. The Scientific Revolution, 1500 to 1800

(4) GUERRINI

Prerequisite: upper-division standing.

The history of science in the West from Copernicus to Lavoisier: the transition from medieval, theocentric views of nature and its operation to secular and mechanistic views in the seventeenth and eighteenth centuries, and the transition from natural philosophy to science. The role of science in Western culture.

106C. History of Modern Science

(4) OSBORNE

Prerequisite: History 4A or 4B or upper-division standing.

Science in the late nineteenth- and twentieth-century with emphasis on the physical sciences. Topics include end of classical physics; x-rays and radioactivity; quantum revolution; astronomy and cosmology; nuclear physics; the integration of scientists into the national security state.

106D. U.S. Science Policy

(4) MCCRAY

Prerequisite: History 17C or 105 or upper-division standing.

From the time governments first funded scientific projects they had, consciously or not, a science policy. What were the reasons for these expenditures? Topics covered range from the Lewis and Clark Expedition to contemporary medical, environmental, space, and defense research.

106P. Proseminar in Science, Technology, and Medicine

(4) STAFF

Prerequisite: History 105 or 106A or 106B or 106C or 108 or 109 or 110 or upper-division standing.

Proseminar on a diverse range of topics in science, technology, and medicine. Topics vary.

107C. The Darwinian Revolution and Modern Biology

(4) OSBORNE

Prerequisite: History 4B or 4C or 17B or 17C or Environmental Studies 1 or 2 or 3 or Philosophy 1 or 3 or upper-division standing.

Same course as Environmental Studies 107C.

Examines the social and scientific impacts of evolutionary synthesis, the birth of ecology, and molecular biology. Focus is on America and Western Europe.

107E. History of Animal Use in Science

(4) GUERRINI

Prerequisite: upper-division standing.

Same course as Environmental Studies 107E.

Examines history of scientific uses of animals from antiquity to the present. Topics include vivisection, field trials, and the development of drugs and vaccines. Changing ethical ideas about animals, including the relationship between animal rights and environmental ethics, is also considered.

107P. Proseminar on Darwinism and its Social Implications

(4) OSBORNE

Prerequisite: upper-division standing.

Evolution, natural selection, religion, teleology, Social Darwinism, using the writings of Charles Darwin, Karl Marx, Herbert Spencer, and William Graham Sumner.

107R. History and Ecological Restoration

(4) GUERRINI

Prerequisite: upper-division standing.

Same course as Environmental Studies 107R.

An examination through case studies of ecological restoration from a historical perspective, featuring the intersection between the historian and the restoration process. Consideration of the definitions of natural and cultural resources and historical artifacts.

108. Science and Contemporary Culture

(4) MCCRAY

Prerequisite: a previous course in history.

In-depth examination of contemporary issues in science and technology in their historical contexts. Topics include: biotechnology and the Human Genome Project; weapons of mass destruction; nanotechnology; national science policy; evolution, science, and religion.

109. Science and Technology in America

(4) MCCRAY

Prerequisite: History 4C or 17C or upper-division standing.

Science and technology in American intellectual, cultural, religious, and political life with focus on the nineteenth and twentieth centuries. Examples include rise of scientific enterprise and infrastructure; technology and America's economic growth; American research styles; science and the military; space program; environmentalism; biotechnology.

110. History of Public Health

(4) OSBORNE, GUERRINI, SOTO LAVEAGA

Prerequisite: upper-division standing.

Course themes include the development of medicine and health care in the United States, women and the medical profession, alternate medical systems, and current crises in medical policy.

110D. Diseases in History

(4) OSBORNE, GUERRINI

Prerequisite: upper-division standing.

The role of infectious diseases in human history, mainly in the West, from prehistory to the present. Emphasis on the interaction between diseases and culture, and the assessment of historical accounts of diseases.

110PP. Proseminar on History of Medicine and Public Health

(4) STAFF

Recommended preparation: History 106A, 106B, 107C, 107E, 110, or 110D; and Writing 109HU.

Research seminar on the history of health, disease, and healing.

110Q. Seminar in Medical History

(4) OSBORNE, GUERRINI

Prerequisite: History 110 (may be taken concurrently).

May be repeated for credit to a maximum of 8 units.

Topics in Asian, African, European, and American medical systems focusing on their historical evolution in the nineteenth and twentieth centuries.

111A-B-C. History of Greece

(4-4-4) LEE

Prerequisite: History 2A or 4A or upper-division standing.

A. Early Greece, 3000-750 B.C.

B. Archaic and Classical Greece, 750-323 B.C.

C. The Hellenistic World, 323-31 B.C.

111P. Proseminar in Greek History

(4) LEE

Prerequisite: History 111A or 111B or 111C.

May be repeated for credit to a maximum of 8 units.

Research seminar in Greek history. A research paper is required.

112A. Roman Imperialism

(4) DIGESER

Prerequisite: History 2A or 4A.

Examines the topic of imperialism under the Roman Republic by examining the circumstances and motivations that encouraged Rome to become an imperial power. The justifications for Roman imperialism and some of its consequences are explored.

112B. The Roman Revolution

(4) DIGESER

Prerequisite: History 2A or 4A.

Examines the topic of regime change in the Roman Empire by exploring what led to the collapse of Republican institutions, why Romans turned to one-person rule and whether their new institutions resolved the problems of the past.

112C. Disaster and Reform in Rome

(4) DIGESER

Prerequisite: History 2A or 4A.

Explores the topic of the Roman Empire's response to crisis by exploring the extent to which the more autocratic form of late imperial government was a response to the invasions, persecutions and civil wars of the third century.

112D. The Roman World in Late Antiquity

(4) DIGESER

Prerequisite: History 2A or 4A or upper-division standing.

Not open for credit for those who have completed History 113C.

A survey of the process by which the late Roman Empire divided into three chief cultural, religious, and political entities (Byzantine, Germanic, and Islamic) between the fifth and eighth centuries.

112DR. Directed Reading and Research in Ancient History

(4) DRAKE, DIGESER

Prerequisite: History 112A or 112B or 112C or 112D or 113A or 113B or 113C or 113Q.

Recommended preparation: Writing 109HU.

Focuses on exploring and researching key themes

or historical problems in ancient history. The course culminates with a 10-20 page research paper. Topics differ from year to year.

112P. Proseminar in Roman History

(4) DRAKE, DIGESER

Prerequisite: History 113A or 133B or 113C or History 112A or 112B or 112C or 112D.

May be repeated for credit in combination with History 113P for a maximum of 8 units.

Recommended preparation: Writing 109HU.

Students produce a research paper on a topic of their choice in the history of either the republic or empire. From time to time, a seminar might be devoted to aspects of a particular topic.

113A-B. Roman History

(4-4) DRAKE

Prerequisite: History 2A or 4A or upper-division standing.

A. From Neolithic times to the fall of the Republic.

B. The Roman Empire.

113C. The Roman World in Late Antiquity

(4) DIGESER

Prerequisite: History 2A or 4A or upper-division standing.

A survey of the processes by which the late Roman Empire divided into three chief cultural, religious, and political entities (Byzantine, Germanic, and Islamic) between the fifth and eighth centuries.

113P. Proseminar in Roman History

(4) DRAKE

Prerequisite: History 113A or 113B or 113C.

May be repeated for credit to a maximum of 8 units.

Recommended preparation: Writing 109HU.

Students produce a research paper on a topic of their choice in the history of either the republic or empire. From time to time, a seminar might be devoted to aspects of a particular topic.

113Q. Topics in Roman History

(4) DIGESER

Prerequisite: History 2A or 4A.

May be repeated for credit to a maximum of 8 units.

Topics in ancient Roman history. Potential topics include the motivations of Roman imperialism during the Republic, the rise and function of the Principate, and the religious and political problems of the third and fourth century.

114A. History of Christianity: Beginning to 800

(4) DIGESER

Prerequisite: History 4A.

The history of Christian communities and doctrines from the first through eighth centuries. Special emphasis on Christians' evolving relationships with Pagan and Jewish communities throughout the Mediterranean world.

114B. History of Christianity

(4) TUTINO

Prerequisites: any two quarters of History 4A-B-C; upper-division students only.

From 800 to 1300.

114C. History of Christianity

(4) TUTINO

Prerequisites: any two quarters of History 4A-B-C. From 1300 to 1648

115. The Fall of Rome and the Birth of Europe, 300 to 1050

(4) LANSING

Prerequisite: History 2A or 4A.

The political, economic, and cultural evolution of Europe from the time of Constantine to the mid-fifteenth century.

115P. Proseminar in Medieval History

(4) LANSING, FARMER, BLUMENTHAL

Prerequisite: upper-division standing.

May be repeated for credit to a maximum of 8 units.

Seminar which trains students in the methods of historical research. A research paper will be written on a topic within the general area of medieval European history.

115X. Medieval Scandals**(4) LANSING**

Explores medieval European politics and culture through a look at notorious scandals: Pope Joan, Heloise and Abelard, the persecution of the Templars, and the Fourth Crusade.

116. The Civilization of the High Middle Ages: 1050 to 1350**(4) LANSING, BLUMENTHAL***Prerequisite: History 4B.*

European civilization during the high Middle Ages. The struggle between church and state, the rise of feudal monarchies, the revival of commerce, and the flowering of medieval culture.

117A. Towns, Trade, and Urban Culture in the Middle Ages**(4) FARMER***Prerequisite: History 4B or upper-division standing.*

The social and cultural history of medieval towns from the sixth through the sixteenth century: Roman survivals; dark age "commerce"; transition from "gift" to money economy; social unrest; the emergence of urban classes and urban culture.

117C. Women, the Family, and Sexuality in the Middle Ages**(4) FARMER***Prerequisite: History 4B or upper-division standing.*

Same course as *Women's Studies 117C and Medieval Studies 100A.*

Family structure; perceptions and ideals of intimate and familial relations; status, perceptions, and experiences of women in western Europe circa 400-1400 A.D. Special attention on social, political, and religious contexts.

117D. Feminist Perspectives on Jewish and Christian Traditions**(4) FARMER, HECHT***Prerequisite: History 4B or upper-division standing.*

Same course as *Interdisciplinary 185HF.*

This seminar examines selected "clanic" texts (Biblical, Talmudic, Patristic) dealing with women, gender, and sexuality; as well as historic and contemporary uses, reinterpretations and responses to those texts.

117DR. Directed Readings in Medieval History**(4) FARMER, LANSING, BLUMENTHAL***Prerequisite: consent of instructor.*

Recommended preparation: Writing 109HU.

Through readings and discussion students explore a topic or problem in medieval social history. The course culminates with a 10-20 page research paper. Specific topics differ from year to year.

117P. Proseminar on Medieval Social History**(4) FARMER***Prerequisite: History 115 or 116 or 117A or 117C.*

May be repeated for credit to a maximum of 8 units.

Recommended preparation: Writing 109HU.

Undergraduate research seminar on selected topics in medieval social history.

117Q. History of the Cult of the Virgin Mary**(4) FARMER**

May be repeated for credit to a maximum of 8 units.

This reading/discussion course covers Christian beliefs about the Virgin Mary from the first century CE to the present. Readings include canonical and apocryphal gospels, church fathers, medieval mystics, and accounts of early modern and modern apparitions of the Virgin.

118A. The Crusades in Cross-Cultural Perspectives**(4) BLUMENTHAL***Prerequisite: History 4A and 4B.*

Through the analysis of Latin Christian, Byzantine, Jewish, and Muslim sources, this course considers the development of the concept of the crusade and the progress of the crusading movement from the eleventh to the fifteenth centuries.

118B. Muslims, Christians, and Jews in Medieval Spain: Conquest, Colonization, and Coexistence**(4) BLUMENTHAL***Prerequisite: History 4A and 4B.*

Assesses the more than seven centuries of Muslim, Christian, Jewish coexistence (*convivencia*) in the Iberian peninsula, examining intercultural and interfaith relations from the time of the Visigoths (fifth century) to the expulsion of the Moriscos (Muslim converts to Christianity) in 1609.

119. The Crusades and the Near East, 1095-1291**(4) HUMPHREYS***Prerequisite: History 4A and 4B; or upper-division standing.*

Survey of the Crusades from their origins to the fall of Acre in 1291; ideology of the Crusading movement; history and institutions of the crusader states in the Near East; Muslim responses, ideological and political, to the Crusader presence.

119Q. Topics in the History of the Crusades**(4) HUMPHREYS***Prerequisite: upper-division standing.*

May be repeated for credit to a maximum of 8 units.

Recommended preparation: a previous course on Medieval Europe or the Middle East.

Topics on the period of the crusades. These vary from year to year: e.g., the idea of holy war and Jihad, the development of Mediterranean commerce; cultural contact between Islam and Christendom. Term paper required.

120. Orwell's Century**(4) TALBOTT***Prerequisite: consent of instructor.*

The writings of the author of 1984 read in the light of major twentieth-century themes: imperialism, socialism, the Great Depression, the Spanish Civil War, fascism, World War II, totalitarianism, the collapse of the Soviet Union, and the Bosnian War.

121A. Renaissance Italy, 1300-1550**(4) BERNSTEIN**

Not open for credit to students who have completed History 121D.

The cultural, political, social, and gender history of the Italian city republics and court societies. Examination of how contemporaries viewed their own society, in an attempt to answer the intriguing question of what was the Italian Renaissance?

121B. Late Medieval and Renaissance Europe, 1348-1550**(4) BERNSTEIN***Prerequisite: History 4B or upper-division standing.*

The history of northern Europe from the black death through 1550. Topics include: social disorders, warfare, intellectual and religious culture, changes in northern Europe prompted by spreading Renaissance ideas, explorations of the "New World," and religious dispute.

121C. History of France from 1500-1700**(4) BERNSTEIN***Prerequisite: History 4B or upper-division standing.*

Same course as French 154C.

Politics, religion, and society in France from the reign of Francis I to Louis XIV. Special emphasis on religious disputes and questions of power.

121M. Renaissance Monarchy in Thought and Practice**(4) BERNSTEIN***Prerequisite: History 4B or 121B.*

Seminar in the theories and practices of Renaissance monarchy. Topics include: contemporary discussions of the powers and limitations of kingship; warfare and foreign affairs; royal court and the role of pageantry; female rulers; civil war and rebellion.

121P. Proseminar in Renaissance Europe**(4) BERNSTEIN***Prerequisite: History 121A or 121B.*

Recommended preparation: Writing 109HU.

A seminar on Renaissance Europe, 1300-1600. Students develop research skills and use them to complete a research topic in Renaissance history.

121Q. Cultures of Renaissance Europe, 1450-1650**(4) BERNSTEIN***Prerequisite: History 4B or 121A or 121B.*

May be repeated for credit to a maximum of 8 units.

Through original texts and historical commentary, seminar explores individual lived experiences, as manifested through issues of popular and elite cultures, witchcraft, gender relations, nobility, and law.

122A-B. Europe in the Age of the Reformation: 1500-1648**(4-4) TUTINO***Prerequisite: History 4B.*

The political, economic, social, and cultural evolution of Europe, 1500-1648.

123A. Europe in the Nineteenth Century**(4) LINDEMANN***Prerequisite: History 4C.*

European history from the fall of Napoleon to the end of the nineteenth century.

123B. Europe in War and Revolution**(4) LINDEMANN***Prerequisite: History 4C.*

European history from the end of the nineteenth century to the end of World War II.

123C. Europe Since Hitler**(4) TALBOTT, EDGAR, MOURÉ***Prerequisite: History 4C.*

European history from the end of World War II to the present.

123F. Twentieth-Century Europe: History and Fiction**(4) MOURÉ***Prerequisite: History 4C.*

Not open for credit to students who have completed History 128F.

Examines major political, social, and intellectual change in twentieth-century Europe through the works of contemporary writers.

123P. Proseminar in the History of Europe, 1815-Present**(4) LINDEMANN, MOURÉ, TALBOTT***Prerequisite: History 123A or 123B or 123C.*

May be repeated for credit to a maximum of 8 units.

Recommended preparation: Writing 109HU.

Research seminar in the history of Europe from 1815 to the present.

123Q. Topics in Twentieth-Century Europe**(4) TALBOTT, LINDEMANN, MOURÉ***Prerequisite: History 123B or 123C or 123F.*

May be repeated for credit to a maximum of 8 units.

Topics in twentieth-century European history. Format varies according to topic.

124A. Women, Gender, and Sexuality in Europe, 1750-1914**(4) RAPPAPORT***Prerequisite: History 4C.*

Same course as Women's Studies 124A.

The roles of women, gender, and sexuality in eighteenth and nineteenth century Europe. Exploration of the nature of women and revolution: religious, legal, scientific, and popular conceptions of gender and sexuality; industrialization and family life, the rise of organized feminism.

124B. Women, Gender, and Sexuality in Europe, 1914-Present**(4) RAPPAPORT***Prerequisite: History 4C.*

Same course as Women's Studies 124B.

The relationship between war, revolution, fascism, socialism, feminism, and consumerism and the history of the family, gender, and sexual identities in the twentieth century.

128Q. Topics in Twentieth-Century Europe**(4) STAFF***Prerequisite: History 128A, 128B, 128C, or upper division standing.*

May be repeated for credit to a maximum of 8 units.

Topics in twentieth-century European history. Format varies according to topic.

129A-B-C. Europe in the Seventeenth Century**(4-4-4) SONNINO***Prerequisite: History 4B or upper-division standing.*

Economic, social, political, and intellectual history of the seventeenth century:

- A. 1610-1648
- B. 1648-1685
- C. 1685-1715

129D-E-F. Europe in the Eighteenth Century**(4-4-4) SONNINO***Prerequisite: History 4C or upper-division standing.*

Economic, social, political, and intellectual history of the eighteenth century.

- D. 1715 to 1763
- E. 1763 to 1789
- F. 1789 to 1815

131F. Anti-Semite and Jew in Modern Europe and America, 1870 to Present**(4) LINDEMANN***Prerequisite: History 4C.*

A study of modern anti-Semitism, beginning with the appearance of political anti-Semitism in Germany and Austria-Hungary; the Dreyfus Affair; Jewish patriots and revolutionaries; Nazism and the Jews; Zionism; anti-Semitism since WW II.

132. War and Society Since 1789**(4) TALBOTT***Prerequisite: History 2C or 4C.*

Not open for credit to students who have completed History 138. A seminar with limited enrollment.

Topics in war, the state and society since 1789. Origins and consequences of wars, and the political, social, and economic aspects of both land and sea warfare. A seminar, with limited enrollment.

132W. War in History**(4) TALBOTT***Prerequisite: History 2 or 4 or 7 or 8 or 17 or 46 or 49 or 80 or 87 or 88.*

A survey of Western and non-Western war in practice and theory, on land and at sea, from ancient times to the present.

133A. Nineteenth Century Germany**(4) MARCUSE***Prerequisite: History 2C or 4C.*

Not open for credit to students who have completed History 193A.

Survey of the history of the German states from the French Revolution through the stages of industrialization and national unification to World War I. Focus on the development and specific nature of German society and political culture.

133B. Twentieth Century Germany, Part I**(4) MARCUSE***Prerequisite: History 2C or 4C.*

Examination of German history from the beginning of the twentieth century to World War II. Topics include Germany's role in the first world war, the German revolution of 1918-19, the Weimar Republic, and the national-socialist state and its aims in World War II and the Holocaust.

133C. Twentieth Century Germany, Part II**(4) MARCUSE***Prerequisite: History 2C or 4C.*

After examining development during the last years of World War II, this course traces the histories of East and West Germany from 1945 to unification in 1989.

133P. Proseminar in German History**(4) MARCUSE***Prerequisite: History 133A or 133B or 133C or 133D.*

May be repeated for credit in combination with History 193P to a maximum of 8 units.

Recommended preparation: Writing 109HU.

Students learn research skills and use them to explore topics in twentieth century German history.

133Q. Readings on the Holocaust**(4) MARCUSE***Prerequisite: History 33D or 133B or 133C or 133D (may be taken concurrently).*

Exploration of selected topics pertaining to the Holocaust through memoirs, historiography, and works of fiction. The course is structured as a dialog between

students and the instructor based on written analyses of the literature.

135A-B-C. History of Russia**(4-4-4) HASEGAWA***Prerequisites: History 4B or 4C or upper-division standing.*

- A. Russia to 1800. A survey of Russian history from the Kievan and Muscovite periods to the end of the eighteenth century. Emphasis placed on the imperial period after Peter the Great.
- B. 1800-1917. A survey of Russian history from the reign of Alexander I to the Russian Revolution.
- C. 1917-present. A history of the Soviet Union from the Russian Revolution of 1917 to its collapse, focusing on political and social history.

135P. Proseminar in Modern Russian/Soviet History**(4) HASEGAWA***Prerequisite: History 135B or 135C.*

Research seminar in modern Russian and Soviet history.

137A-B. The Origins of Contemporary France**(4) TALBOTT, MOURÉ***Prerequisite: History 2C or 4C or upper-division standing.*

Transformation of a tradition-bound rural society into a leading industrial power

- A. 1815 to World War I
- B. World War I to present

138B. The Vietnam Wars**(4) STAFF***Prerequisite: History 17C or 138A or 166B or 166C or 171B or upper-division standing.*

This course covers the history of wars fought in Vietnam since the 1940s, with particular attention to the long period of American involvement. The events will be considered in their relationship to Vietnamese history, American politics and society, and the concurrent Cold War.

138P. Proseminar in the Vietnam Wars**(4) STAFF***Prerequisite: History 138B or 171B.**Recommended preparation: Writing 109HU.*

Research seminar on a topic in the history of the Vietnam wars.

140A-B. Early Modern Britain**(4-4) MCGEE***Prerequisite: History 2A or 2B or 4A or 4B or upper-division standing.*

A history of England from the late Middle Ages to the eighteenth century.

140BH. Early Modern Britain**(1) MCGEE***Prerequisites: concurrent enrollment in History 140B and consent of instructor.*

A weekly, one-hour section, open to any students who would like to supplement the material of the lecture course with additional readings and discussion.

140IA-IB. The History of Ireland**(4-4) MCGEE***Prerequisite: sophomore or junior or senior standing.*
Ireland from the earliest times to the present.**140P. Proseminar in Early Modern British History****(4) MCGEE***Prerequisites: History 4B or 140A and 140B.*

May be repeated for credit to a maximum of 8 units.

Recommended preparation: Writing 109HU.

A writing seminar in which emphasis is placed upon the use of primary sources.

140Q. Readings in Early Modern British History**(4) MCGEE***Prerequisite: consent of instructor.*

May be repeated for credit to a maximum of 8 units.

Exploration of selected topics in early modern British history through readings and discussion.

141A. Nineteenth-Century Britain**(4) RAPPAPORT***Prerequisite: History 4C or 140A or 140B or 140C.*

The rise of Britain as an industrial, urban, and imperial nation. Topics include the nature of industrialization, urbanization, and class formation, the role of gender and race in cultural society, the arts, and the construction of Victorian identities.

141B. Twentieth-Century Britain**(4) RAPPAPORT***Prerequisite: History 4C or 140A or 140B or 140C or 141A.*

Culture, society, and politics in Britain since 1914. Topics include the impact of war on society, the economy and empire; the welfare state and changing roles of women, consumer and youth cultures; the new left and new right.

141P. Proseminar in Modern British History**(4) RAPPAPORT***Prerequisite: History 141A-B.*

May be repeated for credit to a maximum of 8 units.

Research in modern British social, cultural, economic, and political history.

141Q. Readings in Modern British History**(4) RAPPAPORT***Prerequisite: History 4C.*

May be repeated for credit to a maximum of 8 units.

Exploration of selected topics pertaining to modern British history through memoirs, historiography, and works of fiction. The course is structured as a dialog between students and the instructor based on written analyses of the literature.

142. History of North Africa**(4) GALLAGHER***Prerequisite: History 46 or upper-division standing.*

Survey of the history of Morocco, Algeria, Tunisia, and Libya in the nineteenth and twentieth centuries. Themes include the imposition of colonial rule, revolutionary struggles, and post-independence development.

143. The Nile Quest**(4) STAFF**

An examination of African and Victorian societies during the half century in which English explorers sought the source of the Nile. The greatest geographical puzzle of the nineteenth century, the search opened Africa to European partition, imperialism and modernization.

143Q. Special Topics in African History**(4) MIESCHER***Prerequisite: History 49 or 147A or 147B or 147C or upper-division standing.*

May be repeated for credit to a maximum of 8 units.

Focus on special topics in African history. Format varies according to topic.

144. Resistance in African History**(4) MIESCHER***Prerequisite: History 49 or 147A or 147B or upper-division standing.*

Exploration of the themes of domination and resistance, struggles within African societies and outside interventions, in nineteenth and twentieth-century Africa. Examination of forms of resistance in a series of case studies and discussion of analytical concepts.

145A. The Islamic World, I: The Formation of Islamic Civilization, 600-1000A.D.**(4) HUMPHREYS***Prerequisite: History 46 or INEST 45 or upper-division standing.*

The rise of a world religion and the emergence of a new multi-ethnic society under its aegis; the evolution of social and political institutions within the Universal caliphate; the creation of a specifically Islamic culture and intellectual life.

145B. The Islamic World, II: Expansion and Consolidation, 1000-1700**(4) HUMPHREYS***Prerequisite: History 46 or MES 45 or upper-division standing.**Recommended preparation: History 145A.*

The failure of the caliphate and the search for a new political order; Turkish military and political

domination; the structures of urban society; the rebirth of Persian literature; the classical formulations of Islamic religious thought.

145D. War and Diplomacy in the Middle East: 1876-Present

(4) HUMPHREYS

Prerequisite: History 46 or INEST 45 or upper-division standing.

Selected problems in the relations of Middle Eastern states within the region and with external powers. The problems studied will vary from year to year. Sample topics: World War I settlement, Mossadegh era in Iran, Israeli invasion of Lebanon (1982).

145DR. Directed Readings in Islamic and Middle Eastern History

(4) HUMPHREYS

Prerequisites: History 46 or 145A or 145B or 145D or 145Q or 146.

May be repeated for credit to a maximum of 8 units.

Recommended preparation: Writing 109HU.

Through readings and discussion, students will explore a broad problem or topic in the history of the Middle East and the Islamic world. The course will culminate with a 12-20 page research paper or historiographical review essay.

145Q. Tradition and Modernity in Islamic Political Thought

(4) HUMPHREYS

Prerequisite: upper-division standing.

May be repeated for credit to a maximum of 8 units.

The emergence of an Islamic tradition of political thought in medieval times, and the reshaping of this tradition to meet the demands of modernity. Key problems: the purposes of government, autocracy versus popular participation, the nature of legitimacy.

146. History of the Modern Middle East

(4) GALLAGHER

Prerequisite: History 46 or upper-division standing.

Not open to students who have taken History 146A or History 146B.

Course themes include the western impact, forms of resistance, and political, social, economic, and religious dimensions of current crises in Turkey, Iran, and the Arab world. 1750 to the present.

146P. Proseminar in the History of the Modern Middle East

(4) GALLAGHER

Prerequisite: History 45 or 46 or 145A or 145B or 145D or 146 or 146A or 146B or 146W or 146V or MES 45.

May be repeated for credit to a maximum of 8 units.

Recommended preparation: Writing 109HU.

A weekly seminar on a topic in modern Middle East history. A research paper is required.

146PW. Proseminar on Women and Gender in Middle Eastern History

(4) GALLAGHER

Prerequisite: History 45 or 46 or 145A or 145B or 146 or 146A or 146B or 146D or 146W or MES 45.

Recommended preparation: Writing 109HU.

A weekly seminar focusing on women in Middle Eastern history. A research paper is required.

146T. History of the Israeli-Palestinian Conflict

(4) GALLAGHER

Prerequisite: History 46 or upper-division standing.

History of the Israeli-Palestinian conflict from the mid-nineteenth century to the present. Course themes include evolution of Zionism, Palestine before World War I, the British Mandate, World War II, the Arab-Israeli wars, rise of Palestinian nationalism, and Israeli and Palestinian societies today.

147A-B. Modern African History

(4-4) MIESCHER

Prerequisite: History 49A or 49B or upper-division standing.

A historical survey of sub-Saharan Africa since 1800 themes include: pre-colonial states and society, Africa and the world economy, colonialism, labor and migration, gender, missionary activities, constructions of ethnicities and custom, resistance and nationalism, popular culture, post-colonial crisis and struggles.

147C. African Lives: (Auto)Biographies of African Men and Women

(4) MIESCHER

Prerequisite: History 49A or 49B or upper-division standing.

An introduction to modern African history through reading (auto)biographies of African men and women with different socioeconomic backgrounds. Explores how African lives have been represented in these texts, what we can learn from them about Africa's past.

147G. Gender and Power in Modern African History

(4) MIESCHER

Prerequisite: History 49A or 49B or 147A or 147B or 147Q or Women's Studies 147Q or upper-division standing.

Same course as Women's Studies 147G.

Examination of gender, power, and authority among and between men and women in response to socioeconomic transformations in nineteenth and twentieth-century Africa. Themes include interpretations of gender, organization of labor, the missionary project, the state, and colonial rule.

147PP. Proseminar in Modern African History

(4) MIESCHER

Prerequisite: History 49A or 49B or 147A or 147B or upper-division standing.

May be repeated for credit to a maximum of 8 units.

Recommended preparation: Writing 109HU.

A seminar on a topic in modern African history. A research paper is required.

147Q. Readings on African History

(4) MIESCHER

Prerequisite: History 49A or 49B or 147A or 147B.

May be repeated for credit to a maximum of 8 units. Same course as Women's Studies 147Q.

A discussion and reading seminar on selected topics in African history.

151A-B-C. Latin American History

(4-4) CLINE, ROCK, DUTRA, MENDEZ

Prerequisite: History 8 or upper-division standing.

A. A general survey of the social, economic, institutional, and intellectual history of colonial Spanish America (1492-1800), with comparisons to colonial Brazil.

151DR. Directed Readings in the History of Latin America

(4) ROCK, MENDEZ

Prerequisite: History 8.

Recommended preparation: Writing 109HU.

Readings and discussion focus on topics in Latin American history selected by students in consultation with the professor. Students make verbal presentations of their work and complete a research paper of 10-20 pages.

151FQ. Latin America History through Film

(4) SOTO LAVEAGA

Prerequisite: History 8.

May be repeated for credit to a maximum of 8 units.

A weekly seminar discussing films relevant to different periods and topics in the history of Latin America combined with selected readings. Written assignments required.

151P. Proseminar in Latin American History

(4) ROCK, MENDEZ

Prerequisite: History 8 or upper-division standing.

Recommended preparation: Writing 109HU.

A weekly seminar in the history of Latin America. A research paper will be required.

151Q. Readings in Latin American History

(4) MENDEZ

Prerequisite: History 8.

May be repeated for credit to a maximum of 8 units.

A weekly reading seminar on special topics in the history of Latin America. Depending on the topic, it may include primary sources and works of fiction. Written assignments required.

151R. Latin American Revolutions - Twentieth Century

(4) MENDEZ

Analyzes the leading revolutions of the twentieth century in Latin America to explore issues of citizenship, human rights, and ethnic minorities in the region. Highlights the importance of women and peasants in the making of the Mexican, Cuban, Bolivian, and Nicaraguan revolution.

153. Comparative Seaborne Empires: 1415 to 1700

(4) DUTRA

Prerequisite: a prior course in history or upper-division standing.

Analysis of the similarities and differences between the overseas activities of Portugal, Spain, France, England, and the United Provinces of the Netherlands.

153L. History of Argentina from Spanish Settlement to the Present Day

(4) ROCK

Prerequisite: History 8 or upper-division standing.

A case study in economic underdevelopment and political instability.

154DR. Directed Readings in the History of The Andean Region

(4) MENDEZ

Prerequisite: History 2A or 2B or 2C or 4A or 4B or 4C or 8 or 151A or 151B or 151C or 151FQ or 151I or 151R or 154LA or 154LB or 154Q or LAIS 100 or 101.

Recommended preparation: Writing 109HU.

Through readings and discussion, students explore a topic or problem in the History of the Andean region. The course culminates with a 10-20 page research paper. Specific topics differ from year to year.

154LA. Andean History: Prehispanic and Colonial Periods

(4) MENDEZ

Prerequisite: History 2A or 2B or 2C or 4A or 4B or 4C or 8 or 151A or 151B or 151C or 151FQ or 151I or 151R or 154DR or 154LB or 154Q or LAIS 100 or LAIS 101 or upper-division standing.

Early precolombian states; the Inca empire; the Spanish conquest of the Incas; the formation of a colonial Andean society; movements toward independence to the end of the colonial period.

154LB. Andean History: The National Period

(4) MENDEZ

Prerequisite: History 2A or 2B or 2C or 4A or 4B or 4C or 8 or 151A or 151B or 151C or 151FQ or 151I or 151R or 154DR or 154LA or 154Q or LAIS 100 or LAIS 101 or upper-division standing.

The birth of the modern Andean republics; the shaping of national identity; the problem of "race"; Indigenismo; political movements and revolutions from the early nineteenth century to the present.

154Q. Special Topics in Andean History

(4) MENDEZ

Prerequisite: a prior course in history.

A weekly seminar on special topics relevant to Andean history from the pre-Columbia period to the present.

155A-B. History of Portugal

(4-4) DUTRA

Prerequisite: a lower-division course in history or upper-division standing.

A. A general survey of Portugal from its origins to 1580 with an emphasis on social, economic, and cultural history.

B. Modern Portugal, 1580 to the present.

155E. Portugal Overseas

(4) DUTRA

Prerequisite: a lower-division course in history or upper-division standing.

Not open for credit to students who have

completed *History 154A-B*.

A comparative analysis of Portuguese activity in Africa, Asia, and America, 1415 to 1825.

155P. Proseminar in the History of Portugal and Portuguese Expansion

(4) DUTRA

Prerequisite: upper-division standing.

May be repeated for credit to a maximum of 8 units.

Recommended preparation: *Writing 109HU*.

A weekly seminar on the history of Portugal including topics on its origins to the present and Portuguese expansion in Africa, Asia, and America. A research paper will be required.

156A. History of Mexico

(4) CLINE, SOTO LAVEAGA

Prerequisite: *History 8* or upper-division standing.

Socioeconomic history of colonial Mexico with special attention on the indigenous peoples.

156AH. History of Mexico—Honors

(1) CLINE, SOTO LAVEAGA

Prerequisites: upper-division standing; honors standing.

Honors seminar for *History 156A*.

156B. History of Mexico

(4) CLINE, SOTO LAVEAGA

Prerequisite: *History 8* or *156A* or upper-division standing.

Post independence Mexico.

156I. Indians of Colonial Mexico

(4) CLINE

Prerequisites: *History 8* or upper-division standing.

Not open for credit to students who have completed *History 150I*.

History of Colonial Nahua, particularly focusing on indigenous sources in translation.

157B. History of Brazil

(4) DUTRA

Prerequisite: a lower-division course in history or upper-division standing.

A general survey of the history of Brazil in two quarters:

- From the discovery of the New World to the formation of the empire. (Offered every other year; alternates with *History 155A*).
- Modern Brazil. (Offered every other year; alternates with *History 155B*).

157P. Proseminar in the History of Brazil

(4) DUTRA

Prerequisite: upper-division standing.

A weekly seminar on the history of Brazil in the colonial and modern periods. A research paper is required.

159B. Women in American History

(4) COHEN

Prerequisites: any two quarters of *History 17A-B-C* or upper-division standing.

Same course as *Women's Studies 159A-B*

Social history of women in America. Changing marriage, reproduction and work patterns, and cultural values about the female role. Attention to racial, class and ethnic differences. Analysis of feminist thought and the several women's movements. From 1800-1900

(4) COHEN

Same course as *Women's Studies 159C*.

Social history of women in America. Changing marriage, reproduction and work patterns, and cultural values about the female role. Attention to racial, class and ethnic differences. Analysis of feminist thought and the several women's movements. From 1900 to the present.

159P. Proseminar in Women's History

(4) COHEN

May be repeated for credit to a maximum of 8 units.

Research seminar on the history of women in America.

159Q. Special Studies in Women's History

(4) STAFF

Prerequisite: *History 159A* or *159B*.

May be repeated for credit to a maximum of 8 units.

The study of special topics in the history of women in the United States.

160A. The American South to 1865

(4) HARRIS

Prerequisite: *History 17A* or upper-division standing.

The origins and development of distinctive economic, social, political, and cultural patterns in the ante-bellum South.

160B. The American South, 1865 to the Present

(4) HARRIS

Prerequisite: *History 17B* or *17C* or upper-division standing.

Change and resistance to change in Southern economic, social, political, and cultural life since the Civil War.

160DR. Directed Readings in the History of the American South

(4) HARRIS

Prerequisite: *History 17A-B* or *17A-C* or *17B-C* or *160A* or *160B*.

Recommended preparation: *Writing 109HU*.

Through readings and discussion students explore a topic or problem in the History of the American South. The course culminates with a 10-20 page research paper. Specific topics differ from year to year.

160P. Proseminar in the History of the American South

(4) HARRIS

Prerequisite: *History 160A* or *160B*.

May be repeated for credit to a maximum of 8 units.

Research in selected problems in the history of the American South.

161A-B. Colonial and Revolutionary America

(4-4) COHEN, PLANE, HÄMÄLÄINEN

Prerequisite: *History 17A* or upper-division standing.

A social and political history of colonial and revolutionary America with emphasis on the interaction of Native American, Europeans, and African Americans. The course will combine lectures with discussion of both primary and secondary sources.

- From initial settlement to the mid-eighteenth century
- From mid-eighteenth century to 1800

161P. Proseminar in Early American History

(4) COHEN, PLANE, HÄMÄLÄINEN

Prerequisite: *History 17A* or upper-division standing.

A research seminar on early American history.

162. America in the Early Republic

(4) MAJEWSKI

Prerequisite: *History 17A* or *17B* or upper-division standing.

Not open for credit to student who have completed *History 162A* or *162B*.

History of the United States from 1788-1840, emphasis on the interaction of economics, social, and political trends. Special attention to nationalism, slavery, domestic ideology, and reform movement.

163A. Women and Public Policy in Twentieth-Century America

(4) STAFF

Prerequisite: *History 159A* or *159B* or *159C* or a prior course in women's studies.

Same course as *Women's Studies 163A*.

How gender-based cultural attitudes and social roles, collective action, and economic and social change interacted to shape law and public policy with respect to work, family, legal and reproductive rights. From 1900 through approximately 1945.

163P. Proseminar on Women and Public Policy Issues in Twentieth-Century America

(4) STAFF

Prerequisite: *History 7* or *159C* or *163A* or *163B* or *170A* or *170P* or *172A* or *172B* or *172P* or *Women's Studies 124B* or *131* or *161* or *Law and Society 140*.

May be repeated for credit to a maximum of 8 units.

Recommended preparation: *Writing 109HU*.

A research seminar utilizing team research and focusing on basic problems in public policy to be identified each year. Will use traditional sources and oral history, interviewing community leaders, government officials, etc. Individual papers will be integrated into group reports.

164C. Civil War and Reconstruction

(4) MAJEWSKI

Prerequisite: *History 17B* or upper-division standing.

A history of the United States during the second half of the nineteenth century. Emphasis is placed on the causes of the Civil War, the outstanding developments of the war itself, and the major consequences of the Reconstruction period.

164CP. Proseminar in Civil War and Reconstruction

(4) MAJEWSKI

Prerequisite: *History 164C* or *History 17B*.

May be repeated for credit to a maximum of 8 units.

Research seminar on events leading up to the outbreak of the Civil War.

164DR. Directed Readings in the History of the U. S. Civil War

(4) MAJEWSKI

Prerequisite: *History 17B*.

Recommended preparation: *Writing 109HU*.

Through readings, discussions, and papers, students explore questions related to the history of the U. S. Civil War and how the War has been remembered in popular culture. Specific topics differ from year to year.

164IA-. American Immigration

(4) SPICKARD

Prerequisite: *History 17A* or *17B* or *17C* or upper-division standing.

U.S. immigration history from the eighteenth century to the twentieth. Examines the forces that brought people from various parts of the globe to the U.S., their experiences in migrating and in subsequent generations, and enduring racial and ethnic hierarchies.

164IP. Proseminar on American Immigration History

(4) SPICKARD

Prerequisite: *History 164I* or *164IB* or *168C* or *168D* or *168E* or *168F* or *168L* or *168LB* or *168R* or *168AR* or *168BR* or *168CR* or *169SA* or an upper division course in *Asian American Studies*, *Chicano Studies*, or *Black Studies*.

May be repeated for credit to a maximum of 8 units.

Recommended preparation: *Writing 109HU*.

Research seminar on American immigration history in the nineteenth and twentieth centuries and the evolution of American immigration.

165. America in the Gilded Age, 1876 to 1900

(4) FURNER

Prerequisite: *History 17B* or upper-division standing.

The responses of American people and institutions to the opportunities and problems of industrialization and rapid social change in the late nineteenth century.

166A-B-C. United States in the Twentieth Century

(4-4-4) KALMAN, FURNER, O'CONNOR, LICHTENSTEIN

Political, cultural, social, and economic development of the United States from 1900 to the present:

- 1900-1929
- 1930-1959
- 1960-present

166LB. United States Legal History

(4) KALMAN

Prerequisite: upper-division standing

The evolution of American law from the progressive era to the present. Examines changes in the legal profession, legal education, jurisprudence, private law, and the Supreme Court.

166P. Proseminar in Twentieth-Century United States History

(4) KALMAN, FURNER, GARCIA, O'CONNOR

Prerequisites: *History 166A* or *166B* or *166C*.

May be repeated for credit to a maximum of 8 units.

Recommended preparation: Writing 109HU.

A seminar for students who have completed History 166A-B and wish to pursue research projects on aspects of twentieth-century American history.

167CA. History of the American Working Class, 1800-1900

(4) VARGAS, LICHTENSTEIN

Prerequisite: History 17A or 17B or sophomore or junior or senior standing.

A survey of the origins and formation of the American working class from the colonial period to the late nineteenth century. Topics include workers and community, the coming of the industrial order, the 1877 labor strike, and workers and the trade union movement.

167CB. History of the American Working Class, 1900-Present

(4) VARGAS, LICHTENSTEIN

Prerequisites: History 17C or sophomore or junior or senior standing.

A survey of American workers from the turn of the century to the present period. Topics include workers and American socialism, the 1919 steel strike, the rise of the CIO, labor and the Cold War, and deindustrialization and workers.

167CP. Proseminar in American Working Class History

(4) VARGAS, LICHTENSTEIN

Prerequisites: History 17A or 17B or 17C or upper-division standing.

May be repeated for credit to a maximum of 8 units.

Recommended preparation: Writing 109HU.

A research and writing seminar in American working class history with emphasis on the twentieth-century period. A major research paper will be required on a seminar related topic.

167E. Studies in Work, Labor, and Political Economy

(4) O'CONNOR, LICHTENSTEIN, VARGAS, BORIS

From an historical and public policy standpoint. Examines key issues confronting the U.S. working class. These include globalization of production, wage inequality, the fate of the unions, racial and gender identities at work, and the future of the welfare state.

167Q. Labor Studies Internship Research Seminar

(4) STAFF

Prerequisite: consent of instructor.

May be repeated for credit to a maximum of 8 units.

This research seminar provides students with a set of readings and assignments to develop a 20-page research paper that is based on historical and social science methods and on some aspect of their internship.

168A-B. History of the Chicanos

(4-4) GARCIA, VARGAS

Prerequisite: 17A or 17B or 17C, or Chicano Studies 1A or 1B or 1C, or upper-division standing.

Same course as Chicano Studies 168A-B.

The history of the Chicanos, 1821 to the present; traces the social-cultural lifeline of the Mexicans who have lived north of Mexico.

168C. Asian American History, 1850-1965

(4) SPICKARD

Not open for credit to students who have completed Asian American Studies 1.

History of Asian Americans to 1965. Asian backgrounds to emigration; migrations of various Asian groups; settlement and employment patterns; racial harassment, restriction, and imprisonment; responses to oppression; family, community, and culture in the first, second, and third generations.

(4) SPICKARD

Asian backgrounds to emigration; migrations of various Asian groups; settlement and employment; anti-Asian actions; family systems; community organization; education and cultural life; formation of Asian American panethnicity.

168E. History of the Chicano Movement

(4) GARCIA, VARGAS

Prerequisite: Chicano Studies 1A or 1B or 1C or upper-division standing.

Same course as Chicano Studies 168E.

An examination of the Chicano movement in the United States from the mid-1960s to the mid-1970s. Topics will include the student movement, the farmworker movement, the Plan de Aztlán, the Raza Unida Party, Chicana feminists, the anti-war movement, and Chicano studies.

168F. Racism in American History

(4) GARCIA

Prerequisites: History 17A or 17B or 17C or Chicano Studies 1A or 1B or 1C or Asian American Studies 1 or 2 or Black Studies 1 or 2 or 5 or 6 or 20.

Examine racism as a major ideological force in defining American society from the colonial era to the 1980s. Major focus on the changing nature of racism as an ideology as well as the relationship of racism to specific minority groups such as Afro-American, Native American, Chicano, and Asian American.

168G. Autobiography in American History

(4) GARCIA

Prerequisite: any quarter of History 17A-B-C or upper-division standing.

This course will examine the autobiography as a specific historical genre. Autobiographies involving a range of Americans and including class, race, ethnic, and gender issues will be examined as a way of interpreting the history of the United States.

168GQ. Minority Autobiography and United States History

(4) GARCIA

Prerequisite: Chicano Studies 1A or 1B or 1C or History 17A or 17B or 17C.

Same course as Chicano Studies 168GQ.

Seminar utilizes autobiographical or life-stories texts by U.S. minority writers to better understand the diversity of U.S. history and the racialized ethnic experience.

168H. Literature and History in the American Experience

(4) GARCIA

Prerequisite: History 17A, 17B, 17C or upper-division standing.

Examination of a variety of literary texts, predominantly novels, that provide key insights into the American historical experience. Texts are taken from particular historical periods from both the nineteenth and twentieth centuries and represent the various regions of the country.

168I. Latino Autobiography and History

(4) GARCIA

Prerequisite: Chicano Studies 1A or 1B or 1C or upper-division standing.

Same course as Chicano Studies 168I.

Examines a diverse number of Latino autobiographical texts that reflect the changing nature of the Latino historical experience. Topics covered include issues of race, gender, immigration, politics, religion, and culture.

168LA. History of Chicano Workers from the Nineteenth Century to the Early 1930's

(4) VARGAS

History of Chicano workers from the late nineteenth century to the early Great Depression, focusing on immigration, regional labor migrations, class formation, unionization, and work lives. The history of Chicano workers is examined within the framework of U.S. labor history.

168LB. History of Chicano Workers from the Late 1930's to the Present Era

(4) VARGAS

History of Chicano workers from the late 1930's to the present era, focusing on labor struggles, union organization, civil rights politics, migration and immigration, and work. The history of Chicano workers is examined within the framework of U.S. labor history.

168LP. Proseminar on the History of Twentieth-Century Chicano and Chicana Workers

(4) VARGAS

Prerequisite: Upper-division standing.

Studies in selected aspects of Chicano/a with an emphasis on social, economic, and political history.

168M. Middle Eastern Americans

(4) SPICKARD

Prerequisite: Upper-division standing or one of the following history courses: 45, 46, 145A, 145B, 145D, 145P, 145Q, 146A, 146B, 146P, 146PW, or 146W.

The history of migration to the United States by Arabs, Persians, and other peoples of the Middle East; the communities they have built; their families, social, cultural, and religious lives; relationships with other Americans; and ongoing links to the Middle East.

168N. Interracial Intimacy

(4) SPICKARD

Prerequisite: sophomore, junior or senior standing.

Historical, sociological, and psychological exploration of several interconnecting phenomena, including interracial and interethnic romance and marriage, and changing identities and social positions of multicultural and multiethnic individuals. Concentrates mainly on the United States, with selected international comparisons.

168P. Proseminar in Chicano History

(4) GARCIA

Prerequisite: History 168A or 168B, or Chicano Studies 168A or 168B.

Same course as Chicano Studies 168P. May be repeated for credit to a maximum of 8 units.

Studies in selected aspects of Chicano history with an emphasis on social and economic history.

169AR-BR-CR. Afro-American History

(4-4-4) DANIELS

Prerequisite: Black Studies 1 or 5, or History 17A or 17B or 17C, or upper-division standing.

Same course as Black Studies 169AR-BR-CR.

Influence/experience of Africans/African Americans in United States history.

AR. Origins and development of slavery and racism in British Colonies.

BR. Nineteenth-century expansion of slavery, Anti-slavery, Civil War, Reconstruction and development of segregation.

(4) BERGSTROM, O'CONNOR

Prerequisite: History 148A-B or 172A-B or 17B-C.

Recommended preparation: Writing 109HU. Not open for credit to students who have completed History 148P.

A research seminar in selected social policy issues of the 19th and 20th centuries in the United States.

171B. The United States and the World, 1917-Present
(4) STAFF

Prerequisite: Any lower-division course in History or upper-division standing.

Analysis of twentieth century developments in foreign affairs. Emphasis on broad policy, concepts, and ideas.

171C. The United States and the World, 1898-1945
(4) YAQUB

Prerequisite: a previous history course or upper-division standing.

Not open for credit to students who have completed History 171B.

Analysis of developments in foreign affairs in first half of twentieth century. Formation and execution of foreign policy; interaction between foreign and domestic affairs.

171D. The United States and the World Since 1945
(4) YAQUB

Prerequisite: a previous history course or upper-division standing.

Not open for credit to students who have completed History 171B.

Analysis of developments in foreign affairs after 1945. Formation and execution of foreign policy; interaction between foreign and domestic affairs.

171P. Proseminar in American Diplomacy and Politics
(4) YAQUB

Prerequisite: upper-division standing.

May be repeated for credit to a maximum of 8 units.

Recommended preparation: Writing 109HU.

Focuses on training in historical research methods. Requires an essay on some aspect of American history, most likely in the areas of diplomacy and politics, chosen jointly by the student and the instructor.

171YQ. Topics in Twentieth-Century International History
(4) YAQUB

Prerequisite: History 2C or 4C or 8 or 17C or 46 or 49B.

May be repeated for credit to a maximum of 8 units.

Topics in twentieth century international history. Format varies according to topic.

172A-B. Politics and Public Policy in the United States.

(4-4) BERGSTROM, FURNER, O'CONNOR

Prerequisites: History 7; or any two quarters of History 17A-B-C; or upper-division standing.

The interaction of politics and public policy from the Revolution to the present, focusing upon the key issues of each era in social, economic, cultural, racial, and other policy areas. A particular concern for the policy-making process, ideology, and the cultural origins of politics.

173RA. The American Radical Tradition—Nineteenth Century
(4) STAFF

Prerequisite: History 17A or 17B.

A history of such movements as abolitionism, utopian and Marxist socialism, land reform, and populism.

173RP. The American Radical Tradition—Proseminar
(4) LICHTENSTEIN, VARGAS

Prerequisite: History 17A or 17B or 17C or 173RA or 173RB.

Research seminar in the history of the American radical tradition.

173T. American Environmental History
(4) STAFF

Same course as Environmental Studies 173.

Traces the history of American attitudes and behavior toward nature. Focus on wilderness, the

conservation movement, and modern forms of environmentalism.

174A-B-C. Wealth and Poverty in America (4-4-4) FURNER, O'CONNOR

Prerequisite: History 17A or 17B or 17C or upper-division standing.

Changing patterns and conceptions of inequality, seventeenth century to present. Examines influence of economic transformation, race, gender, class, attitudes towards work and welfare, social movements, social knowledge, law and public policy on opportunity, income, status, and power. Divides at Civil War and World War II.

174DR. Directed Readings in the History of Capitalism, Class and Inequality
(4) BERGSTROM, FURNER, O'CONNOR

Prerequisites: History 174A or B or C or History 165 or History 166A or B or C or History 167CB or History 178A or B.

Recommended preparation: Writing 109HU.

Selected common and individual readings and discussion to support the preparation of a paper on a topic relevant to the themes of the course. Specific topics differ from year to year.

174P. Proseminar in Wealth and Poverty in America
(4) FURNER, O'CONNOR

Prerequisite: History 174A or 174B or 174C.

Recommended preparation: Writing 109HU.

A proseminar for undergraduate students who wish to pursue independent research on social class in America, lives of rich and poor, economic and social policy, the rise and present controversy over the welfare state, and related questions.

175A-B. American Cultural History (4-4) JACOBSON

Prerequisite: a prior course in history.

A study of dominant and alternative representations of American values and identity in high and popular culture.

175D. American Family History
(4) JACOBSON

Prerequisite: History 17A or 17B or 17C.

Examines how race, ethnicity, and class have shaped changing attitudes toward and experiences of sex roles, sexuality, child rearing, work patterns, and relationships among men, women, and children. Also explores changing conceptions of the state's role in family life.

175DR. Directed Readings in the History of Food in America
(4) JACOBSON

Prerequisite: History 17C.

Recommended preparation: Writing 109HU.

Discussion-based seminar explores the impact of economic, cultural, technological, and geopolitical change on the role of food and drink in American life from the colonial era to the present. Particular attention given to the changing social, cultural, and political meanings of food. Weekly readings plus 10-12 page research paper.

175P. Proseminar in American Cultural History
(4) JACOBSON

Prerequisite: a prior course in history.

May be repeated for credit to a maximum of 8 units.

Recommended preparation: Writing 109HU.

A research seminar on the use of artifacts in American cultural history.

175Q. Food in American History
(4) JACOBSON

Prerequisite: a prior course in history.

May be repeated for credit to a maximum of 8 units.

Explores the impact of economic, cultural, technological, and geopolitical change on the role of food and drink in American life from the colonial era to the present. Particular attention given to the changing social, cultural, and political meanings of food.

176A-B. The American West (4-4) HÄMÄLÄINEN

Prerequisite: a lower-division course in history or

upper-division standing.

The West as a frontier and as a region, in transit from the Atlantic seaboard to the Pacific, and from the seventeenth century to the present.

176BQ. Readings in North American Cultural Borderlands
(4) STAFF

Prerequisite: History 17A or 17B or 156A or 156B or 176A.

May be repeated for credit to a maximum of 8 units.

Explores conflict and accommodation among the indigenous, European, African, and Asian peoples who met in North America from the colonial era to the present. Particular emphasis is given to comparative analysis of Spanish, French, English, and Russian colonies.

177. History of California
(4) STAFF

California as a case study of national trends, and as a unique setting with its special problems and culture.

178A. American Urban History
(4) O'CONNOR

Prerequisite: Any two quarters of History 17A-B-C or upper-division standing.

A study of the political, economic, social, and intellectual impact of the city upon American history, and the impact of history upon the growth of American urbanization.

178B. American Urban History
(4) O'CONNOR

Prerequisite: Any two quarters of History 17A-B-C or upper-division standing.

A study of the political, economic, social, and intellectual impact of the city upon American history, and the impact of history upon the growth of American urbanization.

178Q. Studies in American Urban History
(4) O'CONNOR

Prerequisite: History 178A-B.

Limited to ten students. May be repeated for credit to a maximum of 8 units.

A reading and discussion course.

179A. Native American History to 1838
(4) PLANE, HÄMÄLÄINEN

Prerequisite: History 17A or upper-division standing.

A lecture course on the history of the indigenous peoples of North America from European contact to Cherokee removal. The course stresses comparative cultural responses to European colonization and from American history from a native point of view.

179B. Native American History, 1838 to Present
(4) PLANE, HÄMÄLÄINEN

Prerequisite: History 17B or 17C or upper-division standing.

A lecture course on the history of the indigenous peoples of North America from Cherokee removal to the present. The course stresses native history, relations with the U.S. government, and offers American history from a native point of view.

179P. Proseminar in Native American History
(4) PLANE, HÄMÄLÄINEN

Prerequisite: History 179A or 179B or upper-division standing.

May be repeated for credit to a maximum of 8 units.

Recommended preparation: Writing 109HU.

Research seminar on the history of the indigenous peoples of North America.

180P. Proseminar in East Asian History and Culture
(4) STAFF

Prerequisite: History 80 or 87 or 180A or 180B or 180C, or East Asian Cultural Studies 80 or 180A or 180B or 180C upper-division standing.

Reading and research on selected issues in the history of East Asia with emphasis on the cultural interconnectedness of the region.

182A. Korean History and Civilization: Part I**(4) STAFF**

Same course as Korean 182A. Not open for credit to students who have completed History 180DA or Korean 180DA.

The history of Korea from prehistory to the rise of states and kinship, Buddhism, Confucianism, cultural interaction with China, Japan, and the Mongols.

182B. Korean History and Civilization: Part II**(4) STAFF**

Same course as Korean 182B. Not open for credit to students who have completed History 180DB or Korean 180DB.

Survey of the history of Korea from the Yi dynasty to the present day. Topics include Yangban society, Japanese invasions, the Korean War, and political division.

182P. Proseminar in Korean History**(4) STAFF**

Same course as Korean 182P. May be repeated for credit to a maximum of 8 units.

Undergraduate research seminar in Korean history.

184A-B. History of China**(4-4) BARBIERI-LOW**

Prerequisite: History 2A or 2B or 2C or 80 or EACS 80 or upper-division standing.

Same course as Chinese 184A-B. Not open for credit to students who have completed History 186A-B or Chinese 186A-B.

A. Ancient China, to 589 CE

B. Sixth to seventeenth centuries.

185A-B. Modern China**(4-4) STAFF**

Prerequisite: a prior course in history or upper-division standing.

Survey of the last four centuries of Chinese history, from the late Ming dynasty to the People's Republic of China. Examines social, economic, political, and cultural developments as part of an exploration of the sources of Chinese unity, the accommodation of Manchu power, the nature of "traditional" society, and the problems of modernization in the world's only ancient empire to survive to the present day.

A. Ca. 1600 to 1911

B. From 1911 to present

185P. Proseminar on Modern China**(4) STAFF**

Prerequisite: History 185A or 185B.

May be repeated for credit to a maximum of 8 units.

Recommended preparation: Writing 109HU.

Undergraduate research seminar in the history of modern China.

186P. Proseminar on the History of the Book: East and West**(4) STAFF**

Prerequisite: a prior course in history.

Focuses on the history of the book in both the West and East Asia. After four weeks of readings in the theoretical literature, students write research papers on book culture in a specific country or region.

187A. Japan Under the Tokugawa Shoguns**(4) ROBERTS**

Prerequisite: History 2A or 2B or 2C or 87 or upper-division standing.

A survey of Japanese social and cultural history from the mid-sixteenth to the nineteenth century.

187B. Modern Japan**(4) ROBERTS**

Prerequisite: History 2A or 2B or 2C or 87 or upper-division standing.

A survey of Japanese history from the early nineteenth century until World War II, in an effort to explain how, and at what price, Japan became the first successful modernizer in the nonwestern world.

187P. Proseminar in Japanese History**(4) ROBERTS**

Prerequisite: History 87 or 187A or 187B or 187C or upper-division standing.

May be repeated for credit to a maximum of 8 units.

Recommended preparation: Writing 109HU.

A research seminar in Japanese history. Topics will vary depending on the interests and background of the participants. Reading knowledge of Japanese is not required.

187Q. Samurai Japan**(4) ROBERTS**

Prerequisite: History 2A or 2B or 87 or upper-division standing.

Not open for credit to students who have completed History 102LR. May be repeated for credit to a maximum of 8 units.

An intensive reading and discussion course on the history of samurai in Japan from the eleventh century through the nineteenth century. Emphasis is on changing samurai identities over the ages.

187S. The Samurai**(4) ROBERTS**

The samurai of Japan were a hereditary military class that evolved over a millennium. Course traces this history and clarifies the range of differences that separated samurai in each era as their roles and ideologies changed.

188A. History of Women in China: From the Ancient Period to the Nineteenth Century**(4) STAFF**

Exploration of the diverse roles women have played in Chinese culture and society up to the nineteenth century by examining the many contexts within which women operated: the family, the imperial court, literati and popular culture.

188B. History of Women in China: From the Late Nineteenth Century to the Present**(4) STAFF**

Examination of the role of women in culture, politics, and society in China's "century of revolution." Exploration of their participation in revolutionary and women's movements and their daily lives in the family and the workplace.

188S. Representations of Sexuality in Modern Japan**(4) FRUHSTUCK**

Same course as Anthropology 176 and Japanese 162.

The main ideologies guiding the establishment of various representations of sexuality from prewar scientific writings to contemporary popular culture.

188T. Modernity and the Masses of Taisho Japan**(4) FRUHSTUCK**

Same course as Japanese 164.

Examines the beginnings of a modern mass culture in early twentieth-century Japan. Central topics are political and social movements, the new woman and the modern girl, westernization, new media and censorship, modernism and nationalism.

189A. Vietnamese History**(4) STAFF**

Same course as East Asian Cultural Studies 189A.

Not open for credit to students who have completed History 138A.

An introduction to the history of Vietnam and its place in East and Southeast Asia. Vietnamese history from antiquity through the early twentieth century.

189M. South Asian Public Culture**(4) HANCOCK**

Prerequisite: upper-division standing.

Historical and contemporary forms of South Asian expressive and popular culture, including cinema, television, popular music, material culture, performance, and literature. Focuses on relations among popular culture, everyday life and social history in post-colonial South Asia.

191A. Diplomatic History of the Great Powers, 1815-1914**(4) HASEGAWA**

Prerequisite: History 2C or 4C.

A diplomatic history of great powers from the Congress of Vienna to World War I, emphasizing the international system created by great powers in Europe and shifting alliances and balance of power leading to World War I.

191B. Diplomatic History Between the World Wars**(4) STAFF**

Prerequisite: History 2C or 4C.

Diplomatic history between the two World Wars. Changes in foreign relations resulting from the rise of fascism, communism, and militarism in Europe and Asia.

191C. History of the Cold War, 1945-1991**(4) HASEGAWA**

Prerequisite: History 2C or 4C.

The history of the Cold War from 1945-1991. Emphasis on US-Soviet relations, as well as the Cold War in Europe, Asia and the third world.

191P. Proseminar on the Cold War**(4) HASEGAWA**

Prerequisites: History 2C or 4C; and History 191C.

Students write a research paper on a topic dealing with an aspect of the Cold War, using primary sources.

192. Public History**(4) PLANE, HANCOCK**

Prerequisite: upper-division standing.

Not open for credit to students who have completed History 191.

Topical history course to explore the field of public history. Course explores preservation, government, media, historical societies and museums, archives, and teaching of public history. Emphasis on field surveys and case studies.

192P. Proseminar in Public History**(4) PLANE**

Prerequisite: History 17B or 17C or 192 or 192Q or upper-division standing.

Recommended preparation: Writing 109HU.

Students conduct field research on original project in any sector of public history. Includes, but not limited to, preservation, government, media, historical societies and museums, archives, and teaching public history.

192Q. History, Memory, and Museums**(4) PLANE**

Prerequisite: upper-division standing.

May be repeated for credit to a maximum of 8 units.

Readings in the field of public memory and its relationship to the discipline of history with emphasis on the role of museums. Students explore a variety of topics including commemoration, tourism, re-enactment, and living history. Geographical and temporal focus vary.

194AH-BH. Senior Honors Seminar**(4-4) STAFF**

Prerequisites: major in History or History of Public Policy; admission to senior honors program.

Same course as Medieval Studies 194AH-BH. A two-quarter, in-progress sequence course with grades for both quarters issued upon completion of History 194BH. Four of the eight units of may be applied to the upper-division units required for the major.

Recommended preparation: Writing 109HU.

Students taking part in departmental honors program will write a senior thesis on a research topic of suitable depth under close supervision of faculty mentors.

195IA-IB. Senior Thesis—Public Policy**(4-4) STAFF**

Prerequisites: a major in history of public policy; senior standing; consent of instructor.

Students should enroll by instructor number. Eight units of credit will be awarded at the end of two quarters assigned for the thesis. A two-quarter in-progress sequence course with grades for both quarters issued upon completion of History 195IB.

A two-quarter individual research project, under the direction of a history professor selected with the advice of the departmental advisor to public policy students.

196. Internship in History**(2-8) STAFF**

Prerequisites: upper-division standing; consent of department.

Students must have a 3.0 overall grade-point average. May be repeated for up to 8 units.

This course enables students to obtain credit for

history-related internship experience, such as in the Capitol Hill or Sacramento programs. The course is graded P/NP and must be taken in conjunction with History 199, for which a written project related to the internship experience must be completed.

197. Special Topics

(4) STAFF

May be repeated for credit provided letter designation is different.

Content varies with each instructor.

199. Independent Studies

(1-5) STAFF

Prerequisites: upper-division standing; completion of two upper-division courses in history; consent of department and instructor.

Students must have a minimum 3.0 grade-point average for the preceding three quarters and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined. Students must be majors in history or present justification to both the instructor and the department for diverting from this norm. No more than 8 units of History 199 may be applied to the majors in history or the history of public policy.

The description of any one 199 must not be identical to any existing course description.

199RA. Independent Research Assistance

(1-5) STAFF

Prerequisites: upper-division standing; completion of two upper-division courses in history; consent of department and instructor.

Students must have a minimum 3.0 grade-point average for the preceding three quarters and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined.

Faculty supervised research. Written work is usually required.

GRADUATE COURSES

200AF-AM-AS-C-E-G-HS-ME-WD-WN-WO. Historical Literature

(4 each) STAFF

May be repeated for credit.

A reading course in a general area of history, specifically designed to prepare M.A. candidates for their comprehensive examination fields, but also appropriate for Ph.D. students seeking broad preparation. Introduces the student to the sources, historiography, and general literature of the field in question.

- AF. Africa
- AM. America
- AS. Asia
- E. Europe
- HS. History of Science
- WD. World
- WN. Women
- WO. World

201AF-AM-C-E-G-HS-LA-LI-ME-OH-PP-W-WD-WN. Advanced Historical Literature

(4 each) STAFF

May be repeated for credit. Open to both M.A. and Ph.D. candidates.

A reading course in a field of the professor's specialty. Introduces the student to the sources and literature of the field in question. Written work as prescribed by the instructor. (Usually offered quarterly.)

- AF. Africa
- AM. America
- C. Comparative
- E. Europe
- G. Gender
- HS. History of Science, Technology and Medicine
- LA. Latin America
- LI. Latin America and Iberia
- ME. Middle East
- OH. Oral History
- PP. Public Policy
- W. Historical Writing
- WD. World
- WN. Women

201AS. Advanced Historical Literature

(4) STAFF

Same course as East Asian Cultural Studies 201AS.

May be repeated for credit. Open to both M.A. and Ph.D. candidates.

A reading course in a field of the professor's specialty. Introduces the student to the sources and literature of the field in question. Written work as prescribed by the instructor. (Usually offered quarterly.)

202. Historical Methods

(4) STAFF

Normally required of all entering M.A. candidates other than those in public history. Open to other students on a space available basis.

A general introduction to selected historiographical issues and historical methods. (F)

203A-B. Seminar in Comparative History

(4-4) RAPPAPORT

A two-quarter in-progress sequence course with grade for both quarters issued upon completion of History 203B.

Research seminar in selected issues in comparative history. Such topics might include urban history, history of religion, slavery, family, gender systems, and consumer societies. Themes vary with instructor.

205A-B. Public Historical Studies

(4-4) BERGSTROM, PLANE, HANCOCK

To acquaint students with relevant research methods (oral history, legal research, family history, government documents and sources, historical preservation, field research).

206. History and Theory

(4) STAFF

An introduction to the major theoretical debates within the historical profession over questions of epistemology, methodology, and interpretation.

209B. The Academic Profession of History

(4) STAFF

This course provides students with the practical knowledge needed for obtaining an academic position, develops skills for effective teaching, and prepares students to deal with funding agencies, publishers, employers, and professional organizations.

210. Topics in History and Ethnography of Religion

(4) HANCOCK

Prerequisite: graduate standing.

Explores religion in cross-cultural and historical contexts using theoretical sources and case studies. Topics include ritual agency and power, religion and media, relations among religion, gender, ethnicity, nationalism. Periods and regions vary.

211A-B. Seminar in Greek History

(4-4) LEE

Prerequisite: reading knowledge of French, German or Italian.

Research seminar in Greek history. From time to time the seminar will be limited to candidates specializing in ancient history, and with a reading knowledge of classical Greek.

212. Research Tools for Ancient History

(4) LEE, DIGESER, DRAKE

Prerequisite: graduate standing.

Introductory training for the student of ancient history in the use of specialized research materials. Topics include numismatics, epigraphy, hagiography, archaeology, textual criticism, critical theory and use of specialized databases.

213A-B. Seminar in Roman History

(4-4) DRAKE, DIGESER

Prerequisite: reading knowledge of appropriate foreign language.

Selected topics in the history of the Roman Republic and Empire, with particular emphasis on problems of the later Roman Empire.

215A-B. Seminar in Medieval History

(4-4) LANSING

Prerequisite: History 116.

A two-quarter course.

217B-C. Seminar in Cultural Resource Management

(4-4) MARCUSE

A two-quarter in-progress sequence course with grades for both quarters issued upon completion of History 217C.

A two-quarter research seminar involving team

research and publication of results. Projects will include such tasks as cultural surveys, determination of significance, eligibility for inclusion on national register, impact mitigation, and historical preservation.

215E-F. Research Seminar in Medieval Social History

(4-4) FARMER

Prerequisite: History 117A.

A two-quarter graduate research seminar in medieval social history.

217D. Feminist Perspectives of Jewish and Christian Tradition

(4) FARMER, HECHT

Prerequisite: consent of instructor.

Same course as Interdisciplinary 201HF.

This seminar examines selected "clanic" texts (Biblical, Talmudic, Patristic) dealing with women, gender, and sexuality, as well as historic and contemporary issues, reinterpretations and responses to those texts.

218A. Colloquium in Public History

(4) BERGSTROM, FURNER, O'CONNOR

Readings in the fundamentals of policy history including selections in social theory, governance, political economy, knowledge production, political culture and comparative analysis. Offered as a foundations course for students with a broad range of more specialized policy interests.

218B-C. Seminar in Policy History

(4-4) BERGSTROM, FURNER, O'CONNOR

A two-quarter in-progress sequence course with grades for both quarters issued upon completion of History 218C.

A two-quarter research seminar on select topics in policy history.

219A-B. Research Seminar in Gender and History

(4-4) STAFF

Prerequisite: graduate standing.

A two-quarter in-progress sequence course with grades for both quarters issued upon completion of History 219B.

A two-quarter research seminar involving gender analysis of late nineteenth and twentieth century topics in U.S. history.

220A-B. Seminar in Renaissance-Reformation

(4-4) BERNSTEIN

A two-quarter in-progress sequence course with grades for both quarters issued upon completion of History 220B.

A two-quarter research seminar, stressing problems in comparative European social and intellectual history, 1450 to 1650.

223A-B. Seminar in Modern European History

(4-4) RAPPAPORT

A two-quarter in-progress sequence course with grades for both quarters issued upon completion of History 223B.

A research seminar in selected topics in the history of Europe, 1815 to the present.

232. War Studies

(4) TALBOTT

Prerequisite: open to qualified undergraduates with consent of instructor.

A one-quarter research seminar on topics in war, the state, and society since 1789. Origins and consequences of wars and the political, social, and economic aspects of both land and sea warfare are considered.

233A-B. Seminar in Modern German History

(4-4) MARCUSE

A two-quarter in-progress sequence course with grades for both quarters issued upon completion of History 233B.

A two-quarter research seminar for graduate students interested in aspects of nineteenth and twentieth century German history. Students will learn and apply researching techniques, as well as writing, editing and presentation skills.

235A-B. Seminar in Russian History

(4-4) HASEGAWA

*Prerequisite: reading knowledge of appropriate foreign language.**A two-quarter in-progress sequence course with grades for both quarters issued upon completion of History 235B.**A two-quarter research seminar on selected topics in modern Russian history.***240A-B. Seminar in Tudor-Stuart History**

(4-4) MCGEE

*Research seminar in Tudor-Stuart history; selected topics requiring use and interpretation of primary sources.***245. Special Topics in Islamic History**

(4) HUMPHREYS

*Prerequisite: graduate standing.**Research topics in Islamic and Middle Eastern history which can be completed within a one-quarter framework.***245A-B. Seminar in Islamic History**

(4-4) HUMPHREYS

*Prerequisites: consent of instructor; graduate standing.**Research seminar on selected topics in the social and political history of the Islamic Middle East between A.D. 600 and 1700. Language requirements will vary.***246. Special Topics in Modern Middle Eastern History**

(4) GALLAGHER

*Prerequisite: graduate standing.**Research topics in modern Middle Eastern and North African history which can be completed within a one quarter framework.***246A-B. Postcolonial and Postmodern Discourses on Africa and the Middle East: Points of Contention**

(4) GALLAGHER

*Prerequisite: one upper-division course in African or Middle Eastern history.**A two-quarter in-progress sequence course with grades for both quarters issued upon completion of History 246B.**A two-quarter seminar focusing on the writings of major postcolonial and postmodern theorists in the context of Middle Eastern and African history. Students will suggest materials for the Reader and will lead weekly discussions. One term paper is required.***247. Social Dimensions of Stem Cell Research**

(4) OSBORNE

*Same course as MCDB 247.**Overview of ethical, social and legal contexts of biological research with special reference to stem cells, embryology, and policy.***250A-B-C. Foundations of Latin American History**

(4-4-4) STAFF

*Prerequisites: graduate standing; reading ability in Spanish.**Seminar introduces the important issues, themes, and literature in Latin American history, from the colonial period to the present.*

- A. Colonial period.
- B. The nineteenth century
- C. Twentieth and twenty-first centuries.

251A-B. Seminar in Latin American History

(4-4) CLINE, SOTO LAVEAGA, MENDEZ

*Prerequisites: graduate standing; reading ability in Spanish.**Two-quarter sequence course; final grade given upon completion of History 251B.**A two-quarter research seminar on a given topic. Topics may include religion and politics from the colonial era to the present, colonial Indians, evolution of Latin American society, methods of social history.***253A-B. Special Seminar in Latin American History**

(4-4) ROCK

*A two-quarter seminar. Available on demand.**Discussion meetings for postgraduates. Reading, research, and writing in the history of Latin America in subject of student's choice.***254B. Latin America, Spain, and Portugal**

(4) DUTRA, SOTO LAVEAGA

*Prerequisite: reading knowledge of Spanish or Portuguese required (in special cases, French, German, Dutch, or Italian acceptable.)**Individual reading, research, and writing in the history of Spain, Portugal, and their empires in the Americas, Africa, and Asia. For Brazil and Mexico, national periods included.***255A-B. Ecological Imperialism: Science, Nature and Conquest in Latin America**

(4-4) SOTO LAVEAGA

*Prerequisite: graduate standing.**Analyzes the environmental impact of the conquest and how the process of nation-building in Latin America transformed the ecological landscape. In addition, it looks at how the royal botanical expeditions helped shape our definition of the region.***256. Topics in Mexican History**

(4) CLINE

*Prerequisite: graduate standing.**Selected topics in Mexican history.***259A-B. Seminar in American Social History**

(4-4) COHEN

*A two-quarter research seminar on selected topics in the "new" social history, including the history of women and the family. (Offered infrequently.)***260A-B. Seminar in American South**

(4-4) HARRIS

*Research in nineteenth- and twentieth-century Southern history.***261A-B. Seminar in Colonial America, the Frontier, and the Indian**

(4-4) PLANE

*A two-quarter in-progress sequence course with grades for both quarters issued upon completion of History 261B.**Seminar in colonial America, the frontier, and the Indian.***264A-IB. American Immigration**

(4-4) SPICKARD

*Not open for credit to students who have completed History 263A-B. A two-quarter in-progress sequence course with grades for both quarters issued upon completion of History 264IB.**A research seminar in the history of American immigration, particularly during the nineteenth and early twentieth centuries.***265A-B. Seminar in American Political and Social History**

(4-4) HARRIS

*A two-quarter in-progress sequence course with grades for both quarters issued upon completion of History 265B.**Research in American political and social history of the nineteenth and early twentieth centuries.***266A-B. Research Seminar in Recent U.S. History**

(4-4) KALMAN

*A research seminar for graduate students interested in any aspect of recent U.S. history.***268A-B. Seminar on Ethnicity and Community**

(4-4) GARCIA

*Prerequisite: consent of instructor.**A two-quarter research seminar on historical development of ethnic communities in the United States. Focus on community institutions such as the family, the church, voluntary associations, and the ethnic press. Particular research emphasis will be on Santa Barbara and Southern California ethnic communities.***268CA-CB. Seminar in Chicano History**

(4-4) GARCIA

*Not open for credit to students who have completed History 249A-B. A two-quarter in-progress sequence course with grades for both quarters issued upon completion of History 268CB.**This two-quarter research seminar explores various facets of Chicano history, but concentrates on the twentieth century. Examination of literature, an projects covering immigration, labor, women,**the Mexican-American generation, and the Chicano movement.***271A-B. Seminar in Diplomatic and Political History of the United States**

(4-4) YAQUB

*A two-quarter in-progress sequence course with grades for both quarters issued upon completion of 271B.**A two-quarter research seminar on modern American diplomatic and political history.***272A-B. Seminar in American Political and Intellectual History**

(4-4) FURNER

*Prerequisites: graduate standing and consent of instructor.**A two-quarter in progress seminar.**General research seminar on the history of politics and ideas in the United States, broadly conceived.***274. Biography and U.S. Political History**

(4) GARCIA

*Prerequisite: graduate standing.**Biography as a historical genre is explored to study U.S. political history predominantly in the twentieth century.***275A-B. American Cultural History**

(4-4) STAFF

*Student must take two consecutive quarters.***277A-B. Topics in the History of Science**

(4-4) OSBORNE, GUERRINI, MCCRAY

*Research seminar selected from such topics as Babylonian astronomy, Greek science, Age of Newton, rise of modern physics, scientific instruments, nationalism/internationalism in science, science and society, sociology of science, public conceptions of science, organization and profession of science. (Offered periodically.)***281A-B. Sino-Japanese Cultural and Political Relations, 1850-1945**

(4-4) STAFF

*Prerequisite: knowledge of Chinese and/or Japanese.**Same course as East Asian Cultural Studies**281A-B. Not open for credit to students who have completed History 289A-B. A two-quarter in-progress sequence course with grades for both quarters issued upon completion of History 281B.**Reading and research seminar on the interrelationship between Chinese and Japanese history from the first modern contacts until the end of World War II. Emphasis on cultural and political interactions.***283A-B. Research Seminar in Chinese Women's History**

(4) JUDGE

*Prerequisite: Hist 188A or 188B.**Reading and research seminar examining topics in Chinese gender history.***284A-B. Seminar in the History of Chinese Thought**

(4) STAFF

*Prerequisite: History 19 or 186A-B.**Not open for credit to students who have completed Chinese 284A-B. A two-quarter in-progress sequence course with grades for both quarters issued upon completion of History 284B.**Selected studies of leading thinkers on important schools of thought.***285A-B. Seminar in Early Modern Chinese History**

(4) ELLIOTT

*Prerequisite: History 210AS.**Reading knowledge of modern and/or classical Chinese highly desirable. A two-quarter in-progress sequence course with grades for both quarters issued upon completion of History 285B.**Research seminar on early modern Chinese history with training in bibliography and research methodology. Offered irregularly.***286A-B. Women and Modernity in the Non-Western World**

(4-4) STAFF

*Prerequisite: graduate standing.**A two-quarter in-progress sequence course with grades for both quarters issued upon completion of History 286B.*

Course problematizes modernity and probes its gendered nature. After reading in the theoretical literature, each student writes a paper on the question of women and modernity in their geographic area of specialization.

287L. Japanese Reading in History

(2-4) ROBERTS

Prerequisite: consent of instructor.

Intermediate Japanese ability required.

A course for students in Japanese history who want to learn to read secondary works in the Japanese language. Brief texts introduce the essential vocabulary and language patterns in Japanese historiography.

288A-B. Seminar in Japanese History

(4-4) ROBERTS

Prerequisite: consent of instructor.

A two-quarter research seminar on selected problems in Japanese history. Some working knowledge of the Japanese language desirable but not necessary.

289A-B. Seminar in Chinese History

(4) STAFF

Prerequisite: Graduate student standing.

A seminar on selected problems in Chinese history. Some working knowledge of the Chinese language desirable but not necessary.

290. US-Soviet Relations in the Cold War

(4) HASEGAWA, YAQUB

Prerequisite: open to graduate students in history and political science.

A one-quarter reading seminar discussing basic issues of US-Soviet relations during the Cold War, as well as historiographical issues. A number of specialists from outside the class will make presentations.

290A-B. US-Soviet Relations in the Cold War

(4-4) HASEGAWA

A two quarter in progress sequence course with grades for both quarters issued upon completion of History 290B. Open to graduate students in history and political science.

Discussion of basic issues of US-Soviet relations during the Cold War, as well as historiographical issues. Students are expected to write a research paper.

291A-B. Seminar on Knowledge and Policy, Institutions and Power

(4-4) FURNER

A two-quarter in-progress sequence course with grades for both quarters issued upon completion of History 291B.

A two-quarter seminar for historical research on the cultural and political power of ideas, formulated as policy-relevant knowledge within specific institutional contexts in the history of the modern state and civil society.

292A. Foundations of U.S. History to 1846

(4) STAFF

A colloquium introducing the important issues, themes, and literature in the history of the United States, from colonial origins to 1846. Historiographical in nature, the course assumes a basic familiarity with the period.

292B. Foundations of U.S. History, 1846-1917

(4) STAFF

A colloquium introducing the important issues, themes and literature in the history of the United States, from 1846 to 1917. Historiographical in nature the course assumes a basic familiarity with the period.

292C. Foundations of U.S. History, 1917-Present

(4) STAFF

A colloquium introducing the important issues, themes, and literature in the history of the United States, from 1917 to the present. Historiographical in nature, the course assumes a basic familiarity with the period.

293. Space, Culture, Power

(4) HANCOCK

Prerequisite: graduate standing.

Exploration of the cultural production of built environments; spatiality and public culture; spaces

of memory; historical landscapes; spatial theory; geographical and temporal focus vary.

294. Colloquium in Work, Labor, and Political Economy

(1-2) STAFF

Hosts leading scholars of the nineteenth- and twentieth-century U.S. whose work touches upon the history and character of work, employment, labor, poverty, race, ethnicity, political economy, and public policy. The colloquium meets three to four times per quarter.

500. Laboratory for Teaching Assistants

(2-4) STAFF

Units do not apply toward completion of the Ph.D. requirement. Required each quarter for teaching assistants.

Subject oriented, designed to relate directly to the teaching of a particular course in progress, to improve the skills and effectiveness of the department's teaching assistants.

594. Special Topics

(4) STAFF

May be repeated for credit.

Special seminar on research subjects of current interest.

HS. Colloquium in the History of Science: Badash; Osborne; Guerrini

596. Directed Reading and Research

(2-12) STAFF

Prerequisites: graduate standing and consent of instructor.

Minimum of 2 units per quarter.

Individual tutorial. Instructor usually student's major professor. Each faculty member has a unique letter designation available from graduate secretary.

597. Independent Study for Master's Comprehensive Examinations and Ph.D. Examinations

(2-12) STAFF

No unit credit allowed toward advanced degree.

599. Ph.D. Dissertation Preparation

(2-12) STAFF

Prerequisites: graduate standing and consent of instructor.

Only for writing the dissertation. Instructor should be the chair of the student's doctoral committee. Each faculty member has a unique letter designation available from graduate secretary.

Faculty

Ann Jensen Adams, Ph.D., Harvard University, Associate Professor (17th-century art and architecture)

C. Edson Armi, Ph.D., Columbia University, Professor (medieval architecture)

Ann Bermingham, Ph.D., Harvard University, Professor (18th- and 19th-century British art and culture, critical theory and feminist theory)

Swati Chattopadhyay, Ph.D., UC Berkeley, Associate Professor (modern architecture, cultural landscape of British colonialism, postcolonial theory)

Ulrich F. Keller, Ph.D., University of Munich, Professor (history of photography)

Nuha N. N. Khoury, Ph.D., Harvard University, Associate Professor (Islamic art and architecture)

Mark Meadow, Ph.D., UC Berkeley, Associate Professor (15th- and 16th-century Northern European)

Laurie Monahan, Ph.D., Harvard University, Associate Professor (20th-century and contemporary European art)

Sylvester Ogbechie, Ph.D., Northwestern University, Associate Professor (African and African American art)

Jeanette Favrot Peterson, Ph.D., UC Los Angeles, Associate Professor (pre-Columbian/ Colonial)

E. Bruce Robertson, Ph.D., Yale University, Professor (18th- and 19th-century British and American art)

Abigail Solomon-Godeau, Ph.D., Graduate Center, C.U.N.Y., Professor (contemporary art, feminist and critical theory, 19th-century European art, photography)

Peter C. Sturman, Ph.D., Yale University, Associate Professor (Chinese art)

Miriam Wattles, Ph.D., Institute of Fine Arts, New York University, Assistant Professor (Japanese art)

Volker Welter, Ph.D., University of Edinburgh, Associate Professor (history and theory of architecture)

Robert Williams, Ph.D., Princeton University, Professor (art theory, historiography, Italian Renaissance)

Richard Wittman, Ph.D., Columbia University, Associate Professor (early modern and modern architecture, theory and town planning)

Fikret K. Yegül, Ph.D., Harvard University, Professor (Greek and Roman art, architectural history)

Emeriti Faculty

Larry M. Ayres, Ph.D., Harvard University, Professor Emeritus (medieval art)

Herbert M. Cole, Ph.D., Columbia University, Professor Emeritus (African, Oceanic, North American Indian art, architecture)

Mario A. Del Chiaro, Ph.D., UC Berkeley, Professor Emeritus (ancient art; Egyptian, Greek, and Etruscan art)

Ramon Favela, Ph.D., University of Texas at Austin, Associate Professor Emeritus (modern Latin American art, contemporary Chicano art)

Beatrice Farwell, Ph.D., UC Los Angeles, Professor Emerita (19th-century art)

Alfred K. Moir, Ph.D., Harvard University, Professor Emeritus (baroque art)

Corlette R. Walker, Ph.D., Bryn Mawr, Lecturer Emerita (British and American art)

Affiliated Faculty

Geraldo Aldana, Ph.D. (Chicana and Chicano Studies)

Colin Gardner, Ph.D. (Art)

Guisela Latorre, Ph.D. (Chicana and Chicano Studies)

Constance Penley, Ph.D. (Film Studies)

Bhaskar Sarkar, Ph.D. (Film Studies)

Sven Spieker, Ph.D. (Germanic, Slavic, and Semitic Studies)

Adjunct Faculty

Kurt Helfrich, Ph.D. (UCSB Art Museum)

The Department of the History of Art and Architecture offers an undergraduate program directed toward a B.A. degree and a graduate program leading to the M.A. and Ph.D. degrees. The undergraduate program is designed to provide an understanding of the history and significance of the visual arts. It also prepares students for graduate work leading to careers as academic historians of art, museum curators, or critics, and in other fields such as art administration, historic preservation, and gallery work. The program is supported by an excellent arts library, visual resources collection, architectural drawing collection, and university art museum.

Students with a bachelor's degree in art history who are interested in pursuing a California Teaching Credential should contact the credential advisor in the Graduate School of Education as soon as possible.

The department publishes a list that describes the content of courses offered each quarter; the publication is available prior to registration in classes. Advising is available in the department through the undergraduate advisor, faculty undergraduate advisor, and the department chair.

Honors Program

The departmental honors program is designed for students interested in advanced research in art history. Students must receive the signatures of the department chair and a faculty supervisor, in addition to having an overall grade-point average of at least 3.0, 12 upper-division units in the major, and a major grade-point average of at least 3.5.

Once admitted to the program, honors students may choose between two options leading to the completion of an honors thesis: (1) one two-quarter seminar, or two seminars in relevant areas within art history or (2) two consecutive quarters of independent study (Art History 199). Alternative options must be approved by the department chair. After projects are completed and submitted, they are evaluated by a committee consisting of the student's faculty supervisor and at least one other departmental faculty member, usually a specialist in a neighboring field. Among the criteria used in evaluating honors theses are scholarly presentation, originality, and quality of research. Deadline for the thesis is the Monday of the eighth week of the second quarter of honors studies. Students successfully completing the honors project will receive Distinction in the Major at the time of graduation.

Undergraduate Program

Bachelor of Arts—Art History

Preparation for the major. Eight units are required as follows: (a) One course from Art

History 6DS-DW-E-H-K, (b) One course from Art History 5A, 6A-B-C-F-G, 45MC.

Students planning graduate training in art history are advised to develop a reading knowledge of German, French, or Italian.

Upper-division major. Forty-eight upper-division units are required, as follows. (Note: courses may not be used to fulfill requirements in more than one category.)

- A. Two courses in Art and Architecture of Europe, selected from the following courses: Art History 101A-B-C, 103A-B-C, 104AA-ZZ, 105B-E-F-G-H-J-K-L, 106AA-ZZ, 107A-B, 108AA-ZZ, 109A-B-C-D-E-F-G, 110-AA-ZZ, 111B-C-E-F, 112AA-ZZ, 113A-B-D, 114AA-ZZ, 115B-C, 116AA-ZZ, 117A-B-C-D-F, 118AA-ZZ, 119C-E, 120AA-ZZ, 137AA-ZZ, 138B-C-D, 139AA-ZZ, 140E, 141D, 143B-C, 144A-C-D, 147AA-ZZ, 184B-C, 186A-B-C-D-E-F-G-H-I-J-K-S-T-U-V-W-Y.
- B. Two courses in Art and Architecture of Africa, North America, South America, and Asia, selected from the following courses: *Africa*: 101D, 127A-B, 128AA-ZZ, 132B-C, 133AA-ZZ, 186N-Q; *Asia*: Art History 134A-B-C-D-E-F-G-H, 135AA-ZZ, 136V, 186R-RS-RW; *North and South America*: Art History 121A-B-C-D-E, 123A-B-C, 124AA-ZZ, 125A, 126AA-ZZ, 130A-B-C-D-E, 131AA-ZZ, 130B-C-E, 131AA-ZZ, 136H-M, 186 L-M-O-P-X-Y; *Other*: Art History 147AA-ZZ, 186S-T-U-V-W-Y.
- C. Two courses in Comparative Studies in Art and Architecture selected from the following courses: Art History 103B, 105B-C, 109H, 119A-B-D-F-G, 121D, 123A, 125A, 130C-E, 131AA-ZZ, 132A-I, 133AA-ZZ, 134A, 136A-B-H-I-J, 137AA-ZZ, 138A-BC-D, 140A-C-E, 145MC, 147AA-ZZ, 186L-P-Q-S-T-V-W-Y.
- D. Four additional upper-division elective courses in art history.

Note: One of the above courses from Areas A, B, C, or D must be taken in each of the following areas:

1. One upper-division research seminar from the 186 series.
 2. One course devoted to pre-1350 CE material from: 101B-C-D, 102AA-ZZ, 103A-B-C, 104AA-ZZ, 105B-C-E-F-G-H-J-L, 106AA-ZZ, 130A-B-D, 132C, 134B.
 3. Once course in history of architecture: 103A-C, 104AA-ZZ, 105C-E-G, 113D, 132A-C, 136 series, 137AA-ZZ, 184B-C, 186B-D-S-Y.
 4. One course in African or Asian Art. Students should consult with the undergraduate staff and faculty advisors in deciding whether courses in the 186 series and AA-ZZ series fulfill the requirement for a particular category.
- E. Two upper-division courses chosen from Writing 109V and/or courses within the Division of Fine Arts and Humanities: Art Studio; Classics; Comparative Literature; Dance; Theater; East Asian Languages and Cultural Studies; English; Film and Media Studies; French and Italian; Germanic, Slavic, and Semitic Studies; History; Music; Philosophy; Spanish and Portuguese; Religious Studies.

Note: Students who wish to focus on a particular area, civilization, or branch of art history (i.e.,

ancient, architecture, or modern) are encouraged to speak to departmental advisors or faculty. For those eligible, the focus may also include an undergraduate honors project.

Bachelor of Arts—Art History—Emphasis in Architecture and Environment

Preparation for the major. (A) Art History 5A and 6F; (B) Four units from Anthropology 2; Art History 6A-B-C-DS-DW-E-G-H-K, 45MC; Art Studio 1A; Environmental Studies 1, 3; Geography 5; Sociology 1

Students planning graduate training in art history are advised to develop a reading knowledge of German, French, or Italian.

Upper-division major. Forty-eight upper-division units are required:

- A. Four units from Art History 186 series;
- B. Sixteen units from Art History 103A-C, 105C-E-G, 113D, 132A-C-D-E, 134E, 136 series, 137AA-ZZ, 140B-E, 141B, 184B-C, 186B-D-Q-S-X-Y, 199.
- C. Twelve additional upper-division elective units in Art History not used above.
- D. Sixteen units from the following Departments: Anthropology 110, 113FB, 130A-B-C, 172; Art Studio, 105, 106, 106W, 117, 118, 125, 130, 194; Classics 160, 170; Environmental Studies 105, 106, 110, 112, 116, 118, 122NE, 125B, 130A-B-C, 135A-B, 160, 165A-B, 173, 183, 188, 189; Film and Media Studies 113LS, 183, 187DP-G-M, 190DT; Geography 108, 111A-B, 135S, 140, 148, 150, 153A-B-C-D-E, 155, 159, 180, 185A-B-C-D; History 107G, 173T, 178A-B, 192, 192Q; Religious Studies 110C, 131H, 193; Sociology 118C, 126, 185C.

Consultation with the Faculty Undergraduate Advisor is recommended when choosing courses and Departments in Area D.

Note: Students must complete prerequisites for all upper-division coursework as stated in the General Catalog. In particular, all upper-division art studio courses have prerequisites, as do many of the other courses listed in Area C.

Bachelor of Arts—Art History—Emphasis in Art of Africa, Asia, and the Americas

Preparation for the major. Four units from (A) Art History -DS-DW-E-H-K, (B) 4 units in art history from 5A, 6A-B-C-F-G, 45MC.

Students planning graduate training in art history are advised to develop a reading knowledge of German, French, Italian, or a language related to their non-Western area of emphasis.

Upper-division major. Forty-eight upper-division units are required. (A) six undergraduate courses in African, Native-American, Asian, Islamic, Pre-Columbian/Colonial, Art History: 121F, 127 series, 128 series, 130-135 series, 131 series, 132 series, 133 series, 134 series, 135 series, 136A-B-H-I-J-V, 186N-P-Q-R-RS-RW; (B) one course in European or U.S. -American Art History, Ancient to 1750: 101-116 series, 186A-B-C-D-E-F-G-H-I, (C) one course in European or U.S. -American Art History, Modern, 1750-present: 117-120 series, 121A-B-C, 123 series, 136A-B-E-J, 138A-E, 144A-B-C, 186J-K-T-X-Z, (D) one course in comparative studies in Art

and Architecture: 103B, 105B-C, 109H, 119A-B-D-F-G, 121D, 123A, 125A, 130C-E, 131AA-ZZ, 132A-I, 133AA-ZZ, 134A, 136A-B-H-I-J-N-O, 137AA-ZZ, 138B-C-D, 140A-C-E, 145MC, 147AA-ZZ, 186K-L-P-Q-S-T-V-W-Y, (E) one additional course in art history not used above in areas A-D; (F) two upper-division courses chosen from Writing 109V and/or courses within the Division of Fine Arts and Humanities: Art; Art Studio; Classics; Literature; Dance; Theater; East Asian Languages and Cultural Studies; English; Film and Media Studies; French and Italian; Germanic, Slavic, and Semitic Studies; History; Music; Philosophy; Spanish and Portuguese; Religious Studies; and Writing 109V.

Note: Two of the courses in Areas A-E must include one course in the 186 series. Students who wish to focus on a particular area, civilization, or branch of art history (i.e., African, Pre-Columbian, or Asian) are encouraged to speak to departmental advisors or faculty. For those eligible, the focus may also include an undergraduate honors project.

Minor—Art History

All courses to be applied to the minor must be completed on a letter-grade basis, including courses offered both by the Department of the History of Art and Architecture and those offered by other departments and applied to the minor.

Preparation for the minor. Eight lower-division units as follows: (A) one course from Art History (6DS-DW-E-H-K); (B) one course from Art History (5A, 6A-B-C-F-G, 45MC).

Upper-division minor. Twenty upper-division units in art history. Students wishing to develop a concentration in a particular area should consult the faculty undergraduate advisor.

Note: Substitutions and waivers are subject to approval by the chair of the department. Please see page 118 for special conditions governing minors in the College of Letters and Science.

Graduate Program

The department offers both M.A. and Ph.D. degrees, accepting applicants with a B.A. into the M.A./Ph.D. program, and those with a M.A. into the Ph.D. program. The department does not offer a terminal M.A. degree, and students who are interested only in pursuing the M.A. degree are not accepted.

Admission

The department seeks applicants with a demonstrated potential for outstanding creative research and a clear sense of intellectual and professional direction. A B.A. in the history of art is not essential for admission to the M.A./Ph.D. program, but applicants should have serious training in some branch of the humanities or social sciences. Applicants to the Ph.D. program must have completed an M.A. in the history of art.

In addition to departmental requirements for admission, applicants must also meet university requirements for admission described in the chapter “Graduate Education at UCSB.” Applications for admission to the program must be received by December 15. Application is made electronically at www.graddiv.ucsb.edu/eapp.

Required documents include copies of all of the applicant’s college and university transcripts, three letters of recommendation from appropriate academic or professional supervisors, Graduate Record Examination (GRE) scores, a statement of purpose explaining reasons for wanting to pursue graduate work at UCSB, and a sample of written work indicative of scholarly interests and skills (applicants to the Ph.D. program are expected to submit a copy of their M.A. thesis).

Although all students entering the graduate program are expected to pursue the Ph.D., continuation into the program is not automatic. Upon completion of the M.A. thesis, students must apply to the department for matriculation into the Ph.D. program. A faculty evaluation of the student’s entire record will determine whether the student goes forward with the matriculation process into the Ph.D. program or instead receives a terminal M.A. degree.

Entry into the Ph.D. program requires that the student have completed the M.A. thesis, and satisfied all departmental course and language requirements at the M.A. level.

The applicant must submit a brief letter of application to the department’s graduate committee as well as letters of endorsement from two ladder faculty members in the department, of whom at least one agrees to supervise the applicant’s Ph.D. work. The application and faculty letters must be received at the time that the M.A. thesis is completed. The graduate committee will review each request in consultation with the student’s named potential advisor and make a recommendation to the entire faculty regarding matriculation.

Degree Requirements

Departmental degree requirements supplement those established by the university, described in the section “Graduate Education at UCSB.” Our principle aim has been to preserve a maximum flexibility, allowing students the opportunity to craft courses of study suited to their particular interests and needs. Ph.D. students, for instance, have the option of adding an emphasis in women’s studies.

Master of Arts—Art History

The master’s degree requires a minimum of 32 units of coursework (normally eight courses) for a letter grade plus a thesis. Under exceptional circumstances a second option of 36 units (nine courses) plus a comprehensive examination is offered to students who are not matriculating into the Ph.D. program.

Students are required to take the two-term proseminar in art-historical methods (Art History 200A-B) and a total of four graduate seminars (16 units) for a letter grade, of which one must be in the field of non-Western art. Two additional seminars must be taken, each representing a different area, chosen from the three remaining fields represented by department offerings: Western Art to 1750, Modern Art, and Architecture. Remaining units can be taken in the form of additional seminars, upper-division undergraduate lecture courses (which graduate students take under the course number 295 or 596) or independent research; 8 of these units (two courses) may be taken outside the department.

By the beginning of the second year of residence, students must have demonstrated an ability to read one foreign language necessary for art-historical research (normally French, German, or Italian).

Doctor of Philosophy— Art History

The Ph.D. requires a minimum of 28 units (normally seven courses) in graduate coursework, 20 of which (five courses) must be seminar units; these must be completed by the end of the second year of residency. Before advancement to candidacy, the student must demonstrate an ability to read two foreign languages. Students are required to take the proseminar in art historical methodology and theory (Art History 200A-B). Advancement to candidacy takes place when the student passes individualized examinations in the area of specialty (major field) and a second (minor) field, and when, shortly after the completion of the exams, a formal dissertation proposal is approved by a faculty committee. The committee will be composed of at least two members of the UCSB Academic Senate in the Department of History of Art and Architecture, one of whom will be the chair. The third member may be a ladder faculty member from the department, another UCSB department, or another UC campus. Advancement to candidacy is expected to take place in the third year. The degree is awarded upon approval of the completed dissertation.

Optional Ph.D. Emphasis in European Medieval Studies

The Medieval Studies Program offers an interdisciplinary doctoral emphasis to students previously admitted to a Ph.D. program in the Departments of Theater and Dance, English, French and Italian, History, History of Art and Architecture, Music, Religious Studies, and Spanish and Portuguese. Students pursuing the emphasis in European medieval studies must receive a grade of B or better in each of the following: Medieval Latin (Latin 103); one course in a vernacular, western European or Middle Eastern medieval language (English 205, English 230, French 206, Spanish 222A, Spanish 222B, Portuguese 222, Religious Studies 148A, Religious Studies 148 B, Religious Studies 210); Paleography and/or Diplomatics (History 215S, History 215T); Medieval Studies 200A-B-C; and 8 additional units in graduate courses on medieval topics. Students may petition to have appropriate courses from other institutions, or independent study, substituted for these requirements. Medieval Studies 200A-B-C is the program’s colloquium series; graduate students in the emphasis attend the series and write brief papers on each colloquium (one per term), to be reviewed by the chair of the program (2 units). To qualify for the emphasis, at least one member of a Ph.D. candidate’s dissertation committee must be an affiliated faculty member of the European Medieval Studies Program. Contact the European Medieval Studies Program for additional information on faculty interests, course offerings, and program requirements, or visit our Web site at www.medievalstudies.ucsb.edu.

Optional Ph.D. Emphasis in Women's Studies

The Women's Studies Program, with almost fifty core and affiliated faculty members in over nineteen disciplines, serves as a model of interdisciplinary work and scholarly collaboration at UCSB. Women's Studies doctoral emphasis students are required to complete successfully four seminars that will enhance their understanding of feminist pedagogy, feminist theory, and topics relevant to the study of women, gender and/or sexuality. Women's Studies as an inter-departmental set of conversations and intellectual questions supports a multifaceted undergraduate curriculum at UCSB. Graduate emphasis students are encouraged to apply to teach Women's Studies courses as teaching assistants and associates as part of their Women's Studies training.

Applicants must first be admitted to, or currently enrolled in, a UCSB Ph.D. program participating in the Women's Studies graduate emphasis: Anthropology; Comparative Literature; Counseling, Clinical, and School Psychology; English; French and Italian; Germanic, Slavic and Semitic Studies; History; History of Art and Architecture; Political Science; Religious Studies; Sociology; Spanish and Portuguese; or Theater and Dance. Candidates complete four graduate courses and select a member of the Women's Studies faculty or affiliated faculty to serve on their dissertation committees. Applications to the Women's Studies Doctoral Emphasis may be submitted at any stage of Ph.D. work, and applications will be considered throughout the year.

The Graduate Curriculum

Students pursuing the emphasis in Women's Studies will successfully complete four graduate courses. Only one may be taken in the student's home department.

- 1. Issues in Feminist Epistemology and Pedagogy (Women's Studies 270).** A one-quarter seminar that considers Women's Studies as a distinct field. It offers an interdisciplinary exploration of feminist theories of knowledge production and teaching practices. Readings cover past and present critical debates and provide theoretical approaches through which to analyze interdisciplinary epistemological and pedagogical issues.
- 2. Special Topics in Women's Studies (594 AA-ZZ).** A one-quarter seminar offered by a Women's Studies faculty member on topics of central concern to the field of Women's Studies.
Or,
Research Practicum (Women's Studies 280). A cross-disciplinary seminar in which fundamental questions in contemporary feminist research practice are considered in light of students' own graduate projects. Students may fulfill the Area 2 requirement by taking either a Special Topics Seminar or the Research Practicum.
- 3. Feminist Theories.** A one-quarter graduate seminar in feminist theory offered by any department, including Women's Studies.

- 4. Topical Seminar.** A one-quarter graduate seminar, outside the student's home department, that addresses topics relevant to the study of women, gender, and/or sexuality.

History of Art and Architecture Courses

LOWER DIVISION

Freshman seminars are offered on an irregular basis.

1. Introduction to Art

(4) STAFF

Not open to art history majors.

A study of art as a medium of expression.

5A. Introduction to Architecture and Environment

(4) WELTER

Examines the history of the built and natural environments as interrelated phenomena, and explores how human beings have positioned them architecturally in relation to the natural world at various cultural moments.

6A. Art Survey I: Ancient-Medieval Art

(4) STAFF

History of Western art from its origins to the beginnings of the Renaissance. (F)

6B. Art Survey II: Renaissance-Baroque Art

(4) STAFF

Renaissance and Baroque art in northern and southern Europe. (W)

6C. Art Survey III: Modern-Contemporary Art

(4) STAFF

History of Western art from the eighteenth century to the present. (S)

6DS. Survey: History of Art in China

(4) STURMAN

Chronological and thematic overview of the major traditions of Chinese art, Neolithic to modern, including ceramics and bronzes, Buddhist visual culture, paintings, calligraphy, garden design and imperial architecture, with an emphasis on historical context, regional diversity, and intercultural encounters.

6DW. Survey: Art of Japan and Korea

(4) WATTLES

Surveys the arts of Japan and the Korean peninsula from pre-historic to contemporary times. The focus is on the evolving role of the artist within society.

6E. Survey: Arts of Africa, Oceania, and Native North America

(4) OGBECHIE

A conceptual, cross-cultural introduction to Amerind, Eskimo, African, and Oceanic arts: artists, sculpture, festivals, body decoration, masking, architecture, and painting will be seen in the context of social and religious values. Films, slides, and museum tours.

6F. Survey: Architecture and Planning

(4) CHATTOPADHYAY, YEGÜL, WITTMAN

A selective chronological survey of architecture and urban design in social and historical context. Individual buildings and urban plans from the past to the present will be used as examples.

6G. Survey: History of Photography

(4) KELLER

A critical survey of nineteenth- and twentieth-century photography as an art form.

6H. Pre-Columbian Art

(4) PETERSON

An introduction to selected art traditions in ancient Mesoamerican and Andean South America. Examination of major monuments of sculpture, architecture, ceramics, and painting for their meaning and function within socio-political, religious, and economic contexts.

6K. Islamic Art and Architecture

(4) KHOURY

A survey of Islamic art and architecture.

45MC. The University: Microcosm of Knowledge

(4) MEADOW, ROBERTSON

Introduces undergraduates to the university as a place of knowledge production through a combination of lecture and hands-on field research. Topics include the history of universities and the change of disciplinary approaches to research, evidence, and knowledge.

94S. Student Facilitated Group Studies Project

(4) STAFF

Prerequisite: a prior art history course; consent of instructor and department.

Students must have a cumulative 3.0 for the preceding 2 quarters.

Independent art history research conducted under the guidance of Art History faculty. Topic and scope varies, to be specified by student and supervisory faculty member prior to registration.

99. Independent Studies

(1-4) STAFF

Prerequisite: consent of instructor.

Students must have a minimum 3.0 GPA. May be taken for a maximum of 4 units per quarter and can be repeated for a maximum of 8 units. Students are limited to 30 units total in all 98/99/198/199/199AA-ZZ courses combined.

Introduction to research in art history. Independent research under the guidance of a faculty member in the department. Course offer exceptional students the opportunity to undertake independent research or work in a research group.

UPPER DIVISION

101A. Archaic Greek Art (750 to 480 B.C.E.)

(4) STAFF

Prerequisite: not open to freshmen.

Painting, sculpture, and architecture in Greece from c750 to c480 B.C.E. considered in their social and cultural contexts. Emphasis on the emergence of representational practices during a time of social formation.

101B. Classical Greek Art (480 to 320 B.C.E.)

(4) STAFF

Prerequisite: not open to freshmen.

Painting, sculpture, and architecture in Greece from c480 to c320 B.C.E. considered in their social and cultural contexts. Emphasis on fifth-century Athens.

101C. Hellenistic Greek Art

(4) STAFF

Prerequisite: not open to freshmen.

Painting, sculpture, and architecture in Greece from 336 to 30 B.C.E. considered in their social and cultural contexts. Emphasis on relations between Greek and other cultures of the ancient Mediterranean after Alexander and during the rise of Rome.

101D. Ancient Egyptian Art

(4) STAFF

Prerequisite: not open to freshmen.

Painting and sculpture in Egypt from the fourth millennium to the first century BCE. Emphasis on the relations between visual representation and religious and political practice, including special attention to the formation and maintenance of the canonical tradition.

102AA-ZZ. Special Topics in Ancient Art

(4) STAFF

Prerequisite: not open to freshman.

May be repeated for credit to a maximum of 12 units provided letter designations are different.

Specialized classes exploring critical issues in ancient art.

103A. Roman Architecture

(4) YEGÜL

Prerequisite: not open to freshmen.

Recommended preparation: Art History 6A.

The architecture and urban image of Rome and the Empire from the Republic through the Constantinian era.

103B. Roman Art: From the Republic to the Empire (509 B.C. to A.D. 337)**(4) YEGÜL***Prerequisite: not open to freshmen.**Recommended preparation: Art History 6A.*

Painting, sculpture, and decorative arts of the Romans from the Republic to the Empire, from Romulus to Constantine. Social, economic, and cultural background emphasized.

103C. Greek Architecture**(4) YEGÜL***Prerequisite: not open to freshmen.*

The architecture of the Greek world from the archaic period through the Hellenistic Age.

104AA-ZZ. Special Topics in Classical Art and Architecture**(4) STAFF***Prerequisite: not open to freshman.*

May be repeated for credit to a maximum of 12 units provided letter designations are different.

Recommended preparation: Art History 6A.

Special topics in classical art and architecture.

105B. Medieval Art: Byzantine**(4) STAFF***Prerequisite: upper-division standing.*

Architecture, sculpture, painting, and the minor arts of the Byzantine world from 330 to 1453 A.D.

105C. Medieval Architecture: From Constantine to Charlemagne**(4) ARMI***Prerequisite: upper-division standing.*

Recommended preparation: Art History 6A or 6F or 105E or 105G.

A survey of the architecture in Italy, France, Spain, Germany, and England from the Early Christian through the Carolingian periods.

105E. The Origins of Romanesque Architecture**(4) ARMI***Prerequisite: upper-division standing.*

Recommended preparation: Art History 6F or 105C or 105G.

Eleventh century architecture in France, Italy, Spain, Germany, and England.

105F. Medieval Art: Romanesque**(4) STAFF***Prerequisite: upper-division standing.*

Architecture, sculpture, and painting of the Romanesque period in Western Europe from 1050 to 1200 A.D.

105G. Late Romanesque and Gothic Architecture**(4) ARMI***Prerequisite: upper-division standing.*

Recommended preparation: Art History 6A or 105C or 105E.

Twelfth- and thirteenth-century architecture in France, Italy, Spain, Germany, and England.

105H. Medieval Art: Gothic**(4) STAFF***Prerequisite: upper-division standing.*

Architecture, sculpture, and painting of the Gothic period in Western Europe from 1150 to 1400 A.D.

105J. Gothic Painting 1200-1400**(4) STAFF***Prerequisite: upper-division standing.*

The origins and development of Gothic painting in France, England, and the Lower Rhineland with special reference to Parisian manuscript illumination and to the influence of Italian art in the north during the fourteenth century.

105K. Medieval Art: Italy, Thirteenth and Fourteenth Centuries**(4) STAFF***Prerequisite: upper-division standing.*

The emergence of humanistic and civic ideas in the art of the Italian Trecento and Quattrocento. A survey of large civic programs of secular and secularized ecclesiastical art of the two centuries. Sculpture, architecture, and painting are discussed.

105L. Art and Society in Late-Medieval Tuscany**(4) WILLIAMS***Prerequisite: not open to freshmen.*

The dramatic developments in central-Italian art from the eleventh to the fourteenth centuries are presented against a historical background: emergent capitalism, the gradual replacement of feudal authority with representative governments, popular religious movements and the first stirrings of humanism.

105M. The Design, Construction, and Structure of Medieval Architecture**(4) STAFF***Prerequisite: not open to freshmen.*

The practical aspects of creating high Medieval churches.

106AA-ZZ. Special Topics in Medieval Art**(4) STAFF***Prerequisite: upper-division standing.*

May be repeated for credit to a maximum of 12 units provided letter designations are different.

Special topics in medieval art.

107A. Painting in the Fifteenth-Century Netherlands**(4) MEADOW***Prerequisite: not open to freshmen.*

Netherlandish painting from c1400-c1500 examined in its social, religious, and cultural contexts. Van Eyck, Rogier, Bouts and Memling, among others.

107B. Painting in the Sixteenth-Century Netherlands**(4) MEADOW***Prerequisite: not open to freshmen.*

Painting of the Low Countries from c1500-c1600, placed in its social and cultural contexts. Artists studied include Bosch and Bruegel.

108AA-ZZ. Special Topics in Fifteenth and Sixteenth Century Northern European Art**(4) STAFF***Prerequisite: not open to freshmen.*

May be repeated for credit to a maximum of 12 units provided letter designations are different.

Specialized classes exploring critical issues in European art from the Netherlands, Germany, France and/or England. Courses may take the form of in-depth studies of particular artists (e.g. Durer) or themes (e.g. Iconoclasm).

109A. Italian Renaissance Art: 1400 to 1500**(4) WILLIAMS***Prerequisite: not open to freshmen.*

Developments in painting and sculpture, with attention to issues of technique, iconography, patronage, workshop culture and theory.

109B. Italian Renaissance Art: 1500 to 1600**(4) WILLIAMS***Prerequisite: not open to freshmen.*

Developments in painting and sculpture, with attention to issues of technique, iconography, patronage, workshop culture and theory.

109C. Art as Technique, Labor, and Idea in Renaissance Italy.**(4) WILLIAMS***Prerequisite: not open to freshmen.*

An approach to the art of Renaissance Italy that focuses on the superimposition of three complementary and often competitive discursive formations that condition its practice and historical development.

109D. Art and the Formation of Social Subjects in Early Modern Italy**(4) WILLIAMS***Prerequisite: not open to freshmen.*

An approach to the art of Renaissance Italy that focuses on the viewer's experience and the social and cultural conditions framing it.

109E. Michelangelo**(4) WILLIAMS***Prerequisite: not open to freshmen.*

The career and achievement of the artist, with particular attention to issues surrounding his treatment of the human body.

109F. Italian Journeys**(4) WILLIAMS***Prerequisite: not open to freshmen.*

A historical survey of travel to Italy and its importance as one of the constitutive rituals of

western culture, drawing upon literature, the visual arts, and film, and ending with practical advice for those planning to make the trip themselves.

109G. Leonardo Da Vinci: Art, Science, and Technology in Early Modern Italy**(4) WILLIAMS***Prerequisite: not open to freshmen.*

The life and work of Leonardo Da Vinci and a consideration of their place in the history of art as well as in the development of early modern science and technology.

109H. Art and Moral Values**(4) WILLIAMS***Prerequisite: not open to freshmen.*

What is the relation between art and moral life? A historical survey reveals that it is, in fact, multifaceted and profound, and even more urgent in modern times than in the past.

110AA-ZZ. Special Topics in Italian Renaissance Art**(4) STAFF***Prerequisite: not open to freshmen.*

May be repeated for credit to a maximum of 12 units provided letter designations are different.

Special topics in Italian Renaissance art.

111B. Dutch Art in the Age of Rembrandt**(4) ADAMS***Prerequisite: a prior course in art history; not open to freshmen.*

Visual culture produced in Northern Netherlands between 1579 and 1648. Classes devoted to individual artists (e.g. Rembrandt, Frans Hals) and genres (e.g. landscape, portraiture, history painting) in relation to material culture and thought of the period.

111C. Dutch Art in the Age of Vermeer**(4) ADAMS***Prerequisites: a prior course in art history; not open to freshmen.*

Visual culture produced in Northern Netherlands between 1648 and 1672. Classes devoted to individual artists (e.g. Rembrandt, Johannes Vermeer) and genres (e.g. landscape, portraiture, history painting) in relation to material culture and thought of the period.

111D. Flemish Art of the Seventeenth Century**(4) ADAMS***Prerequisites: a prior course in art history; not open to freshmen.*

Visual culture produced by Flemish artists between 1579 and 1700. Classes may be devoted to individual artists, genres and/or patrons in relation to the Counter-Reformation, changing patronage, material culture, and seventeenth century thought. Particular attention paid to the variety of approaches employed by later scholars of the period.

111E. Gender and Power in Sixteenth and Seventeenth Century European Art**(4) ADAMS***Prerequisites: a prior course in art history; not open to freshmen.*

Focus on the construction of gender identity and the cultural function of gendered subjects in sixteenth century European imagery.

111F. Rethinking Rembrandt**(4) ADAMS***Prerequisites: a prior course in art history; not open to freshmen.*

In light of recent reevaluations of Rembrandt's biography and his oeuvre, this course examines questions of authenticity and authorship in light of artistic technique, subject matter, style, and patronage.

112AA-ZZ. Special Topics in Northern European Art**(4) STAFF***Prerequisite: not open to freshmen.*

May be repeated for credit to a maximum of 12 units provided letter designations are different.

Specialized classes that examine critical issues in Northern European visual culture of the seventeenth century. Courses may consider individual artists (e.g. Frans Hals, Vermeer) and/or subject genres (e.g. still-life, history painting, portraiture) in relation to the cultural function of northern European imagery from the time of production until today.

113A. Seventeenth Century Art in Southern Europe**(4) STAFF***Prerequisite: not open to freshmen.**Not open to students who have completed Art History 113B.*

Painting and sculpture from Italy and Spain as well as France and Flanders examined in its cultural, political, and religious contexts with particular attention to relationships between regional traditions and international trends. Artists studied include Caravaggio, Bernini, Velazquez, Poussin, and Rubens.

113B. Seventeenth Century Art in Italy I**(4) STAFF***Prerequisite: not open to freshmen.**Not open to students who have completed Art History 113B.*

Italian painting, sculpture, architecture, and urbanism from the late sixteenth to late seventeenth centuries examined in its cultural, political, and religious contexts, with emphasis on the relationship between the arts. Focus on the earlier seventeenth century, including the work of Caravaggio, Carracci, and the young Bernini.

113D. Architecture in Early Modern Italy**(4) PAUL***Prerequisite: not open to freshmen.*

Architecture and urbanism in Italy from the Renaissance through the seventeenth-century examined in its cultural, political, and religious contexts, with emphasis on relationships to classical tradition. Includes works and/or writings by Brunelleschi, Alberti, Bramante, Michelangelo, Bernini, and Borromini.

113F. Bernini and the Age of the Baroque**(4) PAUL***Prerequisite: not open to freshmen.*

Examines the life and work of Gianlorenzo Bernini, best known as a brilliant and innovative sculptor, in their historical context. Also considered is the international influence that Bernini exerted on seventeenth- and eighteenth-century art.

114AA-ZZ. Special Topics in Seventeenth Century Southern European Art**(4) WITTMAN***Prerequisite: not open to freshmen.**May be repeated for credit to a maximum of 12 units provided letter designations are different.*

Special topics in Southern European art.

115B. Eighteenth Century Art: 1750 to 1810**(4) BERMINGHAM***Prerequisite: not open to freshmen.*

Painting, sculpture, and architecture in Europe from 1750 to 1810. Topics will change but may include art and the French Revolution and neoclassicism.

115C. Eighteenth Century British Art and Culture**(4) BERMINGHAM***Prerequisite: not open to freshmen.*

An interdisciplinary study of British art and culture in the eighteenth century. Topics may include: the art market and art public; portraiture and autobiography; images of the family; landscape gardening and poetry; sentimentalism; the Royal Academy and the ordering of the arts.

115D. Eighteenth-Century Art in Italy: The Age of the Grand Tour**(4) PAUL***Prerequisite: not open to freshmen.*

In the eighteenth-century Grand Tourists flocked to Italy to see the great works of the past, while contemporary art flourished. This course examines the works of artists such as Piranesi and Tiepolo, important building programs, and early public museums.

115E. The Grand Tour: Experiencing Italy in the Eighteenth Century**(4) PAUL***Prerequisite: Not open to Freshmen.*

In the eighteenth century Italy was a mecca for European travelers who sought to enjoy its culture, diversions, landscape, and society. This course will examine the multifaceted experiences of these travelers and the ways in which they constitute the beginnings of the phenomenon of modern tourism.

116AA-ZZ. Special Topics In Eighteenth Century Art**(4) WITTMAN***Prerequisite: not open to freshmen.**May be repeated for credit to a maximum of 12 units provided letter designations are different.*

Special topics in eighteenth century art.

117A. Nineteenth-Century Art: 1800-1848**(4) BERMINGHAM, SOLOMON-GODEAU, WITTMAN***Prerequisite: not open to freshmen.*

Painting, sculpture, and architecture in Europe. Topics will change, but may include art under Napoleon and Romanticism.

117B. Nineteenth-Century Art: 1848-1900**(4) BERMINGHAM, MONAHAN, SOLOMON-GODEAU, WITTMAN***Prerequisite: not open to freshmen.*

Painting, sculpture, and architecture in Europe. Topics will change, but may include art and the Industrial Revolution, Impressionism, and Post-Impressionism.

117C. Nineteenth-Century British Art and Culture**(4) BERMINGHAM***Prerequisite: not open to freshmen.*

An interdisciplinary study of British art and culture in the nineteenth century. Topics may include: romantic landscape painting and poetry; art and the industrial revolution; London and Victorian images of the city; images of childhood; romanticism in Britain; and more.

117D. Nineteenth Century French Art 1800-1900**(4) STAFF***Prerequisite: not open to freshmen.*

Leading painters from Ingres through Manet; the Academy; the rise of new graphic techniques and photography as art media and as popular imagery; interrelations of high and popular culture.

117E. Nineteenth Century German Art**(4) KELLER***Prerequisite: not open to freshmen.*

Survey of the major art movements in nineteenth century Germany, including Romanticism, Realism, Impressionism, Art Nouveau, and Symbolism. Special emphasis given to the historical and cultural context of German art, and its interaction with the international art scene.

117F. Impressionism and Post-Impressionism**(4) BERMINGHAM, MONAHAN, SOLOMON-GODEAU***Prerequisite: not open to freshmen.*

Impressionist and Post-Impressionist movement in France from 1863 through the first decade of the twentieth century and the advent of Cubism. Includes the work of Monet, Manet, Renoir, Pissarro, Van Gogh, Cezanne, Gauguin, and Seurat.

117G. Picasso**(4) WILLIAMS***Prerequisite: not open to freshmen.*

A survey of Picasso's life and works, with a critical consideration of his contribution to artistic modernism.

118AA-ZZ. Special Topics in Nineteenth-Century Art**(4) WITTMAN***Prerequisite: not open to freshmen.**May be repeated for credit to a maximum of 12 units provided letter designations are different.*

Special topics in nineteenth century art.

119A. Art in the Modern World**(4) MONAHAN***Prerequisite: upper-division standing.*

An examination of art of the last 100 years. Treats painting, architecture, and sculpture in a manner that emphasizes the social, economic, and cultural background.

119B. Contemporary Art**(4) MONAHAN, SOLOMON-GODEAU***Prerequisite: not open to freshmen.*

Study of recent artistic developments, from pop to contemporary movements in painting, sculpture, and photography. Movements studied include minimal art, postminimalism, process art, conceptual art,

earthworks, pluralism, neoexpressionism, and issues of postmodern art and criticism.

119C. Expressionism to New Objectivity: Early Twentieth Century German Art**(4) KELLER***Prerequisite: not open to freshmen.*

A survey of modernist art movements in Germany, beginning with the Expressionist phase around 1905 and concluding with the Bauhaus and New Objectivity phase up to 1933. Special emphasis on the historical and cultural context of German art, and its interaction with the international art scene.

119D. Art in the Post-Modern World**(4) MONAHAN***Prerequisite: Upper-division standing.*

An examination of the concepts of "Post-Modernism" in Euro-American visual arts, including painting, sculpture, architecture, graphic arts, and new experimental genres from the 1970's to the present.

119E. Early Twentieth Century European Art, 1900-1945**(4) MONAHAN***Prerequisite: not open to freshmen.*

Introduction to the major movements of European modern art in the first half of the twentieth century. This course critically addresses the formation of avant-garde groups and movements in relation to political and social issues.

119F. Art of the Post-War Period, 1945 -1968**(4) MONAHAN***Prerequisite: not open to freshmen.**Recommended preparation: Art History 119E.*

An examination of major artistic developments in Europe and the U.S. after the Second World War. Includes such movements as Abstract Expressionism, Neo-Dada, and Pop Art. Explores such artistic practices as performance art, feminist and conceptual art.

119G. Critical Approaches to Visual Culture**(4) MONAHAN***Prerequisites: a prior course in art history; not open to freshmen.**Recommended preparation: Art History 6C or any upper division modern course.*

Critical ways of approaching and understanding a wide range of visual materials and images (paintings, ads, videos, etc.). Analytic approaches to culture and representation are used as a means of developing descriptive and interpretive skills.

120AA-ZZ. Special Topics in Twentieth Century Modern Art**(4) STAFF***Prerequisite: not open to freshmen.**May be repeated for credit to a maximum of 12 units provided letter designations are different.*

Special topics in twentieth-century modern art.

121A. American Art From Revolution to Civil War: 1700-1860**(4) ROBERTSON***Prerequisite: not open to freshmen.*

Painting, sculpture, architecture and decorative arts in the original 13 colonies, through the formation of the United States, to the crisis of the Civil War. Particular attention paid to environmental and social issues.

121B. Reconstruction, Renaissance, and Realism in American Art: 1860-1900**(4) ROBERTSON***Prerequisite: not open to freshmen.*

Painting and human-made environments from the onset of the Civil War to just before World War II, tracing the role of art in the rise of modern, corporate America.

121C. Twentieth-Century American Art: Modernism and Pluralism, 1900-Present**(4) ROBERTSON***Prerequisite: not open to freshmen.*

American painting in the twentieth-century, from the advent of modernism to yesterday.

121D. African-American Art and the African Legacy**(4) OGBECHIE***Prerequisite: not open to freshmen.*

Examination of three centuries of African-American art in North America, the Caribbean, and Brazil, stressing the African Legacy. Colonial metalwork and pottery, folk or outsider genres, and mainstream nineteenth- and twentieth-century work are among traditions studied.

121E. American Things: Material Culture and Popular Art

(4) ROBERTSON

Prerequisite: not open to freshmen.

America has one of the greatest consumer cultures in history. Examine the range of objects produced, sold and consumed in this country, from colonial times to the present, from silverware to plastic, and everything in between.

121F. History of Native Art and Architecture of North America

(4) STAFF

Prerequisite: not open to freshmen

Survey of indigenous painting, sculpture, architecture, and other arts of North America as experienced through several major traditions. Principle emphasis on presentation of traditions as they developed and intermingled during the centuries before and through the early years of early European contact.

122AA-ZZ. Special Topics in Art of the Americas

(4) STAFF

Prerequisites: not open to freshmen.

Special topics in Art of the Americas.

123A. Modern Latin American Art

(4) FAVELA

Prerequisite: upper-division only.

A survey of modernism in Latin America from the 1850's to the 1950's. Examines the painting, sculpture, architecture and graphic arts of Latin American elites within their social-culture contexts.

123C. Modern Art of Mexico

(4) STAFF

Prerequisite: upper-division standing.

A general survey of the main developments of nineteenth- and early twentieth-century Mexican art in its social context. Particular attention is given to the Mexican mural renaissance and the works of Posada, Rivera, Siquieros, Orozco, Tamayo, and Frida Kahlo.

124AA-ZZ. Special Topics in Latin American Art

(4) STAFF

Prerequisite: upper-division standing.

May be repeated for credit to a maximum of 12 units provided letter designations are different.

Special topics in Latin American art.

- A. Modern Art of Brazil
- B. The Art of Cuba
- C. Colonial Art of Latin America
- D. Pop Art in Latin America
- E. Colonial Art of Mexico
- F. Contemporary Mexican Art
- G. The Mexican Mural Movement
- H. Mexican Photography
- I. Latin American Photography
- J. Art and Politics in Latin America
- K. Popular Art in Mexico and Latin America
- L. Diego Rivera and Frida Kahlo

125A. Chicano Art: Symbol and Meaning

(4) STAFF

Prerequisite: upper-division standing.

This iconography course traces the sources and historical development of symbols and forms that originated in the art of New Spain and Mexico and became crucial for the development of a contemporary Chicano art. Emphasis given to artistic conceptions of America and Aztlan by Mexican, Mexican American, and Chicano artists.

126AA-ZZ. Special Topics in Chicano Art

(4) STAFF

Prerequisite: upper-division standing.

May be repeated for credit to a maximum of 12 units provided letter designations are different.

Special topics in Chicano art.

127A. African Art I

(4) OGBECHIE

Prerequisite: not open to freshmen.

Recommended preparation: Art History 6E.

The relationship of art to life in sub-Saharan Africa. A cross-cultural survey of types, styles, history, and values of arts ranging from personal decoration to the state festival, stressing Ashanti, Ibe, Benin, Yoruba, Cameroon.

127B. African Art II

(4) STAFF

Prerequisite: not open to freshmen.

Recommended preparation: Art History 6E or 127A.

An in-depth continuation of Art History 127A in a seminar/discussion format. Selected topics in masking, figural sculpture, etc., and emphasis on African contexts of ritual and social life.

128AA-ZZ. Special Topics in African Art

(4) STAFF

Prerequisite: not open to freshmen.

May be repeated for credit to a maximum of 12 units provided letter designations are different.

Special topics in African art.

129A. Arts of the South Seas

(4) COLE

Prerequisite: not open to freshmen.

An introduction to masking, sculpture, festivals, body decoration, and architecture of Melanesia, Micronesia, and Polynesia, stressing the relationship of art to life.

130A. Pre-Columbian Art of Mexico

(4) PETERSON

Prerequisite: not open to freshmen.

The art and architecture of selected cultures of northern Mesoamerican (non-Maya) from circa 1200 B.C. to the Conquest with an emphasis on iconographical and historical problems.

130B. Pre-Columbian Art of the Maya

(4) PETERSON

Prerequisite: not open to freshmen.

Exploration of the arts of Maya-speaking cultures in southern Mesoamerica using archeological, epigraphic, and ethnographic data to help reconstruct Maya religion and civilization.

130C. The Arts of Spain and New Spain

(4) PETERSON

Prerequisite: not open to freshmen.

Beginning with the Islamic, Medieval and Renaissance arts of Spain, this course will chart their influence and transformation in the sixteenth and seventeenth century arts of the New World. Special emphasis on the creative interaction of the European and indigenous traditions in colonial arts of the Americas.

130D. Pre-Columbian Art of South America

(4) PETERSON

Prerequisite: not open to freshmen.

The architecture, sculpture, ceramics, textiles, and metalwork of the Andean civilizations from 3000 B.C. to A.D. 1532 examined within their archaeological and cultural contexts.

130E. Art and Empire in the Americas: Aztec, Inka, Spanish

(4) PETERSON

Prerequisite: not open to freshmen.

Two powerful empires in the Americas at conquest, the Aztecs and Inkas, controlled artistic production to sustain their hegemony. Comparison of how urban planning, sculpture, textiles, and murals functioned within political, economic, and religious spheres and the Spaniard's similar exploitation of visual culture to advance imperial objectives.

131AA-ZZ. Special Topics in Pre-Columbian/Colonial Art

(4) PETERSON

Prerequisite: not open to freshmen.

May be repeated for credit to a maximum of 12 units provided letter designations are different.

Special topics in Pre-Columbian/Colonial art.

132A. Mediterranean Cities

(4) KHOURY

Prerequisite: not open to freshmen.

An exploration of the most important medieval cities of the Mediterranean world, their urban forms,

layout, architecture, and physical patterns. Venice, Cairo, and Baghdad will be among the cities discussed.

132C. Architecture and Ideology from Constantine to Suleyman the Magnificent.

(4) KHOURY

Prerequisite: not open to freshmen.

Byzantine and Islamic architecture.

132D. Islamic Architecture 650-1400

(4) KHOURY

Prerequisite: not open to freshmen.

Islamic architecture between 650 and 1400 in its historical context.

132E. Islamic Architecture 1400-Modern

(4) KHOURY

Prerequisite: not open to freshmen. Not open for credit to students who have completed Art History 176B.

Islamic architecture, 1400-modern, in its historical context.

132G. Monuments of Power

(4) KHOURY

Prerequisite: not open to freshmen.

Historical documents and contemporary interpretations are used to explore the ways in which messages of dominance and power were embedded into Islamic monuments from the seventh century to modern times. A comparative, cross-cultural approach focusing on the power of architectural monuments in relation to the power to create architectural monuments.

132I. Art of Empire

(4) KHOURY, NUHA

Prerequisite: not open to freshmen.

Studies the visual culture of different empires, alone or in a comparative fashion. For example, Ottoman and Hapsburg; Ottoman, Safavid, and Mughal; Mughal and British India; or the earlier empire of the Fatimids, Abbasids, and Umayyads of Syria and Spain.

132J. Modern Art of the Arab World

(4) KHOURY

Prerequisite: not open to freshmen.

Recommended preparation: Art History 6K.

Explores modern and contemporary art, artists and art movements of the Arab world from nineteenth century to the present.

133AA-ZZ. Special Topics in Islamic Art

(4) KHOURY

Prerequisite: not open to freshmen.

May be repeated for credit to a maximum of 12 units provided letter designations are different.

Special topics in Islamic art.

134A. Buddhist Art

(4) STURMAN

Prerequisite: not open to freshmen.

A survey of select forms of Indian, Chinese, and Japanese Buddhist art with specific emphasis on Buddhist sculpture and Zen painting. Exploration of the correlation of religious values and art, as well as the transformation and adaptation of artistic traditions from one culture to another.

134B. Early Chinese Art

(4) STURMAN

Prerequisite: not open to freshmen.

Recommended preparation: Art History 6D.

A survey of the art and archaeology of ancient China, from Neolithic times through the Tang dynasty (A.D. 618-906). Emphasis on the development and transformation of pictorial traditions, leading to early painting theory and practice.

134C. Chinese Painting

(4) STURMAN

Prerequisite: not open to freshmen.

Recommended preparation: Art History 6D.

Chinese painting and theory, from the tenth through the eighteenth centuries. Introduction to major schools and masters in their cultural context. Problems of appreciation and connoisseurship.

134D. Art and Modern China

(4) STURMAN

Prerequisite: not open to freshmen.

Recommended preparation: Art History 6D.

An exploration of trends and issues in nineteenth and twentieth century Chinese art, as China awakens to and responds to the challenges of modernity and The West. Topics include the continuity of tradition, the exile identity, and trends after Tiananmen (1989).

134E. The Art of the Chinese Landscape
(4) STURMAN

Prerequisite: not open to freshmen.

Recommended preparation: Art History 6D.

Chinese approaches to landscape as subject matter in art, with a focus on painting and garden architecture. The course begins with the immortality cult in the Han Dynasty (206 B.C.–A.D.221) and ends with contemporary artists of the twentieth century.

134F. The Arts of Japan
(4) WATTLES

Prerequisite: not open to freshmen.

Recommended preparation: Art History 6D.

Native traditions and foreign influences in the development of Japanese architecture, sculpture, painting, and minor arts.

134G. Japanese Painting
(4) WATTLES

Prerequisite: not open to freshmen.

Recommended preparation: Art History 6D.

The changing and entwined traditions of Japanese painting: those rooted in native concepts and practices, and those from China.

134H. Ukiyo-e: Pictures of the Floating World
(4) WATTLES

Prerequisite: not open to freshmen.

Recommended preparation: Art History 6D.

Japanese paintings and wood-block prints of the sixteenth through twentieth centuries, with emphasis on cultural perspectives and Japanese popular culture.

135AA-ZZ. Special Topics in Asian Art
(4) STURMAN

Prerequisite: Art History 6DS or 6DW. Not open to freshmen.

Recommended Preparation: Art History 6D. May be repeated for credit to a maximum of 12 units provided letter designations are different.

Special topics in Asian art.

136A. Nineteenth-Century Architecture
(4) CHATTOPADHYAY

Prerequisite: not open to freshmen.

The history of architecture and planning beginning with eighteenth-century architectural trends in Europe and concluding with late-nineteenth century efforts to reform the city. Exploration of the culture of nineteenth-century modernity through architecture and urban design, centered around the themes of industrialization, colonialism, and the idea of landscape. The scope is global.

136B. Twentieth-Century Architecture
(4) CHATTOPADHYAY

Prerequisite: not open to freshmen.

The history of architecture from 1900 to the present. Examination of modern and post-modern architecture and city planning in its social, political, and artistic context. The scope is global.

136E. Modern Design
(4) ARMI

Prerequisite: upper-division standing.

A survey of twentieth-century commercial arts, including cars, fashion, furniture, graphic arts, industrial design, and architecture.

136H. Housing American Cultures
(4) CHATTOPADHYAY

Prerequisite: not open to freshmen.

The history of American domestic architecture from the colonial period to the present within a framework of cultural plurality. Examination of the relation between ideas of domesticity, residential design, individual, regional, and ethnic choices.

136I. The City in History
(4) CHATTOPADHYAY

Prerequisite: not open to freshmen.

An historical introduction to the ideas and forms of cities with emphasis on modern urbanism. Examination of social theory to understand the role of industrial capitalism and colonialism in shaping the culture of modern cities, the relationship between the

city and the country, the phenomena of class, race and ethnic separation.

136J. Landscape of Colonialism
(4) CHATTOPADHYAY

Prerequisite: not open to freshmen.

Examination of architecture, urbanism and the landscape of British and French colonialism between 1600 and 1950. Introduction to the different forms of colonialism, colonial ideology and the architecture of colonial encounter in North America, Asia, Africa and Australia.

136M. Revival Styles in Southern California Architecture
(4) WELTER

Prerequisite: not open to freshmen.

Examines the history of revival styles in Californian architecture from the eighteenth century to the present. While the focus is on Southern California, such comparative phenomena as National Romanticism in Western Architecture and Critical Regionalism are incorporated.

136O. "It's Not Easy Building Green"—History and Aesthetics of Sustainable Architecture
(4) WELTER

Prerequisite: not open to freshmen.

Examines history and theory of sustainable and "green" architecture since the early twentieth century. Emphasis is placed on the critical analysis of a distinct "green" architectural aesthetic; the scope is global.

136V. Modern Indian Visual Culture
(4) CHATTOPADHYAY, SARKAR

Prerequisite: Film Studies 46 or sophomore standing.

Same course as Film Studies 124V.

Introduction of twentieth-century visual culture in India, including painting, architecture, film, television, and graphic arts. Focuses on the themes of nationalism, modernity, and globalization, and the role of the "popular" in Indian visual culture.

136W. Introduction to 2D/3D Visualizations in Architecture
(4) STAFF

Prerequisite: upper-division standing; open to majors only.

Letter grade required. Same course as Art Studio 106W.

Develops skills in reading, interpreting, and visualizing in 3D objects and spaces by offering exercises in sketching, perspective, orthographic projections, isometric drawings, and manual rendering practices. Relevant for those interested in architecture and its history, sculpture, and such spatial practices as installations and public art.

136X. Culture of Architecture: Perception and Analysis of the Built Environment
(4) YEGUL

Prerequisite: not open to freshmen.

Introduces the student to a first-hand experience of the built-environment through perception and analysis of design; understanding historical, theoretical, technical and artistic structures that shape and sustain the culture of architecture.

136Y. Modern Architecture in Southern California, C. 1890s to the Present
(4) WELTER

Prerequisite: not open to freshmen.

Recommended preparation: Art History 5A and/or 6F.

Critically analyzes the changing definitions of modern architecture in Southern California from the 1890s to the present, focusing on the work of architects like Green and Greene, R.M. Schindler, and R. Neutra, as well as the Case Study Houses.

137AA-ZZ. Special Topics in Architecture
(4) STAFF

Prerequisite: not open to freshmen.

May be repeated for credit to a maximum of 12 units provided letter designations are different.

Special topics in architecture.

A. History of Landscape Gardens

138B. Contemporary Photography
(4) KELLER

Prerequisite: not open to freshmen.

American and European post-World War II photography considered as a living art form.

138C. Social Documentary Photography
(4) KELLER

Prerequisite: not open to freshmen.

The course traces the interrelationship between photographic art history and social history. Topics include American Indian tribes, metropolitan slums, Dust Bowl farm conditions, and present-day minorities such as Blacks and women.

138D. History of Photography
(4) KELLER

Prerequisite: not open to freshmen.

A critical survey of nineteenth- and twentieth-century photography, studied in cultural context with emphasis on images and the visions which produced them. Study of the relation between photography and art movements (impressionism, surrealism, photorealism, etc.).

138G. The Social Production of Art: Patrons, Dealers, Critics, Museums
(4) KELLER

Prerequisite: two prior upper-division courses in Art History.

In contrast to the usual focus on the artist's activity, this course explores the crucial contributions made to the production of art by agencies such as markets, museums, exhibitions, reproductions, criticism, patronship, advertisement, etc.

139AA-ZZ. Special Topics in Photographic History
(4) STAFF

Prerequisite: not open to freshmen.

May be repeated for credit to a maximum of 12 units provided letter designations are different.

Specialized classes exploring questions of methodology, as well as significant themes and major figures in the history of photography. Emphasis on intensive investigation of research issues as opposed to extensive period coverage.

140A. Portraiture
(4) ADAMS

Prerequisite: not open to freshmen.

Examination of the traditions and functions of portraiture. Themes may include the creation of the self; art and propaganda; the self-portrait and artistic identity.

140B. Landscape Painting and Design
(4) STAFF

Prerequisite: not open to freshmen.

An examination of the history and contexts of landscape painting. Themes will vary, but may include: landscape and ideology, work and recreation, urban and rural culture.

140E. Landscape Design History
(4) STAFF

Prerequisite: not open to freshmen.

May be repeated for credit to a maximum of 8 units.

Explore the significance of landscape design through social, political, and artistic influences and interpret "humanity's control over Nature" and how this affects our view of nature. Discover how and why landscape design canons were formed.

141A. Museum Practices and Techniques
(4) ROBERTSON, MEADOW

Prerequisites: not open to freshmen. Consent of instructor. Limited enrollment.

Discussion of various aspects of museum work: management principles, the cataloguing and care of art objects, exhibitions and acquisitions, administrative procedures, museum architecture. Specialist lecturers and visits of museums and their facilities.

141B. Internship
(1-4) STAFF

Prerequisites: not open to freshmen; consent of instructor and department.

Students must have a 3.0 grade-point average. May be repeated for credit to a maximum of 12 units (in Art History 141B, 141C, and 141E), but only 4 units count toward the major. Available PINP only.

Under supervision of art history faculty, students may obtain credit for work in a museum, gallery, or art

related business. One hour per week per unit (total 30 hours/unit) internship, plus weekly meetings and final evaluation session. Written report required.

141C. Visual Technologies Internship
(1-4) SPAFFORD

Prerequisites: upper-division standing; consent of instructor and department.

Students must have a 3.0 GPA. May be repeated for credit to a maximum of 12 units (in Art History 141B, 141C and 141E), but only 4 units count toward the major. Available PINP only.

An internship in the Visual Resource Collection to develop skills in the visual technologies relevant to art history teaching and research. Three hours per week per unit (total 30 hours/unit), plus weekly meetings and final evaluation session. Written report required.

141D. Birth of the Modern Museum
(4) PAUL

Prerequisite: not open to freshmen.

Course examines the emergence and development of museums of art in eighteenth-century Europe, tracing their origins to the private collections from which they evolved and studying the practices, such as tourism, that stimulated their growth.

141E. University Art Museum Internship
(1-4) STAFF

Prerequisites: not open to freshmen; consent of instructor and department.

Students must have a 3.0 GPA. May be repeated for credit to a maximum of 12 units (in Art History 141B, 141C and 141E), but only 4 units count toward the major.

Under supervision of art history faculty, students may obtain credit for work in the University Art Museum, three hours per week per unit (total 30 hours/unit) internship, plus weekly meetings and final evaluation session. Written report required.

143B. Feminism and Art History

(4) ADAMS, BERMINGHAM, MONAHAN, SOLOMON-GODEAU

Prerequisite: not open to freshmen.

Examination of both feminist critiques of Western representational practices and feminist interventions in art history. Topics to be determined by instructor.

143C. Gender and Representation

(4) ADAMS, BERMINGHAM, MONAHAN, SOLOMON-GODEAU

Prerequisite: not open to freshmen.

Focus on the construction of gender identities through high art and popular media. Topics will vary with instructor.

144A. The Avantgarde in Russia

(4) SPIEKER

Prerequisite: upper-division standing.

Same course as Slavic 144A. Not open for credit to students who have completed Russian 144A.

The Russian avantgarde in its European context. The avantgarde and the revolution of 1917. Analysis of key figures and movements within the Russian avantgarde. Taught in English.

144C. Contemporary Art in Russia and Eastern Europe

(4) SPIEKER

Prerequisite: upper-division standing.

Same course as Slavic 144C. Not open for credit to students who have completed Russian 144C.

Study of central intellectual and aesthetic trends in the late Soviet period and in contemporary post-Soviet Russia and Eastern Europe. Analysis of literary texts and the visual arts. Taught in English.

144D. Russian Art

(4) SPIEKER

Prerequisite: upper-division standing.

Same course as Slavic 118. Not open for credit to students who have completed Russian 118.

Introduction to Russian art and aesthetic theory from the beginning to the present. Readings and lectures in English.

145MC. The University: Microcosm of Knowledge

(4) MEADOW, ROBERTSON

Same course as Art History 45MC.

Introduces undergraduates to the university as a place of knowledge production through a combination

of lecture and hands-on field research. Topics include the history of universities and the change of disciplinary approaches to research, evidence, and knowledge.

147AA-ZZ. Special Topics in Theory

(4) STAFF

Prerequisite: not open to freshmen.

May be repeated for credit to a maximum of 12 units provided letter designations are different.

Special topics in theory.

150. Art Historical Methods and Writing

(4) STAFF

Prerequisite: upper-division standing; consent of department.

Art history's historiography and methods, and the development of writing skills for the art historian.

184B. The City of Rome: Image and Ideology

(4) PAUL

Prerequisite: upper-division standing.

The image and ideology of Rome as a cultural, political, and religious center as expressed in its art, architecture, and urban structure from antiquity to the present.

184C. The Palace and Villa in Early Modern Europe

(4) PAUL

Prerequisite: upper-division standing.

An examination of the ways in which the design and decoration of these building types relate to their functions as residences, museums, theatres of power, etc., and reflect particular ideologies. Works studies may or may not be regionally and chronologically delimited.

185AA-ZZ. Special Topics in Art History

(4) STAFF

Prerequisite: not open to freshmen.

May be repeated for credit to a maximum of 12 units provided letter designations are different.

Special topics in the history of art and architecture.

186A. Seminar in Ancient Greek Art

(4) STAFF

Prerequisite: upper-division standing.

May be repeated for credit to a maximum of 8 units with different topic.

Advanced studies in ancient Greek art. Topics will vary. This course requires weekly readings and discussion, and the writing of a research seminar paper.

186B. Seminar in Greek and Roman Archaeology/Architecture

(4) YEGÜL

Prerequisite: upper-division standing.

May be repeated for credit to a maximum of 8 units with different topic.

Advanced studies in Greek and Roman archaeology and architecture. Emphasis on classical heritage of Asia Minor (Turkey). Topics will vary. This course requires weekly readings and discussion, and the writing of a research seminar paper.

186C. Seminar in Medieval Art

(4) STAFF

Prerequisite: upper-division standing.

May be repeated for credit to a maximum of 8 units with different topic.

Advanced studies in medieval art. Topics will vary. This course requires weekly readings and discussion, and the writing of a research seminar paper.

186D. Seminar in Medieval Architecture

(4) ARMI

Prerequisite: upper-division standing.

May be repeated for credit to a maximum of 8 units with different topic.

Advanced studies in medieval architecture. Topics will vary. This course requires weekly readings and discussion, and the writing of a research seminar paper.

186E. Seminar in Fifteenth and Sixteenth Century Northern European Art

(4) MEADOW

Prerequisite: upper-division standing.

May be repeated for credit to a maximum of 8 units with different topic.

Advanced studies in fifteenth and sixteenth century

Northern European art. Topics will vary. This course requires weekly readings and discussion, and the writing of a research seminar paper.

186F. Seminar in Fifteenth and Sixteenth Century Southern Renaissance

(4) WILLIAMS

Prerequisite: upper-division standing.

May be repeated for credit to a maximum of 8 units with different topic.

Advanced studies in fifteenth and sixteenth century southern renaissance art. Topics will vary. This course requires weekly readings and discussion, and the writing of a research seminar paper.

186G. Seminar in Seventeenth Century Northern European Art

(4) ADAMS

Prerequisite: upper-division standing.

May be repeated for credit to a maximum of 8 units with different topic.

Advanced studies in seventeenth century Northern European visual culture. Topics will vary. This course requires weekly readings and discussion, and the writing of a research seminar paper.

186H. Seminar in Seventeenth Century Southern European Art

(4) STAFF

Prerequisite: upper-division standing.

May be repeated for credit to a maximum of 8 units with different topic.

Advanced studies in seventeenth century art. Topics will vary. This course requires weekly readings and discussion, and the writing of a research seminar paper.

186I. Seminar in Eighteenth Century Art

(4) BERMINGHAM

Prerequisite: upper-division standing.

May be repeated for credit to a maximum of 8 units with different topic.

Advanced studies in eighteenth century art. Topics will vary. This course requires weekly readings and discussion, and the writing of a research seminar paper.

186J. Seminar in Nineteenth Century Modern Art

(4) STAFF

Prerequisite: upper-division standing.

May be repeated for credit to a maximum of 8 units with different topic.

Advanced studies in nineteenth century modern art. Topics will vary. This course requires weekly readings and discussion, and the writing of a research seminar paper.

186K. Seminar in Twentieth Century Modern Art

(4) STAFF

Prerequisite: upper-division standing.

May be repeated for credit to a maximum of 8 units with different topic.

Advanced studies in twentieth century modern art. Topics will vary. This course requires weekly readings and discussion, and the writing of a research seminar paper.

186L. Seminar in Art of the Americas

(4) STAFF

Prerequisite: upper-division standing.

May be repeated for credit to a maximum of 8 units with different topic.

Advanced studies in the art of the Americas. Topics will vary. This course requires weekly readings and discussion, and the writing of a research seminar paper.

186M. Seminar: Problems in the History of Chicano Art

(4) STAFF

Prerequisite: upper-division standing.

May be repeated for credit to a maximum of 8 units with different topic.

Not open for credit to students who have completed Chicano Studies 195.

An examination of definitions of Chicano and Chicana art. Students conduct primary research and analyze the pluralistic facets of Chicana and Chicano art, artists, and art criticism within the context of mainstream American art, institutions, and culture.

186N. Seminar in African Art**(4) STAFF***Prerequisite: upper-division standing.**May be repeated for credit to a maximum of 8 units with different topic.*

Advanced studies in African art. Topics will vary. This course requires weekly readings and discussion, and the writing of a research seminar paper.

186O. Seminar in Latin American Art**(4) STAFF***Prerequisite: upper-division standing.**May be repeated for credit to a maximum of 8 units with different topic.*

Advanced studies in Latin American art. Topics will vary. This course requires weekly readings and discussion, and the writing of a research seminar paper.

186P. Seminar in Pre-Columbian/Colonial**(4) PETERSON***Prerequisite: upper-division standing.**May be repeated for credit to a maximum of 8 units with different topic.*

Advanced studies in pre-Columbian/colonial art. Topics will vary. This course requires weekly readings and discussion, and the writing of a research seminar paper.

186Q. Seminar in Islamic Art and Architecture**(4) KHOURY***Prerequisite: upper-division standing.**May be repeated for credit to a maximum of 8 units with different topic.*

Advanced studies in Islamic art and architecture. Topics will vary. This course requires weekly readings and discussion, and the writing of a research seminar paper.

186R. Seminar in Asian Art**(4) STURMAN, WATTLES***Prerequisite: upper-division standing.**May be repeated for credit to a maximum of 8 units with different topic.*

Advanced studies in Asian art. Topics will vary. This course requires weekly readings and discussion, and the writing of a research seminar paper.

186RS. Seminar in Chinese Art**(4) STURMAN***Prerequisite: upper-division standing.*

Advanced studies in Chinese art. Topics vary. Requires weekly readings and discussion, and the writing of a research seminar paper.

186RW. Seminar in Japanese Art**(4) WATTLES***Prerequisite: upper-division standing.*

Advanced studies in Japanese art. Topics vary. Requires weekly readings and discussion, and the writing of a research seminar paper.

186S. Seminar in Architectural History**(4) WITTMAN***Prerequisite: upper-division standing.**May be repeated for credit to a maximum of 8 units with different topic.*

Advanced studies in architectural history. Topics will vary. This course requires weekly readings and discussion, and the writing of a research seminar paper.

186T. Seminar in Photographic History**(4) KELLER***Prerequisite: upper-division standing.**May be repeated for credit to a maximum of 8 units with different topic.*

Advanced studies in photographic history. Topics will vary. This course requires weekly readings and discussion, and the writing of a research seminar paper.

186U. Seminar: Genres**(4) STAFF***Prerequisite: upper-division standing.**May be repeated for credit to a maximum of 8 units with different topic.*

Advanced studies in art historical genres. Topics will vary. This course requires weekly readings and discussion, and the writing of a research seminar paper.

186V. Seminar: Theory**(4) STAFF***Prerequisite: upper-division standing.**May be repeated for credit to a maximum of 8 units with different topic.*

Advanced studies in art theory. Topics will vary. This course requires weekly readings and discussion, and the writing of a research seminar paper.

186W. Seminar: Historiography**(4) STAFF***Prerequisite: upper-division standing.**May be repeated for credit to a maximum of 8 units with different topic.*

Advanced studies in historiography. Topics will vary. This course requires weekly readings and discussion, and the writing of a research seminar paper.

186X. Seminar in Modern Design**(4) ARMI***Prerequisite: upper-division standing.**May be repeated for credit to a maximum of 8 units with different topic.*

Industrial design, graphic arts, fashion and architecture in America after World War II. Students give oral reports and write a paper on a topic in the history of twentieth-century commercial design.

186Y. Seminar in Architecture and Environment**(4) WELTER***Prerequisite: upper-division standing.**May be repeated for credit to a maximum of 8 units.*

Advanced studies in architecture and environment. Topics vary including active archival research. The course requires weekly readings and discussions, and the writing of a research seminar paper.

186Z. Museology**(4) STAFF***Prerequisites: upper-division standing; art history majors only.**May be repeated for credit to a maximum of 12 units.*

Examines the institutional museum from historical and theoretical perspectives. Among issues explored in the seminar are museums and ritual, museums and citizenship, how museums shape visitors' experiences and museums as sites of ethnic, political and cultural contestation.

194S. Student Facilitated Group Studies Project**(1-5) STAFF***Prerequisites: upper-division standing; consent of instructor and department.**Students must have a cumulative 3.0 for the preceding 3 quarters.**Recommended preparation: two upper-division art history courses.*

Independent Art History research conducted under the guidance of Art History faculty. Topic and scope varies, to be specified by student and supervisory faculty member prior to registration.

198. Independent Readings in Art History**(1-5) STAFF***Prerequisite: consent of instructor.**Students must have a minimum 3.0 grade-point average for the preceding three quarters.**May be taken for a maximum of 5 units per quarter and can be repeated to a maximum of 12 units. Students are limited to 30 units total in all 98/99/198/199/199DC/199RA courses combined.*

Intended for students who know their own reading needs. Normally requires regular meetings with the instructor.

199. Independent Studies**(1-5) STAFF***Prerequisites: upper-division standing; completion of two upper-division courses in art history; consent of instructor and department.**Students must have a minimum 3.0 grade-point average for the preceding three quarters and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined.*

Advanced individual problems.

199RA. Undergraduate Research Assistant**(1-5) STAFF***Prerequisites: upper-division standing; completion of two upper-division courses in art history; consent of instructor and department.**Student must have a 3.0 cumulative grade-point average and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined.***GRADUATE COURSES****200A-B. Proseminar: Introduction to Art-Historical Methods****(4-4) STAFF***Prerequisites: graduate standing; open to Art History majors only.**Required of all first-year M.A. and Ph.D. students.* Introduction to art-historical methods, with emphasis on the historical development of current practices, critical theory, debates within the field, and cross-disciplinary dialogues.**251B. Seminar: Topics in African Arts in Context****(4) OGBECHE***Prerequisite: graduate standing.*

Special research in African art.

252B. Seminar: Topics in Roman Architecture and Urbanism**(4) YEGÜL***Prerequisite: graduate standing or senior art history majors with consent of instructor.*

Special research in Roman and late antique architecture.

253D. Seminar: Topics in Medieval Architecture**(4) ARMI, AYRES***Prerequisite: graduate standing.*

Special research in Romanesque and/or Gothic architecture.

253E. Seminar in Romanesque Architecture and Sculpture**(4) ARMI***Prerequisite: graduate standing.*

Seminar on major topics and problems in the monumental arts of the eleventh and twelfth centuries in Europe.

254. Seminar: Topics in Pre-Columbian/Colonial Latin American Art**(4) PETERSON***Prerequisite: graduate standing.*

Special research in pre-Columbian and colonial Latin American art topics.

255A. Seminar: Topics in Italian Renaissance Art**(4) WILLIAMS***Prerequisite: graduate standing.*

Special research in Renaissance art.

255D. Seminar: Topics in Early Modern Art in Northern Europe**(4) MEADOW***Prerequisite: graduate standing.*

Special research in northern Renaissance figurative arts of the fifteenth and/or sixteenth centuries.

257A. Seminar: Topics in Seventeenth-Century Art**(4) ADAMS***Prerequisite: graduate standing.*

Special topics in seventeenth-century art.

258A. Seminar: Topics in Eighteenth-Century Art**(4) BIRMINGHAM***Prerequisite: graduate standing.*

Special research in eighteenth-century art with special emphasis on painting and prints.

259A. Seminar: Topics in Nineteenth-Century European Art**(4) BIRMINGHAM, SOLOMON-GODEAU***Prerequisite: graduate standing.*

Special research in nineteenth-century art.

260D. Seminar: Topics in European Art of the Twentieth Century**(4) MONAHAN, SOLOMON-GODEAU***Prerequisite: graduate standing.*

Special research in twentieth-century art.

261A. Seminar: Topics in American Art

(4) ROBERTSON

Special research in American painting and sculpture, 1700 to 1950.

265. Seminar: Topics in Architectural History

(4) YEGÜL, CHATTOPADHYAY, WITTMAN

Prerequisite: graduate standing.

Special research in the history of architecture.

266. Seminar: Topics in Modern Architecture

(4) WITTMAN, YEGÜL

Prerequisite: graduate standing.

Special research on problems of nineteenth- and twentieth-century European or American architecture.

267. Topics in Architecture and Environment

(4) WELTER

Prerequisite: graduate standing.

Critically analyzes topics arising out of the interrelationship of architecture and the environment. Focus is on architectural historical, theoretical, and aesthetic issues.

268. Architectural Historical Surveys of Santa Barbara

(4) WELTER

Prerequisite: graduate standing.

Undertakes architectural historical surveys of selected buildings in Santa Barbara. Weekly sessions focus on research methodologies, evaluation of archival resources, analysis of historical sources, and the presentation of research results.

275B Seminar: Topics in Islamic Architecture

(4) KHOURY

Prerequisite: graduate standing.

Special research in Islamic architecture.

275E. Seminar: Topics in Islamic Art

(4) KHOURY

Prerequisite: graduate standing.

Special topics in Islamic art and/or architecture. Topics will vary.

275X. Advanced Readings in Arabic Texts

(1) KHOURY

Prerequisite: graduate standing.

Primary source-text readings to accompany graduate seminars Art History 275B and 275E.

282A. Seminar: Topics on East Asian Art

(4) STURMAN

Prerequisite: graduate standing.

Research on select problems on the arts of China, Japan, or Korea.

282B. Seminar: Topics of Japanese Art

(4) WATTLE

Prerequisite: graduate standing.

Special research on the art of Japan.

291B. Seminar: Topics in Gender and Representation

(4) ADAMS, BERMINGHAM, MONAHAN, SOLOMON-GODEAU

*Prerequisite: graduate standing.*Same course as *Women's Studies 291B*.

Course will focus on the construction of gender identities through high art and popular media, the construction of femininities and masculinities through images and the significance of gender as a basic representational category. Topics will vary.

292E. Seminar: Topics in Comparative Studies

(4) STAFF

Prerequisite: graduate standing.

Research seminar in comparative studies in art and architectural history. Issues and topics vary, but focus on methodological and epistemological implications of analysis across established geographical, national, cultural, and/or period boundaries.

294. Seminar in Museum Practices

(4) ROBERTSON, MEADOW

Prerequisite: graduate standing

May be repeated for credit.

Methods in museum practice. Content will vary according to museum program and art exhibition involved. (S)

295. Seminar: Advanced Readings in Art History

(4) STAFF

Prerequisites: graduate standing; consent of instructor; department approval.

Source readings for graduate students.

Independent reading and research in connection with an undergraduate lecture course.

296A. Theories of the Modern

(4) SPIEKER

*Prerequisite: graduate standing.*Same course as *German 270*.

Analysis of theories and critiques of modernism and modernity from Benjamin Adorno and Derrida, with special focus on the historical avantgarde.

296B. Seminar: Topics in Modern Art

(4) SPIEKER

Prerequisite: graduate standing.

Special topics in the history of modern art.

297. Seminar: Getty Consortium

(4) STAFF

Prerequisites: graduate standing; by application only.

Special graduate seminar offered at the Getty Research Institute in Los Angeles, involving faculty and graduate students from the five graduate programs in Art History of Visual Studies located in southern California.

500. Apprentice Teaching

(1-4) STAFF

Prerequisites: graduate standing; consent of instructor; department approval.

No unit credit allowed toward degree.

For teaching assistants, course includes directed readings, instruction in use of visual aids, pedagogical techniques, design of materials for discussion sections, and methodological analyses. Attendance at lectures in the course to which the teaching assistant is assigned is a requirement.

502. Graduate Symposium in Art History

(1-4) STAFF

Prerequisites: graduate standing; department approval.

No unit credit allowed toward degree.

Under the supervision of the graduate advisor and individual faculty advisors, directed study in presentation techniques, bibliographical and publication methods, and professional outreach.

550. Tools for Art Historical Research

(1-4) STAFF

Prerequisites: graduate standing; department approval.

No credit allowed toward degree.

Audit credit for courses in other departments needed to build a base for graduate research, or extra curricular work, such as museum internship.

595. Group Studies

(1-12) STAFF

Prerequisites: graduate standing; consent of instructor and department approval.

Informal reading and discussion.

596. Independent Study

(1-8) STAFF

Prerequisites: graduate standing; consent of instructor and department approval.

Individual tutorial. A written proposal must be approved by the department chair.

597. Reading for Examination

(1-12) STAFF

Prerequisites: graduate standing; consent of instructor and department approval.

Ph.D. students are limited to 12 units.

Preparation for terminal M.A. or for Ph.D. examinations.

598. Master's Thesis Preparation

(1-12) STAFF

Prerequisites: graduate standing; consent of instructor and department approval.

No credit allowed toward degree. For Plan I students only.

Master's Thesis research and preparation.

599. Ph.D. Dissertation Preparation

(1-12) STAFF

Prerequisites: graduate standing; consent of instructor and department approval.

Dissertation research and preparation.

Interdisciplinary Studies

**Interdisciplinary Studies
Office of Student Academic Affairs
College of Letters and Science
Cheadle Hall 1117****Telephone: (805) 893-2038****E-mail: rfletcher@lsc.ucsb.edu**

The major in interdisciplinary studies was created to provide a means for students to achieve particular intellectual goals that cannot be met by any existing major. Successful interdisciplinary studies majors are those that carry a coherent theme across a group of three or more departments—a theme that cannot easily be examined within a single major or double-major format. Students are urged to consult with a college advisor early in their academic careers for assistance in formulating their objectives within the major and in identifying the courses at UCSB which will best fulfill those goals.

Students wishing to enter the major must draw up a proposed program of study in three separate departments according to the requirements listed below. (At least one-half of the units required for the interdisciplinary studies major must be in departments that offer a departmental major in the college.) After approval by the chairs of the selected departments and review by a college advisor, the proposal is submitted to a college dean appointed by the executive committee of the College of Letters and Science, which has sole authority for approving admission to the major. The dean evaluates proposals according to a combination of the following criteria: (1) overall coherence and academic integrity of the proposed set of courses to be taken in each department; and (2) rationale for the choice of major departments, as explained in a statement of purpose submitted by the student. The program approved by the dean constitutes a contract and may be altered only by petition.

Applications for admission to the major are available in the college office, Cheadle Hall 1117. The entire process of admission—from first picking up application papers to final approval by the dean—can take several weeks. Interested students are advised, therefore, to begin the process by the beginning of their junior year. Applicants to this program are normally not admitted as freshmen. Admission to the major in the senior year is not encouraged and will be granted only in exceptional circumstances.

The interdisciplinary studies major does not exempt prospective teaching credential candidates from the California Subject Examinations for Teachers (CSET). Students interested in UCSB's credential requirements are urged to consult the Credential Services Office in the Gevirtz Graduate School of Education in Phelps Hall 2517 as soon as possible.

Students who intend to pursue graduate or professional studies are urged to consult advisors in their proposed fields to determine the prerequisites for admission to the desired graduate programs. The specific areas of em-

phasis within interdisciplinary studies will not be noted on student transcripts.

Undergraduate Program

Bachelor of Arts— Interdisciplinary Studies

Preparation for the major. A minimum number of lower-division courses as specified by each of the three selected departments must be completed. A list of the current requirements for each department may be obtained at department offices or the college office, Cheadle Hall 1117. At the time of application for the major, the student must have earned a grade-point average of at least 2.0 in each academic department making up the major. Interdisciplinary studies majors are required to complete all college and university degree requirements, including the General Education Program.

Upper-division major. Students must complete 56 upper-division units, selected from three departments in the College of Letters and Science, with at least 16 units in each department. The senior thesis or research project requirement is included in the 56 upper-division units. Some departments allow only a restricted number of their upper-division courses to be applied to this major. Students should ask at the office of prospective departments, or the college office, for a current list of courses that will be accepted for the interdisciplinary studies major. Upper-division courses which are accepted in transfer from other four-year colleges and universities will be accepted for major credit in appropriate departments only if they conform to courses approved for the major in that department. Different foreign languages are considered to be in different departments. Economics 109 and Mathematics 100A-B may be acceptable in the preparation for the major, but cannot be applied to the upper-division major. No more than 12 units of performance courses (Dance 149, Theater 149, Music Performance Laboratories, or equivalent transfer courses) can apply to the major, and no more than 4 units of such courses may be applied from any single department. Courses which are to be applied to the major may not be taken on a passed/not passed basis.

Senior thesis or research project requirement. As a means of tying together the various strands of their study in a coherent and academically significant fashion, interdisciplinary studies majors are required to complete at least one 4-unit course in one of the three selected departments as a senior thesis or research project. A list of suitable courses is available at department offices and the college office.

Interdisciplinary Courses

Interdisciplinary courses are either sponsored by the College of Letters and Science or by academic departments in the college. The courses present opportunities to study certain broad topics from perspectives which cross traditional departmental lines. Many of the courses are team taught, and all encourage examination of issues using a variety of different methodologies.

LOWER DIVISION

1. Introduction to Library Research

(1) STAFF

Available P/NP only.

Course designed to assist undergraduate students in learning how to use library resources effectively. Classwork emphasizes applied experience with finding and evaluating information, especially through use of library catalogs, journal indexes, and Internet resources.

15. General Computing Skills

(4) KOSELUK

Prerequisite: lower-division standing.

Introduction to the use of micro-computers in language and literature as well as general computer literacy for all students. Hands on lab instruction. Involves the major aspects of computing essential for university level work.

20. Introduction to the University Experience

(3) STAFF

Prerequisite: freshman standing.

Not open to students who have completed Sociology 10.

A course designed to introduce first year students to the university. Topics include: the university as a community of scholars, student sub-culture, student rights, university and community, university as policy, personal growth in college.

64. Career Development and Decision Making Theory and Practice

(2) STAFF

Prerequisite: freshman standing.

Provides an overview of theoretical constructs of career development and practical applications from college across the lifespan. Through lectures, readings, discussions, and projects, the course assists students in developing an effective life plan while exploring majors at college and career choices.

90M. Research and Professional Development for McNair Scholars

(2) SCHNEIDER, B

Prerequisite: Admission to McNair Scholars Program.

Introduction to research skills for faculty-mentored research projects for McNair Scholars in the sciences, humanities, and social sciences. Lectures, discussions, faculty visits and presentation of research in McNair Symposium are included. (M)

91. Interdisciplinary Issues in Aquatic Sciences and Policy

(1-5) POLNE-FULLER

Prerequisite: consent of instructor.

A seminar-style course examining biological, environmental, political, and economic issues in aquatic topics, including oceanography, marine pharmacology and biotechnology, coastal geology and coastal processes, fisheries, and ocean policy.

92B. Introduction to Shoreline Preservation: Research and Writing

(2-4) POLNE-FULLER

May be repeated for credit to a maximum of 8 units.

Familiarize students with the conventions of scientific research and writing. Students interact with researchers studying shoreline preservation and environmental issues. Weekly lectures, discussions, lab experiences or field trips are included.

93LS. Introduction to Research in the Social, Life, and Physical Sciences

(1-5) POLNE-FULLER

Prerequisite: consent of instructor.

Introduction to college level research experiences in the social, life or physical sciences. Students participate in research in UCSB laboratories and learn to use tools and techniques in an organized laboratory class setting.

93S. Readings and Lectures in the Social, Life, and Physical Sciences

(4) POLNE-FULLER

Prerequisite: consent of instructor.

Introductory course for students interested in research in the social, life or physical sciences. Students read papers written by and about recent research at UCSB and meet with researchers to discuss

their research tools and concepts.

94AA-ZZ. Freshman Seminars

(1) STAFF

Prerequisite: freshman standing.

Students may earn a maximum of 3 units from all INT 99AA-ZZ courses. No seminars with the same suffix (AA-ZZ) may be repeated.

Selected topics of interest to students pursuing various degrees in the College of Letters and Science. Small group discussions which emphasize active class participation. Topics will vary each quarter.

95. The Modern Research University: Pathways to Discovery and Creativity

(1) GALLUCI

Prerequisite: freshman standing.

Introduces students to the nature of research in the various disciplines represented at UCSB through weekly lectures by faculty artists, engineers, humanists, scientists, and social scientists who speak about their creative or scholarly research projects.

UPPER DIVISION

100AA-ZZ. Topics in Advanced Library Research

(2) STAFF

Prerequisite: not open to freshmen.

May be repeated for credit provided the letter designation is different.

Recommended preparation: Interdisciplinary 1.

Students critically examine the complex range of research tools within a specified area. Students should be concurrently enrolled in a course with a related research project requirement. Course focus is determined by the instructor and announced by the library.

150. Voices of the Stranger

(4) STAFF

Portrayals and analyses of the diversity of ethnic, racial, cultural, and religious experience in the United States in the contemporary era.

180AA-ZZ. Special Topics at Washington Center

(4) STAFF

Prerequisites: upper-division standing; consent of instructor; acceptance to Washington Center.

Courses offered to exploit special opportunities available at the Washington Center. Subject and topics vary.

184AA-ZZ. Honors Forum: Special Topics

(2-4) STAFF

Prerequisites: upper-division standing; enrollment in Letters and Science Honors Program.

May be repeated for credit to a maximum 16 units provided letter designations are different.

An interdisciplinary approach to topics of national and world concerns. Readings will be assigned from several disciplinary perspectives.

185AA-ZZ. Interdisciplinary Humanities Seminar

(1-4) STAFF

Prerequisite: upper-division standing.

May be repeated for credit to a maximum 16 units provided letter designations are different.

Seminar hosted by the Interdisciplinary Humanities Center (IHC) and focused on selected topics, texts, theories, and/or methods in the humanities. See IHC Web site (www.ihc.ucsb.edu) for current listings.

190MA. Junior Seminar for McNair Scholars

(1) SCHNEIDER, B

Prerequisite: Admission to McNair Scholars Program; junior standing.

Repeat Comments: Course can be taken in fall, winter, spring of junior year for a maximum of three units.

Development of proposals for research in collaboration with faculty and McNair staff. Group discussion of research approaches, post-baccalaureate career preparation, and planning for entrance to doctoral study.

190MB. Senior Seminar for McNair Scholars

(2) SCHNEIDER, B

Prerequisite: Admission to McNair Scholars Program;

senior standing.

Repeat Comments: Course can be taken in fall, winter, and spring of senior year for a maximum of 6.0 units.

Students gain familiarity with the key elements of the graduate school application process, apply to selected graduate schools, engage in collaborative reading and writing, and prepare research for presentation at academic and professional meetings. (F, W, S)

192B. Introduction to Shoreline Preservation: Research and Writing

(2-4) POLNE-FULLER

May be repeated for credit to a maximum of 8 units.

Familiarize students with the conventions of scientific research and writing. Students interact with researchers studying shoreline preservation and environmental issues. Weekly lectures, discussions, lab experiences or field trips are included.

192DC. Washington Center Internship

(4-8) STAFF

Prerequisites: upper-division standing; consent of instructor; acceptance to Washington Center.

Courses designed for students to obtain credit for internship while at the Washington Center.

192SA. Sacramento Center Internship

(4-8) STAFF

Prerequisites: upper-division standing; consent of instructor; acceptance to Sacramento Center.

May be repeated for credit to a maximum of 8 units.

Courses designed for students to obtain credit for internship while at the UC Sacramento Center.

193SA. Seminar in California Issues

(4) STAFF

Prerequisites: upper-division standing; consent of instructor; acceptance to Sacramento Center.

May be repeated for credit to a maximum of 8 units.

Intensive study of important issues in contemporary and historical California. Topics vary by quarter.

199DC. Independent Research at Washington Center

(4) STAFF

Prerequisites: upper-division standing; consent of instructor; acceptance to Washington Center.

May be repeated for credit to a maximum of 8 units. Students are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined.

Independent research for those enrolled in the Washington Center. Enrolled students complete a research project related to the students' internship and drawing on the special resources of the Washington area.

199SA. Independent Research at Sacramento Center

(4) STAFF

Prerequisites: upper-division standing; consent of instructor; acceptance to Sacramento Center.

May be repeated for credit to a maximum of 8 units. Students are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined.

Independent research for those enrolled in the UC Sacramento Center. Enrolled students complete a research project related to the students' internship and drawing on the special resources of the Sacramento area.

GRADUATE COURSES

200A-B-C. Seminar in Cognitive Science

(2-2-2) STAFF

Prerequisites: graduate standing; consent of instructor.

- A. Overview and introduction to topics in cognitive science.
- B. Colloquium speakers in cognitive science.
- C. Student presentations in cognitive science.

201AA-ZZ. Graduate Humanities Seminar

(4) STAFF

Prerequisite: graduate standing.

Graduate seminar hosted by the Interdisciplinary

Humanities Center (IHC) on topics, texts, theories, and methods in the humanities. See the IHC Web site for current listings (www.ihc.ucsb.edu).

210. IGERT Seminar in Interactive Digital Multimedia

(2) MANJUNATH

Prerequisites: graduate standing; consent of instructor.

Presentations by faculty, students, and visiting lecturers on topics related to interactive digital multimedia.

223A. Educational Hypermedia and Multimedia

(4) CHUN

Prerequisite: graduate standing.

Examination of educational rationales for the design of hypermedia applications. Students evaluate existing programs and apply principles of learning with media to the development of their own projects using tools to acquire and manipulate text, images, sound, and video.

223B. Educational Hypermedia and Multimedia

(4) CHUN

Prerequisite: graduate standing.

Continuation of Interdisciplinary 223A. Further investigation of teaching and learning with media, design of hypermedia applications, and evaluation of their usability and effectiveness.

223C. Technology and Second Language Acquisition

(4) CHUN

Examines research on the theory and practice of using digital media and the Internet for teaching and learning second languages and cultures; discusses principles for the design and development of multimedia courseware.

256. Interdisciplinary Collaborative Project

(4) STAFF

Same course as MAT 256.

A team-taught course with goals to foster engineering-level research in conjunction with the experimental approach of the visual arts. Course consists of team-based production for the realization of a multimedia project. Emphasis of the course is to develop skills in interdisciplinary production, concept development and problem solving methodologies.

259. The Aesthetics of Algorithmic Visualizations

(4) LEGRADY

Same course as MAT 259.

Project-based course focused on aesthetics of algorithmic visualization. An overview of designing still and time-based visualizations with historical and contemporary perspectives resulting in large scale prints, digital video, or computer generated realtime visualization. Emphasis on implementation of algorithmic expressions.

262A. Applied Linguistics

(4) CHUN

Prerequisite: graduate standing.

Same course as German 262A.

Overview of the basic theoretical principles of second language acquisition as they apply to language teaching and learning. Discussion of different methodologies of foreign language teaching and the history of those used in the U.S.; special emphasis on current methodologies.

262B. Second Language Acquisition

(4) CHUN

Prerequisite: graduate standing.

Same course as German 262B.

Overview of second language acquisition theories from a range of perspectives (e.g., psychology, linguistics, cognitive science, sociology). Focus on adult SLA including role of the native language, universal grammar, acquisition vs. learning, interlanguage, input and interaction, learner processes and strategies.

420. Grant Writing for the Humanities, Fine Arts & Social Sciences

(2) UNRUH, WALKER

Prerequisite: graduate standing.

The fundamentals of grant writing for arts, humanities and social science students. Learn and

practice techniques with IHC staff for identifying funding sources and writing successful proposals. Students produce a working application for funding their dissertation. (W)

592. Research Seminar in Human Development

(1) STAFF

Prerequisite: acceptance to Interdisciplinary Development Program; graduate standing; consent of instructor.

Special interest group research seminar in human development.

594AA-ZZ. Directed Reading and Research

(1-4) STAFF

Prerequisites: graduate standing; consent of instructor.

In-depth consideration of interdisciplinary humanistic topics, issues, and concerns through tutorial format. Students may affiliate with Interdisciplinary Humanities Center's Research Focus Groups (www.ihc.ucsb.edu/research).

Barbara Voorhies, Ph.D. (Anthropology)

The Program in Latin American and Iberian Studies offers interdisciplinary training leading to the bachelor of arts and master of arts degrees. The undergraduate program is designed for students broadly interested in the following areas: culture and art, professional careers in business or government, teaching professions in fields such as language or social science, and further academic study of Latin America, Spain, or Portugal.

Latin American and Iberian studies may be taken as part of a double major in combination with another discipline such as global studies, history, anthropology, or economics, subject to an 8-unit limit on overlapping upper-division courses.

Students are encouraged to study abroad in Brazil, Chile, Costa Rica, Mexico, Portugal, or Spain through the university's Education Abroad Program. Transfer credit may be given for study at other universities in Latin America, Spain, or Portugal.

Subject to prior approval by the advisory committee, students may receive academic credit for an internship in an international or development agency or other relevant employment. The internship will be done in conjunction with an independent study course supervised by a faculty member.

Honors Program

Seniors who have maintained a 3.6 grade-point average in courses in the major are eligible for the honors program. With approval of the director, students will select an advisor who will direct the project. In two quarters, the student will pursue research and writing on a topic of importance and complexity, resulting in an honors thesis.

Students with a bachelor's degree in Latin American and Iberian studies who are interested in pursuing a California Teaching Credential should contact the credential advisor in the Graduate School of Education as soon as possible.

Latin American and Iberian Studies Annual Lecture

The advisory committee sponsors an annual lecture by a distinguished visiting lecturer.

Undergraduate Program

Bachelor of Arts—Latin American and Iberian Studies

Preparation for the major. Spanish 6, or Portuguese 6, or a written translation test from Spanish or Portuguese into English. Native-speaking knowledge of the language or credit in courses

taken elsewhere demanding a comparable level of proficiency will be considered equivalent. LAIS10 or History 8 is a requirement in preparation for the major.

Upper-division major. A minimum of 40 units, including Latin American and Iberian Studies 100, 101 or 102 (4 units), at least 16 upper-division units in one of the four areas below, and the other 20 to be distributed among the other three areas, with a minimum of one course in each area.

The program is offering LAIS 101 (counts towards area 1 or area 3), LAIS 102 (counts towards area 2 or area 4), and LAIS 194AA-ZZ (counts towards area 1 or area 4).

Area 1: Social Sciences

Anthropology 102A, 102B, 104H, 122, 129MG, 130A-B-C, 133, 134, 135, 137, 139MG, 141, 146, 149, 150A-B-C, 163, 164, 184, 185, 194, 197; Black Studies 191AA-ZZ; Chicana/o Studies 117, 120, 132, 133, 134, 135, 138, 139, 140, 141, 142, 144, 150, 153, 154F, 160, 170A-B, 171, 172, 174, 176, 177, 178A, 189; Economics 114, 180, 181; Education 124; Environmental Studies 122NE, 130A-B-C; LAIS 101, 194AA-ZZ; Geography 155; Interdisciplinary 100LA; Linguistics 130, 175; Political Science 101, 105, 106, 109, 134, 147, 148A, 174; Portuguese 125A; Religious Studies 124, 126, 191A; Sociology 128, 130, 130GR, 130SW, 130LA, 134LA, 134R, 144, 155W, 156AB, 166W; Spanish 119A-B, 176, 177, 178.

Area 2: Music, Art, Film and Drama

Chicana/o Studies 119, 125B, 146, 147, 148, 149, 184C, 185, 186A-B, 188C, 189B; Dramatic Art 155D-E, 167, Film Studies 122CU, 122LA, 122MX, 126, 127, 161, 187RC, 190TN; LAIS 102, 194AA-ZZ; History of Art and Architecture 123A-B-C, 124AA-ZZ, 125A-B, 126AA-ZZ, 130A-B-C-D-E, 131AA-ZZ, 186L, 186M, 186O, 186P; Portuguese 128AA-ZZ; Spanish 126, 158, 159A-B, 174.

Area 3: History

Chicana/o Studies 167, 168A-B-E-I-L-P-R-S, 184C, 191HR; History 151A-B-C-I-P, 151FQ, 153, 153L-P, 154 Q, 154LA-LB, 155A-B-E-P, 156A-B, 156I, 156P, 156Q, 156R, 157A-B-P, 168A-B-E-P-I-L-LA-LB-R; LAIS 101, Religious Studies 124R.

Area 4: Literature and Language

Black Studies 130A, Chicana/o Studies 137, 180, 181, 183, 184A-B; English 134CH; LAIS 102, 194AA-ZZ; Portuguese 102A-B, 105A-B-C, 106A-B-C, 115, 120AA-ZZ, 125A-B, 180, 183AA-ZZ, 184AA-ZZ, 185; Spanish 100, 101, 102A-B-C-L, 107, 109, 110A-B-C-D, 111A-B-C, 114A-B, 115B, 116, 119A-B, 120A-B, 121, 122A-B, 123A, 125, 130, 131, 132, 135, 136, 137A-B, 138, 139, 140A-B, 142A-B, 151A, 153, 154A-B, 156, 162, 175, 176, 177, 179, 181, 183AA-ZZ, 185, 186AA-ZZ, 187A-B, 188, 190, 194.

Minor—Latin American and Iberian Studies

All courses to be applied to the minor must be completed on a letter-grade basis, including both courses offered in Latin American and Iberian studies and those offered by other departments and applied to the minor.

Preparation for the minor. Spanish 6 or Portuguese 6 or the equivalent* (0-4 units) or a written translation test from Spanish or Portuguese into English; LAIS 10 or History 8 (4 units).

* *Equivalents are defined as native-speaking knowledge of one of these languages or credit in courses demanding a comparable level of proficiency.*

Upper-division minor: Twenty-four upper-division units, distributed as follows:

- A. Latin American and Iberian Studies 100, 101 or 102 (4 units)
- B. Twenty upper-division units with at least one course in each of the following:

Area 1: Social Sciences

Anthropology 102A, 102B, 104H, 122, 129MG, 130A-B-C, 133, 134, 135, 137, 139MG, 141, 146, 149, 150A-B-C, 163, 164, 184, 185, 194, 197; Black Studies 191AA-ZZ; Chicana/o Studies 117, 120, 132, 133, 134, 135, 138, 139, 140, 141, 142, 144, 150, 153, 154F, 160, 170A-B, 171, 172, 174, 176, 177, 178A, 189; Economics 114, 180, 181; Education 124; Environmental Studies 122NE, 130A-B-C; Geography 155; Interdisciplinary 100LA; Latin American and Iberian Studies 101, 194AA-ZZ, Linguistics 130, 175; Political Science 101, 105, 106, 109, 134, 147, 148A, 174; Portuguese 125A; Religious Studies 124, 126, 191A; Sociology 128, 130, 130GR, 130LA, 130SW, 134LA, 134R, 144, 155W, 156AB, 166W; Spanish 119A-B, 176, 177, 178.

Area 2: Music, Art, Film, and Drama

Chicana/o Studies 119, 125B, 146, 147, 148, 149, 184C, 185, 186A-B, 188C, 189B; Dramatic Art 155D-E, 167; Film Studies 122CU, 122LA, 122MX, 126, 127, 161, 187RC, 190TN; History of Art and Architecture 123A-B-C, 124AA-ZZ, 125A-B, 126AA-ZZ, 130A-B-C-D-E, 131AA-ZZ, 186L, 186M, 186O, 186P; Latin American and Iberian Studies 102, 194AA-ZZ; Portuguese 128AA-ZZ; Spanish 126, 158, 159A-B, 174.

Area 3: History

Chicana/o Studies 167, 168A-B-E, 191HR; History 151A-B-C-I-P, 151FQ, 153, 153L-P, 154Q, 154LA-LB, 155A-B-E-P, 156A-B-P, 156I, 156Q, 156R, 157A-B-P, History 168A-B-E-P, 168I-L-LA-LB-R; Interdisciplinary 100LA; Latin American and Iberian Studies 101; Religious Studies 124R.

Area 4: Literature and Language

Black Studies 130A, Chicana/o Studies 137, 180, 181, 183, 184A-B; English 134CH; Latin American and Iberian Studies 102, 194AA-ZZ; Portuguese 102A-B, 105A-B-C, 106A-B-C, 115, 120AA-ZZ, 125A-B, 180, 183AA-ZZ, 184AA-ZZ, 185, Spanish 100, 101, 102A-B-C-L, 107, 109, 110A-B-C-D, 111A-B-C, 114A-B, 115B, 116, 119A-B, 120A-B, 121, 122A-B, 123A, 125, 130, 131, 132, 135, 136, 137A-B, 138, 139, 140A-B, 142A-B, 151A, 153, 154A-B, 156, 162, 175, 176, 177, 179, 181, 183AA-ZZ, 185, 186AA-ZZ, 187A-B, 188, 190, 194.

Note: Substitutions and waivers are subject to approval by the chair of the department. Please see page 118 for special conditions governing minors in the College of Letters and Science.

Graduate Program

In addition to program requirements, candidates for graduate degrees must fulfill the

university degree requirements found in the chapter "Graduate Education at UCSB."

Master of Arts—Latin American and Iberian Studies

The M.A. in Latin American and Iberian Studies is designed for students wishing to pursue an interdisciplinary degree at the graduate level. Although there is no doctoral program in Latin American and Iberian Studies, many successful graduates of the M.A. program pursue doctoral study in traditional academic departments such as anthropology, economics, history, literature, or political science, or enter professional schools to study business administration, education, law, or public health. The broad, interdisciplinary nature of the program allows students a great deal of scope to define and develop special interests.

Admission

In addition to program requirements for admission, applicants must also meet the university requirements for admission described in the chapter "Graduate Education at UCSB." Completion of the undergraduate major in Latin American and Iberian Studies is desirable but not necessary. Undergraduate deficiencies as stipulated by the Latin American and Iberian Studies graduate committee must be remedied within the first year and do not count toward the minimum course requirements for completion of the M.A.

Language Requirement

A strong reading knowledge of Spanish or Portuguese is required. The student must show proficiency in either language through courses taken or through a reading examination. It is expected that the candidate will satisfy this requirement during the first quarter of the graduate program. In no case may a student submit a thesis until the foreign language requirement has been met.

Degree Requirements

Students will plan their programs with an advisor and with the approval of the director.

All graduate students are required to take Latin American and Iberian Studies 200, LAIS 201 or LAIS 202.

At least 32 units of upper-division and graduate coursework in Latin American and Iberian Studies plus a thesis (6 additional units, Latin American and Iberian Studies 598) are required. The 32 units must include no fewer than 20 units of graduate courses numbered between 200 and 299 or 596, with a maximum of 8 units of 596 coursework being eligible to count toward the master's degree. The distribution of units should be 16 units in the major area of concentration, 8 units in the second area of concentration, and the remaining 8 units from two other areas. Students must carefully prepare a proposal, including provisions for funding of any field research. The thesis proposal must be approved by a thesis committee. The final draft of the thesis itself must be approved by that committee, and by the director of Latin American and Iberian Studies.

A grade of B or better is required for each course to count toward the master's degree. Additionally, graduate students will meet with

the faculty graduate advisor for advising by the third week of each quarter to review their course plans and progress toward the degree.

Graduate Courses in the M.A. Program

Anthropology 218, 225; Chicano Studies 250B-C, 251A-B, 252A-B-C, 255A-B, 270, 273, 274A-B; Dramatic Art 273A-B-C, Economics 214A, 280A-B; Education 270A-D-H, 274; Film and Media Studies 226, 256, 263; History 200LA, 201LA, 201LI, 251A-B, 253A-B, 268A-B; Geography 255; History 256; History of Art and Architecture 254, 254D, 262C; Latin American and Iberian Studies 200 (proseminar), 201, 202; LAIS 294AA-ZZ; Political Science 236, 282A-B-C; Portuguese 205A-B-C, 206A-B, 222, 283, 294A-B, 295A-B; Religious Studies 238; Sociology 214B, 265, 265G, 265GS, 265LA; Spanish 200, 207, 210A-B-C, 211A-B-C, 212A-B, 213, 218, 222A-B, 240A-B, 245, 260, 283, 285, 294A-B, 295A-B, 296A-B, 297.

Latin American and Iberian Studies Courses

LOWER DIVISION

10. Introduction to the Latin American and Iberian World

(4) STAFF

Introduction to issues debates, and approaches in the study of Latin America, Spain and Portugal, and the Latino world, from an interdisciplinary perspective. Topics considered include history, culture, society, and literature from various places and times.

UPPER DIVISION

100. Introduction to Latin American and Iberian Studies

(4) STAFF

Prerequisite: upper-division standing.

Required for all majors and minors in the program.

Designed to acquaint students with current research on the main areas of Latin American and Iberian studies.

100H. Introduction to Research In Latin American and Iberian Studies—Honors Section

(1) STAFF

Prerequisites: concurrent enrollment in LAIS 100; honors standing in LAIS or the College of Letters and Science.

Eligible students are invited to enroll in the honors seminar which is generally taught by the course instructor.

101. Interdisciplinary Approaches to the History and Societies of Latin America and Iberia

(4) STAFF

Prerequisite: upper-division standing.

Issues central to the study of Latin America and Iberia across the social sciences and history. Topics may include nationalism, revolution, politics and the state, economic development and international relations, labor, popular culture, race, gender, religion, migration, environment, imperialism, and colonialism.

102. Interdisciplinary Approaches to the Cultures, Languages, and Literatures of Latin America and Iberia

(4) STAFF

Prerequisite: upper-division standing.

Issues pertinent to the diverse cultures, languages, and literatures of Latin America and Iberia. Disciplines and approaches may include: pre-Columbian studies;

Spanish and Spanish American literatures; Portuguese and Brazilian literatures; translation studies; cultural, gender, and queer studies; Romance language and linguistics.

194AA-ZZ. Special Topics in Latin American and Iberian Studies

(4) STAFF

Prerequisite: upper-division standing.

May be repeated for credit to a maximum of 20 units provided letter designations are different, but only 12 units may be applied toward the major.

Special topics in an area of faculty expertise. Specific course titles to be announced by the program each quarter. May be offered in English, Spanish, or Portuguese. See LAIS program office for information.

195A-B. Senior Honors Thesis

(4-4) STAFF

Prerequisites: admission to honors program; consent of department.

Students must have a 3.6 grade-point average for courses in Latin American and Iberian studies. A two-quarter in-progress sequence course with grades for all quarters issued upon completion of Latin American and Iberian studies 195B.

Individual study with the advisor for the purpose of writing a major interdisciplinary research paper on a topic of sufficient depth and sophistication.

195G. Senior Honors Thesis Group Studies

(4) STAFF

Prerequisites: admission to honors program; consent of department.

Students must have a 3.6 grade-point average for courses in Latin American and Iberian studies.

Students learn the mechanics of formulating a research problem, choose a faculty advisor, and submit a project proposal.

196. Internship

(2-8) STAFF

Prerequisites: upper-division standing; consent of program chair.

Students must have a 3.0 grade-point average.

Course enables students to obtain credit for Latin American- or Iberian- related internship experience.

199. Independent Studies

(1-5) STAFF

Prerequisites: upper-division standing; completion of two upper-division courses in Latin American & Iberian Studies.

Students must have a minimum 3.0 grade-point average for the preceding three quarters and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined. May be repeated for credit to a maximum of 8 units.

The description of any one 199 must not be identical to any existing course description.

GRADUATE COURSES

200. Introduction to Latin American and Iberian Studies 200

(4) STAFF

Required for all graduate students in the program.

Designed to acquaint students with current research on the main areas of Latin American and Iberian studies as well as the faculty associated with the program.

201. Interdisciplinary Approaches to the History and Societies of Latin America and Iberia

(4) STAFF

Prerequisite: graduate standing.

Issues central to the study of Latin America and Iberia across the social sciences and history. Topics may include nationalism, revolution, politics and the state, economic development and international relations, labor, popular culture, race, gender, religion, migration, environment, imperialism, and colonialism.

202. Interdisciplinary Approaches to the Cultures, Languages, and Literatures of Latin America and Iberia

(4) STAFF

Prerequisite: graduate standing.

Issues pertinent to the diverse cultures, languages, and literatures of Latin America and Iberia; disciplines

and approaches may include pre-Columbian studies; Spanish and Spanish American literatures; Portuguese and Brazilian literatures; translation studies; cultural, gender, and queer studies; Romance language and linguistics.

294AA-ZZ. Special Topics in Latin American and Iberian Studies

(4) STAFF

Seminars or lectures on special topics in an area of faculty expertise. May be offered in English, Spanish, or Portuguese. Specific course titles to be announced by the program each quarter.

590. Teaching Assistant Practicum

(4) STAFF

Prerequisite: TA appointment.

Units earned do not apply toward completion of advanced degrees. SJU grading only. Required of TAs in LAIS. Participation in occasional workshops related to the field of teaching is required.

Supervised teaching of LAIS discussion sessions at UCSB.

596. Directed Reading and Research

(2-4) STAFF

Prerequisite: graduate standing

Individual independent study which could include work with the Education Abroad Program. A written proposal for each tutorial must be approved by student's program advisor and by the department chair. The number of units that a student may take depends on the nature of the program and the consent of the advisor or the graduate committee.

598. Master's Thesis Research and Preparation

(1-6) STAFF

Prerequisites: fulfillment of all graduate requirements except the thesis.

Only for research and writing of the thesis, under the direction of a faculty member in the program and with the approval of the chair.

Jacqueline Stevens, Ph.D. (Law and Society)

Juliet Williams, Ph.D. (Law and Society, Women's Studies)

Howard Winant, Ph.D. (Sociology)

The Law and Society major integrates various disciplinary perspectives to understand the nature of law and legal institutions in their social contexts. The program is designed to provide a rigorous liberal arts education and to prepare students for graduate studies or law school.

The Law and Society undergraduate advisor is available on a regular basis to assist students with questions related to all academic matters, including the honors program.

Graduates of the Law and Society Program have entered careers ranging from urban planning, court management, probation, counseling, and legal practice, to federal, state, and local government service. Many professional programs are open to Law and Society majors, including advanced degree programs in the social sciences and judicial administration, as well as law school and paraprofessional legal training.

Students with a bachelor's degree in Law and Society who are interested in pursuing a California Teaching Credential should contact the credential advisor in the Graduate School of Education as soon as possible.

Honors Program

The Law and Society honors program is open to students with a minimum overall 3.5 grade-point average. Students who successfully complete a series of honors classes and an honors thesis during their senior year and maintain the minimum required grade-point average will graduate with Distinction in the Major.

Undergraduate Program

Admission of new students to the law and society major has been suspended until further notice.

Bachelor of Arts— Law and Society

Students are not admitted directly into the Law and Society major. Instead, they are first admitted to the pre-Law and Society major, and they may advance to full major standing only after fulfilling the pre-major courses in Area A and grade requirements listed below. Acceptance into the pre-major does not guarantee

admission to full major status. *Note: Students may petition to full major status generally prior to the accumulation of 100 units, but not after the completion of 144 units.* Students may declare a pre-Law and Society major after they have completed at least one course from the pre-major area with a grade of C or better.

Preparation for the major. Students must complete the pre-major courses with a combined grade-point average of 2.5. The pre-major courses in Area A are Law and Society 1, 2, Political Science 12, and one course in statistics selected from PSTAT 5AA-ZZ, or Psychology 5. Transfer students should consult the undergraduate advisor in the Law and Society Program.

To complete the preparation for the major, students must also complete four courses in Area B, selected from the following, with no more than one from each discipline: Anthropology 2; Asian American Studies 1; Black Studies 6; Communication 1; Economics 1, 2, or 109; History 2A-4A-B-C, 17A-B-C; Philosophy 4; Psychology 1; Religious Studies 40; Sociology 1; and Women's Studies 20, 30, 60. These courses are not used in calculating the required 2.5 pre-major grade-point average, but they do apply to the overall major grade-point average.

Please note: Students must complete the four courses in the pre-major (Area A) with a grade-point average of 2.5 or better before they can be accepted into the full major. Only full majors in Law and Society (or full majors in other social sciences or English, History or Religious Studies) will be allowed to take upper-division Law and Society courses. Courses in Area B need not be completed prior to the declaration of the full major.

Upper-division major. Forty upper-division units are required, distributed as follows:

A. Core courses: Law and Society 111, 112, 113.

Majors must complete at least two of the three core courses before enrolling in other upper-division Law and Society courses.

B. Elective component courses: Seven courses from the following (with at least five from Law and Society): Law and Society 114, 120, 122, 123, 124, 125, 126, 127, 130, 140, 141, 146, 150, 151, 152, 160, 161, 162, 163, 164, 165, 166, 167, 170, 171, 172, 173, 174, 180, 181, 182, 192 (maximum of 8 units)*, 194AA-ZZ (maximum of 12 units) 196A-B-C, 199 (maximum of 5 units); Asian American 114, 115, 116, 119; Black Studies 100, 103, 160; Chicana/o Studies 135, 153, 172, 178A, 189, 189B; Communication 114, 130, 132, 153, 170; Environmental Studies 124, 125A, 125B, 126A, 131; History 131F, 146T, 163A, 163P, 166LB, 167CB, 167CP, 170A, 170B, 170P, 172A, 172B, 172P; Philosophy 100A, 121, 122, 129, 133, 143, 144, 145; Political Science 125, 165, 167, 168; Psychology 102, 103; Religious Studies 141C, Writing 109L

Up to 8 units of Law and Society 192, which is offered only passed/not passed, may be taken for major credit; all other courses must be taken for letter grade.

Law and Society Courses

LOWER DIVISION

1. Introduction to Law and Society

(4) STAFF

An introduction to the interdisciplinary study of socio-legal studies.

2. Socio-Legal Research Methods

(4) STAFF

Examines research methods and analytical approaches commonly used in the study of law and society, emphasizing the relationship between socio-legal theory, interpretive frameworks, and evidence-gathering strategies.

3A-B. Mock Trial

(2-2) STAFF

Prerequisites: consent of instructor; Law and Society 3A (for 3B).

May be repeated for credit to a maximum of 4 units.

Provides experience using the methods and techniques of trial advocacy to consider the social, institutional and procedural influences shaping litigation practices in the United States. Focuses on criminal and civil cases in alternate years

4. Police and Community Rights Project

(2) AMAR

Prerequisite: consent of instructor.

May be repeated for credit to a maximum of 6 units. Course cannot be applied to the major.

Intensive research, fieldwork, training, policy-making and public-service course on monitoring police-community relations.

5A-B-C. Law and Society Journal

(1-1-2) STAFF

Prerequisite: consent of instructor.

In-progress sequence course with grades for all three courses awarded upon completion of Law & Society 5C. Course cannot be applied to the major.

For members of the editorial board of the *Law and Society Journal* at UCSB. Participants develop submission criteria and select articles for publication, edit, proof-read, do layout and publicity.

UPPER DIVISION

111. Law and Culture

(4) DARIAN-SMITH

Prerequisite: open to Law & Society majors only.

Explores various perspectives on the interaction between culture and law, legal systems and legal consciousness.

112. Law and Society

(4) HAJJAR

Prerequisite: open to Law & Society majors only.

Considers sociological concepts (e.g. identity, rights, consciousness, ideology) central to inquiry in the field of law and society.

113. Law and Politics

(4) MOORE, STEVENS

Prerequisite: open to Law & Society majors only.

Examines competing conceptions of the rule of law from the perspectives of constitutional history, legal reasoning and political theory.

114. Law and Literature

(4) STAFF

Prerequisites: students are required to take 2 of the following 3 courses: Law & Society 111, 112 and 113; open to Law & Society majors only.

Focuses on short stories, novels, dramatic films, and documentaries to analyze the representation of law, lawyers, and the legal system as an aspect of the social construction of justice in modern societies.

120. Anthropological Approaches to Law

(4) DARIAN-SMITH

Prerequisites: students are required to take 2 of the following 3 courses: Law & Society 111, 112 and 113; open to Law & Society majors only.

Emphasizes theoretical developments in legal

anthropology from classical to contemporary period, and their relationship to ethnographic analyses. Topics include non-western legal systems, (post) colonialism, nationalism, and legal constructions of race, class, and gender.

122. Law and Globalization

(4) DARIAN-SMITH

Prerequisites: students are required to take 2 of the following 3 courses: Law & Society 111, 112 and 113; open to Law & Society majors only.

Explores the relationship between a global political economy, and international and transnational legal regimes.

123. Indigenous Legal Movements

(4) DARIAN-SMITH

Prerequisites: students are required to take 2 of the following 3 courses: Law & Society 111, 112 and 113; open to Law & Society majors only.

Examines indigenous legal movements in Australia, Canada, Mexico, and the United States, highlighting the centrality of colonial and postcolonial rhetoric in modern western law. Topics include land and water rights, traditional practices, reservation gambling, tribal police, and voting recognition.

124. Capitalism and Racism

(4) DARIAN-SMITH

Prerequisites: students are required to take 2 of the following 3 courses: Law & Society 111, 112 and 113; open to Law & Society majors only.

Not open for credit to students who have completed Anthropology 185DS.

Explores historical and contemporary perspectives on constructions of racial difference in philosophy, theory and law. Emphasizes the political uses made of racial categories accompanying the emergence of modern capitalism.

125. Europe in a Global Context

(4) DARIAN-SMITH

Prerequisites: students are required to take 2 of the following 3 courses: Law & Society 111, 112 and 113; open to Law & Society majors only.

Not open for credit to students who have completed Anthropology 152.

Examines the changing nature of law, culture and politics in contemporary Europe. Topics include nationalism, regionalism, ethnic conflict, immigration, historical memory in the construction of national identities, and the cultural politics of European integration.

127. Law and Globalizing Cities

(4) AMAR

Prerequisites: students are required to take 2 of the following 3 courses: Law & Society 111, 112 and 113; open to Law & Society majors only.

Analyzes the evolving geopolitics of social control in urban spaces, as reconstituted by international law, extralegal and criminal practices, cross-border solidarities, and community justice struggles.

130. Jurisprudence

(4) STAFF

Prerequisites: students are required to take 2 of the following 3 courses: Law & Society 111, 112 and 113; open to Law & Society majors only.

Examines principles underlying judicial decision-making. Approaches to be considered include natural law, legal realism, legal positivism, law-and-economics, critical legal studies, critical race theory, and feminist legal theory.

140. Gender and the Law

(4) STAFF

Prerequisites: students are required to take 2 of the following 3 courses: Law & Society 111, 112 and 113; open to Law & Society majors only.

Considers the construction and regulation of gender, sex, and sexuality by law in the United States, with an emphasis on feminist legal theory and analysis of landmark legal cases.

141. Law and the Family

(4) STEVENS

Prerequisites: students are required to take 2 of the following 3 courses: Law & Society 111, 112 and 113; open to Law & Society majors only.

Focuses on legal developments and debates

about rights and relations associated with the family, including marriage, divorce, custody, parenting, reproduction, and inheritance.

146. Lawyers and the Legal Profession

(4) STAFF

Prerequisites: students are required to take 2 of the following 3 courses: Law & Society 111, 112 and 113; open to Law & Society majors only.

Explores the various social and political roles lawyers play in society, including acting as agents of the state, defenders of the status quo, and proponents of change.

150. Alternative Dispute Resolution

(4) STAFF

Prerequisites: students are required to take 2 of the following 3 courses: Law & Society 111, 112 and 113; open to Law & Society majors only.

Introduces the principles and methods of conflict resolution alternatives, including negotiation, mediation, conciliation, arbitration and formal adjudication.

151. Law and Conflict

(4) HAJJAR

Prerequisites: students are required to take 2 of the following 3 courses: Law & Society 111, 112 and 113; open to Law & Society majors only.

Focuses on the legal dimensions of contemporary conflicts using a case study approach. Topics include the role played by law in creating and resolving conflicts, and the challenges of enforcing resolutions.

152. Law and Authoritarian States

(4) STAFF

Prerequisites: students are required to take 2 of the following 3 courses: Law & Society 111, 112 and 113; open to Law & Society majors only.

Examines the ideologies, legal cultures and systematized brutalities that characterize military dictatorships, elite oligarchies, fascist regimes and inquisitional administrations.

159. International Law

(4) STAFF

Prerequisites: students are required to take 2 of the following 3 courses: Law & Society 111, 112 and 113; open to Law & Society majors only.

Explores history and development of modern international law. Topics include the role of the United Nations in law making and enforcement, and challenges to international legality as a result of wars and unlawful practices by states and non-state groups.

160. Comparative Law

(4) STAFF

Prerequisites: students are required to take 2 of the following 3 courses: Law & Society 111, 112 and 113; open to Law & Society majors only.

Analyzes the structures, processes and principles of varied legal systems. Focuses on public and constitutional law with special attention paid to the contrast between common law and civil law countries.

161. Law and the Middle East

(4) AMAR

Prerequisites: students are required to take 2 of the following 3 courses: Law & Society 111, 112 and 113; open to Law & Society majors only.

Examines topics related to law and legality in Middle Eastern societies, including the relationship between states and religious communities, gender relations and women's rights, and international influences on national law and policy.

162. Human Rights

(4) HAJJAR

Prerequisites: students are required to take 2 of the following 3 courses: Law & Society 111, 112 and 113; open to Law & Society majors only.

Explores the history and development of human rights law, debates over the meaning of human rights, and the influence of human rights on social movements and political struggles.

163. Law, Immigration, Citizenship, and Public Opinion

(4) MOORE

Prerequisites: students are required to take 2 of the following 3 courses: Law & Society 111, 112 and 113; open to Law & Society majors only.

Examines the formation of public opinion on issues related to immigration restriction and citizenship.

164. World Culture and U.S. Law

(4) MOORE

Prerequisites: students are required to take 2 of the following 3 courses: Law & Society 111, 112 and 113; open to Law & Society majors only.

Focuses on the legal, cultural, and political controversies arising from the so-called "clash of civilizations" within a pluralistic society. Topics include language diversity, religious pluralism, the rights of non-citizens, and the structural interests driving U.S. immigration policy-making.

165. Critical Security and Terrorism Studies

(4) AMAR

Prerequisites: students are required to take 2 of the following 3 courses: Law & Society 111, 112 and 113; open to Law & Society majors only.

Compares the origins and politics of security states, and emergency and martial-law regimes. Highlights the interests, insecurities, and legal maneuverings of non-state actors, political elites, and international institutions engaging in counter-terrorism campaigns.

166. Global Policing of Sex and Drugs

(4) AMAR

Prerequisites: students are required to take 2 of the following 3 courses: Law & Society 111, 112 and 113; open to Law & Society majors only.

Examines the politics and policies driving police "wars" against phenomena such as narcotrafficking, sex tourism, prostitution, money laundering, racialized labor migration, "queer" border-crossers.

167. Law and the Latin American/ Caribbean Region

(4) AMAR

Prerequisites: students are required to take 2 of the following 3 courses: Law & Society 111, 112 and 113; open to Law & Society majors only.

Examines legal regimes, criminal justice systems, and human rights politics in Latin America and the Caribbean.

170. Law and Media

(4) MOORE

Prerequisites: students are required to take 2 of the following 3 courses: Law & Society 111, 112 and 113; open to Law & Society majors only.

Explores the representation of law and justice in entertainment media (film, television, music, fiction), and the relationship between the news media and the legal system.

171. Law and Technology

(4) STAFF

Prerequisites: students are required to take 2 of the following 3 courses: Law & Society 111, 112 and 113; open to Law & Society majors only.

The tension between law and technology is explored through various topics, including intellectual property, biotechnology, and forensics. For example, implications of advances in genetically modified foods are analyzed through debates on risk and regulatory efforts to keep pace with science.

172. Social Theory and Law

(4) STEVENS

Prerequisites: students are required to take 2 of the following 3 courses: Law & Society 111, 112 and 113; open to Law & Society majors only.

Explores the legal dimensions of social theory. Topics include social contract, social conflict, social history and development, and contemporary critical theories.

173. Law and American Society

(4) STAFF

Prerequisites: students are required to take 2 of the following 3 courses: Law & Society 111, 112 and 113; open to Law & Society majors only.

Considers the way individuals and groups use law to define and protect rights, contest injustices, and institutionalize visions of a just social order.

174. Criminal Justice and Society

(4) STAFF

Prerequisites: students are required to take 2 of the following 3 courses: Law & Society 111, 112 and 113; open to Law & Society majors only.

Examines various aspects of the criminal justice system in the U.S. Topics include police and police violence, the jury system, sentencing, prison and post-prison supervision.

180. Law and Social Science

(4) STAFF

Prerequisites: two of the following three courses: Law & Society 111, 112, 113; open to Law & Society majors only.

Advanced research experience course applying methods presented in LawSo 2 to the study of a selected topic in which social research informs the uses of law. Recommended as preparation for the Senior Honors Thesis sequence.

181. Psychology and the Legal System

(4) STAFF

Prerequisites: students are required to take 2 of the following 3 courses: Law & Society 111, 112 and 113; open to Law & Society majors only.

Examines psychological research related to legal processes, institutions, and actors. Topics include jury decision-making, predicting criminal behavior, and assessing insanity and competence to stand trial.

192. Field Research in Law and Society

(1-8) STAFF

Prerequisites: two of the following three courses: Law & Society 111, 112, 113; open to Law & Society majors only; consent of instructor.

May be repeated for credit to a maximum of 8 units.

For students who seek greater understanding of the legal system through participant observation as an intern in a law-related agency. Depending upon the project, students may be required to work up to 40 hours a week. A research paper is required.

194AA-ZZ. Advanced Topics in Law and Society

(4) STAFF

Prerequisites: two of the following three courses: Law & Society 111, 112, 113; open to Law & Society majors only.

May be repeated for credit to a maximum of 12 units provided letter designations are different.

Exploration of advanced topics in socio-legal studies.

196A-B-C. Senior Honors Thesis

(4-2-2) STAFF

Prerequisites: two of the following three courses: Law & Society 111, 112, 113; open to Law & Society majors only; consent of instructor.

A three-quarter in-progress sequence course with grades for all quarters issued upon completion of Law and Society 196C. Students must maintain a 3.5 overall GPA, have completed at least 120 units and four or more upper-division courses in the major.

Three quarter sequence in which students research and write a thesis based on independent research. All three quarters must be successfully completed to qualify for Distinction in the Major.

199. Independent Studies in Law and Society

(1-5) STAFF

Prerequisites: two of the following three courses: Law & Society 111, 112, 113; open to Law & Society majors only; consent of instructor.

Students must have a minimum 3.0 grade-point average for the preceding three quarters and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined. No more than 4 units may count toward completion of the major requirements.

GRADUATE COURSES

265. Critical Security and Terrorism Studies

(4) AMAR

Prerequisite: graduate standing.

Comparative global analysis of the origins and politics of security states, emergency and martial-law regimes, highlighting the interests, insecurities, and legal maneuverings of non-state actors, political elites, and international institutions engaging in counter-terrorism campaigns. Seminar attendance and research paper required.

266. Global Policing of Sex and Drugs**(4) AMAR***Prerequisite: graduate standing.*

Examines the politics and policies driving police “wars” against phenomena such as narco-trafficking, sex tourism, “queer” border-crossers, etc.; looking at judicial oversight, protection rackets, authoritarian and populist politics, and urban and international legal regimes. Seminar attendance and research paper required.

267. Law and the Latin American/Caribbean Region**(4) AMAR***Prerequisite: graduate standing.*

Examines legal regimes, criminal justice systems, and human rights politics in Latin America and the Caribbean. Comparatively assesses race, gender, political-economic, (neo) colonial and transnational aspects, and histories of struggle with the military, church, the U.S., etc. Seminar attendance and research paper required.

290A-B-C. Law & Society Proseminar**(2-2-2) STAFF***Prerequisite: graduate standing.*

Provides a forum for graduate students, faculty, and visiting faculty to share research and explore scholarly trends and debates.

596AA-ZZ. Law and Society Directed Reading and Research**(1-6) STAFF**

Prerequisites: graduate standing; consent of instructor.
Individual tutorial.

Linguistics

Department of Linguistics
Division of Humanities and Fine Arts
South Hall 3607

Telephone: (805) 893-3776

E-mail: rthea@linguistics.ucsb.eduWeb site: www.linguistics.ucsb.eduDepartment Chair: *Patricia Clancy*

Faculty

Wallace J. Chafe, Ph.D., Yale University, Research Professor (American Indian linguistics, discourse, spoken and written language)

Patricia M. Clancy, Ph.D., UC Berkeley, Associate Professor (language acquisition, language socialization; discourse, Japanese and Korean linguistics)

Bernard S. Comrie, Ph.D., Cambridge University, Distinguished Professor (language universals and typology, historical linguistics, linguistic fieldwork, languages of the Caucasus)

Susanna A. Cumming, Ph.D., UC Los Angeles, Associate Professor (discourse analysis, computational linguistics, Western Austronesian linguistics)

John W. Du Bois, Ph.D., UC Berkeley, Associate Professor—(discourse and grammar, sociocultural linguistics, corpus linguistics, Mayan languages)

Carol E. Genetti, Ph.D., University of Oregon, Professor (Tibeto-Burman and Himalayan linguistics, Rhaeto-Romance languages, phonology, morphology, syntax, field linguistics and documentation, language change, language contact)

Matthew Gordon, Ph.D., UC Los Angeles, Associate Professor (phonetics, phonology, typology, American Indian and Finno-Ugric linguistics)

Stefan Th. Gries, Ph.D., University of Hamburg, Assistant Professor (corpus linguistics, quantitative methods, cognitive linguistics, construction grammar, computational linguistics)

Charles N. Li, Ph.D., UC Berkeley, Professor (historical syntax, Chinese linguistics, minority languages of China, language contact, evolutionary origin of language)

Marianne Mithun, Ph.D., Yale University, Professor (morphology, language change, discourse and grammar, language typology, language contact, field linguistics and documentation, American Indian linguistics, Austronesian linguistics)

Arthur Schwartz, Ph.D., University of Wisconsin, Professor (syntax, language and gender, language acquisition, German linguistics)

Sandra A. Thompson, Ph.D., Ohio State University, Professor—(morphosyntax, discourse and grammar, typology, interactional linguistics)

Affiliated Faculty

William Ashby, Ph.D. Professor Emeritus (French and Italian)

Dorothy Chun, Ph.D. (Germanic, Slavic, and Semitic Studies)

W. Randall Garr, Ph.D. (Religious Studies)

Howard Giles, Ph.D. (Communication)

Gene Lerner, Ph.D. (Sociology)

Eduardo Raposo, Ph.D. (Spanish and Portuguese)

Linguistics is the study of human language, including the study of similarities and differences among languages of the world; the scientific inquiry into the structure of language, sound structures, word structures, and sentence structures; the study of how language conveys meaning; the study of the way languages change over time; the study of how languages are learned; and the study of the relationship between language, culture, and society. These concerns have relevance to many other fields. The B.A. in linguistics provides a useful background, not only for advanced work in linguistics itself, but also for graduate study in anthropology, law, sociology, language disorders, cognitive science, speech technology, artificial intelligence, psychology, philosophy, education, and foreign languages.

Students with a bachelor's degree in linguistics who are interested in pursuing a California Teaching Credential should contact the credential advisor in the Graduate School of Education as soon as possible.

A certificate in English as a Second Language may be earned at UCSB Extension with approximately one year of additional study, opening the possibility of teaching in a variety of domestic and international programs in English as a Second Language.

The name of the undergraduate faculty advisor is available in the department office. In addition, all faculty members are available for advising students. A list of courses offered is available each quarter, prior to registration.

Students who wish to declare one of the majors in the Department of Linguistics will be required to have a minimum 2.0 grade-point average in required linguistics courses before approval is granted.

Honors Program in Linguistics

Majors with a minimum 3.5 grade-point average in linguistics courses are eligible to join the honors program during their senior year. The honors program consists of an independent research project carried out under the supervision of a faculty member, earning 6 units of Linguistics 195 over two or three quarters.

The goal of the project is to write an original, publishable research paper. The project can be on a topic of the student's choice. Students successfully completing the program will be eligible for graduation with Distinction in the Major. Application to the program should be made to the undergraduate advisor of the Department of Linguistics early in the first quarter of the senior year.

Undergraduate Program

Bachelor of Arts—Linguistics

Preparation for the major. Linguistics 20A. The completion of six quarters (or equivalent) in one foreign language plus the completion of three quarters (or equivalent) in a second foreign language. Students are encouraged to take at least one language outside the Indo-European family; however, the study of two Indo-European languages will satisfy this requirement provided both are not members of the same branch of the family (Germanic, Slavic, Romance). Native speakers of languages other than English may count either English or their native language as fulfilling one of the language requirements.

Upper-division major. Forty upper-division units in linguistics, including Linguistics 106, 107, 108, 109, and 115; and one of the following: Linguistics 113, 124, or 137. The remaining four courses are electives to be chosen from the other linguistics course offerings.

Students are encouraged to take as an elective Linguistics 101 before enrolling in Linguistics 107, 108, 109, or 115.

Bachelor of Arts—Linguistics—Sociocultural Emphasis

Preparation for the major. Linguistics 20A, 50, 70. The completion of six quarters (or equivalent) in one foreign language plus the completion of three quarters (or equivalent) in a second foreign language. Native speakers of languages other than English may count either English or their native language as fulfilling one of the language requirements.

Lower-division recommendations: Religious Studies 14.

Upper-division major. Forty-four upper-division units distributed as follows: Linguistics 106, 107, 108, 109, 113, 130, 131; three courses chosen from: Sociology 136A, Linguistics 124, 132, 136, 137, 138, 170, 180; one additional upper-division course in linguistics or chosen from the following: French 107AA-ZZ, 115; German 104; Religious Studies 114C; Slavic 163.

Bachelor of Arts—Linguistics—Chinese Emphasis

Preparation for the major. Linguistics 20A, Chinese 1-6 or Chinese NH 1-5. In addition, the completion of the third quarter of a second foreign language is required.

Upper-division major. Forty-eight upper-division units in linguistics and Chinese, distributed as follows: (1) Linguistics 106, 107, 108, 109, 115. (2) Four upper-division courses in Chinese. Students are strongly encouraged whenever possible to take courses either (a) focusing on the history, structure, or use of Chinese or (b) requiring written or spoken language use in Chinese. (3) Three additional upper-division courses in linguistics, to bring the unit total to 48.

Bachelor of Arts—Linguistics—English Emphasis

Preparation for the major. Linguistics 20A. In addition, the completion of six quarters (or equivalent) in one foreign language plus the completion of three quarters (or equivalent) in a second foreign language is required. Students are encouraged to take at least one language outside the Indo-European family; however, the study of two Indo-European languages will satisfy this requirement provided both are not members of the same branch of the family (Germanic, Slavic, Romance). Native speakers of languages other than English may count either English or their native language as fulfilling one of the language requirements.

Upper-division major. Forty-eight upper-division units in linguistics and English, distributed as follows: (1) Linguistics 106, 107, 108, 109, 115, 160, English 111. (2) Three upper-division courses in English. Students are strongly encouraged whenever possible to take courses focusing on earlier stages of the English language. (3) Two additional upper-division courses in linguistics, to bring the unit total to 48.

Bachelor of Arts—Linguistics—French Emphasis

Preparation for the major. Linguistics 20A, French 1-6, French 26A. In addition to the French language requirement, the completion of the third quarter of a second foreign language is required. Students are encouraged to select a non-Indo-European language for this second language requirement; however, an Indo-European language will satisfy this requirement provided it is not a member of the Romance branch.

Upper-division major. Forty-eight upper-division units in linguistics and French, distributed as follows: (1) Linguistics 106, 107, 108, 109, 115. (2) Four upper-division courses in French. Students are strongly encouraged whenever possible to take courses either (a) focusing on the history, structure, or use of French or (b) requiring written or spoken language use in French (3) Three additional upper-division courses in linguistics, to bring the unit total to 48.

Bachelor of Arts—Linguistics—German Emphasis

Preparation for the major. Linguistics 20A, German 1-6. In addition, the completion of the third quarter of a second foreign language is required. Students are encouraged to select a non-Indo-European language for this second language requirement; however, an Indo-European language will satisfy this requirement provided it is not a member of the Germanic branch.

Upper-division major. Forty-eight upper-division units in linguistics and German, distributed as follows: (1) Linguistics 106, 107, 108, 109, 115. (2) Four upper-division courses in German. Students are strongly encouraged whenever possible to take courses either (a) focusing on the history, structure, or use of German or (b) requiring written or spoken language use in German. (3) Three additional upper-division courses in linguistics, to bring the unit total to 48.

Bachelor of Arts—Linguistics—Japanese Emphasis

Preparation for the major. Linguistics 20A, Japanese 1-6, Japanese 7H, 120A, or 124. In addition, the completion of the third quarter of a second foreign language is also required.

Upper-division major. Forty-eight upper-division units in linguistics and Japanese, distributed as follows: (1) Linguistics 106, 107, 108, 109, 115. (2) Four upper-division courses in Japanese. Students are strongly encouraged whenever possible to take courses either (a) focusing on the history, structure, or use of Japanese or (b) requiring written or spoken language use in Japanese. (3) Three additional upper-division courses in linguistics, to bring the unit total to 48.

Bachelor of Arts—Linguistics—Slavic Emphasis

Preparation for the major. Linguistics 20A, Slavic 1-6. In addition, the completion of the third quarter of a second foreign language is required. Students are encouraged to select a non-Indo-European language for this second language requirement; however, an Indo-European language will satisfy this requirement provided it is not a member of the Slavic branch.

Upper division major. Forty-eight units of upper-division work, distributed as follows: (1) Linguistics 106, 107, 108, 109, 115. (2) Four upper-division courses in Slavic. Students are strongly encouraged whenever possible to take courses either (a) focusing on the history, structure, or use of Russian or (b) requiring written or spoken language use in Russian. (3) Three additional upper-division courses in linguistics, to bring the unit total to 48.

Bachelor of Arts—Linguistics—Spanish Emphasis

Preparation for the major. Linguistics 20A, Spanish 1-6, Spanish 16A or 16B or 25. In addition the completion of the third quarter of a second foreign language is required. Students are encouraged to select a non-Indo-European language for this second language requirement; however, an Indo-European language will satisfy this requirement provided it is not a member of the Romance branch.

Upper-division major. Forty-eight units of upper-division courses in linguistics and Spanish, distributed as follows: (1) Linguistics 106, 107, 108, 109, 115, Spanish 100 (prerequisite to all upper-division Spanish linguistics courses). (2) Four upper-division courses in Spanish. Students are strongly encouraged whenever possible to take courses either (a) focusing on the history, structure, or use of Spanish or (b) requiring writ-

ten or spoken language use in Spanish. (3) Two additional upper-division courses in linguistics, to bring the unit total to 48.

Minor—Linguistics

All courses to be applied to the minor must be completed on a letter-grade basis. This includes both courses offered in linguistics and those offered by other departments and applied to the minor.

Preparation for the minor. Linguistics 20A (with a grade of C or better).

Upper-division minor. Twenty-four units, distributed as follows: Linguistics 106, 107, 108, 109; 8 units of upper-division electives in linguistics (recommended: Linguistics 113, 115, 124).

Note: Substitutions and waivers are subject to approval by the chair of the department. Please see page 118 for special conditions governing minors in the College of Letters and Science.

Minor—Sociocultural Linguistics

All courses to be applied to the minor must be completed on a letter-grade basis. This includes both courses offered in linguistics and those offered by other departments and applied to the minor.

Preparation for the minor. Linguistics 20A (with a grade of C or better).

Recommended: Linguistics 70

Upper-division minor. Twenty-four units, including four of the following eight courses: Linguistics 113, 130, 131, 132, 138, 170, 180; 8 units of upper-division electives in linguistics.

Note: Substitutions and waivers are subject to approval by the chair of the department. Please see page 118 for special conditions governing minors in the College of Letters and Science.

Graduate Program

In addition to departmental requirements, candidates for graduate degrees must fulfill the university degree requirements found in the chapter “Graduate Education at UCSB.”

M.A./Ph.D. in Linguistics

The linguistics program focuses on the discovery of general, theoretically significant explanations of why languages are structured as they are, why they change as they do, and in what ways linguistic structures are shaped by the nature of the communication process. A major goal is the pursuit of what are often called “functional” explanations for linguistic patterns, explanations that are based on the functions of language as a contextualized social and cognitive activity. Students are encouraged to seek both breadth and depth in their understanding of a wide sample of languages and to appreciate the ways languages can differ as well as the features they share.

Admission

The M.A. program in linguistics is oriented toward the Ph.D. program and is viewed as an integral part of preparation for the doctorate; students normally apply to both programs. Students intending to pursue only an M.A. degree will not be accepted into the graduate program.

Admission into the graduate program is based on past academic record, intellectual promise, and programmatic fit. Students entering the program have typically completed a linguistics B.A. or the equivalent of a linguistics minor with a major in a related area, such as anthropology, psychology, or language, with a minimum grade-point average of 3.5. The minimum recommended courses for admission are an introductory course in linguistics and at least one course each in phonetics/phonology, historical/comparative linguistics, and syntax.

Students who do not already have a master's degree should apply to the M.A./Ph.D. program; those with an M.A. degree should apply directly to the Ph.D. program.

Admitted students for whom English is not their native language must take the English Language Placement Examination upon arrival at UCSB to determine speaking and writing ability. Depending on test performance, students may be required to take courses in English as a Second Language.

Master of Arts—Linguistics

The M.A. program takes approximately seven quarters. The student is required to complete nine courses with sufficient distinction and to maintain an overall grade-point average of 3.7 or better. The nine courses must include Linguistics 208 (Introduction to Morphology), Linguistics 212 (Discourse Transcription), Linguistics 214 (Discourse), Linguistics 225 (Semantics and Pragmatics), Linguistics 234 (Advanced Syntax), Linguistics 235 (Advanced Phonology), and Linguistics 236 (Advanced Language Change). The other two courses may be chosen from the full list of graduate courses in linguistics.

After completing the required courses, the student will submit a thesis based on original research to the thesis committee for approval. The committee, consisting of at least three faculty members nominated by the department chair and approved by the dean of the Graduate Division, is to be established at least one quarter prior to the quarter in which the thesis is submitted, and is responsible for its final approval.

The foreign language requirement. Students must demonstrate knowledge of one research language before receiving an M.A. and a second research language before advancement to candidacy for the Ph.D. A research language is a language with substantial relevant literature on linguistics. Knowledge can be demonstrated by one of the following methods of examination within the student's area of interest: (1) English translation of a 500-word passage, chosen by the examiner, to be produced within one and a half hours with the aid of a dictionary and with no more than 8 points of erroneous comprehension (2 points for each major error significantly affecting meaning; 1 point for each minor error). (2) A 1,000-1,500 word English summary, written over a single weekend, of a substantial linguistic article chosen by the examiner. The faculty member in charge of exams for a particular language will specify a sample of material comparable to what can be expected on the exam. Translation and summary exams may be taken in May or October on a date to be set by the examiner. (3) A research paper

that not only independently fulfills a course or degree requirement but also contains copious references to linguistic literature in the foreign language of interest, with the understanding that the works referred to shall be lent to the examiner for verification.

A student may petition to substitute a contact language (a language to be used as a medium of communication in the field) for one of the two foreign languages in this requirement. Knowledge will be demonstrated by a conversation showing ability to use the foreign language for research purposes.

Whichever type of examination is chosen, the student should realize that its acceptance depends upon the availability of a qualified person to judge the result. It is the student's responsibility to find such a person. A student who fails a foreign language exam must wait three months before taking it again. Language examinations are administered twice a year, in October and May. Students planning to take an exam must fill out a language exam application form at least two weeks before the exam is to be given.

Doctor of Philosophy—Linguistics

Permission to continue for the Ph.D. is contingent upon passing the screening review, which takes place at the time of the completion of the M.A. for students who entered the M.A./Ph.D. program, and at a time specified by the student's advisory committee for those who entered the Ph.D. program directly.

The screening review for a student who has completed the M.A. program in linguistics at UCSB will be based on the quality of the M.A. thesis and the entire faculty's evaluation of the student's overall coursework and promise.

A student who enters the graduate program with an M.A. in linguistics from another department or institution must fulfill all the requirements expected of students completing the M.A. program at UCSB. The faculty will determine equivalence of work done elsewhere to the UCSB M.A. requirements. Students who enter with an M.A. but who did not write an M.A. thesis in linguistics from another university may be submitted for consideration by the UCSB faculty as a UCSB M.A. thesis equivalent. The screening review will be based on the entire faculty's evaluation of the quality of the thesis or thesis equivalent and the student's overall coursework and promise. If the submitted thesis is not acceptable as a UCSB M.A. thesis equivalent, the student will be asked to write another paper to be submitted as an M.A. thesis equivalent.

Linguistic Institute. Students are urged to consider attending the Linguistic Institute, held every other summer by the Linguistic Society of America and a cosponsoring university. The four-to eight-week summer program offers a wide range of courses, workshops, and seminars on linguistics and languages, as well as lecture series and special conferences.

Field work. Students are urged to begin thinking early in their graduate career about arrangements for pursuing linguistic field work or other research. Selection of an appropriate language or area, research topic, and sources of

possible dissertation research funding should be discussed with the student's committee at an early stage.

The guidance committee. Within one quarter after passing the screening review, the student must declare a post-M.A. guidance committee composed of at least three members of the Department of Linguistics, one of whom is the committee chair. The guidance committee is responsible for advising and guiding the student from the time it is established until the doctoral committee is organized.

The doctoral committee. The doctoral committee must be established no later than the quarter preceding that in which the student intends to take the oral qualifying examination. The committee must consist of at least four members, including a minimum of three UC ladder faculty, two from within the department, and one from outside the department. This committee is responsible for administering the oral qualifying examination (see below).

Requirements for the Ph.D. The following are required: (a) A minimum of two years (six quarters) of academic residence, as defined and required by the university. (b) Forty-eight units of graduate coursework beyond the nine required courses for the M.A. These units must include Linguistics 221A-B-C (Field Methods); 270 (Professionalism); two seminars; plus two courses from different categories among the following four: (1) Social and cultural aspects of language: Linguistics 227, Language as Culture; Linguistics 228, Discourse in Sociocultural Interaction; Linguistics 230, Methods in Sociocultural Linguistics; Linguistics 232, Foundations of Sociocultural Linguistics; (2) Formal Approaches to Language: Linguistics 210, Computational Linguistics; Linguistics 229, Formal Syntax; (3) Cognitive aspects of language: Linguistics 226, Language and Cognition; Linguistics 265, Acquisition of Grammar; Linguistics 266, Acquisition of Discourse; and (4) Typology and contact: Linguistics 222, Typology and Universals; Linguistics 223, Languages in Contact; Linguistics 256A, Seminar in Typology and Universals; and 8 units of electives. (c) One substantial research paper of high quality suitable for publication in a major refereed journal, approved by the student's guidance committee. The publishable paper must be on a different topic than the M.A. thesis or thesis equivalent. (d) Fulfillment of the foreign language requirement. A doctoral committee cannot be officially appointed until the foreign language requirement has been fulfilled. Details are included in the description of the foreign language requirement for the Master of Arts degree, above. (e) Passing an oral qualifying examination administered by a doctoral committee approved by the chair of the department and appointed by the dean of the Graduate Division. The oral qualifying examination will cover general linguistics. (f) Approval of a dissertation prospectus which presents the plan for the dissertation. (g) A colloquium presentation of the dissertation research. (h) An original dissertation.

The normal time for completion of the Ph.D. degree is currently seven years after completion of a B.A. in linguistics.

Optional Ph.D. Emphasis in Applied Linguistics

The field of Applied Linguistics is a growing and vibrant one in universities nationally and internationally. Applied Linguistics is an interdisciplinary field of research and instruction that provides theoretical and descriptive foundations for the empirical investigation and solution of language-related issues, especially those of language education (first-language, second-language, foreign-language and heritage-language teaching and learning), but also issues of bilingualism and biliteracy, language planning and policy, language assessment, translation and interpretation, lexicography, rhetoric and composition.

Students pursuing a Ph.D. in the Departments of Education, French and Italian, Germanic, Slavic & Semitic Studies, Linguistics, and Spanish and Portuguese may petition to add an emphasis in applied linguistics. The interdisciplinary program in applied linguistics involves over 35 faculty members in 12 departments on campus.

Students who petition to add the emphasis must fulfill the following requirements in addition to the requirements for the Ph.D. in their home department: (1) a minimum of two courses taken from the core group of applied linguistics courses, which provide them with the basics of linguistics, second language acquisition theories, second/foreign language teaching methodologies, and practical applications of theory to teaching (Second Language Acquisition Theory and Research; Second Language Teaching Methodology; Foreign/Second Language Teaching Practicum; Topics in Applied Linguistics); (2) a minimum of two courses in one of five sub-areas (Linguistics, Discourse, Second Language Acquisition; Language and Society, Socio-cultural Perspectives, Multilingualism and Multiliteracy; Language, Literacy and Composition Studies; Language and Cognition, Psycholinguistics; Language Acquisition Using Technology); (3) Required independent study (4 units): Taken with an appropriate faculty member, leading to a research paper describing theoretical, empirical, or applied work in applied linguistics.

In addition to the course and unit requirements described above (including the research paper), the student's Ph.D. Qualifying Examination (or a separate exam) shall include examination of knowledge within the Applied Linguistics emphasis. At least one faculty member of the Applied Linguistics program shall participate in the qualifying (or separate) examination.

Additional information may be found at: <http://www.appliedlinguistics.ucsb.edu>. Questions may be directed either to a participating faculty member or to Applied Linguistics, c/o Department of Germanic, Slavic & Semitic Studies, UCSB, Santa Barbara, CA 93106-4130.

Optional Ph.D. Emphasis in Cognitive Science

Students pursuing a Ph.D. in this department may petition to add an emphasis in cognitive science. The interdisciplinary program in cognitive science involves faculty from the Ph.D. programs in anthropology, computer science,

education, English, electrical and computer engineering, geography, linguistics, psychology, and sociology. Its goal is to give students an appreciation of the interdisciplinary study of thinking, perception, and intelligent behavior, as determined jointly by the nature of the environment and by the internal architecture of the intelligent agent, whether human, animal, or machine. The program features a structured set of courses which are taught individually and collaboratively by faculty from a variety of disciplines.

Students who petition to add the emphasis in cognitive science must fulfill the following requirements in addition to the requirements of the Ph.D. in their home department: (1) participation for at least three quarters in proseminar Interdisciplinary 200; (2) completion of at least three cognitive science elective courses with one each in three different departments; (3) completion of either (a) a research project, completed before the dissertation, resulting in a publishable paper, or (b) an extramural grant proposal for a study in cognitive science suitable for submission to an identified granting agency; (4) presentation of a research paper in a suitable academic forum, such as an emphasis or departmental colloquium, or a professional meeting; and (5) a Ph.D. dissertation centrally focused on a question emerging from cognitive science with at least two committee members representing faculty participating in the Cognitive Science Interdisciplinary Emphasis.

Optional Ph.D. Emphasis in Human Development

Students pursuing a Ph.D. in linguistics may petition to add an emphasis in human development. The interdisciplinary program in human development (IHD) involves faculty from the Ph.D. programs in communication, counseling/clinical/school psychology, education, linguistics, psychology, and sociology. The program focuses on developmental theory and research across the lifespan, and may be particularly relevant to the dissertation research of some students. The program features a structured set of courses which are taught individually and collaboratively by faculty from a variety of disciplines.

Students who petition to add the emphasis in human development must fulfill the following requirements in addition to the requirements for the Ph.D. in their home department: (1) six quarters of proseminar Interdisciplinary 592; (2) four courses in addition to the proseminar, two of which must be outside the student's home department; (3) a minimum of one member of the student's doctoral committee must be a ladder faculty member officially affiliated with the interdisciplinary program in human development. Consult the department for additional information.

Optional Ph.D. Emphasis in Language, Interaction, and Social Organization

Students pursuing a Ph.D. in the Departments of Education, Linguistics, or Sociology may petition the department to add an interdisciplinary emphasis in language, interaction, and social organization (LISO). This emphasis draws upon

three approaches: interactional functional linguistics, conversation analysis, and sociocultural linguistic analysis.

In addition to the emphasis requirements below, students must satisfy the requirements for the Ph.D. in their home department. Work in satisfaction of departmental Ph.D. requirements may also be used to satisfy emphasis requirements. The emphasis requires (1) three quarters of Education/Linguistics/Sociology 274, Proseminar in Language, Interaction, and Social Organization, for credit; (2) a minimum of three elective LISO courses from the list below, one from each of the student's non-home departments, and the third a designated methods course in any of the three departments (the designated methods courses are Education 221A, 221B, 221G; Linguistics 230; and Sociology 212R): Linguistics 201, 209, 212, 214, 217, 227, 228, 230, 232, 237, 254A-B, 258A-B, 266, or 273 A-B; Education 202E, 207, 209A, 221A, 221B, 221G, 270G, or 270H; Sociology 212R, 236, 236I, 236V, 242, 273A-B, (3) one presentation in Education/Linguistics/Sociology 274, which may be either a research paper or a guided data session; (4) Students must complete a research project; the project must be supervised by at least one participating faculty member. This requirement can be satisfied in either of two ways: (a) Completion of a paper reporting a post-M.A. research project which presents an analysis of interactional data and displays command of the relevant literature. It must be written up in publishable form, though actual publication is not a requirement. (b) Successfully defend a dissertation centrally addressed to questions concerning language, interaction, and social organization; at least one member of the student's qualifying examination and dissertation committee must be a faculty member affiliated with LISO.

Questions or requests for additional information may be directed either to a participating faculty member or to LISO, c/o the Department of Sociology, UCSB, Santa Barbara, CA 93106. For further information, please visit www.liso.ucsb.edu.

Linguistics Courses

ENGLISH AS A SECOND LANGUAGE COURSES

For further information see the "English as a Second Language" entry in this catalog.

1. ESL: English Skills Review

(4) STAFF

Prerequisite: placement based on English Language Placement Examination scores, UC Analytical Writing Placement Exam (AWPE) scores, or by consent of department.

Workload credit only. May be repeated for credit to a maximum of 12 units.

Focuses on developing reception and production skills (listening and reading, speaking and writing). Instruction also includes an intensive review of English grammar and basic sentence construction. (F)

2. ESL: English Skills Practicum

(4) STAFF

Prerequisite: placement based on English Language Placement Examination scores, UC Analytical Writing Placement Exam (AWPE) scores, or Linguistics 1, or by consent of department.

Workload credit only. May be repeated for credit to a maximum of 12 units.

Focus on writing skills such as paragraph development and rhetorical patterns, and oral production skills such as group discussions, individual oral presentations and seminars. Course content drawn from a variety of academic disciplines. (F,W)

2G. Graduate English Skills Practicum

(4) STAFF

Prerequisite: placement based on English Language Placement Examination.

Workload credit only. May be repeated for credit to a maximum of 8 units.

Provides writing instruction for nonnative English speaking graduate students needing to improve accuracy and fluency in written academic English. Emphasizes sentence- and discourse-level grammar and vocabulary relevant to academic writing at the graduate level.

3. ESL: Undergraduate Writing

(4) STAFF

Prerequisites: placement based on English Language Placement Examination scores, UC Analytical Writing Placement Exam (AWPE) scores, or Linguistics 2, or by consent of department.

Workload credit only. May be repeated for credit to a maximum of 12 units.

Focus on advanced oral and writing skills. Students work on improving fluency in written English, developing expository writing strategies, and practicing editing skills. (F,W,S)

3G. ESL: Graduate Writing

(4) STAFF

Prerequisites: placement based on English Language Placement Examination scores; graduate standing.

Workload credit only. May be repeated for credit to a maximum of 8 units.

Prepares students for graduate-level academic writing. Focuses on rhetorical strategies and patterns of development used in a variety of writing typically required for graduate courses. Through negotiated writing projects, students learn rhetorical conventions used in their disciplines and develop prose style.

4. ESL: Self-Paced

(1-3) STAFF

Prerequisite: consent of instructor.

Workload credit only. May be repeated for credit to a maximum of 12 units.

Designed to meet individual needs of ESL students either individually or in small groups. Open to foreign students at any level of proficiency. (F,W,S)

5. ESL: Intermediate Oral Practicum

(3) STAFF

Prerequisite: placement based on English Language Placement Examination scores and graduate status.

May be repeated for credit to a maximum of 6 units. Workload credit only.

Focuses on listening comprehension and oral production skills necessary for participation in an American university classroom: group discussions, conversational strategies, and individual oral presentations. (F)

6. ESL: Advanced Oral Practicum

(3) STAFF

Prerequisite: Linguistics 5 or placement based on English Language Placement Examination scores.

Workload credit only. May be repeated for credit to a maximum of 6 units.

Advanced course designed to refine students' skills in classroom discussion and oral presentations. Course content will be drawn from a variety of academic disciplines. (W)

7. International TA Workshop

(3) STAFF

Prerequisite: consent of instructor.

Workload credit only. Students must have current teaching assistantship. May be repeated for a credit to a maximum of 6 units.

Intercultural teacher-training course with an emphasis on pronunciation and the oral production skills necessary for successful communication in the American university classroom. Each student is videotaped twice.

9. ESL: Pronunciation

(3) STAFF

Workload credit only. May be repeated for credit to a maximum of 6 units.

Intended for students who have problems in English pronunciation or who wish to improve their pronunciation. Instruction will include a general review of vowels, consonants, stress and intonation patterns. (F,S)

12. Approaches to University Writing for Multilingual Students

(4) STAFF

Prerequisite: open to students who have not satisfied the Entry Level Writing Requirement and have an ESL designation on the UC Analytical Writing Placement Exam (AWPE).

Principles of critical reading, thinking and writing in the university. Students analyze academic discourse, develop rhetorical strategies for exposition and argument, practice examination writing, and write and revise papers. Completion of C or better meets Entry Level Writing Requirement. (F, W, S)

LOWER DIVISION

20A. Language and Linguistics

(4) GENETTI, GORDON, SCHWARTZ

An introduction to the scientific study of language: The sounds of language; word and sentence structure; semantics and pragmatics; discourse and conversational speech; the social and cultural function of language; language change and the reconstruction of languages at earlier stages.

20B. Language and Linguistics

(4) GENETTI, GORDON, SCHWARTZ

Prerequisite: Linguistics 20A.

Further exploration of language and linguistics. A continuation of Linguistics 20A: Language universals and linguistic typology; contact and areal linguistics; language and the brain; human versus animal communicative behavior; first and second language acquisition; computers and language; profiles of particular languages.

20H. Language and Linguistics Honors

(1) GENETTI, STAFF

Honors course that involves introductions to the scientific study of language: The nature of language structure; the social and cultural function of language; the origin and the learning of language; language change and the reconstruction of languages at earlier stages.

30. The Story of English

(4) SCHWARTZ

The evolution of English from its Germanic origins to its present status as a *lingua franca* among the world's cultures. Topics include influences from other languages, English-based creoles, the major contemporary dialects, and the concept of Standard English.

50. Language and Power

(4) CUMMING

Examination of the way social roles and relations are constructed and maintained via language, including the nature of linguistic and conceptual categories and the role of metaphor in domains ranging from everyday interaction to advertising and political discourse.

60. Word Origins

(3) SCHWARTZ

An introduction to the origin and evolution of words: language families, sound correspondences, and cognates; word-formation and loanwords; changes in meaning and form; etymology; dialectal differences in lexicon; vocabulary as historical and comparative evidence.

70. Language in Society

(4) BUCHOLTZ

How language defines the relationship of the individual to society; the role language plays in constituting power, hierarchy, ethnicity, gender, ideology, and other aspects of social identity; how speakers use language to display identity and define social context. Emphasis on sociolinguistic diversity in American society.

82. The Biological Foundations of Language

(3) LI

Focuses on the biological mechanism involved in the production and perception of language. These biological mechanisms are presented from both the ontogenetic and phylogenetic (hominid evolution) perspective. Special emphasis is placed on the anatomy, physiology and genetic basis of the auditory system, the vocal (via the respiratory) system and the brain.

UPPER DIVISION

101. Basic Elements of Linguistic Analysis

(4) SCHWARTZ, MITHUN

Prerequisite: Linguistics 20 or 20A.

An introduction to the analytic methodology in the study of phonology, morphology, syntax, and semantics. A typologically-oriented course designed to demonstrate how linguists analyze languages.

106. Introduction to Phonetics

(4) GENETTI, GORDON

Prerequisite: Linguistics 20 or 20A.

An introduction to the articulatory and acoustic properties of speech sounds. Survey of speech sounds found in the languages of the world. Emphasis on ear training and transcription using the IPA.

107. Introduction to Phonology

(4) GENETTI, GORDON

Prerequisite: Linguistics 106.

Not open for credit to students who have completed Linguistics 111.

Introduction to the description and analysis of the sound patterns of natural language.

108. Introduction to Morphology

(4) MITHUN

Prerequisite: Linguistics 111.

How meaning is encoded in words in the languages of the world. Morphological and morphophonemic processes, lexical categories, derivation and inflection, productivity, tense, aspect, mode, case, concord, valence changes (passives, antipassives, benefactives, causatives), morphological typologies.

109. Introduction to Syntax

(4) THOMPSON

Prerequisite: Linguistics 20 or 20A.

Similarities and differences among languages in the grammatical devices they use to signal relations between nouns and verbs, negation, comparison, attribution (adjectives), and backgrounding. Data from a range of languages presented and analyzed.

110. Computational Linguistics

(4) GRIES

Prerequisites: Linguistics 20 or 20A; and 109.

Computational linguistics and statistical natural language processing; hands-on work with a programming language, co-occurrence phenomena, computational lexicography and word sense disambiguation, automatic text processing, and other topics.

112. Approaches To Formal Syntax

(4) SCHWARTZ

Prerequisite: Linguistics 109.

The emphasis of this course is the nature of explanation, with special reference to natural language syntax. It examines several current formal approaches for their treatment of a number of well known empirical problems.

113. Introduction to Semantics

(4) CUMMING, GRIES

Prerequisite: Linguistics 20 or 20A.

Introduction to the study of meaning in language. Consideration of semantic fields, semantic components, semantic relations, categories, prototypes, frames, metaphor, pragmatics, indexicality, and speech acts.

115. Introduction to Historical-Comparative Linguistics

(4) GORDON, MITHUN, KENNEDY

Prerequisite: Linguistics 106.

An introduction to linguistic change, genetic classification of languages, and methods of reconstructing parent languages.

116. The Structure of Language and Sports**(4) KENNEDY***Prerequisite: Consent of instructor.*

Examine the usage of language in organized sport, with analysis at lexical, morphological, syntactic, discursive, and phonological levels. Investigate how linguistic structure adapts to particular communicative contexts, such as media accounts and interactions among participants.

117. Regional Dialects and Varieties of English Around the World**(4) KENNEDY***Prerequisite: Linguistics 20 or 20A.*

Offers a comprehensive and in-depth survey of regional dialects of English throughout America and around the world. Examines dialect variation through both descriptive analysis as well as socio-historic accounts of the emergence of particular varieties.

120. Corpus Linguistics**(4) GRIES***Prerequisite: Linguistics 20 or 20A.**Designed for majors.*

Recommended preparation: Linguistics 101 or equivalent.

An introduction to computerized research methods which are applied to large databases of language used in natural communicative settings to supplement more traditional ways of linguistic analysis in all linguistic subdisciplines.

121. Field Methods**(4) MITHUN***Prerequisites: Linguistics 106, 108, and 111.*

Letter grade required for majors. May be repeated for credit to a maximum of 8 units.

Workshop format with native speaker of a lesser-known language as consultant. Students analyze the phonological, morphological, syntactic, and semantic structure of the language by eliciting data from the consultant and applying theoretical knowledge to the data.

121A. Field Methods**(4) MITHUN***Prerequisites: Linguistics 106, 108, and 111.*

Workshop format with native speaker of a lesser-known language as consultant. Students analyze the phonological, morphological, syntactic, and semantic structure of the language by eliciting data from the consultant and applying theoretical knowledge to the data.

124. Discourse Analysis**(4) CUMMING, THOMPSON***Prerequisite: Linguistics 109.*

Basic concepts in the study of discourse, including differences between spoken and written language; conversational structure; structure of narrative and expository texts; information flow; and implications for the study of grammar.

130. Language as Culture**(4) DU BOIS***Prerequisite: Linguistics 20 or 20A.*

Views language through the lens of culture, exploring language as a sociocultural system that organizes meaning, memory, interpretation, authority, action, practice. How practices of speaking shape culture; intertextuality; linguistic and cultural relativity; relations between language, thought, and culture.

131. Sociolinguistics**(4) BUCHOLTZ***Prerequisite: Linguistics 20 or 20A.*

The study of language as a social phenomenon, with emphasis on language use outside the U.S. context. Quantitative and qualitative approaches to regional and social dialects, register, linguistic power and solidarity, language contact and change, multilingualism, codeswitching, language shift and loss.

132. Language, Gender, and Sexuality**(4) BUCHOLTZ**

The study of language as a resource for the production of gender and sexuality across cultures. Topics include: gender differentiation in language structure and use; intragender variation; language and discrimination; linguistic ideologies; language and identity.

134. North American Indian Languages**(4) MITHUN***Prerequisite: Linguistics 20 or 20A.*

Survey of the several hundred native languages of North America, including the history of research on these languages, their classification, special structures, and their oral traditions.

136. African American Language and Culture**(4) BUCHOLTZ***Prerequisite: Linguistics 20 or Linguistics 20A*

The history, structure, and use of varieties of African American English. Topics include debates over the origins of African American vernacular English; the politics of African American English; representations of African American speech in popular culture; language and hip hop culture; the use of African American vernacular English by other ethnic groups.

137. Introduction to First Language Acquisition**(4) CLANCY, GRIES***Prerequisite: Linguistics 20 or 20A.*

Introduction to current theories and methods in the study of language development. Topics include cross-linguistic developmental differences, the relationship between linguistic and socio-cognitive development, and cultural differences in language socialization.

138. Language Socialization**(4) CLANCY***Prerequisite: Linguistics 20 or 20A.*

What is the role of language in the process by which a child becomes a member of a particular culture? Topics include the acquisition of culture-specific ways of talking about emotions, enacting gender roles, having arguments and producing narratives.

139. Introduction to Teaching English to Speakers of Other Languages**(4) FRODESEN**

Surveys theoretical and methodological issues related to teaching English as a second or foreign language. Students examine current research and pedagogy in TESFL and development in second language acquisition theory; and, evaluate teaching materials and develop classroom lessons.

140. English Grammar for Teachers**(4) FRODESEN***Prerequisite: consent of instructor.**Open to non-majors.*

Covers English grammatical structures commonly the focus of teaching English as an additional language. Also considers key issues related to grammar in language teaching, such as error correction and deductive versus inductive methods of instruction. (S)

141. Second Language Acquisition**(4) CHUN, SCHULTZ***Prerequisite: upper-division standing.**Same course as German 145 and French 107X.*

An introduction to the theories and principles of how adults acquire a language other than their mother tongue, why it is more difficult than acquiring their first language, and what needs to be learned, from linguistic, psychological and social perspectives.

160. The Structure of English**(4) SCHWARTZ, GRIES***Prerequisite: Linguistics 20 or 20A.*

Introduction to the phonological, morphological, syntactic, and discourse features of contemporary English.

166. The Structure of Yiddish**(4) SCHWARTZ***Prerequisite: Consent of instructor.*

Examines phonological, morphological, syntactical, etc. structure of Klal Yiddish with some attention to dialect variation. Selected aspects of Ashkenazic culture are discussed as is the history and emergence of a literary register.

170. Language in Social Interaction**(4) DU BOIS**

What role does language play in social interaction? How do individuals use language to shape relationships with others within or across social groups? How do patterns of linguistic interaction constitute patterns of social organization? Emphasis

on hands-on analysis of transcriptions and recordings of face-to-face interaction.

175. Introduction to Romance Linguistics**(4) SCHWARTZ, RAPOSO**

The course aims to illustrate principles of comparative-historical linguistic analysis by examining Romance languages (French, Portuguese, etc.) for similarities and differences, and tracing their evolution from Vulgar Latin.

180. Language in American Ethnic Minority Groups**(4) CLANCY**

Examines the language of four American ethnic minority groups—Asian-, Hispanic-, Native-, and African-American—focusing on the special linguistic features and ways of using English in each group and on issues of inter-ethnic communication.

181. Languages of the World**(4) COMRIE**

Introduction to the languages of the world: Geographical distribution; genetic (genealogical) classification, including comparison with genetics and archeology; structural properties and sociolinguistics of selected languages representing different parts of the world.

182. Language and Brain**(4) LI***Recommended preparation: Linguistics 82 or some background in general biology and/or linguistics.*

Course is organized into three stages: The first stage provides a foundation on basic neuro-anatomy, neurophysiology and the nature of human language. The second stage focuses on the brain system and specializations that support language, drawing evidence from aphasic and neuro-imaging studies. The third stage explores the various theories of brain and language and the issues concerning the genetic basis of language in the human genome.

185. Animal Communication**(4) LI**

The nature, process, mechanism, function, ontogeny and evolution of communicative behavior in the animal kingdom. The basic principles of animal communication: sensory channels, signal specificity, signal economy, graded vs. discrete signals, ritualization, human vs. animal. Description of selected animals: birds, simians and apes, cetaceans, social insects.

186. The Evolutionary Origin of Language**(4) LI***Prerequisite: Linguistics 20 or 20A or 185, or EEMB 5B or 5C, or MCDB 5A or 28.*

Interdisciplinary course involving paleoanthropology, theories of evolution, molecular genetics, neurosciences, animal communication and linguistics. Course consists of evolution, the history of hominid evolution, a comparison of animal communication and human language, the co-evolution of brain, language, and other anatomical developments.

191. Internship in Linguistics**(1-6) STAFF***Prerequisite: consent of instructor.*

Internship in a language-related work setting. Students apply concepts, methods, and issues from linguistics to professional contexts. Either in education, business, government, nonprofit organizations and other fields.

193. Undergraduate Research Seminar**(1-5) STAFF***Prerequisite: Upper-division standing; completion of 2 upper-division course in linguistics; consent of instructor.*

Students must have a minimum 3.0 GPA for the preceding 3 quarters and are limited to 5 units per quarter and 30 units total in all 193/199/199RA courses combined.

Original individual or collaborative research in linguistics. Weekly discussion of work in progress in a writing workshop setting.

194. Group Studies in Linguistics**(2-4) STAFF***Prerequisite: Linguistics 20 or 20A.*

May be repeated for credit to a maximum of 8 units.

A course limited to small groups whose interest and needs will determine the central focus.

195A-B. Honors Thesis

(2-3, 2-3) STAFF

Prerequisites: senior standing; consent of instructor.

Students must have at least a 3.5 GPA in the major. A 2-quarter, in-sequence course with final grade awarded upon completion of *Linguistics 195B*.

Guided research and writing of an original research paper to meet the requirements of the honors program in Linguistics.

195C. Honors Thesis

(2-3) STAFF

Prerequisite: *Linguistics 195B*.

Students must have at least a 3.5 GPA in the major.

Guided research and writing of an original research paper to meet the requirements of the honors program in Linguistics.

199. Independent Studies in Linguistics

(1-5) STAFF

Prerequisites: upper-division standing; completion of two upper-division courses in linguistics; consent of instructor.

Students must have a minimum 3.0 grade-point average for the preceding three quarters and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined. Admission by special arrangement.

Intended for the study of special areas within linguistics.

199RA. Independent Research Assistance in Linguistics

(1-5) STAFF

Prerequisites: upper-division standing; completion of two upper-division courses in linguistics; consent of instructor and department.

Students must have a minimum 3.0 grade-point average for the preceding three quarters and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined.

Coursework shall consist of faculty supervised research assistance.

GRADUATE COURSES

200A-B. Language and Linguistics for Non-Linguists

(4-2) GENETTI, GORDON, SCHWARTZ

Prerequisites: graduate standing; *Linguistics 200A* (for 200B).

An introduction to the scientific study of language: The sounds of language; word and sentence structure; semantics and pragmatics; discourse and conversational speech; the social and cultural functions of language; language change and the reconstruction of languages at earlier stages.

201. Research Methodology and Statistics in Linguistics

(4) GRIES

Fundamentals of scientific inquiry and methodology; basics of experimental design, statistical methods (descriptive, analytic, and hypothesis-testing) relevant to linguistics such as Chi-square, testing of means, ANOVA, correlation and regression, cluster analysis, etc.

202. Advanced Research Methods and Statistics

(4) GRIES

Prerequisite: *Linguistics 201*

Multifactorial and multivariate statistical methods for analyzing observational and experimental data in linguistics: ANOVA; ANCOVA; regression techniques, generalized linear models for count and proportion data; hierarchical configurational frequency analysis, cluster analysis; graphical methods for data exploration.

206. Introduction to Phonetics

(4) GENETTI, GORDON

Prerequisite: *Linguistics 20* or *20A*.

An introduction to the articulatory and acoustic properties of speech sounds. Survey of speech sounds found in the languages of the world. Emphasis on ear training and transcription using the IPA.

207. Introduction to Phonology

(4) GORDON

Prerequisite: *Linguistics 206*.

Introduction to the description of the sound patterns of natural language.

208. Introduction to Morphology

(4) MITHUN, GENETTI

Prerequisite: *Linguistics 111*.

How meaning is encoded in words in languages of the world. Morphological and morphophonemic processes, lexical categories, derivation and inflection, productivity, tense, aspect, mode, case, concord, valence changes, (passives, antipassives, benefactives, causatives), morphological typologies.

209. Introduction to Syntax

(4) THOMPSON

Prerequisite: *Linguistics 200* or *200A*.

Similarities and differences among languages in the grammatical devices they use to signal relations between nouns and verbs, negation, comparison, attribution (adjectives), and backgrounding. Data from a range of languages presented and analyzed.

210. Computational Linguistics

(4) GRIES

Prerequisite: *Linguistics 200* or *200A* (for non-linguistic students).

Computational linguistics and statistical natural language processing; hands-on work with a programming language, co-occurrence phenomena, computational lexicography and word sense disambiguation, automatic text processing, and other topics.

212. Discourse Transcription

(4) DU BOIS

Methods for transcribing conversational discourse, with focus on discourse features relevant to linguistic and interactional research. Features include pause, laughter, intonation, voice, speaker overlap, turn-taking, participation, others. Recording natural conversation, computer-assisted transcription, transcription as theory, alternative transcription systems, transcription ethics/politics.

213. Experimental Phonetics

(4) GORDON

Prerequisite: *Linguistics 211*.

The experimental approach to the articulation, acoustics, and perception of speech. The relation of phonetics to phonological alternations and sound change. The use of phonetic data to resolve phonological questions. Interpretation and evaluation of experiments. The acoustic theory of maximal perceptual distance.

214. Discourse

(4) CLANCY, THOMPSON, CUMMING

Survey of approaches to discourse analysis. Discourse and grammar, information flow, narrative and rhetorical structure, the analysis of conversations, comparisons of spoken and written language.

215. Introduction to Historical-Comparative Linguistics

(4) GORDON, MITHUN, KENNEDY

Prerequisite: *Linguistics 211*.

An introduction to linguistic change, genetic classification of languages, and methods of reconstructing parent languages.

216. Grammar Writing

(4) MITHUN, GENETTI

Prerequisites: *Linguistics 208*, *234* and *235*.

Training in writing a description of a language, including critical review of selected existing grammars, discussion of contents, and practice in writing.

217. Discourse and Grammar

(4) DU BOIS, THOMPSON

Prerequisites: *Linguistics 212* and *214*.

Survey of recent approaches to discourse and grammar, including referential pragmatics, dialogic syntax, construction grammar, preferred argument structure, and emergent grammar. Application of these approaches to natural language data, including face-to-face conversation.

218. Corpus Linguistics

(4) GRIES

Prerequisites: graduate standing; open to linguistics majors only.

An introduction to computerized research methods, which are applied to large data bases of language used in natural communicative settings to supplement more traditional ways of linguistic analysis in all linguistic subdisciplines.

219. Corpus Construction

(4) GRIES, DU BOIS

Design and construction of electronic corpora to represent spoken or written forms of language. Data collection from electronically available text/transcripts, linguistic fieldwork, archives. Issues of sampling, balancedness, representativity, scale; formatting, markup, annotation, coding, tools; archival preservation, orthography, politics, ethics.

220. Prosody

(4) GORDON

Perceptual and acoustic aspects of pitch, amplitude, and tempo and their interaction with discourse. Comparison of prosodic theories.

221A-B-C. Field Methods

(6-6-6) GENETTI, GORDON, MITHUN, THOMPSON

Prerequisites: *Linguistics 208*, *214*, *234*, and *235*.

A three-quarter in-progress sequence course with grades for all quarters issued upon completion of *Linguistics 221C*.

Techniques of eliciting and analyzing phonological, grammatical, and discourse data. Students work with a speaker of a little known language for three consecutive quarters. A series of short papers is required.

222. Typology and Universals

(4) CUMMING, GORDON, COMRIE

Prerequisites: *Linguistics 208* and *234*.

Reading and discussion of major contributions to the literature in typology and universals, focusing on such problems as lexical categories, systems of case marking, voice, reflexives, tense-aspect-mood, and relative clauses.

223. Languages in Contact

(4) GENETTI, MITHUN

Prerequisite: *Linguistics 215*.

Types, causes, mechanisms, and consequences of contact-induced language change, including a consideration of pidgins and creoles.

224. Spoken and Written Discourse

(4) CUMMING

Prerequisites: *Linguistics 212* and *214*.

Comparisons of different genres and styles of writing and speaking, focusing on ways in which language use determines its form.

225. Semantics and Pragmatics

(4) CUMMING

Prerequisite: *Linguistics 209*.

Introduction to the study of meaning. How meanings are integrated into linguistic sign systems, contexts of use. Pragmatic theories of indexicality, deixis, implicature, presupposition, speech acts, discourse comprehension. Semantic differences across languages.

226. Language and Cognition

(4) CLANCY, GRIES

Prerequisites: *Linguistics 208*, *209*, and *214*.

A psycholinguistic overview of the relationship between language and cognition, including cognitive constraints on the nature of lexical and grammatical categories, morphological structure, sentence-level syntax, and discourse organization.

227. Language as Culture

(4) DU BOIS

How culture frames the use and interpretation of language; how speaking creates culture. Language as culture mediates sociocultural production of meaning, cognition, authority, practice. Classic readings from linguistic anthropology and sociocultural linguistics confront new research on relation between language, thought, culture.

228. Discourse in Sociocultural Interaction

(4) DU BOIS

Discourse as locus of sociocultural action and dialogic interaction. How discourse practice constitutes both situated meanings and sociocultural frameworks. Stancetaking, evaluation, positioning, alignment, resonance, affect, epistemicity, empathy,

intersubjectivity in language. Focus on current research on language in naturally occurring interaction.

230. Methods in Sociocultural Linguistics
(4) BUCHOLTZ

Field methodologies for research on language, culture, and society. Topics include ethics and politics of research, ethnographic methods, interviewing, audio and video data collection, fieldnotes, relationship between fieldwork and analysis. Students carry out original field research during the quarter.

231. History of Linguistics
(4) CHAFE, THOMPSON

Prerequisites: Linguistics 208, 209, 211, and 215.

Ways in which linguistics has been practiced over the last 2,500 years, with emphasis on developments in the nineteenth and, especially, twentieth centuries. People and ideas that have most influenced the field.

232. Foundations of Sociocultural Linguistics

(4) BUCHOLTZ

Investigates sociocultural theories of language as developed in linguistics, anthropology, sociology, philosophy and other fields. A comparative survey of the major theoretical issues in the field both historically and in the present day, with an emphasis on the relationship between theory and empirical analysis.

233. Language, Gender, and Sexuality
(4) BUCHOLTZ

Advanced study of the linguistic dimensions of gender and sexuality. Emphasis on the role of language in feminist theory and gender theory; evaluation and application of research methods.

234. Advanced Syntax
(4) THOMPSON, MITHUN

Prerequisite: Linguistics 209.

Functional approaches to syntax. Methods of syntactic description and explanation. Survey of clause-level syntactic structures in diverse languages.

235. Advanced Phonology
(4) GORDON

Prerequisite: Linguistics 211.

Review of articulatory and acoustic phonetics and methods of phonological description and analysis. Current issues in phonological theory. Survey of phonological patterns and systems in diverse languages.

236. Advanced Language Change
(4) MITHUN

Prerequisite: Linguistics 215.

Types of theories of language change. Language families and subgroups. Internal and comparative reconstruction. The interpretation of historical records. Dialectology; sociolinguistic factors in language change and processes of grammaticization. Ramifications of observed changes for synchronic theories of language structure.

237. Introduction to First Language Acquisition

(4) CLANCY, GRIES

Prerequisite: Linguistics 200A or 200.

Introduction to current theories and methods in the study of language development. Topics include cross-linguistic developmental differences, the relationship between linguistic and socio-cognitive development, and cultural differences in language socialization.

238. Syntax Beyond the Clause

(4) CUMMING, GENETTI, THOMPSON, MITHUN

Prerequisite: Linguistics 234.

Functional approaches to the syntax of multi-clausal constructions, including relative clause structures; complements; adverbial clauses; clause chaining; and issues of co-ordination and subordination.

239. Introduction to Teaching English to Speakers of Other Languages

(4) FRODESEN

Surveys theoretical and methodological issues related to teaching English as a second or foreign language. Students examine current research and pedagogy in TESFL and developments in second language acquisition theory; evaluate teaching materials, and develop classroom lessons.

241. Topics in Phonetics and Phonology
(4) GENETTI, GORDON

Prerequisites: Linguistics 208 or 211 or 212 or 235.

Specialized topics in phonetics and phonology.

244A-B. Topics in Linguistic Areas
(4-2) COMRIE, GENETTI, MITHUN

Prerequisites: Linguistics 208, 209, 211, and 215 (for 244A); Linguistics 244A (for 244B).

May be repeated for credit.

Specialized topics in the study of a given linguistic area.

245. Topics in Language Change
(4) COMRIE, GENETTI, MITHUN, THOMPSON

Prerequisites: Linguistics 208, 209, and 215.

Specialized topics in language change.

246. Topics in Discourse

(4) CLANCY, CUMMING, DU BOIS, THOMPSON

Prerequisites: Linguistics 212 or 214 or 234.

Specialized topics in discourse.

247. Topics in Psycholinguistics

(4) CLANCY, GRIES

Prerequisites: Linguistics 208, 209, and 211.

Specialized topics in psycholinguistics.

248. Topics in Sociocultural Linguistics

(4) BUCHOLTZ, DU BOIS

Prerequisites: Linguistics 227 or 228 or 230 or 232.

Specialized topics in sociocultural linguistics.

250. Language Documentation

(4) GENETTI, GORDON, MITHUN

Issues in the creation of lasting, multipurpose records of a language. Documentation as collaborative, community-based initiative. Description and documentation, archive creation, metadata, technologies, materials, ethics, ethnography, orthography, and multimedia. Students participate in a collaborative documentation project as primary coursework.

251A. Seminar in Phonetics and Phonology

(4) GENETTI, GORDON

Prerequisite: Linguistics 208 or 211 or 212 or 235.

May be repeated for credit.

Specialized topics in phonetics and phonology.

252A-B. Seminar in Morphology and Syntax

(4-2) MITHUN, THOMPSON, GENETTI, GRIES

Prerequisites: Linguistics 208 and 234 (for 252A); Linguistics 252A (for 252B).

May be repeated for credit.

Specialized topics in morphology and syntax.

253A. Seminar in Semantics and Pragmatics

(4) CUMMING, THOMPSON, DU BOIS

Prerequisite: Linguistics 209 and 225.

May be repeated for credit.

Specialized topics in semantics and pragmatics.

254A-B. Seminar in Discourse

(4-2) CHAFE, MITHUN, CLANCY, DU BOIS

Prerequisite: Linguistics 212 or 214 or 234 (for 254A); Linguistics 212, 214, 234, and 254A (for 254B).

May be repeated for credit.

Specialized topics in discourse.

255A-B. Seminar in Language Change

(4-2) GENETTI, MITHUN, LI, COMRIE

Prerequisites: Linguistics 208, 209, and 215 (for 255A); Linguistics 208, 209, 215, and 255A (for 255B).

May be repeated for credit.

Specialized topics in language change.

256A-B. Seminar in Typology and Universals

(4-2) MITHUN, THOMPSON, GENETTI, COMRIE

Prerequisites: Linguistics 208 or 222 or 234 or 235 (for 256A); Linguistics 208, 222, 234, 235, and 256A (for 256B).

May be repeated for credit.

Specialized topics in typology and universals.

257A-B. Seminar in Psycholinguistics

(4-2) CLANCY, GRIES

Prerequisites: Linguistics 208, 209, and 211.

May be repeated for credit.

Specialized topics in psycholinguistics.

258A-B. Seminar in Sociocultural Linguistics

(4-2) BUCHOLTZ, DU BOIS

Prerequisite: Linguistics 227 or 228 or 230 or 232 (for 258A); Linguistics 258A (for 258B).

May be repeated for credit.

Specialized topics in sociocultural linguistics.

262. History of Linguistics

(4) STAFF

Prerequisites: Linguistics 208, 209, 211, and 215.

Ways in which linguistics has been practiced over the last 2,500 years, with emphasis on developments in the nineteenth and, especially, twentieth centuries. People and ideas that have most influenced the field.

270. Professionalism
(2) GORDON

Prerequisite: graduate standing in linguistics.

Skills important to the professional linguist: preparing abstracts for and delivering oral presentations at conferences; preparing grant proposals; publishing research.

271. Research Orientation

(2) CLANCY

Prerequisite: graduate standing in linguistics.

May not be applied toward the M.A. or Ph.D. degree requirements.

Sequence of lectures by faculty of the Linguistics Department and closely related departments, to acquaint new graduate students with current faculty research, and with research directions and resources of the campus.

272. Linguistics Colloquium

(2-4) STAFF

Prerequisite: graduate standing.

May be repeated for credit. May not be applied toward the M.A. or Ph.D. degree requirements.

Presentations on current topics in linguistics by visiting scholars, faculty, and graduate students.

273A-B. Language and the Body

(4-2) LERNER, THOMPSON

Same course as Sociology 273A-B. A two-quarter in-progress sequence with both grades given upon completion of Sociology 273B.

Brings together the methods and findings of functional linguistics and those of conversation analysis in a dialogue centering on the visible behavior of the body in the organization of talk-in-interaction, especially gesture, gaze, and body movement.

274. Proseminar in Language, Interaction, and Social Organization

(2-4) BUCHOLTZ, DU BOIS, THOMPSON

Prerequisite: graduate standing.

Same course as Sociology 274 and Education 274. May be repeated for credit.

Discussion of current research, literature, and theoretical and methodological issues in language and social interaction.

280A-B. Seminar in the Evolutionary Origin of Languages

(4-2) LI

Prerequisites: a strong background in neuroscience and/or paleo-anthropology and/or linguistics; Linguistics 280A (for 280B).

Course infers the evolutionary development of the communicative behavior of hominids on the basis of evidence drawn from paleo-anthropology, neuroscience, comparative animal and human communication, linguistics, and human genetics.

281. Sociolinguistics

(4) BUCHOLTZ

Prerequisite: Graduate standing.

Study of language as a social phenomenon, with emphasis on language use outside the U.S. context. Quantitative and qualitative approaches to regional and social dialects register, linguistic power, and solidarity, language contact and change, multilingualism, codeswitching, language shift and loss.

286. African American Language and Culture

(4) BUCHOLTZ

Prerequisite: Graduate standing.

History, structure, and varieties of African American

English. Debates over the origins of African American vernacular English; representations of African American speech in popular culture; language and hip-hop culture; the use of African American Vernacular English by other ethnic groups.

297. Graduate Studies

(4) STAFF

Prerequisite: consent of instructor.

Graduate credit given for an upper-division course with additional work at the graduate level.

299. Topics in Applied Linguistics

(4) STAFF

Same course as Education 299, EACS 299, French 299, German 299, and Spanish 299.

Specialized topics in the study of applied linguistics.

470. Professionalism

(1-3) STAFF

Prerequisite: graduate standing in Linguistics.

Skills important to the professional linguist: preparing abstracts for and delivering oral presentations at conferences; preparing grant proposals; publishing research.

500. Teaching Assistant Practicum

(1-4) STAFF

Prerequisites: appointment as teaching assistant and departmental approval.

No unit credit allowed toward advanced degree. Supervised teaching of undergraduate linguistics courses.

504A-B. Practicum in Teaching English as a Second Language

(2-2) FRODESEN

Prerequisite: consent of department.

Students must submit application for ESL Program T.A. appointment.

Preparation in teaching English for academic purposes and concurrent training for prospective and newly appointed teaching assistants in the ESL Program. Topics include orientation to the ESL curriculum, reading and composition pedagogy, academic oral skills, syllabus design and classroom techniques.

505. Teaching Assistant Seminar

(1) CLANCY, GORDON

No credit allowed toward advanced degree.

Covers development of teaching techniques.

591. Research in Linguistics

(1-12) STAFF

No unit credit allowed toward advanced degree.

Research must be under the direction of a faculty member(s).

593AA-ZZ. Topics in Linguistics

(2) STAFF

Prerequisite: consent of instructor.

Specialized studies in a specific area of linguistics.

594. Topics in Linguistics

(4) STAFF

Prerequisite: consent of instructor.

May be repeated for credit.

Specialized studies in an area of linguistics.

595AA-ZZ. Topics in Linguistics

(4) STAFF

Prerequisite: consent of instructor.

Specialized studies in a specific area of linguistics.

596. Directed Reading and Research

(2-4) STAFF

Prerequisite: consent of instructor.

May be repeated for credit as determined by the department chair.

Individual tutorial in any area of linguistics.

597. Individual Study for Master's and Ph.D. Examinations

(1-12) STAFF

Prerequisites: consent of instructor and graduate advisor.

No unit credit allowed toward advanced degree. Instructor should be student's major professor or chair of the committee.

598. Master's Thesis Research and Preparation

(1-12) STAFF

Prerequisites: consent of instructor and graduate advisor.

No unit credit allowed toward degree.

Master's thesis research and preparation. Instructor normally should be chair of the student's thesis committee. Only for research underlying the thesis, writing the thesis.

599. Ph.D. Dissertation Research and Preparation

(1-12) STAFF

Prerequisite: instructor approval required prior to registration.

Marine Science

Interdepartmental Graduate Program in Marine Science

Division of Mathematical, Life, and Physical Sciences

Life Sciences and Technology Building

Room 3310; Telephone: (805) 893-8162

E-mail: marinegg-gradasst@lifesci.ucsb.edu

Web site: marinegg.ucsb.edu

Program Chair: Mark Brzezinski

Faculty

Department of Anthropology

Shankar Aswani, Ph.D., University of Hawaii, Associate Professor (fisheries/ maritime anthropology and marine resource management, sea-tenure regimes, foraging strategies of traditional fisherman, Insular Pacific [Soloman Islands, Tonga, Hawaii])

Susan C. Stonich, Ph.D., University of Kentucky, Professor (human dimensions of global environmental change, coastal zone development, especially aquaculture and tourism, Latin America and Asia)

Department of Chemical Engineering

Frank Doyle, Ph.D., California Institute of Technology, Professor (biosystems analysis and control, biomedical control systems synthesis, application of advanced control schemes to nonlinear, multivariable, constrained industrial processes; characterization of process nonlinearity for control-relevant design)

Department of Chemistry and Biochemistry

Alison Butler, Ph.D., UC San Diego, Professor (bio-inorganic chemistry of the marine environment, biological role of vanadium, acquisition of transition metal ions by marine microorganisms)

Department of Ecology, Evolution, and Marine Biology

Alice L. Aldredge, Ph.D., UC Davis, Professor (biological oceanography, zooplankton ecology, carbon cycling)

Mark A. Brzezinski, Ph.D., Oregon State University, Professor (biological oceanography, elemental cycling, phytoplankton ecology)

Craig A. Carlson, Ph.D., University of Maryland, Professor (marine microbial ecology, bacterioplankton, dissolved organic carbon, marine biogeochemistry)

David J. Chapman, Ph.D., Stanford University, Professor (phycology, biochemical evolution)

James J. Childress, Ph.D., UC San Diego, Professor (ecological physiology of invertebrates and fishes, biological oceanography, physiology of deep-sea animals)

Peter M. Collins, Ph.D., University of London, Professor (endocrinology, hormonal regulation in vertebrates)

Steven D. Gaines, Ph.D., Oregon State University, Professor (marine community ecology, dispersal, biogeography, biostatistics)

Gretchen E. Hofmann, Ph.D., University of Colorado, Associate Professor (marine animal physiological ecology)

Sally J. Holbrook, Ph.D., UC Berkeley, Professor (population ecology, marine vertebrate predation and competition)

Robert S. Jacobs, Ph.D., Loyola University, Professor (pharmacology, cellular and molecular mechanism of action of marine natural products and toxins)

Armand M. Kuris, Ph.D., UC Berkeley, Professor (parasitology, marine ecology, crustacean biology)

Sally MacIntyre, Ph.D., Duke University, Professor (physical and biological oceanography and limnology, bio-physical coupling, mixing, water column microstructure)

John M. Melack, Ph.D., Duke University, Professor (limnology, biogeochemistry, wetland ecology)

Roger Nisbet, Ph.D., University of St. Andrews, Scotland, Professor (theoretical population ecology, marine toxicology)

Barbara B. Prezelin, Ph.D., Scripps Institution of Oceanography, Professor (phytoplankton physiology and productivity, regulation of marine photosynthesis, bio-optical modeling)

Russell J. Schmitt, Ph.D., UC Los Angeles, Professor (marine community ecology and population biology, consumer-resource interactions; marine invertebrates and reef fishes)

Robert R. Warner, Ph.D., Scripps Institution of Oceanography, Professor (evolutionary ecology and population biology; ecology and behavior of coral reef fishes)

Department of Molecular, Cellular, and Developmental Biology

Kathleen Foltz, Ph.D., Purdue University, Associate Professor (cellular and molecular biology, marine invertebrate development)

Daniel Morse, Ph.D., Albert Einstein College of Medicine, Professor (molecular genetics, biochemistry, marine biology, developmental biology)

William C. Smith, Ph.D., UC Santa Cruz, Professor (chordate embryogenesis and morphogenesis, developmental genetics of marine urochordates)

J. Herbert Waite, Ph.D., Duke University, Professor (protein chemistry, biomolecular materials in marine invertebrates, adhesive proteins)

Department of Geography

David Carr, Ph.D., University of North Carolina, Chapel Hill, Assistant Professor (population (migration, fertility), health, environmental change, deforestation, rural development, Latin America)

Tommy Dickey, Ph.D., Princeton University, Professor (atmosphere-ocean interactions & upper ocean mixing; turbulence & internal waves)

Catherine Gautier, Ph.D., University of Paris, Professor (earth radiation budget and cloud processes, radiative transfer and remote sensing, global climate processes and earth system science)

Joel Michaelsen, Ph.D., UC Berkeley, Professor (climatology/meteorology, climate change, marine resources, temporal and spatial statistics)

David Siegel, Ph.D., University of Southern California, Professor (physical and bio-optical oceanography, numerical modeling, turbulence, air-sea interaction and theoretical ecology)

Libe Washburn, Ph.D., UC San Diego, Professor (ocean turbulence and mixing processes, ocean bio/optics, air-sea interaction and marine pollution)

Department of Earth Science

Jordan F. Clark, Ph.D., Columbia University, Associate Professor (hydrogeology)

Rachel M. Haymon, Ph.D., Scripps Institution of Oceanography, Professor (marine geology and geochemistry)

James P. Kennett, Ph.D., Victoria University of Wellington, New Zealand, Professor (paleoceanography, marine geology)

David W. Lea, Ph.D., Massachusetts Institute of Technology—Woods Hole Oceanographic Institute, Professor (chemical oceanography and paleoceanography)

Bruce P. Luyendyk, Ph.D., Scripps Institution of Oceanography, Professor (tectonics, geophysics, paleomagnetism)

Ken C. Macdonald, Ph.D., Massachusetts Institute of Technology, Professor (marine tectonics and magnetism)

David L. Valentine, Ph.D., UC Irvine, Associate Professor (biogeochemical cycling, microbially mediated transformations in marine sediments and waters)

Department of Mechanical and Environmental Engineering

Wilbert J. Lick, Ph.D., Rensselaer Polytechnic Institute, Professor (oceanography and limnology, applied mathematics)

Stephen R. McLean, Ph.D., University of Washington, Professor (fluid mechanics, physical oceanography, sediment transport)

Donald Bren School of Environmental Science and Management

Christopher Costello, Ph.D., University of California, Berkeley, Agricultural & Resource Economics, Associate Professor (environmental regulation and natural resource management with a particular emphasis on information, its value, and its effect on management decisions. Topical interests include biological diversity, introduced species, regulation of polluting industries, and marine policy)

Trish Holden, Ph.D., UC Berkeley, Associate Professor (environmental microbiology, coastal and estuarine bacterial ecology, soil microbiology)

Bruce Kendall, Ph.D., University of Arizona, Associate Professor (applied ecology, quantitative ecology with emphasis on population dynamics of organisms)

Hunter Lenihan, Ph.D., University of North Carolina, Chapel Hill, Associate Professor (community, conservation, and restoration ecology, fisheries oceanography, polar and deep-sea biology, adaptive management of marine resources)

Oran Young, Ph.D., Yale University, Professor (environmental institutions/regimes, fisheries management, protection of marine mammals, offshore oil and gas development, compliance and enforcement, impacts on coastal communities and polar regions)

Affiliated Faculty

Carol Blanchette, Ph.D., (Marine Science Institute)

Milton Love, Ph.D., (Marine Science Institute)

Norman Nelson, Ph.D., (Institute for Computational Earth System Science)

Gail Osherenko, J.D., (Marine Science Institute)

Langdon Quetin, Ph.D., (Marine Science Institute)

Robin Ross, Ph.D., (Marine Science Institute)

Alison Whitmer, Ph.D., (Marine Science Institute)

Emeriti Faculty

James F. Case, Ph.D., Johns Hopkins University, Professor Emeritus (bioluminescence, neurobiology)

Raymond C. Smith, Ph.D., Stanford University, Professor Emeritus (biooptics, remote sensing)

Robert K. Trench, Ph.D., UC Los Angeles, Professor Emeritus (coral reef biology; biochemistry, physiology, and phylogenetics of symbiosis)

The Interdepartmental Graduate Program in Marine Science offers studies leading to the master of science and doctor of philosophy degrees in marine science. This program recognizes the intrinsic interdisciplinary nature of modern marine science and the necessity for cross-disciplinary, graduate-level training

through a program which brings together 45 marine faculty located in nine departments on the UCSB campus. These include the departments of Anthropology; Chemistry and Biochemistry; Chemical Engineering; Ecology, Evolution, and Marine Biology; Earth Science; Geography; Molecular, Cellular, and Developmental Biology; Mechanical and Environmental Engineering, and the Donald Bren School of Environmental Science and Management. All participating faculty maintain strong marine-oriented research programs which accommodate students from both the Interdepartmental Graduate Program in Marine Science and their own individual departmental graduate programs.

The program emphasizes the understanding of the ocean as an integrated system. Research areas in the program currently under active investigation include biological, chemical, and physical oceanography, marine geochemistry, marine geology and geophysics, marine biology, paleoceanography, ocean optics, and remote sensing, and ocean engineering. Some students focus on a particular disciplinary area for their research (e.g., biological oceanography, marine geology, ocean physics, etc.), but enter the program because they seek a broader training in marine science than can be provided within the framework of traditional departmental programs. Others complete interdisciplinary dissertations involving expertise in two or more subdisciplines within marine science

The program accepts students with a bachelor's degree or its equivalent in a biological or physical science, engineering, or mathematics. In addition to program requirements, candidates must meet university degree requirements found in the chapter "Graduate Education at UCSB." Master's and doctoral candidates in the program must be registered as full-time students in classes in the participating departments or in Interdepartmental Program classes. Highly individualized programs of instruction can be undertaken by students enrolled in the program and interdisciplinary research is greatly facilitated by the breadth of faculty available as advisors and thesis committee members.

Admission

Applicants may apply for either the M.S. or Ph.D. degree program. The M.S. program is small and oriented toward research. An M.S. degree is not required to enter the Ph.D. program. In addition to fulfilling all university requirements for admission to graduate status, described in the chapter "Graduate Education at UCSB" the applicant will normally hold a bachelor's degree in a biological or physical science, engineering, or mathematics. Such a degree should include at least one year each of calculus/statistics, chemistry, and physics. Applicants are required to submit the UCSB application for graduate admission, official undergraduate transcripts, three letters of recommendation from individuals who can best assess the applicant's academic and research potential, and the General Test (verbal, quantitative and analytical) of the Graduate Record Examination (GRE). Students should take the GRE as early as possible in the fall prior to applying to insure that scores arrive by the December 15 application deadline. Applicants whose native language

is not English, are required to take either the Test of English as Foreign Language (TOEFL) or the International English Language Testing System (IELTS) exam. Exceptions to this requirement will be considered for those students who have completed an undergraduate or graduate education at an institution whose primary language of instruction is English. The minimum TOEFL score for consideration is 550 when taking the paper-based test (PBT), 213 when taking the computer-based test (CBT), and 80 when taking the internet-based test (IBT). The minimum IELTS score for consideration is an Overall Band Score of 7 or higher. TOEFL or IELTS scores must not be more than two years old at the time of application to UCSB. Applicants should specify their general areas of interests within marine science on their application and provide a clear and focused statement of purpose. Applications will be reviewed and directed to appropriate faculty within the program for consideration. Applicants to the program must be accepted by a major professor with whom they wish to work and who has agreed to supervise the student's graduate training and thesis research. No student will be admitted without a faculty sponsor. Therefore, applicants are encouraged to contact individual faculty in the program directly. For more information on how to choose a faculty sponsor applicants may visit the Web site at marinegp.ucsb.edu or inquire to the Marine Sciences Program for assistance. Applications are considered for fall admission only and should be received with all supporting materials by December 15.

Graduate Program

Master of Science— Marine Science

The master of science (M.S.) degree is by thesis only and is viewed as a goal in its own right, rather than as a stepping stone to a Ph.D. The M.S. requirements are designed to provide maximum flexibility to accommodate individual student interests while also assuring a basic level of competence in marine science. M.S. candidates follow an integrated course of study recommended by their thesis advisor and thesis committee. The thesis committee is nominated by the end of the first year and consists of three ladder faculty from the Interdepartmental Program, with the major professor serving as committee chair.

Degree Requirements

Requirements include the following:

- A. Completion of the Marine Science core course series which includes:
 - EEMB 243 (Biological Oceanography)
 - Geology 266 (Chemical Oceanography)
 - Geology 276 (Geological Oceanography)
 - Geography 263 (Introduction to Physical Oceanography).
- B. Twenty-four additional units of graduate and upper-division coursework in the student's area of interest, of which no more than 8 may be courses numbered 596-599.
- C. Presentation of one seminar per year in the Marine Science Graduate Seminar (MARSC 595).
- D. Submission of a satisfactory thesis.

E. Presentation of a research seminar in open forum at the completion of the thesis.

There is no foreign language requirement.

Doctor of Philosophy— Marine Science

Candidates for the doctor of philosophy in marine science must demonstrate by coursework and written and oral examinations superior competence in the field of specialization, broad knowledge of the field of marine science, and satisfactory knowledge of sciences other than marine science that are relevant to the dissertation topic. Ph.D. candidates will follow an integrated course of study recommended by their dissertation advisor and dissertation committee. The dissertation committee will be nominated by the end of the second year and will consist of at least three faculty from the Interdepartmental Program, with the major professor serving as committee chair.

Degree Requirements

Requirements include the following:

- A. Completion of the Marine Science core course series which includes:
 - EEMB 243 (Biological Oceanography)
 - Geology 266 (Chemical Oceanography)
 - Geology 276 (Geological Oceanography)
 - Geography 263 (Introduction to Physical Oceanography).
- B. Completion of 16 additional units of graduate-level courses in marine sciences and the related area of specialty, exclusive of courses numbered 596 and 599.
- C. Presentation of one seminar per year in the Marine Science Graduate Seminar (MARSC 595).
- D. Satisfactory performance on a written qualifying exam covering a broad synthesis of marine science taken at the end of the first year. All students will take the same exam.
- E. Satisfactory performance on an oral qualifying exam administered by the student's dissertation committee. The exam will include the student's area of specialty and the dissertation prospectus. It should be taken by the end of the third year of study at the latest. Students petition to be advanced to candidacy after passing this exam.
- F. Submission of a satisfactory dissertation.
- G. Presentation of a research seminar in open forum at the completion of the dissertation. There is no foreign language requirement.

Marine Science Courses

GRADUATE COURSES

595. Seminar in Marine Science

(2) STAFF

A series of lectures and seminars on diverse research topics in marine science.

596. Directed Reading and Research

(2-12) STAFF

Prerequisite: consent of instructor.

Individual tutorial. Hours and credit by arrangement with faculty.

598. Master's Thesis Research and Preparation

(1-12) STAFF

Prerequisites: MS candidate and consent of committee

chair.

For research underlying the thesis and writing of the thesis.

599. Ph.D. Dissertation Preparation

(1-12) STAFF

Prerequisites: Ph.D. candidate and consent of instructor.

For writing of the dissertation.

Adebisi Agboola, Ph.D., Columbia University, Professor (number theory)

Paul J. Atzberger, Ph.D., Courant Institute, Assistant Professor (applied mathematics)

Charles A. Akemann, Ph.D., UC Berkeley, Professor (functional analysis)

Stephen Bigelow, Ph.D., UC Berkeley, Associate Professor (low-dimensional topology)

Bjorn Birnir, Ph.D., Courant Institute, Professor (nonlinear partial differential equations)

Maria Isabel Bueno Cachadina, Ph.D., Universidad Carlos III de Madrid, Lecturer (numerical linear algebra)

Paolo Cascini, Ph.D., Courant Institute, Assistant Professor (algebraic geometry)

Hector Ceniceros, Ph.D., Courant Institute, Associate Professor (numerical analysis)

Daryl Cooper, Ph.D., University of Warwick, Professor (topology, group theory)

Xianzhe Dai, Ph.D., State University of New York, Stony Brook, Professor (Geometric Analysis)

Carlos Garcia-Cervera, Ph.D., Courant Institute, Associate Professor (applied mathematics)

Larry J. Gerstein, Ph.D., University of Notre Dame, Professor (quadratic forms, number theory)

Kenneth R. Goodearl, Ph.D., University of Washington, Professor (algebra, functional analysis)

Sergei Gukov, Ph.D., Princeton University, Associate Professor (geometry, topology, string theory)

Birge Huisgen-Zimmerman, Ph.D., University of Munich, Professor (algebra, representation theory)

William Jacob, Ph.D., Princeton University, Professor (quadratic forms, division algebras)

Denis Labutin, Ph.D., Australian National University, Associate Professor (partial differential equations)

Darren Long, Ph.D., Cambridge University, Professor (low-dimensional topology)

James McKernan, Ph.D., Harvard University, Professor (algebraic geometry)

Jon McCammond, Ph.D., UC Berkeley, Associate Professor (geometric group theory, low-dimensional topology)

Kenneth C. Millett, Ph.D., University of Wisconsin, Professor (algebraic and geometric topology)

John Douglas Moore, Ph.D., UC Berkeley, Professor (differential geometry)

David Morrison, Ph.D., Harvard University, Professor (algebraic geometry, string theory)

Gustavo Ponce, Ph.D., Courant Institute, Professor (nonlinear partial differential equations)

Mihai Putinar, Ph.D., University of Bucharest, Professor (operator theory, complex analysis)

Martin Scharlemann, Ph.D., UC Berkeley, Professor (topology)

Thomas Sideris, Ph.D., Indiana University, Professor (partial differential equations, nonlinear wave equations)

Isadore Singer, Ph.D., University of Chicago, Professor (index theory, mathematical physics)

Jeffrey Stopple, Ph.D., UC San Diego, Professor (number theory)

Guofang Wei, Ph.D., State University of New York, Stony Brook, Professor (differential geometry)

Milen Yakimov, Ph.D., UC Berkeley, Associate Professor (Poisson geometry, representation theory)

Adil Yaqub, Ph.D., UC Berkeley, Professor (ring theory, universal algebras)

Rugang Ye, Ph.D., Bonn University, Professor (differential geometry)

Emeriti Faculty

Seymour Bachmuth, Ph.D., New York University, Professor Emeritus (group theory)

Thomas K. Boehme, Ph.D., California Institute of Technology, Professor Emeritus (function analysis)

Andrew M. Bruckner, Ph.D., UC Los Angeles, Professor Emeritus (real analysis)

Michael J. Cambern, Ph.D., UC Berkeley, Professor Emeritus (functional analysis)

Jack G. Ceder, Ph.D., University of Washington, Professor Emeritus (real analysis)

Michael G. Crandall, Ph.D., UC Berkeley, Professor Emeritus (nonlinear differential equations)

John E. Doner, Ph.D., UC Berkeley, Associate Professor Emeritus (logic, computer science)

John A. Ernest, Ph.D., University of Illinois, Professor Emeritus (functional analysis)

Ky Fan, D.Sc., University of Paris, Professor Emeritus (topology, functional analysis)

Eugene C. Johnsen, Ph.D., Ohio State University, Professor Emeritus (combinatorial analysis)

Henryk Minc, Ph.D., University of Edinburgh, Professor Emeritus (linear analysis)

James B. Robertson, Ph.D., Indiana University, Professor Emeritus (probability, ergodic theory)

Alex Rosenberg, Ph.D., University of Chicago, Professor Emeritus (quadratic form, Witt rings)

Melvin Rosenfeld, Ph.D., UC Los Angeles, Associate Professor Emeritus (functional analysis)

Stephen Simons, Ph.D., Cambridge University, Professor Emeritus (functional analysis)

James M. Sloss, Ph.D., UC Berkeley, Professor Emeritus (partial differential equations)

David A. Sprecher, Ph.D., University of Maryland, Professor Emeritus (real analysis)

Max L. Weiss, Ph.D., University of Washington, Professor Emeritus (complex analysis)

Raymond Y. Wong, Ph.D., Louisiana State University, Professor Emeritus (topology)

Julius Zelmanowitz, Ph.D., University of Wisconsin, Professor Emeritus (rings, modules)

Affiliated Faculty

Frederick Gibon, Ph.D., (Mechanical Engineering)

Igor Mezic, Ph.D., (Mechanical Engineering)

Jeff Moehlis, Ph.D., (Mechanical Engineering)

Linda R. Petzold, Ph.D., (Computer Science and Mechanical and Environmental Engineering)

Mathematics has been called the queen and the servant of the sciences. As an independent discipline, it was first developed by the ancient Greeks, to whom we owe the notion of “mathematical proof.” In the late seventeenth century, Newton developed calculus to serve as a tool in his treatment of mechanics, allowing him to correctly predict the motion of the planets. This astonishing success definitively demonstrated that mathematics is the ideal language for constructing exact quantitative theories. Today mathematics plays an absolutely fundamental role in physics, economics, and engineering, and plays an ever greater role in fields such as astronomy, chemistry, geology, finance, meteorology, cryptology, ecology, computer science, the social sciences, and a host of other areas. Yet mathematics is also vibrant as a study in its own right, alive with beautiful problems and ongoing developments. These may not be initially motivated by applications, but history indicates that many of the purely mathematical developments of today will become essential to the sciences of the future.

The Department of Mathematics offers five undergraduate programs; B.S. and B.A. degrees in mathematics, a B.S. degree in mathematical sciences; in conjunction with the Department of Economics, a B.A. in economics/mathematics; and in conjunction with the Program in Applied Statistics and Probability, a B.S. in financial mathematics and statistics.

The Department of Mathematics offers two distinct minor programs. These programs allow non-majors to supplement their majors with cohesive course of study that reflects their interests. To ensure appropriate advising and planning, students who are considering a minor in mathematics should consult the department as soon as possible.

The department offers graduate programs leading to the M.A. and Ph.D. degrees. In addition, it offers a wide variety of service courses needed as a foundation for study in the sciences, in engineering, and in other fields.

Undergraduate advisors are available in the department office to answer questions about the

department and other academic matters. Detailed information about the majors and about career options in mathematics is available in several publications, including *Professional Opportunities in the Mathematical Sciences*, which is available in the Department of Mathematics office, 6607 South Hall. The mathematics Web site (www.math.ucsb.edu) is designed to keep students and faculty informed about current seminars, colloquia, and special events.

Various prizes and awards are offered each year to outstanding majors in mathematics. These include the Raymond L. Wilder award and student memberships in the Mathematical Association of America. Each award is given on the basis of academic excellence in the mathematics program.

Students with a bachelor's degree in mathematics who are interested in pursuing a California Teaching Credential should contact the credential advisor in the Graduate School of Education as soon as possible.

Diagnostic and placement examination.

Students who do not have AP credit must take the Calculus Placement Test (CPT) which is offered online at www.math.ucsb.edu/ugrad/placement.php. Minimum scores on the CPT are required for enrollment in Mathematics 15 and 3A. The exam is not required for Math 34A.

Results on the Calculus Placement Test are substantially improved by reviewing algebra and trigonometry prior to taking the exam. A copy of *Precalculus Review Topics* may be obtained from the UCSB Bookstore, (805) 893-2961. Allow two to three weeks for delivery.

The department strictly enforces the requirement of a C grade or better in any course prerequisite to Mathematics 3B-C, 5A-B-C, 8, and 34B.

Honors Program in Mathematics

To enter the honors program in mathematics, a student must have completed 120 units of coursework with an overall grade-point average of at least 3.5 and at least 24 upper-division mathematics and statistics units with a grade-point average of at least 3.5 (excluding Mathematics 100A-B, 193, 195A-B, and PSTAT 133A-B-C and 193). To complete the honors program, the student must maintain a grade-point average of at least 3.5 in all upper-division and graduate mathematics and statistics courses (excluding Mathematics 100A-B, 193, 195A-B, and PSTAT 133A-B-C and 193) and complete one of the following: (a) a senior thesis, Math 197A-B; (b) a two-quarter graduate sequence; or (c) together with an advisor, submit a Distinction in the Major proposal for an interdisciplinary program of three mathematically oriented courses outside the math department to the undergraduate committee for its approval. Option C does not apply to economics/mathematics or financial mathematics majors. Distinction in the Major for each option will be awarded at graduation pending final approval by the Department of Mathematics Undergraduate Committee. Written projects will be submitted to the committee, and grades will be evaluated for coursework options.

Undergraduate Program

As preparation for entering any of the undergraduate mathematics programs, students should have completed two years of algebra and courses in plane geometry and trigonometry in high school. Students lacking this background should take Mathematics 15. In the first two years at UCSB, all students who major in mathematics must complete the appropriate pre-major requirements. All prospective majors and pre-majors must meet with a faculty advisor, prior to admission to full major status, to discuss career opportunities and degree options and to design an upper-division course program. Admission to full major status will be granted only after this meeting has been documented. Samples of recommended programs for each degree option are available in the *Department of Mathematics Undergraduate Handbook*.

Bachelor of Science—Mathematics

The bachelor of science degree is especially suitable for students who want a rigorous program with an emphasis on theory or who plan to go on to graduate work in mathematics.

Pre-major requirements. Students must complete all pre-major courses with a 2.5 or higher grade-point average. Physics 1 or 6A or 21, Engineering 3, and Computer Science 10 or 5 (any section) are excluded as part of the pre-major grade-point average computation but do apply to the overall GPA. Entry into the pre-major does not guarantee admission to full major status. Upon satisfactory completion of the following pre-major requirements, students may petition to be accepted into full major status: Mathematics 3A-B-C, 5A-B-C, 8; Physics 1, 6A or 21; Computer Science 10 or one course from 5AA-ZZ or Engineering 3.

Upper-division major. Fifty-two upper-division units in mathematics are required, excluding Mathematics 100A-B, 193, 195A-B; PSTAT 133A-B-C and 193. At least 40 of these 52 units must be in Mathematics. These 52 units must include Mathematics 108A-B, 111A-B, 117, 118A-B, 122A, either 111C or 118C, and either 145 or 147A. With an advisor's approval, 4 of the 52 units may be non-mathematics courses taken as part of a coherent mathematics program.

Bachelor of Science—Mathematical Sciences

This is an applied mathematics degree intended for students interested in computational aspects of mathematics, systems analysis, decision sciences, physical sciences, and operations research. It is suitable as preparation for advanced training in applied mathematics, management science, business administration, or operations research.

Pre-major requirements. Students must complete all pre-major courses with a 2.5 or higher grade-point average. Computer Science 10 or 5 (any section), Engineering 3, and Physics 1 or 6A or 21, are excluded as part of the pre-major grade-point average computation but do apply to the overall major GPA. Entry into the pre-major does not guarantee admission to full major status. Upon satisfactory completion of the following pre-major requirements, students

may petition to be accepted into full major status: Mathematics 3A-B-C, 5A-B-C, 8; Physics 1, 6A, or 21; Computer Science 10 or one course from 5AA-ZZ or Engineering 3.

Upper-division major. Fifty-two upper-division units in mathematics are required, excluding Mathematics 100A-B, 193, 195A-B; PSTAT 133A-B-C and 193. At least 40 of these 52 units must be in Mathematics. The 52 units must include: Mathematics 104A-B, 108A, and two two-quarter sequences chosen from Mathematics 119A-B, either 118A-B or 122A-B, 124A-B, 132A-B, 137A-B and PSTAT 120A-B. With an advisor's approval, up to 4 of the 52 required units may be non-mathematics courses taken as part of a coherent mathematics program.

Bachelor of Arts—Mathematics

This degree provides the student with a broad, liberal education in pure mathematics and is flexible enough to allow a wide variety of upper-division programs that may be created by the student in consultation with a faculty advisor. The B.A. in mathematics contains a special concentration designed specifically as preparation for high-school teaching. However, completion of a concentration will not be formally acknowledged on the student's official transcripts or diploma.

Pre-major requirements. Students must complete all pre-major courses with a 2.5 or higher grade-point average. Computer Science 10 or 5 (any section), Engineering 3, and Physics 1 or 6A or 21 are excluded as part of the pre-major grade-point average computation but do apply to the overall major GPA. Entry into the pre-major does not guarantee admission to full major status. Upon satisfactory completion of the following pre-major requirements, students may petition to be accepted into full major status: Mathematics 3A-B-C, 5A, 8; Physics 1, 6A, or 21; Computer Science 10 or one course from 5AA-ZZ or Engineering 3.

Upper-division major. Forty upper-division units in mathematics are required, excluding Mathematics 100A-B, 193, 195A-B; PSTAT 133A-B-C and 193. At least 28 of these 40 units must be in Mathematics. The 40 units must include the specific requirements for one of the following concentrations, which will not be formally acknowledged on the student's official transcript or diploma:

Concentration 1 requirements: Mathematics 108A and three two-quarter sequences, chosen from Mathematics 104A-B, 108B-C, 109A-B, 111A-B, 115A-B, 118A-B, 119A-B, 122A-B, 124A-B, 132A-B, 137A-B, either Mathematics 145-147A, or 147A-B, PSTAT 120A-B. With an advisor's approval, 4 units of the 40 units may be non-mathematics courses taken as part of a coherent mathematics program.

Concentration 2 requirements: Mathematics 101A-B; 102A-B; 103 and 108A. With an advisor's approval, 4 units of the 40 units may be non-mathematics courses taken as part of a coherent mathematics program.

Bachelor of Arts—Economics/Mathematics

This program is offered jointly with the Depart-

ment of Economics. It provides a theoretical foundation for advanced study in economics, business administration, law, or management science.

Pre-major requirements. Students must complete all pre-major courses with a 2.7 or higher grade-point average and no individual grade below C-. Entry into the pre-major does not guarantee admission to full major status. Upon satisfactory completion of the following pre-major requirements, students may petition to be accepted into full major status: Economics 1 and 2; PSTAT 120A; Mathematics 3A-B-C, 5A-B-C, and 8.

Upper-division major. Forty-four upper-division units in economics and mathematics are required, excluding Economics 109. The 44 units must include Economics 104A-B, 105, and 140A-B; Mathematics 108A-B and 117; and 12 units of upper-division economics electives. Selected from Economics 100C, 106, 115, 116A-B-C, 117A, 120, 122, 133, 134A-B, 135, 143, 150A-B, 152, 153, 155, 170, 171, 174, 175A-B, 176, 180, 181, 184. For breadth, further elective courses concerning optimization and modeling, such as Mathematics 132A-B-C, are recommended. Students should consult closely with their advisors in the Departments of Economics and Mathematics regarding their upper-division programs, particularly if they intend to pursue graduate study in a closely related area such as mathematical economics, applied mathematics, statistics, or operations research.

Bachelor of Science—Financial Mathematics and Statistics

This is a joint major between the Department of Mathematics and the Department of Statistics and Applied Probability; in cooperation with the Department of Economics. This degree is intended for students who would like to learn how mathematics, probability and statistics play a key role in pricing and hedging securities in the financial markets.

Pre-major requirements. In order to be admitted into the Financial Mathematics and Statistics major, students must complete all of the following pre-major courses with a grade-point average of 2.5 or higher Mathematics 3A-B-C, 5A-B-C, 8, Economics 1 and 2, and PSTAT 120A-B. In addition, one course is required from the following: Computer Science 5AA-ZZ, 10 or Engineering 3. The computer science and engineering courses are excluded from the pre-major GPA calculation but will apply to the overall major GPA.

Entry into pre-major does not guarantee admission into full major status. Upon satisfactory completion of the pre-major requirements, and after meeting with a faculty advisor to discuss career opportunities and upper-division course electives, students may petition to be accepted to full major status.

Upper-division major. Fifty-two upper-division units in mathematics, statistics, and economics are required, excluding Mathematics 100A-B, 193, and 195A-B and PSTAT 133A-B-C. The 52 units must include Economics 104A, Mathematics 104A-B, 124A-B; PSTAT 120C, 130, 160A-B; and either PSTAT 170 or Mathematics 170. The remaining 12 elective upper-division

units can be chosen from: Economics 104B, 105, 134A-B, 140B; Mathematics 104C, 108A-B, 117; PSTAT 126, 131, 171, 173, 174.

Minor—Mathematics

All courses to be applied to the minor must be completed on a letter-grade basis. This includes both courses offered in mathematics and those offered by other departments and applied to the minor.

Preparation for the minor. Mathematics 3A-B-C, 5A, and 8.

Upper-division minor. Twenty-four upper-division units in mathematics are required excluding the following: Math 100A-B, 193, 195A-B.

Note: Please see page 118 for special conditions governing minors in the College of Letters and Science.

Minor—Mathematics for High School Teaching

All courses to be applied to the minor must be completed on a letter-grade basis. This includes both courses offered in mathematics and those offered by other departments and applied to the minor.

Preparation for the minor. Mathematics 3A-B-C, 5A, and 8.

Upper-division minor. Twenty-four upper-division units in mathematics and PSTAT are required. The required courses are: Mathematics 101A-B, 102A-B, 103, and 4 upper-division units of mathematics or PSTAT elective. The following courses will *not* apply to the minor: Mathematics 100A-B, 193, 195A-B; PSTAT 133A-B-C and 193.

Note: Please see page 118 for special conditions governing minors in the College of Letters and Science.

Graduate Program

Candidates for admission to graduate programs offered by the Department of Mathematics are required to submit Graduate Record Examination (GRE) general and mathematics subject test scores. Applicants whose native language is not English, are required to take either the Test of English as Foreign Language (TOEFL) or the International English Language Testing System (IELTS) exam. Exceptions to this requirement will be considered for those students who have completed an undergraduate or graduate education at an institution whose primary language of instruction is English. The minimum TOEFL score for consideration is 550 when taking the paper-based test (PBT), 213 when taking the computer-based test (CBT), and 80 when taking the internet-based test (IBT). The minimum IELTS score for consideration is an Overall Band Score of 7 or higher. TOEFL or IELTS scores must not be more than two years old at the time of application to UCSB.

Foreign students must have a score of 575 (or 231 on the computer-based test) for teaching assistantship consideration. Applicants for teaching assistant positions are encouraged to submit scores for the Test of Spoken English (TSE) at the time of application.

In addition to departmental requirements, candidates for graduate degrees must fulfill the

university degree requirements found in the chapter “Graduate Education at UCSB.”

In the following description of the M.A. and Ph.D. programs in mathematics, frequent mention will be made of “area requirements.” Area requirements exist in the disciplines of algebra, analysis, applied mathematics, geometry/topology, and other areas in probability and statistics. Students whose primary interest is in the area of statistics or probability should apply for admission to the Department of Statistics and Applied Probability, not to the Department of Mathematics. The area requirements are fulfilled by satisfactorily completing an examination and a one-year graduate course within the discipline. Complete descriptions of various area requirements and how they may be satisfied can be found in the publication *Graduate Program Handbook*, which is available on our Web site. Contact the staff graduate advisor at math-gradinfo@math.ucsb.edu, or at the following address: Department of Mathematics, University of California, Santa Barbara, CA 93106. This information can also be obtained via our Web site at www.math.ucsb.edu/grad.

Master of Arts—Mathematics Admission

The applicant must (1) fulfill the scholarship requirements for graduate study, and (2) hold a bachelor’s degree in mathematics or a closely related field. Evaluation of the candidate’s past work will be made by the admissions committee, and supplemental undergraduate courses will be required when necessary.

Degree Requirements

The department offers two plans for completing the degree: Plan 1 (thesis) and Plan 2 (examination option).

Both plans require completion of 42 units with the grade of at least B in each course, 24 of which must be in selected graduate courses offered by the Department of Mathematics. The remaining 18 units may be chosen from upper-division or graduate courses in mathematics, or in appropriate related fields with the approval of the Mathematics Graduate Committee. No more than 8 of the 24 graduate units may be in Mathematics 596/598 combined.

Plan 1, Thesis: In addition to the above, Plan 1 requires demonstration of adequate knowledge in linear algebra, modern algebra, real analysis, and complex analysis, and preparation of an acceptable thesis and oral defense of the thesis before a faculty committee. The 24 graduate units in mathematics must include at least one full-year course sequence that satisfies one of the area requirements.

Plan 2, Examination Option: Students must satisfy the area requirements in algebra and analysis. A student who wishes to substitute a different area requirement for one of the above areas must petition the departmental graduate committee.

Master of Arts—Applied Mathematics Admission

The candidate must (1) fulfill the scholarship requirements for graduate study; (2) hold a

bachelor’s degree in mathematics or a closely related field; and (3) have had undergraduate coursework in linear algebra, differential equations, advanced calculus, and in some area in which mathematics is applied. Evaluation of the candidate’s past work will be made by the admissions committee, and supplemental undergraduate courses will be required when necessary.

Degree Requirements

The department offers two plans for completing the degree: Plan 1 (thesis), and Plan 2 (examination option). All candidates must complete 42 units with the grade of B or better in each course, 24 units of which must be in graduate course sequences approved and offered by the Department of Mathematics. No more than 8 of the 24 graduate units may be in Mathematics 596/598 combined.

The remaining 18 units may be in upper-division or graduate-level courses in mathematics or, with the approval of the graduate committee, outside of mathematics, with a limit of 9 units outside the department.

Plan 1, Thesis: Students must prepare an acceptable thesis under the supervision of a faculty member and do an oral defense of it before a faculty committee. The 24 graduate units in mathematics must include at least one full-year course sequence that satisfies one of the area requirements.

Plan 2, Examination Option: Students must satisfy the area requirements in Applied Mathematics and Analysis. Students may petition the graduate committee to substitute a different area for Analysis.

Students interested in continuing to the Ph.D. normally follow Plan 2 for the master’s degree. To be invited to continue to the Ph.D. level, students are expected to complete their coursework and comprehensive examinations at a higher level than is expected of terminal master’s degree candidates.

Doctor of Philosophy—Mathematics Admission

A candidate for admission to the Ph.D. program in mathematics must fulfill the scholarship requirements for graduate study presented in the section of this catalog on graduate education and should have a strong undergraduate background in the mathematical sciences.

Degree Requirements

A student advances to candidacy for the degree by doing the following:

- Passing 72 units of 200-level graduate mathematics courses with a grade of at least B or S in each course (grades for coursework satisfying area requirements must meet the minimum required A- average). These 72 units must include at least one further full-year graduate sequence not being used to satisfy requirement (b).
- Satisfying three area requirements, normally algebra and analysis, plus a third area to be determined in consultation with the graduate advisor. S/U grading is not allowed in coursework used to satisfy area requirements.

(c) Passing an oral qualifying examination on the proposed plan and subject matter for the doctoral dissertation and on mathematical topics related to the student's research.

After advancing to candidacy, the student completes the requirements for the degree by submitting an acceptable dissertation representing an original mathematical contribution, and defending this dissertation before a faculty committee.

Optional Graduate Degree Emphasis in Computational Science and Engineering

The Departments of Chemical Engineering, Computer Science, Ecology, Evolution and Marine Biology, Electrical and Computer Engineering, Earth Science, Mathematics, and Mechanical and Environmental Engineering offer an interdisciplinary master's and Ph.D. degree emphasis in Computational Science and Engineering (CSE). Detailed program information can be found at www.cse.ucsb.edu.

CSE is a rapidly growing multi-disciplinary area with connections to the sciences, engineering, mathematics, and computer science. Computer models and simulations have become an important part of the research repertoire, supplementing (and in some cases replacing) experimentation. Going from application area to computational results requires domain expertise, mathematical modeling, numerical analysis, algorithm development, software implementation, program execution, analysis, validation, and visualization of results. CSE addresses these issues.

Although CSE includes elements from computer science, applied mathematics, engineering and science, it focuses on the integration of knowledge and methodologies from all of these disciplines and, as such, is a subject distinct from any of them.

All students pursuing an emphasis in CSE must complete the following:

- Numerical Methods: Mathematics 206A-B-C-D (students must take at least three)
- Parallel Computing: Computer Science 240A-B (students must take at least one)
- Applied Mathematics: Students must take a two course sequence from either the Mathematics 243A-B or the Mathematics 246A-B sequence

The specific requirements for the M.A. in Mathematics (thesis option only) with the CSE emphasis are as follows:

- The completion of the above requirements for an M.A. in mathematics
- A master's thesis in CSE

The thesis must be written under the supervision of a CSE ladder faculty member. The thesis committee must include a minimum of three permanent ladder faculty members, at least two from Mathematics and one from CSE (may be CSE faculty member from another department).

Students pursuing a Ph.D. with an emphasis in CSE must:

- Complete the above requirements for a Ph.D. in mathematics
- Write and defend a dissertation in CSE

The student's dissertation must be written

under the supervision of a Mathematics CSE ladder faculty member. The doctoral examination committee must include at least one CSE ladder faculty member and at least one ladder faculty member from another department.

Mathematics Courses

LOWER DIVISION

3A. Calculus with Applications, First Course

(4) STAFF

Prerequisite: Algebra Diagnostic Test.

Reduced credit of 2 units will be given to students who have received credit for Mathematics 2A or 34A. Not open for credit to students who have completed Mathematics 3AS.

Students with Advanced Placement credit should contact the department.

Differential Calculus including analytic geometry, functions and limits, derivatives, techniques and applications of differentiation, logarithmic and trigonometric functions.

3B. Calculus with Applications, Second Course

(4) STAFF

Prerequisite: Mathematics 3A with a minimum grade of C.

Not open for credit to students who have completed Mathematics 3BS. Reduced credit of 2 units will be given to students who have received credit for Mathematics 34B.

Students with Advanced Placement credit should contact the department.

Integral calculus including definite and indefinite integrals, techniques of integration, with applications in mathematics and physics.

3BI. Inquiry Based Calculus I

(4) STAFF

Prerequisite: AP score of 3 or higher; consent of instructor.

Not open for credit to students who have completed Mathematics 3B. Reduced credit of 2 units will be given to students who have received credit for Mathematics 34B.

Honors version of Mathematics 3B. Mathematical inquiry course is developed through problem solving and discovery.

3C. Differential Equations and Linear Algebra, First Course

(4) STAFF

Prerequisite: Mathematics 3B with a minimum grade of C.

Not open for credit to students who have completed Mathematics 3CS or 3CI.

First order ODEs including direction fields, separation of variables, first order linear equations, growth and decay, nonlinear models. Linear algebra including systems of linear equations, matrix inverses, determinants, vector spaces and subspaces, basis and dimension.

3CI. Inquiry Based Calculus II

(4) STAFF

Prerequisite: Mathematics 3B or Mathematics 3BI with a minimum grade of C.

Not open for credit to students who have completed Mathematics 3C.

Honors version of Mathematics 3C. Mathematical inquiry course is developed through problem solving and discovery.

3H. Honors Seminar, Calculus

(1) STAFF

Prerequisites: concurrent enrollment in Mathematics 3A or 3B or 3C.

May be repeated for credit to a maximum of 3 units.

A supplement to the Mathematics 3 sequence emphasizing fundamental concepts and applications. Intended for highly motivated and well prepared students.

5A. Differential Equations and Linear Algebra, Second Course

(4) STAFF

Prerequisite: Mathematics 3C or 3CI with a grade of C or better.

Second order linear ODEs, linear transformations including eigenvalues, eigenvectors and diagonalization. Linear systems of ODEs. Nonlinear systems and linearization.

5AI. Inquiry Based Calculus III

(4) STAFF

Prerequisite: Mathematics 3C or 3CI with a minimum grade of C.

Not open for credit to students who have completed Mathematics 5A.

Honors version of Mathematics 5A. Mathematical inquiry course is developed through problem solving and discovery.

5B. Vector Calculus with Applications, First Course

(4) STAFF

Prerequisites: Mathematics 5A or 5AI with a grade of C or better.

Differential Calculus of Functions of Several Variables. Gradient, Divergence, Curl. Double Integrals and Triple Integrals. Line Integrals in the Plane. Green's Theorem and Independence of Path.

5BI. Inquiry Based Calculus IV

(4) STAFF

Prerequisite: Mathematics 5A or 5AI with a minimum grade of C.

Not open for credit to students who have completed Mathematics 5B.

Honors version of Mathematics 5B. Mathematical inquiry course is developed through problem solving and discovery.

5C. Vector Calculus with Applications, Second Course

(4) STAFF

Prerequisites: Mathematics 5B or 5BI with a grade of C or better.

Line Integrals in Space, Surface Integrals. Divergence Theorem, Stokes's Theorem. Infinite Series, Fourier Series. Introduction to PDE.

5H. Honors Seminar, Advanced Calculus and Linear Algebra

(1) STAFF

Prerequisites: concurrent enrollment in Mathematics 5A or 5B or 5C.

May be repeated for credit to a maximum of 3 units.

A supplement to the Mathematics 5 sequence emphasizing fundamental concepts and applications. Intended for highly motivated and well prepared students.

8. A Transition to Higher Mathematics

(5) STAFF

Prerequisite: Mathematics 3B with a minimum grade of C.

Introduction to the elements of propositional logic, techniques of mathematical proof, and fundamental mathematical structures including sets, functions, relations, and other topics as time permits. Mastery of this material is essential for students planning to major in mathematics.

15. Precalculus

(4) STAFF

Prerequisite: a score at the required level on the Algebra Diagnostic Test.

Students who have earned a grade of C or better in a course with a prerequisite including algebra or trigonometry may not receive credit for this course.

A functional approach integrating algebra and trigonometry. Topics include: one-to-one and onto functions; inverse functions; properties and graphs of polynomial, rational, exponential, and logarithmic functions; properties and graphs of inverse trigonometric identities; and trigonometric equations.

34A. Calculus for Social and Life Sciences

(4) STAFF

Not open for credit to students who have completed Mathematics 3A.

Introduction to differential and integral calculus with applications to modeling in the biological sciences.

34B. Calculus for Social and Life Sciences**(4) STAFF**

Prerequisite: Mathematics 3A or 3AS or 34A with a grade of C or better.

Not open for credit to students who have completed Mathematics 3B or 3BS.

Continued study of differential and integral calculus with applications. Introduction to mathematical modeling with differential equations. Calculus of several variables including an introduction to partial derivatives.

91. Workshops in Mathematics**(1) STAFF**

May be repeated for credit to a maximum of 4 units.

Group workshops affiliated with selected lower-division mathematics courses.

94. Group Studies in Mathematics**(1-4) STAFF**

Prerequisite: consent of instructor.

Lectures and discussions on special topics.

UPPER DIVISION**100A. Mathematics for Elementary Teaching, I****(3) STAFF**

Prerequisite: upper-division standing.

Course cannot be used to satisfy any mathematics major or minor requirements.

This class teaches ways to think about and explain elementary school mathematics. Topics include: cultural and base-n number systems, algorithms, elementary number theory, probability, and graphing.

100B. Mathematics for Elementary Teaching, II**(3) STAFF**

Prerequisite: Mathematics 100A.

Course cannot be used to satisfy any mathematics major or minor requirements.

Completes the explanation of elementary school mathematics by discussing geometry and algebra. Discusses the pedagogy with the California Mathematics Framework, the NCTM Standards, and "replacement units."

101A. Classical Number Systems**(4) STAFF**

Prerequisites: Mathematics 3A and 8.

Not open for credit to students who have completed Mathematics 118A.

Especially suitable for prospective teachers. A conceptual rather than an axiomatic development starting with the natural numbers and progressing through the integral, rational, real, and complex number systems. The historical implications of these developments in number systems.

101B. Mathematical Systems**(4) STAFF**

Prerequisite: Mathematics 101A.

Not open for credit to students who have completed Mathematics 118A.

Especially suitable for prospective teachers. The theory of operations within rings and fields and the foundations of the real number system. Ideals, quotient rings, and factorization theorems. The history and the historical implications of these developments in mathematical systems.

102A-B. Modern Euclidean and Noneuclidean Geometry**(4-4) STAFF**

Prerequisites: Mathematics 3B (for 102A); Mathematics 102A (for 102B).

Especially suitable for prospective teachers. Topics in plane and solid geometry. The axioms of pure, Euclidean, projective, and noneuclidean geometry. Transformational geometry (isometries, dilatations, involutions, perspectivities, and projectivities). The history and the historical implications of these developments in geometry.

103. Introduction to Group Theory**(4) STAFF**

Prerequisite: Mathematics 8.

Not open for credit to students who have completed Mathematics 111A.

Intended primarily for prospective teachers. Introduction to group theory. Permutation groups, cyclic groups, theory of finite groups, group homomorphisms and isomorphisms, and Abelian groups. Applications to number theory and geometry.

104A. Introduction Into Numerical Analysis**(4) STAFF**

Prerequisites: Mathematics 5A-B-C; and, Computer Science 5AA-ZZ or 10 or 11AA-ZZ or 12 or Engineering 3.

Numerical methods for the solution of nonlinear equations (Newton method), for integration (quadrature formulas and composite integration), and for the initial value problem for ordinary differential equations (Euler and Kutta methods).

104B. Numerical Analysis**(4) STAFF**

Prerequisite: Mathematics 104A.

Numerical methods for the solution of systems of linear equations (direct and interactive methods), and the finite difference methods for boundary value problems for (ordinary and partial) differential equations.

104C. Advanced Topics in Numerical Analysis**(4) STAFF**

Prerequisite: Mathematics 104B

Topics in approximation theory; numerical methods for finding eigenvalues of a matrix; and advanced topics in numerical methods for ordinary and partial differential equations.

108A. Introduction to Linear Algebra**(4) STAFF**

Prerequisites: Mathematics 5A and 8.

Abstract Vector spaces and subspaces. Span and linear independence. Basis and dimension. Linear maps. Eigenvalues and eigenvectors.

108B. Advanced Linear Algebra**(4) STAFF**

Prerequisite: Mathematics 108A.

Diagonalization, inner product spaces, projections, least-squares approximations, invariant factors and elementary divisors, canonical forms, topics from advanced matrix theory, applied linear algebra, and group representation theory.

109A. Introduction to Mathematical Logic**(4) PUTINAR**

Prerequisite: Mathematics 8 or Computer Science 40.

Same course as Computer Science 109A.

An introduction to mathematical logic with applications in computer science and mathematics. Topics include propositional and predicate calculi; models; proof systems, decidability and undecidability, automated theorem-proving, unification, logic programming, and program verification.

111A. Introduction to Abstract Algebra**(4) STAFF**

Prerequisite: Mathematics 108A.

An introduction to algebraic structures with an emphasis on groups.

111B-C. Abstract Algebra**(4-4) STAFF**

Prerequisite: Mathematics 111A (for Mathematics 111B); Mathematics 111B (for Mathematics 111C).

Rings, fields, Galois theory.

113. Non-Euclidean Geometry**(4) STAFF**

Prerequisite: Mathematics 8.

An introduction to hyperbolic geometry with some discussion of other non-Euclidean systems.

115A-B. Introduction to Number Theory**(4-4) STAFF**

Prerequisite: Mathematics 8 (for 115A); Mathematics 115A (for 115B).

Divisibility, congruences, primitive roots and indices, quadratic residues and the quadratic reciprocity law, number-theoretic functions. Diophantine equations, the distribution of primes, number-theoretic methods in cryptography, quadratic forms, continued fractions and the approximation of real numbers, algebraic number theory, partitions.

115C. Topics in Number Theory**(4) STAFF**

Prerequisite: consent of instructor.

Recommended preparation: Mathematics 115A-B; consult the department or instructor for details.

Selected topics in number theory at the direction of the instructor.

116. Combinatorial Analysis**(4) STAFF**

Prerequisite: Mathematics 8.

Elementary counting principles, binomial coefficients, generating functions, recurrence relations, the principle of inclusion and exclusion, distributions and partitions, systems of distinct representatives, applications to computation.

117. Methods of Analysis**(4) STAFF**

Prerequisite: Mathematics 8.

Introduction to methods of proof in analysis. Topics include limits, sequences and series, continuity, compactness, as well as other topics. This course is intended to follow Mathematics 8 and to introduce students to the level of sophistication of upper-division mathematics.

118A-B-C. Introduction to Real Analysis**(4-4-4) STAFF**

Prerequisites: Mathematics 5A-B and 108A-B and 117 (for Mathematics 118A); Mathematics 118A (for Mathematics 118B); Mathematics 118B (for Mathematics 118C).

The real number system, elements of set theory, continuity, differentiability, Riemann integral, implicit function theorems, convergence processes, and special topics.

119A. Ordinary Differential Equations**(4) STAFF**

Prerequisites: Mathematics 5A-B.

Existence, uniqueness, and stability; the geometry of phase space; linear systems and hyperbolicity; maps and diffeomorphisms.

119B. Chaotic Dynamics and Bifurcation Theory**(4) STAFF**

Prerequisites: Mathematics 5A-B-C.

Recommended preparation: Mathematics 119A. Hyperbolic structure and chaos; center manifolds; bifurcation theory; and the Feigenbaum and Ruelle-Takens cascades to strange attractors.

122A-B. Introduction to Theory of Complex Variables**(4-4) STAFF**

Prerequisites: Mathematics 5A-B (for Mathematics 122A); Mathematics 122A (for Mathematics 122B).

Complex numbers, functions, differentiability, series extensions of elementary functions, complex integration, calculus of residues, conformal maps, mapping functions, applications.

124A. Partial Differential Equations**(4) STAFF**

Prerequisites: Mathematics 5A-B-C.

Wave, heat, and potential equations.

124B. Fourier Series and Numerical Methods**(4) STAFF**

Prerequisites: Mathematics 5A-B-C.

Recommended preparation: Mathematics 124A. Fourier series; generalized functions; and numerical methods.

130. Introduction to Mathematical Modeling**(4) STAFF**

Prerequisites: Mathematics 5A-B.

Introduction to the principles of mathematical modeling, both discrete and continuous.

132A. Introduction to Operations Research**(4) STAFF**

Prerequisite: Mathematics 5A.

Linear programming, the simplex method, duality, applications to the transportation and assignment problems, sensitivity analysis, problem formulation.

132B. Introduction to Operations Research**(4) STAFF***Prerequisites: Mathematics 5B and 132A.*

Network analysis: shortest route, minimal spanning tree and maximal flow problems; PERT including the critical path method; dynamic programming; game theory; integer programming, nonlinear programming.

137A-B. Graph and Network Theory**(4-4) STAFF***Prerequisites: Mathematics 5A and 8 (for Mathematics 137A); Mathematics 137A (for Mathematics 137B).*

Elements of graph and network theory including paths, circuits, trees, coloring, planarity, matching theory, Hall's Theorem, applications to scheduling theory, flows in networks, Menger's Theorem, and other topics as time permits.

145. Introduction to Topology**(4) STAFF***Prerequisite: Mathematics 8.*

Metric spaces, continuity, compactness, classification of surfaces, Euler characteristics, and fundamental groups. Additional topics at the discretion of the instructor.

147A-B. Introductory Differential Geometry**(4-4) STAFF***Prerequisites: Mathematics 5B; and, Mathematics 108A or 117 (for Mathematics 147A); Mathematics 147A (for Mathematics 147B).*

Curves and surfaces in three-dimensional Euclidean space, first and second fundamental forms, Gaussian and mean curvature, geodesics, Gauss-Bonnet theorem, and non-euclidean geometry.

170. Introduction to Mathematical Finance**(4) STAFF***Prerequisites: PSTAT 120A-B and 160A.**Same course as PSTAT 170.**Recommended preparation: PSTAT 160B and 171.*

Describes mathematical methods for estimating and evaluating asset pricing models, equilibrium and derivative pricing, options, bonds, and the term-structure of interest rates. Also introduces finance optimization models for risk management and financial engineering.

178. Introduction to Cryptography**(4) STAFF***Prerequisites: Computer Science 10; and, PSTAT 120A or 121A or equivalent courses.*

An introduction to the basic concepts and techniques of cryptography and cryptanalysis. Topics include: The Shannon Theory, classical systems, the enigma machine, the data encryption standard, public key systems, digital signatures, file security.

181A-B. Advanced Problem Solving: Mathematical, Historical, and Pedagogical Contexts**(4) STAFF***Prerequisites: Mathematics 5A; and, an upper-division mathematics course (for Mathematics 181A); Consent of instructor (for Mathematics 181B).*

Designed for prospective teachers. Problem solving. Problems in number theory, dynamical systems, or other topics, including investigations of mathematics and its historical contexts. The difference between formal mathematics and the process of doing mathematics. Supervised field work on problem solving.

190. Special Topics in Mathematics**(4) STAFF***Prerequisite: consent of instructor.*

May be repeated for credit to a maximum of 8 units.

Information about the special topics to be presented may be obtained from the office of the Department of Mathematics.

193. Internship in Mathematics**(1-4) STAFF***Prerequisites: consent of instructor and department.*

May be repeated for credit to maximum of 4 units, but no credit will be applied toward upper-division major.

Faculty-sponsored academic internship in industrial or research firms.

195A-B. Internship in Mathematics Teaching**(4-4)***Prerequisites: upper-division standing in the major; and two upper-division mathematics courses.**No credit allowed toward the major or minor.*

Supervised mathematics teaching internship in local schools and participation in the Mathematics Teaching Seminar on mathematics learning and teaching. A paper on mathematics and its teaching required.

197A. Senior Thesis**(1-4) STAFF***Prerequisites: open to senior majors only; consent of department and instructor.*

Students must have a minimum overall grade-point average of 3.0 and a 3.5 or better grade-point average in the major. Up to 4 units may apply to the major. Up to 8 units total in all Mathematics 197/199RA courses may apply toward the major.

Independent research under the supervision of a faculty member which will result in a senior thesis. Students will concentrate on reading and gathering material for a thesis.

197B. Senior Thesis**(1-4) STAFF***Prerequisites: Mathematics 197A; open to senior majors only; consent of department and instructor.*

Students must have a minimum overall grade-point average of 3.0 and a 3.5 or better grade-point average in the major. Up to 4 units may apply to the major. Up to 8 units total in all Mathematics 197/199/199RA courses may apply toward the major.

Independent research under the supervision of a faculty member which will result in a senior thesis. Students will concentrate on writing a thesis

199. Independent Studies in Mathematics**(1-5) STAFF***Prerequisites: upper-division standing; completion of two upper-division courses in mathematics; and consent of instructor and department.*

Students must have a minimum 3.0 grade-point average for the preceding three quarters and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined. Only 8 units total in all Mathematics 197/199/199AA-ZZ courses may apply toward the major.

Coursework shall consist of academic research supervised by a faculty member on a topic not available in established course offerings.

199RA. Independent Research Assistance**(1-4) STAFF***Prerequisites: upper-division standing; completion of two upper-division courses in mathematics; consent of instructor and department.*

Students must have a minimum 3.0 grade-point average for the preceding three quarters and are limited to 5 units per quarter and 30 units total in all 198/199/199AA-ZZ courses combined. Only 8 units total in all Mathematics 197/199/199AA-ZZ courses may apply toward the major.

Coursework shall consist of faculty supervised research assistance.

GRADUATE COURSES

The department does not offer all the courses listed below each year, but does offer the following courses every year: Mathematics 201A-B-C, 206A-B-C-D, 220A-B-C, 221A-B-C, 240A-B-C and an additional first-year graduate sequence in applied mathematics. The department offers approximately three other one-year courses and several one-quarter courses in mathematics each year.

201A-B-C. Real Analysis**(4-4-4) STAFF***Prerequisites: Mathematics 118A-B-C.*

Measure theory and integration. Point set topology. Principles of functional analysis. L^p -spaces. The Riesz representation theorem. Topics in real and functional analysis.

202A-B-C. Complex Analysis**(4-4-4) STAFF***Prerequisites: Mathematics 118A-B-C or 122A.*

Analytic functions. Complex integration, Cauchy's theorem. Series and product developments. Entire functions. Conformal mappings. Topics in complex analysis.

206A. Matrix Analysis and Computation**(4) STAFF***Prerequisite: consent of instructor.*

Same course as Computer Science 211A, ME 210A, ECE 210A, Geology 251A, and Chemical Engineering 211A. Students should be proficient in basic numerical methods, linear algebra, mathematically rigorous proofs, and some programming language.

Graduate level matrix theory with introduction to matrix computations. SVDs, pseudo-inverses, variational characterization of eigenvalues, perturbation theory, direct and iterative methods for matrix computations.

206B. Numerical Simulation**(4) STAFF***Prerequisite: consent of instructor.*

Same course as Computer Science 211B, ME 210B, ECE 210B, Geology 251B, and Chemical Engineering 211B. Students should be proficient in basic numerical methods, linear algebra, mathematically rigorous proofs, and some programming language.

Linear multistep methods and Runge-Kutta methods for ordinary differential equations: stability, order and convergence. Stiffness. Differential algebraic equations. Numerical solution of boundary value problems.

206C. Numerical Solution of Partial Differential Equations—Finite Difference Methods**(4) STAFF***Prerequisite: consent of instructor.*

Same course as Computer Science 211C, ME 210C, ECE 210C, Geology 251C, and Chemical Engineering 211C. Students should be proficient in basic numerical methods, linear algebra, mathematically rigorous proofs, and some programming language.

Finite difference methods for hyperbolic, parabolic and elliptic PDEs, with application to problems in science and engineering. Convergence, consistency, order and stability of finite difference methods. Dissipation and dispersion. Finite volume methods. Software design and adaptivity.

206D. Numerical Solution of Partial Differential Equations—Finite Element Methods**(4) STAFF***Prerequisite: consent of instructor.*

Same course as Computer Science 211D, ME 210D, ECE 210D, Geology 251D, and Chemical Engineering 211D. Students should be proficient in basic numerical methods, linear algebra, mathematically rigorous proofs, and some programming language.

Weighted residual and finite element methods for the solution of hyperbolic, parabolic and elliptic partial differential equations, with application to problems in science and engineering. Error estimates. Standard and discontinuous Galerkin methods.

209. Set Theory**(4) STAFF***Prerequisite: consent of instructor.*

Study of axiomatic set theory; topics include relations and functions, orderings, ordinal and cardinal numbers and their arithmetic, transfinite constructible sets, consistency and independence results of Gödel and Cohen.

214A. Ordinary Differential Equations**(4) STAFF***Prerequisite: Not open to mathematics majors.*

Existence, uniqueness, and stability; the geometry of phase space; linear systems and hyperbolicity; maps and diffeomorphisms.

214B. Chaotic Dynamics and Bifurcation Theory**(4) STAFF***Prerequisite: Not open to mathematics majors.*

Hyperbolic structure and chaos; bifurcation theory;

and the Feigenbaum and Ruelle-Takens cascades to strange attractors.

215A. Partial Differential Equations

(4) STAFF

Prerequisites: Not open to mathematics majors.

Wave, heat, and potential equations.

215B. Fourier Series and Numerical Methods

(4) STAFF

Prerequisite: Not open to mathematics majors.

Fourier series; generalized functions; and numerical methods.

220A-B-C. Modern Algebra

(4-4-4) STAFF

Prerequisites: Mathematics 108A-B and 111A-B.

Group theory, ring and module theory, field theory, Galois theory, other topics.

221A. Foundations of Topology

(4) STAFF

Prerequisite: Mathematics 118A or equivalent.

Metric spaces, topological spaces, continuity, Hausdorff condition, compactness, connectedness, product spaces, quotient spaces. Other topics as time allows.

221B. Homotopy Theory

(4) STAFF

Prerequisite: Mathematics 221A.

Homotopy groups, exact sequences, fiber spaces, covering spaces, van Kampen Theorem.

221C. Differential Topology

(4) STAFF

Prerequisite: Mathematics 221A.

Topological manifolds, differential manifolds, transversality, tangent bundles, Borsuk-Ulam theorem, orientation and intersection number, Lefschetz fixed point theorem, vector fields.

225A-B. Topics in Number Theory

(4-4) STAFF

Prerequisites: Mathematics 220A-B-C.

May be repeated for credit with instructor and department approval.

Selected topics in number theory.

227A-B-C. Advanced Topics in Geometric and Algebraic Topology

(4-4-4) STAFF

Prerequisite: consent of instructor.

May be repeated for credit with instructor and department approval.

Topics, varying from year to year, include piecewise linear and differential topology, manifolds, fiber bundles and fiber spaces, homotopy theory, and spectral sequences.

229A-B-C. Operator Algebras

(4-4-4) STAFF

Prerequisites: Mathematics 201A-B-C.

Banach algebras. The Gelfand transform. C^* -algebras and von Neumann algebras. Positivity. States. The Gelfand-Naimark-Segal construction, $*$ -representations of C^* -algebras. Von Neumann's bicommutant theorem. Kaplansky's density theorem. Comparison of projections. Examples and applications. Advanced topics in the theory of operator algebras.

231A. Lie Groups and Lie Algebras

(4) STAFF

Prerequisite: consent of instructor.

Differentiable manifolds, definition and examples of Lie groups, Lie group-Lie algebra correspondence, nilpotent and solvable Lie algebras, classification of semi-simple Lie algebras over the complexes, representations of Lie groups and Lie algebras, special topics.

232A-B. Algebraic Topology

(4-4) STAFF

Prerequisites: Mathematics 108A-B and 145.

Singular homology and cohomology, exact sequences, Hurewicz theorem, Poincaré duality.

236A-B. Homological Algebra

(4-4) STAFF

Prerequisites: Mathematics 220A-B-C.

Algebraic construction of homology and cohomology theories, aimed at applications to topology, geometry, groups and rings. Special emphasis on hom and tensor functors; projective,

injective and flat modules; exact sequences; chain complexes; derived functors, in particular, ext and tor.

237A-B. Algebraic Geometry

(4-4) STAFF

Prerequisites: Mathematics 220A-B-C.

Affine/projective varieties, Hilbert's Nullstellensatz, morphisms of varieties, rational maps, dimension, singular/nonsingular points, blowing up of varieties, tangent spaces, divisors, differentials, Riemann-Roch theorem. Special topics include: elliptic curves, intersection numbers, Bezout's theorem, Max Noether's theorem.

240A-B-C. Introduction to Differential Geometry and Riemannian Geometry

(4-4-4) STAFF

Topics include geometry of surfaces, manifolds, differential forms, Lie groups, Riemannian manifolds, Levi-Civita connection and curvature, curvature and topology, Hodge theory. Additional topics such as bundles and characteristic classes, spin structures and Dirac operator, comparison theorems in Riemannian geometry.

241A-B-C. Topics in Differential Geometry

(4-4-4) STAFF

Prerequisites: Mathematics 240A-B-C.

Various topics are covered including sectional curvature and Ricci curvature, minimal submanifolds, Atiyah-Singer index theorem and eta invariant, Einstein manifolds, symplectic geometry, geometry of gauge theories, geometric PDE, Morse theory and Floer theory.

243A-B-C. Ordinary Differential Equations

(4-4-4) STAFF

Prerequisites: Mathematics 118A-B-C.

Existence and stability of solutions, Floquet theory, Poincaré-Bendixson theorem, invariant manifolds, existence and stability of periodic solutions, bifurcation theory and normal forms, hyperbolic structure and chaos, Feigenbaum period-doubling cascade, Ruelle-Takens cascade.

246A-B-C. Partial Differential Equations

(4-4-4) STAFF

Prerequisites: Mathematics 201A-B-C.

First-order nonlinear equations; the Cauchy problem, elements of distribution theory and Sobolev spaces; the heat, wave, and Laplace equations; additional topics such as quasilinear symmetric hyperbolic systems, elliptic regularity theory.

260AA-ZZ. Seminars in Mathematics

(1-6) STAFF

May be repeated for credit.

Topics in algebra, analysis, applied mathematics, combinatorial mathematics, functional analysis, geometry, statistics, topology, by means of lectures and informal conferences with members of staff.

500. Teaching Assistant Practicum

(1-4) STAFF

Prerequisites: appointment as teaching assistant and departmental approval.

No unit credit allowed toward degree.

Supervised teaching of undergraduate mathematics courses.

501. Teaching Assistant Training

(1-2) STAFF

Prerequisites: departmental and instructor approval.

No unit credit allowed toward degree.

Consideration of ideas about the process of learning mathematics and discussion of approaches to teaching.

502. Teaching Associate Practicum

(1-5) STAFF

Prerequisite: appointment as associate and departmental approval.

No unit credit allowed toward degree.

Supervised teaching of undergraduate courses.

510. Reading for Area Examinations

(2-6) STAFF

Prerequisites: enrollment in M.A. or Ph.D. program; consent of instructor.

596. Directed Reading and Research

(1-6) STAFF

Prerequisite: consent of instructor.

May be repeated for credit. Only 8 units total in all

Mathematics 596, 598, 599 courses may apply toward the degree.

598. Master's Thesis Research and Preparation

(1-6) STAFF

Prerequisites: graduate standing and consent of instructor.

May be repeated for credit. Only 8 units total in all Mathematics 596, 598, 599 courses may apply toward the degree.

599. Ph.D. Dissertation Preparation

(1-6) STAFF

Prerequisite: consent of instructor.

May be repeated for credit. Only 8 units total in all Mathematics 596, 598, 599 courses may apply toward the degree.

Media Arts and Technology

Interdepartmental Graduate Program in Media Arts and Technology

Phelps Hall 3309

Telephone: (805) 893-5244

Fax: (805) 893-2930

E-mail: info@mat.ucsb.edu

Web site: www.mat.ucsb.edu

Program Chair: **Matthew Turk**

Vice Chair: **Curtis Roads**

Faculty

Kevin Almeroth, Ph.D., Georgia Institute of Technology, Professor (computer networks and protocols, large-scale multimedia systems, performance evaluation, distributed systems)

Clarence Barlow, Ph.D., a universally acknowledged pioneer and celebrated composer in the field of electroacoustic and computer music, he has made groundbreaking advancements in interdisciplinary composition that unite mathematics, computer science, visual arts, and literature.

Jerry Gibson, Ph.D., Southern Methodist University; Professor (multimedia communications and compression, signal processing for multimedia, wireless communications)

Tobias Hollerer, Ph.D., PhD, Columbia University, Assistant Professor (human computer interaction, computer graphics, virtual and augmented reality, wearable and ubiquitous computing))

Lisa Jevbratt, M.F.A, CADRE, San Jose State University, Associate Professor (software, network art, information visualization)

Nancy Kawalek, B.S., Northwestern University, Studio Professor/Director, Professional Artists Lab (creation and development of multi-media theatre work)

JoAnn Kuchera-Morin, Ph.D., University of Rochester, Eastman School of Music, Professor (composition, sound synthesis and processing, multimedia opera)

George Legrady, M.F.A., San Francisco Art Institute, Professor (theory and practice of interactive media and multilinear narrative)

B. S. Manjunath, Ph.D., University of Southern California, Professor (image processing, computer vision, pattern recognition, neural networks, learning algorithms, data mining in multimedia databases)

Marcos Novak, Ph.D., Ohio State University, Professor (transarchitectures, virtual environments and worldmaking, digital sculpture, algorithmic composition, theory)

Marko Peljhan, Diploma, University of Ljubljana, Agrftt Academy, Slovenia, Associate Professor (interdisciplinary media/communications/technology, art studio)

Stephen Travis Pope, Certificate, Vienna Music Academy, Lecturer (computer music, distributed systems, music/sound databases, virtual environments, graphical user interfaces, multimedia computing)

Curtis Roads, Ph.D., University of Paris, Professor (music composition, microsound synthesis, graphical synthesis, sound analysis and transformation, sound specialization, history of electronic music)

Matthew Turk, Ph.D., Massachusetts Institute of Technology, Professor (vision technology, vision-based interaction, 3D body tracking, gesture recognition)

The Media Arts and Technology Program (MAT) is a unique transdisciplinary and interdepartmental graduate degree program that offers M.S., M.A., and Ph.D. degrees in Media Arts and Technology. The program, which is jointly administered by the College of Engineering and the College of Letters and Science, serves as a focal point for education, research, and artistic production in digital media, with special emphases in visual and spatial arts, electronic music and sound design, and multimedia engineering. The curriculum provides for an interdisciplinary experience, building on a core set of skills and knowledge, with an emphasis research and collaboration in digital media systems, content, and interaction. In addition to the interdisciplinary breadth of the program, each MAT student focuses on an area of emphasis, according to background and career interests.

Prospective students are strongly encouraged to visit the MAT Web site at www.mat.ucsb.edu for the latest program information.

MAT is designed to provide its students with knowledge and skills relevant to careers in digital media-related research and in artistic and technical positions in the media industries of the 21st century. It fosters aesthetically trained engineers – the media technology inventors of the future. It trains electronic media artists who can work with a high degree of aesthetic and technical sophistication to enrich and enlarge our cultural heritage. It prepares thinkers for advanced studies in media technology, leading toward academic careers in this discipline.

The program is intended for students who are interested in both arts and technology and have a strong background in at least one area (for example, in visual arts, music, computer science, or electrical and computer engineering). Prospective students should be ambitious and curious about interdisciplinary research and intermedia art and should be interested in working with others on group projects covering

multiple areas of expertise.

MAT faculty coordinate with four graduate departments: Art, Computer Science, Electrical and Computer Engineering, and Music. Faculty advisors assist students in planning their courses of study depending upon their area of emphasis.

In addition to program requirements, candidates must meet the university degree requirements found in the section “Graduate Education at UCSB.” Master’s and Ph.D. students must be registered as full-time students in the program.

The three areas of primary emphasis within Media Arts and Technology are as follows:

Multimedia Engineering

The multimedia engineering emphasis is intended for creative engineers and computer scientists seeking a comprehensive program in multimedia research. Key topics include multimedia software systems, media signal processing, multimedia networking, computer imaging, and human-computer interaction. Students will be involved in the development of large-scale software systems of different types. Courses include in-depth work on multimedia networking programming tools, imaging, and the development of complex signal processing software systems.

Electronic Music and Sound Design

The electronic music and sound design emphasis focuses on electronic music systems and techniques, composition, immersive sound design and spatialization, interfaces, hardware and software development, and digital audio engineering. It is intended for technically inclined musicians and highly motivated musical engineers. Courses include composition lessons, technical and aesthetic instruction, laboratory work, as well as directed research in musical and technical projects.

Visual and Spatial Arts

The visual and spatial arts emphasis focuses on interdisciplinary, collaborative arts-technology research such as virtual and mixed realities, human-computer interaction, algorithmic morphogenesis, transarchitectures, data mapping, and visualization, digital sculpture, wireless broadband, motion capture, and distributed sensing. The relationship of present to future media is of particular interest, especially as it relates to nanotechnology, biotechnology, new materials, and new fabrication methods.

Graduate Program

Master’s Programs— Media Arts and Technology

The Master of Science and Master of Arts programs provide advanced training in Media Arts and Technology with three areas of emphasis: multimedia engineering (M.S.), electronic music and sound design (M.A.), and visual and spatial arts (M.A.).

The master’s programs typically take two full-time academic years to complete. The goal of the first year of MAT’s intensive interdisciplinary curriculum is to provide a common

foundation of aesthetics, history, and technology. In addition, students take graduate courses in their area of emphasis, as well as courses in a complementary field.

The second year electives allow students to focus on either their area of emphasis or on a complementary discipline. All candidates are expected to complete an advanced project or thesis in their second year of the program, an artistic production or media research project supervised by MAT faculty.

Although all students are expected to engage in both technical and artistic aspects of multimedia creation, each student is expected to specialize in one area of emphasis.

Admission

In addition to fulfilling all university requirements for admission to graduate status, described in the section “Graduate Education at UCSB,” the applicant should present a bachelor’s degree in any of the following majors: art, music, computer science, computer engineering, or electrical engineering. This bachelor’s degree is the student’s *major discipline*.

Applicants with related majors may be considered, but only if they can demonstrate strong credentials in both the arts and technology. Acceptable credentials include recent University of California or equivalent course transcripts in calculus-level mathematics, computer programming, visual arts, and music. These applicants may be required to take a placement examination or submit additional application materials, such as examples of previous work.

In addition to their major discipline, applicants should also demonstrate a basic level of proficiency in a MAT *cross-discipline*. For students whose major discipline is in the creative arts, their cross-discipline is engineering. For students whose major discipline is in engineering, their cross-discipline is one of the creative arts. For example, an applicant whose major discipline is in the creative arts could prove cross-disciplinary proficiency by having successfully completed courses, or showing significant experience, in computer programming or signal processing. An applicant whose major discipline is in engineering could prove cross-disciplinary proficiency by having successfully completed courses or significant projects in music, art, or digital video. Applicants who cannot demonstrate cross-disciplinary proficiency but who show extraordinary promise in the field may be admitted, but must make up this deficiency in the first year of graduate study. In general, this involves taking introductory courses in the cross-disciplines, to be determined in consultation with a faculty advisor. Credits earned in the proficiency courses do not count toward the graduate degree.

See the MAT Web site at www.mat.ucsb.edu for detailed admissions requirements.

Degree Requirements

Each student’s area of emphasis and course list is determined in consultation with a MAT faculty committee, consisting of three members. The committee is nominated by the program chair in consultation with the student and is approved by the graduate dean. Two of these members, including the chair of the committee, must be MAT faculty. The committee chair

advises students on a course of study and directs their research.

Thesis or project plan. A master's degree may be earned in each of the three areas of emphasis according to two plans: thesis or project.

Plan 1 (thesis). Under the thesis plan, a student must submit an acceptable thesis, completed under the supervision of an MAT faculty member and approved by the student's committee. A thesis is a substantial work of research or production that is a novel contribution to the field. The thesis must meet the filing requirements of Graduate Division. The student will give a public lecture based on the thesis.

Plan 2 (project). Under the project plan, a student must submit an acceptable project, completed under the supervision of an MAT faculty member and approved by the student's committee. The project will consist of a digital media work resulting in a prototype, installation, or performance. An academic paper will describe the project, and the student will make a public presentation of the work. The project and documentation will be evaluated by the student's committee.

Unit Requirements. In addition to the submission of an acceptable thesis or project, both the M.A. and the M.S. degrees require completion of a minimum of 60 units, of which at least 48 units is upper-division or graduate coursework, apart from those credited to the project or thesis, and apart from units gained for teaching assistant duties or training, or units for service as a graduate researcher. Under the thesis option, 20 of the 48 units must be in graduate-level coursework (excluding units for internships, TA and/or GSR practica, and independent study courses numbered 500-599). Under the project option, 24 of the 48 units must be in graduate-level coursework (excluding units for internships, TA and/or GSR practica and independent study courses numbered 500-599).

Required Courses. Students in the first year of the program must take five core courses in Media Arts and Technology, designated MAT 200(A,B,C) and MAT 201(A,B). These focus on the history, theory, and practice of media arts and technology.

Doctor of Philosophy— Media Arts and Technology

The Doctor of Philosophy degree in Media Arts and Technology prepares students for academic research and teaching positions, for research and leadership positions in industry and government, and for leadership positions in relevant artistic fields. The MAT Ph.D. curriculum provides a common foundation of the field's aesthetics, history, and technology through rigorous coursework, seminars, and active participation with the faculty. Each Ph.D. student participates in interdisciplinary projects and performs innovative research, under the supervision of a faculty advisor and committee, leading to a dissertation that exhibits significant and novel research in the student's area of specialization.

Admission

Students must fulfill all university requirements for admission to graduate status, described in the section "Graduate Education at UCSB."

MAT Ph.D. applicants must have a bachelor's or master's degree in media arts and technology, art, music, computer science, computer engineering, electrical engineering, or a closely related field. Note that outstanding students with a bachelor's degree may apply directly to the Ph.D. program. Typically, students who enter with a bachelor's degree will take longer to complete the Ph.D. than those with a master's degree. See the MAT Web site at www.mat.ucsb.edu for detailed admissions requirements.

Degree Requirements

Students entering directly into the PhD without a master's degree must first meet the equivalent course requirement of the MAT master's program, which is 48 units of non-thesis-related upper-division and graduate courses. In addition, they must successfully complete a master's thesis or project and present it publicly. MAT PhD graduates will be expected to have broad knowledge in all fields of digital multimedia and have a deep and current understanding of at least one of these areas. The MAT PhD is not a unit-count degree; rather, it is awarded upon demonstration of academic excellence and performance of original research. Students will complete an individual program of study determined in consultation with their PhD committee. This will typically include a mix of MAT elective courses, seminars, directed reading for research, and dissertation research. Specific course requirements shall be identified on a per-student basis, under advisement with each candidate's doctoral committee. It is the responsibility of the student's advisor, in consultation with the PhD committee and the MAT graduate advisor, to ensure that the candidate has achieved the appropriate breadth and depth from coursework and independent study. In order to proceed to dissertation research, Ph.D. students must pass a thorough qualifying exam, after completing their coursework.

The Ph.D. dissertation is a novel and substantial research work that makes a significant contribution to the field. The dissertation is done under the supervision of an MAT faculty advisor and the doctoral committee, consisting of three faculty, at least two of whom must be from MAT. The committee must approve a dissertation proposal that describes the proposed research and presents a comprehensive plan for the dissertation. After the dissertation is completed, the committee evaluates the dissertation and the candidate's presentation at the dissertation defense; the committee's approval indicates that the candidate has successfully defended the dissertation.

Media Arts and Technology Courses

Media Arts and Technology is in the process of revising its course numbers and adding new courses. Please check with the Media Arts and Technology office for more accurate and up-to-date information on our course offerings.

GRADUATE COURSES

200A. Arts and Technology

(4) LEGRADY

Prerequisite: consent of instructor.

Overview of the digital media arts field with an emphasis on technological developments and their integration in art research and production. Students are introduced to contemporary and historical directions and methodologies through seminar lectures, research presentations, and a final project.

200B. Music and Technology

(4) ROADS

Prerequisite: consent of instructor.

Overview of music and technology, including historical aspects. Readings and exercises with a range of music software applications. Basics of Internet audio and evolving media, music production, business, technical, and aesthetic aspects.

200C. Digital Media Technology and Engineering

(4) POPE

Intensive survey course on digital media technology: perception and media data, information theory, signals and streams, events and timed data, signal representations and formats, data compression, hardware/software issues for digital media systems, media data I/O devices, and multimedia systems integration.

201A. Media Signal Processing

(4) GIBSON

Basic concepts in digital signal and image processing (transforms, convolutions, etc.), filter design, image enhancement and coding, digital video.

201B. Computing with Media Data

(4) POPE

Recommended preparation: one quarter of introductory programming and one quarter "data structure and algorithms" course.

Hands-on introduction to development of multimedia applications: basic representations, data structures, and interchange formats used for multimedia data such as sound and images. Students develop programs for multimedia tasks such as file I/O, data streaming, format conversion, and data analysis.

202. Mathematics and Signal Processing

(2) STAFF

An overview of the mathematical concepts used in media signal processing. Review of trigonometry, calculus, and complex exponential representation of signals. Introduction to the MATLAB signal processing language. Lab oriented.

221. Multimedia Compression

(4) GIBSON

Prerequisites: graduate standing; consent of instructor.

Covers the principle standards for speech, audio, still image, and video compression, with the emphasis on system performance, key underlying technologies, current applications, and the projected future evolution of the standards.

233. Multimedia Software Development

(2) STAFF

Prerequisite: consent of instructor.

Does not count toward the required units of graduate-level courses.

An overview of multimedia programming for digital media artists, focusing on the basics of data structures, programming techniques, and algorithms for representing, processing, and displaying media-based information.

235. Computer Imaging

(4) TURK

Prerequisite: consent of instructor.

Fundamentals of digital imaging systems, including the capture, storage, display, and retrieval of image and video data. Topics include the nature of light, color, optics, sensors, human vision, image processing, and computer vision.

240A-F. Digital Audio Programming: The Series

(4-4-4-4-4-4) POPE

Recommended preparation: some programming experience and basic acoustics.

Six-quarter practical programming course devoted to digital audio application development. The emphasis is on learning to use current state-of-the-art programming methods, tools, and library APIs. Programming assignments are given in the C, C++,

Java, Smalltalk and/or SuperCollider programming language. Quarter topics:

- A. Using commercial I/O APIs
- B. Spectral transformations
- C. Spatial sound manipulation
- D. Sound synthesis techniques
- E. Multi-rate control and synchronization
- F. Media application integration

242A. Advanced Topics in Digital Multimedia: Audiophile Engineering
(4) POPE

Prerequisite: consent of instructor.

May be repeated with faculty approval. Upper-division undergraduates are welcome with instructor permission.

Recommended preparation: basic knowledge and some familiarity with stereo equipment. (No specific electronic or musical skills are assumed.)

Focuses on the engineering and aesthetics of audiophile sound recording and reproduction equipment and musical content.

242B. Advanced Topics in Digital Multimedia: Recording Studio Engineering
(4) POPE

Prerequisite: consent of instructor.

May be repeated with faculty approval. Upper-division undergraduates are welcome with instructor permission.

Recommended preparation: basic knowledge of acoustics, some programming experience, and a familiarity with stereo equipment.

Focuses on the design and engineering of sound recording studio equipment.

246. Virtual Environment Development
(4) STAFF

Prerequisite: consent of instructor.

Virtual world building using a variety of tools for 3D modeling and behavior scripting and programming. Overview of two- and three-dimensional computer animation and composing techniques. In addition to basic methodologies, specific areas covered include modeling, animating, lighting, rendering, layering of images, filtering and keying. Readings from texts on modeling and compositing.

251. Mixed Realities Interactive Projects
(4) LEGRADY

The theory and practice of interactivity in mixed realities installation. Topics include control devices, motion sensing methods, feedback, user behavior in time and space, phrasing, and narrative plot development for audio/visual output. Students realize a project and a research presentation.

253. Navigating Information Space: Design and Visualization
(4) STAFF

Prerequisite: consent of instructor.

A project-based course focusing on the theory and practice of interface design with an interaction, visualization, and information architecture. Conceptualization, design, programming, visual communication are addressed in lectures, readings, and projects.

255. Digital Time-Based Media
(4) STAFF

Theory and production of linear and interactive digital video narratives through DVD authoring. Students acquire methodologies and production skills following analysis of time-based media.

256. Interdisciplinary Collaborative Project
(4) STAFF

Same course as INT 256.

A team-taught course with goals to foster engineering-level research in conjunction with the experimental approach of the visual arts. Course consists of team-based production for the realization of a multimedia project. Emphasis of the course is to develop skills in interdisciplinary production, concept development, and problem solving methodologies.

257. Network Protocols in a Social Context
(4) JEVBRATT

Prerequisite: consent of instructor.

Theory and history of internet protocols. Examining internet legislation and the politics and structure of the request for comments system. Code as cultural expression. Project-oriented.

258. Art and Science of Aerospace Culture

(4) PELJHAN

Prerequisites: upper-division standing; consent of instructor.

Interdisciplinary course/seminar/practice for artists, academics, engineers, and designers interested in exploring the technological aesthetic, cultural, and political aspects of the space side of the aerospace complex. Design history, space complex aesthetics, cinema intersections, imaging/telecommunications, human spaceflight history, reduced/alternating gravity, experimentation, space systems design/utilization.

259. The Aesthetics of Algorithmic Visualizations

(4) LEGRADY

Same course as Interdisciplinary 259.

Project-based course focused on aesthetics of algorithmic visualization. An overview of designing still and time-based visualizations with historical and contemporary perspectives resulting in large scale prints, digital video, or computer generated realtime visualization. Emphasis on implementation of algorithmic expressions.

275. Music Systems Programming

(4) POPE

Recommended preparation: knowledge of a programming language and basic acoustics.

Theory and practice of programming music and sound software: compositional algorithms, synthesis techniques, signal processing, interactivity, and user interfaces using the SuperCollider programming language.

276IA. Direct Digital Synthesis-Processing and Composition

(4) KUCHERA-MORIN

Prerequisites: MAT majors and graduate non-majors in areas of electrical engineering, computer science, physics and math; consent of instructor.

First quarter of general purpose computing for computer music applications. Topics include: introduction to the UNIX operating system and VI editor, music synthesis using C-based computer programs, and score input programs.

276IB. Direct Digital Synthesis-Processing and Composition

(4) KUCHERA-MORIN

Prerequisite: MAT 276IA.

Second quarter of a three-quarter sequence course concentrates on computer music instrument design using C-based music software and exploring applications of frequency modulation, additive/subtractive synthesis, digital signal processing, and computer music composition.

276LA. Digital Audio Montage

(2) ROADS

Prerequisites: graduate MAT majors and graduate non-majors in areas of electrical engineering, computer science, physics and math; consent of instructor.

First quarter of a three-quarter sequence course concentrates on multitrack recording, mixing, digital signal processing, using microcomputers and special purpose DSP equipment.

276LB. Digital Audio Montage

(2) ROADS

Prerequisite: MAT 276LA.

Second quarter of a three-quarter sequence course concentrates on digital synthesis (primarily frequency modulation, simple and complex; but also amplitude modulation and additive synthesis) using microcomputers, digital synthesizers and processing equipment.

276LC. Digital Audio Montage

(2) ROADS

Prerequisite: MAT 276LB.

Third quarter of a three-quarter sequence course concentrates on real-time computer music composition with microcomputer and digital synthesis/processing equipment.

276N. Special Topics in Electronic Music

(4) STAFF

Prerequisites: MAT 276LA-LB-LC.

Advanced topics in computer music composition, synthesis, and digital signal processing.

293. Internship in Industry

(1-4) STAFF

Prerequisite: consent of instructor.

May be repeated for credit with faculty approval.

Special projects for selected students. Offered in conjunction with selected industrial and research under direct faculty supervision. Prior departmental approval required.

299. Independent Study

(4) STAFF

Prerequisite: consent of graduate advisor and director of graduate studies.

Students are limited to 4 units per quarter. No more than 12 units may be credited toward a Master's degree. Not intended for thesis research.

Independent research under the guidance of a faculty member in the department. Course offers an opportunity for qualified students to undertake independent research or work in a group laboratory in digital media arts and technology.

594AA-ZZ. Special Topics in Multimedia Engineering of Visual Arts or Electronic Music

(1-4) STAFF

Special course in selected problems in multimedia engineering, visual arts, or electronic music.

A-E. Transvergence Series - Novak

GL. Special Topics - Legrady

SP. Special Topics - Pope

595AA-ZZ. Seminar Series

(1-2) STAFF

Seminar series for advanced topics in multimedia.

596. Directed Research

(2-12) STAFF

Prerequisites: consent of instructor and Director of Graduate Studies.

Independent research, either experimental or theoretical, may be taken by properly qualified graduate students under the direction of a faculty member.

Medieval Studies

Medieval Studies Program
Division of Humanities and Fine Arts
Department of History
Humanities and Social Sciences 5056
Telephone: (805) 893-3167

Executive Director: Edward D. English

Medieval Studies Advisory Committee

Debra G. Blumenthal, Ph.D. (History)

Cynthia J. Brown, Ph.D. (French and Italian)

Jody Enders, Ph.D. (French and Italian)

Edward D. English, Ph.D. (History)

Sharon Farmer, Ph.D. (History)

L.O. Aranye Fradenburg, Ph.D. (English)

Carol L. Lansing, Ph.D. (History)

Carol Braun Pasternack, Ph.D. (English),
Advisory Committee Chair for 2007-2008

Harvey L. Sharrer, Ph.D. (Spanish and Portuguese)

Affiliated Faculty

C. Edson Armi, Ph.D. (History of Art and Architecture)

Juan Bautista Avalle-Arce, Ph.D. (Spanish and Portuguese)

Francis A. Dutra, Ph.D. (History)

Richard D. Hecht, Ph.D. (Religious Studies)

Barbara Holdrege, Ph.D. (Religious Studies)

R. Stephen Humphreys, Ph.D. (History)

Nuha Khoury, Ph.D. (History of Art and Architecture)

Mark A. Meadow, Ph.D. (History of Art and Architecture)

Giorgio Perissinotto, Ph.D. (Spanish and Portuguese)

William Prizer, Ph.D. (Music)

Dwight Reynolds, Ph.D. (Religious Studies)

Jon R. Snyder, Ph.D. (French and Italian)

Emeriti Faculty

Larry M. Ayres, Ph.D. (History of Art and Architecture)

Jeffrey B. Russell, Ph.D. (History)

Alejandro Planchart, Ph.D. (Music)

Robert Potter, Ph.D. (Dramatic Art)

Medieval studies is an interdisciplinary program in which European and Middle Eastern civilizations of the Middle Ages can be explored from the viewpoints of many traditional subject areas: history, literature, religious studies, drama, art, and music. The student can build a program around one or two of these disciplines, enriched by the others, or organize a program in which several subject fields are more or less balanced. In order to enhance the interdisciplinary nature of the major, the Medieval Studies Program has designed a series of cross-listed courses that will put students in touch with a number of medievalists both at UCSB and in the larger scholarly community. Each year at least one upper-division course from another department that fulfills the requirements of the medieval studies major will be cross-listed as Medieval Studies 100 (A-Z). The instructor of that course will invite at least one professor from another UCSB department to guest teach a class; and the students will have the opportunity to attend a mini-conference, in which visiting scholars will give lectures on research topics relating to the subject of the course.

Each year a series of lectures by distinguished medievalists from other universities in America and Europe, representing various disciplines, provides fresh intellectual perspectives for undergraduate medieval studies majors as well as candidates for graduate degrees in medieval history, literature, art, and music. In addition, undergraduate, graduate, and faculty medievalists meet periodically to hear and discuss scholarly papers and to exchange ideas about the many facets of medieval culture.

The UCSB Medieval Studies Program operates in close cooperation with the Medieval Academy of America, the Medieval and Renaissance Studies Center at UCLA, the International Congress on Medieval Studies, and the Renaissance Society of America.

Students with a bachelor's degree in medieval

studies who are interested in pursuing a California Teaching Credential should contact the credential advisor in the Graduate School of Education as soon as possible.

Undergraduate Program

Bachelor of Arts— Medieval Studies

Preparation for the major. History 4A-B. For students not planning graduate work, a language is desirable but not required. For those who plan to continue their studies on the graduate level, a reading knowledge of Latin and of at least one modern European language will be necessary. In certain fields, Hebrew, Arabic, or Greek may be needed.

Upper-division major. Forty units from the following list, with the selection forming a coherent program that must be approved by a member of the medieval studies committee: Art History 105A-B-C-D-E-F-G-H-I-J-K-L-M-N-O-P; Comparative Literature 116, 120; Dramatic Art 160B; English 110A, 110B, 111, 115, 119, 152A-B-S, 156, 197 (when course content is appropriate to medieval studies); French 129, 130X, 131X, 132X, 133, 133X, 134A, 135X, 135XH, 136A, 136C, 136E, 136X, 137X, 138X; History 106A, 113C, 114A-B-C-P, 115, 115P, 115X, 116, 117A-C-D-P, 118A-B, 119, 121A-B, 145A-B, 155A; Italian 114X, 138AX; Classics 103; Medieval Studies 199; Music Performance Laboratories A148, A148S; Music 112A, 179; Portuguese 105A; Religious Studies 111A, 127B, 131J, 137, 140A, 187, 188, 189B; Spanish 110A, 116, 119A, 122A-B. Students may also submit petitions to the chair of the Medieval Studies Program to have other appropriate courses count towards the major.

Graduate Program

Optional Ph.D. Emphasis in European Medieval Studies

The Medieval Studies Program offers an interdisciplinary doctoral emphasis to students previously admitted to a Ph.D. program in the Departments of Dramatic Art, English, French and Italian, History, History of Art and Architecture, Music, Religious Studies, and Spanish and Portuguese. Students pursuing the emphasis in European medieval studies must receive a grade of B or better in each of the following: Medieval Latin (Latin 103); one course in a vernacular, western European or Middle Eastern medieval language (English 205, English 230, French 206, Spanish 222A, Spanish 222B, Portuguese 222, Religious Studies 148A, Religious Studies 148 B, Religious Studies 210); Paleography and/or Diplomatics (History 215S, History 215T); Medieval Studies 200A-B-C; and 8 additional units in graduate courses on medieval topics. Students may petition to have appropriate courses from other institutions, or independent study, substituted for these requirements. Medieval Studies 200A-B-C is the program's colloquium series; graduate students in the emphasis attend the series and write brief papers on each colloquium (one per term), to be reviewed by the

chair of the program (2 units). To qualify for the emphasis, at least one member of a Ph.D. candidate's dissertation committee must be an affiliated faculty member of the European Medieval Studies Program. Contact the European Medieval Studies Program for additional information on faculty interests, course offerings, and program requirements, or visit our Web site at www.medievalstudies.ucsb.edu.

Medieval Studies Courses

UPPER DIVISION

101AA-ZZ. Special Topics

(4) STAFF

Topics vary per instructor.

102AA-ZZ. Special Topics

(4) STAFF

Topics vary per instructor.

194AH-BH. Senior Honors Seminar

(4-4) STAFF

Prerequisite: admission to Senior Honors Program.

Same course as History 194AH-BH. A two-quarter, in-progress course with grade for both quarters issued upon completion of Medieval Studies 194BH. Four of the eight units may be applied to the upper-division units required for the major.

Students taking part in departmental honors program write a senior thesis on a research topic of suitable depth under close supervision of faculty mentors.

199. Independent Studies in Medieval Studies

(1-5) STAFF

Prerequisites: upper-division standing; completion of two upper-division courses in medieval studies.

Students must have a minimum 3.0 grade-point average for the preceding three quarters and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined.

GRADUATE COURSES

200A-B-C. Interdisciplinary Approaches to Medieval Studies

(2) STAFF

Prerequisites: consent of instructor.

Students enroll in the course for the entire Academic year. They attend and write papers on quarterly colloquia. A three-quarter in-progress sequence course with grades for all quarters issued upon completion of Medieval Studies 200C.

Students attend and write responses to papers by visiting lecturers on topics in various fields of Medieval Studies. Themes will vary from year to year.

Christine Thomas, Ph.D. (Religious Studies)

The Middle East Studies Program is an interdisciplinary undergraduate program in which students can explore the myriad peoples, societies, languages, and cultures of the Middle East and North Africa from a variety of perspectives. The program brings under one roof studies on the languages, cultures, and history, politics and societies of the region in the ancient, medieval, and modern periods. The program also offers courses on the religious and cultural traditions of Islam, not only of the Middle East and North Africa, but also in other areas where these traditions have come to play a major role—South and Southeast Asia, sub-Saharan Africa, Europe, and North America. The cultural, religious, and intellectual works generated there by Judaism, Christianity, and Islam have been so durable, and so closely intertwined with one another, that our understanding of any one of them is fatally flawed if we try to study one in isolation from the other two. Likewise, Islam was born in the Middle East and evolved its core traditions there, but has long since taken root throughout the world and must be studied in a world context.

The program offers an undergraduate major but does not offer the M.A. or Ph.D. However, it can help graduate students to coordinate interdisciplinary study across departmental lines, and it also provides an enrichment of UCSB's own resources through the lectures, colloquia, and seminars that it sponsors.

The UCSB Center for Middle East Studies

The program also collaborates with UCSB Center for Middle East Studies, the Von Grunebaum Center for Near Eastern Studies at UC Los Angeles, and the Center for Middle East Studies at UC Berkeley in areas of common concern. The UCSB Center is a federally designated National Resource Center for Middle East Studies and offers graduate Foreign Language and Area Studies grants for Arabic language study as well as a very active program of films, lectures, seminars, and symposiums.

The Undergraduate Middle East Studies Major

The B.A. in Middle East Studies aims to provide an educational experience satisfying in and for itself, while simultaneously developing the body of knowledge and skills necessary for graduate study or an area-based career in foreign relations, international development, business, or government. Obviously no undergraduate program can provide a deep expertise in the whole of this vast arena. Students should however expect to achieve a well-defined sense of the whole, as well as to acquire the basic linguistic and conceptual tools needed to approach the region with real understanding. To this end, the program gives students considerable flexibility in designing their course of studies, but it also demands coherence and rigor.

As a key part of their studies students are urged though not required to study in one of the UC Education Abroad Program centers in the Middle East or in other similar programs. Members of the Advisory Committee will work actively with interested students to help them identify opportunities for study abroad.

Undergraduate Program

Bachelor of Arts—Middle East Studies

Preparation for the major. Students must take Middle East Studies 45. In addition, they must complete either History 46 or Religious Studies 5, and one of the following language series: Hebrew 1, 2, 3, 4, 5, 6 (Modern Hebrew); Department of Germanic, Slavic, and Semitic Studies); Religious Studies 10A-B-C-D-E-F (Arabic); Religious Studies 17A-B-C, 121A-B (Biblical Hebrew); Religious Studies 17A-B, 122A-B (Targumic Aramaic); Religious Studies 57A-B-C-D-E-F (Persian); Religious Studies 90A-B-C (Turkish). Students who take Targumic Aramaic, Syriac, or Coptic should consult with their faculty advisor on how to achieve an intermediate level of language competency within the framework of the major. Students who already have the equivalent of two years' proficiency in the above languages or in another major Islamic or Near Eastern language may petition to satisfy the language requirement with a proficiency examination.

Upper-division major. Before students begin the upper-division major, they are required to meet with the faculty advisor to discuss and have approved their academic plan. With the assistance of the faculty advisor, students will develop a broad, coherent plan which supports both the integrity of the major and their own interests.

A total of 36 upper-division units are required from the following courses. No more than 16 units may come from a single department and no more than 20 from a single area.

Area A: Languages and Cultures.

Languages: Arabic: Religious Studies 148A-B-C; Coptic: Religious Studies 139C-D-E; Hebrew: Hebrew 114A-B-C, 115A, Religious Studies 142A-B-C; Persian: Religious Studies 157A-B-C.

Cultures: Anthropology 118TS, 138TS, 176TS; History of Art and Architecture 101D, 105C, 132A-C-D-E-I, 133AA-ZZ, 186Q; Music 168x,

175F; Music A170M, A170N (up to 4 units); Religious Studies 115A, 116B, 119A-B-C, 128A, 130, 131J, 185, 186A, 189A-B.

Area B: History, Politics, and Societies.

Anthropology 121MS; History 118A-B, 119, 142, 145A-B, 145D, 146, 146P, 146PW, 146T, 146W; Middle East Studies 145, 194; Political Science 150A-B; Religious Studies 131H, 140A-B-C-D-F; Sociology 130SA.

Middle East Studies Courses

LOWER DIVISION

45. Introduction to Islamic and Near Eastern Studies

(4) STAFF

Exploration of the ancient, medieval, and modern cultures of the near and middle east and North Africa, and the religion, music, art, language, and daily life of Muslim societies from Africa to Asia.

UPPER DIVISION

145. Model Arab League

(4) CAMPO

Prerequisite: upper-division standing.

May be repeated for credit to a maximum of 12 units, but only 8 units may be applied toward the major.

In-depth study of political, strategic, economic, cultural, and environmental issues in the Arab world as seen from the perspective of the Arab League. Each year a different Arab country is the focus. Students also practice caucusing, speaking, and drafting resolutions.

194. Group Studies for Advanced Students

(1-4) STAFF

Prerequisite: upper-division standing.

May be repeated for credit to a maximum of 12 units, but only 8 units may be applied toward the major.

Topics vary according to instructor.

199. Independent Studies

(1-4) STAFF

Prerequisites: upper-division standing; consent of department and instructor.

Students must complete two upper-division courses in the Islamic and Near Eastern Studies major requirements. Students must have a minimum grade-point average of 3.0 for the preceding three quarters and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined. INEST 199 may be repeated for credit to a maximum of 8 units, but only 4 units may be applied toward the major.

Directed research in Islamic and Near Eastern studies.

Military Science (ROTC)

Military Science
Division of Social Sciences

Department Chair: LTC Martin E. Stokes

Faculty

Martin E. Stokes, M.A., Colorado State University, Lieutenant Colonel, Quartermaster, Professor (History)

The military science curriculum is a part of the Army Reserve Officers Training Corps (ROTC) program that leads to a commission as a second lieutenant in the Active Army, Army Reserve, or National Guard. Enrollment is open to qualified men and women.

The Army ROTC program is divided into two parts: (1) two years of lower-division subjects, or Basic Course, during which the student incurs no military obligation; and (2) two years of upper-division work, or Advanced Course, for selected students. Students in the Basic Course must complete six lower-division military science courses before they can be considered for the Advanced Course. Freshmen and sophomores will be given priority in registering for lower-division military science courses.

Students who were unable to take the Basic Course may receive equivalent ROTC credit for these classes by attending a summer session at a designated Army installation. Attendees at off-campus summer sessions are given a travel allowance and are paid for their period of camp attendance.

Admission to the Advanced Course is limited to selected students who meet all academic and physical requirements. Enrollees must sign a contract with the U.S. Army agreeing to complete the course and to accept an officer's commission, when offered. In return, students receive a tax-free stipend ranging from \$350 to \$500 per month for each school month they are enrolled in the program. In addition, students may be eligible to join the National Guard or Reserve and receive pay for attending one weekend meeting a month. In addition to \$350-\$500 per month stipend, cadets may compete for ROTC scholarships. The two, three, and four-year scholarships pay for tuition and fees or UCSB housing, and an additional \$1,200 for books, annually. Both the National Guard and the US Army Reserves will offer similar scholarship incentives.

Students selected for the Leader Development and Assessment Course attend a four-week camp after their junior year of Advanced ROTC. They are given a travel allowance and are paid for their period of camp attendance.

Students may not major in military science.

ROTC students must work toward a baccalaureate or graduate degree offered by another university department. After completion of the Advanced Course and upon obtaining a degree, a student is commissioned as a second lieutenant in one of the specialties of the U.S. Army. Graduates are eligible for either active duty or part-time duty with the Army Reserve or National Guard. Students accepting ROTC scholarships incur a four-year active duty obligation. ROTC students who wish to obtain advanced degrees may be granted delays in reporting for active duty. Students commissioned as second lieutenants may request to serve with the National Guard or Reserve following three to six months of active duty.

The department also offers a general military science curriculum designed to conform to the academic pattern of the UCSB campus. For the student who does not wish to make the military a career, military science courses and the ROTC program will provide general career preparation. The department's lower-division curriculum provides valuable knowledge concerning the military history of the United States. Several lower-division courses can be used to satisfy the American History and Institutions, and Writing requirements. The department's upper-division curriculum gives students both theoretical and practical leadership and management skills. Military Science units will be given credit as electives towards UCSB unit requirements.

All department instructors can advise students on academic matters, the ROTC program, and financial aid. In addition, the ROTC enrollment counselor is available for discussion of special options such as the two-year program or the scholarship program. Several publications, including brochures and fact sheets, are available in the department office or on their Web site.

Military Science Courses

Leadership laboratory required for all advanced ROTC students to provide the opportunities for leadership development through practical exercises emphasizing the duties and responsibilities of junior leaders.

LOWER DIVISION

1A. Introduction to Leadership I

(1) STAFF

Prerequisite: freshman standing.

Leadership lab attendance is required for ROTC students.

Introduction to the organization, purpose, and functions of the U.S. Army. Provides the foundation in basic life skills to include fitness, interpersonal communication and ethical behavior using current Army models. Provide insight into the Army's profession of arms and officer's role within that profession.

1AB. Introduction to Leadership II

(1) STAFF

Prerequisite: freshman standing.

Introduces students to the Army's tactical concepts such as map reading, orienteering and general military operations. Provides foundation of tactical and leadership concepts that are required for subsequent courses. Focus on basic knowledge and skills for personal leadership competence in the Army. (W)

1C. Introduction to Leadership III

(1) STAFF

Prerequisite: freshman standing.

Explores Army Leadership values, attributes, actions and skills required of Army officers. Introduces students to basic military tactics required of all Army soldiers. Continue foundation of tactical and leadership concepts that are reequired for subsequent courses. Continue to focus on basic leadership knowledge and skills. (S)

2AA. Foundations of Leadership I

(2) STAFF

Prerequisite: sophomore standing.

Leadership laboratory is required.

Explores leadership and leadership problems solving case study: A broad analysis of leadership with an emphasis on the modern leader. Familiarization with case study on decision making and the modern army leader. Course is designed to maximize student participation, inspire intellectual curiosity, teach critical "life skills", and stimulate self-study.

2AB. Foundations of Leadership II

(2) STAFF

Prerequisite: sophomore standing.

Leadership laboratory is required.

Exploration of leadership and leadership problem solving techniques using a variety of instructional methodologies. Introduces complex land navigation techniques, operation orders and effective communication skills. Designed to maximize student participation, inspire intellectual curiosity, teach critical military skills and stimulate self-study.

2AC. Foundations of Leadership III

(2) STAFF

Prerequisite: sophomore standing.

Leadership laboratory is required.

Continued study of leadership techniques using a variety of instructional methodologies. Introduces students to contemporary military operating environment and advance time management techniques. Elaborates on other small unit techniques. Continues to maximize student participation, inspire intellectual curiosity, teach critical military skills.

6. Basic Military Science Field Study

(2) STAFF

Prerequisites: sophomore, juniors, senior standing; consent of instructor. Students must meet US Army Officer Enrollment Qualification and Documentation Requirements and have enough time remaining at UCSB to complete the ROTC Advance Course Requirements.

Students are encouraged to take Military Science 22 or Military Science 23 before attending Leadership Training Course.

Students attend the 28-day paid Leadership Training Course designed to develop leadership and officer potential for the U.S. Army and ultimately contracting into the Army's ROTC advance course program. Training is intentionally stressful and designed to build individual confidence through the accomplishment of leadership opportunities.

10. Terrorism and Asymmetric Warfare

(2) STAFF

Prerequisite: lower-division standing.

Examination of methods in which non-state actors carry out violence against states with emphasis on the motivation behind the acts and implications for modern forces on the strategic, operational, and tactical levels.

22. Basic Military Physical Conditioning

(.5) STAFF

May be repeated for credit to a maximum of 3 units.

Basic physical conditioning using the United States Army physical training program. Emphasis on cardio-vascular system and upper body strength. Focus towards Army Officer Training Corps cadets, although not limited to this group.

27. American Military History and the Evolution of Western Warfare

(4) STOKES

Prerequisites: lower-division standing; consent of instructor.

Surveys American military history and the evolution

of western warfare from early western civilizations through the end of the twentieth century. Course examines the strategies and tactics of warfare throughout this period and explores how social, economic and technological advances contributed to the distinct patterns of war that characterized the struggles over the past 300 years. Additionally, this course gives an appreciation of the U.S. military establishment in society and the evolution of the military profession. (F,W,S)

99. Independent Studies

(1-5) STAFF

Prerequisites: consent of instructor and department.

Students must have a minimum 3.0 grade-point average. May be repeated for credit to a maximum of 8 units. Students are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined.

Selected research under the direction of a faculty member. (F,W,S)

UPPER DIVISION

131. Tactical Leadership I

(2) STAFF

Prerequisites: junior standing; consent of department.

Leadership labs and field training exercises are required for all students. Enrollment limited to advanced ROTC cadets.

Study of military leadership principles, responsibilities, and traits in a small unit, emphasizing adaptability and flexibility. Master technical skills in land Navigation, Troop Leading Procedures, Tactical Orders, Battle Drills and Squad Tactics. Gain practical experience by planning and executing small unit military training events. (F)

132. Tactical Leadership II

(2) STAFF

Prerequisites: Military Science 131; junior standing.

Intermediate study of military leadership principles, responsibilities and traits in a small unit. Intermediate study of offensive and defensive operations and their applications. Students gain practical experience by planning and executing training events. Labs and field training required for all students. (W)

133. Applied Leadership

(2) STAFF

Prerequisites: Military Science 132; junior standing.

Introduction to leadership behavior, styles, peer leadership, stress management, motivating others, principles of war and applying rules of land warfare. Introduced to basic military situations in a non-conventional military operating environment. Leadership laboratory required for all ROTC students.

141. Developmental Leadership I

(2) STAFF

Prerequisites: Military Science 133; senior standing.

Students study the fundamentals of decision making, command and control problems, staff relationships, counseling, analyzing courses of action. Leadership laboratory required for all ROTC students. Students gain practical experience by planning and executing cadet training and social events. Labs required. (F)

142. Developmental Leadership II

(2) STAFF

Prerequisites: Military Science 141; senior standing.

Leadership laboratory required for all ROTC students.

Study complex military situations in a contemporary operating environment. Explores military professional ethics, military law, improper relationships, and ethics in that environment. Gain practical experience by planning and executing cadet training and social events. (W)

143. Adaptive Leadership

(2) STAFF

Prerequisites: Military Science 142; senior standing.

Leadership laboratory required for all ROTC students.

Learn about small unit leadership dynamics between officers and noncommissioned officers and apply principles of war in a historical battle analysis setting. Learn about financial management, awards processing and installation support services. (S)

190. Advanced Military Science Field Study

(4) STAFF

Prerequisites: upper-division standing. Students must have had successfully completed Military Science 131, 132, and 133, and three quarters of Military Science 23 prior to attending this course. Students must meet US Army Officer Contracted Qualification and Documentation Requirements.

Students attend the 33-day paid Leadership Development Advanced Course designed to further develop and evaluate leadership and officer potential. The challenges are rigorous and demanding, both mentally and Physically, and will test intelligence, common sense, ingenuity and stamina. (S)

199. Independent Studies in Military Science

(1-5) STAFF

Prerequisites: upper-division standing; completion of two upper-division courses in military science; open only to ROTC advanced course students approved by the chair.

Students must have a minimum 3.0 grade-point average for the preceding three quarters and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined.

Independent studies with the professor. To permit study on a subject agreed by the student and professor, not covered by regular course offerings. (F,W,S)

Department Chair: Dennis Clegg

Faculty

Rolf E. Christoffersen, Ph.D., UC Los Angeles, Associate Professor (plant molecular biology)

Dennis O. Clegg, Ph.D., UC Berkeley, Professor (molecular neurobiology)

James B. Cooper, Ph.D., Washington University, Associate Professor (plant biology)

Peggy A. Cotter, Ph.D., UC Los Angeles, Associate Professor (microbial pathogenesis)

Frederick Dahlquist, Ph.D., California Institute of Technology, Professor (biochemistry)

Diane E. Eardley, Ph.D., UC Berkeley, Senior Lecturer with Security of Employment (cellular immunology)

Stuart C. Feinstein, Ph.D., UC San Francisco,

Professor (molecular cell biology and neurobiology)

Ruth R. Finkelstein, Ph.D., Indiana University, Professor (plant biology)

Steven K. Fisher, Ph.D., Purdue University, Professor (neurobiology)

Kathleen Foltz, Ph.D., Purdue University, Associate Professor (cellular and molecular biology, marine invertebrate development)

Christopher Hayes, Ph.D., University of Connecticut, Assistant Professor (molecular mechanisms of ribosome pausing during protein synthesis and recruitment of SsrA (tmRNA) to stalled ribosomes)

Kenneth Kosik, M.D., Medical College of Pennsylvania, Professor and Harriman Chair (neuronal development, neurodegeneration, Alzheimer's disease)

G. John Lew, Ph.D., University of Calgary, Associate Professor (biochemistry, molecular biology, enzymology)

David A. Low, Ph.D., UC Irvine, Professor (microbial genetics)

Dzwokai Ma, Ph.D., UC Berkeley, Assistant Professor (trafficking regulation of receptors and channels in the nervous system)

Michael J. Mahan, Ph.D., University of Utah, Professor (microbial pathogenesis)

Daniel Morse, Ph.D., Albert Einstein College of Medicine, Professor (molecular genetics, biochemistry, marine biology, developmental biology)

Stephen J. Poole, Ph.D., UC San Diego, Associate Professor (developmental biology, genetics, molecular biology)

Joel Rothman, Ph.D., University of Oregon, Professor (developmental biology, genetics, biochemistry)

Charles E. Samuel, Ph.D., UC Berkeley, Professor (virology, biochemistry)

Duane Sears, Ph.D., Columbia University, Professor (biochemistry)

William C. Smith, Ph.D., UC Santa Cruz, Professor (vertebrate developmental biology)

Douglas Thrower, Ph.D., UC Santa Barbara, Lecturer PSOE (pharmacology, cell biology, biochemistry, genetics, microbiology)

Carol A. Vandenberg, Ph.D., UC San Diego, Professor (molecular neurobiology)

J. Herbert Waite, Ph.D., Duke University, Professor, (marine biomolecular materials)

Thomas Weimbs, Ph.D., University of Cologne, Associate Professor (epithelial cell polarity, vesicle traffic, membrane fusion, polycystic kidney disease)

Leslie Wilson, Ph.D., Tufts University, Professor (biochemical pharmacology)

Emeriti Faculty

John A. Carbon, Ph.D., Northwestern University, Professor Emeritus (biochemistry)

Louise Clarke, Ph.D., UC Santa Barbara, Professor Emerita (biochemistry, genetics)

James Cronshaw, D.Sc., Ph.D., Leeds, Professor Emeritus (cell biology)

Ellis Englesberg, Ph.D., UC Berkeley, Professor Emeritus (microbiology, genetics)

Aharon Gibor, Ph.D., Stanford University, Professor Emeritus (cell biology)

Philip C. Laris, Ph.D., Princeton University, Professor Emeritus (cell physiology)

Nancy L. Lee, Ph.D., University of Pittsburgh, Professor Emerita (molecular biology)

Henry I. Nakada, Ph.D., Temple University, Professor Emeritus (biochemistry)

Eduardo Orias, Ph.D., California Institute of Technology, Professor Emeritus (genetics)

Ian K. Ross, Ph.D., McGill University, Professor Emeritus (cell biology, mycology)

George Taborsky, Ph.D., Yale University, Professor Emeritus (biochemistry)

Edward L. Triplett, Ph.D., Stanford University, Professor Emeritus (biology)

Affiliated Faculty

Ben Reese, Ph.D., University of Oxford (psychology)

The Department of Molecular, Cellular, and Developmental Biology (MCDB) offers the bachelor of science degree in four departmental majors—biochemistry-molecular biology, cell and developmental biology, microbiology, and pharmacology. In addition, it cooperates with the Department of Ecology, Evolution, and Marine Biology in offering the interdepartmental biological sciences major, with both B.A. and B.S. objectives. The department offers graduate programs leading to the degrees of master of arts and doctor of philosophy, with emphasis in molecular, cellular, and developmental biology. An interdepartmental graduate program is offered in biochemistry and molecular biology, in cooperation with the Departments of Chemistry and Materials. In addition, a wide range of courses is available to all undergraduates for elective enrollment or for the support of their preparation for degrees in other departments or programs.

Molecular, cellular, and developmental biology majors provide excellent preparation for a wide variety of biology-related careers, including careers in the health sciences, biotechnology, the pharmaceutical industry, agriculture, environmental health and safety, food technology, and forensic science, and for research careers in academic, industry, and government laboratories. Many MCDB students prepare for entry into graduate or professional schools. Students should become familiar with the requirements of programs of interest, and then discuss their undergraduate coursework with their advisor. In general, all of the department's majors are suitable for students preparing for professional schools in medicine, veterinary medicine, dentistry, pharmacy, or nursing, and for graduate programs in biochemistry, cell biology, developmental biology, genetics, immunology, microbiology, molecular biology, neurobiology, pharmacology, or virology. Students with a bachelor's degree who are interested in pursuing a California Teaching Credential should contact the credential advisor in the Graduate School of Education as soon as possible.

The department undergraduate academic advisor is available for counseling on matters such as major requirements, course substitutions, petitions, and career and graduate school information. One faculty member serves each year as graduate advisor. The graduate program

assistant helps graduate students in all matters related to their graduate study. Department publications are available from the undergraduate advisor and the graduate program assistant. Additional information is available at the MCDB Web site at lifesci.ucsb.edu/MCDB.

Senior Honors Program

Students with outstanding academic records in biological sciences are encouraged to apply for the senior honors program early in the fall quarter of the senior year. The honors program centers on an independent research project carried out in one of the departmental research groups (MCDB and EEMB 199) and applications are available from the undergraduate advisor.

Undergraduate Program

Students are normally expected to complete all courses required in preparation for the major by the end of their sophomore year, but physics may be delayed until the junior year if necessary. Students with strong high school backgrounds are urged to complete their basic preparation in general chemistry and mathematics during their freshman year. Students with weak mathematics preparation should make up this deficiency by completing intermediate algebra and trigonometry by correspondence through University Extension, preferably during the summer preceding enrollment at UCSB, or by completing Mathematics 15 at UCSB. As the requirements suggest, each major in the department is designed to emphasize a different area in biology.

Upper-division major courses offered on the P/NP-only basis may be taken for major credit to a maximum of 4 units total in any combination for pharmacology and the B.A. in biological sciences or a maximum of 8 units total for the other B.S. majors. All other courses for the major, both preparation and upper-division, must be taken for letter grades.

Pre-Biology

Students are not admitted directly into the following majors: Biological Sciences B.A. or B.S., Biochemistry-Molecular Biology B.S., Biological Sciences B.A. or B.S., Cell and Developmental Biology B.S., Microbiology B.S., and Pharmacology B.S. Instead, they are first admitted to the pre-biology major, and they may advance to full major standing in one of these majors only after fulfilling the pre-major course and grade requirements listed below. *Note: Completion of the pre-major does not fully satisfy the preparation for the major requirements for any of the majors.* Students should review the full requirement sheet for the major they intend to declare and plan their schedules accordingly. Also note that acceptance into the pre-major does not guarantee admission to full major status.

Students may petition for advancement to full major status in any one of the majors as soon as they have completed the required minimum of twelve courses with a 2.0 or higher grade-point average in area B, in area C, and in the courses in area A and D combined. At the time of the petition, they must also have a 2.0 or higher grade-point average in all courses attempted toward the major (preparation and upper-division). The P/NP grading option is

not allowed for any pre-major courses. All must be completed on a letter-grade basis.

A. General Chemistry: Chemistry 1A or 2A, 1B or 2B, 1C or 2C. (*The entire three-quarter series and laboratories are required for all MCDB majors.*)

B. MCDB 1A, MCDB 1B, EEMB 2, EEMB 3.

C. MCDB 1AL, either MCDB 1BL or EEMB 2L, and EEMB 3L.

D. Two courses from the following:

1. Organic Chemistry: Chemistry 109A-B-C. (*Laboratories are also required for all MCDB majors. Biological Sciences B.A. and B.S. do not require 109C.*)
2. Calculus: Mathematics 3A or 34A, 3B or 34B (Biochemistry-Molecular Biology requires Mathematics 3A-B-C; the other majors give a choice of Mathematics 3A-B or 34A-B).
3. Statistics: EEMB 30 or PSTAT 5A or Math 3C (Biochemistry-Molecular Biology requires Math 3C).
4. Physics 6A-B-C (Biological Sciences B.A. does not require 6C. Laboratories required for all majors).

Note: Many upper-division EEMB and all MCDB courses require a C or better in each prerequisite course. See individual course listings.

Bachelor of Arts— Biological Sciences

UCSB offers both a bachelor of arts (B.A.) and a bachelor of science (B.S.) degree in biological sciences. The B.A. degree is intended to provide flexibility in curriculum planning for students interested in obtaining a degree in biology accompanied by a broader background in the liberal arts. Either degree is acceptable to most graduate and professional schools. Students are encouraged to seek advice from biology faculty and academic advisors regarding which degree option is most appropriate to their career goals.

Students are not admitted directly into the biological sciences major. Instead, they are first admitted to the pre-biology major, and they may advance to full major standing only after fulfilling specified pre-major course and grade requirements. See section entitled "Pre-Biology" for details.

Note: Hyphens indicate that an entire course sequence must be completed as shown to fulfill an area requirement. Note also that a single course, though listed in more than one area, can satisfy only one requirement.

Preparation for the major. MCDB 1A-AL, MCDB 1B, EEMB 2, either MCDB 1BL or EEMB 2L, and EEMB 3-3L; Chemistry 1A-AL-B-BL-C-CL or 2A-AC-B-BC-C-CC, 6AL, BL (or-BH), and 109A-B; and Mathematics 3A-B or 34A-B, and one of the following: PSTAT 5A or EEMB 30 or Mathematics 3C; Physics 6A-AL-B-BL.

Upper-division major. Thirty-six upper-division units in biological sciences, distributed as follows:

Note: The following courses do not count toward upper-division major credit: EEMB 182, 183, 184, MCDB 121, 182, 183, 184. In addition, no more than 4 units of the following courses combined will apply to the major: EEMB 185-199, MCDB 185-199.

- A. Genetics: MCDB 101A (MCDB 101B strongly recommended for students taking 101A) or EEMB 129
- B. Physiology: One course or course sequence from MCDB 111, 151, EEMB 141, 143, 154, 156, 175
- C. Development and Cell Biology or Biochemistry and Molecular Biology: One course or course sequence from MCDB 103, 108A, 110, 112, 118, 133, 134, 135, 151, 152, 153; EEMB 164
- D. Ecology or Evolution: One course or course sequence from EEMB 102, 108, 109 (or Geology 148), 113-113L, 120, 131 (or Geology 121), 136-136L, 137 (or Geology 141), 138, 139, 140, 142A, 166, 171 (or Environmental Studies 171), 173
- E. Diversity of Form and Structure: One course or course sequence from EEMB 106, 107, 111, 112, 113-113L (if not used in D above), 116, 127, 134; MCDB 131, 139
- F. Electives: Additional upper-division courses offered within the Department of Ecology, Evolution, and Marine Biology and the Department of Molecular, Cellular, and Developmental Biology to bring unit total to 36.

Bachelor of Science— Biochemistry-Molecular Biology

This major is designed for students interested in the characteristics of the molecules and the molecular mechanisms involved in living systems. It is especially recommended for those planning graduate work in biochemistry, molecular biology, or microbiology.

Students are not admitted directly into the biochemistry-molecular biology major. Instead, they are first admitted to the pre-biology major, and they may advance to full major standing only after fulfilling specified pre-major course and grade requirements. See section entitled “Pre-Biology” for details.

Note: Hyphens indicate that an entire course sequence must be completed as shown to fulfill an area requirement.

Preparation for the major. MCDB 1A-AL, MCDB 1B, EEMB 2, either MCDB 1BL or EEMB 2L, and EEMB 3-3L; Chemistry 1A-AL-B-BL-C-CL or 2A-AC-B-BC-C-CC, 6AL, BL (or-BH), and 109A-B-C; Mathematics 3A-B-C; Physics 6A-AL-B-BL-C-CL.

Upper-division major. Forty-eight units, distributed as follows:

Note: The following courses do not count toward upper-division major credit: EEMB 183, 184, MCDB 182, 183, 184. In addition, no more than 8 units of the following courses combined will apply to the major: MCDB 185-199.

- A. Genetics: MCDB 101A-B
- B. Biochemistry: MCDB 108A-B-C
- C. Biochemistry laboratory: MCDB 109L
- D. Physical Chemistry: Chemistry 112A (recommended) or Chemistry 113A and MCDB 123
- E. Electives: additional courses from the following to bring the total upper-division units to 48: MCDB 103, 103L, 108AH, 108AL, 111, 112, 112L, 117, 118, 126A, 126AL, 126B, 126BL, 126C, 131, 131L, 132, 132L, 133, 133H, 133L, 134, 135, 138, 139, 140L, 145, 151, 151H, 152, 152H, 153, 153H, 167, 186, 187, 188, 192, 194DT, 197, 198, 199, EEMB 154; Chemistry 143, 145, 147, 161, 162A-B.

Bachelor of Science— Biological Sciences

UCSB offers both a Bachelor of Arts (B.A.) and a Bachelor of Science (B.S.) degree in biological sciences. The B.S. degree is intended for those students desiring a more focused and intensive curriculum in biology, including the development of laboratory skills. Either degree is acceptable to most graduate and professional schools. Students are encouraged to seek advice from biology faculty and academic advisors regarding which degree option is most appropriate to their career goals.

Students are not admitted directly into the biological sciences major. Instead, they are first admitted to the pre-biology major, and they may advance to full major standing only after fulfilling specified pre-major course and grade requirements. See section entitled “Pre-Biology” for details.

Note: Hyphens indicate that an entire course sequence must be completed as shown to fulfill an area requirement.

Preparation for the major. MCDB 1A-AL, MCDB 1B, EEMB 2, either MCDB 1BL or EEMB 2L, and EEMB 3-3L; Chemistry 1A-AL-B-BL-C-CL or 2A-AC-B-BC-C-CC, 6AL, BL (or-BH), and 109A-B; Mathematics 3A-B or 34A-B, and one of the following: PSTAT 5A or EEMB 30 or Mathematics 3C; Physics 6A-AL-B-BL-C-CL.

Upper-division major. Forty-eight units, distributed as follows:

Note: The following courses do not count toward upper-division major credit: EEMB 182, 183, 184, MCDB 121, 182, 183, 184. In addition, no more than 8 units of the following courses combined will apply to the major: EEMB 185-199, MCDB 185-199.

- A. Genetics: One course sequence from MCDB 101A-B (MCDB concentration) or EEMB 129 and 130 (EEMB concentration)
- B. One course or course sequence from each of the following. *Note: Courses listed in more than one section (noted with an asterisk) can be applied to only one section.*
- Physiology: MCDB 111, 126A, 132, 151*; EEMB 141, 143, 151, 154, 156, 175
 - Developmental and Cell Biology: MCDB 103, 112, 118, 133*, 135, 151*, 152, 153
 - Biochemistry and Molecular Biology: MCDB 108A, 110, 126B, 126C, 133*, 134, EEMB 164
 - Ecology: EEMB 120, 138, 139*, 140, 142A, 166, 171 (or Environmental Studies 171), 173
 - Evolution: EEMB 102, 108, 109 (or Geology 148), 113-113L*, 131 (or Geology 121), 136-136L (or Geology 111-111L), 137 (or Geology 141), 139*
 - Diversity of Form and Function: EEMB 106, 107, 111, 112, 113-113L*, 116, 127, 134; MCDB 131, 139
 - Laboratory: Either one of the underlined courses from sections 1-6 above or one of the following: MCDB 103L, 109L, 112L, 126AL, 126BL, 131L, 132L, 133L, 140L; EEMB 107L, 119, 120AL, 127L, 140L, 143L, 148L, 164L, 164S, 170
- C. Electives: Additional upper-division courses offered within the Department of Ecology, Evolution, and Marine Biology and

the Department of Molecular, Cellular, and Developmental Biology to bring the total to 48 units.

Bachelor of Science—Cell and Developmental Biology

Modern cell and developmental biology brings together a diverse group of disciplines and technologies linked by the common goals of understanding the nature and behavior of cells and how these cells work together to assemble an organism. Whereas some cell and developmental biologists may concentrate on the role that one particular molecule plays within cells, others study the way that many different molecules assemble into structures such as chromosomes or the nucleus, while others may examine how groups of cells interact to form systems of greater complexity, ultimately leading to the progression of a fertilized egg through the many stages of development to form an adult organism. The range of instruments and methods employed by cell and developmental biologists is equally diverse, including recombinant DNA technology, biochemistry, cell culture, genetics, light and electron microscopy, and many others.

The course requirements for the major in cell and developmental biology reflect the diversity within the field. Upper-division coursework includes work in genetics, cell biology, developmental biology (students may choose from among animal, plant, and neuronal development), biochemistry, and additional electives, including extensive laboratory experience.

The major is designed to prepare students for graduate training in a wide range of molecular, cellular and developmental biology disciplines; medical, dental, nursing, optometry, and other health-related professions; and employment in the public or private sector (such as biotechnology) research communities.

Students are not admitted directly into the cell and developmental biology major. Instead, they are first admitted to the pre-biology major, and they may advance to full major standing only after fulfilling the pre-major course and grade requirements. See section entitled “Pre-Biology” for details.

Note: Hyphens indicate that an entire course sequence must be completed as shown to fulfill an area requirement.

Preparation for the major. MCDB 1A-AL, MCDB 1B, EEMB 2, either MCDB 1BL or EEMB 2L, and EEMB 3-3L; Chemistry 1A-AL-B-BL-C-CL or 2A-AC-B-BC-C-CC, 6AL, BL (or-BH), and 109A-B-C; Mathematics 3A-B or 34A-B, and one of the following: PSTAT 5A or EEMB 30 or Mathematics 3C; Physics 6A-AL-B-BL-C-CL.

Upper-division major. Forty-eight units, distributed as follows:

Note: A minimum of 32 upper division units must be completed within the Department of Molecular, Cellular, and Developmental Biology. The following courses do not count toward upper-division major credit: EEMB 182, 183, 184, MCDB 121, 182, 183, 184, 194MD. In addition, no more than 8 units of the following courses combined will apply to the major: EEMB 185-199, MCDB 185-199.

- A. Genetics: MCDB 101A-B
- B. Biochemistry: MCDB 108A-B-C

- C. Cell Biology: MCDB 103
 D. Developmental Biology: Two courses from: MCDB 112, 118, 153
 E-1. One course from: MCDB 103L, 112L
 E-2. One course or course sequence from: MCDB 109L, 126A-AL, 126B-BL, 132-132L, 133-133L, 140L
 F. Electives: Additional upper-division courses offered within the Department of Molecular, Cellular, and Developmental Biology and the Department of Ecology, Evolution, and Marine Biology and Chemistry 161 to bring unit total to 48 units.

Bachelor of Science— Microbiology

Microbiology has been and continues to be at the forefront in contributing to human welfare and to our understanding of the basic mechanisms of life processes. Three concentrations in microbiology are available.

General microbiology will provide the student with a broad knowledge of both prokaryotic and eukaryotic microorganisms. Such a background will form the basis for understanding the relationships between the various groups of microorganisms and their environment and the relationship of those microorganisms to human welfare. This program will stress the contribution of microbiology to our understanding of basic life processes, and will provide a background for careers in food, industrial, marine, and pharmacological microbiology, and for graduate work in microbiology.

Biomedical sciences, in addition to providing a basic training in microbiology, will also provide a specialized background for students whose careers lie in the fields of medical technology and for those who wish to pursue graduate work in medical or clinical microbiology.

Genetic engineering, in addition to providing a basic training in microbiology, will provide specialized training in the methodology of recombinant DNA research. This area of research is paving the way for a fundamental understanding of the nature of the eukaryotic gene and its regulation. It is also ushering in a revolution in the pharmaceutical industry in the production of hormones and other biologically useful agents.

Students are not admitted directly into the microbiology major. Instead, they are first admitted to the pre-biology major, and they may advance to full major standing only after fulfilling specified pre-major course and grade requirements. See section entitled "Pre-Biology" for details.

Note: Hyphens indicate that an entire course sequence must be completed as shown to fulfill an area requirement.

Preparation for the major. MCDB 1A-AL, MCDB 1B, EEMB 2, either MCDB 1BL or EEMB 2L, and EEMB 3-3L; Chemistry 1A-AL-B-BL-C-CL or 2A-AC-B-BC-C-CC; Chemistry 6AL, BL (or-BH), and 109A-B-C; Mathematics 3A-B or 34A-B and one of the following: PSTAT 5A or EEMB 30 or Mathematics 3C; Physics 6A-AL-B-BL-C-CL.

Upper-division major. Forty-nine upper-division units required, distributed as follows: MCDB 101A-B, 108A-B-C, 131-131L,

- 132-132L, 133 (133L strongly recommended), 134, plus additional units from the following to bring unit total to 49 units: MCDB 108AH, 108AL, 133H, 133L, 135, 138, 139, 140L, 197, 199; EEMB 111, 134. A maximum of 2 units of MCDB 197 and 199 combined can be applied. Students are encouraged to select their elective courses from within one of the tracks below.
 A. General Microbiology: EEMB 134 and MCDB 108AL, 133L, 138
 B. Bio-Medical Sciences: MCDB 108AL, 133L, 138, 139 and EEMB 111
 C. Genetic Engineering: MCDB 108AL, 133L, 140L

Bachelor of Science— Pharmacology

The emphasis in this major is on pharmacology as a basic science, rather than on the therapeutic principles of pharmacology. The curriculum content is designed to prepare students for careers in pharmaceutical research-and-development laboratories; the program also provides a strong background for graduate study in pharmacology.

Students are not admitted directly into the pharmacology major. Instead, they are first admitted to the pre-biology major, and they may advance to full major standing only after fulfilling the pre-major course and grade requirements. See section entitled "Pre-Biology" for details.

Note: Hyphens indicate that an entire course sequence must be completed as shown to fulfill an area requirement.

Preparation for the major. MCDB 1A-AL, MCDB 1B, EEMB 2, either MCDB 1BL or EEMB 2L, and EEMB 3-3L; Chemistry 1A-AL-B-BL-C-CL or 2A-AC-B-BC-C-CC; Chemistry 6AL, BL (or-BH), and 109A-B-C; Mathematics 3A-B or 34A-B and one of the following: PSTAT 5A or EEMB 30 or Mathematics 3C or Psychology 5; Physics 6A-AL-6B-BL-6C-CL.

Upper-division major. Fifty upper-division units, distributed as follows:

Note: A minimum of 34 upper division units must be completed through courses within the MCDB Department. Instructor approval required prior to enrollment in psychology courses.

- A. Pharmacology: MCDB 126A-AL-B-BL-C
 B. Biochemistry: MCDB 108A-B-C
 C. Genetics: MCDB 101A-B

D. Additional courses from the following to bring the total upper-division units in the major to 50. MCDB 103, 108AH, 108AL, 109L, 111, 112, 112L, 123, 131, 131L, 132, 132L, 133, 133H, 133L, 134, 135, 138, 139, 140L, 145, 151, 151H, 152, 152H, 153, 153H, 186, 187, 192, 194DT, 197, 198, 199; EEMB 111, 126MM, 154, 156, 160, 164, 164L, 164S, 175; Chemistry 161, 162, 181; Psychology 115, 133, 134, 137. *Note: A maximum of 4 units of the following courses allowed: MCDB 185-199.*

Students are encouraged to select their elective courses from within one of these tracks:

1. Molecular and Cellular Biology: MCDB 108AL, 112, 112L, 131, 131L, 132, 132L, 133, 133L, 134, 135, 138, 139, 140L, 151, 152, 153; EEMB 126MM
2. Biochemical Pharmacology: MCDB 108AL, 109L, 145, Chemistry 161, 162, 181, EEMB

- 126MM, 164, 164L, 164S
 3. Neurobiology and Behavior: MCDB 151, 152, 153; Psychology 115, 133A, 133B, 137
 4. Physiology and Development: MCDB 111, 112, 112L, 151, 152, 153; EEMB 111, 154, 156, 175

Graduate Program

Graduate-level research in the Department of Molecular, Cellular, and Developmental Biology (MCDB) spans a wide range of topics including biochemistry, cell biology, cell physiology, developmental biology, gene regulation, genetics, immunology, microbiology, molecular marine biology, neurobiology, pharmacology, plant molecular biology, plant physiology, and virology. The department offers graduate studies leading to the master of arts and doctor of philosophy degrees in molecular, cellular, and developmental biology. Candidates for graduate degrees must meet university degree requirements found in the chapter, "Graduate Education at UCSB," as well as departmental requirements.

Admission

In addition to fulfilling university requirements for admission to graduate status described in the chapter "Graduate Education at UCSB," the applicant will normally hold a bachelor's degree in biology or a biological specialty area (such as biochemistry, cell and developmental biology, microbiology, molecular biology, physiology, or genetics). Undergraduate class work should include one year each of general biology, general chemistry, organic chemistry, calculus, and physics. Upper-division courses should include biochemistry, genetics, and additional specialized electives relevant to preparation for graduate work in molecular, cellular, and developmental biology.

Applicants with strong undergraduate records who lack some of the preparatory class work listed above may be admitted with the condition that they complete the necessary coursework early in their graduate careers.

The general test (verbal, quantitative, and analytical) of the Graduate Record Examination (GRE) is required of all applicants. One of the three following subject tests is also required: biochemistry, cell and molecular biology; biology; or chemistry.

Applicants whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL). Exceptions to this requirement will be considered for those students who have completed an undergraduate or graduate education at an institution whose primary language of instruction is English. The minimum score for consideration is 610 when taking the paper-based test or 253 when taking the computer-based test, or 102 when taking the Internet-based test. Tests must be taken within two years of application to UCSB.

Applications for admission must be received by December 15. Further details on admission to the MCDB graduate programs can be seen on the Web site at lifesci.ucsb.edu/MCDB.

Master of Arts— Molecular, Cellular, and Developmental Biology

Degree Requirements

A candidate for the master's degree must fulfill, in addition to general university requirements, the minimum lower- and upper-division requirements or their equivalents for the major in their field of emphasis. Students admitted with deficiencies must remedy them early in their graduate studies.

Plan 1 (thesis) program requirements: (1) a research thesis, (2) graduate core course modules (16 units), and (3) a minimum of 30 units (core modules and elective courses) of upper-division and graduate coursework. Students must receive an average of a B or better in the core course modules given each quarter and no grade lower than a "C" in a module. Students must receive a B or better in each elective course; courses outside the department may be substituted upon prior written approval of the Faculty Graduate Advisor. Up to 4 units of literature courses (e.g., MCDB 265, 266, 268, 290, 595) may be counted toward the degree unit requirement. No more than one half of the units counted toward the degree can be comprised of MCDB 596 research coursework.

Plan 2 (examination) program requirements:

(1) graduate core course modules (16 units), and (2) a minimum of 36 units (core modules and elective courses) of upper-division and graduate coursework. Students must receive an average of a B or better in the core course modules given each quarter and no grade lower than a "C" in a module. Students must receive a B or better in each elective course; courses outside the department may be substituted upon prior written approval of the Faculty Graduate Advisor. Up to 4 units of literature courses (e.g., MCDB 265, 266, 268, 290, 595) may be counted toward the degree unit requirement. Up to 6 units of MCDB 596 research coursework may count toward the degree unit requirement. Upper-division undergraduate lecture courses may also count toward the degree with the approval of the faculty graduate advisor. Students are expected to take seminars: 260, 262, 263. The following courses may not be counted towards the degree: MCDB 260, 263, 269, 290, 500, 501, 502, and 595.

Participation in the departmental research seminar program is expected of all MCDB graduate students.

Students admitted to the M.A.-only program may petition to transfer into a Ph.D. program. Petitions will be acted upon by the appropriate admissions committee, and admission to the Ph.D. program will be based on the same criteria applied to applications from other entering Ph.D. students. Successful transfer from M.A. to Ph.D. program will also depend on satisfactory progress in all graduate courses and written support of at least three faculty members. If the petition is approved, the student should consult with the appropriate graduate advisor regarding Ph.D. program requirements.

Students admitted to M.A./Ph.D. programs, may petition the graduate committee to drop the M.A. requirements after a minimum of two

quarters of graduate study. Petitions will be acted upon by the graduate advisor following review by the graduate committee, and action on such petitions will be contingent upon satisfactory progress in the graduate core courses and the written support of at least two faculty members. As with all other Ph.D. students, continuation in the Ph.D. program is also contingent upon the successful completion of two qualifying examinations, each consisting of a written research proposition followed by an oral defense of the proposition.

Doctor of Philosophy— Molecular, Cellular, and Developmental Biology

Degree Requirements

Candidates for the degree of doctor of philosophy must normally have the bachelor's degree in biological sciences, with a preparation deemed equivalent to that required for the bachelor's degree from UCSB. Students who are admitted to graduate standing with deficiencies in preparation will be required to take appropriate undergraduate courses.

The following unified requirements, in addition to the dissertation, apply to all students entering the Ph.D. program: (1) students must pass one qualifying examination, consisting of a written research proposition followed by an oral defense of the proposition. This examination will normally be taken during the second year of graduate study. The proposition will deal with an area of molecular and cell biology distinct from the student's anticipated dissertation research; (2) the student must pass the graduate core course sequence (MCDB 220A-B-C; 223; 225, 229, 230, 235, and BMSE 205A); students must receive an average of B or better in the core course modules given each quarter and no grade lower than a C in a module. Students are also required to take the following courses: the MCDB proposal-preparation course (MCDB 221); at least one additional graduate lecture course of the 200 series (not including seminar or literature courses); MCDB 260 (faculty research seminar) each quarter; MCDB 262 (student/postdoctoral research program) each quarter; MCDB 263 (visiting seminar speaker program) each quarter; two graduate literature seminars (from the MCDB 260 series other than 260, 262, and 263; or the 595 series—Group Studies—excluding any laboratory group meetings that may carry a course designation) each year, until formal advancement to Ph.D. candidacy; and departmental teaching assistant orientation/practice/technique courses (MCDB 500, 501, 502).

All doctoral candidates must qualify for and hold a teaching assistantship for the equivalent of two quarters as part of the preparation for the Ph.D. degree. All doctoral students who are supported wholly or in part by institutional funds (including university fellowships, teaching assistantships, traineeships, etc.) are expected to complete three one-quarter laboratory rotations during their first year of study. For first-year students supported entirely by faculty research grants, three rotations are not mandatory but are highly recommended.

Laboratory rotations serve two purposes: (1) students learn first-hand about research efforts

in several different areas, thus broadening a student's research perspective; and (2) they allow students and mentors to match up so that a research advisor may be selected. Each laboratory rotation consists of 3 units of MCDB 596 under the instruction of the appropriate faculty member. Although, in principle, this translates into a minimum commitment of 15 hours per week in the research laboratory, research is the core of doctoral training and it is assumed that students will devote much more than this to their research efforts during rotations. Grades will be assigned according to the Satisfactory/Unsatisfactory (S/U) grading system, on the basis of a laboratory meeting presentation or a written summary of the student's laboratory experience, at the faculty member's discretion, and a summary of the student's laboratory performance, written by the faculty member, will be placed in the student's permanent academic file. Students in the MCDB program may rotate in both MCDB and BMSE faculty laboratories.

Doctoral students take one qualifying examination administered by the department, complete a doctoral dissertation under the general supervision of a committee, and defend their dissertation in a final oral examination. With the approval of the candidate's doctoral committee, a scheduled departmental seminar may be substituted in lieu of the final examination.

Interdepartmental Graduate Program in Biomolecular Science and Engineering

For details, see catalog entry under Biomolecular Science and Engineering.

Molecular, Cellular, and Developmental Biology Courses

LOWER DIVISION

1A. Introductory Biology I

(4) CHRISTOFFERSEN, WILSON, FEINSTEIN

Prerequisites: Chemistry 1A-B-C (Chemistry 1C may be taken concurrently); or a score of 4 or better on either the Advanced Placement Chemistry or Advanced Placement Biology examinations.

Not open for credit to students who have completed Biology 4A or MCDB 4A or 5A. Lecture, 4 hours.

Introduction to biochemistry, cell biology and development, and genetics. (F)

1AL. Introductory Biology Laboratory I

(1) STAFF

Prerequisite: MCDB 1A (may be taken concurrently).

Not open for credit to students who have completed Biology 4A or MCDB 4A or 5A. Laboratory, 3 hours.

Laboratory investigations illustrate basic principles of biochemistry, molecular and cell biology, development, and genetics. (F)

1AZ. Selected Topics from MCDB 1A

(1-3) STAFF

Prerequisite: consent of department.

Not open for credit to students who have completed Biology 4AZ or MCDB 4AZ or 5AZ. Lecture, 1-4 hours.

Designed for transfer students who have completed part of MCDB 1A through transfer work. Topics will be selected by the department, as appropriate, to fulfill the introductory biology requirement at UCSB. (F)

1B. Introductory Biology II—Physiology**(3) FINKELSTEIN, WEIMBS**

Prerequisite: MCDB 1A and Chemistry 1A-B-C; or, MCDB 1A with a grade of C or better.

Not open for credit to students who have completed Biology 4B or EEMB 4B or 5B or MCDB 4B or 5B. Lecture, 3 hours.

Introduction to animal and plant physiology. (W)

1BL. Introductory Biology Laboratory II**(1) STAFF**

Prerequisites: MCDB 1A; and, concurrent enrollment in MCDB 1B and EEMB 2.

Same course as EEMB 2L. Not open for credit to students who have completed Biology 4B or EEMB 4B or 5B or MCDB 4B or 5B. Laboratory, 3 hours.

Laboratory investigations illustrate basic principles of animal and plant physiology, ecology, and evolution. (W)

1BZ. Selected Topics from MCDB 1B**(1-2) STAFF**

Prerequisite: consent of department.

Not open for credit to students who have completed Biology 4BZ or EEMB 4BZ or 5BZ or MCDB 4BZ or 5BZ. Lecture, 1-4 hours.

Designed for transfer students who have completed part of MCDB 1B through transfer work. Topics are selected by the department, as appropriate, to fulfill the introductory biology requirement at UCSB. (W)

20. Concepts of Biology**(4) COOPER**

Open to non-majors. Not open for credit toward graduation to students who have completed Natural Science 1C. Not open for credit to students who have completed Biology 20, or Biology 4A-B-C, or MCDB 5A-AL, or EEMB 5B-BL, or MCDB 5B-BL, or EEMB 5C-CL, or MCDB 1A, or MCDB 1B, or EEMB 2, or EEMB 3, or EEMB 20. Lecture, 3 hours; discussion, 1 hour.

Introduction to the science of life; cells, genetics, metabolism, molecular biology, physiology, natural selection, evolution, ecosystems; current news and controversial topics in biology. (S)

21. The Immune System and AIDS**(4) EARDLEY**

Not open for credit to students who have completed Biology 21. Lecture, 3 hours; discussion, 1 hour.

The basic properties of the immune system; the basic biology of AIDS and AIDS virus infection; and the biology of other sexually transmitted diseases. (W)

23. Biology of Cancer**(3) KOHL**

Lecture, 3 hours.

An introduction to developments regarding the etiology and treatment of various cancers. Lectures compare normal cells and tissues with those which have become malignant. Discussion of causes, treatment, and prevention of specific cancers.

24. Genetics and Human Disease**(3) KOHL**

Lecture, 3 hours

Introduction to genetics with emphasis on humans. Topics focus on human diseases with strong evidence for genetic components. Diseases covered include cancer, cystic fibrosis, Huntington's, muscular dystrophy, and others.

26. Contemporary Nutrition**(4) EARDLEY**

Lecture, 3 hours; discussion, 1 hour.

Presents the scientific basis for human nutrition including dietary nutrients and requirements, energy balance in health and disease and needs of various life stages. Food safety, preservation, and undernutrition throughout the world is discussed. (S)

27. Memory: Bridging the Humanities and Neuroscience**(3) KOSIK, JULLIEN**

Lecture, 3 hours; discussion, 1 hour.

Same course as French 40X and Comparative Literature 27.

Neurosciences now ask some of the same profound questions posed by writers, artists and philosophers for centuries, thus opening surprising perspectives

on memory and morality, dreams and perception, identity and agency. This course explores this emerging concordance.

90A. Honors Forum in Molecular, Cellular, Developmental Biology**(2) KOHL**

Prerequisites: honors standing in College of Letters and Science; consent of instructor. Seminar, 2 hours.

Seminar for selected students in Molecular, Cellular and Developmental Biology. Students will be introduced to research opportunities in the department. Focus will center on the use of the science library and the Internet as tools to produce a basic research paper. (F)

90B. Honors Forum in Molecular, Cellular, Developmental Biology**(2) KOHL**

Prerequisites: honors standing in College of Letters and Science; consent of instructor. Seminar, 2 hours.

Continuation of MCDB 90A. Students are introduced to various faculty in the department and begin reading and reviewing some of the original literature in the field. Students are expected to critically analyze basic research papers. (W)

90C. Honors Forum in Molecular, Cellular, Developmental Biology**(2) KOHL**

Prerequisites: honors standing in College of Letters and Science; consent of instructor. Seminar, 2 hours.

Continuation of MCDB 90B. Students meet with selected faculty in a defined area of research interest, attend various research seminars and laboratory meetings, and begin involving themselves with a research group. (S)

98. Readings in Biology**(1-3) STAFF**

Prerequisites: consent of instructor and department.

Students must have a minimum 3.0 cumulative grade-point average and are limited to 3 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined. Students are limited to 6 units of Biology 98 and MCDB 98 combined. Tutorial, 1 hour.

Special readings on selected topics in biology. Individual conferences one hour every week.

Designed to broaden the outlook and experience of advanced lower-division students. Hours and credit by arrangement with any member of the staff.

99. Introduction to Research**(1-3) STAFF**

Prerequisites: consent of instructor and department.

Students must have a minimum 3.0 cumulative grade-point average and are limited to 3 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined. Students are limited to 6 units of Biology 99 and MCDB 99 combined. Tutorial, 3-9 hours.

Laboratory experience for advanced lower-division students. Hours and credit by arrangement with any member of the staff.

UPPER DIVISION

Completion of all listed prerequisites with a grade of C or better (unless otherwise noted) is required for all upper-division courses.

101A. Molecular Genetics I: Prokaryotes**(4) LOW, COTTER, THROWER**

Prerequisites: MCDB 1A-B; EEMB 2; and Chemistry 1A-B-C. Completion of all listed prerequisites with a grade of C or better. Lecture, 3 hours; discussion, 1 hour.

From the double helix and genetic code to the latest breakthroughs. Structure, function, evolution and manipulation of DNA, RNA. Replication, expression, recombination, complementation and their regulation in prokaryotes (bacteria, plasmids, viruses). Recombinant DNA technology in medicine, research, agriculture, and industry. (F,W,SS)

101B. Molecular Genetics II: Eukaryotes**(4) POOLE, CHRISTOFFERSEN**

Prerequisites: MCDB 1A; and, MCDB 1B and EEMB 2; and MCDB 101A. Completion of all listed prerequisites with a grade of C or better.

Not open for credit to students who have completed Biology 130B. Lecture, 3 hours; discussion, 1 hour.

Mendelian and molecular genetics. Replication, recombination, transmission and expression of DNA in eukaryotic organisms from yeast to man. Uses of traditional genetics and modern molecular techniques, including molecular genetic approaches to the study of human disease. (W,S,SS)

103. Cell Biology**(4) MA**

Prerequisites: MCDB 1A; and, MCDB 1B and EEMB 2. Completion of all listed prerequisites with a grade of C or better.

Not open for credit to students who have completed Biology 137. Lecture, 3 hours; discussion, 1 hour.

An introduction to the structure and function of cell organelles: membranes, nucleus, mitochondria, chloroplasts, endoplasmic reticulum, golgi apparatus, lysosomes, microbodies, microtubules, cilia, centrioles, and microfilaments.

103L. Laboratory in Molecular Cell Biology**(4) WEIMBS**

Prerequisites: MCDB 1A; and, MCDB 1B and EEMB 2; and MCDB 103 (may be taken concurrently).

Completion of all listed prerequisites with a grade of C or better.

Not open for credit to students who have completed Biology 137L. Laboratory, 9 hours; discussion, 1 hour.

Laboratory techniques of modern cell biology; molecular dissection of cell structure and function.

108A. General Biochemistry**(4) SEARS, DAHLQUIST**

Prerequisites: MCDB 1A; and, MCDB 1B and EEMB 2; Chemistry 1A-B-C; and Chemistry 109A-B-C. Completion of all listed prerequisites with a grade of C or better.

Not open for credit to students who have completed Biology 108A. Lecture, 3 hours; discussion, 1 hour.

Chemistry of proteins; enzymic catalysis. (F)

108AH. General Biochemistry—Honors**(1) SEARS**

Prerequisites: concurrent enrollment in MCDB 108A or 108AL; consent of instructor. Discussion, 2 hours.

Honors component of MCDB 108A designed to permit an in-depth consideration of selected aspects of the structure/function relationships of proteins and nucleic acids. (F)

108AL. Protein Structure/Function Laboratory**(2) SEARS**

Prerequisite: MCDB 108A (may be taken concurrently).

Recommended preparation: Mathematics 3A-B or 34A-B. Lecture, 1 hour; laboratory, 3 hours.

Computer laboratory analysis of biochemical structures and the dynamics of their interactions with other molecules. (F)

108B. General Biochemistry**(4) LEW**

Prerequisite: MCDB 108A with a grade of C or better. Not open for credit to students who have completed Biology 108B. Lecture, 3 hours; discussion, 1 hour.

Principles of human energy metabolism. Chemistry and physiology of the major metabolic pathways of energy production. Metabolic interrelationships of the major body organs. Applications to human nutrition and disease, exercise, starvation, obesity, and atherosclerosis. (W)

108C. General Biochemistry**(4) HAYES**

Prerequisites: MCDB 108A-B both with a grade of C or better.

Not open for credit to students who have completed Biology 108C. Lecture, 3 hours; discussion, 1 hour.

Amino acid and nucleic acid metabolism, nucleic acid structure, biochemistry of lipids and biological membranes, photosynthesis, special topics. (S)

109L. Laboratory in Biochemistry**(4) POOLE**

Prerequisites: MCDB 108A or Chemistry 142A; and, MCDB 1A-1B. Completion of all listed prerequisites with a grade of C or better.

Not open for credit to students who have completed Biology 109L. Laboratory, 6 hours.

Laboratory techniques in biochemistry. Emphasis on techniques used in modern protein and nucleic acid biochemical research. Includes aspects of the use of computer analysis and recombinant DNA techniques in modern biochemistry. (S)

110. Principles of Biochemistry**(4) ROTHMAN**

Prerequisites: Chemistry 1A-B-C; and, Chemistry 109A-B. Completion of all listed prerequisites with a grade of C or better.

Not for specialized majors in molecular, cellular, and developmental biology, physiology, or students who have completed Biology 108A-B-C or MCDB 108A-B-C. Not open for credit to students who have completed Biology 118. Lecture, 3 hours; discussion, 1 hour.

An introduction to molecular structures and mechanisms of living systems. (W)

111. Introduction to Physiology**(4) SMITH**

Prerequisite: MCDB 1A; and, MCDB 1B and EEMB 2. Completion of all listed prerequisites with a grade of C or better.

Not open for credit to students who have completed Biology 100. Lecture, 3 hours; discussion, 1 hour.

Structural and functional characteristics of membranes in relation to cellular communication. Study of the electrical properties of the hormonal visceral motor pathways of the central nervous system and some neural and hormonal visceral motor pathways. (W)

112. Developmental Biology**(4) FOLTZ**

Prerequisites: MCDB 1A; and, MCDB 1B and EEMB 2; and, EEMB 3 and MCDB 101A. Completion of all listed prerequisites with a grade of C or better.

Not open for credit to students who have completed Zoology 100. Lecture, 3 hours; discussion, 1 hour.

Modern aspects of animal development. Molecular and cellular mechanisms of embryogenesis. (W)

112L. Laboratory in Developmental Biology**(2) FOLTZ**

Prerequisites: MCDB 1A; and, MCDB 1B and EEMB 2; and, EEMB 3 and MCDB 101A; and concurrent enrollment in MCDB 112. Completion of all listed prerequisites with a grade of C or better.

Not open for credit to students who have completed Zoology 100L. Laboratory, 3 hours; discussion, 1 hour.

Modern laboratory techniques in developmental biology. Experimental approaches to development using several animal model systems. (W)

118. Plant Development**(4) FINKELSTEIN**

Prerequisites: MCDB 1A; and, MCDB 1B and EEMB 2; and, MCDB 101A or EEMB 129. Completion of all listed prerequisites with a grade of C or better.

Not open for credit to students who have completed Biology 112 or Botany 111. Lecture, 3 hours; discussion, 1 hour.

Differentiation and morphogenesis of plants: mechanisms of control by genetic and environmental factors, plant growth regulators, and cell-cell interactions. (F)

123. Experimental Strategies in Physical Biochemistry**(4) WAITE**

Prerequisite: MCDB 108A or chemistry 142A with a grade of C or better. Lecture, 3 hours; discussion, 1 hour.

Presentation of selected contemporary concepts and methodologies for determining the structure, size, shape, charge, and interactive behavior of biological macromolecules. (W)

126A. Basic Pharmacology**(4) THROWER**

Prerequisites: MCDB 101A (may be taken concurrently) or Chemistry 142C; and, Chemistry 109A-B-C. Completion of all prerequisites with a grade of C or better.

Not open for credit to students who have completed EEMB 126A. Lecture, 3 hours; discussion, 1 hour.

Designed to provide the student with a comprehensive knowledge of the history and scope of pharmacology as a basic science. Emphasis on the principles of drug action and the relationship of pharmacology to physiology, chemistry, and biochemistry. (F)

126AL. Pharmacology Lab I**(4) THROWER**

Prerequisite: MCDB 126A (may be taken concurrently).

Not open for credit to students who have completed EEMB 126AL. Laboratory, 9 hours; discussion, 1 hour.

Analysis of drug sites and mechanisms of action using isolated tissues, organs, and intact animal preparations. (F)

126B. Basic Pharmacology**(4) VANDENBURG**

Prerequisites: MCDB 101A or Chemistry 142C; and, Chemistry 109A-B-C. Completion of all prerequisites with a grade of C or better.

Not open for credit to students who have completed Biology 119B.

Recommended preparation: MCDB 108A. Lecture, 3 hours; discussion, 1 hour.

Receptor signaling mechanisms; pharmacology of neurotransmitter and hormone receptors; molecular and cellular mechanisms of drug-receptor interactions. (W)

126BL. Pharmacology Laboratory II**(4) VANDENBURG**

Prerequisite: MCDB 126B (may be taken concurrently).

Not open for credit to students who have completed Biology 119BL. Laboratory, 9 hours; discussion, 1 hour.

An introduction to molecular and biochemical techniques in pharmacology; drug-receptor binding; receptor isolation; pharmacokinetics; techniques to evaluate potency, concentration and effects of hormones and their receptors. (W)

126C. Basic Pharmacology**(4) WILSON**

Prerequisites: MCDB 101A or Chemistry 142C; and, Chemistry 109A-B-C. Completion of all listed prerequisites with a grade of C or better.

Not open for credit to students who have completed Biology 119C.

Recommended preparation: MCDB 108A. Lecture, 3 hours; discussion, 1 hour.

Fundamental principles of pharmacology, drug-receptor theory, biochemical mechanisms of action of drugs. (S)

131. General Microbiology**(4) COOPER, COTTER**

Prerequisites: MCDB 101A (may be taken concurrently); and, Chemistry 109A-B-C, or Chemistry 109A-B and MCDB 110. Completion of all listed prerequisites with a grade of C or better.

Not open for credit to students who have completed Biology 104 or 104A. Lecture, 3 hours; discussion, 1 hour.

An introduction to the biological properties of microorganisms; the historical foundations of the field of microbiology; a study of the major groups of microorganisms, their structure, physiology, cultivation, and pathogenicity. (F)

131L. Laboratory in General Microbiology**(2) COOPER**

Prerequisite: MCDB 131 (may be taken concurrently).

Not open for credit to students who have completed Biology 104 or 104L. Laboratory, 6 hours.

Laboratory experiments dealing with the isolation, cultivation, and physiological, biochemical and genetic analysis of diverse microorganisms. (F)

132. Bacterial Pathogenesis**(3) MAHAN**

Prerequisites: MCDB 101A with a grade of C or better. Not open for credit to students who have completed Biology 128.

Recommended preparation: MCDB 131. Lecture, 3 hours.

The mechanisms by which bacterial pathogens cause disease. Investigation of the bacterial gene products that are produced during infection to understand the metabolic, physiological, and genetic factors that contribute to the virulence of bacterial pathogens. (W)

132L. Bacterial Pathogenesis Laboratory**(3) MAHAN**

Prerequisite: concurrent enrollment in MCDB 132.

Not open for credit to students who have completed Biology 128L. Laboratory, 6 hours; discussion, 1 hour.

The latest molecular, biochemical, and genetic techniques available for the identification of microbial gene products that contribute to infection. Study of the regulatory parameters that govern their expression. (W)

133. Molecular and Cellular Immunobiology**(5) SEARS**

Prerequisite: MCDB 101A with a grade of C or better.

Not open for credit to students who have completed Biology 123. Lecture, 4 hours; discussion, 1 hour.

Introduction to the current concepts of immunology. Emphasis on immunoglobulin structure and function, cell-cell cooperation in the immune response, and the role of the major histocompatibility complex and cytokines in regulating immune responsiveness. (W)

133H. Immunobiology—Honors**(1) SEARS**

Prerequisite: concurrent enrollment in MCDB 133.

Discussion, 2 hours.

Honors component of MCDB 133 focusing on selected aspects of the immune system and its components using a web browser to run interactive computer assignments. (W)

133L. Molecular and Cellular Immunobiology Lab**(3) SEARS**

Prerequisite: MCDB 133 with a grade of C or better (may be taken concurrently).

Not open for credit to students who have completed Biology 123L. Laboratory, 6 hours.

Introduction to modern laboratory methods in immunology; properties and characterization of immunoglobulins and immunoglobulin-secreting cells; introduction to hybridoma technology; characterization of effector and regulatory T cells using functional assays. (S)

134. General Animal Virology**(4) SAMUEL**

Prerequisite: MCDB 101A or EEMB 129 with a grade of C or better.

Not open for credit to students who have completed Biology 122. Lecture, 3 hours; discussion, 1 hour.

An introduction to the biology of animal viruses with emphasis on the biochemical and biophysical properties of viruses; the mechanisms by which animal viruses replicate; the cellular effects of and response to viral infection; and selected aspects of medical virology. (S)

135. Cellular Growth Control and Oncogenesis**(4) THROWER**

Prerequisites: MCDB 101A-B both with a grade of C or better.

Not open for credit to students who have completed Biology 138. Lecture, 3 hours; discussion, 1 hour.

Focus on mechanisms of growth control in eukaryotes. Topics include: the properties of mammalian cells in culture and how they relate to malignant cells, growth factors and their receptors, cell cycle control, oncogenes and tumor suppressor genes. (S)

136. Cytokine Action and Viral Pathogenesis**(2) SAMUEL**

Prerequisites: MCDB 101B and 134 (134 may be taken concurrently); completion of both with a grade of C or better; consent of instructor.

Not open for credit to students who have completed MCDB 136H. Lecture, 1 hour; discussion, 1 hour.

Virology course designed to permit an in-depth consideration of selected aspects of the mechanisms of action of cytokines, with emphasis on the antiviral properties of interferons and their roles in host response to viral infection and viral pathogenesis.

138. Medical Immunology**(4) SEARS**

Prerequisite: MCDB 133 with a grade of C or better. *Lecture, 2 hours; laboratory, 2 hours.*

Interplay between the immune system and human disease is mechanistically evaluated by examining protective immunity against parasites and cancer, and immune dysfunction in transplantation, allergic, and autoimmune diseases, and AIDS. Computer exercises evaluate medical, case-based studies of human immune disorders. (S)

139. Medical Microbiology**(4) EARDLEY**

Prerequisites: MCDB 1A; and, MCDB 1B and EEMB 2; and EEMB 3. Completion of all listed prerequisites with a grade of C or better.

Not open for credit to students who have completed Biology 129. Lecture, 3 hours; discussion, 1 hour.

Study of the characteristics of bacteria and viruses, both pathogenic and adventitious, as they are associated with diseases of humans. (F)

140L. Recombinant DNA Methods**(4) SMITH**

Prerequisites: MCDB 101A-B and 110; or, MCDB 101A-B and 108A-B; and, concurrent enrollment in MCDB 108C. Completion of all listed prerequisites with a grade of C or better.

Not open for credit to students who have completed Biology 132. Laboratory, 6 hours; tutorial, 6 hours.

Basic techniques in molecular cloning. Screening of recombinant cDNA libraries, polymerase chain reaction, restriction endonucleases, gel electrophoresis, DNA sequencing, nucleic acid hybridization. (S)

145. Post-translational Protein Processing**(4) WAITE**

Prerequisite: MCDB 108A or Chemistry 142A with a grade of C or better.

Same course as Chemistry 151. Lecture, 3 hours; discussion, 1 hour.

Structure/function relationships in interesting macromolecules isolated from marine organisms. Focus is on well-characterized pathways from horseshoe crabs, abalones, mussels, and fish as well as others. (S)

149. Mariculture for the 21st Century: Research Frontiers**(4) CHAPMAN, COLLINS, MORSE**

Prerequisite: upper-division standing.

Same course as EEMB 149. Not open for credit to students who have completed Biology 149. Lecture, 3 hours; discussion, 1 hour.

Recent progress and new directions in research increasing production of valuable marine animals, plants and microorganisms. Control of reproduction, development, growth and disease in marine species; problems encountered in commercializing production; regional and biological solutions; the role of modern biotechnology. (S)

151. Neurobiology I: Cellular Organization and Biophysics of the Nervous System**(4) FISHER**

Prerequisites: MCDB 1A and 1B. Completion of both prerequisites with a grade of C or better.

Not open for students who have completed Biology 105 or MCDB 114. Lecture, 3 hours; discussion, 1 hour.

Properties of the nervous system ranging from single cells to the whole organism, using examples

from vertebrates and invertebrates studied in terms of morphology, physiology, and behavior. (F)

151H. Neurobiology 1: Cellular Organization and Biophysics of the Nervous System - Honors**(1) FISHER**

Prerequisite: concurrent enrollment in MCDB 151; consent of instructor. *Discussion, 1 hour.*

Honors section designed to permit an in-depth analysis of topics relating to the properties of the nervous system ranging from single cells to the whole organism, using examples from vertebrates and invertebrates studied in terms of morphology, physiology, and behavior. (F)

152. Neurobiology II: Molecular and Cellular Neurobiology**(4) KOSIK, FISHER**

Prerequisites: MCDB 1A-1B and MCDB 151; completion of all prerequisites with a grade of C or better. *Lecture, 3 hours; discussion, 1 hour.*

This second course of a three quarter neurobiology course sequence (151/152/153) covers both top down systems level approaches and bottom up molecular approaches to major topics in neurobiology. These topics include mechanisms of sensory transduction in at least two selected sensory systems, processing of sensory information within the brain, mechanisms of muscle control, cell signaling, neuronal plasticity, neuronal polarity, and the mapping of neural information to the brain. (W)

152H. Neurobiology II: Molecular and Cellular Neurobiology—Honors**(1) KOSIK, FISHER**

Prerequisites: concurrent enrollment in MCDB 152; consent of instructor. *Discussion, 1 hour.*

Honors seminar designed to permit an in-depth consideration and analysis of both top down systems level approaches and bottom up molecular approaches to major topics in neurobiology. These topics include mechanisms of sensory transduction in at least two selected sensory systems, processing of sensory information within the brain, mechanisms of muscle control, cell signaling, neuronal plasticity, neuronal polarity, and the mapping of neural information to the brain. (W)

153. Neurobiology III: Developmental Neurobiology**(4) FEINSTEIN**

Prerequisites: MCDB 1A-1B; and, MCDB 101A or EEMB 129; completion of all listed prerequisites with a grade of C or better.

Not open for credit to students who have completed Biology 106 or MCDB 115. Lecture, 3 hours; discussion, 1 hour.

The course begins with fertilization and moves through sequential stages in the development of the nervous system, including cell migration and differentiation, axon outgrowth and pathfinding, programmed cell death, synaptogenesis, learning, memory, neurodegenerative conditions and current strategies for neuronal regeneration. (S)

153H. Neurobiology III: Developmental Neurobiology - Honors**(1) FEINSTEIN**

Prerequisite: concurrent enrollment in MCDB 153; consent of instructor. *Discussion, 1 hour.*

Honors section designed to permit an in-depth consideration and analysis of selected topics relating to the development, maintenance, degeneration and regeneration of the nervous system. (S)

182. Introduction to Health Care and Biomedical Technology**(3) KOHL**

Prerequisites: upper-division standing.

Same course as Engineering 182. Students must have a minimum 3.0 GPA. Lecture, 2 hours; laboratory, 3 hours.

Course offered in conjunction with Sansum-Santa Barbara and Cottage Hospitals and involves a series of lectures/discussions dealing with various aspects of health delivery and modern biotechnology. Students also spend a period of time working with a physician or medical research scholar.

183. Introduction to Teaching in Biology (1-5) STAFF

Prerequisites: upper-division standing; consent of instructor.

May be repeated for credit to a maximum of 5 units in combination with EEMB 183 but no units may be applied toward the major.

Students will assist instructor in teaching course in which the student previously received a grade of A- or better. Activities will be determined in consultation with the instructor and may include leading discussion, laboratory, or tutorial section(s), attending lectures and grading exams.

184. Internship in Biological Sciences (1-5) STAFF

Prerequisites: upper division standing; consent of instructor and department.

Students must have a 2.5 cumulative grade-point average. May be repeated for credit to a maximum of 15 units, but no units may be applied toward the major (except Aquatic Biology. See restrictions in major narrative). Field, 5-25 hours.

Opportunity to obtain practical biological related research experience by working under faculty direction as an intern with local, state, federal, or private agencies. A written report will be submitted for evaluation.

186. Research Colloquium in Biological Sciences**(1) KOHL**

Prerequisites: MCDB 1A; and, MCDB 1B and EEMB 2; and EEMB 3. Completion of all listed prerequisites with a grade of C or better.

May be repeated for credit in combination with Biology 195 and BMB 171 to a maximum of 3 units.

Lectures by UCSB faculty from various departments focused on their current research in a variety of biological disciplines. (F,W)

187. Pharmacology Colloquia**(1) JACOBS, WILSON, THROWER**

Prerequisites: MCDB 1A; and, MCDB 1B and EEMB 2; and EEMB 3.

Same course as EEMB 187. May be repeated for credit to a maximum of 4 units, but only 2 units may be applied toward the major. Seminar, 1 hour.

Lectures on active research programs in pharmacology in the federal, state, and private research sectors. (S)

188. Literature in Plant Molecular Biology (4) STAFF

Prerequisite: consent of instructor.

Not open for credit to students who have completed Biology 168. Seminar, 1 hour.

Critical reading and presentation of the current literature in plant molecular biology, cell biology and development.

192. Special Topics**(1-4) STAFF**

Prerequisites: upper-division standing in EEMB or MCDB and consent of instructor or department.

May be repeated for credit in combination with Biology 192 and EEMB 192. Maximum units for credit in major: 8 for B.S.; 4 for B.A. Lecture, 1 to 4 hours.

Special topics of current importance in biological sciences. Course content will vary. Information may be obtained in department office.

194AA-ZZ. Group Studies for Advanced Students**(2) STAFF**

Prerequisites: upper-division standing and consent of instructor.

May be repeated for credit in combination with Biology 194AA-ZZ and EEMB 194AA-ZZ to a maximum of 8 units. Individual letter designations may be repeated for credit to a maximum of 4 units. Maximum units for credit in major: 8 for BS; 4 for BA. See also credit limits with other courses in description of major requirements. Seminar, 2 hours.

Oral reports by students.

A-B. Biochemistry-Molecular Biology: Staff
 BC. Biochemistry-Molecular Biology: Cooper
 BG. Bacterial Genetics: Low
 CM. Cellular Microbiology: Cotter
 DM. Molecular Marine Biology and Marine

Biotechnology: Morse
 DS. Molecular and Cellular Immunology: Sears
 DT. Cell Cycle Regulation: Thrower
 DV. Developmental Biology: Smith
 EO. Genetics: Orias
 MD. Underserved Medicine: Doohan
 MP. Microbial Pathogenesis: Mahan
 PJ. Introduction to Hematology: Kohl
 RF. Plant Development Genetics: Finkelstein
 V. Mycology: Ross
 X. Cell Biology: Foltz

197. Directed Studies

(1-5) STAFF

Prerequisites: upper-division standing; a major within MCDB; completion of two prior upper-division courses in MCDB or EEMB; consent of instructor and department.

Students must have a minimum grade-point average of 2.5 in upper-division major courses and are limited to 5 units per quarter and 30 units total in all 197/198/199/199DC/199RA courses combined. Maximum units for credit defined on major sheets. See also credit limits with other courses in description of major requirements. Tutorial, 1-5 hours; laboratory, 5-25 hours.

Hours and credit by arrangement with any faculty member.

198. Directed Readings

(1-5) STAFF

Prerequisites: upper-division standing; a major within MCDB; completion of two prior upper-division courses in MCDB or EEMB; consent of instructor and department.

Students must have a minimum grade-point average of 3.0 in upper-division major courses and are limited to 5 units per quarter and 30 units total in all 197/198/199/199AA-ZZ courses combined. Maximum units for credit in major: 8 for BS; 4 for BA. See also credit limits with other courses in description of major requirements. Tutorial, 1-5 hours.

Individual conferences one hour every two weeks. Special readings designed to broaden the outlook of students and to knit into a cohesive whole the basic principles underlying the major disciplines in the field. (F,W,S)

199. Independent Studies

(1-5) STAFF

Prerequisites: upper-division standing; a major within MCDB; completion of two prior upper-division courses in MCDB or EEMB; consent of instructor and department.

Students must have a minimum grade-point average of 3.0 in upper-division major courses and are limited to 5 units per quarter and 30 units total in all 197/198/199/199AA-ZZ courses combined. Maximum units for credit in major: 8 for BS; 4 for BA. See also credit limits with other courses in description of major requirements. Tutorial, 1-3 hours; field, 1-5 hours.

Hours and credit by arrangement with any faculty member. Laboratory or field. (F,W,S)

GRADUATE COURSES

203. Cell Biology

(4) MA

Prerequisites: MCDB 1A-AL; and, MCDB 1B-BL or EEMB 2-2L, or equivalents.

Not open for credit to students who have completed Biology 237. Lecture, 3 hours; discussion, 1 hour.

Introduction to the structure and function of cell organelles: membranes, nucleus, mitochondria, chloroplasts, endoplasmic reticulum, golgi apparatus, lysosomes, microbodies, microtubules, cilia, centrioles, and microfilaments. (W)

208AL. Biochemistry Computer Laboratory

(2) SEARS

Prerequisite: MCDB 108A (may be taken concurrently).

Recommended preparation: Mathematics 3A-B or 34A-B. Lecture, 1 hour; laboratory, 2 hours.

Computer laboratory analysis of biochemical structures and the dynamics of their interactions with other molecules. Students are required to submit a structural analysis paper on a topic of their choice. (F)

212. Molecular Virology

(5) SAMUEL

Prerequisites: MCDB 108A-B-C and 101A-B or equivalent.

Not open for credit to students who have completed Biology 212. Lecture, 5 hours.

Consideration of selected animal viruses in terms of structure, mechanism of genetic expression, and effects of viral gene expression on cell function, as well as aspects of the virus-host interaction including viral persistence, interference, and interferon.

220A. Chromosomes and Cell Cycle

(2) STAFF

Prerequisite: graduate standing. Lecture, 2 hours.

Structure and organization of the nucleus, chromatin and chromosome structure, organization, and function; DNA replication and replication origins; eukaryotic cell cycle regulation. (W)

220B. The Cytoskeleton

(2) WILSON

Prerequisite: graduate standing. Lecture, 2 hours.

Structure and function of the eukaryotic cytoskeleton. Structure assembly and function of microtubules, microfilaments, and intermediate filaments. (W)

220C. Membrane Dynamics and Cell-Cell Interactions

(2) MA, KOSIK

Prerequisite: undergraduate biochemistry (e.g., MCDB 108A-B-C or Chemistry 142A-B-C) and genetics (e.g., MCDB 101A). Lecture, 2 hours.

Structure and dynamics of biological membranes and membrane proteins, protein translocation and sorting in the endomembrane system of eukaryotic cells, extracellular matrix protein structure/function, cell-matrix and cell-cell interactions, cell adhesion receptors, transmembrane signaling by cell adhesion receptors. (W)

220D. Experimental Cytology and Digital Imaging

(4) FISHER

Prerequisite: consent of instructor. Lecture, 2 hours; laboratory, 6 hours.

Introduction to imaging cellular substructure with the light microscope. Students receive theoretical and hands-on experience in obtaining maximum data from biological specimens using optical and digital enhancement techniques. (S)

221. Preparation and Evaluation of Research Proposals

(2) FOLTZ

Prerequisite: graduate standing. Lecture, 2 hours.

Instruction in preparation, writing, and evaluation of research grant proposals. (S)

222. Sequence Analysis

(2) POOLE

Prerequisite: consent of instructor. Lecture, 1 hour; discussion, 1 hour.

Analysis of DNA and protein sequence data. Topics include protein property prediction, defining sequence similarity, sequence comparison, and sequence database searching. (F)

223. Signal Transduction

(2) MAHAN, VANDENBURG, FINKELSTEIN, FEINSTEIN

Prerequisite: graduate standing. Lecture, 2 hours.

A cell's growth is controlled by positive and negative cues from its surroundings. Discussion of the cell's signaling mechanisms that recognize these cues and initiate an intracellular set of events that generates a response. (S)

225. Development

(2) FOLTZ, ROTHMAN, FINKELSTEIN

Prerequisite: graduate standing. Lecture, 2 hours.

The molecular mechanisms of pattern formation and cellular differentiation that underlie developmental processes in a variety of important model systems. (S)

226A. Basic Pharmacology

(4) THROWER

Prerequisite: consent of instructor.

Not open for credit to students who have completed Biology 219A. Lecture, 3 hours; discussion, 1 hour.

History and scope of pharmacology as a basic science; principles of drug action and relationship of

pharmacology to physiology, chemistry, biochemistry emphasized. (F)

226B. Basic Pharmacology

(4) VANDENBURG

Prerequisite: consent of instructor.

Not open for credit to students who have completed Biology 219B. Lecture, 3 hours; discussion, 1 hour.

Receptor signalling mechanisms; pharmacology of neurotransmitter and hormone receptors; molecular and cellular mechanisms of drug-receptor interactions. (W)

226C. Basic Pharmacology: Principles and Chemotherapy

(4) WILSON

Prerequisite: consent of instructor.

Not open for credit to students who have completed Biology 219C. Lecture, 3 hours; tutorial, 1 hour.

Fundamental principles of pharmacology, drug-receptor theory, biochemical mechanisms of action of drugs. (S)

229. Protein Biochemistry

(2) WAITE

Prerequisite: graduate standing.

Same course as BMSE 229.

Discussion of topics relevant to structure-function relationships in proteins, including chemical reactivity of amino acid side chains, post-translational modifications, and covalent and non-covalent interactions of multimeric structures. Case studies involve recent advances in structure-function relationships of mechanoproteins.

230. Gene Regulation

(2) LOW, SAMUEL

Prerequisite: graduate standing. Lecture, 2 hours.

Mechanisms and regulation of transcription and translation in prokaryotic and eukaryotic organisms and their viruses. (W)

231. General Microbiology

(4) COOPER, COTTER

Prerequisites: MCDB 1A-AL; and, MCDB 1B-BL or EEMB 2-2L; and, Chemistry 107A-B and 108, or 130A-B-C.

Not open for credit to students who have completed Biology 207. Lecture, 3 hours; discussion, 1 hour.

Introduction to the biological properties of microorganisms; historical foundations of the field of microbiology; a study of the major groups of microorganisms, their structure, physiology, cultivation, and pathogenicity. (F)

232. Bacterial Pathogenesis

(3) MAHAN

Prerequisite: MCDB 101A-B.

Not open for credit to students who have completed Biology 228.

Recommended preparation: MCDB 231. Lecture, 3 hours.

The mechanisms by which bacterial pathogens cause disease. Investigation of the bacterial gene products produced during infection to understand the metabolic, physiological, and genetic factors that contribute to the virulence of bacterial pathogens. (W)

232L. Bacterial Pathogenesis Laboratory

(3) MAHAN

Prerequisite: MCDB 232 (may be taken concurrently).

Not open for credit to students who have completed Biology 228L. Laboratory, 6 hours; discussion, 1 hour.

The latest molecular, biochemical, and genetic techniques available for the identification of microbial gene products that contribute to infection. Study of the regulatory parameters that govern their expression. (V)

233. Molecular and Cellular Immunobiology

(3) SEARS

Prerequisites: MCDB 101A-B or 108A-B-C.

Not open for credit to students who have completed Biology 223. Lecture, 3 hours.

Introduction to, and evaluation of, the current concepts of immunology. Emphasis on

immunoglobulin structure and function, cell-cell cooperation in the immune response, and the role of the major histocompatibility complex in regulating immune responsiveness. (W)

235. Experimental Strategies in Molecular Genetics

(1) ROTHMAN

Prerequisites: undergraduate biochemistry (e.g., MCDB 108A-B-C) and genetics (e.g., MCDB 101A-B-C). Lecture, 1 hour.

Discussion of experimental strategies used to purify, analyze, and manipulate nucleic acids, isolate molecular clones from complex genomes, physically map genomes, analyze gene expression, and perform reverse genetics. (F)

239. Cellular Microbiology

(4) COTTER

Prerequisite: graduate standing.

Same course as BMSE 239. Lecture, 3 hours.

Exploration of the mechanisms by which microbes and their eukaryotic hosts interact at the cellular and molecular levels. Focus is on experimental strategies to investigate these interactions and primary literature is discussed. (S)

245. Post-translational Protein Processing

(4) WAITE

Prerequisites: MCDB 108A or 218A or Chemistry 142A or equivalent.

Same course as Chemistry 251. Lecture, 3 hours; discussion, 1 hour.

Structure/function relationships in interesting macromolecules isolated from marine organisms. Focus is on well-characterized pathways from horseshoe crabs, abalones, mussels, and fish as well as others. (S)

246. Stem Cell Biology in Health and Disease

(4) CLEGG

Graduate course. Qualified undergraduate students may petition to enroll with instructor approval. Lecture, 3 hours; discussion, 1 hour.

Basic biology of embryonic and adult stem cells and nuclear transfer, with emphasis on latest findings from the current literature. (S)

247. Social Dimensions of Stem Cell Research

(4) OSBORNE

Same course as History 247. Lecture, 3 hours.

Overview of ethical, social and legal contexts of biological research with special reference to stem cells, embryology and policy. (S)

249. Mariculture: Research Frontiers in Farming the Sea

(4) COLLINS, CHAPMAN

Prerequisite: graduate standing.

Same course as EEMB 249. Not open for credit to students who have completed Biology 249. Lecture, 3 hours; discussion, 1 hour.

Recent progress and new directions in research increasing production of valuable marine animals, plants and microorganisms. Control of reproduction, development, growth and disease in marine species; problems encountered in commercializing production; regional and biological solutions; the role of modern biotechnology. (S)

251. Neurobiology I: Cellular Organization and Biophysics of the Nervous System

(4) FISHER

Prerequisites: MCDB 1A and 1B or equivalent.

Completion of both prerequisites with a grade of C or better.

Not open for credit to students who have completed Biology 208 or MCDB 214. Lecture, 3 hours; discussion, 1 hour.

Nervous system properties ranging from single cells to whole organisms, using examples from vertebrates/invertebrates studied in terms of morphology, physiology, behavior. (F)

252. Neurobiology II: Molecular and Cellular Neurobiology

(4) KOSIK, FISHER

Prerequisite: MCDB 251 with a grade of B or better. Lecture, 3 hours; discussion, 1 hour.

This second course of a three quarter neurobiology

course sequence (251/252/253) will cover both top down systems level approaches and bottom up molecular approaches to major topics in neurobiology. These topics include mechanisms of sensory transduction in at least two selected sensory systems, processing of sensory information within the brain, mechanisms of muscle control, cell signaling, neuronal plasticity, neuronal polarity, and the mapping of neural information to the brain. (W)

253. Neurobiology III: Developmental Neurobiology

(4) FEINSTEIN

Prerequisites: MCDB 1A-1B; and, MCDB 101A or EEMB 129. Lecture, 3 hours; discussion, 1 hour.

This course begins with fertilization and moves through sequential stages in the development of the nervous system, including cell migration and differentiation, axon outgrowth and pathfinding, programmed cell death, synaptogenesis, learning, memory, neurodegenerative conditions and current strategies for neuronal regeneration. (S)

260. Research Seminar in Molecular, Cellular, and Developmental Biology

(1) STAFF

Prerequisite: graduate standing.

Not open for credit to students who have completed Biology 260. Seminar, 1 hour.

Seminars on research in progress presented by faculty of the Department of Chemistry and Department of Molecular, Cellular and Developmental Biology. (F,W,S)

262. Research Progress in Molecular, Cellular and Developmental Biology

(1) STAFF

Seminar, 1 hour.

Research presentations by postdoctoral fellows and advanced Ph.D. students of research progress in the department. (F,W,S)

263. Progress in Molecular and Developmental Biology

(1) STAFF

Seminar, 1 hour.

Research seminars presented by invited speakers on current research topics. (F,W,S)

265. Literature in Virology

(1) SAMUEL

Prerequisites: graduate standing; consent of instructor.

Not open for credit to students who have completed Biology 265. Seminar, 1 hour.

Critical reading and presentation of the recent literature on animal viruses and host cells by graduate students, postdoctoral fellows, and staff. (F,W,S)

266. Literature in Neurobiology

(1) FISHER, CLEGG, VANDENBERG, FEINSTEIN, MA

Prerequisite: consent of instructor.

Not open for credit to students who have completed Biology 266. Seminar, 1 hour.

Critical reading and presentation of the literature in modern neurobiology. (F,W,S)

268. Literature in Plant Molecular Biology

(1) FINKELSTEIN, CHRISTOFFERSEN, COOPER

Prerequisite: graduate standing.

Not open for credit to students who have completed Biology 268. Seminar, 1 hour.

Critical reading and presentation of the current literature in higher plant molecular biology, cell biology, and development. (F,W,S)

269. Literature in Pharmacology

(1) WILSON

Prerequisite: graduate standing in biological sciences.

Same course as EEMB 269. Not open for credit to students who have completed Biology 269. Seminar, 1 hour.

Critical reading and presentation of current literature in topics on pharmacology. (F,W,S)

276B. Biomolecular Materials II: Applications

(3) SAFINYA

Prerequisite: Physics 135 or MCDB 108A or Materials 276A. Lecture, 3 hours.

Interactions and self assembly in biomolecular materials. Chemical and drug delivery systems. Tissue engineering. Protein synthesis using recombinant nucleic acid methods: advanced materials

development. Nonviral gene therapy.

290AA-ZZ. Group Studies

(2) STAFF

Prerequisite: consent of instructor.

Presentation and discussion of current research, to be selected from the following list.

A. Research in Molecular Marine Biology: Morse

B. Research in Biomineralization: Morse

BE. Biochemistry and Molecular Biology for Engineers: Feinstein

BG. Bacterial Genetics: Low

CE. C. Elegans Development: Rothman

CM. Cellular Microbiology: Cotter

DN. Developmental Neurobiology: Clegg

LW. Microtubule Dynamics and Functions: Wilson

MM. Bacterial Pathogenesis: Mahan

MS. Biomass Spectrometry: Waite

NB. Neurobiology: Kosik

PM. Molecular Plant-Microbe Interactions: Cooper

RF. Plant Developmental Genetics: Finkelstein

S. Molecular Virology and Interferon Action: Samuel

SK. Research in Retinal Cell Biology: Fisher

V. Current Research on Cell and Developmental Biology of Fungi

VA. Molecular Neurobiology-Ion Channels: Vandenberg

293. Computational Methods in Biochemistry-Molecular Biology

(1) CHRISTOFFERSEN

Prerequisite: graduate standing. Lecture, 1 hour.

Survey of computational methods in molecular biology. Topics include analysis and presentation of data, database searching, quantitative image analysis, and protein homology modeling. Emphasis on utilizing accessible software tools that are designed for nonprogrammers. (W)

500. Teaching Assistant Orientation

(1) STAFF

Required of all teaching assistants.

No unit credit allowed toward advanced degree.

May be repeated for credit in combination with Biology 500. Workshop, 1 hour.

General orientation regarding the University of California and the Santa Barbara campus; various pertinent regulations, officials and their functions, staff and functions; services available to teaching assistants and to students. Prospective teaching assistants are encouraged to take this course during the fall quarter prior to their employment. (F)

501. Practicum in Instruction

(1-4) STAFF

Prerequisite: concurrent teaching assistant employment.

No unit credit allowed toward advanced degree.

May be repeated for credit in combination with Biology 501. Workshop, 3-12 hours.

Practical experience in teaching within specified areas of biology. Students will have responsibility for one or more laboratory and/or discussion sections. Staff will periodically observe teaching assistants in actual teaching situations. Evaluation forms will be completed by members of the class sections. (F,W,S)

502. Techniques of Teaching and Laboratory Class Supervision

(1-2) EARDLEY, EVEN

Prerequisite: concurrent teaching assistant

employment. Required of all teaching assistants.

No unit credit allowed toward advanced degree.

May be repeated for credit in combination with Biology 502. Discussion, 1 hour.

Weekly discussion and readings on techniques of teaching including lecturing, leading discussions, writing and grading exams, student-teacher interactions, classroom dynamics, and teaching philosophy. (F,W)

503. Research Practicum in Biology

(1-2) STAFF

May be repeated for credit in combination with Biology 503. Tutorial, 1-2 hours.

Basic procedures and methods of research in a specified area as determined by consultation between the supervising faculty member and the research assistant. Includes weekly meetings and consultations, and formal evaluations. (F,W,S)

595AA-ZZ. Group Studies**(2) STAFF**

Prerequisite: consent of instructor.

May be repeated for credit to a maximum of 36 units. Individual letter designations may be repeated for credit to a maximum of 36 units. Seminar, 2 hours.

A critical review of research in selected fields of biology. Subject matter for these seminars will be selected from the following list:

- A-B. Biochemistry-Molecular Biology: Staff
- BC. Biochemistry/Molecular Biology: Cooper
- BE. Biochemistry and Molecular Cell Biology for Engineers: Staff
- BG. Bacterial Genetics: Low
- CM. Cellular Microbiology: Cotter
- DM. Molecular Marine Biology and Marine Biotechnology: Morse
- DS. Molecular and Cellular Immunology: Sears
- DV. Developmental Biology: Smith
- EO. Genetics: Orias
- F. General Physiology: Staff
- G. Virology: Samuel
- MM. Contemporary Topics in Biochemistry and Molecular Biology: Sears
- MP. Microbial Pathogenesis: Mahan
- MS. Group Studies: Staff
- NN. Literature in Eukaryotic Molecular Genetics: Orias
- RF. Group Studies: Staff
- V. Mycology: Ross
- X. Cell Biology: Foltz

596. Directed Reading and Research**(2-12) STAFF**

Prerequisite: consent of instructor.

Hours and credit by arrangement with faculty.

597. Individual Study for Master's Comprehensive Examinations and Ph.D. Examinations**(1-12) STAFF**

Prerequisite: consent of instructor.

May be repeated for credit in combination with Biology 597. No unit credit allowed toward advanced degree. Students are limited to 24 units per examination, and 12 units per quarter.

Individual study for M.A. comprehensive examinations and Ph.D. examinations.

598. Master's Thesis Research and Preparation**(1-12) STAFF**

Prerequisites: M.A. (thesis) candidate and consent of committee chair.

May be repeated for credit in combination with Biology 598 to a maximum of 12 units. No unit credit allowed toward advanced degree.

For research underlying the thesis and writing of the thesis.

599. Ph.D. Dissertation Preparation**(1-12) STAFF**

Prerequisites: Ph.D. candidate and consent of instructor.

May be repeated for credit in combination with Biology 599 to a maximum of 12 units.

For writing of the dissertation.

Clarence Barlow, B.Sc., Calcutta University, Professor (composition, Corwin Chair of Composition)

Victor R. Bell, Lecturer (gospel choir)

Paul Berkowitz, Diploma, Curtis Institute of Music, Philadelphia, Professor (piano, chamber music)

William Booth, M.M., Catholic University, Lecturer (trombone, tuba, euphonium)

Helen Callus, Graduate Performance Diploma, The Peabody Institute, Maryland, Associate Professor (viola)

Timothy J. Cooley, Ph.D., Brown University, Associate Professor (ethnomusicology, Eastern European folk music, American vernacular)

Joel S. Feigin, D.M.A., Juilliard School of Music, Professor (composition)

Jill Felber, M.M., Bowling Green University, Professor (flute)

Neil Garber, M.M., Juilliard School of Music, Lecturer (bass)

Michel Marc Gervais, B.M., University of Alberta, Professor (choral conducting, choir)

Steven Gross, D.M.A., University of Cincinnati, Professor (French horn)

John Hajda, Ph.D., UC Los Angeles, Assistant Professor (systematic musicology)

Jeremy Haladyna, Ph.D., UC Santa Barbara, Lecturer (orchestration, ensemble for contemporary music)

Patricia Hall, Ph.D., Yale University, Associate Professor (theory, 20th-century music)

Dolores M. Hsu, Ph.D., University of Southern California, Professor (19th-century music, music criticism, ethnomusicology)

Grant M. Hungerford, M.M., Manhattan School of Music, Lecturer (trumpet)

Michael Ingham, M.A., Denver University, Professor (voice)

Derek Katz, Ph.D., UC Santa Barbara, Assistant Professor, (Czech music, opera, nationalism and modernism)

Michael Pievac, Lecturer (gamelan ensemble)

JoAnn Kuchera-Morin, Ph.D., University of Rochester, Eastman School of Music, Professor (electronic and computer-generated music)

Scott Marcus, Ph.D., UC Los Angeles, Associate Professor (ethnomusicology)

Jonathan S. Nathan, D.M.A., UC Santa Barbara, Lecturer (percussion, jazz ensemble)

David Paul, Ph.D., UC Berkeley, Assistant Professor, (theory/musicology)

William Prizer, Ph.D., University of North Carolina, Professor (medieval, renaissance and early baroque music)

Lee Rothfarb, Ph.D., Yale University, Associate Professor (theory)

Geoffrey B. Rutkowski, M.M., University of Southern California, Professor (cello, chamber music)

Stefanie Tcharos, Ph.D., Princeton University, Assistant Professor (baroque music, opera, reception)

Pieter van den Toorn, Ph.D., UC Berkeley, Professor (theory, 20th-century music)

Yuval Yaron, Artist Diploma, Indiana University, Bloomington, Professor (violin)

Emeriti Faculty

Emma Lou Diemer, Ph.D., Eastman School of Music, Professor Emerita (composition)

William Kraft, M.A., Columbia University, Professor Emeritus (composition)

Elizabeth Mannion, B.A., University of Washington, Professor Emerita (voice)

Elizabeth Mosher, M.M., University of Southern California, Professor Emerita (voice)

Betty Oberacker, D.M.A., Ohio State University, Professor Emerita (piano, chamber music)

Alejandro Planchart, Ph.D., Harvard University, Professor Emeritus (medieval and renaissance music, Collegium Musicum)

Carl Zytowski, M.A., University of Washington, Professor Emeritus (choir)

Affiliated Faculty

Dwight F. Reynolds, Ph.D. (Religious Studies)

Curtis Roads, Ph.D. (Media Arts and Technology)

The Department of Music curriculum includes undergraduate courses which lead to completion of either of two degrees: (1) the bachelor of arts in music, or (2) the bachelor of music, a professional degree in performance or composition. The undergraduate major programs are designed to serve as background for professional careers in music, as preparation for graduate studies, or as an area of concentration for a liberal arts education.

The graduate program includes courses leading to the master of arts degree and the doctor of philosophy degree in composition, ethnomusicology, musicology, and theory. The master of music degree and the doctor of musical arts degree in musical performance are designed to provide graduate and professional training in the intellectual, practical, and professional skills increasingly demanded of performers in this century.

Undergraduate Program

Performance ensembles are available for all qualified students, and a wide range of undergraduate courses is offered for nonmajors. Information regarding various cash prizes and awards that are offered each year to outstanding students enrolled in composition, ethnomusicology, musicology, performance or theory is available at the Department of Music office.

All new music majors are required to take placement tests in musicianship and music theory, and placement auditions in classical piano (except for students who have had no background whatsoever in piano; they should enroll in Music 31A). These are given only during pre-instructional days at the beginning of each quarter, and should be taken prior to enrollment in music classes. All students wishing to take performance classes must pass an audition for the appropriate class. Auditions for performance classes should be taken preferably at the entrance auditions before admission (particularly if a bachelor of music performance concentration is being considered—see below), or during pre-instructional days at the beginning of each quarter. An initial consultation with the departmental undergraduate staff advi-

Web site: www.music.ucsb.edu

Faculty

Charles Asche, D.M.A., University of Texas at Austin, Senior Lecturer (piano, chamber music)

Paul Bambach, M.M., University of Cincinnati, Senior Lecturer (clarinet, wind ensemble)

sor is mandatory before embarking on any of the following courses of study. The department also requires that music majors meet at least once each year with their major faculty advisor to help in the planning of course selection and to assure that adequate progress is being made toward the degree.

The departmental recital attendance requirement must be met each quarter a student is enrolled, up to normative time (twelve quarters).

All auditions (including recital auditions), composition portfolios and papers required for both music major degrees and all emphases must be reviewed by the faculty area committee appropriate to the B.M. emphasis or B.A. project and approved by at least two members of the committee, as signed on forms provided by the music undergraduate advisor.

A grade of at least a C- is required from placement point onwards in all courses in the Music 4A-F, 5A-F, and 31A-F sequences in order to proceed to the next course in each sequence and to complete each sequence. (Course F must also be completed with a grade of C- or better). All upper-division music courses that require any course in the Music 4A-F sequence and/or any course in the Music 5A-F sequence as prerequisites requires that these prerequisites be passed with a grade of C- or better, or that the student have been placed into a higher course in the sequence or out of the sequence entirely, in the placement tests conducted by the Department of Music. Music 12 is a prerequisite for the upper-division Music 112 series. A grade of at least C- is required in Music 12 in order to enroll in the Music 112 series. All students must achieve a grade-point average of at least 2.0 in all courses for the overall major program, both lower- and upper-division and in all courses required for the upper-division major program. Students must also achieve an overall grade-point average of at least 2.0 in order to qualify for graduation. Students transferring from other institutions must complete at least three quarters within the department.

Majors and non-majors admitted to individual performance classes Music 25-33 and 125-133 (all of which are by audition and require the consent of department and instructor) may be required to participate in orchestra, wind ensemble, choir, or another ensemble, as appropriate, in quarters in which they are enrolled in such performance classes.

Honors Program in Music (*Distinction in the Major*)

The senior honors program in the Department of Music encourages seniors to excel in music and to undertake projects beyond the normal requirements, and provides a means of recognizing outstanding achievement. Only music majors (B.A. or B.M.) with a cumulative grade-point average of at least 3.5 at the end of the junior year or at the time of applying for selection during senior year and who are recommended by a faculty member may be selected for the departmental honors program in Music. Students selected must enroll for unit credit in Music 196 (Honors Project) and in either Music 192 (B.A. Senior Project), Music 197 (B.M. Senior Recital), or Music 197B (B.M. Senior Composition Portfolio and Recital), as applicable.

"Distinction in the Major" will be awarded if a final cumulative grade-point average of at least 3.5 is maintained and both a grade of at least A- in Music 196 and a grade of at least A- in Music 192, 197, or 197B are achieved as assessed by both the instructor(s) of the two courses and by one other faculty member.

Bachelor of Arts—Music

Students pursuing the bachelor of arts in music must meet the General Education requirements for the bachelor of arts degree set by the College of Letters and Science. The following courses may be taken for 1-2 units in the major per quarter by B.A. music students: Music 25, 26A-E, 27A-D, 28A-E, 29, 33, 108, 125, 126A-E, 127A-D, 128A-E, 129, and 133. The upper-division courses in this list may only be taken after passing the appropriate sophomore audition or composition portfolio. Any such courses improperly enrolled in may not be applied to the upper-division major. A grade of at least a C- is required from placement-point onwards in all courses in the Music 4A-F, 5A-F and 31A-F sequences in order to proceed to the next course in each sequence and to complete each sequence. (Course F must also be completed with a grade of C- or better). All upper-division music courses that require any course in the Music 4A-F sequence and/or any course in the Music 5A-F sequence as prerequisites requires that these prerequisites be passed with a grade of C- or better or that the student have been placed into a higher course in the sequence or out of the sequence entirely in the placement tests conducted by the Department of Music. Music 12 is a prerequisite for the upper-division Music 112 series. A grade of at least C- is required in Music 12 in order to enroll in the Music 112 series.

Preparation for the major: Music 4A-B-C-D-E-F (placement determined by exam); 5A-B-C-D-E-F (placement determined by exam); piano proficiency required either by successful completion of a piano proficiency audition or by completing Music 31A-B-C-D-E-F (placement determined by audition); completion of sixth quarter or its equivalent in (level 6 proficiency) French, German or Italian, or completion of third quarter or its equivalent (level 3 proficiency) in two of the following languages: French, German, Italian (the attainment of level 6 proficiency in one language is strongly recommended, particularly for students intending to pursue graduate studies in musicology or music theory); 12; six courses (at 1-2 units per quarter) from 20-33 (6-12 units); six courses from Music A34-A70AA-ZZ.

Upper-division major. Forty-six upper-division units required: Music 102; 112AB-C-D-E-F; 160A-B-C; one course from 175A-M or 176; one course from 160D-187; three courses from A134-A170AA-ZZ; Upper-division music electives 5-9 units; successful completion of the senior project (audition, composition, or paper). All students enrolled in applied instruction in an orchestral instrument are required to elect orchestra (A42/A142) if their participation is needed. All students enrolled in applied vocal instruction are required to elect a choir (A36A-B-C/A136A-B-C, or A37A-B-C/A137A-B-C) if their participation is needed.

Ethnomusicology Emphasis

Preparation for the major: Music 4A-B-C-D-E-F (placement determined by exam); 5A-B-C-D-E-F (placement determined by exam); piano proficiency, demonstrated either by successful completion of a piano proficiency audition or by completing Music 31A-B-C-D-E-F (placement determined by audition); completion of sixth quarter or its equivalent (level 6 proficiency) in French, German or Italian, or another language by petition or completion of third quarter or its equivalent (level 3 proficiency) in two of French, German, Italian, or other languages by petition (the attainment of level 6 proficiency in one language is strongly recommended particularly for students intending to pursue graduate studies in ethnomusicology); 12; 17; six courses (at 1-2 units per quarter) from Music 20-33 (6-12 units); six courses from A34-A70AA-ZZ.

Upper-division major. Forty-seven upper-division units required: three courses from Music 112AB-C-D-E-F; two courses from 160A-E, 169; two courses from 175A-M; 176; one course from 104, 105; two courses from 168A-H, 168X; three courses from A134-A170AA-ZZ; Electives: courses to bring the total upper-division units for the major to 47; successful completion of the senior project. All students enrolled in applied instruction in an orchestral instrument are required to elect orchestra (A42/A142) if their participation is needed. All students enrolled in applied vocal instruction are required to elect a choir (A36A-B-C/A136A-B-C, A37A-B-C/A137A-B-C), or A70/A170AA-ZZ) if their participation is needed.

Bachelor of Music

The bachelor of music degree is open by audition to specially qualified students in performance and composition. Students seeking admission to a bachelor of music performance emphasis are required to pass an entrance audition in their desired emphasis (instrument or voice) in order to determine their eligibility. Entrance scholarships may be awarded to selected students demonstrating outstanding talent and proficiency at the entrance auditions. Information and dates of the entrance auditions may be obtained from the music undergraduate advisor in the Department of Music office. Students must meet the General Education Program requirements for the bachelor of music degree set by the College of Letters and Science. Completion of one (or more) of the following emphases will be noted on the student's official transcript, but will not appear on the diploma. For all emphases except guitar and voice, knowledge of German, French or Italian to level three is highly recommended by the end of the sophomore year. Knowledge of Spanish to level three is highly recommended for the guitar emphasis. Knowledge of Italian to level three is required for the voice emphasis, along with knowledge of French or German to level three. Junior and senior recitals may not be given until the appropriate recital audition (or composition portfolio) has been reviewed by the faculty area committee appropriate to the emphasis and approved by at least two members of the committee, as signed on forms provided by the music undergraduate advisor. Except where

specified in the description of requirements for individual B.M. emphases, the following courses may be taken for 1-2 units per quarter: Music 25, 26A-E, 27A-D, 28A-E, 29, 33, 108, 125, 126A-E, 127A-D, 128A-E, 129, and 133.

The upper-division courses in this list, whether applied to the B.M. emphasis or otherwise, may only be taken after passing the appropriate sophomore audition or composition portfolio. Any such courses improperly enrolled in may not be applied to the upper-division major. A grade of at least a C- is required from placement point onwards in all courses in the Music 4A-F, 5A-F and 31A-F sequences in order to proceed to the next course in each sequence and to complete each sequence. (Course F must also be completed with a grade of C- or better). All upper-division music courses that require any course in the Music 4A-F sequence and/or any course in the Music 5A-F sequence as prerequisites requires that these prerequisites be passed with a grade of C- or better or that the student have been placed into a higher course in the sequence or out of the sequence entirely in the placement tests conducted by the Department of Music. Music 12 is a prerequisite for the upper-division Music 112 series. A grade of at least C- is required in Music 12 in order to enroll in the Music 112 series.

Accompanying Emphasis

Preparation for the major. Music 4A-B-C-D-E-F (placement determined by exam); 5A-B-C-D-E-F (placement determined by exam); 12; six quarters (at 3 units per quarter) of 33 (18 units); three courses of A41; 35A-B-C; 17; successful completion of the freshman and sophomore auditions.

Upper-division major.

Seventy-six to 77 upper-division units required: Music 112AB-C-D-E-F; 160A-B; six quarters (at 4 units per quarter) of 133 (24 units); 135A-B-C-D-E-F; one course from 160C, 187; 120A or 120B; one course from Music 178A-184; three quarters of A144; two quarters of 150; successful completion of junior and senior recitals.

Bassoon, Cello, Clarinet, Double Bass, Flute, French Horn, Oboe, Percussion, Trombone, Trumpet, Tuba, Viola, and Violin Emphases

Preparation for the major. Music 4A-B-C-D-E-F (placement determined by exam); 5A-B-C-D-E-F (placement determined by exam); piano proficiency, demonstrated either by successful completion of a piano proficiency audition or by completing Music 31A-B-C-D-E-F (placement determined by audition); 12; six quarters (at 3 units per quarter) of one of the following courses, as appropriate to the emphasis: Bassoon Emphasis: 27A; Cello Emphasis: 26B; Clarinet Emphasis: 27B; Double Bass Emphasis: 26A; Flute Emphasis: 27C; French Horn Emphasis: 28A; Oboe Emphasis: 27D; Percussion Emphasis: 29; Trombone Emphasis: 28B; Trumpet Emphasis: 28C; Tuba Emphasis: 28D; Viola Emphasis: 26D; Violin Emphasis: 26E (18 units); Bassoon, Cello, Clarinet, Double Bass, Flute, Oboe, Percussion, Viola, or Violin Emphasis: three courses from A40, A43, A44, A45, A46 and/or A49; French Horn Emphasis: three courses from A40, A43, A44, A45, A45BR,

A45H, A46 and/or A49; Trombone, Trumpet, and Tuba Emphasis: three courses from A40, A43, A44, A45, A45BR, A46 and/or A49; six courses from A34 or A42 (cello, viola, and violin emphases: A42 only); 17; successful completion of the freshman and sophomore auditions. Highly recommended: Knowledge of German, French, or Italian to level 3 by the end of the sophomore year.

Upper-division major. Seventy-one to 78 upper-division units required: Music 112AB-C-D-E-F; 160A-B; 120A; six quarters (at 4 units per quarter) of one of the following courses, as appropriate to the emphasis: Bassoon Emphasis: 127A; Cello Emphasis: 126B; Clarinet Emphasis: 127B; Double Bass Emphasis: 126A; Flute Emphasis: 127C; French Horn Emphasis: 128A; Oboe Emphasis: 127D; Percussion Emphasis: 129; Trombone Emphasis: 128B; Trumpet Emphasis: 128C; Tuba Emphasis: 128D; Viola Emphasis: 126D; Violin Emphasis: 126E (24 units); one course from 160C-187; Bassoon, Cello, Clarinet, Double Bass, Flute, Oboe, Percussion, Viola, or Violin Emphases: six courses from A140, A143, A144, A145, A146 and/or A149; French Horn Emphasis: six courses from A140, A143, A144, A145, A145BR, A145H, A146 and/or A149; Trombone, Trumpet, and Tuba Emphases: six courses from A140, A143, A144, A145, A145BR, A146 and/or A149; six courses from A134 or A142 (cello, viola, and violin emphases: A142 only); 6 units (cello, viola and violin); 9 units (all others) of upper-division electives; successful completion of the junior and senior recitals. All students enrolled in applied instruction in an orchestral instrument are required to elect orchestra (A42/A142) if their participation is needed. Highly recommended: Knowledge of German, French, or Italian to level 3 by the end of the sophomore year.

Composition Emphasis

Preparation for the major: Music 4A-B-C-D-E-F (placement determined by exam); 5A-B-C-D-E-F; piano proficiency, demonstrated either by successful completion of a piano proficiency audition or by completing Music 31A-B-C-D-E-F (placement determined by audition); three quarters of 8; 12, three quarters of 88; 17; six courses (6-12 units) from 25, 26A-E, 27A-D, 28A-E, 29, 32A-F, 33 (or 22 by petition and audition); six courses from A34-A70; successful completion of freshman and sophomore composition portfolios.

Upper-division major. Seventy-one to 76 upper-division units required: Music 112AB-C-D-E-F; 120A or B; six quarters (at 3 units per quarter) of 108 (18 units); 101A-B-C; 102; 103; 106A-B-C; 160A-B; one course from 160C-187; 109IA-B or 109LA-B-C or 109IA and 109LA; three courses from A134-A170; one unit of upper division electives; successful completion of the junior composition portfolio and the senior composition portfolio and recital. All students enrolled in applied instruction in an orchestral instrument are required to elect orchestra (A42/A142) if their participation is needed. All students enrolled in applied vocal instruction are required to elect a choir (A36/A136, A37/A137, or A132) if their participation is needed.

Guitar Emphasis

Preparation for the major: Music 4A-B-C-D-E-F (placement determined by exam); 5A-B-C-D-E-F (placement determined by exam); piano proficiency, demonstrated either by successful completion of a piano proficiency audition or by completing Music 31A-B-C-D-E-F (placement determined by audition); 12; six quarters (at 3 units per quarter) of 26C (18 units); three quarters of A44; three courses from A34-A70AA-ZZ; 17; successful completion of the freshman and sophomore auditions.

Upper-division major. Seventy-one to 72 upper-division units required: Music 112AB-C-D-E-F; 160A-B; six quarters (at 4 units per quarter) of 126C (24 units); one course from 160C-187; six quarters of A144; three courses from A134-A170AA-ZZ; one course of 120A or B; six units of upper-division electives; successful completion of the junior and senior recitals.

Piano Emphasis

Preparation for the major. Music 4A-B-C-D-E-F (placement determined by exam); 5A-B-C-D-E-F (placement determined by exam); 12; six quarters (at 3 units per quarter) of 33 (18 units); three courses of A41; 35A-B-C; 17; successful completion of the freshman and sophomore auditions. Highly recommended: Knowledge of German, French, or Italian to level 3 by the end of the sophomore year.

Upper-division major. Seventy-two to 73 upper-division units required: Music 112AB-C-D-E-F; 160A-B; six quarters (at 4 units per quarter) of 133 (24 units); one course from 160C-187; 120A or B; one course from Music 178A-184; three courses from 135A-B-C and/or A144; three quarters of A144 (not applied above); upper-division music electives (6 units); successful completion of junior and senior recitals. Highly recommended: Knowledge of German, French, or Italian to level 3 by the end of the sophomore year.

Voice Emphasis

Preparation for the major. Music 4A-B-C-D-E-F (placement determined by exam); 5A-B-C-D-E-F (placement determined by exam); piano proficiency, demonstrated either by successful completion of a piano proficiency audition or by completing Music 31A-B-C-D-E-F (placement determined by audition); Italian 1-2-3; German 1-2-3 or French 1-2-3; 12; six quarters (at 3 units per quarter) of 25 (18 units); six courses from A36A-B-C, or A37A-B-C; three quarters at A38 or A38P; 17; successful completion of the freshman and sophomore auditions.

Upper-division major. Seventy-three to 74 upper-division units required: Music 112AB-C-D-E-F; 160A-B; 120B; six quarters (at 4 units per quarter) of 125 (24 units); one course from 160C-187; three quarters from A132, A136A-B-C, A137A-B-C; three courses from A132, A136A-B-C, A137A-B-C, A138, A138P; three quarters of 150; three quarters of 151; 158A-B-C-D; 4 units of upper-division electives; successful completion of junior and senior recitals. All students enrolled in applied vocal instruction are required to elect a choir (A36A-B-C/A136A-B-C, A37A-B-C/A137A-B-C or A132) if their participation is needed.

Minor—Music

Students majoring in other disciplines are able to pursue an interest in music at a less intensive level than the major by completing a minor in music. The wide diversity of courses offered by the Department of Music is well suited to cater to varied interests such as vocal or instrumental music study, composition, music history, music theory, and ethnomusicology.

All upper-division courses to be applied to the minor must be completed on a letter-grade basis. This includes both courses offered in the Department of Music at UCSB and those offered by other departments and applied to the minor.

Preparation for the minor. Four to 8 units: Music 11 (which may be considered satisfied by placement examination only); and either 12, 15 or 17 (3-4 units). Variable units: All prerequisites for specific upper-division music courses, as specified in the *General Catalog*, or as considered satisfied by consent of instructor. Recommended for students interested in Western music: Music 4A-B-C/5A-B-C.

Please note:

- Upper-division music history courses require either Music 12, 15 or 5C (and/or 112), or consent of instructor.
- Upper-division ethnomusicology courses: no prerequisite (Music 17 recommended).
- Upper-division music theory courses require Music 5E or 5F or consent of instructor.
- Upper-division composition courses require Music 5E or 5F or consent of instructor.
- All upper-division performance courses except Music 122 require the passing of the B.A. sophomore audition (each performance area has appropriate guidelines for this audition).
- Upper-division ensembles (music performance laboratories) require only consent of instructor.

Upper-division minor. Eighteen upper-division units in music. No more than 8 units of courses designated as “not open to music majors” or “for the non-major”. No more than 6 units of performance courses 120-133 may be applied to the minor. No more than 6 units of ensemble courses A134-A170AA-ZZ may be applied to the minor.

The following courses may be taken for 1-2 units of credit per quarter and applied to the minor: Music 108, 125, 126A-E, 127A-D, 128A-E, 129, and 133. *Note: One may enroll in these upper-division courses only after passing the appropriate audition or composition evaluation.*

**No more than four upper-division units previously completed on the P/NP basis may be applied to the minor.*

Note: Substitutions are subject to approval by the chair of the department. Please see page 118 for special conditions governing minors in the College of Letters and Science.

Graduate Program

Admission to the Department of Music at UCSB is determined by the examination of a number of factors, but is based on intellectual potential and promise, academic records, and programmatic fit. Above all, selection to the graduate program is an academic decision in-

volving factors beyond scores and grades and is made exclusively by the faculty of the graduate program and the department.

In addition to departmental requirements, candidates for graduate degrees must fulfill the university degree requirements found in the chapter “Graduate Education at UCSB.” Graduate students in music are required to take at least 12 units per quarter. A minimum residency of six quarters, including composition, dissertation, or thesis, is mandatory. Units of Music 501, 502, 597, 598, and 599 do not count toward fulfillment of university requirements for the M.A., M.M., Ph.D., or D.M.A. degrees.

In addition to the requisite coursework, all sections of the placement guidance exams, taken upon entrance, must be passed or satisfied by taking approved coursework before advancement to candidacy. Demonstrated reading knowledge of the designated foreign language(s) is required by examination(s). The department requires that all graduate students meet each quarter, prior to final registration, with the designated faculty advisor in their area, and at the beginning of their last year of coursework with the department’s graduate advisor.

The application deadline for financial support is December 15 for fall quarter admission. May 1 is the deadline for fall quarter admission for students not seeking financial support. Consult the department or graduate application for details.

Master of Arts—Music

Admission

Applicants will normally be expected to have a bachelor of arts in music or a bachelor of music degree. In addition to departmental requirements for admission, applicants must fulfill university requirements for admission to graduate status described in the chapter “Graduate Education at UCSB.”

Degree Requirements— Composition Emphasis

Students must pass placement guidance examinations in the subject areas denoted by capital letters or successfully complete equivalent coursework before advancement to candidacy. All entering composition students are required to demonstrate proficiency in 18th-century counterpoint (fugue). This will be tested through an examination given when other guidance exams are administered (just prior to the start of fall quarter). Those who do not pass will satisfy those core proficiency by passing 212A, or by reexamination. Those who elect to pursue further fugal studies may do so by continuing the 212 series, offered in alternate years. Course numbers are shown in parentheses. THEORY: Fundamentals of Counterpoint (102); 18th-Century Fugue (212A); Figured Bass (5A-F); Tonal Analysis (160A); 20th-Century Analysis (160B); Orchestration (106, 107). HISTORY: Medieval/Renaissance (112AB); Baroque (112C); Classical (112D); Romantic (112E); 20th Century (112F). MUSICIANSHIP: (204A-B-C). Students must demonstrate reading knowledge of French, German, or Italian by the end of their first year of residency. (See the departmental Graduate Student Handbook for details on language exams)

Seventy-two graduate units are required: All students must take Music 200A, 207A, six quarters of 208, 211A-B-C; either (a) two courses from 209IA-IB-IC or (b) one course from 209IA-IB-IC and two courses from 209LA-LB-LC; 20 units of electives selected with the guidance of a faculty advisor.

Students must also submit an original composition of substantial length. Additionally, they must present a concert of their own compositions.

Degree Requirements— Ethnomusicology Emphasis

Students must pass sections one through four of the ethnomusicology placement guidance examinations or successfully complete, by the end of their first year of residency, equivalent coursework specified by the ethnomusicology committee. Students must demonstrate reading knowledge of either one European or one field language by the end of their first year of residency. (See the departmental Graduate Student Handbook for details on language exams). Sixty-eight graduate units are required: Music 200A, 200C, 225, 276A and B; one course from 224, 262A-X; two courses from 224, 293A-M; one course from 260D-F or 226; 6 units of 288; three courses from A232-A270; Anthropology 235A or 235B; 16 elective units of any pre-approved graduate courses offered in the UC system (may include up to 6 additional ensemble units); thesis. Progress from the M.A. to the Ph.D. is not automatic, but contingent on the formal approval of the ethnomusicology faculty.

Degree Requirements— Musicology Emphasis

M.A. students will follow one of two plans: Plan 1 (thesis) or Plan 2 (comprehensive examinations). The former requires two years of coursework and the thesis. The latter requires three years of coursework (see below for required courses) and a written comprehensive examination. Upon satisfactory completion of this examination, the student will be awarded an M. A. degree and proceed to the oral qualifying examination for the Ph.D. Students continuing for the Ph.D. will normally follow Plan 2. Progress from the M. A. to the Ph.D. is not automatic, but is contingent on the formal approval of the Musicology faculty. Terminal M. A. students will follow Plan 1. All students must pass placement guidance examinations in the subject areas denoted by capital letters or successfully complete equivalent coursework before advancement to candidacy. Course numbers are shown in parentheses. THEORY: Tonal Analysis (160A); 20th-Century Analysis (160B). If germane to their interests, students may also be required to be proficient in figured bass and 16th- and/or 18th-century counterpoint. HISTORY: Medieval (279); Renaissance (291); Baroque (292); Classical (282); Romantic (283); 20th-Century (284). With the permission of the instructor, these areas may also be filled by the relevant seminar (261, 263, 265, 266, 268, 269). MUSICIANSHIP: 204A-B-C. Students must demonstrate reading knowledge of German, French, or Italian, for Plan 1. Plan 2 students must demonstrate reading knowledge

of German and either French or Italian. (See the departmental Graduate Student Handbook for details on language exams)

Plan 1 (thesis). Seventy-eight graduate units required. The following courses are required: Music 200A, 200B, and 200D; six courses from 203MT; one seminar in musicology each quarter for two years (chosen from 201A, 201C [201A or 201C is required of students specializing in music before 1600], 202A, 202B, 261, 263, 265, 266, 268, 269); two courses from A232-A270. Thirty-two additional units selected with guidance of faculty advisor, thesis.

Plan 2 (comprehensive examination). One hundred two graduate units required. The following courses are required: Music 200A, 200B, and 200D; 202A and 202B; nine courses from 203MT; 36 units (chosen from 201A, 201C [201A and 201C are both required if specializing in music prior to 1600], 261, 263, 265, 266, 268, 269 (260 courses may be repeated for credit); two courses from A232-A270. Thirty-three additional units selected with guidance of a faculty advisor. They may be within the department or outside the department. (Students are encouraged to take courses in theory, and/or ethnomusicology); three days of written comprehensive exams.

Degree Requirements— Theory Emphasis

M.A. students will follow one of two plans: Plan 1 (thesis) or Plan 2 (comprehensive examination). The former requires two years of coursework and the thesis. The latter requires three years of coursework (see below for required courses) and a written comprehensive examination. Upon satisfactory completion of this examination, the student will be rewarded an M.A. degree and proceed to the oral qualifying examination for the Ph.D. Students continuing for the Ph.D. will normally follow Plan 2. Progress from the M.A. to the Ph.D. is not automatic, but is contingent on the formal approval of the Theory faculty. Terminal M.A. students will follow Plan 1. All students must pass placement guidance examinations in the subject areas denoted by capital letters or successfully complete equivalent coursework before advancement to candidacy. Course numbers are shown in parentheses. THEORY: Fundamentals of Counterpoint (102) or 18th-Century Fugue (103); Figured Bass (5A-F); Tonal Analysis (160A); 20th-Century Analysis (160B). HISTORY: Medieval (279) or Renaissance (291); Baroque (292); Classical (282); Romantic (283); 20th Century (284). MUSICIANSHIP: (204A-B-C). Students must demonstrate reading knowledge of French or German by the end of their second year of residency. (See the departmental Graduate Student Handbook for details on language exams)

Plan 1 (thesis). Sixty-four graduate units required. The following courses are required: Music 200A, 200B and 200D; six courses of 203MT; 250A or B; 251A or B; 252A and B; one course from A232-A270. Twenty-eight additional units selected with guidance of faculty advisor, thesis.

Plan 2 (comprehensive examination). Eighty-three graduate units required. The following courses are required: nine courses of 203MT; 200A, 200B and 200D; 250A and B; 251A and

B; 252A and B; 273; 8 units in approved field(s) outside the music department, selected with the guidance of faculty advisor; one course from A232-A270. Twenty-four additional units selected with guidance of faculty advisor. They may be within the department or outside the department; five days of written and oral comprehensive exams.

Master of Music

The master of music degree provides preparation for professional performers in the areas offered. The degree will be awarded to candidates who demonstrate technical proficiency and advanced competence as performers, a substantial knowledge of the solo and chamber music literature in the field of their specialization, and a ready command of those aspects of music theory and music history that support and illuminate informed performance.

Admission

Applicants must hold a bachelor of music or a bachelor of arts in music, or equivalent education and training. An audition is required. Applicants will provide a repertory list and programs of concerts performed. In addition to departmental requirements for admission, applicants must fulfill university requirements for admission to graduate status described in the chapter "Graduate Education at UCSB."

Degree Requirements— Conducting Emphasis

M.M. students in conducting will follow one of two plans: Plan 1 (major performance) or Plan 2 (comprehensive examinations). The former requires two years of coursework and the major performance. The latter requires three years of courses, a successful D.M.A. audition, and a written comprehensive examination. Upon satisfactory completion of this examination, the student will be awarded an M.M. degree and proceed to the oral qualifying examination for the D.M.A. Students continuing for the D.M.A. in emphases in which this degree is offered will normally follow Plan 2. Terminal M.M. students will follow Plan 1.

Students must pass placement guidance examinations in the subject areas denoted by capital letters or successfully complete equivalent coursework before advancement to candidacy. Course numbers are shown in parentheses. THEORY: Figured Bass (5A-D); Tonal Analysis (160A). HISTORY: Any four of the following periods: Medieval/Renaissance (112AB); Baroque (112C); Classical (112D); Romantic (112E); 20th Century (112F). MUSICIANSHIP: (204A-B-C). M.M. choral conducting Plan 1 requires two languages before graduation, and M.M. choral conducting Plan 2 requires all three languages before comprehensive examinations are taken. (See the departmental Graduate Student Handbook for details on language exams) Choral conducting students must demonstrate basic proficiency in piano and voice; orchestral conducting students must demonstrate proficiency in piano or in an orchestral instrument.

M.M. concerts may not be given until an audition has been reviewed and approved by two members of the conducting committee,

as indicated on forms provided by the music graduate advisor. The concerts, too, must be approved by the student's master's committee, as indicated on forms provided by the graduate advisor. Auditions and concerts must take place in Santa Barbara, with the full committee or pre-approved substitutes in attendance.

Plan 1 (major performance). Sixty-two graduate units are required: Six quarters of Music 220 (24 units); 200A; 296D or 296E; one quarter of 230 (M.M., choral conducting) or one quarter of 231 (M.M., orchestral conducting); six courses from A232-A270; two courses from 200B, 201, 202, 211, 212, 223-227, 250-252, and/or 260-294; 4 units of electives; 295A and the equivalent of a full-length concert; 295B and a major performance (the equivalent of a chamber ensemble or small ensemble or large ensemble or mixed concert). Either 295A or 295B should normally be completed by the end of the first year.

Plan 2 (comprehensive examinations). Ninety units are required before the oral examination: nine quarters of Music 220 (36 units); 200A; 296D or 296E; 299A; one quarter of 230 (M.M., choral conducting) or one quarter of 230 and one quarters of 231 (M.M., orchestral conducting); six courses from Music A232-A270; four courses from Music 200B, 201, 202, 211, 212, 223-227, 250-252, and/or 260-294; six units of electives; 295A and the equivalent of a full-length concert by the end of the first year; successful D.M.A. audition for the conducting area committee; 297A and the equivalent of a chamber ensemble or small ensemble or large ensemble or mixed concert; 297B and the equivalent of a full-length concert: either 297A or 297B should normally be completed by the end of the second year; three days of written comprehensive examinations.

Degree Requirements—Keyboard, Strings, Voice, and Woodwinds and Brass Emphases

M.M. students in keyboard, strings, and voice will follow one of two plans: Plan 1 (major performance) or Plan 2 (comprehensive examinations). The former requires two years of coursework and the major performance. The latter requires three years of courses, a successful D.M.A. audition, and a written comprehensive examination. Upon satisfactory completion of this examination, the student will be awarded an M.M. degree and proceed to the oral qualifying examination for the D.M.A. Students continuing for the D.M.A. in emphases in which this degree is offered will normally follow Plan 2. Terminal M.M. students, including all M.M. students in the woodwinds and brass emphasis, will follow Plan 1.

Students must pass placement guidance examinations in the subject areas denoted by capital letters or successfully complete equivalent coursework before advancement to candidacy. Course numbers are shown in parentheses. THEORY: Figured Bass (5A-D); Tonal Analysis (160A). HISTORY: Any four of the following periods: Medieval/Renaissance (112AB); Baroque (112C); Classical (112D); Romantic (112E); 20th Century (112F). MUSICIANSHIP: (204A-B-C). M.M. Plan 1 Voice requires reading knowledge of two from French,

German, and Italian; M.M. Plan 2 Voice requires reading knowledge of French, German, and Italian before advancement to candidacy. (See the departmental Graduate Student Handbook for details on language exams)

M.M. recitals may not be given until a recital audition has been reviewed and approved by two members of the appropriate area committee (keyboard, strings, voice, or woodwinds/brass), as indicated on forms provided by the music program advisor. The recitals, too, must be approved by the student's master's committee, as indicated on forms provided by the program advisor. Auditions and recitals must take place in Santa Barbara, with the full committee or pre-approved substitutes in attendance.

Plan 1 (major performance). Sixty graduate units are required (M.M. strings and M.M. woodwinds and brass: 66 graduate units are required.); Six quarters of Music 220 (24 units); 200A; one course from 296A-B-C-F-G; M.M. keyboard, strings and woodwinds and brass only: three courses of A244; three courses from Music A232-A270 (M.M. strings and woodwinds and brass: six quarters from Music A232-270); M.M. voice Plan 1: three courses from A232 or A236 and three courses from A238 or A238P); two courses from 200B, 201, 202, 211, 212, 223-227, 250-252, and/or 260-294; 4 units of electives selected with guidance of faculty advisor; 295B and major performance (chamber music recital or concerto or major opera/oratorio role or another full-length recital). Either 295A or 295B should normally be completed by the end of the first year.

Plan 2 (comprehensive examinations). Required before the oral examination: Ninety-four graduate units, including nine quarters of Music 220 (36 units); 200A; one course from 296A-B-C; 299A; M.M. keyboard, strings and woodwinds and brass only: three courses of A244; six courses from Music A232-A270 (M.M. voice Plan 2: three courses from A232 or A236 and three additional courses from Music A232, A238, or A238P); four quarters from 200B, 201, 202, 211, 212, 223-227, 250-252, and/or 260-294; 6 units of electives selected with guidance of faculty advisor; 295A and a full-length recital by the end of the first year; successful D.M.A. audition for the appropriate performance area committee (keyboard, strings, or voice); 297A and a chamber music recital or concerto or major opera/oratorio role or full-length recital; 297B and a full-length recital: either 297A or 297B should normally be completed by the end of the second year; three days of written comprehensive examinations.

Degree Requirements— Piano Accompanying Emphasis

Students must pass placement guidance examinations in the subject areas denoted by capital letters or successfully complete equivalent coursework before advancement to candidacy. Course numbers are shown in parentheses. THEORY: Figured Bass (5A-D); Tonal Analysis (160A). HISTORY: Any four of the following periods: Medieval/Renaissance (112AB); Baroque (112C); Classical (112D); Romantic (112E); 20th Century (112F). MUSICIANSHIP: (204A-B-C). Students must demonstrate read-

ing knowledge of French, German, or Italian by the end of their first year of residency and of a second of these before graduation. (See the departmental Graduate Student Handbook for details on language exams).

M.M. recitals may not be given until a recital audition has been reviewed and approved by two members of an appropriate area committee, as indicated on forms provided by the music program advisor. The recitals, too, must be approved by the student's master's committee, as indicated on forms provided by the program advisor. Auditions and recitals must take place in Santa Barbara, with the full committee or pre-approved substitutes in attendance.

Seventy graduate units are required: Six quarters of Music 220 (24 units); three quarters of 235 (6 units); 200A; one course of 296A; three quarters of A244; two courses of 258; two courses from 200B, 201, 202, 211, 212, 223-227, 250-252, and/or 260-294; three courses from A232-A270; 4 units of electives; 295A and a full-length recital; 295B and a major performance (chamber music recital or another full-length recital). Either 295A or 295B should normally be completed by the end of the first year.

Doctor of Philosophy—Music Admission

The department requires completion of a master of arts degree in music from UCSB or a degree based on equivalent training. Students with a master of arts from another institution will take at least two additional years of graduate coursework for the doctor of philosophy. In addition to departmental requirements for admission, applicants must fulfill university requirements for admission to graduate status described in the chapter "Graduate Education at UCSB."

Degree Requirements— Composition Emphasis

Students must pass placement guidance examinations in the subject areas denoted by capital letters or successfully complete equivalent coursework before advancement to candidacy. All entering composition students are required to demonstrate proficiency in 18th-century counterpoint (fugue). This will be tested through an examination given when other guidance exams are administered (just prior to the start of fall quarter). Those who do not pass will satisfy those core proficiency by passing 212A, or by reexamination. Those who elect to pursue further fugal studies may do so by continuing the 212 series, offered in alternate years. Course numbers are shown in parentheses. THEORY: Fundamentals of Counterpoint (102); 18th-Century Fugue (212A); Figured Bass (5A-F); Tonal Analysis (160A); 20th-Century Analysis (160B); Orchestration (106, 107). HISTORY: Medieval/Renaissance (112AB); Baroque (112C); Classical (112D); Romantic (112E); 20th Century (112F). MUSICIANSHIP: (204A-B-C). Students must demonstrate reading knowledge of two languages from French, German, or Italian by the end of their first year of residency. Students may substitute a computer music language for the second language. (See the departmental Graduate Student Handbook for details on language exams) The computer-

music language, Cmusic, may be substituted for the second foreign language under the following conditions: (1) successful completion of 209IA and 209IB and (2) composition of a substantial computer-music work which begins in 209IC, continues beyond that quarter, and demonstrates sufficient competence in applying the language. (Normally, one language examination must be passed by the Ph.D. candidate prior to acceptance.) Students must have completed the equivalent of Music 200A (Bibliography).

Eighty-eight graduate units are required. All students must take Music 207A-B; six quarters of 208; 211A-B-C; either (a) two courses from 209IA-IB-IC or (b) one course from 209IA-IB-IC and two courses from 209LA-LB-LC; 36 units of electives selected with the guidance of a faculty advisor.

In addition, all students must take five days of written and oral qualifying exams; write a dissertation consisting of a portfolio of compositions, including one of substantial length; write a document analyzing a major twentieth-century work, and give a concert of their compositions, for which the student supplies a detailed commentary of each piece; oral defense.

Degree Requirements— Ethnomusicology Emphasis

Students must pass sections one through four of the ethnomusicology placement guidance examinations or successfully complete, by the end of their first year of residency, equivalent coursework specified by the ethnomusicology committee. Students must demonstrate reading knowledge of two languages, including one European language chosen from French, German, Italian, or Spanish (proficiency to be demonstrated by the end of the first year of residency), and one additional language relevant to the field of specialization (proficiency to be demonstrated prior to the qualifying exams.) (See the departmental *Graduate Student Handbook* for details on language exams.)

Ninety-two graduate units are required: 200A and 200C, 225, 227, 276A, and 276B; one course from 260D-F or 226; three courses from 224, 262A-X; three courses from 224, 293A-M; 6 units of 288; three courses from A232-A270; Anthropology 235A or 235B; 24 elective units of any pre-approved graduate courses offered in the UC system selected with the guidance of faculty advisor (may include up to 6 additional ensemble units); five days of written and oral qualifying exams; dissertation; oral defense.

Degree Requirements— Musicology Emphasis

Students must pass placement guidance examinations in the subject areas denoted by capital letters or successfully complete equivalent coursework before advancement to candidacy. Course numbers are shown in parentheses. THEORY: Tonal Analysis (160A); 20th-Century Analysis (160B). If germane to their interests, students may also be required to be proficient in figured bass and 16th- and/or 18th-century counterpoint. HISTORY: Medieval (279); Renaissance (291); Baroque (292); Classical (282); Romantic (283); 20th-Century (284). With the permission of the instructor, these areas may also be filled by the relevant seminar

(261, 263, 265, 266, 268, 269). **MUSICIANSHIP:** 204A-B-C. Students must demonstrate reading knowledge of German and French or Italian. Mastery of a third language may also be required in the student's field of specialization. Students in the doctoral emphasis usually demonstrate mastery of one language by the end of their first year of residency, and demonstrate mastery of the remaining European language by the end of the second year of residency. (See the departmental Graduate Student Handbook for details on language exams)

Eighty-nine graduate units are required. The following courses are required: Music 200A, 200B, and 200D; 202A and 202B; nine courses from 203MT; 28 units chosen from 201C (201C is required if specializing in music prior to 1600), 261, 263, 265, 266, 268, and 269 (at least 1 every quarter except quarters when 202A or 202B is taken) (these courses, except 201C, may be repeated for credit) (Music 250A, 250B, 251A and 251B may be substituted for these courses up to three times with the approval of faculty advisor); two courses from A232-A270; twenty-eight additional units selected with guidance of faculty advisor. At least eight of these units must come from outside the department (Students are encouraged to take courses in theory and/or ethnomusicology); four days of written and oral qualifying exams; dissertation; oral defense.

Continuing students who selected the Plan 2 M.A. degree are required to take only the oral portion of the qualifying examinations.

Degree Requirements— Theory Emphasis

Students must pass the placement guidance examinations in the subject areas denoted by capital letters or successfully complete equivalent coursework before advancement to candidacy. Course numbers are shown in parentheses. **THEORY:** Fundamentals of Counterpoint (102) or 18th-Century Fugue (103); Figured Bass (5A-F); Tonal Analysis (160A); 20th-Century Analysis (160B). **HISTORY:** Medieval (279) or Renaissance (291); Baroque (292); Classical (282); Romantic (283); 20th Century (284). **MUSICIANSHIP:** (204A-B-C). Students must demonstrate reading knowledge of French or German by the end of their first year of residency, and a second language by the end of their second year of residency. (See the departmental Graduate Student Handbook for details on language exams)

Eighty-three graduate units required. The following courses are required: nine courses from 203MT; 200A, 200B and 200D; 250A and 250B; 251A and B; 252A and B; 273; 8 units in approved field(s) outside the music department, selected with the guidance of faculty advisor; one course from A232-A270. Twenty-four additional units selected with guidance of faculty advisor. They may be within the department or outside the department; five days of written and oral compressive exams.

Doctor of Musical Arts

The doctor of musical arts degree provides a thorough preparation for the professional performer and the artist-teacher in the areas offered. Candidates for the degree will demon-

strate the following: an exceptional degree of technical proficiency and thoroughly professional competence as performers; a thorough and deep command of the solo and chamber music literature in their specialties; a thorough knowledge of the relevant literature in music theory and music history and the kind of thoughtful musicianship that results from disciplined and careful study of music theory, music history, and musical styles.

Admission

Applicants must have completed a master of music degree or its equivalent. A live audition is required, comparable in scope to a full recital demonstrating the applicant's command of several musical styles. Applicants will submit a repertory list and programs and reviews of concerts performed. In addition to departmental requirements for admission, applicants must fulfill university requirements for admission to graduate status described in the chapter "Graduate Education at UCSB."

Degree Requirements— Conducting Emphasis

Continuing students in conducting who selected the Plan 2 M.M. degree will have completed all unit requirements for the D.M.A. degree and are required to take only the oral portion of the qualifying examinations.

Students must pass placement guidance examinations in the subject areas denoted by capital letters or successfully complete equivalent coursework before advancement to candidacy. Course numbers are shown in parentheses. **THEORY:** Figured Bass (5A-D); Tonal Analysis (160A). **HISTORY:** Any four of the following periods: Medieval/Renaissance (112AB); Baroque (112C); Classical (112D); Romantic (112E); 20th Century (112F). **MUSICIANSHIP:** (204A-B-C). Students must have completed the equivalent of 200A (Bibliography). Choral conducting students must demonstrate reading knowledge of French, German, and Italian; orchestral conducting students one of French, German, and Italian. (See the departmental Graduate Student Handbook for details on language exams)

Choral conducting students must demonstrate basic proficiency in piano and voice; orchestral conducting students must demonstrate proficiency in piano, or in an orchestral instrument.

Pre-candidacy concerts may not be given until an audition has been reviewed and approved by two members of the conducting committee, as indicated on forms provided by the music graduate advisor. The concerts, too, both pre- and post-candidacy, must be approved by the student's doctoral committee, as indicated on forms provided by the graduate advisor. Auditions and concerts must take place in Santa Barbara, with the full committee or pre-approved substitutes in attendance.

Admission to candidacy will be established by fulfillment of the residency requirement of six quarters, fulfillment of language requirements, presentations of two concerts (as specified below), and passing the written and oral D.M.A. qualifying examinations. In addition, the following requirements must be met before advancement to candidacy: Fifty-six

graduate units: Six quarters of Music 220 (24 units); 296D or 296E; 299A; one quarter of 230 (D.M.A., choral conducting) or 231 (D.M.A., orchestral conducting); two courses from Music A232-A270; three courses from Music 200B, 201, 202, 211, 212, 223-227, 250-252, and/or 260-294; 4 units of electives; 297A and the equivalent of a chamber ensemble or small ensemble or large ensemble or mixed concert; 297B and the equivalent of a full-length concert (either 297A or 297B should normally be completed by the end of the second year); four days of written and oral qualifying examinations. After advancement to candidacy: the equivalent of two additional full-length concerts, tapes of which are deposited in the Music Library; D.M.A. research document, (scholarly study or thesis presenting an original contribution or insight into some aspect related to the candidate's field of study) deposited in the UCSB Davidson Library; and an oral defense of the research document, preceded by a public lecture-recital presentation related to the research document topic.

Note: Continuing students who have successfully completed the Plan 2 M.M. degree will have fulfilled all D.M.A. unit course requirements, are exempt from the written qualifying examinations, and are required to take only the oral qualifying examinations before advancement to candidacy.

Degree Requirements—Keyboard, Strings, and Voice Emphases

Continuing students in keyboard, strings, and voice who selected the Plan 2 M.M. degree will have completed all unit requirements for the D.M.A. degree and are required to take only the oral portions of the qualifying examinations.

Students must pass placement guidance examinations in the subject areas denoted by capital letters or successfully complete equivalent coursework before advancement to candidacy. Course numbers are shown in parentheses. **THEORY:** Figured Bass (5A-D); Tonal Analysis (160A). **HISTORY:** Any four of the following periods: Medieval/Renaissance (112AB); Baroque (112C); Classical (112D); Romantic (112E); 20th Century (112F). **MUSICIANSHIP:** (204A-B-C). Students must have completed the equivalent of 200A (Bibliography). Students must demonstrate reading knowledge of French, German, or Italian (D.M.A. Voice: French, German, and Italian). (See the departmental *Graduate Student Handbook* for details on language exams.)

D.M.A. pre-candidacy recitals may not be given until a recital audition has been reviewed and approved by two members of the appropriate area committee (keyboard, strings, or voice), as indicated on forms provided by the music graduate advisor. The recitals, too, both pre- and post-candidacy, must be approved by the student's doctoral committee, as indicated on forms provided by the graduate advisor. Auditions and recitals must take place in Santa Barbara, with the full committee or pre-approved substitutes in attendance.

Admission to candidacy will be established by fulfillment of the residency requirement of six quarters, fulfillment of language requirements, presentations of two recitals or concerts (as specified below), and passing the written and

oral D.M.A. qualifying examinations. In addition, the following requirements must be met before advancement to candidacy: Sixty graduate units: Six quarters of Music 220 (24 units); one course from 296A-B-C; 299A; D.M.A. keyboard and strings only: three courses of A244; three courses from Music A232-A270); (voice D.M.A.: three courses from Music A232 or A236 and three courses from A238 or A238P); two quarters from 200B, 201, 202, 211, 212, 223-227, 250-252, and/or 260-294; 4 units of electives selected with guidance of faculty advisor; 297A and a chamber music recital or concerto or major opera/oratorio role or full-length recital; 297B and a full-length recital: either 297A or 297B should normally be completed by the end of the first year; four days of written and oral qualifying examinations. After advancement to candidacy: the equivalent of two additional full-length concerts, tapes of which are deposited in the Music Library; D.M.A. research document, (scholarly study or thesis presenting an original contribution or insight into some aspect related to the candidate's field of study) deposited in the UCSB Davidson Library; and an oral defense of the research document, preceded by a public lecture-recital presentation related to the research document topic.

Note: Continuing students who have successfully completed the Plan 2 M.M. degree will have fulfilled all D.M.A. unit course requirements, are exempt from the written qualifying examinations, and are required to take only the oral qualifying examinations before advancement to candidacy.

Optional Ph.D. Emphasis in European Medieval Studies

The Medieval Studies Program offers an interdisciplinary doctoral emphasis to students previously admitted to a Ph.D. program in the Departments of Theater and Dance, English, French and Italian, History, History of Art and Architecture, Music, Religious Studies, and Spanish and Portuguese. Students pursuing the emphasis in European medieval studies must receive a grade of B or better in each of the following: Medieval Latin (Latin 103); one course in a vernacular, western European or Middle Eastern medieval language (English 205, English 230, French 206, Spanish 222A, Spanish 222B, Portuguese 222, Religious Studies 148A, Religious Studies 148 B, Religious Studies 210); Paleography and/or Diplomatics (History 215S, History 215T); Medieval Studies 200A-B-C; and 8 additional units in graduate courses on medieval topics. Students may petition to have appropriate courses from other institutions, or independent study, substituted for these requirements. Medieval Studies 200A-B-C is the program's colloquium series; graduate students in the emphasis attend the series and write brief papers on each colloquium (one per term), to be reviewed by the chair of the program (2 units). To qualify for the emphasis, at least one member of a Ph.D. candidate's dissertation committee must be an affiliated faculty member of the European Medieval Studies Program. Contact the European Medieval Studies Program for additional information on faculty interests, course offerings, and program requirements, or visit our Web site at www.medievalstudies.ucsb.edu.

Optional Ph.D. Emphasis in Women's Studies

The Women's Studies Program, with almost fifty core and affiliated faculty members in over nineteen disciplines, serves as a model of interdisciplinary work and scholarly collaboration at UCSB. Women's Studies doctoral emphasis students are required to complete successfully four seminars that will enhance their understanding of feminist pedagogy, feminist theory, and topics relevant to the study of women, gender and/or sexuality. Women's Studies as an inter-departmental set of conversations and intellectual questions supports a multifaceted undergraduate curriculum at UCSB. Graduate emphasis students are encouraged to apply to teach Women's Studies courses as teaching assistants and associates as part of their Women's Studies training.

Applicants must first be admitted to, or currently enrolled in, a UCSB Ph.D. program participating in the Women's Studies graduate emphasis: Anthropology; Comparative Literature; Counseling, Clinical, and School Psychology; English; French and Italian; Germanic, Slavic and Semitic Studies; History; History of Art and Architecture; Music; Political Science; Religious Studies; Sociology; Spanish and Portuguese; or Theater and Dance. Candidates complete four graduate courses and select a member of the Women's Studies faculty or affiliated faculty to serve on their dissertation committees. Applications to the Women's Studies Doctoral Emphasis may be submitted at any stage of Ph.D. work, and applications will be considered throughout the year.

The Graduate Curriculum

Students pursuing the emphasis in Women's Studies will successfully complete four graduate courses. Only one may be taken in the student's home department.

- 1. Issues in Feminist Epistemology and Pedagogy (Women's Studies 270).** A one-quarter seminar that considers Women's Studies as a distinct field. It offers an interdisciplinary exploration of feminist theories of knowledge production and teaching practices. Readings cover past and present critical debates and provide theoretical approaches through which to analyze interdisciplinary epistemological and pedagogical issues.
- 2. Special Topics in Women's Studies (594 AA-ZZ).** A one-quarter seminar offered by a Women's Studies faculty member on topics of central concern to the field of Women's Studies.
Or,
Research Practicum (Women's Studies 280). A cross-disciplinary seminar in which fundamental questions in contemporary feminist research practice are considered in light of students' own graduate projects. Students may fulfill the Area 2 requirement by taking either a Special Topics Seminar or the Research Practicum.
- 3. Feminist Theories.** A one-quarter graduate seminar in feminist theory offered by any department, including Women's Studies.
- 4. Topical Seminar.** A one-quarter graduate seminar, outside the student's home depart-

ment, that addresses topics relevant to the study of women, gender, and/or sexuality.

Music Courses

Majors and non-majors admitted to individual performance classes Music 25-33 and 125-133 (all of which are by audition and require the consent of department and instructor) may be required to participate in orchestra, wind ensemble, choir or another ensemble, as appropriate, in quarters in which they are enrolled in such performance classes.

LOWER DIVISION

1. Classical Music Live

(1) ROTHFARB

Primarily for the non-major. Tickets and transportation provided free of charge. For full course information, please go to: www.music.ucsb.edu/faculty/rothfarb/courses/Music11.

May be repeated for credit to a maximum of 3 units.

Students meet for a one-hour pre-concert lecture given by Music Department faculty, and then attend world-class symphony concerts sponsored by Santa Barbara's Community Arts Music Association.

4A-B-C-D-E-F. Musicianship

(1-1-1-1-1) STAFF

Prerequisites: placement exam. A grade of at least C- is required in each course of the Music 4 series. Must be taken consecutively, and concurrently with the Music 5 series.

A practical course in sight singing, aural analysis, and rhythmic studies.

5A-B-C-D-E-F. Music Theory

(3-3-3-3-3) STAFF

Prerequisites: placement exam. A grade of at least C- is required in each course of the Music 5 series. Must be taken consecutively, and concurrently with the Music 4 series.

Music theory sequence: tonal and chromatic harmony, analysis, counterpoint, twentieth-century techniques, formal structures in music.

8. Class Composition

(2) STAFF

Prerequisite: consent of instructor.

Primarily for the major. May be repeated for credit to a maximum of 18 units, but only 12 units may be applied toward the major.

Assignments in basics of music writing. For a selected number of students enrolled in Music 5A-F.

11. Fundamentals of Music

(4) STAFF

For the nonmajor.

The study of notes, scales, triads, inversions, rhythm, harmony, and musical terminology. Laboratory activities include keyboard orientation, sight-singing, and ear training. (F,W,S)

12. Introduction to Music Literature

(3) PRIZER, TCHAROS, KATZ

Prerequisite: open to music majors only.

Survey of western music from the Middle Ages through the present day. Designed to acquaint the new music major with the styles of European art music. For the entering music major, or by permission of the instructor. (F)

15. Music Appreciation

(4) STAFF

Not open to music majors.

A selective survey of music of Western civilization, evolution of forms, styles, media. Designed to enable the student to listen with understanding. (F,W,S)

17. World Music

(4) MARCUS

No previous training in music required.

An introductory course surveying the unity and diversity of folk, traditional, and classical music of the non-Western world. Emphasis given to dance, theatre, musical instruments, and the role of music in society. (F,W,S)

20A. Elementary Voice**(1) STAFF***Prerequisite: Music 11. Placement by audition.**May be repeated for credit in combination with Music 20B and 20C to a maximum of 6 units, but only 3 units may be applied toward the major.**Elementary voice lessons, primarily for the instrumental music major and the music minor. (F,W,S)***20B. Elementary Voice****(1) STAFF***Prerequisite: Music 11. Placement by audition.**May be repeated for credit in combination with Music 20A and 20C to a maximum of 6 units, but only 3 units may be applied toward the major.**Elementary voice lessons, primarily for the instrumental music major and the music minor. (F,W,S)***20C. Elementary Voice****(1) STAFF***Prerequisite: Music 11. Placement by audition.**May be repeated for credit in combination with Music 20A and 20B to a maximum of 6 units, but only 3 units may be applied toward the major.**Elementary voice lessons, primarily for the instrumental music major and the music minor. (F,W,S)***22. Practicum in World Music Performance****(1) STAFF***Prerequisite: consent of instructor.**May be repeated for credit to a maximum of 6 units.**Applied instruction in non-Western instruments or vocal styles.***25. Intermediate Voice****(1-3) INGHAM, STAFF***Prerequisites: by audition; Consent of instructor and department.**Primarily for music majors. May be repeated for credit to a maximum of 27 units.**Intermediate voice lessons. Taken for 3 units per quarter by BM Voice Emphasis majors, and for 1-2 units per quarter by all others. (F,W,S)***26A. Intermediate Double Bass****(1-3) GARBER***Prerequisites: by audition; consent of instructor and department.**May be repeated for credit to a maximum of 27 units.**Intermediate double bass lessons. Taken for 3 units per quarter by BM Double Bass Emphasis majors, and for 1-2 units per quarter by all others.***26B. Intermediate Cello****(1-3) RUTKOWSKI***Prerequisites: by audition; consent of instructor and department.**May be repeated for credit to a maximum of 27 units.**Intermediate cello lessons. Taken for 3 units per quarter by BM Cello Emphasis majors, and for 1-2 units per quarter by all others.***26D. Intermediate Viola****(1-3) CALLUS***Prerequisites: by audition; consent of instructor and department.**May be repeated for credit to a maximum of 27 units.**Intermediate viola lessons. Taken for 3 units per quarter by BM Viola Emphasis majors, and for 1-2 units per quarter by all others.***26E. Intermediate Violin****(1-3) YARON***Prerequisites: by audition; consent of instructor and department.**May be repeated for credit to a maximum of 27 units.**Intermediate violin lessons. Taken for 3 units per quarter by BM Violin Emphasis majors, and for 1-2 units per quarter by all others.***27A. Intermediate Bassoon****(1-3) RADFORD***Prerequisites: by audition; consent of instructor and department.**May be repeated for credit to a maximum of 27 units.**Intermediate bassoon lessons. Taken for 3 units per**quarter by BM Bassoon Emphasis majors, and for 1-2 units per quarter by all others.***27B. Intermediate Clarinet****(1-3) BAMBACH***Prerequisites: by audition; consent of instructor and department.**May be repeated for credit to a maximum of 27 units.**Intermediate clarinet lessons. Taken for 3 units per quarter by BM Clarinet Emphasis majors, and for 1-2 units per quarter by all others.***27C. Intermediate Flute****(1-3) FELBER***Prerequisites: by audition; consent of instructor and department.**May be repeated for credit to a maximum of 27 units.**Intermediate flute lessons. Taken for 3 units per quarter by BM Flute Emphasis majors, and for 1-2 units per quarter by all others.***27D. Intermediate Oboe****(1-3) HORN***Prerequisites: by audition; consent of instructor and department.**May be repeated for credit to a maximum of 27 units.**Intermediate oboe lessons. Taken for 3 units per quarter by BM Oboe Emphasis majors, and for 1-2 units per quarter by all others.***28A. Intermediate French Horn****(1-3) GROSS***Prerequisites: by audition; consent of instructor and department.**May be repeated for credit to a maximum of 27 units.**Intermediate french horn lessons. Taken for 3 units per quarter by BM French Horn Emphasis majors, and for 1-2 units per quarter by all others.***28B. Intermediate Trombone****(1-3) BOOTH***Prerequisites: by audition; consent of instructor and department.**May be repeated for credit to a maximum of 27 units. Intermediate trombone lessons. Taken for 3 units per quarter by BM Trombone Emphasis majors, and for 1-2 units per quarter by all others.***28C. Intermediate Trumpet****(1-3) HUNGERFORD***Prerequisites: by audition; consent of instructor and department.**May be repeated for credit to a maximum of 27 units. Intermediate trumpet lessons. Taken for 3 units per quarter by BM Trumpet Emphasis majors, and for 1-2 units per quarter by all others.***28D. Intermediate Tuba****(1-3) BOOTH***Prerequisites: by audition; consent of instructor and department.**May be repeated for credit to a maximum of 27 units. Intermediate tuba lessons. Taken for 3 units per quarter by BM Tuba Emphasis majors, and for 1-2 units per quarter by all others.***29. Intermediate Percussion****(1-3) NATHAN***Prerequisites: by audition; consent of instructor and department.**May be repeated for credit to a maximum of 27 units. Intermediate percussion lessons. Taken for 3 units per quarter by BM Percussion Emphasis majors, and for 1-2 units per quarter by all others. (F,W,S)***31A-B-C-D-E-F. Class Piano****(1-1-1-1-1-1) KISLENKO***Prerequisite: placement by audition. A grade of at least C- is required in each course of the music 31 series.**Primarily for music majors. Must be taken consecutively.**Includes scales, sight-reading and appropriate piano literature. (F,W,S)***31X. Class Piano****(1) KISLENKO***Prerequisite: placement by audition; Music 31F with a minimum grade of C- or passing the piano proficiency test.**Primarily for Music Majors. May be repeated for credit to a maximum of 6 units.**Optional continuation of Music 31. Equivalent in level to Music 32. Elementary individual class piano instruction in class or individual context. Includes scales, sight reading, transposition, harmonization at the keyboard, with emphasis on piano literature.***32A-B-C-D-E-F. Secondary Piano****(1-1-1-1-1-1) KISLENKO***Prerequisite: placement by audition.**Primarily for music majors. May be repeated for credit to a maximum of 6 units.**Optional continuation of Music 31. Elementary individual class piano instruction. Includes scales, sight-reading, transposition, harmonization at the keyboard, with emphasis on piano literature.***33. Intermediate Piano****(1-3) BERKOWITZ, ASCHE***Prerequisites: by audition; consent of instructor and department.**May be repeated for credit to a maximum of 27 units.**Intermediate piano lessons. Taken for 3 units per quarter by BM Piano Emphasis and BM Piano Accompanying Emphasis majors, and for 1-2 units per quarter by all others. (F,W,S)***35A-B-C-D-E-F. Piano Accompanying****(1-1-1-1-1-1) KOENIG***Prerequisites: Music 33 (may be taken concurrently) for piano and accompanying emphasis majors only; consent of instructor.**An introduction to the study of accompaniment repertoire and performance (art song, instrumental literature, orchestral transcriptions, sight-reading).***51. Vocal and Instrumental Coaching****(1) KISLENKO, BALLERINO***Prerequisite: concurrent vocal or instrumental study (Music 25-29).**May be repeated for credit to a maximum of 9 units, but only 3 units may be applied toward the major.**Musical preparation of vocal or instrumental works from a coach/accompanist.***88. Intermediate Composition****(2) STAFF***Prerequisites: passing of freshman composition portfolio and consent of instructor.**May be repeated for credit to a maximum of 12 units, but only 6 units may be applied toward the major.**Preparation for Music 108. For selected students.***94. Freshman Audition****(1) STAFF***Preparation of freshman audition.***96A-B-C. Honors Project****(2-2-2) STAFF***Prerequisites: honors students only; consent of instructor and department.**Public presentation of sophomore project:*

- A. Public performance of sophomore audition (BM performance; BA by petition)
- B. Portfolio
- C. Public presentation of sophomore paper (BA music)

97. BM Sophomore Audition**(2) STAFF***Prerequisites: passing of freshman audition (may be waived for transfer students); consent of instructor.**Preparation of sophomore audition.***98. Readings in Music****(1-3) STAFF***Prerequisite: consent of instructor.**Students must have a minimum 3.0 cumulative grade-point average. May be repeated for credit up to 6 units. Students are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined.**Critical review and discussion of related topics in musicology, ethnomusicology, composition, theory, or performance. (F,W,S)***99. Introduction to Musical Research****(1-3) STAFF***Prerequisite: consent of instructor.*

Students must have a minimum 3.0 cumulative grade-point average. May be repeated for credit up to 6 units. Students are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined.

Independent research under the guidance of a faculty member in the department. Course offers exceptional students the opportunity to undertake independent research of work in a research group in topics in musicology, ethnomusicology, composition, theory, or performance. (F,W,S)

UPPER DIVISION

All upper-division Music courses that require any course in the Music 4A-F sequence and/or any course in the Music 5A-F sequence as prerequisites requires that these prerequisites be passed with a grade of C- or better, or that the student have been placed into a higher course in the sequence or out of the sequence entirely in the placement tests conducted by the Department of Music.

101A-B-C. Twentieth-Century Techniques (2-2-2) HALADYNA

Prerequisite: Music 5E.

Music 101A not open for credit to students who have completed Music 101.

A study of contemporary techniques, through both written work and analysis.

102. Fundamentals of Counterpoint (3) STAFF

Prerequisite: Music 5E or equivalent.

A study of the general principles of counterpoint based on literature and repertoire of various periods, complemented by written exercises.

103. Eighteenth Century Counterpoint (3) FEIGIN

Prerequisites: Music 5E and 102.

A study of contrapuntal practices of the eighteenth century through analysis and compositional exercises.

104. Musical Instruments of the World (3) HSU

A systematic study of musical instruments in world cultures involving classification, distribution, acoustical phenomena, and physical typologies. Emphasis on cross-cultural comparative analysis of solo and ensemble groupings, and the role of musical instruments in the study of acculturation, historical diffusion, and aesthetics. (F,W,S)

105. Field and Laboratory Methods in Ethnomusicology (3) STAFF

Prerequisite: Music 176.

The development and execution of field research designs. Practical field experience using various techniques of data collection and management including music recording, photography, filming, questionnaires, and interviewing. The use and interpretation of standard and innovative laboratory methods for processing data, including computer analysis.

106A-B-C. Orchestration (2-2-2) HALADYNA

Prerequisite: Music 5E.

Music 106A not open for credit to students who have completed Music 106. Music 106B not open for credit to students who have completed Music 107.

The study of orchestration through written work and analysis.

108. Advanced Composition (1-3) FEIGIN

Prerequisites: Music 5F; passing of sophomore composition portfolio; consent of instructor.

May be repeated for credit to a maximum of 36 units.

Individual instruction in composition. Taken for 3 units per quarter by BM Piano Emphasis and BM Composition Emphasis majors, and for 1-2 units per quarter by all others. Assignments using small and large forms.

109IA. Direct Digital Synthesis, Processing and Composition (3) KUCHERA-MORIN

Prerequisites: upper-division standing; consent of instructor; music majors must have taken Music 5E.

First quarter of general purpose computing for computer music applications. Topics include: introduction to the UNIX operating system and the vi editor, music synthesis using C-music program and score input programs.

109IB. Direct Digital Synthesis, Processing and Composition (3) KUCHERA-MORIN

Prerequisite: Music 109IA.

Second quarter of a three-quarter series concentrating on computer instrument design using C-based computer music software and exploring synthesis applications of frequency modulation, amplitude modulation, additive/subtractive synthesis etc., computer processing of sound, and computer music composition.

109IC. Direct Digital Synthesis, Processing and Composition (3) KUCHERA-MORIN

Prerequisites: Music 109IA and 109IB.

Third quarter of a three-quarter series concentrating on advanced C-based computer programs for digital signal processing, advanced instrument design. Most of the emphasis in the quarter is music composition.

109LA. Real-Time Digital Synthesis, Processing and Composition (2) ROADS

Prerequisites: upper-division standing; consent of instructor; music majors must have taken Music 5E.

A maximum of 12 units total allowed for Music 109LA, 109LB, and 109LC.

First quarter of a three-quarter series course in real-time digital synthesis and composition will concentrate on multi-track recording, mixing, digital signal processing using micro-computers and special purpose DSP equipment for music composition.

109LB. Real-Time Digital Synthesis, Processing and Composition (2) ROADS

Prerequisite: Music 109LA.

A maximum of 12 units total allowed for Music 109LA, 109LB, and 109LC.

Second quarter of a three-quarter series course will concentrate on digital synthesis (primarily frequency modulation, simple and complex; but also amplitude modulation and additive synthesis) using micro-computers, digital synthesizers and processing equipment for music composition.

109LC Real-Time Digital Synthesis, Processing and Composition (2) ROADS

Prerequisites: Music 109LA and 109LB.

A maximum of 12 units total allowed for Music 109LA, 109LB, and 109LC.

Third quarter of a three-quarter series course will concentrate on real-time computer music composition with micro-computers and digital synthesis/processing equipment.

109N. Special Topics in Computer Music and Digital Signal Processing (3) KUCHERA-MORIN, ROADS

Prerequisites: Music 109LA-B-C or 109IA-B-C.

May be repeated for credit to a maximum of 12 units.

Advanced topics in computer music composition, synthesis, and digital signal processing.

112AB. History of Music: The Middle Ages and Renaissance (3) PRIZER

Prerequisites: Music 5C; and Music 12 with a minimum grade of C-.

History of music in Western civilization from antiquity to 1600.

112C. History of Music: The Baroque (3) PRIZER, TCHAROS

Prerequisites: Music 5C; and Music 12 with a minimum grade of C-.

History of music in Western civilization from 1600 to 1750.

112D. History of Music: The Classic Era (3) TCHAROS

Prerequisites: Music 5C; and Music 12 with a minimum grade of C-.

History of music in Western civilization from 1725 to 1825.

112E. History of Music: The Romantic Era (3) KATZ

Prerequisites: Music 5C; and Music 12 with a minimum grade of C-.

History of music in Western civilization from 1790 to 1918.

112F. History of Music: The Twentieth Century (3) KATZ

Prerequisites: Music 5C; and Music 12 with a minimum grade of C-.

History of music in Western civilization from 1870 to the present.

113A. The History of Opera: 1600-1800 (4) TCHAROS

An overview of the history of opera from 1600-1800, placing selected works within a social context, and viewing opera as a musical work, dramatic spectacle, and cultural commodity.

113B. The History of Opera: 1800-1960 (4) KATZ

An overview of the history of opera from 1800-1960, placing selected works within a social context, and viewing opera as a musical work, dramatic spectacle, and cultural commodity.

114. Music and Popular Culture in America (4) STAFF

Prerequisites: upper-division standing; not open to music majors.

A survey of the relationships between music and popular culture in America. Music to be discussed includes blues, jazz, and rock, as well as classical music. Emphasis is on cultural, rather than technical aspects of music. (F,W,S)

116. American music History: From the Colonial Period to the Present (4) PAUL

Prerequisites: upper-division standing; not open to music majors.

An overview of the varieties of American musical experience from the colonial period to the present. Representative works from several genres are studied with a view to placing them in their cultural context and identifying major aesthetic issues.

115. Symphonic Music (4) RUTKOWSKI

Prerequisite: Music 15.

For the nonmajor.

A study of selected symphonic works.

118A-Z. History and Literature of Great Composers in Western Music (4) STAFF

Prerequisite: Music 15.

For the nonmajor.

A survey of the life and stylistic development of the music of an individual composer selected from the fourteenth to the twentieth century.

A. Ludwig van Beethoven

B. J. S. Bach

C. Wolfgang Amadeus Mozart

D. Frederic Chopin

E. Haydn

F-Z. Other composers

119A. Music and Politics (4) HALL

No previous training in music required. Primarily for non-majors; also open to majors.

A study of the interaction between music and politics from the fourteenth century to the present. Includes discussion of relevant art from each period.

120A. Orchestral Conducting (2) STAFF

Prerequisite: consent of instructor.

May be repeated for credit to a maximum of 12 units, but only 4 units may be applied toward the major.

An introduction to the fundamentals of orchestral conducting and score reading.

120B. Choral Conducting

(2) GERVAIS

Prerequisite: consent of instructor.

May be repeated for credit to a maximum of 12 units, but only 4 units may be applied toward the major.

An introduction to the fundamentals of choral conducting and score reading.

120C. Advanced Conducting

(1) GERVAIS

Prerequisite: consent of instructor.

May be repeated for credit to a maximum of 6 units, but only 2 units may be applied toward the major.

Applied instruction in choral and orchestral conducting.

120T. Choral Techniques

(2) GERVAIS

Prerequisites: Music 120B (may be taken concurrently); consent of instructor.

Aspects of choral techniques including: development of concert programs and rehearsal plans, rehearsal procedures, types of vocal ensembles and seating configurations, acoustical considerations, performance and recording procedures, long-term programming and artistic development, social and organizational aspects of vocal ensemble.

122. Practicum in World Music Performance

(1) STAFF

Prerequisites: consent of instructor. Passing of sophomore audition for Bachelor of Music Composition emphasis majors.

May be repeated for credit to a maximum of 6 units.

Applied instruction in non-Western instruments or vocal styles.

125. Advanced Voice

(1-4) INGHAM, STAFF

Prerequisite: passing of voice sophomore audition.

May be repeated for credit to a maximum of 36 units.

Advanced voice lessons. Taken for 4 units per quarter by BM Voice Emphasis majors, and for 1-2 units per quarter by all others. (F,W,S)

126A. Advanced Double Bass

(1-4) GARBER

Prerequisite: passing of double bass sophomore audition.

May be repeated for credit up to a maximum of 36 units.

Advanced double bass lessons. Taken for 4 units per quarter by BM Double Bass Emphasis majors, and for 1-2 units per quarter by all others. (F,W,S)

126B. Advanced Cello

(1-4) RUTKOWSKI

Prerequisite: passing of cello sophomore audition.

May be repeated for credit up to a maximum of 36 units.

Advanced cello lessons. Taken for 4 units per quarter by BM Cello Emphasis majors, and for 1-2 units per quarter by all others. (F,W,S)

126D. Advanced Viola

(1-4) CALLUS

Prerequisite: passing of viola sophomore audition.

May be repeated for credit up to a maximum of 36 units.

Advanced viola lessons. Taken for 4 units per quarter by BM Viola Emphasis majors, and for 1-2 units per quarter by all others. (F,W,S)

126E. Advanced Violin

(1-4) YARON

Prerequisite: passing of violin sophomore audition.

May be repeated for credit up to a maximum of 36 units.

Advanced violin lessons. Taken for 4 units per quarter by BM Violin Emphasis majors, and for 1-2 units per quarter by all others. (F,W,S)

127A. Advanced Bassoon

(1-4) RADFORD

Prerequisite: passing of bassoon sophomore audition.

May be repeated for credit up to a maximum of 36 units.

Advanced bassoon lessons. Taken for 4 units per quarter by BM Bassoon Emphasis majors, and for 1-2 units per quarter by all others. (F,W,S)

127B. Advanced Clarinet

(1-4) BAMBACH

Prerequisite: passing of clarinet sophomore audition.

May be repeated for credit up to a maximum of 36 units.

Advanced clarinet lessons. Taken for 4 units per quarter by BM Clarinet Emphasis majors, and for 1-2 units per quarter by all others. (F,W,S)

127C. Advanced Flute

(1-4) FELBER

Prerequisite: passing of flute sophomore audition.

May be repeated for credit up to a maximum of 36 units.

Advanced flute lessons. Taken for 4 units per quarter by BM Flute Emphasis majors, and for 1-2 units per quarter by all others. (F,W,S)

127D. Advanced Oboe

(1-4) HORN

Prerequisite: passing of oboe sophomore audition.

May be repeated for credit up to a maximum of 36 units.

Advanced oboe lessons. Taken for 4 units per quarter by BM Oboe Emphasis majors, and for 1-2 units per quarter by all others. (F,W,S)

128A. Advanced French Horn

(1-4) GROSS

Prerequisite: passing of french horn sophomore audition.

May be repeated for credit up to a maximum of 36 units.

Advanced french horn lessons. Taken for 4 units per quarter by BM French Horn Emphasis majors, and for 1-2 units per quarter by all others. (F,W,S)

128B. Advanced Trombone

(1-4) BOOTH

Prerequisite: passing of trombone sophomore audition.

May be repeated for credit up to a maximum of 36 units.

Advanced trombone lessons. Taken for 4 units per quarter by BM Trombone Emphasis majors, and for 1-2 units per quarter by all others. (F,W,S)

128C. Advanced Trumpet

(1-4) HUNGERFORD

Prerequisite: passing of trumpet sophomore audition.

May be repeated for credit up to a maximum of 36 units.

Advanced trumpet lessons. Taken for 4 units per quarter by BM Trumpet Emphasis majors, and for 1-2 units per quarter by all others. (F,W,S)

128D. Advanced Tuba

(1-4) BOOTH

Prerequisite: passing of tuba sophomore audition.

May be repeated for credit up to a maximum of 36 units.

Advanced tuba lessons. Taken for 4 units per quarter by BM Tuba Emphasis majors, and for 1-2 units per quarter by all others. (F,W,S)

129. Advanced Percussion

(1-4) NATHAN

Prerequisite: passing of percussion sophomore audition.

May be repeated for credit to a maximum of 36 units.

Advanced percussion lessons. Taken for 4 units per quarter by BM Percussion Emphasis majors, and for 1-2 units per quarter by all others. (F,W,S)

133. Advanced Piano

(1-4) BERKOWITZ, ASCHE

Prerequisite: passing of piano sophomore audition.

May be repeated for credit to a maximum of 36 units.

Advanced piano lessons. Taken for 4 units per quarter by BM Piano Emphasis and BM Piano Accompanying Emphasis majors, and for 1-2 units per quarter by all others. (F,W,S)

135A-B-C. Piano Accompanying

(2-2-2) KOENIG

Prerequisites: Music 35A-B-C or Music 133 (may

be taken concurrently); piano and accompanying emphasis majors only; consent of instructor.

May be repeated for credit to a maximum of 4 units each.

An advanced study of accompaniment repertoire and performance (art song, instrumental literature, orchestral transcription, sight-reading).

150. Opera/Song Repertoire

(2) INGHAM

Prerequisite: Music 25 or 33.

Letter grade required for majors. May be repeated for credit to a maximum of 12 units.

A detailed study of operatic literature and concert literature (lieder, melodies, songs, and pieces with instruments). The interpretation of vocal music as a preparation for performance. (F,W,S)

151. Vocal and Instrumental Coaching

(1) JUHN, BALLERINO

Prerequisite: concurrent upper-division vocal or instrumental study (Music 125-129).

May be repeated for credit to a maximum of 9 units, but only 3 units may be applied toward the major.

Musical preparation of vocal or instrumental works.

158A-B-C-D. Diction

(1-1-1-1) INGHAM

Prerequisite: for Music 158A-B: Music 25. For Music 158C-D, primarily for voice majors; Music 25.

- A. English diction (W)
- B. Italian diction (F)
- C. German diction (W)
- D. French diction (S)

160A. Tonal Analysis

(3) STAFF

Prerequisites: Music 4E and 5E.

Analysis of small-scale and large-scale formal structures through mid-classical period.

160B. Twentieth Century Analysis

(3) HALL

Prerequisites: Music 4E and 5E.

Analysis of non-tonal and twelve-tone music.

160C. Advanced Tonal Analysis

(3) STAFF

Prerequisites: Music 4F, 5F, and 160A.

Continuation of Musics 160A, advanced tonal analysis through nineteenth century works.

160D. Tuning and Temperament

(3) MARCUS

Prerequisite: consent of instructor.

Survey of a number of tuning systems found around the world, including those of ancient Greece, Europe, India, China, the Arab Middle East, Turkey, and Indonesia. The mathematical, aesthetic, and symbolic bases of each system will be considered.

160E. The Arabic System of Melodic Modes: The Maqamat

(3) MARCUS

Prerequisite: consent of instructor.

An intensive examination of the system of melodic modes (maqamat) that governs present-day practice in the eastern Arab world. Emphasis given to theoretical issues (quarter tones, tetrachordal structures, and theories of intonation), analysis of standard repertoire, and procedures governing improvisation.

160F. Sound Color: Timbre and Music

(3) HAJDA

Prerequisites: consent of instructor; not open to freshmen.

"Sound color" refers to the quality or timbre of musical sound, whether instrumental, vocal, or synthetic. This course investigates timbre's special perceptual and cognitive qualities, as well as its unique expressive power in music.

162. Choral Literature

(3) GERVAIS

Prerequisites: three quarters of the Music 112A-F series.

A historical and analytical survey of major choral works from the seventeenth century to the present.

165. Art Song

(4) STAFF

Prerequisites: three quarters of the Music 112AB-F series.

The development of the art song with special emphasis on the poetry and musical styles which evolved in each historical period.

167. National Elements in Music

(4) KATZ

Prerequisites: three quarters of the Music 112AB-F series.

In-depth discussion and analysis of music concentrating on the nineteenth and twentieth centuries of a particular country.

168B. The Anthropology of Music

(4) STAFF

An examination of music performance traditions as cultural and social phenomena. Special attention given to theoretical formulations of musical anthropology.

168G. Other Issues in Ethnomusicology

(4) STAFF

May be repeated for credit to a maximum of 16 units.

A study of other cultural issues in ethnomusicology. Specific issues or topics will vary by quarter and will be announced in advance by the department.

168H. Music and Tourism

(4) COOLEY

Students read folklore, anthropology, tourism studies, musicology, and ethnomusicology in an attempt to develop theories for interpreting the impact of tourism on music locally and globally.

168I. Film Music Cognition

(4) HAJDA

Prerequisite: Music 11 or Music 5A (may be taken concurrently); upper division standing or consent of instructor.

Concurrently offered with Music 262I.

A consideration of film music as a medium of communication between the director, composer, music supervisor, editors, performers and the audience. Emphasis given to cognitive psychological theories of meaning in terms of structure and affect in audio/visual contexts.

168X. Umm Kulthum: Her Music, Her Life, Her Times

(4) MARCUS

Prerequisite: consent of instructor.

Analysis of the music, life and times of the predominant Arab singer of the twentieth century. Individual projects may focus on music or text analysis, issues of gender, nationalism, agency, performance, practice, and investigation of related arts (film, novels, etc.).

169. Notation and Transcription in Ethnomusicology

(3) STAFF

Survey of existing notational systems and exercises in ethnomusicology and transcription, with particular attention to issues related to the visual representation of performed musical sound.

173. Studies in Music Theory

(4) STAFF

Prerequisites: Music 5A-F.

May be repeated for credit to a maximum of 8 units.

Selected topics in musical analysis.

174. Musical Acoustics

(4) HAJDA

Prerequisites: Music 11 or Music 5A (may be taken concurrently); upper division standing or consent of instructor.

Consideration of the relationships between acoustics, perception and music. Emphasis on the physical and psychophysiological bases for tonality, dynamics, timbre and rhythm. Additional focus on the vibrational properties of musical instruments and features of digital recording and playback.

175E. Music Cultures of the World: China

(4) HSU

An examination of universal music issues through case studies of Chinese musical works, musicians, theories, and practices. Special attention given to interdisciplinary understanding of Chinese music and culture.

175F. Music Cultures of the World: The Middle East

(4) MARCUS

Arab, Turkish, and Persian music traditions from historical, cultural, and musicological perspectives. Emphasis given to the position of music in Islam, present-day performers, and modal and rhythmic structures.

175G. Music Cultures of the World: India

(4) MARCUS

A survey of music traditions of the Indian subcontinent from classical to folk and popular. Emphasis on the position of music in Hindu philosophy, the role of music in society, musical instruments, and modal and rhythmic structures (Raga and Tala).

175K. Music Cultures of the World: Other Regions

(4) STAFF

May be repeated for credit to a maximum of 16 units.

A study of music traditions and genres from other regions of the world. Specific regions studied vary by quarter and will be announced in advance by the department.

175L. Music Culture of the Polish Tatra Mountains

(4) COOLEY

The Tatras are the home of a distinct folk culture, including music based on polyphonic singing and violin ensembles. Course investigates the present-day music from this region and its history, and examines the influence of tourism and ethnography on the music-culture.

175M. American Folk Music: Old-Time, Bluegrass, and Country

(4) COOLEY

The study of English-language American folk music, using mixed-media tools for learning. The focus is on string band music often associated with Appalachia and usually called "old-time," and the distinct but related styles of bluegrass and country.

176. Studies in Ethnomusicology

(4) STAFF

Prerequisites: upper-division standing.

An introduction to the field of ethnomusicology using theories and methods derived from the social sciences and humanities. Topic areas to include transcription and analysis, musicians, musical instruments, music acculturation, and the function of music in society.

178A-B. Performance Practices

(4-4) STAFF

Prerequisites: three quarters of the Music 112AB-F series.

A. A study, through selected works, of historical performance practices of vocal and instrumental music from the Middle Ages through the romantic era. Problems to be treated will include instrumentation, ornamentation, figured bass, rhythm, tempo, articulation, and expression.

B. A study, through selected works, of performance practices of twentieth-century music, with particular attention to new notational concepts and their execution.

179. Proseminar in Medieval Music

(4) PRIZER

Prerequisites: Music 112AB and two additional quarters of the Music 112AB-F series.

A selective study of various stylistic and historical aspects of medieval music.

180. Proseminar in Renaissance Music

(4) PRIZER

Prerequisites: Music 112AB and two additional quarters of the Music 112AB-F series.

A selective study of various stylistic and historical aspects of renaissance music.

181. Proseminar in Baroque Music

(4) PRIZER, TCHAROS

Prerequisites: Music 112C and two additional quarters of the Music 112AB-F series.

A selective study of various stylistic and historical aspects of Baroque music.

182. Proseminar in Classical Music

(4) TCHAROS

Prerequisites: Music 112D and two additional quarters of the Music 112AB-F series.

A selective study of various stylistic and historical aspects of classical music.

183. Proseminar in Romantic Music

(4) KATZ

Prerequisites: Music 112E and two additional quarters of the Music 112AB-F series.

A selective study of various stylistic and historical aspects of romantic music.

184. Proseminar in Contemporary Music

(4) KATZ

Prerequisites: Music 112F and two additional quarters of the Music 112AB-F series.

A selective study of various stylistic and historical aspects of contemporary music.

187. Strauss and Hofmannsthal

(4) HSU

Prerequisite: upper-division standing.

Same course as Comparative Literature 187.

A course in the collaboration between composer and poet. A study of the operas, the correspondence, and related developments in German music in the early twentieth century.

188. Ethnomusicology Forum

(1) STAFF

Prerequisite: consent of instructor.

May be repeated for credit in combination with Music 172 to a maximum of 6 units. Students must be currently involved in a research project.

A forum for the presentation of research and performances by students, faculty, and visiting scholars and performers. Students must be currently involved in a research project. (F,W,S)

191. Special Topics

(2-4) STAFF

Prerequisites: upper-division standing; consent of instructor.

May be repeated for credit to a maximum of 12 units.

Special seminar in selected problems of current musicology, ethnomusicology, theory, or performance.

192. B.A. Senior Project

(3) STAFF

Prerequisites: open to senior music majors only.

Preparation of senior audition, composition, or paper.

195. Junior Recital

(2) STAFF

Prerequisite: passing of B.M. sophomore audition; open to upper-division bachelor of music performance emphasis majors only.

Preparation of junior recital.

195B. Junior Composition Portfolio

(2) STAFF

Prerequisites: passing of B.M. sophomore composition portfolio; consent of instructor; open to upper-division bachelor of music composition emphasis majors only.

Preparation of junior composition portfolio.

196. Honors Music

(4) STAFF

Prerequisites: upper-division standing; honors students only; consent of instructor and department.

An undergraduate seminar for honor students. Carefully selected topics intended to foster excellence in research, theory, composition, or performance.

197. Senior Recital

(3) STAFF

Prerequisites: passing of junior recital; open to senior bachelor of music performance emphasis majors only.

Preparation of senior recital.

197B. Senior Composition Portfolio and Recital

(3) STAFF

Prerequisites: passing of junior composition portfolio; consent of instructor; open to senior bachelor of music composition emphasis majors only.

Preparation of senior composition portfolio.

198. Readings in Music

(1-4) STAFF

Prerequisites: upper-division standing; completion of

three quarters of the Music 112A-F series; consent of instructor.

Students must have a minimum 3.0 cumulative grade-point average and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined. Music 198 may be repeated to a maximum of 16 units.

Critical review and discussion of related topics in musicology, ethnomusicology, composition, theory, or performance.

199. Individual Research in Music

(1-4) STAFF

Prerequisites: upper-division standing; completion of three quarters of the Music 112AB-F series; consent of instructor.

Students must have a minimum 3.0 GPA for the preceding 3 quarters and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined. Students are limited to 4 units per quarter and 16 units total in Music 198/199 courses.

Independent research under the guidance of a faculty member in the department. Course offers qualified students the opportunity to undertake independent research or work in a research group in topics in musicology, ethnomusicology, composition, theory, or performance.

199RA. Independent Research Assistance in Music

(1-4) STAFF

Prerequisites: upper-division standing; completion of three quarters of the Music 112AB-F series; consent of instructor and department.

Students must have a minimum 3.0 GPA for the preceding 3 quarters and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined. Students are limited to 4 units per quarter and 16 units total in Music 198/199 courses. No more than 4 units in combination with Music 199 may be applied to major. Faculty supervised research assistance.

GRADUATE COURSES

200A. Bibliography and Research Techniques

(4) STAFF

Primarily intended for the M.A. and Ph.D. graduate student in music.

A survey of music bibliography and research methods.

200B. Bibliography and Research Techniques

(4) STAFF

Primarily intended for the M.A. and Ph.D. graduate student in musicology or theory.

Survey and discussion of select historical, methodological, and theoretical approaches to research in musicology.

200C. Bibliography and Research Techniques

(4) HSU

Primarily intended for Ph.D. students in ethnomusicology.

Survey of bibliographic sources and individual research projects in ethnomusicology.

200D. Bibliography and Research Techniques

(4) STAFF

Primarily intended for M.A. and Ph.D. students in theory.

A survey of music bibliography and research methods in theory.

201C. Notation and Music: Their Historical Interrelation

(4) PRIZER

White mensural notation, lute and keyboard tablatures.

202A-B. Seminar in Musicology

(4-4) STAFF

Prerequisites: M.A. or equivalent with consent of instructor.

For advanced students only. A two-quarter in-progress sequence course with grades for both quarters issued upon completion of 202B. May be

repeated for credit.

A two-quarter doctoral seminar dealing with selected topics in musicology.

203MT. Musicology—Theory Forum

(1) STAFF

Prerequisites: graduate standing with musicology or theory emphasis.

A monthly meeting of musicology and theory students, faculty, and visiting scholars to present their current research.

204A. Graduate Musicianship I

(1) STAFF

An introduction for graduate students who fail the musicianship placement exam. 204A reviews diatonic ear-training skills and their relation to theory. All graduate students encouraged to enroll; theory/composition students should especially consider 204A as a pedagogical study.

204B. Graduate Musicianship II

(1) STAFF

Prerequisite: Music 204A.

Continues skills of 204A; reviews musicianship skills for modulation. All graduate students encouraged to enroll; theory/composition students should especially consider 204B as a pedagogical study of musicianship.

204C. Graduate Musicianship III

(1) STAFF

Prerequisite: Music 204A.

Open to all graduate students; theory and composition students especially encouraged to take as a pedagogical study.

Continues skills of Music 204A and 204B; reviews musicianship skills for chromatic harmony.

207A-B. Seminar in Orchestration

(4-4) STAFF

Prerequisite: graduate standing in composition.

- A. Instrumental families of the orchestra.
- B. Writing for full orchestra.

208. Graduate Composition

(4) BARLOW, FEIGIN, KUCHERA-MORIN, ROADS

Prerequisite: consent of instructor.

Required for M.A. and Ph.D. in composition. May be repeated for credit.

Individual instruction in composition.

209IA. Direct Digital Synthesis, Processing and Composition

(4) KUCHERA-MORIN

Prerequisites: graduate music majors and graduate non-majors in areas of electrical engineering, computer science, physics and mathematics; consent of instructor.

First quarter of general purpose computing for computer music applications. Topics include: introduction to the UNIX operating system and the vi editor, music synthesis using C-based computer programs, and score input programs.

209IB. Direct Digital Synthesis, Processing and Composition

(4) KUCHERA-MORIN

Prerequisite: Music 209IA.

Second quarter of a 3-quarter sequence course will concentrate on computer music instrument design using C-based music software and exploring applications of frequency modulation, amplitude modulation, additive/subtractive synthesis, digital signal processing, and computer music composition.

209LA. Real-Time Digital Music Synthesis, Processing and Composition

(2) ROADS

Prerequisites: graduate music majors and graduate non-majors in areas of electrical engineering, computer science, physics, and math; consent of instructor.

First quarter of a 3-quarter sequence course will concentrate on multi-track recording, mixing, digital signal processing using micro-computers and special purpose dsp equipment.

209LB. Real-Time Digital Music Synthesis, Processing and Composition

(2) ROADS

Prerequisite: Music 209LA.

Second quarter of a 3-quarter sequence course will concentrate on digital synthesis (primarily

frequency modulation, simple and complex; but also amplitude modulation and additive synthesis) using micro-computers, digital synthesizers and processing equipment.

209LC. Real-Time Digital Music Synthesis, Processing and Composition

(2) ROADS

Prerequisites: Music 209LA and 209LB.

Third quarter of a 3-quarter sequence course will concentrate on real-time computer music composition with micro-computer and digital synthesis/processing equipment.

209N. Special Topics in Electronic Music

(3) BARLOW, KUCHERA-MORIN, ROADS

Prerequisite: Music 209L.

May be repeated for credit to a maximum of 12 units.

Advanced topics in computer music composition, synthesis, and digital signal processing.

211A-B-C. Contemporary Techniques

(4-4-4) BARLOW, FEIGIN

Prerequisite: passing grade on all theory placement guidance examinations.

A detailed study of contemporary compositional techniques. Extensive compositional exercises will be required in whole-tone, pentatonic, quartal, pitch-set, tone-row, process, percussion, and aleatoric composition.

212A-B-C. Canon and Fugue

(4-4-4) FEIGIN

Prerequisite: passing grade on all theory placement guidance examinations.

A detailed study of Bach's canons and fugues, including invertible counterpoint, stretto, triple and quadruple counterpoint, as well as extensions by later and contemporary composers. Extensive compositional exercises required.

219. Applied Instruction

(2) STAFF

Prerequisite: graduate standing. Enrollment by audition.

Not for the performance emphasis in MM or DMA degree programs. May be repeated for credit.

Applied vocal or instrumental instruction for graduate students other than in the performance emphasis discipline of MM and DMA degree programs.

220. Graduate Performance

(3-4) STAFF

Prerequisite: entrance audition for MM or DMA degree program.

May be repeated for credit. (MM Piano Accompanying: 3 units.)

Applied instruction in the performance emphasis discipline (MM Piano Accompanying: instruction in piano) of MM and DMA degree programs.

222X. Practicum in World Music Performance

(1-2) MARCUS

Prerequisites: graduate standing; consent of instructor.

May be repeated for credit.

Individual or group instruction in non-western instruments or vocal styles.

224. Organology

(4) HSU

A systematic study of musical instruments in world cultures involving classification, distribution, acoustical phenomena, and physical typologies. Emphasis on cross-cultural, comparative analysis of solo and ensemble groupings, and the role of musical instruments in the study of acculturation, historical diffusion, and aesthetics.

225. Field and Laboratory Methods in Ethnomusicology

(4) STAFF

Prerequisite: Music 276.

The development and execution of field research designs. Practical field experience using various techniques of data collection and management, including music recording, photography, filming, questionnaires, and interviewing. The use and interpretation of standard and innovative laboratory methods for processing data, including computer analysis.

226. Notation and Transcription in Ethnomusicology**(4) STAFF**

Survey of existing notational systems and exercises in ethnomusicological transcription, with particular attention to issues related to the visual representation of performed musical sound.

227A-B. Seminar in Ethnomusicology**(4-4) STAFF**

Prerequisite: graduate standing in ethnomusicology.

A graduate seminar examining special problems, current theories, analytic procedures, and recent innovations in ethnomusicology.

231. Choral Conducting**(2) GERVAIS**

Prerequisite: enrollment by audition.

May be repeated for credit.

Advanced conducting techniques, score reading and analysis, rehearsal techniques and repertoire for vocal and choral ensembles. (F,W,S)

231T. Choral Techniques**(2) GERVAIS**

Prerequisites: Music 231 (may be taken concurrently); consent of instructor.

Aspects of choral techniques including: development of concert programs and rehearsal plans, rehearsal procedures, types of vocal ensembles and seating configurations, acoustical considerations, performance and recording procedures, long-term programming and artistic development, social and organizational aspects of vocal ensemble.

233. Score Reading**(2) STAFF**

Prerequisite: consent of instructor.

Required for M.M. and D.M.A. degrees in Conducting. May be repeated for credit.

A practical survey of score-reading of selected orchestral scores of the eighteenth, nineteenth, and twentieth centuries including a detailed study of the necessary transcriptions and their relationship to the various clefs.

235A-B-C-D-E-F. Accompanying Techniques and Repertoire**(2-2-2-2-2-2) STAFF**

Prerequisite: MM/DMA piano and piano accompanying emphases only.

Emphasizes advanced accompaniment techniques, the intensive study of the French and German song cycle, secco recitative, and orchestral score-reading.

250A-B. Seminar in Music Theory**(4-4) VAN DEN TOORN, HALL**

Topics in theoretical research. Content will vary depending on instructor.

A. Analysis and theory of atonal music.

B. Analysis and theory of twelve-tone music.

251A-B. Seminar in the History of Theory**(4-4) ROTHFARB, VAN DEN TOORN**

A. History of early music theory.

B. History of music theory from Rameau to Schenker.

252A-B. Seminar in Schenkerian Analysis**(4-4) ROTHFARB**

Must be taken in consecutive order.

A. Readings in the theory of Schenkerian analysis. Basic analytical techniques.

B. Advanced reading in Schenkerian theory. Analysis of large forms.

256. Vocal and Instrumental Coaching**(2) STAFF**

Prerequisites: concurrent graduate vocal or instrumental study (Music 220, 219, 235); graduate standing; consent of instructor.

Musical preparation of vocal or instrumental works.

257. Composition Forum**(1) STAFF**

Prerequisite: Music 208.

May be repeated for credit to a maximum of 16 units.

A forum for the presentation and discussion of new works by students, faculty and guest composers. (F,W,S)

258. Opera/Song Repertoire**(2) INGHAM**

Prerequisite: consent of instructor.

A detailed study of operatic literature and concert literature (Lieder, melodies, songs, and pieces with instruments). The interpretation of vocal music as a preparation for performance.

260D. Tuning and Temperament**(4) MARCUS**

Prerequisite: consent of instructor.

The course surveys a number of tuning systems around the world, including those of ancient Greece, Europe, India, China, the Arab Middle East, Turkey, and Indonesia. The mathematical, aesthetic, and symbolic basis of each system will be considered.

260E. The Arabic System of Melodic Modes (Maqamat)**(4) MARCUS**

Prerequisites: graduate standing; consent of instructor.

Examination of the system of melodic modes (maqamat) governing present-day melodic practice in the eastern Arab world. Emphasis given to theoretical issues (quarter tones, tetrachordal structures, and theories of intonation), analysis of pieces in the repertoire, and procedures governing improvisation.

260F. Sound Color**(4) HAJDA**

Prerequisites: graduate standing; consent of instructor.

"Sound color" refers to the quality or timbre of musical sound, whether instrumental, vocal, or synthetic. This course investigates timbre's special perceptual and cognitive qualities, as well as its unique expressive power in music.

261. Seminar in Musicology: The Middle Ages**(4) PRIZER**

May be repeated for credit.

Graduate seminar in music of the middle ages.

262B. Anthropology of Music**(4) STAFF**

Examination of music performance traditions as cultural and social phenomena. Special attention given to theoretical formulations of musical anthropology.

262G. Other Issues in Ethnomusicology**(4) STAFF**

May be repeated for credit to a maximum of 16 units provided topics are different.

A study of other cultural issues in ethnomusicology. Specific topics will vary by quarter and will be announced in advance by the department.

262H. Music and Tourism**(4) COOLEY**

Students read folklore, anthropology, tourism studies, musicology, and ethnomusicology in an attempt to develop theories for interpreting the impact of tourism on music locally and globally.

262I. Film Music Cognition**(4) HAJDA**

A consideration of film music as a medium of communication between the director, composer, music supervisor, editors, performers and the audience. Emphasis given to cognitive psychological theories of meaning in terms of structure and affect in audio/visual contexts. Students are required to propose and complete an experiment in film music cognition.

263. Seminar in Musicology: The Renaissance**(4) PRIZER**

May be repeated for credit.

Graduate seminar in Renaissance music.

265. Seminar in Musicology: The Baroque Period**(4) PRIZER, TCHAROS**

May be repeated for credit.

Graduate seminar in music of the Baroque period.

266. Seminar in Musicology: The Classical Period**(4) TCHAROS**

May be repeated for credit.

Graduate seminar in music of the Classical period.

268. Seminar in Musicology: The Romantic Period**(4) STAFF**

May be repeated for credit.

Graduate seminar in music of the Romantic period.

269. Seminar in Musicology: The Twentieth Century**(4) STAFF**

May be repeated for credit.

Graduate seminar in music of the twentieth century.

273. Studies in Music Theory**(4) STAFF**

Selected topics in musical analysis.

275. Seminar in Music Criticism**(4) ROTHFARB**

Investigation of important critical writing in music from the early eighteenth century to the present with study of related works in the field of aesthetics. Analysis of the scope and impact of criticism in the musical life of each period.

276A-B. Studies in Ethnomusicology**(4-4) COOLEY**

An introduction to the field of ethnomusicology using theories and methods derived from the social sciences and humanities. Topic areas to include transcription and analysis, musicians, musical instruments, music acculturation, and the function of music in society.

278B. Performance Practices**(4) STAFF**

A study, through selected works, of twentieth-century music with particular attention to new notational concepts and their execution.

279. Proseminar in Medieval Music**(4) PRIZER**

Prerequisite: graduate standing.

Recommended preparation: passing Medieval section of Guidance exam, or Music 112AB.

A selective study of various stylistic and historical aspects of medieval music.

282. Proseminar in Classical Music**(4) TCHAROS, KATZ**

Prerequisite: graduate standing.

Recommended preparation: passing Classical portion of Guidance exam, or Music 112D.

A selective study of various stylistic and historical aspects of classical music.

283. Proseminar in Romantic Music**(4) KATZ**

Prerequisite: graduate standing.

Recommended preparation: passing Romantic portion of Guidance exam, or Music 112E.

A selective study of various stylistic and historical aspects of romantic music.

284. Proseminar in Contemporary Music**(4) KATZ**

Prerequisite: graduate standing.

Recommended preparation: passing of twentieth century portion of guidance exam, or Music 112F.

A selective study of various stylistic and historical aspects of contemporary music.

287. Strauss and Hofmannsthal**(4) HSU**

Same course as Comparative Literature 287.

A course in the collaboration between composer and poet. A study of the operas, the correspondence, and related developments in German music in the early twentieth century.

288. Ethnomusicology Forum**(1) STAFF**

Not open for credit to students who have completed Music 222.

A forum for the presentation of research and performances by students, faculty, and visiting scholars and performers. Students must be currently involved in a research or performance project.

291. Proseminar in Renaissance Music**(4) PRIZER**

Prerequisite: graduate standing.

Recommended preparation: passing of Renaissance portion of guidance exam, or Music 112AB.

A selective study of various stylistic and historical aspects of renaissance music.

292. Proseminar in Baroque Music

(4) PRIZER, TCHAROS

Prerequisite: graduate standing.

Recommended preparation: passing of Baroque portion of guidance exam, or Music 112C.

A selective study of various stylistic and historical aspects of baroque music.

293E. Music Cultures of the World: China

(4) STAFF

Not open for credit to students who have completed Music 223.

Examination of universal music issues through case studies of Chinese musical works, musicians, theories and practices. Special attention given to interdisciplinary understanding of Chinese music and culture.

293G. Music Cultures of the World: India

(4) MARCUS

Prerequisite: graduate standing.

Not open for credit to students who have completed Music 216.

A survey of music traditions of the Indian subcontinent from classical to folk and popular. Emphasis given to the position of music in Hindu philosophy, the role of music in society, musical instruments, and modal and rhythmic structures (raga and tala).

293K. Music Cultures of the World: Other Regions

(4) STAFF

May be repeated for credit to a maximum of 16 units provided region studied is different.

A study of the music traditions and genres from other regions of the world. Specific regions studied vary from quarter to quarter and will be announced in advance by the department.

293L. Music Culture of the Polish Tatra Mountains

(4) COOLEY

The Tatras are the home of a distinct folk culture, including music based on polyphonic singing and violin ensembles. Course investigates the present day music from this region and its history, and examines the influence of tourism and ethnography on the music culture.

293M. American Folk Music

(4) COOLEY

The study of English language American folk music, using mixed-media for learning. The focus is on string band music often associated with Appalachia and usually called "oldtime," and the distinct but related styles of bluegrass and country.

295A-B. Master of Music Performances

(2-2) STAFF

Prerequisite: master of music students only. Recital audition required.

Preparation of:

- A. A full-length recital. Conducting: the equivalent of a full-length concert.
- B. A major performance: chamber music recital, concerto, major opera/oratorio role, or another full-length recital. Conducting: the equivalent of a chamber ensemble, small ensemble, large ensemble, or mixed concert.

296AA-ZZ. Performance Literature

(4) STAFF

A study of problems in the analysis and performance of major works in selected repertoire.

- A. Piano
- B. Strings
- C. Voice
- D. Orchestral
- E. Choral
- F. Woodwinds
- G. Brass

297A-B. Doctor of Musical Arts Performances

(2-2) STAFF

Prerequisite: DMA (including MM Plan 2) students only. Recital audition required.

Preparation of:

- A. Chamber music recital, concerto, major

opera/oratorio role, or a full-length recital. Conducting: the equivalent of a chamber ensemble, small ensemble, large ensemble, or mixed concert.

- B. A full-length recital. Conducting: the equivalent of a full-length concert.

299A-B. Doctor of Musical Arts Seminar: Historical/Theoretical Aspects of Music.

(4-4) STAFF

Prerequisite: Music 200A.

A study of selected repertoires, not confined to a single genre or period, from the technical perspective of music theory and history.

501. Directed Teaching in Music

(2-4) STAFF

Prerequisite: appointment as teaching assistant.

Covers development of teaching techniques especially oriented to lower-division instruction. Theoretical aspects covered at beginning of each quarter offered. Practical techniques discussed including weekly meeting with class instructor. Required course for all teaching assistants. (F)

502. Teaching Practicum

(2-4) STAFF

Prerequisite: appointment as teaching assistant or associate.

No unit credit allowed toward advanced degree.

Teaching assistant: leads discussion of topics covered in the lecture. Associate: assumes full responsibility for the teaching of one or more courses. (F,W,S)

594AA-ZZ. Special Topics

(2-4) STAFF

Special seminar in selected problems of current musicology, ethnomusicology, composition, theory, or performance. (F,W,S)

595. Group Studies

(2-4) STAFF

Critical review of research in selected problems of musicology, ethnomusicology, composition, theory, or performance. (F,W,S)

596. Directed Reading and Research

(2-4) STAFF

Individual tutorial for research in musicology, ethnomusicology, composition, theory, or performance; instructor will usually be student's major professor. (F,W,S)

597. Individual Study for Master's Comprehensive and Doctoral Qualifying Examinations for Advancement to Candidacy

(1-12) STAFF

Prerequisites: consent of instructor and graduate advisor.

No unit credit allowed toward advanced degree.

598. Preparation for the Master's Degree

(1-12) STAFF

No unit credit allowed toward advanced degree.

Instructor will be chair of student's committee in musicology, ethnomusicology, composition, theory, or performance.

599A. Ph.D. Dissertation Research and Preparation

(1-12) STAFF

No unit credit allowed toward advanced degrees.

Instructor will ordinarily be chair of student's doctoral committee. (F,W,S)

599B. Preparation for DMA Post-Candidacy Recitals

(1-12) STAFF

No unit credit allowed toward advanced degrees.

Preparation of two full-length recitals (conducting: the equivalent of two full-length concerts) required after advancement to candidacy for the DMA degree. Instructor should be student's performance instructor: ordinarily chair of DMA Committee. (F,W,S)

599C. Preparation of DMA Document

(1-12) STAFF

No unit credit allowed toward advanced degrees.

Preparation of the DMA document required after advancement to candidacy for the DMA degree. Instructor should be a member of student's doctoral committee.

Related Courses in Other Departments

Interdisciplinary: 188A-B, 288A-B.

Music Performance Laboratories

LOWER DIVISION

Music courses A36 through A70 may be repeated for credit to a maximum of 6 units with the exception of Music A44 and A42. Enrollment by audition (with the exception of A70's). For lower-division students only.

A34. Wind Ensemble

(1) BAMBACH

Prerequisite: by audition.

Masterworks of the literature for ensembles smaller than orchestral or full band scoring. Although the basic ensembles feature winds, both strings and percussion are utilized. Advanced players only.

A36A-B-C. Chamber Choir

(1-1-1) GERVAIS

Prerequisites: by audition (for Music A36A): Music A36A (for Music A36B): Music A36B (for Music A36C).

A select ensemble for singers and instrumentalists, the Chamber Choir prepares musicians for professional ensemble work and offers specialized study in choral literature, techniques, styles and interpretation covering five centuries of choral repertoire.

A37A-B-C. University Singers

(1-1-1) GERVAIS

Prerequisites: by audition (for Music A37A): Music A37A (for Music A37B): Music A37B (for Music A37C).

University Choir. (A:F,B,W,C:S)

A38. Opera Workshop

(1) STAFF

Prerequisite: by audition.

Letter grade required for majors. May be repeated for credit to a maximum of 6 units.

Participation in opera scenes.

A38P. Opera Production

(1) STAFF

Prerequisite: by audition.

Letter grade required for majors. May be repeated for credit to a maximum of 3 units.

Participation in annual opera production.

A40. Ensemble for Contemporary Music

(1) HALADYNA

Prerequisite: by audition.

Reading sessions and preparation for performance of contemporary music. There will be one or two concerts each quarter. Includes departmental scholarship players, and is open to composers who also perform.

A41. Piano Ensemble

(1) ASCHE, BERKOWITZ

Prerequisite: by audition.

May be repeated for credit to a maximum of 6 units.

Piano duets (1 piano, 4 hands) and duos (2 pianos) in separate sections. (F,W,S)

A42. Orchestra

(2) SCHINDLER

Prerequisite: by audition.

(F,W,S)

A43. Flute Choir

(1) FELBER

The Flute Choir studies flute literature in depth, perfects technique and interpretation, employs the complete flute family of Bass, Alto flutes, and piccolos. Prepares ensemble for public performances each quarter.

A44. Chamber Music Ensemble

(1) CALLUS

Prerequisite: by audition.

(F,W,S)

A45. Brass Quintet**(1) GROSS***Prerequisite: by audition.**May be repeated for credit to a maximum of 6 units.*

Participation in scholarship brass quintet.

A45BR. Brass Orchestral Repertoire**(1) GROSS***Prerequisite: by audition.**May be repeated for credit to a maximum of 6 units.*

Intensive exploration of staple brass orchestral repertoire, emphasizing the works of important 19th and 20th century composers. Classes include rehearsal sessions, guided listening and analysis, mock auditions, resume and taped audition preparation.

A45H. Horn Ensemble**(1) GROSS***Prerequisite: by audition.***A46. Clarinet Choir****(1) BAMBACH****A47S. Jazz Ensemble****(1) NATHAN**

Instruction in interpretation and performance of jazz music. Improvization is stressed. Audition is required.

A48S. Collegium Musicum: Musica Antiqua**(1) KRONOUR, GROSS***Prerequisite: by audition.*

Performance workshop in medieval and renaissance music. Specialized in instrumental and solo vocal music.

A49. Percussion Ensemble**(1) NATHAN***Prerequisite: by audition.*

Rehearsal and performance of standard percussion ensemble literature. Instruction of appropriate playing techniques for standard and exotic percussion instruments.

A53. Viola Orchestral Repertoire**(1) CALLUS***Prerequisite: by audition.**May be repeated for credit to a maximum of 6 units.*

The study of the entire standard orchestral repertoire for viola and audition procedures.

A70AA-ZZ. Ethnomusicology Performance Ensemble**(1) STAFF***Prerequisite: enrollment by audition with the exception of Music A70J.*

Group performance of music from selected world cultures: (F,W,S)

- A. American Folk Music
- B. English Ballads
- I. Indian Music
- J. Beginning Gamelan
- K. Advanced Gamelan
- M. Middle East Music
- N. Middle Eastern Chorus
- V. Gospel Choir

A70N. Middle East Chorus**(1) MARCUS***May be repeated to a maximum of 6 units.**Already a long-standing class taught as a subsection of A70M. Will be given concurrently with A170N and A270N.*

The chorus learns a variety of songs from Arab, Armenian, Greek, Persian, and Turkish music cultures and performs with the Middle East Ensemble.

UPPER DIVISION*Music courses A134 through A170 may be repeated for credit to a maximum of 9 units with the exception of Music A132A-B-C, A142, and A144. Enrollment by audition, with the exception of A170J. For upper-division students only.***A132A-B-C. Young Soloists Ensemble****(1-1-1) GERVAIS***Prerequisites: Music A132A for A132B; Music A132B**for A132C; concurrent enrollment in Music A36A-B-C or A136A-B-C; consent of instructor.**May be repeated for credit to a maximum of 12 units, but only 6 unit may be applied toward the major.*

A specialized select ensemble for singers as part of a professional apprenticeship program

A134. Wind Ensemble**(1) BAMBACH***Prerequisite: enrollment by audition.**For upper-division students.*

Masterworks of the literature for ensembles smaller than orchestral or full band scoring. Although the basic ensemble feature winds, both strings and percussion are utilized. Advanced players only.

A136A-B-C. Chamber Choir**(1-1-1) GERVAIS***Prerequisites: Music A136A for Music A136B; Music A136B for Music A136C.*

A select ensemble for singers and instrumentalists, the Chamber Choir prepares musicians for professional ensemble work and offers specialized study in choral literature, techniques, styles and interpretation covering five centuries of choral repertoire.

A137A-B-C. University Singers**(1-1-1) GERVAIS***Prerequisites: Music A137A for Music A137B; Music A137B for Music A137C.*

University Choir. (A;F;B;W;C;S)

A138. Opera Workshop**(1) STAFF***Prerequisite: by audition.**Letter grade required for majors. May be repeated for credit to a maximum of 9 units.*

Participation in opera scenes.

A138P. Opera Production**(1) STAFF***Prerequisite: by audition.**Letter grade required for majors. May be repeated for credit to a maximum of 9 units.*

Participation in annual opera production.

A140. Contemporary Music Ensemble**(1) HALADYNA***Prerequisites: by audition; upper-division standing.*

Reading sessions and preparation for performance of contemporary music. There will be one or two concerts each quarter. Includes departmental scholarship players, and is open to composers who also perform.

A141. Piano Ensemble**(1) ASCHE, BERKOWITZ**

Piano duets (1 piano, 4 hands) and duos (2 pianos) in separate sections. (F,W,S)

A142. Orchestra**(2) SCHINDLER***May be repeated for credit to a maximum of 18 units.*

(F,W,S)

A143. Flute Choir**(1) FELBER**

The Flute Choir studies flute literature in depth, perfects technique and interpretation, employs the complete flute family of Bass, Alto flutes, and piccolos. Prepares ensemble for public performances each quarter.

A144. Chamber Music Ensemble**(2) STAFF***May be repeated for credit to a maximum of 18 units.*

(F,W,S)

A145. Brass Quintet**(1) GROSS***Prerequisites: by audition; upper-division standing.**May be repeated for credit to a maximum of 9 units.*

Participation in scholarship brass quintet.

A145BR. Brass Orchestral Repertoire**(1) GROSS***Prerequisites: by audition; upper-division standing.**May be repeated for credit to a maximum of 9 units.*

Intensive exploration of staple brass orchestral

repertoire, emphasizing the works of important 19th and 20th century composers. Classes include rehearsal sessions, guided listening and analysis, mock auditions, resume and taped audition preparation.

A145H. Horn Ensemble**(1) GROSS****A146. Clarinet Choir****(1) BAMBACH****A147S. Jazz Ensemble****(1) NATHAN**

Instruction in interpretation and performance of jazz music. Improvization is stressed. Audition is required.

A148S. Collegium Musicum: Musica Antiqua**(1) KRONOUR, GROSS***Prerequisites: by audition; upper-division standing.**May be repeated for credit to a maximum of 9 units.*

Performance workshop in medieval and renaissance music. Specializes in instrumental and solo vocal music.

A149. Percussion Ensemble**(1) NATHAN**

Rehearsal and performance of standard percussion ensemble literature. Instruction of appropriate playing techniques for standard and exotic percussion instruments.

A153. Viola Orchestral Repertoire**(1) CALLUS***Prerequisite: by audition.**May be repeated for credit to a maximum of 9 units.*

The study of the entire standard orchestral repertoire for viola, and audition procedures.

A170AA-ZZ. Ethnomusicology Performance Ensemble**(1) STAFF***Prerequisite: enrollment by audition with the exception of Music 170J.*

Group performance of music from selected world cultures: (F,W,S)

- A. American Folk Music
- B. English Ballads
- I. Indian Music
- J. Beginning Gamelan
- K. Advanced Gamelan
- M. Middle East Music
- N. Middle Eastern Chorus
- V. Gospel Choir

A170N. Middle East Chorus**(1) MARCUS***May be repeated to a maximum of 9 units, but only 6 units may be applied toward the major.**Already a long-standing class taught as a subsection of A70M. Will be given concurrently with A70N and A270N.*

The chorus learns a variety of songs from Arab, Armenian, Greek, Persian, and Turkish music cultures and performs with the Middle East Ensemble.

GRADUATE COURSES*Music courses A232 to A270 may be repeated for credit to a maximum of 12 units. Enrollment by audition (with the exception of A270J). For graduate students only.***A232A-B-C. Young Soloists Ensemble****(2-2-2) GERVAIS***Prerequisites: Music A232A for Music A232B; Music A232B for Music A232C; consent of instructor.*

A specialized select ensemble for singers as part of a professional apprenticeship program, which requires concurrent enrollment in Music 236A-B-C or 231.

A234. Wind Ensemble**(2) BAMBACH**

Masterworks of the literature for ensembles smaller than orchestral or full band scoring. Although the basic ensembles feature winds, both strings and percussion are utilized. Advanced players only.

A236A-B-C. Chamber Choir**(2-2-2) GERVAIS***Prerequisite: Music A236A for Music A236B; Music*

A236B for Music A236C.

A select ensemble for singers and instrumentalists, the Chamber Choir prepares musicians for professional ensemble work and offers specialized study in choral literature, techniques, styles and interpretation covering five centuries of choral repertoire.

A237A-B-C. University Singers

(2-2-2) GERVAIS

Prerequisite: Music A237A for Music A237B; Music A237B for Music A237C.

University Choir.

A238. Opera Workshop

(2) STAFF

Prerequisite: by audition.

May be repeated for credit to a maximum of 12 units. Letter grade required for majors, optional grading for non-majors.

Participation in opera scenes.

A238P. Opera Production

(2) STAFF

Prerequisite: by audition.

May be repeated for credit to a maximum of 12 units. Letter grade required for majors, optional grading for non-majors.

Participation in annual opera production.

A240. Ensemble for Contemporary Music

(2) STAFF

Prerequisites: by audition; graduate students only.

May be repeated for credit up to 12 units.

Reading sessions and preparation for performance of contemporary music. There are one or two concerts each quarter. Includes departmental scholarship players, and is open to composers who also perform.

A241. Piano Ensemble

(2) ASCHÉ, BERKOWITZ, ASCHÉ

Primarily for MM and DMA students in piano.

Piano duets (1 piano, 4 hands) and duos (2 pianos) in separate sections.

A242. Orchestra

(2) SCHINDLER

(F,W,S)

A243. Flute Choir

(2) FELBER

A244. Chamber Music Ensemble

(2) CALLUS

(F,W,S)

A245. Brass Quintet

(2) GROSS

Prerequisites: by audition; graduate standing.

May be repeated for credit to a maximum of 12 units.

Participation in scholarship brass quintet.

A245BR. Brass Orchestral Repertoire

(2) GROSS

Prerequisites: by audition; graduate standing.

May be repeated for credit.

Intensive exploration of staple brass orchestra repertoire, emphasizing the works of important 19th and 20th century composers. Classes include rehearsal sessions, guided listening and analysis, mock auditions, resume and taped audition preparation.

A245H. Horn Ensemble

(2) GROSS

A246. Clarinet Choir

(2) BAMBACH

A247S. Jazz Ensemble

(2) NATHAN

A248S. Collegium Musicum: Musica Antiqua

(2) KRONOUR, GROSS

Prerequisite: by audition.

Performance workshop in medieval and renaissance music. Specializes in instrumental and solo vocal music.

A249. Percussion Ensemble

(2) NATHAN

A249. Percussion Ensemble

(2) NATHAN

A253. Viola Orchestral Repertoire

(2) CALLUS

Prerequisite: by audition.

May be repeated for credit to a maximum of

36 units. Letter grade required for majors, optional grading for non-majors.

The study of the entire standard orchestral repertoire for viola and audition procedures.

A270AA-ZZ. Ethnomusicology Performance Ensemble

(2) STAFF

Prerequisite: enrollment by audition with the exception of Music A270J.

May be repeated for credit.

Group performance of music from selected world cultures:

A. Ethno Ensemble - American Folk Music

I. Indian Music

J. Beginning Gamelan

K. Advanced Gamelan

M. Middle East Ensemble

N. Middle East Chorus

V. Gospel Choir

Courses in natural science provide a survey of important concepts in the natural sciences and their technical and social implications. A special sequence 1A-B-C sequence is sponsored jointly by the Departments of Ecology, Evolution, and Marine Biology; Molecular, Cellular, and Developmental Biology; and Physics.

These courses are not generally open for credit to students who have completed a college-level course in the biological or physical sciences; exceptions can be made only with consent of the instructor and approval of the provost.

Natural Science Courses

LOWER DIVISION

Courses are not generally open to students who have completed a college level course in the biological or physical sciences. Exceptions can be made with consent of the instructor and approval of the provost.

1A. Contemporary Natural Science—Physics

(4) STAFF

Not open for degree credit for students who have completed Physics 1, 6A, or 10. Lecture, 3 hours; discussion, 1 hour.

Modern description of matter from the scale of the universe to the scale of subatomic particles. Focus on concepts of order, simplicity, and beauty of nature at a fundamental level. Basically descriptive; some familiarity with high-school algebra is useful. (F)

Faculty

C. Anthony Anderson, Ph.D., UC Los Angeles, Professor (logic, metaphysics, epistemology)

Anthony Brueckner, Ph.D., UC Los Angeles, Professor (epistemology, philosophy of language, metaphysics, Kant)

Kevin Falvey, Ph.D., University of Minnesota, Associate Professor (philosophy of mind, philosophy of language)

Matthew Hanser, Ph.D., UC Los Angeles, Professor (ethics, theory of action, philosophy of mind)

Thomas Holden, Ph.D., University of North Carolina at Chapel Hill, Associate Professor (history of modern philosophy, metaphysics, epistemology)

Christopher McMahon, Ph.D., University of Pittsburgh, Professor (moral philosophy, political and social philosophy)

Michael Rescorla, Ph.D., Harvard University, Assistant Professor (philosophy of language, philosophy of mind, logic, philosophy of science)

Nathan Salmon, Ph.D., UC Los Angeles, Professor (philosophy of language, philosophy of logic, metaphysics)

Voula Tsouna, Ph.D., Université de Paris X, Professor (ancient philosophy)

Burleigh T. Wilkins, Ph.D., Princeton University, Professor (philosophy of history, political philosophy, philosophy of law)

Aaron Zimmerman, Ph.D., Cornell University, Associate Professor (epistemology, philosophy of mind, moral psychology, action theory)

Emeriti Faculty

Donald W. Crawford, Ph.D., University of Wisconsin, Madison, Professor Emeritus (aesthetics, environmental aesthetics, 18th-century philosophy)

Francis W. Dauer, Ph.D., Harvard University, Professor Emeritus (epistemology, Hume, philosophical psychology)

Herbert Fingarette, Ph.D., UC Los Angeles, Professor Emeritus (philosophy of psychology, philosophy of law, Chinese philosophy)

Noel Fleming, D. Phil., Oxford University, Professor Emeritus (philosophy of mind, history of philosophy, aesthetics)

J. William Forgie, Ph.D., Cornell University, Professor Emeritus (philosophy of religion, epistemology, Wittgenstein)

Alexander Sesonske, Ph.D., UC Los Angeles, Professor Emeritus (aesthetics/film, ethics, classical philosophy, philosophy of language)

Affiliated Faculty

Robert Renehan, Ph.D., Harvard University, Professor Emeritus and Research Professor (Classics Department)

Philosophy deals with the kinds of questions that engage all reflective people, but which seemingly cannot be dealt with by any of the empirical sciences: Is everything material? Is human behavior determined or is free choice possible? Are there objective standards for deciding what is right and wrong, or is morality merely a subjective matter, a matter of individuals' feelings? Is there a moral obligation to obey the law? Can we justify our claims to know anything? Can we objectively distinguish rational from irrational beliefs? How does language relate to the world?

The study of philosophy encourages rigorous and disciplined habits of mind. Because the major in philosophy emphasizes and enhances analytical skills, it is useful for the large number of careers that require these skills or as general humanistic training at the undergraduate level. Two concentrations within the major accommodate differences in student needs and interests and reflect the two central concerns of philosophy. (1) The Core Philosophy concentration is designed for students who seek thorough training in philosophy, either as a way of acquiring reasoning and analytical skills and mastering a discipline at the undergraduate level or as preparation for graduate study. (2) The Ethics and Public Policy concentration focuses on moral and legal problems confronting the community and on the responsibilities of various professions. It is intended for a wide variety of students, including those who plan careers in law, the public sector, or medicine.

Students with a bachelor's degree in philosophy who are interested in pursuing a California Teaching Credential should contact the credential advisor in the Graduate School of Education as soon as possible.

Undeclared students should consult with the department undergraduate advisor. Two faculty advisors and one staff advisor in the department have authority on matters such as substitutions and exceptions. The Information Sheet for Undergraduate Philosophy Majors is available in the department office; a list of courses to be offered each quarter, with specific descriptions and required texts, is available in the office and on the website before registration at: www.philosophy.ucsb.edu.

Prizes and Awards

Each academic year, one or more Ralph W. Church undergraduate fellowships may be awarded for outstanding scholarship in philosophy. To be eligible for this award a student must be a philosophy major and complete a minimum of 16 upper-division units in philosophy at UCSB. This fellowship is based on academic merit. During spring quarter the department recognizes the outstanding graduating senior by awarding the Harry Girvetz Memorial Prize. This award is included in the commencement program.

Senior Honors Program

Students who meet either of the following requirements may apply to join the Philosophy Department honors program:

1. Membership in the Letters and Science Honors Program.
2. Completion of at least 12 units of philosophy at UCSB, a philosophy grade point average of 3.5 or better, and an overall grade-point average of 3.3 or better.

Students are urged to apply as early as possible so that a meaningful honors curriculum can be developed at an early stage of their work in the major. Students in the honors program are expected to meet quarterly with the undergraduate advisor to discuss their progress and to plan their subsequent coursework in philosophy; in order to remain in the honors program, students are normally expected to maintain a 3.5 GPA in philosophy.

In order to graduate with distinction in philosophy, the following requirements must be met:

1. Be a member in good standing in the Philosophy Department honors program for at least the last three quarters prior to graduation.
2. Completion of at least two upper-division philosophy honors courses to be contracted by petition between the honors student and the instructor.
3. Completion of a senior thesis that is judged to be of honors quality by the thesis supervisor.

Undergraduate Program

Bachelor of Arts—Philosophy

The philosophy major requires a total of 48 units, at least 36 of which must be upper-division, distributed according to one of the following two concentrations. (The concentration completed will not be acknowledged on the student's transcript or diploma.) All courses to be applied to the major must be completed for a letter-grade.

Core Philosophy Concentration

Either Philosophy 3 or 183 is required. (Phi-

losophy 183 applies to the 36 upper-division units required.)

Recommended preparation for the major:

Philosophy 20A-B-C (4 units of this may be substituted for one course listed in upper-division Requirement B below but the units will not count toward the 36 upper-division units required).

Upper-division major. At least 36 upper-division units in philosophy, which must include:

- A. Three courses from Philosophy 100A-B-C-D-E-F, 116;
- B. Three courses from Philosophy 151, 152, 153, 156, 160, 161, 162, 163, 164, 165, 166A, 176;
- C. Additional philosophy electives to total 36 upper-division units, and 48 philosophy units for the major. Four units may be applied from another department, subject to the approval of the undergraduate advisor.

Students preparing for graduate study are encouraged to supplement this program with additional courses in individual historical figures and/or courses from Philosophy 150A-E and 184.

Ethics and Public Policy Concentration

Either Philosophy 3 or 183 is required. (Philosophy 183 applies to the 36 upper-division units required.)

Recommended preparation for the major: Philosophy 4, 6, or 7.

Upper-division major. At least 36 upper-division units in philosophy, which must include:

- A. Philosophy 100A;
- B. One course from Philosophy 100B-C-D-E-F, 116;
- C. At least four courses from Philosophy 108, 121, 122, 126, 129, 131, 133, 134, 138, 139, 140, 141, 143, 144, 145, 150A, 188;
- D. Additional philosophy electives to total 36 upper-division units and 48 philosophy units for the major. Up to 8 units may be applied from another department, subject to the approval of the undergraduate advisor.

Minor—Philosophy

The philosophy minor requires a total of 24 units, at least 20 of which must be upper-division, with courses distributed according to the two options outlined below. All courses to be applied to the minor must be completed for a letter-grade.

Either Philosophy 3 or 183 is required. (Philosophy 183 applies to the 20 upper-division units required.)

Upper-division minor. Three courses (12 units) from option A or B:

Option A. Two courses from Philosophy 100A-B-C-D-E-F, 116, and one course from Philosophy 20A-B-C (will not count as upper-division units), 151, 152, 153, 156, 160, 161, 162, 163, 164, 165, 166A, 176

Option B. Three courses from Philosophy 100A, 108, 121, 122, 126, 129, 131, 133, 134, 138, 139, 140, 141, 143, 144, 145, 150A, 188. Additional philosophy electives to total 20 upper-division units, and 24 philosophy units.

Note: Substitutions and waivers are subject to approval by the Chair of the department or the Director of Undergraduate Studies of the depart-

ment. Please see page 118 for special conditions governing Minors in the College of Letters and Science.

Graduate Program

In addition to departmental requirements, candidates for graduate degrees must fulfill the university requirements described in the chapter "Graduate Education at UCSB."

Admission

In addition to fulfilling the departmental requirements for admission, applicants must also meet the university requirements for admission described in the chapter "Graduate Education at UCSB." The applicant for admission to the Ph.D. program in philosophy should have completed an undergraduate philosophy major, or a sufficiently close equivalent in the judgment of the graduate admissions committee. Exceptions are occasionally made for outstanding students. A full description of the Ph.D. program is available from the department office, or at: www.philosophy.ucsb.edu

Master of Arts—Philosophy

The graduate program in philosophy is a Ph.D. program. Only in special circumstances will the department accept students whose aim is limited to earning the M.A. degree. However, provision is made within the Ph.D. program for awarding the M.A. degree when the student has demonstrated the requisite level of competence.

To be awarded the M.A. degree, the student must complete the course requirements listed under the Ph.D. program below, and either write an acceptable M.A. thesis or pass a comprehensive examination. Information about the thesis and examination options is available from the department graduate advisor.

Doctor of Philosophy—Philosophy

Course and seminar requirement. A total of fourteen graduate courses and seminars must be taken (for letter grades, not S/U). Each course is valued at 4 units giving a total unit requirement of 56 units. These courses must be distributed as follows:

- Philosophy 284G (Intermediate Modern Logic);
- At least five seminars;
- At least three courses in the history of philosophy;
- At least three courses chosen from metaphysics, epistemology, the philosophy of mind, and the philosophy of language;
- At least two courses from ethics, social and political philosophy, and value theory (broadly construed).

Requirements C-E may be satisfied by either graduate seminars or lecture courses; however, a given course may only be used to satisfy one area. A student may be exempted from requirement (A) by passing an examination (given only at the time of entrance into the Ph.D. Program) designed to demonstrate training in logic equivalent to that provided by 283G and 284G. A maximum of one independent study course (Philosophy 596) may count towards the fourteen-course requirement provided that

the content of the independent study does not significantly overlap the content of any other course used to satisfy the fourteen-course requirement. Undergraduate courses cannot be used to fulfill the course requirements. Details on the distribution requirements and the deadline for the completion of the course requirements are available from the department.

Qualifying paper. A student must write a successful qualifying paper of at most 10,000 words. The paper is to be an original work and should present a philosophical thesis and defend it by argument. A successful qualifying paper is a paper that is judged by a majority of the faculty to demonstrate the ability to write a successful dissertation. The faculty will meet at the end of each term to evaluate the papers submitted that term. To be eligible for consideration in a given term, a paper must be submitted by the end of the ninth week of the term. Any paper written while its author was a student in the graduate program may be submitted as a qualifying paper, and the paper may be submitted at any time after enrolling. However, a student is allowed no more than two submissions. A student whose qualifying paper is passed, and who has satisfied the Graduate Division requirements for the M.A., will be awarded the M.A. degree. Deadlines for the paper and other details of the requirement, such as the possibility of submitting a second paper if the first one is failed, are available from the department.

Oral examination. The final step in advancement to candidacy is successful completion of an oral qualifying examination. Information about the nature and scheduling of the oral exam is available from the department.

Dissertation. Satisfactory completion of a dissertation, including an oral defense, is required.

Philosophy Courses

LOWER DIVISION

1. Short Introduction to Philosophy

(4) STAFF
An introductory course in western philosophy. (F,W,S)

3. Critical Thinking

(4) STAFF
Practical reasoning, argumentation, and the analysis of language as instruments of sound thinking in everyday life. (F,W,S)

4. Introduction to Ethics

(4) STAFF
An examination, at an introductory level, of such ethical issues as: why be moral, moral relativism, the nature of virtues and vices; and possibly consideration of practical ethical problems such as abortion or war.

6. Professional and Business Ethics

(4) STAFF
Studies important ethical problems that arise in modern professions and business practice in light of traditional theories in moral and political philosophy. Issues such as medical ethics, ethics in law, codes of conduct for business, preferential treatment of minorities, and responsibility to the environment are studied in light of such theories as utilitarian and deontological moral theories, Classical, Liberalism, and Marxism.

7. Biomedical Ethics

(4) STAFF
An examination of philosophical thinking about moral issues raised by the practice of medicine. Traditional ethical theories and problems will serve as

background to, and in turn be illuminated by, such issues as informed consent, paternalism, abortion, euthanasia, and genetic engineering.

12. Introduction to the Philosophy of Religion

(4) ANDERSON, FORGIE

An introduction to several traditional philosophical problems connected with religious belief.

20A-B-C. History of Philosophy

(4-4-4) STAFF

- From Thales to Aristotle.
- From Medievals to Rationalists.
- From the Empiricists to Kant.

UPPER DIVISION

With the exception of Philosophy 130, 143, 145, and 183, at least one prior course in philosophy or consent of instructor is required for upper-division courses. See individual course prerequisites for more specific information.

100A. Ethics

(4) HANSER, MCMAHON

Prerequisite: one prior course in philosophy; or Philosophy 3 (may be taken concurrently).

An examination of the fundamental concepts, theories, and problems of moral or political philosophy.

100B. Theory of Knowledge

(4) RESCORLA, ZIMMERMAN

Prerequisite: one prior course in philosophy.

Recommended preparation: Philosophy 3 or 183.

Investigates fundamental questions surrounding the nature of human knowledge and human justification, such as: What do I know? What am I justified in believing? What is it to know something? What is it to hold a justified belief?

100C. Philosophy of Language

(4) BRUECKNER, FALVEY, SALMON

Prerequisite: one prior course in philosophy.

Recommended preparation: Philosophy 3 or 183.

Introduction to philosophical problems and theories concerning the nature of language. Topics typically include the notion of linguistic structure, theories of meaning and reference, names and descriptions, the relations between language and thought, necessity and analytic truth, and conversational norms.

100D. Philosophy of Mind

(4) BRUECKNER, RESCORLA, ZIMMERMAN

Prerequisite: one prior course in philosophy.

Recommended preparation: Philosophy 3 or 183.

A discussion of some central questions about the mind: Are people identical to their bodies? What is it to feel, believe or desire something? What distinguishes intelligent thinking from a computer's activities? What is the connection between language and thought?

100E. Metaphysics

(4) ANDERSON, BRUECKNER, FALVEY

Prerequisite: one prior course in philosophy.

Recommended preparation: Philosophy 3 or 183.

Introduction to the philosophical study of the most general and fundamental features of reality. Topics vary, but may include universals, particulars, identity and individuation, substance, the nature of persons, causation, and the nature of time.

100F. Introduction to the Philosophy of Science

(4) RESCORLA

Prerequisite: one prior course in philosophy; or a major in physics, chemistry, or biology.

An introduction to the philosophical analysis of the concepts and methods of science, treating such topics as: explanation, confirmation, causation, scientific laws, the interpretation, meaning and reference of scientific theories, theory reduction and theory change, and scientific revolutions.

102A-B. Applied Analytical Reasoning

(4-4) FORGIE

Prerequisite: Philosophy 3.

- The development of skills in analyzing material drawn from a variety of philosophical and nonphilosophical concerns. Emphasis will be

placed on disambiguating hidden ambiguities, making relevant distinctions, abstracting the central issues, and the analysis of increasingly complex arguments.

- B. The study and application of specialized forms of reasoning such as legal reasoning, reasoning concerning means and ends, reasoning involved in problem-solving situations, and scientific and inductive reasoning.

108. Philosophy of Social Sciences

(4) FALVEY, MCMAHON

Prerequisite: one prior course from Philosophy 100B-C-D-E; or two prior upper-division philosophy courses.

Questions and problems in the methodology of the social sciences, including whether the social sciences have distinctive methods of explanation; models of rationality employed in the social sciences; and whether the social sciences can or should be value-neutral.

112. Philosophy of Religion

(4) ANDERSON, FORGIE

Prerequisite: one prior course in philosophy.

A study of some of the following topics: religious language, the existence and nature of God, the problem of evil, religious experience, religion and morality, the rationality of religious belief.

116. Meaning and Reference

(4) SALMON

Prerequisite: Philosophy 183 (may be taken concurrently).

An examination of the classical theories of meaning and reference: John Stuart Mill, Gottlob Frege, Bertrand Russell, and the theory of direct reference. Investigation of solutions to the classical puzzles of meaning and reference.

121. Political Philosophy

(4) WILKINS

Prerequisite: a major in philosophy, law & society, political science, or global and international studies.

Analysis of fundamental political conceptions; the state, sovereignty, political obligation, natural rights, natural law, etc.

122. Theories of Justice

(4) WILKINS

Prerequisite: a major in philosophy, law & society, political science, or global and international studies.

An examination, in detail, of one or more influential philosophical theories of justice.

124A. Philosophy of Science

(4) STAFF

Prerequisite: a prior course in philosophy.

May be repeated for credit up to 8 units with consent of instructor.

Recommended preparation: a strong background in science.

What is science? How does it differ from non-science? Course examines both the history of science and the history of philosophy of science in an effort to discover just what science is and what it has to offer.

124B. Philosophy of Physics

(4) STAFF

Prerequisite: a prior course in philosophy.

May be repeated for credit up to 8 units with consent of instructor.

Recommended preparation: a strong background in physics.

Emphasizes the role that philosophical considerations played in both the evolution and actual practice of science. The major emphasis is on the creation and development of the watersheds of twentieth-century physics: relativity and quantum mechanics.

124C. Philosophy of Space and Time

(4) STAFF

Prerequisite: a prior course in philosophy.

May be repeated for credit up to 8 units with consent of instructor.

Recommended preparation: a strong background in physics.

Is space a thing or a series of relations holding between objects? Does time pass differently for different observers, or in different parts of the universe? Consideration of these and other questions lead to an examination of contemporary physics.

124D. Philosophy of Quantum Mechanics

(4) STAFF

Prerequisite: a prior course in philosophy.

May be repeated for credit up to 8 units with consent of instructor.

Recommended preparation: a strong background in physics.

Examines the history of the development of quantum mechanics, focusing on the philosophical conundrums that arose from the tortured process of finding a theory that "worked." This is done at the conceptual level, with minimal reliance on mathematical techniques.

126. Social Philosophy

(4) MCMAHON

Prerequisites: Philosophy 100A; or, two prior courses in philosophy.

This course examines moral problems associated with economic activity; for example, economic justice and the moral basis of property rights.

129. Philosophy of International Relations

(4) HOLDEN, WILKINS

Prerequisite: a major in philosophy, law & society, political science, or global and international studies.

Study of philosophical problems in international relations.

130. Freedom and Determinism

(4) BRUECKNER

Prerequisite: one prior course in philosophy.

For nonmajors and majors.

Determinism is the doctrine that the laws of nature plus the past necessitate the future. Is determinism compatible with the view that we often act freely and are often morally responsible for what we do?

131. Advanced Topics in Applied Ethics

(4) HANSER, HOLDEN

Prerequisite: Philosophy 100A; or two prior courses in philosophy.

133. History of Political Thought

(4) HOLDEN, MCMAHON, WILKINS

Prerequisite: a major in philosophy, law & society, political science, or global and international studies.

A study of one or more important figures from the history of political thought.

134. Moral Psychology

(4) FALVEY, ZIMMERMAN

Prerequisites: Philosophy 4 or 100A; and Philosophy 100B or 100C or 100D or 100E.

An examination of the nature of desires, emotions, the imagination and other aspects of human psychology, and of the ways these bear on the moral evaluation of people and actions.

135. Contemporary Philosophy

(4) SALMON, MCMAHON

Prerequisite: Philosophy 100B or 100D or 100E.

Systematic investigation of topics drawn from contemporary analytic or continental philosophy.

137. Aesthetic Theory

(4) MCMAHON

Prerequisite: one prior course in philosophy.

A study of some major works in the philosophy of art from Plato to the present, with emphasis on the development and analysis of the basic concepts employed in criticism of the arts.

138. Normative Ethics

(4) HANSER, MCMAHON

Prerequisite: Philosophy 100A; or two prior courses in philosophy.

May be repeated for credit to a maximum of 8 units.

An examination of what makes actions morally right or wrong and people morally good or bad.

139. Meta-ethics

(4) ANDERSON, HANSER

Prerequisite: Philosophy 100A; or two prior courses in philosophy.

May be repeated for credit to a maximum of 8 units.

An examination of problems concerning the meaning and justification of moral judgments.

140. History of Ethics: Ancient

(4) STAFF

Prerequisite: Philosophy 100A; or two prior courses in philosophy.

A study of one or more important moral philosophers from the ancient period.

142. Advanced Topics in Philosophy of Religion

(4) ANDERSON, FORGIE

Prerequisites: Philosophy 112, or two prior upper-division courses in philosophy; and one additional course in philosophy.

May be repeated to a maximum of 8 units with the consent of the instructor.

Advanced topics in the philosophy of religion. Specific subject matter is selected by the instructor and descriptions are available in the department office before each quarter.

143. Philosophy of Law

(4) HOLDEN, WILKINS

An introduction to some of the main issues generated by the philosophical question, "What is Law?" In what sense is conduct made obligatory by the existence of law? What, if any, is the relationship between law and morals? What are rules? What does it mean to say that a rule exists? Do courts really apply rules or merely pretend to do so?

144. Advanced Topics in the Philosophy of Law

(4) WILKINS

Prerequisite: a major in philosophy, law & society, political science, or global and international studies.

Study of advanced topics in the philosophy of law.

145. Punishment and Responsibility

(4) WILKINS

An examination of some of the philosophical problems of punishment and responsibility: the rationale of punishment and the legal doctrine of *mens rea*; the analysis of conditions of responsibility, relations between punishment, responsibility, retribution, guilt, shame, etc.

149. Action Theory

(4) FALVEY, HANSER, MCMAHON, ZIMMERMAN

Prerequisites: one prior course from Philosophy 100B-C-D-E; or, two prior courses in philosophy.

May be repeated for credit to a maximum of 8 units.

An examination of philosophical topics connected with human action, e.g., the role of intentions and desires in the explanation and justification of action and the nature of practical reason.

150A. Advanced Topics in Ethical Theory

(4) MCMAHON, HANSER

Prerequisite: Philosophy 100A or 100B or 100C or 100D or 100E or 100F.

May be repeated for credit to a maximum of 12 units with consent of instructor.

Advanced topics in ethical theory. Specific subject matter is selected by the instructor and descriptions are available in the department office before each quarter.

150B. Advanced Topics in Theory of Knowledge

(4) BRUECKNER

Prerequisite: Philosophy 100A or 100B or 100C or 100D or 100E or 100F.

May be repeated for credit to a maximum of 8 units with consent of instructor.

Advanced topics in theory of knowledge. Specific subject matter is selected by the instructor and descriptions are available in the department office before each quarter.

150C. Advanced Topics in Philosophy of Language

(4) SALMON, FALVEY

Prerequisite: Philosophy 100A or 100B or 100C or 100D or 100E or 100F.

May be repeated up to 8 units with consent of instructor.

Specific subject matter selected by the instructor. Descriptions available in the department office before each quarter.

150D. Advanced Topics in Philosophy of Mind

(4) FALVEY, FORGIE

Prerequisite: Philosophy 100A or 100B or 100C or 100D or 100E or 100F.

May be repeated up to 8 units with consent of instructor.

Advanced topics in philosophy of mind. Specific subject matter is selected the instructor and descriptions are available in the department office before each quarter.

150E. Advanced Topics in Metaphysics

(4) BRUECKNER, FORGIE, SALMON

Prerequisite: Philosophy 100A or 100B or 100C or 100D or 100E or 100F.

May be repeated up to 8 units with consent of instructor.

Advanced topics in metaphysics. Specific subject matter is selected by the instructor and descriptions are available in the department before each quarter.

151. Pre-Socratics

(4) HANSER, TSOUNA

Prerequisites: a prior upper-division course in philosophy and one additional course in philosophy.

A study of the pre-Socratic philosophers.

152. Plato

(4) TSOUNA

Prerequisites: a prior upper-division course in philosophy and one additional course in philosophy.

The philosophy of Plato.

153. Aristotle

(4) HANSER, TSOUNA

Prerequisites: a prior upper-division course in philosophy and one additional course in philosophy.

The philosophy of Aristotle.

156. Hellenistic Philosophy

(4) TSOUNA

Prerequisites: a prior upper-division course in philosophy and one additional course in philosophy.

An examination of the thought of major Greek philosophers of the Hellenistic period.

160. Descartes

(4) FORGIE, HOLDEN

Prerequisite: Philosophy 20B or 100B or 100D or 100E.

162. Leibniz

(4) ANDERSON

Prerequisite: Philosophy 100B or 100D or 100E.

163. Locke

(4) HOLDEN

Prerequisite: Philosophy 20B or 100B or 100D or 100E.

164. Berkeley

(4) HOLDEN

Prerequisite: Philosophy 20B or 100B or 100D or 100E.

165. Hume

(4) HOLDEN

Prerequisites: a prior upper-division course in philosophy and one additional course in philosophy.

The philosophy of David Hume.

166A. Kant

(4) HOLDEN, BRUECKNER

Prerequisites: two prior courses from Philosophy 20B, 100B-D-E, or 160.

An examination of the philosophy of Kant with special attention to the *Critique of Pure Reason*.

170. Wittgenstein

(4) FALVEY, FORGIE

Prerequisite: Philosophy 100B or 100C or 100D or 100E.

The philosophy of Wittgenstein.

173. Frege

(4) RESCORLA

Prerequisite: Philosophy 183 and another previous course in philosophy.

An examination of the work of the German philosopher and logician, Gottlob Frege.

174. Early Analytic Philosophy

(4) HANSER, SALMON

Prerequisite: Philosophy 100B or 100C or 100D or 100E.

May be repeated for credit to a maximum of 8 units.

A study of one or more major philosophers from the early stages of the analytic tradition (e.g. Frege, Moore, Russell, Wittgenstein, and the logical positivists.)

176. Historical Philosophers

(4) HOLDEN

Prerequisite: Philosophy 100A or 100B or 100D or

100E.

May be repeated with consent of department provided course content is different.

Examination of historical philosophers beyond those covered in Philosophy 106 and 151-166.

180. Philosophical Psychology

(4) HANSER

Prerequisite: a prior upper-division course in philosophy.

An examination of some of the concepts of the mind such as those of desire, intention, action, perception, sensation, and the unconscious.

183. Beginning Modern Logic

(4) SALMON

An introduction to the concepts and methods of modern symbolic logic. Emphasis is placed on problems of translating English expressions into logical symbols and on the development of skills in using the formal proof procedures of sentential and predicate logic.

184. Intermediate Modern Logic

(4) SALMON

Prerequisite: Philosophy 183.

Further application and development of the predicate calculus, including the calculi of identity and description. An introduction to the metalogical questions of completeness, consistency, and decidability.

185. Advanced Modern Logic

(4) ANDERSON, FALVEY

Prerequisite: Philosophy 184 or Mathematics 109A.

Topics from the theory of formal systems, set theory, recursive function theory, and automata theory.

186. Philosophical Logic

(4) ANDERSON, SALMON

Prerequisite: Philosophy 184.

May be repeated for credit to a maximum of 8 units.

Topics in logical theory and the philosophy of logic: intensional logics and other non-standard logics (such as modal logic); discussion of results of modern logic and their philosophical implications.

187. Philosophy of Mathematics

(4) ANDERSON, RESCORLA

Prerequisite: Philosophy 183 or Mathematics 108A.

Logistic, formalist, and intuitionist views of the nature of mathematics. Epistemological problems of applied mathematics.

188. Theory of Value

(4) ANDERSON

Prerequisite: a prior course in philosophy.

Study of theories of the nature and structure of the good and of value judgments generally.

192. Internship in Philosophy

(1-12) STAFF

Prerequisite: upper-division standing in philosophy; consent of instructor and department.

Students must have a 3.0 overall grade-point average. May be repeated for credit to a maximum of 12 units but only 4 units may count toward the major.

Practical experience and application of analytical and ethical skills learned in philosophy as interns with agencies and business. Periodic and final reports required under faculty direction.

197A-B. Senior Honors Thesis

(2-2) STAFF

Prerequisites: senior philosophy majors, by consent of instructor, and departmental approval.

A continuous two-quarter research and writing tutorial designed for senior honors majors. The first term will be spent mainly in selecting and researching a topic for the thesis. The second term will be spent mainly in the writing of the thesis. (W,S)

197P. Senior Project for Majors with Ethics and Public Policy Emphasis

(2-4) STAFF

Prerequisites: upper-division standing in philosophy and consent of department.

May be repeated up to 8 units with consent of instructor.

A research and writing tutorial in some topic relevant to issues in ethics and public policy. A written proposal of the project must be approved by the

undergraduate advisor and the instructor.

199. Independent Studies in Philosophy

(1-5) STAFF

Prerequisites: upper-division standing; completion of two upper-division courses in philosophy.

Students must have a minimum 3.0 grade-point average for the preceding three quarters and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined. Philosophy 199 may be repeated to a maximum of 12 units. No more than 12 units may be applied to the major.

Written statement of the proposed program of study must be presented to the instructor for his or her approval before the student signs up for the course. (F,W,S)

199RA. Independent Research Assistant

(1-5) STAFF

Prerequisite: upper-division standing.

Students must enroll under instructor number and have a minimum 3.0 grade-point average for the preceding three quarters. Students are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined. Philosophy 199RA may be repeated for credit to a maximum of 5 units

Course work shall consist of faculty supervised research.

GRADUATE COURSES

Graduate standing is a prerequisite for all graduate courses. All graduate seminars (with the exception of Philosophy 200) may be repeated for credit with consent of instructor, and may be taken for 1 to 4 units of credit as determined by consultation with the instructor. Specific topics for seminars will be available at the department office at the time registration counseling begins.

208G. Philosophy of the Social Sciences

(4) FALVEY, MCMAHON

Questions and problems in the methodology of the social sciences, including whether the social sciences have distinctive methods of explanation; models of rationality employed in the social sciences; and whether the social sciences can or should be value-neutral.

212G. Philosophy of Religion

(4) ANDERSON, FORGIE

Study at the graduate level of topics in the philosophy of religion.

216G. Meaning and Reference

(4) SALMON

An examination of the classical theories of meaning and reference: John Stuart Mill, Gottlob Frege, Bertrand Russell, and the theory of direct reference. Solutions to the classical puzzles of meaning and reference are investigated.

221G. Political Philosophy

(4) WILKINS

222G. Theories of Justice

(4) WILKINS

A study at the graduate level of an examination, in detail, of one or more influential philosophical theories of justice.

224A. Philosophy of Science

(1-4) STAFF

What is science? How does it differ from non-science? Course examines both the history of science and the history of philosophy of science in an effort to discover just what science is and what it has to offer.

224B. Philosophy of Physics

(1-4) STAFF

Emphasizes the role that philosophical considerations played in both the evolution and actual practice of science. The major emphasis is on the creation and development of the watersheds of twentieth-century physics: relativity and quantum mechanics.

224C. Philosophy of Space and Time**(1-4) STAFF**

Is space a thing or a series of relations holding between objects? Does time pass differently for different observers, or in different parts of the universe? Consideration of these, and other questions leads to an examination of contemporary physics.

224D. Philosophy of Quantum Mechanics**(1-4) STAFF**

Examines the history of the development of quantum mechanics, focusing on the philosophical conundrums that arose from the tortured process of finding a theory that “worked.” This is done at the conceptual level, with minimal reliance on mathematical techniques.

226G. Social Philosophy**(4) MCMAHON**

A study at the graduate level of moral problems associated with economic activity, for example, economic justice and the moral basis of property rights.

229G. Philosophy of International Relations**(4) HOLDEN, WILKINS**

Prerequisite: graduate standing.

The study of philosophical problems in international relations.

230G. Freedom and Determinism**(4) BRUECKNER**

A study at the graduate level of the problem of whether human action is free or determined.

231G. Advanced Topics in Applied Ethics**(4) HANSER, HOLDEN****233G. History of Political Thought****(4) HOLDEN, MCMAHON, WILKINS**

A study of one or more important figures from the history of political thought.

234G. Moral Psychology**(4) FALVEY, ZIMMERMAN**

An examination of the nature of desires, emotions, the imagination, and other aspects of human psychology, and of the ways these bear on the moral evaluation of people and actions.

235G. Contemporary Philosophy**(4) SALMON, MCMAHON**

A study at the graduate level of selected topics in contemporary philosophy.

237G. Aesthetic Theory**(4) STAFF**

A study at the graduate level of the development and analysis of the basic concepts employed in criticism of the arts.

238G. Normative Ethics**(4) HANSER, MCMAHON**

An examination of what makes actions morally right or wrong and people morally good or bad.

239G. Meta-ethics**(4) ANDERSON, HANSER**

An examination of problems concerning the meaning and justification of moral judgments.

240G. History of Ethics: Ancient**(4) STAFF**

A study of one or more important moral philosophers from the ancient period.

242G. Topics in the Philosophy of Religion**(4) FORGIE, ANDERSON**

A study at the graduate level of topics in the philosophy of religion.

243G. Philosophy of Law**(4) HOLDEN, WILKINS**

An introduction to some of the main issues generated by the philosophical questions, “What is Law?” (1) In what sense is conduct made obligatory by the existence of law? (2) What, if any, is the relationship between law and morals? (3) What are rules? What does it mean to say that a rule exists? Do courts really apply rules or merely pretend to do so?

244G. Advanced Topics in the Philosophy of Law**(4) WILKINS**

245G. Punishment and Responsibility
(4) WILKINS
An examination of some of the philosophical

problems of punishment and responsibility: the rationale of punishment and the legal doctrine of *mens rea*; the analysis of conditions of responsibility, relations between punishment, responsibility, retribution, guilt, shame, etc.

249G. Action Theory**(4) HANSER, FALVEY, MCMAHON, ZIMMERMAN**

An examination of philosophical topics connected with human action, e.g., the role of intentions and desires in the explanation and justification of action and the nature of practical reason.

250B. Topics in Theory of Knowledge**(4) BRUECKNER****250C. Topics in Philosophy of Language****(4) SALMON, FALVEY****250D. Topics in Philosophy of Mind****(4) FORGIE, FALVEY****250E. Topics in Metaphysics****(4) FORGIE, SALMON, BRUECKNER****251G. Pre-Socratics****(4) HANSER, TSOUNA****252G. Plato****(4) TSOUNA****253G. Aristotle****(4) HANSER, TSOUNA****256G. Hellenistic Philosophy****(4) TSOUNA****260G. Descartes****(4) FORGIE, HOLDEN****262G. Leibniz****(4) ANDERSON****263G. Locke****(4) HOLDEN****264G. Berkeley****(4) HOLDEN****265G. Hume****(4) HOLDEN****266A. Kant****(4) BRUECKNER, HOLDEN****270G. Wittgenstein****(4) FORGIE, FALVEY****273G. Frege****(4) RESCORLA**

An examination of the work of the German philosopher and logician, Gottlob Frege.

274G. Early Analytic Philosophy**(4) HANSER, SALMON**

A study of one or more major philosophers from the early stages of the analytic tradition (e.g. Frege, Moore, Russell, Wittgenstein, and the logical positivists.)

276G. Historical Philosophers**(4) HOLDEN**

May be repeated with consent of department provided course content is different.

Examination of historical philosophers beyond those covered in Philosophy 106 and 151-166.

280G. Philosophical Psychology**(4) HANSER**

A study at the graduate level of selected problems in philosophical psychology.

283G. Beginning Symbolic Logic**(4) SALMON**

An introduction to symbolic logic at the graduate level.

284G. Intermediate Symbolic Logic**(4) SALMON**

A continuation of the study of symbolic logic.

285G. Advanced Symbolic Logic**(4) ANDERSON, FALVEY**

An advanced study of symbolic logic.

286G. Philosophical Logic**(4) ANDERSON, SALMON**

Prerequisites: Philosophy 183 and 184.

Topics in logical theory and the philosophy of logic: intensional logic and other non-standard logics (such as modal logic); discussion of results of modern logic and their philosophical implications.

287G. Philosophy of Mathematics**(4) RESCORLA****288G. Theory of Value****(4) ANDERSON****296A. Seminar in Ethics****(1-4) STAFF**

Prerequisite: graduate standing.

296B. Seminar in Epistemology**(1-4) STAFF**

Prerequisite: graduate standing.

296C. Seminar in the Philosophy of Language**(1-4) STAFF**

Prerequisite: graduate standing.

296D. Seminar in the Philosophy of Mind**(1-4) STAFF**

Prerequisite: graduate standing.

296E. Seminar in Metaphysics**(1-4) STAFF**

Prerequisite: graduate standing.

297A. Seminar in the History of Philosophy**(1-4) STAFF**

Prerequisite: graduate standing.

298A. Seminar in Aesthetics**(1-4) STAFF**

Prerequisite: graduate standing.

299A. Seminar in the Philosophy of Logic**(1-4) STAFF**

Prerequisite: graduate standing.

299C. Seminar in the Philosophy of Science**(1-4) STAFF**

Prerequisite: graduate standing.

Graduate seminar in the philosophy of science.

Specific subject matter is selected by the instructor and descriptions are available in the department office before each quarter.

500. Apprentice Teaching in Philosophy**(2-4) STAFF**

Prerequisite: teaching assistantship in philosophy.

No unit credit allowed toward degree.

A teaching practicum involving the study and development of effective teaching techniques in philosophy. Each student will be responsible for and teach a class section in an undergraduate course in philosophy. One meeting per week with instructor and one or more discussion section meetings, and attendance in the lecture of the assigned course are required.

501. Teaching Assistant Training**(2) STAFF**

Prerequisite: teaching assistant in philosophy.

No unit credit allowed toward degree.

Instructional training. Orientation in professional conduct and responsibilities; observation of student's teaching (in the form of faculty visits or videotaping) and follow-up conferences; discussion of teaching evaluations and workshops on pedagogical problems.

594. Special Topics**(1-4) STAFF**

Prerequisite: consent of instructor.

Special seminar on research subjects of current interest.

596. Directed Reading and Research**(1-12) STAFF**

Prerequisites: graduate student in philosophy; consent of instructor.

A written proposal must be approved by the instructor and the department chair.

597. Individual Study for Master's and/or Ph.D. Examinations for Advancement to Candidacy**(1-12) STAFF**

No unit credit allowed toward degree.

Individual preparation for the doctoral qualifying examination.

599. Ph.D. Dissertation Research and Preparation**(1-12) STAFF**

Physical Activities

This department is now called Exercise and Sport Studies. For faculty, program information, and courses, see Exercise and Sport Studies.

Physics

Department of Physics
Division of Mathematical, Life,
and Physical Sciences

Department Chair: **Mark Srednicki**

Faculty

Guenter Ahlers, Ph.D., UC Berkeley, Professor (experimental condensed matter physics)

S. James Allen, Ph.D., Massachusetts Institute of Technology, Professor (experimental condensed matter physics)

Robert Antonucci, Ph.D., UC Santa Cruz, Professor (observational astrophysics)

David D. Awschalom, Ph.D., Cornell University, Professor (experimental condensed matter physics). Joint appointment with the Department of Electrical and Computer Engineering.

Leon Balents, Ph.D., Harvard University, Professor (theoretical condensed matter physics)

David Berenstein, Ph.D., University of Texas, Associate Professor (theoretical high energy physics)

Lars Bildsten, Ph.D., Cornell University, Professor (theoretical astrophysics)

Omer M. Blaes, Ph.D., International School for Advanced Studies, Trieste, Italy, Professor (theoretical astrophysics)

Frank Brown, Ph.D., Massachusetts Institute of Technology, Associate Professor (theoretical/biophysical chemistry). Joint appointment with the Department of Chemistry and Biochemistry.

Dirk Bouwmeester, Ph.D., University of Leiden, Netherlands, Professor (experimental condensed matter physics)

Claudio F. Campagnari, Ph.D., Yale University, Professor (experimental high energy physics)

David S. Cannell, Ph.D., Massachusetts Institute of Technology, Professor (experimental condensed matter physics)

Jean Carlson, Ph.D., Cornell University, Professor (theoretical condensed matter physics)

Andrew N. Cleland, Ph.D., UC Berkeley, Professor (experimental condensed matter physics)

Wim van Dam, Ph.D., University of Amsterdam and University of Oxford, Assistant Professor (theoretical condensed matter physics). Joint appointment with Computer Science.

Douglas Eardley, Ph.D., UC Berkeley, Professor

(theoretical gravitational physics)

Matthew P. A. Fisher, Ph.D., University of Illinois, Professor (theoretical condensed matter physics)

Roger Freedman, Ph.D., Stanford University, Lecturer with Security of Employment.

Deborah K. Fygenson, Ph.D., Princeton University, Associate Professor (experimental biophysics). Joint appointment with Biomolecular Science and Engineering.

Steve Giddings, Ph.D., Princeton University, Professor (theoretical high energy physics)

David J. Gross, Ph.D., UC Berkeley, Professor, 2004 Physics Nobel Laureate (theoretical high energy physics). Frederick W. Gluck Chair of Theoretical Physics.

Sergei Gukov, Ph.D., Princeton University, Associate Professor (mathematical physics). Joint appointment with the Department of Mathematics.

Carl Gwinn, Ph.D., Princeton University, Professor (observational astrophysics)

Elisabeth G. Gwinn, Ph.D., Harvard University, Professor (experimental condensed matter physics)

Paul K. Hansma, Ph.D., UC Berkeley, Professor (experimental biophysics)

Alan J. Heeger, Ph.D., UC Berkeley, Professor, 2000 Chemistry Nobel Laureate (experimental condensed matter physics). Joint appointment with the Department of Materials.

Gary Horowitz, Ph.D., University of Chicago, Professor (theoretical gravitational physics)

Joseph Incandela, Ph.D., University of Chicago, Professor (experimental high energy physics)

Everett A. Lipman, Ph.D., UC Berkeley, Assistant Professor (experimental biophysics)

Philip M. Lubin, Ph.D., UC Berkeley, Professor (experimental astrophysics)

Andreas W. W. Ludwig, Ph.D., UC Santa Barbara, Professor (theoretical condensed matter physics)

Donald Marolf, Ph.D., University of Texas, Professor (theoretical gravitational physics)

Crystal Martin, Ph.D., University of Arizona, Professor (observational astrophysics)

John Martinis, Ph.D., UC Berkeley, Professor (experimental condensed matter physics). Worster Endowed Chair in Experimental Physics.

David Morrison, Ph.D., Harvard University, Professor (mathematical physics). Joint appointment with the Department of Mathematics.

Harry N. Nelson, Ph.D., Stanford University, Professor (experimental high energy physics)

Siang-Peng Oh, Ph.D., Princeton University, Associate Professor (theoretical astrophysics)

Philip A. Pincus, Ph.D., UC Berkeley, Professor (theoretical biophysics). Joint appointment with the Department of Materials; Biomolecular Science and Engineering.

Joseph G. Polchinski, Ph.D., UC Berkeley, Professor (theoretical high energy physics)

Jeffrey Richman, Ph.D., California Institute of Technology, Professor (experimental high energy physics)

Francesc Roig, Ph.D., University of

Massachusetts, Senior Lecturer with Security of Employment. Joint appointment with the College of Creative Studies.

Joan-Emma Shea, Ph.D., Massachusetts Institute of Technology, Associate Professor (theoretical biophysical chemistry). Joint appointment with the Department of Chemistry and Biochemistry.

Mark Sherwin, Ph.D., UC Berkeley, Professor (experimental condensed matter physics)

Boris Shraiman, Ph.D., Harvard University, Professor (theoretical biophysics)

Mark Srednicki, Ph.D., Stanford University, Professor (theoretical high energy physics)

David Stuart, Ph.D., UC Davis, Associate Professor (experimental high-energy physics)

Tommaso L. Treu, Ph.D., Scuola Normale Superiore, Pisa, Italy, Assistant Professor (observational astrophysics)

Michael Witherell, Ph.D., University of Wisconsin, Professor (experimental high energy physics)

Anthony Zee, Ph.D., Harvard University, Professor (theoretical high energy physics)

Emeriti Faculty

Paul H. Barrett, Ph.D., UC Berkeley, Professor Emeritus

David O. Caldwell, Ph.D., UC Los Angeles, Professor Emeritus and Research Professor

Robert Eisberg, Ph.D., UC Berkeley, Professor Emeritus

José R. Fulco, Ph.D., University of Buenos Aires, Professor Emeritus

James B. Hartle, Ph.D., California Institute of Technology, Professor Emeritus and Research Professor

Daniel W. Hone, Ph.D., University of Illinois, Professor Emeritus

Vincent Jaccarino, Ph.D., Massachusetts Institute of Technology, Professor Emeritus

Walter Kohn, Ph.D., Harvard University, Professor Emeritus and Research Professor, 1998 Chemistry Nobel Laureate

James S. Langer, Ph.D., University of Birmingham, Professor Emeritus and Research Professor

Harold W. Lewis, Ph.D., UC Berkeley, Professor Emeritus

Rollin J. Morrison, Ph.D., University of Illinois, Professor Emeritus

Stanton J. Peale, Ph.D., Cornell University, Professor Emeritus and Research Professor

Raymond F. Sawyer, Ph.D., Harvard University, Professor Emeritus and Research Professor

Douglas J. Scalapino, Ph.D., Stanford University, Professor Emeritus

Glen E. Schrank, Ph.D., UC Los Angeles, Associate Professor Emeritus

Robert Schrieffer, Ph.D., University of Illinois, Professor Emeritus

Robert L. Sugar, Ph.D., Princeton University, Professor Emeritus and Research Professor

William C. Walker, Ph.D., University of Southern California, Professor Emeritus

Affiliated Faculty

Horia I. Metiu, Ph.D., Massachusetts Institute of Technology (theoretical condensed matter physics)

Cyrus R. Safinya, Ph.D. Massachusetts Institute of Technology (Materials)

The physics major provides the foundation for careers in basic and applied physics; in interdisciplinary areas such as astronomy, biophysics, environmental science, oceanography, and scientific instrumentation; and in economics, law, and medicine.

The Department of Physics offers undergraduate programs leading to the B.S. or the B.A. degree, a minor in astronomy and planetary science, and a minor in physics. It also offers a graduate program leading to a Ph.D. in physics. The bachelor of science degree requires a number of electives which may be taken according to the particular aims of the student, after consultation with a faculty advisor. It is designed to provide basic preparation for graduate school in physics, another physical science, or engineering, and for work in industry or a research laboratory. The bachelor of arts degree aims at providing students with a basic knowledge of the physical sciences that can be applied to a career in the natural or behavioral sciences, economics, or to further study in a professional school.

Students are assigned faculty advisors at the beginning of each academic year; it is the student's responsibility to meet with the advisor to plan a major program. Transfer students must consult the appropriate advisor as soon as possible.

Students with a bachelor's degree in physics who are interested in pursuing a California Teaching Credential should contact the credential advisor in the Graduate School of Education as soon as possible.

Research Opportunities

Information regarding research opportunities is available by visiting the website at: www.physics.ucsb.edu/research/. This site lists the faculty and their current research.

Prizes and Awards

The Arnold T. Nordsieck Memorial Prize is awarded each year to an outstanding senior who has demonstrated notable promise in research.

In addition, there is an Outstanding Senior and an Outstanding Teaching Assistant prize awarded annually.

The John Cardy Award is given each year to a first-year graduate student with the strongest performance in the core graduate courses.

Undergraduate Program

Undergraduate advising. Prior to registration for the fall quarter each year, all physics majors must make an appointment with the appropriate faculty advisor. The advisors' names may be obtained at the Department of Physics, Broida Hall 3019, or by calling (805) 893-3888. Before meeting with the advisor, each student must pick up the appropriate B.S./B.A. advising form from the department office. One copy of the form will be given to the student for future

reference; a second copy will remain on file in the department office.

Bachelor of Science—Physics

All courses to be applied to the B.S. major must be completed on a letter-grade basis, with the exception of the following: up to 7 units from the following physics courses may be taken P/NP: Physics 142L, 143L, 144L, 145L, 198, 199.

Preparation for the major. The following courses should be completed in the first two years: Physics 20, 21, 22, 23, 24, 25; and 3L, 4L, 5L (or Physics 13AH, 13BH, 13CH); Mathematics 3A-B-C, 5A-B-C; Chemistry 1A-B (or Chemistry 2A-B). A suggested course schedule for freshmen is available from the undergraduate staff advisor.

Upper-division major. Fifty-six upper-division units are required for the B.S. degree in physics, including Physics 100A, 105A-B, 110A-B, 115A-B-C, 119A, 127AL, and 128AL-BL. Also required are 14 additional units of upper-division physics electives, of which no more than 7 units may be earned in the following courses: Physics 142L, 143L, 144L, 145L, 199. With the consent of the faculty advisor, 4 units of upper-division mathematics, chemistry, EEMB, engineering, geography, geology, or MCDB may be substituted toward the elective requirement. In order to satisfy prerequisites for those courses, which are normally taken in the senior year, students should include 100A, 105A-B, 115A-B and 119A in their junior year program.

Note: All B.S. candidates are required (1) to fulfill the General Education requirements of the College of Letters and Science for the B.S. degree; (2) to have their lower- and upper-division programs approved by the physics faculty advisor during the first quarter in which they have declared their major and subsequently once each year prior to enrollment; and (3) to maintain a C average in the major. Students who do not maintain a grade-point average of 2.0 in upper-division physics courses will be subject to dismissal from the major. (See major requirements section of this catalog.)

Bachelor of Arts—Physics

All courses to be applied to the BA major must be completed on a letter-grade basis, with the exception of the following: up to 7 units from the following physics courses may be taken P/NP: Physics, 142L, 143L, 144L, 145L, 198, 199.

Preparation for the major. The following courses should be completed in the first two years: Physics 20, 21, 22, 23, 24, 25, and 3L, 4L, 5L (or Physics 13AH, 13BH, 13CH); Mathematics 3A-B-C, 5A-B-C; Chemistry 1A-B (or Chemistry 2A-B). A suggested course schedule for freshmen is available from the undergraduate staff advisor.

Upper-division major. Forty-two upper-division units are required for the B.A. degree, including 30 units of upper-division physics courses and 12 units of chemistry, EEMB, engineering, geography, geology, mathematics, MCDB, physics, or electives approved by a faculty advisor. Of the 30 upper-division units in physics, 6 must be upper-division laboratory, chosen from the following courses: Physics 127AL, 127BL, 128AL or 128BL.

Note: All B.A. candidates are required (1) to fulfill the General Education requirements of the College of Letters and Science for the B.A. degree; (2) to have their lower- and upper-division programs approved by the physics faculty advisor during the first quarter in which they have declared their major and subsequently once each year prior to enrollment; and (3) to maintain a C average in the major. Students who do not maintain a grade-point average of 2.0 in upper-division physics courses will be subject to dismissal from the major. (See major requirements section of this catalog.)

Physics Honors

The department provides special opportunities for highly motivated and successful students at both the lower- and upper-division levels, primarily through active involvement in the department's research program. Outstanding sophomores are encouraged to take the Honors Laboratory sequence, Physics 13AH, BH, and CH, that is designed to aid students in making the transition from the classroom to the modern research laboratory. Many students spend the summers following their sophomore and junior years actively engaged in research, either on campus or at another institution. During the senior year, the opportunity to pursue a bachelor's honors thesis is available to students who maintain a grade point average of 3.5 or better, in physics.

Bachelor's Honors Thesis

Students who wish to pursue a bachelor's honors thesis must submit a signed honors thesis proposal form to the undergraduate faculty advisor for approval three quarters before the thesis is submitted. It is recommended that students discuss plans to pursue an honors thesis with their faculty advisor even earlier (e.g. before the beginning of their junior year). Completion of an honors thesis involves developing a research project under the supervision of a faculty member, presenting a public seminar describing the work, and submitting a formal written thesis to the faculty member and the undergraduate advisory committee for grading and approval. Honors thesis work is credited through one of the following courses: Physics 142L, 143L, 144L, 145L, and 199.

Minor—Physics

All courses to be applied to the minor must be completed on a letter-grade basis, with the exception of the following: up to 5 units from the following physics courses may be taken P/NP: 142L, 143L, 144L, 145L, 198, 199.

Preparation for the minor. Physics 1, 2, 3, 4, 5 (or Physics 20, 21, 22, 23, 24, 25); Physics 3L, 4L, 5L (or Physics 13AH, 13BH, 13CH); Mathematics 3A-B-C and 5A-B-C.

Upper-division minor. Eighteen units, distributed as follows: Three UD Physics courses chosen from the following: Physics 100A, 105A-B, 110A-B-C, 115A-B-C or 119A-B.

Note: Substitutions and waivers are subject to approval by the faculty advisor. Please see page 118 for special conditions governing minors in the College of Letters and Science.

Minor—Astronomy and Planetary Science

All courses to be applied to the minor must be completed on a letter-grade basis, with the exception of the following: up to 5 units from the following physics courses may be taken P/ NP: 142L, 143L, 144L, 145L, 198, 199.

Preparation for the minor. 1, 2, 3, 4, 5 (or Physics 20, 21, 22, 23, 24, 25); Physics 3L, 4L, 5L (or Physics 13AH, 13BH, 13CH); Mathematics 3A-B-C and 5A-B-C.

Upper-division minor. Eighteen units, distributed as follows: Physics 132, 133 (note that 132 and 133 are taught every other year in alternating years, and can be taken by students in either order), and 10 units of upper-division electives chosen from: Physics 131, 134, 141, 145L, 198*, 199*; Geology 123, 124G, 159A, 159B, 198*, 199*.

*Project must be approved by the faculty advisor. In addition, no more than 5 units from Physics 198, 199 and geology 198,199, will be accepted toward the minor.

Note: Substitutions and waivers are subject to approval by the faculty advisor. Please see page 118 for special conditions governing minors in the College of Letters and Science.

Graduate Program

In addition to departmental requirements, candidates for graduate degrees must fulfill the university requirements described in the chapter “Graduate Education at UCSB.”

Master of Arts—Physics

The Department of Physics does not offer a terminal M.A. program. Admission is to the Ph.D. program only. Master’s degrees may be awarded only in the case of students who leave the Ph.D. program or for continuing students who have advanced to candidacy and request the M.A. degree.

The requirements for the M.A. are (1) completion of 36 quarter-units of work, with a minimum of 32 units of graduate-level courses and the rest approved by the student’s academic advisory committee; and (2) successful completion of an M.A. examination administered by the student’s graduate advisory committee (successful completion of the advancement to candidacy exam fulfills this requirement).

Doctor of Philosophy—Physics Admission

A candidate for admission to the Ph.D. program must present an undergraduate degree in physics, or its equivalent, and Graduate Record Examination (GRE) scores in the verbal, quantitative, and analytical sections as well as the Advanced Subject in physics. In addition to departmental admission requirements, applicants must also meet the university requirements for admission described in the chapter “Graduate Education at UCSB.” Further information on the graduate program, and a description of current research, can be found at: www.physics.ucsb.edu/.

Degree Requirements

First-year students will be required to pass the

following graduate physics courses with a grade of B or better: Physics 205 (Classical Mechanics), 210A-B (Electromagnetic Theory), 215A-B-C (Quantum Mechanics), and 219 (Statistical Mechanics). The departmental graduate advisor can exempt students from taking a required course, or may require other courses in addition to those listed here. In addition, theoretical physics students must complete a minimum of five advanced graduate courses and experimental physics students must complete a minimum of three advanced graduate courses with a grade of B or better. At least one of these courses must be in an area clearly distinct from the student’s field of specialization—such a determination will be made by the graduate advisor. Exams will include an oral advancement to candidacy exam to be taken during winter quarter of the third year.

The final period of graduate study is primarily directed toward individual research and the preparation of a research-based dissertation. Research, either experimental or theoretical, is conducted under the supervision of a faculty member, normally in an area related to his or her own field of specialization. Students must pass an oral dissertation defense to be awarded the Ph.D.

Astronomy Courses

LOWER DIVISION

1. Basic Astronomy

(4) STAFF

A survey of the development of astronomy with an emphasis on understanding the observable properties of the solar system, the sun and other stars, our own and other galaxies, and the entire universe. Topics of current interest will be discussed as time permits. (F,W,S)

1H. Honors Supplement to Basic Astronomy

(1) STAFF

Prerequisite: honors standing.

A supplement to Astronomy 1 emphasizing fundamental concepts and additional topics in Astronomy. Intended for highly motivated and well prepared students. (F,W,S)

2. History of the Universe

(4) STAFF

Prerequisite: Astronomy 1.

The content will vary with the professor and student interests. Course has included modern extragalactic astronomy and cosmology, quasars, active galactic nuclei, dark matter, gravitational lenses, the early universe, the origins of life, and the possibility of extraterrestrial intelligence. (S)

Physics Courses

LOWER DIVISION

1. Basic Physics

(4) STAFF

Prerequisite: Mathematics 3A.

Not open for credit to students who have completed Physics 21.

Introduction to classical mechanics for students in engineering and the physical sciences. Measurement, units, and foundations of physics; vectors; kinematics; circular motion; forces, mass, and Newton’s laws; center of mass; momentum; work and energy; conservation laws; collisions; rotational kinematics.

2. Basic Physics

(4) STAFF

Prerequisites: Physics 1 and Mathematics 3A-B.

Not open for credit to students who have

completed Physics 22.

Rotational dynamics and angular momentum; equilibrium and elasticity; periodic motion including LRC electrical circuits; gravitation; fluid mechanics; temperature; thermal expansion; heat and the first law of thermodynamics; heat conduction; kinetic theory of gases; entropy and the second law; heat engines.

3. Basic Physics

(3) STAFF

Prerequisites: Physics 2 or 22; and Mathematics 3A-B-C.

Not open for credit to students who have completed Physics 23.

Recommended preparation: Mathematics 5A (may be taken concurrently) and Physics 3L (may be taken concurrently).

Mechanical waves, wave interference and normal modes, sound and hearing, electric field, Gauss’s law, electric potential, capacitance and dielectrics, current, resistance, electromotive force, DC circuits.

3L. Physics Laboratory

(1) STAFF

Prerequisite: Physics 3 or 23 (may be taken concurrently).

Not open for credit to students who have completed Physics 13AH or Physics CS 15A.

Introductory laboratory emphasizing periodic motion, sound and basic electronics.

4. Basic Physics

(3) STAFF

Prerequisites: Physics 3 or 23.

Not open for credit to students who have completed Physics 24.

Recommended preparation: Mathematics 5B (may be taken concurrently) and Physics 4L (may be taken concurrently).

Magnetic fields, electromagnetic induction and inductance, AC circuits, Maxwell’s equations, electromagnetic waves, light and geometrical optics, interference and diffraction.

4L. Physics Laboratory

(1) STAFF

Prerequisite: Physics 4 or 24 (may be taken concurrently).

Not open for credit to students who have completed Physics 13BH or Physics CS 15B.

Introductory laboratory emphasizing magnetism, circuits and optics.

5. Basic Physics

(3) STAFF

Prerequisites: Physics 4 or 24.

Not open for credit to students who have completed Physics 25.

Recommended preparation: Mathematics 5C (may be taken concurrently) and Physics 5L (may be taken concurrently).

Special relativity, blackbody radiation, Compton scattering, photoelectric effect, Bohr model, quantum mechanics, molecules, condensed matter, nuclear physics, elementary particles.

5L. Physics Laboratory

(1) STAFF

Prerequisites: Physics 4 or 24; and, Physics 5 or 25 (may be taken concurrently).

Not open for credit to students who have completed Physics 13CH or Physics CS 15C.

Introductory laboratory emphasizing atomic spectra, diffraction and basic quantum physics.

6A-B-C. Introductory Physics

(3-3-3) STAFF

Prerequisite: Mathematics 3A or 34A (may be taken concurrently - for 6A): Physics 6A with a minimum grade of C- (for 6B): Physics 6B with a minimum grade of C- (for 6C).

Presents concepts and methodologies for understanding physical phenomena, and is particularly useful preparation for upper-division study in the life sciences.

A. Vectors, velocity, acceleration. Newton’s laws. Work and Energy. Linear momentum. Gravity. Static equilibrium. Rotational motion. Angular momentum. (F,W)

B. Oscillatory motion. Vibrations, waves, sound. Fluids. Electrostatics and DC circuits. Magnetism and magnetic forces. Induction and Faraday's law. AC circuits. If time permits: Heat and thermodynamics. (W,S,M)

C. Electromagnetic waves. Geometric optics, optical instruments. Interference and diffraction. Quantum theory of the atom. Nuclear physics. If time permits: special relativity, elementary particle physics. (F,S,M)

6AL. Introductory Experimental Physics

(1) STAFF

Prerequisite: concurrent enrollment in Physics 6A.

Self-directed laboratory course where students seek to discover simple mathematical descriptions to laws governing various physical phenomena. Each student is responsible for deciding what to measure, how to measure it, and what interpretation can be placed on the results. (F,W)

6BL. Introductory Experimental Physics

(1) STAFF

Prerequisite: concurrent enrollment in Physics 6B.

Experiments in the mechanical, electrical, and thermal properties of matter, the behavior of light, and quantum phenomena with application to the biological sciences. (W,S)

6CL. Introductory Experimental Physics

(1) STAFF

Prerequisite: concurrent enrollment in Physics 6C.

Experiments in the mechanical, electrical, and thermal properties of matter, the behavior of light, and quantum phenomena with application to the biological sciences. (F,S)

10. Concepts of Physics

(4) STAFF

Not open for degree credit to students who have completed Natural Science 1A, Physics 1 or 6A. Lecture, 3 hours; discussion, 1 hour.

A survey of important concepts in physics for the nonscience major. The contents will vary depending on the interests of the students and instructor. (W,S)

13AH. Honors Experimental Physics

(3) STAFF

Prerequisites: Physics 3 or 23 (may be taken concurrently).

Not open for degree credit to students who have completed Physics 3L or Physics CS 15A.

Covers the essence of experimental research. Students study three different systems experimentally, and write short Physical Review style articles about the results. Students are responsible for deciding what to measure, how to analyze data, what conclusions can be reached, etc. (F)

13BH. Honors Experimental Physics

(2) STAFF

Prerequisites: Physics 13AH; Physics 4 or 24 (may be taken concurrently).

Not open for degree credit to students who have completed Physics 4L or Physics CS 15B.

Computer control of experiments. Students learn LabView, and use it to measure and generate analog signals using a data acquisition card and a personal computer. Students ultimately use their computers to measure and control the temperature of a copper rod. (W)

13CH. Honors Experimental Physics

(2) STAFF

Prerequisites: Physics 13BH; Physics 5 or 25 (may be taken concurrently).

Not open for degree credit to students who have completed Physics 5L or Physics CS 15C.

Design and construction of apparatus, drafting and computer-aided design. Machine shop practice including use of all major machine tools. The class acts as a team to design and, time permitting, build a scientific apparatus for a campus research group. (S)

20. General Physics

(4) STAFF

Prerequisite: concurrent enrollment in Mathematics 3A.

Open to non-majors. Designed for majors. Not open for credit to students who have completed Physics 1.

Recommended preparation: High school calculus

and high school physics.

Classical mechanics, kinematics, vectors, Newton's laws, work and energy, conservation laws. (F)

21. General Physics

(4) STAFF

Prerequisite: Physics 20 and Mathematics 3A with a grade of C- or better.

Not open for credit to students who have completed Physics 1.

Momentum and collisions, rigid-body rotation. Rotational dynamics, statics, gravitation, periodic motion, fluid mechanics. (W)

22. General Physics

(4) STAFF

Prerequisites: Physics 21 with a grade of C- or better; Mathematics 3A-B.

Not open for credit to students who have completed Physics 2.

Temperature and heat, thermal properties of matter, the laws of thermodynamics, mechanical waves, wave interference and normal modes, sound and hearing. (S)

23. General Physics

(3) STAFF

Prerequisites: Physics 22 with a grade of C- or better; Mathematics 3A-B-C.

Not open for credit to students who have completed Physics 3.

Recommended preparation: Physics 3L or 13AH (may be taken concurrently).

Electric charge and electric field, Gauss's law, electric potential, capacitance and dielectrics, current, resistance, electromotive force, DC circuits. (F)

24. General Physics

(3) STAFF

Prerequisites: Physics 23 with a grade of C- or better; Mathematics 5A

Not open for credit to students who have completed Physics 4.

Recommended preparation: Physics 4L or 13BH (may be taken concurrently).

Magnetic fields, electromagnetic induction and inductance, AC circuits, Maxwell's equations, electromagnetic waves, light and geometrical optics, interference and diffraction. (W)

25. General Physics

(3) STAFF

Prerequisites: Physics 24 with a grade of C- or better; Mathematics 5A-B.

Not open for credit to students who have completed Physics 5.

Recommended preparation: Physics 5L or 13CH (may be taken concurrently).

Special relativity, blackbody radiation, Compton scattering, photoelectric effect, Bohr model, quantum mechanics, molecules, condensed matter, nuclear physics, elementary particles. (S)

43. Origins: A Dialogue Between Scientists and Humanists

(4) STAFF

Same course as Religious Studies 43.

Introduction to the ways in which different disciplines have addressed the concept of origins. This course is organized as a dialogue between science, religion and history or more broadly construed between science and the humanities.

UPPER DIVISION

A grade of C- or higher is required to satisfy the prerequisites for all upper-division courses. In series of courses, such as Physics 105A-B, the earlier courses are considered prerequisites for the later ones. Exceptions will be made only with the consent of the instructor.

100A-B. Methods of Theoretical Physics

(3-3) STAFF

Prerequisites: Mathematics 5C with a minimum grade of C- (for Physics 100A); Physics 100A with a minimum grade of C- (for Physics 100B).

Mathematical methods in physics: theory of functions of complex variables, Fourier series, integral transforms, partial differential equations of physics,

boundary value problems, Legendre and Bessel functions. Introduction to Hilbert spaces. (F,W)

105A-B. Classical Mechanics

(3-3) STAFF

Prerequisites: Physics 2 or 22 with a minimum grade of C-; Mathematics 5B (may be taken concurrently) (for Physics 105A); Physics 105A with a minimum grade of C- (for 105B).

Dynamics of a particle and systems of particles. Harmonic oscillator. Curvilinear coordinates. Central force motion. Scattering. Elementary rigid body motion. Moving coordinate systems. Lagrange's equations and generalized coordinates. Forces of constraint. Rigid body rotation. Small vibrations and normal modes. Hamilton's equations. Special relativity. (W,S)

106. Nonlinear Phenomena

(4) STAFF

Prerequisites: Physics 105A; or ME 163; or upper-division standing in ECE.

Same course as ECE 183 and ME 169. Not open for credit to students who have completed ME 163C.

An introduction to nonlinear phenomena. Flows and bifurcations in one and two dimensions, chaos, fractals, strange attractors. Application to physics, engineering, chemistry, and biology. (S)

110A-B-C. Electromagnetism

(4-4-4) STAFF

Prerequisites: Physics 5 or 25 with a minimum grade of C-; and, Mathematics 5C (may be taken concurrently) (for Physics 110A); Physics 110A with a minimum grade of C- (for 110B); Physics 110B with a minimum grade of C- (for 110C).

Electrostatics, magnetostatics, electric and magnetic properties of materials, Maxwell's equations, electromagnetic waves, radiation from charged particles, special relativity. (F,W,S)

115A-B-C. Quantum Mechanics

(4-4-4) STAFF

Prerequisites: Physics 5 or 25 with a minimum grade of C-; and, Physics 100A with a minimum grade of C- or Mathematics 124A (may be taken concurrently) (for Physics 115A); Physics 115A with a minimum grade of C- (for 115B); Physics 115B with a minimum grade of C- (for 115C).

Inadequacies of classical physics and quantum mechanical resolutions. The postulates of quantum mechanics. Schrodinger's equation, measurements, operators, and observables. Angular momentum and spin, the exclusion principle, perturbation theory and scattering theory. Application to atomic, molecular and nuclear physics. (W,S,F)

119A-B. Thermal and Statistical Physics

(3-4) STAFF

Prerequisites: Physics 5 or 25 with a minimum grade of C- (for Physics 119A); Physics 119A with a minimum grade of C- (for Physics 119B).

Physics 119A not open for credit to students who have completed Physics 118. Physics 119B not open for credit to students who have completed Physics 119.

A. Thermodynamics: three laws of thermodynamics, phase diagrams, entropy, equipartition of energy, specific heat, reversible and irreversible processes, pressure, viscosity, thermal conductivity, diffusion. (F)

B. Statistical mechanics: Boltzmann, Fermi-Dirac, Bose-Einstein distribution laws. Relation of thermodynamic variables and microscopic properties. (W)

120. Physics of California: Waves, Weather, Quakes and Fires

(4) STAFF

Prerequisite: Physics 5 or 25.

Why do the waves hit the beach every five seconds? This course teaches students the relevant fluid dynamics and allows them to apply it to natural phenomena of California: seismic waves, tsunamis, maximum tree heights, fluid flow around fish.

121A-B. The Practice of Science

(3-4) STAFF

Prerequisites: consent of instructor (for 121A); Physics 121A or ECE 121A; consent of instructor (for 121B).

Same course as ECE 121A-B.

Provides experience in pursuing careers within science and engineering through discussions with researchers, lectures on ethics, funding, intellectual property, and commercial innovation. Students prepare a focused research proposal that is pursued in the second quarter of the course.

123A-B. Condensed Matter Physics

(4-4) STAFF

Prerequisite: Physics 115A with a minimum grade of C-.

Classification of solids; crystal symmetry, thermal electric and magnetic properties; metals, semiconductors, and the band theory of electronic states; magnetic resonance; superconductivity; imperfections. Emphasis will be placed on both fundamental and applied aspects. (F)

125. Elementary Particle Physics

(4) STAFF

Prerequisite: Physics 115B with a minimum grade of C-.

Introduction to quarks and leptons and the phenomenology of the particles they comprise; fundamental symmetries, invariance principles, and the associated quantum numbers, strong, electromagnetic and weak interactions and their relationship. (S)

127AL. Analog Electronics

(4) STAFF

Prerequisites: Physics 2 or 22 or 6B with a minimum grade of C-; and, Mathematics 3B or 34B with a minimum grade of C-.

Passive circuits, diodes, transistors, field effect transistors, operational amplifiers, feedback and control. Design, building and testing of analog circuits. (F)

127BL. Digital Electronics

(3) STAFF

Prerequisite: Physics 127AL with a minimum grade of C-.

Gates, combinational and sequential logic, multiplexers, counters, shift registers, memory and microprocessors. Design, building and testing of digital circuitry, including a modern microprocessor based computer system. (W)

128AL. Advanced Experimental Physics

(3) STAFF

Prerequisite: Physics 127AL with a minimum grade of C-; and Physics 115A (may be taken concurrently).

Selected experiments in contemporary physics, e.g., holography, laser lightscattering Zeeman effect, x-rays, superconductivity, magnetic resonance, Mossbauer effect. (W)

128BL. Advanced Experimental Physics

(3) STAFF

Prerequisite: Physics 128AL with a minimum grade of C-.

Selected experiments in contemporary physics, e.g., holography, laser lightscattering, optical pumping, semiconductors, superconductivity, magnetic resonance, Mossbauer effect. (S)

131. Gravitation and Relativity

(4) STAFF

Prerequisites: Physics 105A-B with a minimum grade of C-.

Physics 105B may be taken concurrently only with the consent of the instructor.

An introduction to Einstein's general relativity. The spacetime of special relativity, the principle of equivalence, gravity as geometry, the description of spacetime geometry, the spacetime of a relativistic star, solar system tests of general relativity, gravitational collapse, black holes, cosmology.

132. Stellar Structure and Evolution

(4) STAFF

Prerequisite: Physics 5 or 25 with a minimum grade of C-.

Observed properties and classification of stars, the Hertzsprung-Russell diagram, stellar atmospheres, hydrostatic equilibrium, energy transport, equations of state, thermonuclear reaction rates, origin of the elements, life history of stars, stellar death, compact objects, star formation.

133. Galaxies and Cosmology

(4) STAFF

Prerequisite: Physics 5 or 25.

Observed properties of galaxies, the interstellar medium, stellar dynamics, spiral arms, galaxy clusters, dark matter, quasars, the Hubble expansion, Friedmann models, thermal history of the universe, the origin of the light elements, the cosmic microwave background structure formation.

134. Observational Astrophysics

(4) STAFF

Prerequisite: Physics 5 or 25.

Recommended preparation: Physics 132 or 133. Techniques and implementation of observational methods in astronomy/astrophysics. Sensors, digital-image processing and analysis, research projects with computer-controlled remote access telescope using a digital image sensor. Studies of variable stars, galaxy morphology, supernova, etc. (W)

135. Biophysics and Biomolecular Materials

(3) STAFF

Prerequisite: Physics 5 or 6C or 25.

Same course as Materials 135.

Structure and function of cellular molecules (lipids, nucleic acids, proteins, and carbohydrates). Genetic engineering techniques of molecular biology. Biomolecular materials and biomedical applications (e.g., bio-sensors, drug delivery systems, gene carrier systems).

141. Optics

(4) STAFF

Prerequisite: Physics 5 or 25.

Modern geometrical and physical optics. Polarization, coherence, interference, and diffraction phenomena. Fourier transform spectroscopy, intensity correlation interferometry, spatial filtering, and holography. Selected topics on lasers, light scattering, and quantum optics as time permits.

142L. Experimental Research in Condensed Matter Physics

(1-4) STAFF

Prerequisites: Physics 5 or 25; consent of instructor.

May be repeated for credit.

Offers qualified undergraduates the opportunity to work in research laboratories in condensed matter physics.

143L. Experimental Research in Elementary Particle Physics

(1-4) STAFF

Prerequisites: Physics 5 or 25; consent of instructor.

May be repeated for credit.

Offers qualified undergraduates the opportunity to work in experimental research in elementary particle physics.

144L. Experimental Research in Biophysics

(1-4) STAFF

Prerequisites: Physics 5 or 25; consent of instructor.

May be repeated for credit.

Offers qualified undergraduates the opportunity to work in research laboratories in biophysics.

145L. Experimental Research in Astrophysics

(1-4) STAFF

Prerequisites: Physics 5 or 25; consent of instructor.

May be repeated for credit.

Offers qualified undergraduates the opportunity to work in experimental research in astrophysics. Each staff member has his/her own course identified by a number listed in the *Schedule of Classes*.

150. Special Topics in Physics

(1-4) STAFF

Prerequisite: Physics 5 or 25.

Course varies from year to year according to the current interests.

160A. Colloquium

(1) STAFF

Prerequisite: Physics 5 or 25 with a minimum grade of C-.

Course may be repeated 3 times for credit. PI NP grading option only. Students may apply to act as colloquium coordinator, to coordinate pre-colloquium meeting and other details. Students interested in doing this may receive one unit of Physics 199 credit, and should contact the undergraduate staff advisor to make arrangements.

Pre-colloquium and colloquium. Allows students

attending a pre-colloquium discussion section (1/2 hour) with speaker, and then attending the department colloquium (1 hour), to do so for one unit of Upper Division credit. (F,W,S)

160K. Science for the Public

(1-4) STAFF

Prerequisite: consent of instructor.

Same course as Engineering 160. May be repeated for credit to a maximum of 12 units, but only 4 units may be applied to the major. Open to graduate students in science and engineering disciplines and to undergraduate science and engineering majors.

Provides experience in communicating science and technology to nonspecialists. The major components of the course are field work in mentoring, a biweekly seminar, presentations to precollege students and to adult nonscientists, and end-of-term research papers.

198. Directed Reading

(1-4) STAFF

Prerequisites: consent of instructor; upper-division standing; completion of two upper-division courses in physics.

Students must have a minimum 3.0 grade-point average for the preceding three quarters and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined. No more than 12 units may be earned in all Physics 198/199/199DC/199RA courses combined.

Each staff member has their own directed reading course identified by a number code listed in the *Schedule of Classes*. (F,W,S)

199. Research in Physics

(1-5) STAFF

Prerequisites: consent of instructor; upper-division standing; completion of two upper-division courses in physics.

Students must have a minimum 3.0 grade-point average for the preceding three quarters and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined. No more than 12 units may be earned in all Physics 198/199/199AA-ZZ courses combined.

Directed individual study open to qualified seniors in the department. Each staff member has their own independent studies course identified by a number code listed in the *Schedule of Classes*.

GRADUATE COURSES

205. Classical Mechanics

(4) STAFF

Review of Lagrangian mechanics. Variational principles. Hamilton's equations. Canonical transformations. Hamilton Jacobi Theory. Action angle variables. Time dependent and canonical perturbation theory. Central forces and scattering. Small vibrations. Rigid body motion. Poincare maps. Non-Integrable systems. Hamiltonian and dissipative chaos. (F)

210A-B. Electromagnetic Theory

(4-4) STAFF

Electrostatics, magnetostatics, boundary value problems, time varying fields, Maxwell's equations, radiation, multipole fields, scattering, relativistic particle dynamics. (W,S)

215A-B-C. Quantum Mechanics

(4-4-4) STAFF

Fundamental principles; Schroedinger equation; angular momentum; perturbation theory; scattering theory, emission, and absorption of radiation; Dirac equation. (F,W,S)

217A-B. The Many Body Problem in Condensed Matter Physics

(4-4) STAFF

Prerequisite: Physics 215C.

Field theoretic methods as applied to (non-relativistic) condensed matter systems. Green's functions and diagrammatic techniques applied to various examples of interacting many body systems, including fermions, bosons, and spins. Relationship of the theoretical quantities to physical measurements. (W,S)

219. Statistical Mechanics

(4) STAFF

Prerequisites: Physics 205, 215A and 119 taken at another institution.

Fundamental principles of classical and quantum statistics. Non-interacting Boltzmann, Bose, and Fermi systems. Virial expansion and other approaches to interacting systems. Phase transitions. (W)

220. Advanced Topics in Statistical Mechanics

(4) STAFF

Prerequisite: Physics 219.

Course will cover some of the following topics:
a) critical phenomena-phase diagrams, first and second order phase transitions, scaling theory, high-temperature expansions, renormalization group;
b) non-equilibrium statistical mechanics-Stochastic processes, Langevin equations, fluctuation-dissipation theorem, master equation, fluid dynamics. (S)

221A-B-C. Relativistic Quantum Field Theory

(4-4-4) STAFF

Introduction to the theory of Lorentz covariant quantized fields. Global and local conservation laws. Path integral formulation. Applications to quantum electrodynamics, quantum chromodynamics, and electroweak interactions. Other possible topics include grand unification, the renormalization group, anomalies, current algebra, and supersymmetry. (F,W,S)

223A-B-C. Concepts and Phenomena of Condensed Matter Physics

(4-4-4) STAFF

Prerequisites: Physics 219 and 215C.

Lattice and electron dynamics. Elementary excitations and collective phenomena. Transport properties. Disorder and localization. Long-range order and broken symmetries. Magnetism, superconductivity and liquid crystals. Properties and structures of polymers, membranes, and self-assembling systems. (F,W,S)

225A. Elementary Particle Physics

(4) STAFF

Prerequisite: Physics 125 or 215C.

The phenomenology of the standard model of particle physics. QED and QCD processes. (F)

225B. Elementary Particle Physics

(4) STAFF

Prerequisite: Physics 225A.

Weak interactions; neutrino physics; C,P, and CP violation; electroweak gauge theory and symmetry breaking. Design of detectors and experiments; searches for new phenomena. (W)

229A-B. Gauge Theories of Elementary Particles

(4-4) STAFF

Prerequisites: Physics 221A-B-C.

Quantum theory of non-abelian gauge fields. Local, global, and spontaneous symmetry breaking. Collective phenomena; solitons, instantons, and magnetic monopoles. Effective field theories. Lattice gauge theory. applications to the standard model of elementary particles. (F,W)

230A-B. String Theory

(4-4) STAFF

Prerequisites: Physics 221B and 231B.

Introduction to string theory. Bosonic and super string theories and their spectra. String perturbation theory and conformal field theory. Nonlinear sigma models and spacetime structure. String compactifications and unification of forces. Non-perturbative results and methods; dualities and branes.

231A-B-C. General Relativity

(4-4-4) STAFF

Prerequisites: Physics 210A-B. Physics 231C may be repeated with consent of instructor.

Gravity as geometry, differential geometry, Einstein's equation, relativistic stars, gravitational collapse, black holes, cosmology, gravitational radiation, and special topics. (F,W,S)

232. Stellar Structure and Evolution

(4) STAFF

Physics of stellar structure, equations of state and heat transport. Birth of stars and physics of brown dwarfs. Thermonuclear burning and main sequence stellar structure. Evolution of stars and mass loss. Origin, physical structure, and cooling of compact objects. (S)

233. The Interstellar Medium

(4) STAFF

Physical processes that regulate the state of diffuse gas in and around galaxies: Ionization and thermal equilibrium; absorption line studies; spectral line formation; properties of dust grains and extinction; molecular gas and star formation; supernova explosions and hydrodynamic shocks. (W)

234. High Energy Astrophysics

(4) STAFF

Accretion power in a range of astrophysical contexts, from quasars to galactic black holes. Rapid release of thermonuclear energy, Type I X-ray bursts, classical novae, Type Ia supernovae. Relativistic jets from black holes, non-thermal radiation processes, physics of gamma-ray bursts.

235. Extragalactic Astrophysics

(4) STAFF

Nebular astrophysics, active galactic nuclei, supermassive black holes, stellar dynamics, galaxies, clusters, dark matter, gravitational lensing, the intergalactic medium and galaxy formation. (F)

236. Cosmology

(4) STAFF

Friedmann models, distance measures, cosmological parameters, thermal history of the universe, cosmological density fields, structure formation (top-hat model, Press-Schechter), big bang nucleosynthesis, cosmic microwave background.

250. Special Topics in Physics

(1-4) STAFF

The course varies from year to year according to current interests.

260A. Colloquium

(1) STAFF

260B. Seminar in Macromolecular Physics and Organic Solids

(1) STAFF

260C. Seminar in General Relativity

(1) STAFF

Talks on topics in gravity and general relativity pertinent to current doctoral research in the field.

260D. Seminar in Theoretical Physics

(1) STAFF

260E. Condensed Matter and Applied Physics Seminar

(1) STAFF

A lecture series of topics in materials and condensed matter physics, solid state physics, liquid helium, polymers, and related phenomenon.

260F. Seminar in High Energy Physics

(1) STAFF

260G. Graduate Seminar

(1) STAFF

Weekly seminar on topics of research currently being pursued in the Department of Physics.

260H. Seminar in Astrophysics and Cosmology

(1) STAFF

Talks on topics in astrophysics and cosmology pertinent to current doctoral research in the field.

260J. Physics Outreach

(1) STAFF

Active participation in an outreach program that presents physics demonstrations and experiments on the road to local schools in order to provide a valuable learning experience for K-12 students.

260K. Science for the Public

(1-4) STAFF

Prerequisites: consent of instructor; open to graduate students in science and engineering disciplines and to undergraduate science and engineering majors.

Provides experience in communicating science and technology to nonspecialists. The major components of the course are field work in mentoring, a biweekly seminar, presentations to precollege students and to adults nonspecialists, and end-of-term research papers. (F,W,S)

500. Teaching Assistant Seminar

(2) STAFF

No unit credit allowed toward advanced degree. Required course for all teaching assistants.

Covers development of teaching techniques especially oriented to lower-division physics laboratory instruction. Theoretical aspects covered at beginning of each quarter. Practical techniques discussed including weekly meeting with class instructor, formal evaluation, and videotaping analysis. (F)

594. Special Topics

(1-4) STAFF

Prerequisite: consent of instructor.

Special seminar on research subjects of current interest. Each staff member has a seminar identified by a number code listed in the *Schedule of Classes*. (F,W,S)

595. Group Studies

(1-6) STAFF

Prerequisite: consent of instructor.

May be repeated for credit to a maximum of 12 units.

Each staff member has a group studies course identified by a number code listed in the *Schedule of Classes*. (F,W,S)

596. Directed Reading and Research

(2-12) STAFF

Prerequisite: consent of instructor.

Individual tutorial. Reading and research in special topics including work done as the basis for the dissertation. Each staff member has a directed reading and research course identified by a number code listed in the *Schedule of Classes*. (F,W,S)

599. Dissertation Preparation

(1-12) STAFF

Prerequisite: consent of instructor.

May be repeated for credit up to 24 units. This course is reserved for writing the dissertation. Each staff member has a research course identified by a number code listed in the *Schedule of Classes*. (F,W,S)

Faculty

Aaron Belkin, Ph.D., UC Berkeley, Associate Professor (international relations)

Bruce Bimber, Ph.D., Massachusetts Institute of Technology, Professor (public policy)

Gayle Binion, Ph.D., UC Los Angeles, Professor (public law)

Marguerite Bouraad-Nash, Ph.D., University of North Carolina, Senior Lecturer (international politics, Middle East politics)

Kathleen Bruhn, Ph.D., Stanford University, Associate Professor (comparative politics, Latin America)

Benjamin J. Cohen, Ph.D., Columbia University, Louis G. Lancaster Professor of International Relations (international relations, international political economy)

Peter Digeser, Ph.D., Johns Hopkins University, Professor (political theory)

Laurie A. Freeman, Ph.D., UC Berkeley,

Associate Professor (comparative politics, Japan)

Garrett Glasgow, Ph.D., California Institute of Technology, Associate Professor (quantitative methods, political behavior)

M. Kent Jennings, Ph.D., University of North Carolina, Professor (political socialization)

Cynthia S. Kaplan, Ph.D., Columbia University, Professor (comparative politics, Soviet Union, political economy)

Pei-Te Lien, Ph.D., University of Florida, Professor (Asian American politics, U.S. racial and ethnic politics, political behavior)

Joseph Lodge, J.D., University of Michigan, Lecturer (Judge, Superior Court of California, County of Santa Barbara)

Rose McDermott, Ph.D., Stanford University, Associate Professor (international relations, security studies, political psychology, experimental methods)

Lorraine M. McDonnell, Ph.D., Stanford University, Professor (public policy)

Lorelei Moosbrugger, Ph.D., UC San Diego, Assistant Professor (environmental politics, comparative institutions, public policy, European political systems)

Andrew Norris, Ph.D., UC Berkeley, Assistant Professor (political theory)

Robert Rauchhaus, Ph.D., UC Berkeley, Assistant Professor (international relations, security studies)

Eric R.A.N. Smith, Ph.D., UC Berkeley, Professor (public opinion, voting behavior, party realignment, quantitative methods)

Heather Stoll, Ph.D., Stanford University, Assistant Professor (comparative politics, political methodology)

M. Stephen Weatherford, Ph.D., Stanford University, Professor (political analysis, public opinion)

John T. Woolley, Ph.D., University of Wisconsin, Madison, Professor (public policy, political economy)

Alan J. Wyner, Ph.D., Ohio State University, Senior Lecturer with Security of Employment (state and local politics, public policy and administration)

Emeriti Faculty

Stanley V. Anderson, LL.B., Ph.D., UC Berkeley, Professor Emeritus (public law, international law, Scandinavian studies)

Haruhiro Fukui, Ph.D., Australian National University, Professor Emeritus (Japanese politics, comparative politics)

Alan P. L. Liu, Ph.D., Massachusetts Institute of Technology, Professor Emeritus (Chinese politics, comparative politics)

Dean Mann, Ph.D., UC Berkeley, Professor Emeritus (American politics, natural resources policy and administration)

Peter H. Merkl, Ph.D., UC Berkeley, Professor Emeritus (comparative politics, European politics)

John E. Moore, Ph.D., Princeton University, Professor Emeritus (public and regulatory administration)

A. E. Keir Nash, Ph.D., Harvard University, Professor Emeritus (politics and population, constitutional law, political change)

Robert C. Noel, Ph.D., Northwestern University, Professor Emeritus (regional politics of the Middle East, international relations, comparative politics)

Thomas S. Schrock, Ph.D., University of Chicago, Professor Emeritus (political philosophy, public law)

Affiliated Faculty

Sarah Anderson, Ph.D., (Donald Bren School of Environmental Science and Management)

Edwina Barvosa, Ph.D., (Chicana and Chicano Studies)

Fernando Lopez-Alves, Ph.D., (sociology)

Cedric J. Robinson, Ph.D., (Black Studies)

Oran Young, Ph.D., (Donald Bren School of Environmental Science and Management)

Are democracies with only two political parties more representative than those with many parties? How can governments respect diverse ethnic, racial, and religious identities, and still promote bonds of common citizenship? What should be the role of the United States in an increasingly interdependent global economy? These are the types of questions that political scientists explore, but they also represent issues that require ordinary citizens to make informed judgments.

The Department of Political Science offers a balanced program, emphasizing the integration of theory and practice rather than any single approach or methodology. In addition to its standard program, the department also offers a public service emphasis and an international relations emphasis for undergraduate majors. An undergraduate honors thesis program is available to selected students. The M.A. and Ph.D. programs encompass work in all fields of political science.

Advising is available to undergraduates through the departmental undergraduate advisor who counsels students during scheduled hours and by appointment. Students are encouraged, in addition, to consult with individual faculty members about course content and professional or career concerns. Graduate advisors are appointed by the department and may be contacted through the department office.

Students with a bachelor's degree in political science who are interested in pursuing a California Teaching Credential should contact the credential advisor in the Graduate School of Education as soon as possible.

Prizes and Scholarships

The Department of Political Science awards four undergraduate scholarships and prizes each year. Two of these awards are open to students selecting the optional emphasis in international relations, and are open to all majors in their junior year.

The Lancaster Scholarship is given to the top student or students with an emphasis in international relations. Interested students must submit an application by the deadline early spring quarter. Criteria for selection include a student's grade-point average, successful completion of coursework in international relations and comparative politics, financial need, and length of residence in Santa Barbara County.

The Reg Robinson Award is given annually to

the student or students with the highest grade point average in international relations and comparative politics courses. Final selection is made by the Reg Robinson Award Committee in the Department of Political Science.

The Kevin Patrick Moran Scholarship is awarded to undergraduate students majoring in political science who demonstrate leadership qualities, academic promise, and a devotion to the peaceful resolution of conflict. Interested students must submit an application by the deadline in spring quarter.

The Larry Adams Scholarship in Public Policy is given quarterly to a political science student working 10-12 hours per week in a local governmental agency. Interested students must submit an application by the deadline advertised each quarter.

For further information regarding these scholarships and prizes, please contact an advisor in the undergraduate advising office, Ellison Hall 3838.

Honors Thesis Program

In the winter quarter of the junior year, students with outstanding academic records are eligible for the department's honors thesis program.

Those accepted begin their work in the following quarter in a specially designed seminar. In their senior year, they take additional seminar work and write a thesis. Honors graduates will be identified separately each year at the head of the graduation list for political science, and will be eligible for graduation with Distinction in the Major. Details are available from the department office.

Undergraduate Program

Bachelor of Arts— Political Science

Preparation for the major. Admission into the pre-political science major is contingent upon successful completion of the requirements stipulated below. Students may declare a pre-political science major after they have completed at least two political science courses from the pre-major with a 2.6 grade-point average or above. Once the preparation for the major is completed with the required grade-point average, students must then petition for admission into full major status and at that time may declare an optional emphasis. Admission to the pre-major does not guarantee admission to full major status. To qualify for admission into the political science major, students must complete Political Science 1, 6, 7, and 12 with a grade-point average of 2.6 or above. In addition, students must complete Economics 1 and 2 (or 109) and History 2A-B-C or 4A-B-C. Transfer and upper-division students should consult the undergraduate advisor about substitutions. Students planning on majoring in political science should take Political Science 1, 6, 7, and 12 during their freshman or sophomore year.

Upper-division major. Forty-one upper-division units are required, which must include at least one course from each of Areas A through D: A. Political Science 105, 121, 147; B. Political Science 110, 114, 187, 188, 189; C. Political Science 115, 151, 152, 153, 154, 155, 157, 158, 180, 185; D. Political Science 104.

The remaining 24 units may include courses from the above options other than those used for areas A-C, as well as other upper-division political science courses. No more than a combined total of 8 units of political science courses numbered 190 and above, nor more than 4 units each in Political Science 190, 192, 193, 194, or 199, may apply toward major requirements. Up to 4 units of Political Science 192, which is available only passed/not passed, may be taken for major credit; all other courses must be taken for letter grades.

Bachelor of Arts— Political Science— International Relations Emphasis

Preparation for the major. Admission into the pre-political science major is contingent upon successful completion of the requirements stipulated below. Students may declare a pre-political science major after they have completed at least two political science courses from the pre-major with a 2.6 grade-point average or above. Once the preparation for the major is completed with the required grade-point average, students must then petition for admission into full major status and at that time may declare an optional emphasis. Admission to the pre-major does not guarantee admission to full major status. To qualify for admission into the political science major, students must complete Political Science 1, 6, 7, and 12 with a grade-point average of 2.6 or above. In addition, students must complete Economics 1 and 2 (or 109) and History 2A-B-C or 4A-B-C. Transfer and upper-division students should consult the undergraduate advisor about substitutions. Students planning to major in political science should take Political Science 1, 6, 7, and 12 during their freshman or sophomore year.

Required work in relevant disciplines: Two additional courses must be taken from the following list: Anthropology 115; Economics 112A-B, 114, 180, 181; Geography 5; Psychology 138; Sociology 130, 130A, 130LA, 130GR, 130SA, 138G (or Global Studies 124), History 171A-B or another upper-division history course in Asian, Latin American, European, or African history.

Language requirement: completion of the fifth quarter or its equivalent.

Upper-division major. Forty-five upper-division units in political science, to be distributed as follows:

- A. Political Science 105, 121, and 127;
- B. Two courses from Political Science 109, 119, 124, 126, 128, 129, 186;
- C. Two courses from Political Science 101, 118, 134, 135, 136, 138, 140, 142, 143, 144, 145, 146, 147, 148A-B, 149, 150A-B, 177;
- D. Three courses from the following, but no more than two courses from any one category:
 - (1) Political Science 175, 180, 185
 - (2) Political Science 115, 152, 153, 155, 157, 158
 - (3) Political Science 110, 114, 187, 188, 189;
- E. Political Science 104.

Note: With departmental approval, 4 units of Political Science 192 (or Interdisciplinary 192DC or 192SA) may be substituted for one course in Area D.

Up to 4 units of Political Science 192 (or Interdisciplinary 192DC or 192SA, which is available only passed/not passed, may be taken for major credit; all other courses must be taken for letter grades.

Bachelor of Arts—Political Science—Public Service Emphasis

The coursework in the public service emphasis focuses on the fields of politics and public administration and includes work in sociology and economics. Students in this emphasis are required to serve a one-quarter, full-time internship in a governmental or political office during their senior year. Internships are open to all political science majors, whether or not they choose the public service emphasis. To qualify for the internship, students are expected to have a 3.0 grade-point average and junior or senior standing; they must also have completed courses relating to the work they plan to perform as an intern. Departmental approval is required and interested students should see the undergraduate advisor for further details.

Preparation for the major. Admission into the pre-political science major is contingent upon successful completion of the requirements stipulated below. Students may declare a pre-political science major after they have completed at least two political science courses from the pre-major with a 2.6 grade-point average or above. Once the preparation for the major is completed with the required grade-point average, students must then petition for admission into full major status and at that time may declare an optional emphasis. Admission to the pre-major does not guarantee admission to full major status. To qualify for admission into the political science major, students must complete Political Science 1, 6, 7, and 12 with a grade-point average of 2.6 or above. In addition, students must complete Economics 1 and 2 (or 109) and History 2A-B-C or 4A-B-C. Transfer and upper-division students should consult the undergraduate advisor about substitutions. Students planning to major in political science should take Political Science 1, 6, 7, and 12 during the freshman or sophomore year.

Required work in relevant disciplines:

- A. Economics 3A and 3B;
 - B. Writing 109SS.
- Upper-division major.** Forty-five upper-division units in political science are required, to be distributed as follows:
- A. Two courses from Political Science 170, 180, 185;
 - B. One course from Political Science 151, 152, 153, 154, 174, 175, 176;
 - C. One course from Political Science 153, 155, 157, 158;
- Note: Political Science 153 may be used in Area B or C of major but not in both.*
- D. One course from Political Science 161, 162, 163;
 - E. One course from Political Science 115, 165, 166, 167, 168;
 - F. One course from Political Science 105, 110, 114, 119, 121, 127, 147, 189;
 - G. Political Science 104.
 - H. A total of 12 units of Political Science 192 and 199, Interdisciplinary 192DC and 199DC, or Interdisciplinary 192SA and

199SA to be taken during one quarter of internship while registered at UCSB.

Up to 8 units of Political Science 192 and/or Interdisciplinary 192DC or 192SA, which are available only passed/not passed, may be taken for major credit; all other courses must be taken for letter grades.

Graduate Program

The Department of Political Science offers four fields of study: American politics, international relations, comparative politics, and political theory, as well as one nonexamination field, methodology. In addition to departmental requirements, candidates for graduate degrees must fulfill the university requirements described in the section "Graduate Education at UCSB."

Admission

The Department of Political Science offers two closely related graduate programs: an M.A./Ph.D. program for students who have completed the B.A., and a Ph.D. program for those who come to UCSB with an M.A. from another institution. The department's Graduate Program Statement offers a detailed explanation of the program. In addition to departmental admission requirements, applicants must also meet the university requirements for admission described in the section "Graduate Education at UCSB."

Master of Arts—Political Science Degree Requirements

The M.A. degree in political science is offered under Plan 1 (thesis plan) and Plan 2 (examination plan). In Plan 1, candidates must complete at least 44 units of coursework, normally in graduate courses in political science, and write a thesis.

In Plan 2, candidates must complete at least 48 units of coursework, normally in graduate courses in political science, and pass one Ph.D. written qualifying examination from among the four examination fields listed above.

Doctor of Philosophy— Political Science

Degree Requirements

Residence. A minimum of two years of full-time residence in graduate study, at least one year of which is spent in continuous residence, is required for the doctorate.

Fields of study. The Ph.D. program centers on coursework and preparation in two written examination fields, and for all students except those specializing in political theory, a series of courses on research methods. Typically, field choices are made from among the following: political theory, American politics, international relations, and comparative politics. Field choices must be from the traditional fields of political science. It is also possible to tailor special fields to the interests of individual students.

Appropriate courses may be taken at other UC campuses through the Intercampus Exchange Program.

Language and research skills. The student may choose a foreign language option or a research

skills option to fulfill the language/skills requirement for the Ph.D.

Examinations. Each student must qualify in two fields. A student must qualify in at least one field by examination and in a second field, by either examination or writing a field paper. After successfully qualifying in two fields, each student will take an oral qualifying examination which will primarily focus on his/her dissertation prospectus.

Dissertation. With the advice and approval of the doctoral committee, each student will select a dissertation topic in the major field of specialization. The dissertation must be based on original research and must make a significant contribution to knowledge in the field.

Consult the department's Web site and its handbook *Graduate Study in Political Science*, for additional information.

Optional Ph.D. Emphasis in Quantitative Methods in the Social Sciences

Students pursuing a Ph.D. in political science may petition to add an interdisciplinary emphasis in quantitative methods in the social sciences (QMSS). QMSS emphasis is intended for students who wish to develop and use cutting-edge quantitative methods on social science research. Our curriculum is designed to provide students with the rigorous mathematical and statistical background necessary for advanced quantitative work, while also providing a broad interdisciplinary perspective on the use of quantitative methods in social sciences. To that end, students who petition to add the QMSS emphasis, must complete two quarters of calculus, one quarter in linear algebra, and a one-year sequence of statistics. (These requirements can be waived if equivalent courses have already been completed.) QMSS students must also complete at least three quantitative social sciences methods courses (at least two of which are outside the student's home department), enroll in the QMSS colloquia for at least three quarters, and present their own original quantitative social science research at the QMSS colloquia at least once.

Students that add the QMSS emphasis are expected to write a Ph.D. dissertation that is focused on an issue that is appropriate to the QMSS emphasis. For instance, the dissertation could develop a quantitative method that could be applied to social science fields beyond the student's discipline, or adapt a quantitative method used in a social science field outside the student's discipline for researching a substantive problem within the student's discipline. The dissertation committee must include at least one QMSS faculty member from outside the student's home department.

For more information, please consult the QMSS Web site at www.qmss.ucsb.edu.

Optional Ph.D. Emphasis in Global Studies

Students pursuing a Ph.D. in certain departments may petition to add an emphasis in global studies. The departments for which the emphasis is available include anthropology, English, history, political science, religious stud-

ies, and sociology. To be eligible for admission to the Ph.D. emphasis, students must be admitted to the Ph.D. program in one of the departments choosing to offer this emphasis with their existing Ph.D. program and petition successfully to add the optional emphasis.

The student's dissertation committee must have one member from a participating department other than the student's own department. The student may also elect a global emphasis for his or her department field/area/specialization exam, if such an emphasis is offered within the department. The chair of the Coordinating Committee will determine when the student has successfully completed all of the requirements for the emphasis.

By "global" we refer to transnational economic, political, environmental, social, and cultural interactions and flows that operate at a global (i.e., trans-continental) scale. "Global studies" views the world as comprised of increasingly interdependent processes, rather than as shaped exclusively or even primarily by the interplay of discrete nation-states.

Petitions for adding the emphasis can be made at any time in a student's graduate career, but typically will be made after at least one successful year of study in the home department. Work completed prior to admission in the emphasis that meets emphasis requirements (as determined by the Ph.D. Emphasis Coordinating Committee) may be counted towards completion.

To satisfy the Ph.D. emphasis in global studies, students are required to take four one-quarter graduate-level courses. One course is Global 201, the introductory gateway seminar, offered by the Global and International Studies Program. Three additional courses must be chosen from among qualifying global theory and global issues courses offered by participating departments. These courses will be selected from an approved list of global theory and global issues graduate courses prepared by the Ph.D. Emphasis Coordinating Committee each spring, for the following academic year. At least one of these three courses must be a global theory course, and at least one must be a global issues course. Courses will typically be taken for a letter grade.

At least one of these three courses will be taken from the student's home department, and at least two must be taken from the six other participating departments or the Global and International Studies Program. No more than one of the three seminars (excluding Global 201) can be taken from a single instructor.

For additional information, please contact the graduate advisor in one of the participating departments or global studies.

Optional Ph.D. Emphasis in Technology and Society

Students pursuing a Ph.D. in this department may petition to add an emphasis in technology and society. The emphasis brings together doctoral students in engineering, social sciences, and the humanities to engage in multidisciplinary coursework and research into the cultural and societal changes resulting from the use of new information technologies. The emphasis features a structured set of courses that may be taught individually and collaboratively

by faculty across disciplines: Anthropology, Communication, Computer Science, English, History, Media Arts and Technology, Political Science, and Sociology.

To be eligible for admission to the emphasis, students must be enrolled in good standing in the department. Petitions for adding the emphasis can be made at any time in a student's graduate career, but typically will be made after at least one successful year of study in the home department. Work completed prior to admission that meets emphasis requirements (as determined by the Ph.D. Emphasis Faculty Executive Steering Committee) may be counted towards its completion.

Requirements for completing the optional emphasis in technology and society include:

1. Gateway Technology and Society Colloquium. Students must complete a 1-unit colloquium that brings together students and faculty from multiple disciplines to explore various approaches to studying technology and society. In addition to helping students understand similarities and differences in conceptualization and knowledge production across disciplines, the seminar promotes interaction among students from different departments.

2. Graduate Coursework. Students must complete four 4-unit courses with a grade of B or better, two each from Area 1 (Culture and History) and Area 2 (Society and Behavior). Area 1 courses explore the humanistic study of cultures, histories and meanings as they intersect with technology. Area 2 investigates the social scientific study of technology in relationship to human behavior, organizations, and social structures.

One course from the student's home department can be applied toward meeting this requirement. Students can petition to substitute a non-listed course, subject to approval by the Technology and Society Faculty Executive Committee.

3. Dissertation. A student's dissertation must have relevance to at least one of the two Emphasis areas. In addition, the student's dissertation committee must include a member from another department participating in the emphasis. Exceptions are subject to approval by the Technology and Society Faculty Executive Committee.

For additional information and a current list of courses, please contact the graduate advisor or visit www.technology-society.ucsb.edu.

Optional Ph.D. Emphasis in Women's Studies

The Women's Studies Program, with almost fifty core and affiliated faculty members in over nineteen disciplines, serves as a model of interdisciplinary work and scholarly collaboration at UCSB. Women's Studies doctoral emphasis students are required to complete successfully four seminars that will enhance their understanding of feminist pedagogy, feminist theory, and topics relevant to the study of women, gender and/or sexuality. Women's Studies as an inter-departmental set of conversations and intellectual questions supports a multifaceted undergraduate curriculum at UCSB. Graduate emphasis students are encouraged to apply to teach Women's Studies courses as teaching as-

sistants and associates as part of their Women's Studies training.

Applicants must first be admitted to, or currently enrolled in, a UCSB Ph.D. program participating in the Women's Studies graduate emphasis: Anthropology; Comparative Literature; Counseling, Clinical, and School Psychology; English; French and Italian; Germanic, Slavic and Semitic Studies; History; History of Art and Architecture; Political Science; Religious Studies; Sociology; Spanish and Portuguese; or Theater and Dance. Candidates complete four graduate courses and select a member of the Women's Studies faculty or affiliated faculty to serve on their dissertation committees. Applications to the Women's Studies Doctoral Emphasis may be submitted at any stage of Ph.D. work, and applications will be considered throughout the year.

The Graduate Curriculum

Students pursuing the emphasis in Women's Studies will successfully complete four graduate courses. Only one may be taken in the student's home department.

- 1. Issues in Feminist Epistemology and Pedagogy (Women's Studies 270).** A one-quarter seminar that considers Women's Studies as a distinct field. It offers an interdisciplinary exploration of feminist theories of knowledge production and teaching practices. Readings cover past and present critical debates and provide theoretical approaches through which to analyze interdisciplinary epistemological and pedagogical issues.
- 2. Special Topics in Women's Studies (594 AA-ZZ).** A one-quarter seminar offered by a Women's Studies faculty member on topics of central concern to the field of Women's Studies.
Or,
Research Practicum (Women's Studies 280). A cross-disciplinary seminar in which fundamental questions in contemporary feminist research practice are considered in light of students' own graduate projects. Students may fulfill the Area 2 requirement by taking either a Special Topics Seminar or the Research Practicum.
- 3. Feminist Theories.** A one-quarter graduate seminar in feminist theory offered by any department, including Women's Studies.
- 4. Topical Seminar.** A one-quarter graduate seminar, outside the student's home department, that addresses topics relevant to the study of women, gender, and/or sexuality.

Political Science Courses

LOWER DIVISION

1. Political Ideas in the Modern World (4) DIGESER

Perennial questions and diverse responses with emphasis on such central concepts as liberty, equality, power, authority, justice, law, and constitutionalism. Democracy and authoritarianism. The nexus between ends and means in political life.

6. Introduction to Comparative Politics (4) BRUHN

Introduction to the workings of various political

systems with an emphasis on governmental institutions and political processes. Comparison of political systems using some of the basic concepts of political analysis.

7. Introduction to International Relations (4) BELKIN, RAUCHHAUS

An introduction to the basic concepts, theories, and problems of international relations; balance of power, deterrence, the states system, imperialism, realism, idealism, levels of explanation, war and peace.

12. American Government and Politics (4) BIMBER, SMITH, WYNER

Political ideas, institutions, and processes of American government. The role of Congress and the president in policy formation and of the Supreme Court in interpreting the Constitution.

98. Readings in Political Science (1-4) STAFF

Prerequisites: consent of instructor and department.

Students must have a minimum 3.0 cumulative grade-point average. May be repeated for credit to a maximum of 4 units. No unit credit allowed toward the major. Students are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined.

Critical reviews and discussions of related topics in political science.

99. Introduction to Research (1-4) STAFF

Prerequisites: consent of instructor and department.

Students must have a minimum 3.0 cumulative grade-point average. May be repeated for credit to a maximum of 4 units. No unit credit allowed toward the major. Students are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined.

Independent research under the guidance of a faculty member in the department. Course offers exceptional students the opportunity to undertake independent research or work in a research group.

UPPER DIVISION

101. Mexican Politics (4) BRUHN

This course focuses on understanding the contemporary Mexican political system from a political economy perspective. It explores the development and behavior of Mexican institutions and actors, and the challenges facing them in a context of major economic and political change.

104. Introduction to Research in Political Science (5) GLASGOW, STOLL, WEATHERFORD

Prerequisite: not open to freshmen.

Designed for majors. Not open to students who have completed Political Science 104A and 104AL.

An introduction to the design and evaluation of political research: formulating clear hypotheses, developing appropriate measures, and analyzing data using simple statistical methods and qualitative techniques; emphasizes clear exposition of arguments, interpretations, and findings. (F,W,S,M)

105. Theories of Comparative Politics (4) FREEMAN

Prerequisite: Political Science 6.

A comparison of federalism, political parties, and executive leadership in different countries. A core course generally recommended, and in some cases required, for advanced work in comparative government.

106AA-ZZ. Special Topics in Political Science (4) STAFF

Prerequisite: upper-division standing.

May be repeated for credit provided letter designations are different.

Lectures in special areas of interest in political science. Specific course titles to be announced by the department each quarter offered.

108. Politics and Literature (4) BRUHN, NORRIS, RAUCHHAUS

Explores problems concerning alienation,

obligation, power, freedom, and fulfillment as treated by ancient and modern authors.

109. Revolution and Mass Movement (4) STAFF

Prerequisite: Political Science 6.

Analyzing the dynamics of revolutions from the French and Soviet to contemporary revolutions in Asia, Latin America, and the Middle East.

110. Political Concepts (4) DIGESER

Prerequisite: Political Science 1.

Introduction to some of the main concepts of political theory, such as the individual and the state, freedom and equality, political obligation, and their relevance to modern society and government.

114. Democracy and Diversity (4) DIGESER, BARVOSA

Prerequisite: Chicano Studies 1B or Political Science 1.

Introduction to the ancient and modern models of democracy which underpin contemporary democratic life. An analysis of the philosophical bases of democracy, diversity, political obligation, equality, liberty, consent, representation, and rights.

119. Ethical Issues in International Relations (4) DIGESER

Prerequisites: Political Science 1 and 7.

An examination of the possibility and desirability of normative international political theory and an exploration of the moral dimensions of statecraft; use of force, nuclear deterrence, humanitarian intervention, distributive justice, and human rights.

121. International Politics (4) MCDERMOTT, RAUCHHAUS

Prerequisite: Political Science 7.

An examination of theories concerning the actions, interactions, and relationships among nation-states.

124. International Organization (4) STAFF

Prerequisite: Political Science 7.

The nature and function of international organization, including a study of the United Nations and the European Community.

126. National Security (4) MCDERMOTT, RAUCHHAUS

Prerequisite: Political Science 7.

Examines how states use diplomacy, strategic coercion, and military force to achieve political objectives.

127. American Foreign Policy (4) MCDERMOTT, RAUCHHAUS

Prerequisite: Political Science 7.

The United States in world politics. Policy-making institutions, particularly the Presidency, Congress, State Department, and the military establishment. Interaction between domestic and external politics.

128. Foreign Policy of the Soviet Union and Successor States (4) KAPLAN

Prerequisite: Political Science 6 or 7.

Examination of recent work on foreign policies of the former Soviet Union and the successor states, with attention to methodological and substantive issues. Topics include: strategic theory, East-West relations, trade and the monetary system, and relations among states of the former Soviet Union.

134. Relations Between the United States and Mexico (4) BRUHN

Prerequisite: Political Science 6 or 7.

A general examination of relations between the United States and Mexico in the nineteenth and twentieth centuries. Emphasis on issues such as the origins of conflict and cooperation, and current issue areas including immigration.

136. Government and Politics of China (4) STAFF

The ideology, structure, and functions of the Chinese political system, with emphasis on the nation-building process under the Communist regime.

138. Political and Economic Development in Pacific Rim Countries**(4) STAFF***Prerequisite: upper-division standing.*

Study of domestic and international conditions contributing to the dynamics of society and economy in East Asian countries of South Korea, Taiwan, and Singapore. Emphasis on the role of the state, culture, experience of colonialism, threat of Communism, and United States aid and influence.

141. Politics of Germany**(4) STAFF***Prerequisite: Political Science 6.*

The political culture, history, political and social forces, and governmental organization of Western and Eastern Germany.

142. British Politics**(4) STAFF***Prerequisite: Political Science 6.*

The political culture, history, institutions, and behavior of Great Britain.

143. Politics in the Soviet Union Successor States**(4) KAPLAN***Prerequisites: Political Science 6; not open to freshmen.*

The course examines the basic characteristics of the Soviet ancient regime and the forces and institutions which shaped the merging states and societies. Topics include: parliamentary and economic systems, political parties, interest groups, ethnicity, legitimacy, sovereignty and inter-state relations.

144. West European Political Systems**(4) MOOSBRUGGER***Prerequisite: Political Science 6.*

The politics and political institutions of Europe. Objective of the course is to familiarize students with both the political institutions that structure European politics and the issues that are the focus of political debates in Europe.

145. The European Union**(4) STAFF***Same course as Italian 161AX.*

Introduction to the history and organization of the European Union (the institutions, policies, goals, and successes of the E.U.). Focus on the ongoing process of economical, political, social, and cultural integration in Europe since the Second World War. In English.

146. Globalization and Politics**(4) STAFF***Prerequisite: Political Science 6 or 7; upper-division standing.*

An examination and assessment of theories of globalization in relation to the distribution of political power on a global scale, future scenarios of global political domination, and the role of the nation-state in the international system of power.

147. Third World Politics**(4) BRUHN***Prerequisite: Political Science 6.*

A comparative analysis of the political systems of a selected number of African, Asian, and Middle Eastern countries, with particular development and modernization common to all of them.

148A-B. Reform, Globalization and Revolution in Latin America and the Caribbean**(4-4) STAFF**

- A. Comparative study of state formation, globalization, colonialism, and political change in Latin America.
- B. Comparative analysis of reform and revolution in Latin America, with a special emphasis on South American political systems.

149. Israeli Politics**(4) STOLL***Prerequisite: Political Science 6; not open to freshmen.*

Recommended preparation: background in the history and politics of the Middle East, such as that obtained in Political Science 150A.

An introduction to the politics of Israel. Examines both Israeli domestic politics and Israel in comparative perspective.

150A. Politics of the Middle East**(4) BOURAAD-NASH**

The development of governmental institutions and political forces in the postcolonial era. Emphasis on relationships between ideology, cultural dynamics, and politics, including examination of inter-Arab conflict and the war in Lebanon.

150B. Politics of the Middle East**(4) STAFF***Prerequisite: Political Science 150A.*

Political development and nationalism in the Northern Tier, Arab North Africa, and the Arabian Peninsula. The politics of oil. The resurgence of Islam, Iran, Iraq, Saudi Arabia, Turkey, Afghanistan, great power rivalry in the Middle East since 1945.

151. Voting and Elections**(4) GLASGOW, JENNINGS, SMITH***Prerequisite: Political Science 104A, or Sociology 3 or 104A, or Psychology 5, or Communications 88.*

Introduction to elections and voting cross-nationally and at various levels of government: the role of electoral rules, party competition and campaigns; the influence of issue, candidate, and partisan appeals on the vote; the effect of elections on public policy.

153. Political Interest Groups**(4) WEATHERFORD***Prerequisite: Political Science 12.*

The nature and function of organized interest groups and their impact upon public opinion and government.

154. Public Opinion**(4) JENNINGS, SMITH, WEATHERFORD***Prerequisite: Political Science 104A, or Sociology 3 or 104A, or Psychology 5, or Communications 88.*

A study of the formation and nature of public opinion including: the public's political sophistication; the role of emotion in political thinking; nature of political culture; growth of political alienation and the forms of political participation.

155. Congress**(4) SMITH***Prerequisite: Political Science 12; concurrent enrollment in Political Science 155L.*

The organization, operation, and politics of Congress; problems of representation, leadership, relations with interest groups, the White House, and the bureaucracy.

155L. Congress Laboratory**(1) SMITH***Prerequisite: concurrent enrollment in Political Science 155.*

A simulation of the United States House of Representatives designed to teach the operation and politics of Congress.

157. The American Presidency**(4) WOOLLEY***Prerequisite: Political Science 104A, or Sociology 3 or 104A, or Psychology 5, or Communications 88.*

Analysis of the institution of the presidency, its functions, formal and informal relationships, and its limitations within the American political system. Emphasis on the dynamics of the presidency, including presidential personality, conceptions of role, impact of public opinion, and responses to changes in the environment.

158. Power in Washington**(4) STAFF***Prerequisite: Political Science 12; upper-division standing.*

An examination and assessment of the policy and political linkages between the White House and Capitol Hill decision making, legislative enactment, administrative implementation; the presidential establishment, bureaucratic politics, and the politics of influence and access in Washington.

159. Sexuality, State Power, and the Military**(4) BELKIN**

How do groups in civil society try to capture state institutions and use those institutions to establish ideas about the normal and the deviant, rewarding some and not others? Case studies include gender, race, and sexuality in the military.

162. Urban Government and Politics**(4) STAFF***Prerequisite: Political Science 12.*

Problems of politics and administration in urban and metropolitan areas.

165. Criminal Justice**(4) LODGE***Prerequisite: Political Science 12.*

Problems and functions of police, prosecution, and defense relating to such problems as plea-bargaining, exclusionary rule, trials, bail, and sentencing.

170. Public Policy Analysis**(4) MCDONNELL, WOOLLEY***Prerequisite: Political Science 12.*

The assumptions, goals, content, and consequences of selected domestic policies, concentrating on the period since 1960. Discussion of the nature of collective action, methods of policy analysis and evaluation, and problems of implementation.

171. Politics and Communication**(4) FREEMAN**

The role of communications media and their influence on politics. How definitions of what is "news" and the way it is conveyed shape public thinking on political issues and affect candidates, causes, and public perceptions of government institutions.

175. Politics of the Environment**(4) SMITH***Prerequisites: Political Science 12 or Environmental Studies 3; upper-division standing.**Same course as Environmental Studies 178.*

Analysis of environmental policy issues and their treatment in the political process. Discussion of the interplay of substantive issues, ideology, institutions, and private groups in the development, management, protection, and preservation of natural resources and the natural environment.

176. Black Politics in America**(4) STAFF***Prerequisite: Political Science 12.*

A general survey of political phenomena in the Black community. American political institutions, law, legislation, and administration will be examined in theory and practice to determine their function in relation to Black politics.

177. Comparative Environmental Politics**(4) MOOSBRUGGER**

Course is structured around the major issues in environmental politics, for example, global warming, nuclear waste, deforestation, and chemical pollution. The roles of economics, technology, and social organization are each considered as explanatory variables for understanding environmental problems.

180. Bureaucracy and Public Policy**(4) MCDONNELL***Prerequisite: Political Science 12.*

The nature of American bureaucracy, its organization and culture and its role as a political institution.

182. Education Politics and Policy**(4) MCDONNELL***Prerequisites: Political Science 12; upper-division standing.*

Federal, state and local institutions governing public elementary & secondary education in the U.S., focusing on the values and interests that define politics at each level. Analyzes school finance, curriculum and school choice policies.

185. Government and the Economy**(4) WOOLLEY***Prerequisite: Political Science 12.*

Government's evolving role in economic life; the cultural, political, and philosophical setting of government-business relations; the maintenance and moderation of competition; the goals, methods, and politics of regulatory administration.

186. Introduction to International Political Economy**(4) COHEN***Same course as Global Studies 123. Not open for credit to students who have completed Political Science 186A.*

Introduction to the politics of international economic relations. Examination of alternative analytical and theoretical perspectives for their value in helping to understand and evaluate the historical development and current operation of the world economy.

187. Classical Political Theory

(4) STAFF

Prerequisite: upper-division standing.

A careful examination of major texts and thinkers in the ancient world and in medieval times.

188. Modern Political Theory

(4) DIGESER, NORRIS

Prerequisite: Political Science 1; upper-division standing.

Development of political ideas from the sixteenth century to the nineteenth century.

189. Recent and Contemporary Political Theory

(4) DIGESER, NORRIS

Prerequisite: Political Science 1.

A reconstruction of the contending theories of political order with which western intellectuals, from the nineteenth to the present century, have confronted an era of world historical changes.

192. Field Research in Political Science

(4-12) STAFF

Prerequisite: upper-division standing; consent of department.

Students must have a 3.0 overall grade-point average.

Directed research on the political process through participant observation and relevant reading. Individually assigned, instructed, and supervised field-work. Students will examine first-hand behavior in leading political roles in American politics.

194. Group Studies

(1-4) STAFF

Prerequisites: consent of instructor; upper-division standing.

Subject to departmental approval, students may repeat this course. Only 4 units may apply to the major.

Themes will vary according to instructor.

195. Honors Seminar

(4) STAFF

Prerequisite: consent of instructor.

An intensive analysis of the approaches, problems, and methodologies of a particular subfield of political science.

196. Senior Seminar in Political Science

(4) STAFF

197A-B-C. Honors Thesis Seminar in Political Science

(4-4-4) STAFF

Prerequisites: senior standing; consent of department.

Students must have a 3.3 cumulative grade-point average; 3.5 grade-point average in major. Political Science 197A-B-C is a three-quarter sequence course with the final grade issued upon completion of 197C. Only 4 units of credit may be applied toward the major.

Honors students, in three-quarter sequence of seminars, writing theses under close faculty supervision.

197D-E-F. Seniors Thesis in Political Science

(4-4-4) STAFF

Prerequisites: senior standing; consent of department.

Students must have a 3.0 grade-point average. Students may take this in-progress graded sequence for either two or three quarters with 197F designated as the final quarter.

Selected seniors pursue individual, significant research projects under close supervision of faculty readers.

199. Independent Studies in Political Science

(1-5) STAFF

Prerequisites: upper-division standing; completion of two upper-division courses in political science.

Students must have a minimum 3.0 grade-point average for the preceding three quarters and are limited to 5 units per quarter and 30 units total in

all 98/99/198/199/199AA-ZZ courses combined.

Admission by special permission only; for majors. No more than 8 units of Political Science 199 may count toward completion of the major requirements.

199RA. Independent Research Assistance in Political Science

(1-5) STAFF

Prerequisites: upper-division standing; completion of two upper-division courses in political science; consent of instructor and department.

Students must have a minimum 3.0 grade-point average for the preceding three quarters and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined.

Coursework shall consist of faculty supervised research assistance.

GRADUATE COURSES

Since the emphasis in some seminars changes from year to year, detailed course descriptions are available in the department office during the quarter prior to the seminar offering.

204. Research Design and Data Collection

(4) JENNINGS

This course is an introduction to empirical research in political science with an emphasis on design and data collection. Stress is placed on eclecticism and demonstration by example.

205. Political Research Methods I

(4) STAFF

Focuses on the formulation of political questions as scientific propositions open to quantitative examination. Two major subtopics, the empirical measurement of political concepts and the statistical analysis of quantitative data, are illustrated with examples from the research literature.

206. Political Research Methods II

(4) STAFF

Prerequisites: introductory statistics and social scientific research methods; graduate standing.

Techniques of developing multivariate statistical models of political processes. Applications of the general linear model to political dynamics and to problems with poorly measured variables.

207. Advanced Political Research Methods

(4) GLASGOW

Prerequisite: graduate standing, introductory statistics, social scientific research methods; Political Science 206.

Advanced techniques of multivariate analysis. Topics determined by students' interest.

209. Games and Models in Political Science

(4) STAFF

An extensive, diverse, and relatively nontechnical introduction to game theory and modelling techniques in political science.

215. The American Governmental Process

(4) WOOLLEY, WYNER

An examination of basic aspects of American national government, with primary attention to important contemporary literature on the subject.

225. International Relations

(4) BELKIN, MCDERMOTT, RAUCHHAUS

Basic factors shaping the political conflicts and accommodations among nations. Major attention to basic literature on the subject matter.

226. Seminar on International Economics for Non-Economists

(4) COHEN

No prior training in the discipline of economics required.

Introduction to the basic elements of international economic theory. Topics include the balance of payments and commercial policy, the global monetary and trading systems, international investment, and North-South economic relations.

230. Comparative Political Systems

(4) KAPLAN

A general survey of theories of comparative politics with some attention to concrete applications and to

comparative trends in other social sciences and history.

231. Comparative Methods

(4) BRUHN, KAPLAN

Focuses on the logic and design of comparative studies; evaluates the utility of differing methods in relation to prominent research issues in the field.

236. Democratization in Comparative Perspective

(4) BRUHN

Theoretical issues in research on democratization, emphasizing problems of transition and consolidation and methods of comparison of democratic transitions across regions.

240. Seminar on Classical Political Thinkers

(4) ROBINSON

Prerequisite: graduate standing.

An intensive examination of major texts and thinkers in the ancient world and in medieval times.

241. Seminar on Modern Political Thinkers

(4) DIGESER, NORRIS

Prerequisite: graduate standing.

An intensive examination of major texts and thinkers in modern times.

242. Seminar on Contemporary Political Thinkers

(4) DIGESER, NORRIS

Prerequisite: graduate standing.

An intensive examination of major texts, thinkers, and movements in the contemporary world.

243. Seminar in Political Concepts

(4) DIGESER

Concepts that are crucial to the analysis, understanding, and transformation of political and social phenomena. The seminar will draw insights and examples from the classical and contemporary literature, the present, and the future.

250. Seminar in Political Socialization

(4) JENNINGS

The development of political attitudes and behavior throughout the entire life cycle. Major foci of attention include the agents of political socialization, the content of socialization, variations within and across political systems, and the impact of generational and historical effects.

251. Political Representation

(4) JENNINGS, MOOSBRUGGER

Topics to be addressed include the historical development of concept and its implementation, forms and structures of representation, linkage mechanisms between elites and masses, the representation of minorities and dissidents, representation in comparative perspective, and problems in the study of representation.

252. Seminar in Public Opinion and Political Participation

(4) JENNINGS, SMITH, WEATHERFORD

Public opinion, elections, and other forms of participation are considered. Emphasis is on American politics, but theories and research are viewed in comparative perspective.

253. Seminar in Political Interest Groups

(4) WEATHERFORD

The theme of this course is the transmission of demands and grievances from the wider polity to the government by way of collective action. Formal non-party organizations as well as political and social movements are considered.

254. Seminar in the Legislative Process

(4) SMITH

An examination of a range of problems in the study of the organization, operation, and politics of American legislatures—especially the U.S. Congress.

259. Seminar in Political Parties

(4) SMITH

An examination of a range of problems and issues in the study of American political parties and political activists. Special attention will be given to party reform.

270. Theoretical Issues in International Political Economy

(4) COHEN

Prerequisite: Political Science 225.

The focus of this seminar will be on theoretical issues at the leading edge of contemporary scholarship in the field of international political economy. A principle objective will be to identify key elements of an agenda for future research.

273. International Political Economy

(4) COHEN

Prerequisite: graduate standing.

Introduction to the politics of international economic relations. Alternative analytical and theoretical perspectives on actor behavior and system governance. Historical development and current operation of the world economy.

275. War, Diplomacy and International Security

(4) BELKIN, MCDERMOTT, RAUCHHAUS

The seminar will probe a variety of issues, theoretical and historical (plus quite a few contemporary ones), that touch on war, power, and security studies.

277. Seminar in American Foreign Policy

(4) BELKIN, MCDERMOTT, RAUCHHAUS

*Contemporary issues in U.S. foreign policy.***279. Social and Cultural Basis of Political Change**

(4) STAFF

In-depth study of the political cultural basis of political systems and changes. Topics include: political culture, nationalism and ethnicity, and religion and politics.

280A. Domestic Politics of the Soviet Union and Successor States

(4) KAPLAN

Prerequisite: Political Science 230 or equivalent.

Domestic politics of the Soviet Union and successor states. Issues regularly included are: the process of political change, democratization, ethnic politics, political structure, and economic reform.

282A. Comparative Politics and Latin America

(4) STAFF

A critical examination of theories of comparative politics and their application to Latin America. Success and failure cases are compared and placed in the context of the world economy.

286. Seminar in Japanese Politics

(4) FREEMAN

Structure and processes of policymaking in contemporary Japan, with focus on economic and social issues. Policy issues and policymaking cases, probing both the formal and informal rules of the game, its major actors, and its beneficiaries and victims.

292. Governance for Sustainable Development

(4) STAFF

*Prerequisite: graduate standing in ESM or Political Science.**Same course as ESM 247.*

Examination of the demand for governance in conjunction with efforts to achieve environmental, economic, and social goals. Special attention to alternative approaches to the supply of governance at the global level as well as to interact between governance systems addressing distinct issues.

293. Environmental Institutions: Rights, Rules, and Decision-making Systems

(4) YOUNG

Same course as ESM 248.

Comparative study of management systems or regimes addressing natural resource and environmental concerns and operating at scales ranging from local to global. Topics include characterization of individual regimes and factors affecting the formation, evolution, and effectiveness of these institutional arrangements.

294. Environmental Politics and Policy

(4) SMITH

This seminar focuses on development of the environmental movement in American politics and

the resulting institutional responses. Environmental policy making and implementation is examined in light of relevant theories. Emergence of an environmental ethic in American politics is considered.

297. The Analysis of Public Policy

(4) MCDONNELL

Prerequisite: Political Science 205 or equivalent.

A survey of different traditions of policy analysis. Includes methods of analysis, policy alternatives, and approaches to explaining policy choice.

500. Practicum for Teaching Assistants

(2-4) STAFF

No unit credit allowed toward advanced degree.

Designed to help teaching assistants learn effective teaching methods and techniques under faculty supervision. Assignments normally include conducting discussion sections, grading examinations under the supervision of appropriate faculty members and discussion of relevant pedagogical problems.

501A-B. Teaching Assistant Training

(2-2) STAFF

A two-quarter in-progress sequence course with grades for both quarters issued upon completion of Political Science 501B.

Designed to help graduate students prepare for future assignments as teaching assistants. Coursework normally includes discussions with faculty members and past or current teaching assistants, attendance at demonstration exercises, analysis of teacher performance with the use of audio-visual aids, etc.

502. Practicum for Teaching Associates

(2-4) STAFF

No unit credit allowed toward advanced degree.

Designed to help beginning teaching associates improve and refine their teaching methods, techniques and materials through discussions with appropriate members of the regular faculty. The format of the course may vary according to the specific needs of the teaching associates.

503. Directed Research

(2-4) STAFF

Students enrolled in this course will engage in research on relevant specialized subjects under the supervision of appropriate faculty members. Assignments normally include extensive work with the literature, participation in fieldwork where appropriate, and assistance with preparation of professional papers.

504. Supervised Internship in Public Policy

(2-8) STAFF

This is a supervised internship designed to provide graduate students with a means to pursue research on the policymaking process through participation in the formulation and/or implementation of policy in the field.

594AA-ZZ. Special Topics

(1-4) STAFF

Special seminar on research subjects of current interest.

595A-B-C. Group Studies

(2-2-2) STAFF

Current topics in the field of political science.

596. Directed Reading and Research

(2-6) STAFF

Individual tutorial. Instructor is usually student's major professor. A written proposal for each tutorial must be approved by the department chair and filed with the Graduate Division.

597. Individual Study for Master's Comprehensive Examinations and Ph.D. Examinations

(1-12) STAFF

*No unit credit allowed toward advanced degree.***598. Master's Thesis Research and Preparation**

(1-12) STAFF

*No unit credit allowed toward advanced degree.***599. Ph.D. Dissertation Research Preparation**

(1-12) STAFF

Probability and Statistics

For probability and statistics faculty, program information, and courses, see *Statistics and Applied Probability*.

Department Chair: Daphne Bugental

Faculty

F. Gregory Ashby, Ph.D., Purdue University, Professor (cognitive neuroscience, categorization, attention, decision processes in perception and cognition, mathematical psychology)

James J. Blascovich, Ph.D., University of Nevada, Reno, Professor (social psychophysiology, challenge and threat motivation, immersive virtual environments as a research tool)

Daphne B. Bugental, Ph.D., UC Los Angeles, Professor (social development, social cognition and affect, social interaction)

Nancy L. Collins, Ph.D., University of Southern California, Professor (close relationships, interpersonal perception, social support, health psychology)

Leda Cosmides, Ph.D., Harvard University, Professor (evolutionary psychology, cognition, domain-specific reasoning)

Miguel P. Eckstein, Ph.D., UC Los Angeles, Professor (computational models of human vision, visual search, attention, perceptual learning, perception of medical images)

Aaron Ettenberg, Ph.D., McGill University, Professor (behavioral neuroscience, psychopharmacology, neurobiology of drug abuse, biological basis of reinforcement and motivation)

Alan J. Fridlund, Ph.D., University of Mississippi, Associate Professor (social interaction, evolution and neurology of social behavior, social psychophysiology, sexology, psychopathology)

Shelly Gable, Ph.D., University of Rochester, Associate Professor (close relationships, motivation & emotion)

Michael Gazzaniga, Ph.D., California Institute of Technology, Professor (cognitive neuroscience)

Tamsin Cleo German, Ph.D., University of London, Associate Professor (cognitive development, developmental psychology, neuropsychology)

Barry Giesbrecht, Ph.D., University of Alberta, Assistant Professor (cognitive neuroscience)

Scott Grafton, M.D., University of Southern California, Professor (cognition, perception, cognitive neuroscience)

David L. Hamilton, Ph.D., University of Illinois, Professor (social cognition, stereotypes, person perception, attribution processes)

Mary Hegarty, Ph.D., Carnegie-Mellon University, Professor (comprehension, reasoning, spatial cognition, individual differences)

Skirmantas Janusonis, Ph.D., University of Massachusetts at Amherst, Assistant Professor (behavior and neuroscience)

Heejung S. Kim, Ph.D., Stanford University, Assistant Professor (social psychology, cultural psychology, speech and cognitive processes)

Tod Kippin, Ph.D., University of British Columbia, Assistant Professor (neuroscience and behavior)

Stanley B. Klein, Ph.D., Harvard University, Professor (social cognition, mental representation of self, memory)

Jack M. Loomis, Ph.D., University of Michigan, Professor (visual space perception, auditory space perception, spatial behavior, spatial cognition)

Loy D. Lytle, Ph.D., Princeton University, Professor (developmental psychopharmacology; behavioral neuroscience; nutrition, brain function and behavior; pain and its alleviation)

Diane M. Mackie, Ph.D., Princeton University, Professor (intergroup processes, persuasion, social influence, affect, social perception)

Brenda N. Major, Ph.D., Purdue University, Professor (prejudice and self-esteem, coping with stress, psychology of legitimacy)

Richard E. Mayer, Ph.D., University of Michigan, Professor (human learning, problem-solving, educational psychology, human-computer interaction, multimedia learning, mathematical and scientific reasoning)

Michael B. Miller, Ph.D., Dartmouth College, Associate Professor (cognitive neuroscience, human memory and decision-making, functional magnetic resonance imaging)

Benjamin E. Reese, D.Phil., University of Oxford, Professor (development and organization of the visual system, developmental neurobiology and neuroplasticity)

Russell Revlin, Ph.D., Carnegie Mellon University, Associate Professor (reasoning, psycholinguistics, cognitive processes)

James Roney, Ph.D., University of Chicago, Assistant Professor (developmental and evolutionary psychology)

Jonathan W. Schooler, Ph.D., University of Washington, Professor (consciousness, memory, social cognition)

David S. Sherman, Ph.D., Stanford University, Assistant Professor (social psychology)

Karen Szumlinski, Ph.D., Albany Medical College, Assistant Professor (neuroscience and behavior)

Emeriti Faculty

Gerald S. Blum, Ph.D., Stanford University, Professor Emeritus (cognitive and affective processes, experimental psychodynamics, hypnosis)

John W. Cotton, Ph.D., Indiana University, Professor Emeritus (experimental design, mathematical learning theory, computer simulation of psychological processes)

John M. Foley, Ph.D., Columbia University, Research Professor (pattern vision, visual space perception) Professor Emeritus

Gerald H. Jacobs, Ph.D., Indiana University, Professor Emeritus (biology of mammalian vision)

Howard H. Kendler, Ph.D., University of Iowa, Professor Emeritus (philosophy and history of psychology, theoretical psychology, conceptual development)

Elijah P. Lovejoy, Ph.D., University of Pennsylvania, Lecturer Emeritus (intercultural psychology)

David M. Messick, Ph.D., University of North Carolina, Professor Emeritus (social psychology, decision making)

Robert W. Reynolds, Ph.D., University of Buffalo, Professor Emeritus (physiology, biochemistry, and endocrinology of motivation and emotion)

A. Robert Sherman, Ph.D., Yale University, Professor Emeritus (cognitive-behavioral psychotherapy)

Affiliated Faculty

Richard P. Duran, Ph.D. (Education)

Steven K. Fisher, Ph.D. (Molecular, Cellular, and Developmental Biology)

Howard Giles, Ph.D. (Communication)

Hsiu-Zu Ho, Ph.D. (Education)

Charles H. Markham, M.D. (Department of Neurology, UCLA School of Medicine)

Daniel R. Montello, Ph.D. (Geography)

John Tooby, Ph.D. (Anthropology)

Rebecca Zwick, Ph.D. (Education)

The psychology curriculum at UCSB is designed to provide students with an appreciation of the scientific study of behavior. Psychology represents an extremely broad discipline, ranging from the study of behavior of the simplest organisms to the behavior of humans and groups of humans in complicated situations.

Students interested in one of the psychology majors are urged to examine the upper-division course offerings to see if these are consonant with their interests in psychology. As students will note, some topics are not currently included in the curriculum (e.g., humanistic psychology, industrial psychology, ethnic psychology, etc.) and the number of courses within any particular area, such as clinical applications, is limited. Nevertheless, a well-balanced selection of the available courses should provide students with a broad background in psychology, as well as appropriate preparation for those seeking to pursue graduate training later on.

On the undergraduate level, the department offers the B.A. degree in psychology and the B.S. in biopsychology. The bachelor of arts degree in psychology is recommended for

students interested in obtaining a liberal arts education and understanding contemporary issues in psychology. The broad nature of the discipline allows students to complete the major by either specializing in a given substantive area (e.g., cognition, social psychology, perception, biopsychology) or selecting a more general and varied set of courses. The bachelor of science degree in biopsychology is intended for students who are interested in issues of neuroscience and behavior. Students complete courses providing an overview of the physical sciences (biology, physics, chemistry) and, in the upper division, focus specifically on the scientific study of behavior and its relationship to brain function. This major is recommended for students who have an interest in laboratory research and are considering a career in the field. It also provides strong preparation for many other professions, including the health-related sciences (requiring graduate work leading to the M.D. or Ph.D. degrees, for example). Graduate training consists primarily of work leading to the degree of doctor of philosophy. However, under special circumstances application can be made to a terminal master of arts program.

The departmental advisors, including academic peer advisors, staff undergraduate advisors, and faculty advisors provide students with academic information and advice as well as assistance with career and graduate school preparation. Students are encouraged to become acquainted with faculty members and to consult with them about programs or academic plans.

Psychology majors are encouraged to join Psi Chi, the Santa Barbara chapter of the National Honor Society in Psychology. Membership information is available from the undergraduate advisor.

The Department of Psychology encourages majors to participate in the Education Abroad Program (EAP). In most cases, EAP courses may be substituted for equivalent offerings of the Department of Psychology to fulfill major requirements. Please see the undergraduate advisor for more information.

Students with a bachelor's degree in psychology who are interested in pursuing a California Teaching Credential should contact the credential advisor in the Graduate School of Education as soon as possible.

Undergraduate Honors Program

The Department of Psychology has an honors program to augment the existing program in the College of Letters and Science. Enrollment in the psychology honors program is by application to the department and is based upon academic achievement.

Students who are selected to participate will earn a wide variety of unique academic privileges. In addition to special honors seminar courses, honors students will be given extended library privileges, and increased priority for class registration.

The departmental program provides qualified students an opportunity for an in-depth and intellectually challenging study of psychology. The psychology honors classes, for example, will be restricted in size and will provide a level of discussion and participation not possible in traditional lecture classes. To help prepare for graduate training, honors students will conduct

independent research under the supervision of a faculty advisor. The results of this research will form the basis of the honors thesis, which each student will be required to submit before the end of the senior year.

Students interested in participating in the psychology honors program should see the Department of Psychology's undergraduate advisor for further information.

Undergraduate Program

Bachelor of Arts—Psychology

The requirements for this major can be fulfilled with a variety of courses, allowing students to specialize in a given area, or select a more varied set of courses. Students in this major who plan to enroll in graduate programs should consult an advisor.

Students who complete the psychology major enter a variety of careers and graduate programs including experimental psychology, social work, applied psychology, education, business administration, law, and recreation. It is important to keep in mind that many of these professional careers require training beyond the undergraduate level and students with such interests should discuss their plans with an advisor as early as possible.

Students who do not enter the university as pre-psychology majors may declare the pre-psychology major after completing Psychology 1 with a grade of C or better. Once students have successfully completed all pre-major requirements (see "Preparation for the major," below), they may petition for full major status in the Department of Psychology Undergraduate Affairs Office. Students must attain full major standing prior to the completion of 144 units. Admission to the pre-major does not guarantee admission to the full major.

Preparation for the major. Students must complete each of the following requirements before petitioning the department to change from pre-major to major status: (1) Psychology 1, 3, 5, 7; and Mathematics 34A or equivalent.

In completing the five preparatory courses described above, students must fulfill the following criteria: (a) the courses must be completed with a combined grade-point average of 2.75 or better; (b) in no preparatory course can there be a grade lower than C-; (c) a grade of C- cannot be obtained in more than one of the five preparatory courses; and (d) none of the preparatory courses can be taken P/NP. Students will not be permitted to enroll in upper-division psychology courses numbered 110 or higher without first completing the pre-major.

Transfer students who complete the entire pre-psychology major before transferring to UCSB will be required to complete two Psychology courses numbered 100-109 and receive a combined grade-point average of 2.0 in those two courses before being allowed to petition for full major status.

Upper-division major. A total of 37 upper-division psychology units are required, distributed as follows: four courses from Psychology 100-109, one course from 110L, 112L, 117L, 118L, 120L, or 153L, and 16 additional units of psychology courses numbered 110-199. A maxi-

mum of 12 units may be applied to the major from Psychology 197A-B-C, 198, and 199.

Bachelor of Science—Biopsychology

The biopsychology major is designed for students interested in an intensive study of the relationship between biological and behavioral function. The required courses involve a study of neurophysiology and neuroanatomy; biochemical, endocrine, and pharmacological regulations in the central nervous system; and the behavioral and psychological data related to these topics. Students who do not enter the university as pre-biopsychology majors may declare the pre-biopsychology major after completing Psychology 1 with a grade of C or better, and a cumulative 2.0 grade-point average for all courses completed toward preparation for the major.

Students must attain full major standing prior to completion of 144 units. Once students have successfully completed the pre-major requirements (see "Preparation for the Major" area 1, below), they may petition for full major status in the Department of Psychology Undergraduate Affairs Office. Admission to the pre-major does not guarantee admission to the full major.

Preparation for the major. Students must complete courses in the following two areas:

Area 1: Psychology 1, Psychology 3, Psychology 5 or PSTAT 5, Psychology 7, and Math 34A before petitioning to change from the pre-major to full major status;

Area 2: MCDB 1A-AL; MCDB 1B, EEMB 2, and either MCDB 1BL or EEMB 2L; Chemistry 1A-AL, 1B-1BL, 1C-1CL (or 2A-AL, 2B-BL, 2C-CL), 6A-B, 109A-B; Physics 6A-6AL, 6B-6BL, 6C-6CL; Mathematics 34B. In completing the preparatory courses described above, students must fulfill the following criteria (a) the courses in area 1 must be completed with a combined grade-point average of 2.75 or better; (b) no course in area 1 with a grade lower than C-; (c) a grade of C- will not be accepted in more than one course in area 1; (d) none of the preparatory courses can be taken P/NP; and (e) the courses in area 2 must be completed with a combined grade-point average of 2.0 or better. Students will not be permitted to enroll in upper-division psychology courses numbered 110 or higher without first completing the pre-major courses in area 1 with the required grade-point average.

Transfer students who complete the entire pre-biopsychology major before entering UCSB will be required to complete two upper-division psychology courses and earn at least a 2.0 grade-point average in those courses before being admitted to full major status.

Upper-division major. Forty-four to 46 upper-division units are required, distributed as follows: (A) Psychology 111 (only offered during fall quarter); (B) two courses from the following: Psychology 110L, 111L, 116L, 118L, 137L, 169L; or MCDB 126AL; (C) five courses from the following: Psychology 110A or 110B or 110C, 113, 115, 116, 122, 123, 125, 132, 133, 134, 137, 163AA-ZZ, 166, 167, 168, or 171; and (D) 12 units of upper-division psychology electives.

Careful planning is required for biopsychology majors to graduate in a timely fashion. Students in the major should consult with the undergraduate advisor regarding the frequency and timing of upper-division course offerings.

Passed/Not Passed Option Within the Major

Psychology and biopsychology majors are permitted to take a maximum of 8 units from the following courses on a passed/not passed basis to fulfill the major requirements for either of the psychology majors: Psychology 143P, 198, 199. Students who wish to take more than 8 units of the above courses or any other psychology courses on a passed/not passed basis may do so. However, such courses will not apply to the major requirements.

Graduate Program

Graduate training is provided in cognition, perception and cognitive neuroscience, developmental and evolutionary psychology, neuroscience and behavior, and social psychology. In addition to departmental requirements, candidates for graduate degrees must fulfill the university requirements described in the chapter "Graduate Education at UCSB."

Admission

Graduate training in the Department of Psychology consists of work leading to the degree of doctor of philosophy. Although academic background provided by an undergraduate B.A. or B.S. degree in psychology is desirable, outstanding students from other disciplines are strongly encouraged to apply.

In addition to departmental admission requirements, applicants must also meet the university requirements for admission described in the chapter "Graduate Education at UCSB." Applications to Ph.D. programs are accepted with admission to begin fall quarter only. All application materials (including the application, transcripts, Graduate Record Examination (GRE) scores for the general exam, statement of purpose, and letters of recommendation) are due to the Department of Psychology by December 1st. It is important to indicate on the graduate application (under emphasis), the interdisciplinary program area (cognition, perception and cognitive neuroscience, developmental and evolutionary psychology, neuroscience and behavior, and social psychology) to which students are applying.

Master of Arts—Psychology Degree Requirements

The Department of Psychology does not offer a terminal M.A. program. Admission is to the Ph.D. program only. Master's degrees may be awarded in the case of students who leave the Ph.D. program, or for continuing students who have successfully completed the requirements of the first two years of the Ph.D. program, complete an acceptable master's thesis, and request the M.A. degree.

The requirements for the M.A. in psychology are (a) masters-level performance in two statistics courses (Psychology 221A-B) with a B average grade and eight content courses (ap-

appropriate to the area of concentration) with a B average grade, two of which include a breadth requirement; (b) satisfactory performance in research courses, area seminars, and seminars on Teaching of Psychology, all of which must have a satisfactory (S) passing grade; (c) satisfactory completion of a first year progress report, a master's thesis; and presentation of this research orally at the annual departmental mini-convention.

Work toward the M.A. is optional for applicants admitted to the Ph.D. program. Students who continue in the Ph.D. program must satisfy all of the above requirements at the Ph.D. level of performance.

Doctor of Philosophy— Psychology

Degree Requirements

Students enrolled in the Ph.D. program must satisfy the following departmental requirements: (a) doctoral-level performance in two statistics courses (Psychology 221A-B) with a B+ average grade, eight content courses (appropriate to the area of concentration) with a B+ average grade, two of which include a breadth requirement, and six additional courses (appropriate to the area of concentration); (b) satisfactory performance in research courses, area seminars and teaching seminars (Psychology 590A-B-C) all of which must have a satisfactory (S) passing grade; (c) satisfactory completion of a first year progress report, a second year research paper equivalent to a master's thesis, and presentation of this research orally at the annual departmental mini-convention; (d) successful performance on a general candidacy examination, and oral qualifying examination; (e) completion of a public dissertation lecture, acceptable performance on the doctoral oral defense, and an acceptable doctoral dissertation; (f) satisfactory service as a teaching assistant.

Optional Ph.D. Emphasis in Cognitive Science

Students pursuing a Ph.D. in this department may petition to add an emphasis in cognitive science. The interdisciplinary program in cognitive science involves faculty from the Ph.D. programs in anthropology, communications, computer science, education, electrical and computer engineering, English, geography, linguistics, music, philosophy, psychology, and sociology. Its goal is to give students an appreciation of the interdisciplinary study of thinking, perception, and intelligent behavior, as determined jointly by the nature of the environment and by the internal architecture of the intelligent agent, whether human, animal, or machine. The program features a structured set of courses which are taught individually and collaboratively by faculty from a variety of disciplines.

Students who petition to add the emphasis in cognitive science must fulfill the following requirements in addition to the requirements of the Ph.D. in their home department: (1) participation for at least three quarters in proseminar Interdisciplinary 200; (2) completion of at least three cognitive science elective courses with one each in three different departments; (3) completion of either (a) a research project,

completed before the dissertation, resulting in a publishable paper, or (b) an extramural grant proposal for a study in cognitive science suitable for submission to an identified granting agency; (4) presentation of a research paper in a suitable academic forum, such as an emphasis or departmental colloquium, or a professional meeting; and (5) a Ph.D. dissertation centrally focused on a question emerging from cognitive science with at least two committee members representing faculty participating in the cognitive science interdisciplinary emphasis. Consult the Cognitive Science webpage at: www.cogsci.ucsb.edu for additional information.

Optional Ph.D. Emphasis in Human Development

Students pursuing a Ph.D. in this department may petition to add an emphasis in human development. The interdisciplinary program in human development (IHD) involves faculty from the Ph.D. programs in communication, counseling/clinical/school psychology, education, linguistics, psychology, anthropology, and sociology. The program focuses on developmental theory and research across the lifespan, and may be particularly relevant to the dissertation research of some students. The program features a structured set of courses which are taught individually and collaboratively by faculty from a variety of disciplines.

Students who petition to add the emphasis in human development must fulfill the following requirements in addition to the requirements for the Ph.D. in their home department: (1) six quarters of proseminar Interdisciplinary 592; (2) four courses in addition to the proseminar, two of which must be outside the student's home department; Consult the Human Development webpage at www.psych.ucsb.edu/research/ihd/ for additional information.

Optional Ph.D. Emphasis in Quantitative Methods in the Social Sciences

Students pursuing a Ph.D. in psychology may petition to add an interdisciplinary emphasis in quantitative methods in the social sciences (QMSS). QMSS emphasis is intended for students who wish to develop and use cutting-edge quantitative methods on social science research. Our curriculum is designed to provide students with the rigorous mathematical and statistical background necessary for advanced quantitative work, while also providing a broad interdisciplinary perspective on the use of quantitative methods in social sciences. To that end, students who petition to add the QMSS emphasis, must complete two quarters of calculus, one quarter in linear algebra, and a one-year sequence of statistics. (These requirements can be waived if equivalent courses have already been completed.) QMSS students must also complete at least three quantitative social sciences methods courses (at least two of which are outside the student's home department), enroll in the QMSS colloquia for at least three quarters, and present their own original quantitative social science research at the QMSS colloquia at least once.

Students that add the QMSS emphasis are expected to write a Ph.D dissertation that is

focused on an issue that is appropriate to the QMSS emphasis. For instance, the dissertation could develop a quantitative method that could be applied to social science fields beyond the student's discipline, or adapt a quantitative method used in a social science field outside the student's discipline for researching a substantive problem within the student's discipline. The dissertation committee must include at least one QMSS faculty member from outside the student's home department.

For more information, please consult the QMSS Web site at www.qmss.ucsb.edu.

Psychology Courses

LOWER DIVISION

These courses act as prerequisites for the majority of upper-division requirements and should be completed as early as possible.

1. Introduction to Psychology (4) FRIDLUND, ETTEBERG, REVLIN

The requirements of the course will include subject participation in low-risk psychological experiments or completion of a short paper.

An introduction to the subject matter and methods of psychology. Topics may include development, perception, memory, learning, cognition, affect, motivation, social behavior, personality, psychopathology and the physiological basis of behavior. (F,W,S,SS)

3. The Biological Basis of Psychology (3) ETTEBERG, MILLER, SZÜMLINSKI, KIPPIN, JANUSONIS *Prerequisite: Psychology 1.*

May not be taken concurrently with or after Psychology 106, 111 or 111L.

An introduction to the biological basis of psychology. Topics may include the anatomy and functioning of the nervous system, and the neural basis of development, perception, learning, memory, cognition, affect, motivation, social behavior, personality, and psychopathology.

5. Introductory Statistics (5) COLLINS, ECKSTEIN, GIESBRECHT *Prerequisite: Mathematics 34A.*

Not open for credit to students who have completed lower-division coursework in statistics.

Probability, frequency distributions, descriptive statistics, sampling distributions of the mean and variance, basic logic of inference, hypothesis testing for one sample, related samples, and independent samples, correlation and regression, simple non-parametric tests. (F,W,S,SS)

7. Introduction to Experimental Psychology (3) MILLER, RONEY

Prerequisites: Psychology 1; and, Psychology 5 or PSTAT 5A; requirements of the course also include subject participation in low-risk psychological experiments or completion of a short paper.

Introduction to the purpose, design, planning, and execution of experiments in psychology and to the analysis and interpretation of data. (F,W,S,SS)

90A. First-Level Honors Seminar (2) STAFF

Prerequisite: consent of instructor.

Seminar for specially selected students. Advanced reading, writing, and discussion.

90B. First-Level Honors Seminar (2) STAFF

Prerequisite: consent of instructor.

Students who have completed Psychology 90A have priority for enrollment.

Seminar for specially selected students. Advanced reading, writing, and discussion.

90C. First-Level Honors Seminar (2) STAFF

Prerequisite: consent of instructor.

Students who have just completed Psychology 90B

have priority for enrollment.

Seminar for specially selected students. Advanced reading, writing, and discussion.

98. Readings in Psychology

(1-5) STAFF

Prerequisites: consent of instructor and department.

Students must have a minimum grade-point average of 3.0 and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined.

Readings in psychology under the guidance of a faculty member in the department. Students wishing to enroll must prepare a short plan of study.

99. Independent Research in Psychology

(1-4) STAFF

Prerequisites: consent of instructor and department; completion of at least one quarter of Psychology 99P.

Students must have a minimum grade-point average of 3.0 and are limited to 5 units per quarter and 30 units total in all 98/99/99P/198/199/199AA-ZZ courses combined.

Advanced independent research under the guidance of a faculty member in the department, including writing a research report or review.

99P. Independent Research in Psychology

(1-4) STAFF

Prerequisites: consent of instructor and department.

Students must have a minimum grade-point average of 3.0 and are limited to 5 units per quarter and 30 units total in all 98/99/99P/198/199/199AA-ZZ courses combined.

Independent research under the guidance of a faculty member in the department.

UPPER DIVISION

101. Health Psychology

(4) SHERMAN

Prerequisite: Psychology 1 or upper-division standing.

Introduction to concepts, theory, and research within the subdiscipline of health psychology. Relationships among behavioral factors, well being, and disease.

102. Introduction to Social Psychology

(4) KLEIN

Prerequisite: Psychology 1 or upper-division standing.

An introduction to social psychology including person perception, attitude formation and change, interpersonal interactions, persuasion and influence, group processes, and social values.

103. Introduction to Psychopathology

(4) FRIDLUND

Prerequisite: Psychology 1 or upper-division standing.

Concepts of mental illness and mental disorder, including diagnosis, causes, treatments, cultural influences, and social consequences.

105. Developmental Psychology

(4) GERMAN

Prerequisite: Psychology 1 or upper-division standing.

An introduction to the scientific study of developmental processes, with particular focus on child development. Examination of basic research and theory in major areas of child psychology.

107. Introduction to Perception

(4) LOOMIS

Prerequisite: Psychology 1 or upper-division standing.

May not be taken after or concurrently with Psychology 110A or 110B or 110C or 110L or 118A.

An introductory course in perception open to students in all majors. A variety of demonstrations are used to allow the student to experience the phenomena of perception. Current hypotheses and theories concerning the underlying psychological and biological processes are described.

108. Introduction to Cognitive Psychology

(4) HEGARTY, REVLIN

Prerequisite: Psychology 1 or upper-division standing.

An elementary course in such topics as pattern recognition and attention, memory, language, reasoning, and problem solving.

110A. Perception: Vision

(4) LOOMIS

Prerequisites: Psychology 1, 5, and 7; open to

psychology, biopsychology, and interdisciplinary majors only.

May not be taken concurrently with Psychology 107.

Overview of visual perception. Course covers a wide range of phenomena from the detection of simple stimuli to the identification of objects and events. Human performance, psychological theories, and biology are considered.

110B. Perception: Audition

(4) ASHBY, LOOMIS

Prerequisites: Psychology 1, 5, and 7; open to psychology, biopsychology, and interdisciplinary majors only.

May not be taken concurrently with Psychology 107.

An overview of auditory perception covering topics such as the physics of sound, psychophysical methods, the structure and function of the ear and auditory pathway, detection and discrimination, masking, pitch performance, psychological theories, and biology will be considered. Perception, musical scales, 3-D localization, and speech perception.

110C. Perception: Chemical Senses

(4) ASHBY

Prerequisites: Psychology 1, 5, and 7; open to psychology, biopsychology, and interdisciplinary majors only.

May not be taken concurrently with Psychology 107.

An overview of odor and taste perception. Topics include the chemistry of odors and foods, the structure and function of the olfactory and gustatory pathways, detection and identification, memory, animal and human pheromones, and influences on emotion and health.

110L. Laboratory in Perception

(5) ECKSTEIN

Prerequisites: Psychology 1, 5, 7; and, Psychology 110A or 110B or 110C or 132; open to psychology and biopsychology and interdisciplinary studies majors only.

May not be taken concurrently with Psychology 107.

A laboratory course that emphasizes experimental methods and data analysis techniques relevant to the study of sensation and perception.

111. Basic Concepts in Biopsychology

(4) STAFF

Prerequisites: Psychology 1, 5, and 7; open to psychology and biopsychology and interdisciplinary studies majors only.

An overview of the basic biological mechanisms important for behavior.

111L. Laboratory in Biopsychology

(5) BEN-SHAHAR

Prerequisites: Psychology 1, 5, 7 and 111; open to psychology and biopsychology and interdisciplinary studies majors only.

A study of the techniques and experimentation in biopsychology.

112L. Laboratory in Social Behavior

(5) SHERMAN

Prerequisites: Psychology 1, 5, 7 and 102; open to psychology, biopsychology and interdisciplinary studies majors only.

Methods, techniques, and typical experimental research in social psychology.

113. Regulatory Mechanisms in Biopsychology

(4) STAFF

Prerequisites: Psychology 1, 5, 7, and 111; open to psychology, biopsychology, physiology, and interdisciplinary studies majors only.

An examination of homeostatic regulatory mechanisms important for behavior.

115. Neuropharmacology of Psychoactive Drugs

(4) SZUMLINSKI

Prerequisites: Psychology 1, 5, 7, and 111; open to psychology, biopsychology, pharmacology and interdisciplinary studies majors only.

Recommended preparation: MCDB 126A or 126B or 126C or EEMB 164.

An examination of the pharmacological and neurochemical mechanisms influencing the actions of psychoactive drugs.

116. Conditioning and Learning

(5) ETTEBERG

Prerequisites: Psychology 1, 5, and 7; open to psychology, biopsychology and interdisciplinary studies majors only.

Principles of instrumental and classical conditioning. Topics may include: avoidance learning, stimulus generalization, discrimination, and other aspects of learning by animals and humans.

116L. Laboratory in Animal Learning

(5) ETTEBERG

Prerequisites: Psychology 1, 5, 7 and 111; open to psychology, biopsychology and interdisciplinary studies majors only.

Methods, techniques, and typical experimental research in animal learning.

117. Human Memory

(4) HEGARTY, KLEIN, REVLIN

Prerequisites: Psychology 1, 5, and 7; open to psychology, biopsychology and interdisciplinary studies majors only.

Recommended preparation: Psychology 108.

Principles of human memory. How knowledge is represented internally. Cognitive processes involved in remembering. Examination of different memory systems.

117L. Laboratory in Human Memory and Cognition

(5) HEGARTY, REVLIN

Prerequisites: Psychology 1, 5, and 7; and, Psychology 117 or 118B; open to psychology, biopsychology and interdisciplinary studies majors only.

Methods, techniques, and typical experimental research in human memory and cognition.

119. Social Norms

(4) MACKIE

Prerequisites: Psychology 1, 5, 7, and 102; open to psychology, biopsychology, and interdisciplinary studies majors only.

Review of social psychological principles and theories that explain the formation and change of social norms, and how those norms affect everyday social behavior in health, legal, business, political, and educational contexts.

120L. Laboratory in Advanced Research Methods

(5) KIM, GABLE

Prerequisites: Psychology 1, 5, and 7; open to psychology, biopsychology and interdisciplinary studies majors only.

Exposes students to sophisticated aspects of experimentation in psychology including the bases for theoretical inference, experimental designs, development of procedures and analyses.

122. Motivation

(4) ETTEBERG

Prerequisites: Psychology 1, 5, and 7; upper-division standing; open to psychology, biopsychology and interdisciplinary studies majors only.

Examination of the evolution of ideas concerning the determinants of human and animal behavior. Historical and contemporary theories of motivation are presented and evaluated in the light of recent research findings.

123. Cognitive Neuroscience

(4) MILLER

Prerequisites: Psychology 1, 5, and 7; and, Psychology 106 or 111; open to psychology, biopsychology and interdisciplinary studies majors only.

Examination of the neurological basis of cognition. Material is drawn from research in psychology, clinical neurology, and the neurosciences with brain injured and healthy humans as well as non-human subjects. Topics covered include memory, language, and perception.

124. Educational Psychology

(4) MAYER

Prerequisites: Psychology 1, 5, and 7; open to psychology, biopsychology and interdisciplinary studies majors only.

An introduction to research and theory on how instruction affects student learning. Topics may include: development of learning and thinking strategies, instructional methods, learning in subject matter areas, individual differences, and classroom processes.

125. Human Psychophysiology (4) BLASCOVICH

Prerequisites: Psychology 1, 5, and 7; open to psychology, biopsychology and interdisciplinary studies majors only.

Introduction to concepts, theory and research within the subsdiscipline of psychophysiology. This field is primarily devoted to understanding the relationships among behavioral and physiological processes.

127. Psychology of Language

(4) REVLIN

Prerequisite: Psychology 1, 5, and 7; or Linguistics 20 or 20A; Open to psychology, biopsychology, linguistics and interdisciplinary studies majors only.

Same course as Linguistics 127.

Recommended preparation: Psychology 108.

An examination of the psychological foundations of language structure and use, including the cognitive processes involved in the comprehension, production, and recall of words, sentences, and discourse; first and second language acquisition; relationships among language, brain, cognition, and culture.

128. Human Thinking and Problem Solving

(4) HEGARTY, MAYER

Prerequisite: Psychology 1, 5, and 7; open to psychology, biopsychology and interdisciplinary studies majors only.

Recommended preparation: Psychology 108.

An examination of theories and supporting evidence regarding the nature of human thought processes.

129. Cognitive Behavioral Approaches to Psychotherapy

(4) SHERMAN

Prerequisites: Psychology 1, 5, and 7; and Psychology 102 or 103 or 114; open to psychology, biopsychology and interdisciplinary studies majors only.

An introduction to the basic principles and methods of behavior modification, including desensitization, operant conditioning, social modeling, expressive training, and aversion therapy. Related discussion concerning the identification of maladaptive behavior, the specification of treatment operations, and the criteria for assessing therapeutic change.

130. Visual System Analysis

(4) ECKSTEIN

Prerequisites: open to psychology, biopsychology and interdisciplinary studies majors only; upper-division standing.

Recommended preparation: calculus, linear algebra and some computer programming.

A systems approach to understanding vision. Topics will typically include transduction, signal detection, space and motion perception, color vision, and pattern classification. Special emphasis will be placed on comparing computational models with quantitative descriptions of human visual performance.

132. Visual Neuroscience

(4) STAFF

Prerequisites: Psychology 1, 5, and 7; and, Psychology 106 or 111; and MCDB 1A-AL; and, MCDB 1B-BL or EEMB 2-2L; open to psychology, biopsychology and interdisciplinary studies majors only.

An examination of the neural basis of vision. The course focuses on mammalian vision and considers evidence from behavioral and biological approaches.

133. Psychopharmacology: Psychotherapeutic Drugs

(4) STAFF

Prerequisites: Psychology 1, 5, and 7; and Psychology 111 or 115 or MCDB 126A or MCDB 126B or MCDB 126C; open to psychology, biopsychology, pharmacology and interdisciplinary studies majors only.

Not open for credit to students who have completed Psychology 133A.

Recommended preparation: Psychology 115.

An introduction to the biochemical, physiological, and behavioral effects of medically useful, psychoactive drugs.

134. Psychopharmacology: Drugs of Abuse

(4) STAFF

Prerequisites: Psychology 1, 5, and 7; and Psychology 111 or 115 or MCDB 126A or MCDB 126A or MCDB 126B or MCDB 126C; open to psychology, biopsychology, pharmacology and interdisciplinary studies majors only.

Not open for credit to students who have completed Psychology 133B.

Recommended preparation: Psychology 115.

An introduction to the biochemical, physiological, and behavioral effects of self-administered, psychoactive drugs.

137. Behavioral Endocrinology

(4) KIPPIN, SZUMLINSKI

Prerequisites: Psychology 1, 5, 7, and 111; open to psychology, biopsychology, pharmacology and interdisciplinary studies majors only.

Introduction to the role of hormones in the regulation of behavior. Focus on the neural and/or cellular mechanisms underlying the effects of hormones on various behaviors (e.g. reproduction, ingestion, aggression, rhythmicity).

137L. Laboratory in Behavioral Endocrinology

(5) KIPPIN

Prerequisite: Psychology 1, 5, 7, and 111.

Open to psychology, biopsychology and interdisciplinary studies majors only.

Exploration of the laboratory techniques and methodologies used to study the neural bases of hormonally-influenced behaviors.

138. Social Memory

(4) KLEIN, HAMILTON

Prerequisites: Psychology 1, 5, 7, and 102; open to psychology and biopsychology majors only.

Review of research and theory in social memory and its influence on interpersonal relationships, including impression formation, self-perception and theory of mind. Emphasis on recent neuropsychological findings bearing on social memory.

140. Social Influence

(4) MACKIE

Prerequisites: Psychology 1, 5, 7, and 102; open to psychology, biopsychology and interdisciplinary studies majors only.

Review of research and theory of social influence with particular emphasis on attitude formation and change through persuasion, compliance, conformity, and the relationships between affective, cognitive, and behavioral processes.

142. Cognitive Development

(4) COSMIDES, GERMAN

Prerequisites: Psychology 1, 5, 7, and 105; open to psychology, biopsychology and interdisciplinary studies majors only.

Development of cognition from birth to maturity. Piagetian, Soviet, and information processing theories and research. Primary emphasis on normal human development; secondary emphasis on abnormal and animal cognition. Infant perception and cognition, early childhood competencies, cognitive underpinnings of academic skills.

143. Human Relationships and Their Origins

(4) BUGENTAL

Prerequisites: Psychology 1, 5, and 7; open to psychology, biopsychology and interdisciplinary studies majors only.

Not open for credit to students who have completed Psychology 104.

An interdisciplinary approach to human relationships and their origins. Focus on relevant biological, developmental, and social psychological theory and research.

143P. Practicum in Social Development

(5) BUGENTAL

Prerequisites: Psychology 1, 5, 7, and 143; concurrent enrollment in Psychology 143S; open to psychology, biopsychology and interdisciplinary studies majors

only; consent of instructor.

Field experience in conjunction with Psychology 143S. Students work under the supervision of an appropriate staff member at a local agency four half-days a week. Focus on developmental problems.

143S. Seminar in Social Development

(3) BUGENTAL

Prerequisites: Psychology 1, 5, 7, and 143; concurrent enrollment in Psychology 143P; open to psychology, biopsychology, and interdisciplinary studies majors only; consent of instructor.

A weekly three-hour seminar dealing with social, emotional, and behavioral problems in childhood. Each student writes and presents a paper on a relevant topic.

146. Psychology of Human Mating

(4) RONEY

Prerequisite: Psychology 1, 5, and 7; open to psychology, biopsychology and interdisciplinary studies majors only.

Recommended preparation: Psychology 155.

Surveys interdisciplinary approaches to understanding human mating. Some of the topics covered include sex differences in mate preferences, hormonal correlates of sexuality, determinants of physical attractiveness, and evidence for the existence of human pheromones.

147. Intergroup Relations

(4) HAMILTON

Prerequisite: Psychology 1, 5, 7, and 102; open to psychology, biopsychology and interdisciplinary studies majors only.

Review of social psychological theory and research relevant to intergroup relations. Topics may include social categorization, stereotyping, prejudice, discrimination, and intergroup conflict and cooperation.

148. The Psychology of Self

(4) KLEIN, MAJOR

Prerequisites: Psychology 1, 5, 7, and 102; open to psychology, biopsychology and interdisciplinary studies majors only.

Examination of the self from social and cognitive perspectives. Topics will include: (a) how we come to know who we are and what we are like, (b) how we structure knowledge about the self in our minds, and (c) how we use this self-knowledge to guide and direct our behavior.

149. Social Psychology of Close Relationships

(4) COLLINS

Prerequisites: Psychology 1, 5, 7; open to psychology, biopsychology and interdisciplinary studies majors open.

Not open for credit to students who have completed Psychology 160NC.

Review of research and theory on the social psychology of close relationships. Explores cognitive, affective, and motivational processes in adult intimate relationships. Topics include attachment, love, commitment, intimacy, equity, social cognition, social support, and the link between relationships and health.

153L. Laboratory in Developmental and Evolutionary Psychology

(5) RONEY, GERMAN, BUGENTAL, COSMIDES

Prerequisite: Psychology 1, 5, and 7; open to psychology, biopsychology, and interdisciplinary studies majors only.

Introduction to empirical methods used in evolutionary and developmental research. Course focuses on the framing and testing of adaptationist and developmental hypotheses. Empirical projects may include morphometric measurements, hormone assays, reasoning tests, and use of archival data.

154. Cultural Psychology

(4) KIM

Prerequisite: Psychology 1, 5, 7, and 102; open to psychology, biopsychology and interdisciplinary studies majors only.

Discusses how culture influences human psychological processes. Reviews empirical evidence of cultural differences in how people think, feel and act, and also the processes in which these psychological tendencies are connected to culture.

155. Evolution and Cognition**(4) COSMIDES**

Prerequisites: Psychology 1, 5, and 7; open to psychology, biopsychology and interdisciplinary studies majors only.

Explores ways in which the human mind can be seen as a collection of devices designed by evolution to solve adaptive problems faced by our hunter-gatherer ancestors. Topics may include cooperation, mating, sibling jealousy, coalitional aggression, etc.

157. Social Stigma**(4) MAJOR**

Prerequisites: Psychology 1, 5, and 7; and Psychology 102; open to psychology, biopsychology and interdisciplinary studies majors only.

Course addresses classic and contemporary theory and research on the psychology of stigma. Emphasis is on the experience of members of stigmatized groups. Issues covered include affective, cognitive, motivational, and interpersonal aspects of stigmatization.

159. Modern Approaches to Psychotherapy**(4) SHERMAN**

Prerequisites: Psychology 1, 5, and 7; open to psychology, biopsychology and interdisciplinary studies majors only.

Not open for credit for students who have completed Psychology 160SP.

Recommended preparation: Psychology 103 or 114 or 129.

Modern approaches to psychotherapy are presented, discussed, and evaluated. Therapies may include Adlerian, multimodal, person-centered, mind-body, existential-humanistic, reality, integrative, transactional analysis, and cognitive-behavioral.

160AA-ZZ. Special Topics in Psychology**(4) STAFF**

Prerequisites: Psychology 1, 5, and 7; open to psychology, biopsychology and interdisciplinary studies majors only; consent of instructor.

May be repeated for credit to a maximum of 8 units provided letter designations are different.

Lectures in special areas of interest in contemporary psychology. Consult the department office regarding proposed course topics.

163AA-ZZ. Contemporary Issues in Biopsychology**(4) STAFF**

Prerequisites: Psychology 1, 5, 7, and 111; upper-division standing; open to psychology, biopsychology and interdisciplinary studies majors only; consent of instructor.

May be repeated for credit to a maximum of 8 units provided letter designations are different.

An examination of special topics of current importance in biopsychology. Content will vary. Information on content may be obtained in the department office.

166. Neurobiology of Brain States**(4) JANUSONIS**

Prerequisites: Psychology 1, 3, 5, and 7; Psychology 111. Open to psychology, biopsychology, and interdisciplinary studies majors only.

Explores the neuroanatomy and neurophysiology of a variety of brain states such as sleep, transcendental experience, autism, depression, and schizophrenia.

167. The Neurobiology of Stress**(4) BLASCOVICH**

Prerequisites: Psychology 1, 5, and 7; and, Psychology 3 or 111; open to psychology, biopsychology, and interdisciplinary majors only.

Not open for credit to students who have completed Psychology 163BN.

Critiques current research on the effects of stress upon specific neuronal systems and behaviors. Topics address the neurobiological basis for why the evolutionary-adaptive stress response is a major contributor to physical and mental illness in contemporary society.

168. Development and Plasticity of the Brain**(4) REESE, JANUSONIS**

Prerequisites: Psychology 1, 5, 7, and 111; open to

psychology, biopsychology and interdisciplinary studies majors only.

Recommended preparation: MCDB 114.

An examination of the major developmental events producing the organization and connectivity of the nervous system.

169L. Laboratory in Neuroanatomy**(5) REESE**

Prerequisites: Psychology 1, 5, and 7; and, Psychology 111 or MCDB 114 (either may be taken concurrently); open to psychology, biopsychology, and interdisciplinary studies majors only.

A combined laboratory/lecture course examining the organization and connectivity of the mammalian nervous system. Topics covered will include neurohistological techniques; neurology and neuropsychology; comparative neuroanatomy.

171. Retinal Development**(4) REESE**

Prerequisites: Psychology 1, 5, 7, and 111.

Not open for credit for students who have completed Psychology 163BR.

Recommended preparation: Psychology 168 or MCDB 115.

An examination of the development processes underlying the formation of the retina, including proliferation, neurogenesis, fate determination, differentiation, target recognition, synaptogenesis and cell death.

196. Honors Seminar in Psychology**(4) STAFF**

Prerequisites: upper-division psychology and biopsychology majors only; consent of instructor.

Students must have a minimum 3.5 overall GPA, and a minimum 3.5 upper-division psychology GPA. All qualified students will be invited to apply in the Psychology office at the end of fall quarter. Students not meeting minimum requirements may be nominated by a member of the faculty. All final decisions for enrollment will be made by the coor. of the seminar.

A series of weekly meetings with individual faculty representing diverse areas within psychology. Background readings are required for each meeting. Full participation in the seminar is required.

197A. Honors Research in Psychology**(4) STAFF**

Prerequisite: Psychology 196; at least two quarters of psychology 99P, 99, 199P, or 199; consent of department. Students enrolled in EAP during their junior year who are unable to take Psychology 196 may still enroll; see department undergraduate advisor.

Psychology 197A-B-C is a three-quarter sequence course with the final grade issued upon completion of 197C. No more than 12 units of Psychology 197A-B-C, 198, and 199 may be applied toward the major.

Independent study under supervision of faculty member, involving either design and execution of independent research project or scholarly analysis and critique of theoretical and research literature pertaining to substantial issues. Honors thesis qualifies student for distinction in major upon graduation. (F,V,S)

198. Readings in Psychology**(1-4) STAFF**

Prerequisites: open only to psychology, biopsychology and interdisciplinary studies majors only; upper-division standing; completion of 2 upper-division courses in psychology; consent of department.

Students must have a minimum 3.0 grade-point average for the preceding three quarters and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined. No more than 12 units combined of Psychology 197A-B-C/198/199 courses may be applied toward the psychology and biopsychology major.

Readings in psychology under the guidance of a faculty member in the department. Students wishing to enroll should prepare a short plan of study.

199. Independent Research in Psychology**(1-4) STAFF**

Prerequisites: upper-division standing; completion of 2 upper-division courses in psychology; consent of department; completion; one quarter of Psychology 199P.

Students must have a minimum 3.0 grade-point average for the preceding three quarters and are limited to 5 units per quarter and 30 total in all 98/99/99P/198/199/199AA-ZZ courses combined. Psychology 199 courses are limited to no more than 4 units in one quarter. No more than 12 units combined of 197A-B-C/198/199/199P courses may be applied toward fulfilling psychology and biopsychology major requirements.

Advanced independent research under the guidance of a faculty member in the department, including writing a research report or review.

199P. Independent Research in Psychology**(1-4) STAFF**

Prerequisites: upper-division standing; completion of 2 upper-division courses in psychology; consent of department.

Students must have a minimum 3.0 grade-point average for the preceding three quarters and are limited to 5 units per quarter and 30 total in all 98/99/99P/198/199/199AA-ZZ courses combined. Psychology 199 courses are limited to no more than 4 units in one quarter. No more than 12 units combined of 197A-B-C/198/199/199P courses may be applied toward fulfilling psychology and biopsychology major requirements.

Independent research under the guidance of a faculty member in the department.

GRADUATE COURSES

Graduate standing in psychology or consent of instructor is prerequisite to all graduate offerings unless otherwise noted.

215. Neuropharmacology of Psychoactive Drugs**(4) SZUMLINSKI**

Prerequisites: graduate standing; consent of instructor.

An examination of the pharmacological and neurochemical mechanisms influencing the actions of psychoactive drugs.

219. Behavioral Pharmacology**(4) ETTEBERG**

An examination of the application of behaviorist learning principles to the study of pharmacology. Topics include the development of behavioral screens for psychotherapeutic drugs, research models of substance abuse, behavioral profiles of psychoactive drugs, and drug discrimination techniques.

221A. Design and Measurement**(4) ASHBY, COLLINS**

Prerequisite: graduate standing in psychology.

Recommended preparation: a course in calculus.

Experimental design and statistical analysis in psychological research. Includes basic probability, sampling and distribution theory, hypothesis testing, and estimation.

221B. Design and Measurement**(4) ASHBY, COLLINS**

Prerequisite: Psychology 221A.

Experimental design and statistical analysis in psychological research. Analysis of variance and related topics.

221C. Multivariate Analysis in Psychology and Related Social Sciences**(4) COLLINS**

Prerequisites: Psychology 221A-B; graduate standing in psychology.

The use in psychology of the general linear model, multiple regression, discriminant function analysis, factor-analysis, and principal components analysis.

221D. Structural Equation Modeling**(4) COLLINS**

Prerequisites: Psychology 221A-B-C.

Theory and methods of structural equation modeling including path analysis, confirmatory factor analysis, and latent variable structural models. Course emphasizes application and includes hands-on experience with computer programs such as AMOS and EQS.

221E. Statistical Analysis of fMRI Data**(4) ASHBY**

Prerequisites: Psychology 221A-B; graduate standing.

Experimental design and statistical analysis in

fMRI research. Linear and nonlinear models of the hemodynamic response function, the general linear model in fMRI analysis, post hoc testing, group testing with the random effects model, and connectivity analysis.

226. Cognitive Development

(4) GERMAN

Prerequisite: graduate standing.

Discusses the concept of cognitive development, its psychobiological basis, and representative psychobiological, information-processing, Piagetian, and linguistic theories of cognitive development.

227. Human Memory and Cognitive Processes

(4) REVLIN, HEGARTY

Prerequisite: graduate standing.

Survey of theoretical approaches and empirical findings in the areas of learning, memory, psycholinguistics, and cognitive processing. Topics include structure and process models of memory, nature of the information-processing approach, and related experimental methodology and findings.

228. Perception

(4) ECKSTEIN, LOOMIS

Prerequisite: graduate standing.

Analysis of psychophysical relations in sensory processes with stress on detection, scaling, discrimination, spatial and temporal resolution, and the interaction of cue systems in perceptual behavior.

231. Cognitive Neuroscience

(4) ASHBY, MILLER

Examination of the neurological basis of cognition with material from research in psychology, neurology, and the neurosciences with brain injured and healthy human and non-human subjects. Topics include memory, language, and perception.

232. Neuroimaging

(4) MILLER, GRAFTON

Prerequisite: graduate standing.

Introduces students to the theoretical and practical issues involved in conducting functional magnetic resonance imaging (fMRI) experiments. Content includes basic MR physics, physiology of the BOLD signal, experimental design, image processing, statistical analysis, and brain mapping.

233. Electrophysiology (EEG)

(4) GIESBRECHT

Prerequisite: graduate standing.

An examination of the use of electroencephalography (EEG) to understand the neural mechanisms of cognition and perception. Topics include the neural basis of the EEG signal, methods of acquisition, experimental design, analysis, and interpretation.

235. Neuroendocrinology

(4) KIPPIN

Prerequisites: graduate standing; consent of instructor.

Focus on the regulation of hormone secretion by the central nervous system and on the neural mechanisms underlying hormonal effects on the behavior/physiology of the whole organism.

237. Cognition

(4) MAYER

Prerequisite: graduate standing.

An in-depth analysis of advanced topics in human cognition. The course will include discussion of the cognitive processes involved in areas such as human thinking, problem solving, memory, and learning.

238. Social Perception

(4) HAMILTON, KLEIN

Review of current research in person perception, social categorization, and social judgment.

239. The Social Psychology of Intergroup Relations

(4) HAMILTON, MACKIE

Prerequisite: consent of instructor.

Surveys the major social psychological theories of intergroup relations and the social psychological processes that facilitate intergroup conflict and its reduction.

240. Social Influence

(4) MACKIE

Prerequisite: graduate standing.

Course covers the goals of social influence, the major cognitive, motivational, and associationistic theories of attitude change, conformity, and the attitude/behavior relationship.

242. Social Psychophysiology

(4) BLASCOVICH

Familiarize students with advanced topics in psychophysiology as applied to social psychological issues. The course will cover topics including: the evolution of social psychophysiology, the nature of physiological indices, theoretical background, and methodological techniques.

245. Cultural Psychology

(4) KIM

Prerequisite: graduate standing.

Review of research on cultural influences on psychological processes. Examines theoretical and methodological foundations of cultural research in psychology. Also discusses the effects of culture-specific assumptions, practices, and institutions on human cognition, motivation, emotion, and social interaction.

246. Social Stigma

(4) MAJOR

Course addresses classic and contemporary theory and research on the psychology of stigma. Emphasis is on experience of members of stigmatized groups. Issues covered will include affective, cognitive, motivational, and social interaction consequences of stigma.

247. Human Mating Psychology

(4) RONEY

Prerequisite: graduate standing.

Surveys the current status of evolutionary approaches to human mating psychology. Focuses on emerging interdisciplinary approaches to this topic, with emphasis on the potential integration of phylogenetic, physiological, cognitive, and behavioral levels of analysis.

248. The Self and Social Psychology

(4) KLEIN

Examines the self from a social cognition perspective. Topics include the basis for self-knowledge, the mental representation of self-knowledge, and the effects of this knowledge on behavior.

249. Social Development

(4) BUGENTAL

Prerequisite: undergraduate course in developmental psychology.

Course will cover the application of biological, cognitive developmental, and social cognition approaches to social development in infancy and childhood. Topics will include: attachment processes, emotional development, social inference development, moral development, gender role development, and developmental psychopathology.

252. Advanced Research Methods in Social Psychology

(4) BLASCOVICH

Prerequisite: graduate standing.

Introduction to philosophy of science, advanced experimental designs, specific methodologies, methodological problems.

253. Social Psychology of Close Relationships

(4) COLLINS

Review of research and theory on the social psychology of close relationships. Explores cognitive, affective, and motivational factors that shape interpersonal behavior. Topics include attachment processes, commitment, intimacy, trust, social support, equity, social cognition, and the self in close relationships.

254. Evolutionary Psychology

(4) COSMIDES

Prerequisite: graduate standing.

Introduction to basic concepts in evolutionary psychology; how natural selection works, ancestral environments, how to use theories of adaptive problems to discover new cognitive mechanisms, standards of evidence for adaptations, relation of evolved psychology to culture.

258. Social and Personal Identity

(4) MAJOR

Prerequisite: graduate standing.

Examines personal and social identity from a motivational perspective. Topics include theory and research on the nature of personal, social and collective self, antecedents and consequences of personal and collective self-esteem, motivations for self-enhancement, self-consistency, self-presentation and positive social identity.

264. Dynamic Systems In Psychology

(4) ASHBY

Prerequisite: Psychology 221A-B.

Quantitative and qualitative analysis of linear and nonlinear dynamical systems in psychology; state space representations; stability, controllability, and observability of linear systems; phase flow and equilibrium analysis of nonlinear systems; applications to neural networks and other connectionist models.

265. Computational Neuroscience

(4) ASHBY

Prerequisite: Psychology 221A-B.

Survey of methods in computational neuroscience; single cell methods including Hodgkin-Huxley models, occupation theory, integrate-and-fire models; neural network modeling including linear system theory, nonlinear dynamics, connectionism, Hodgkin-Huxley-like network models, models of synaptic plasticity, methods for generating predicted BOLD signals.

267. Neurobiology of Cerebral Cortex

(4) JANUSONIS

Prerequisite: graduate standing; consent of instructor.

Designed to bridge the three-dimensional neuroanatomy of the human brain and fMRI studies. Cortical areas, layers, as well as their connectivity, vasculature and function are explored in considerable detail.

268. Development and Plasticity of the Brain

(4) REESE

An examination of the major developmental events producing the organization and connectivity of the nervous system. Offered concurrently with Psychology 168, but graduate students will be required to complete additional reading and writing assignments.

269. Neuroanatomy

(4) REESE, JANUSONIS

An examination of the organization of the vertebrate nervous system. Topics include neurohistological techniques; neurology and neuropsychology; comparative neuroanatomy; neural degeneration; developmental neuroscience.

590A-B-C. Seminar on Teaching of Psychology

(1-1-1) HEGARTY

Prerequisite: open to psychology students with graduate standing; seminar is required of all new teaching assistants in the Department of Psychology.

Seminar designed to prepare psychology graduate students for various roles related to the teaching of undergraduate psychology courses. Topics may include leading discussions, preparing and grading exams, conferencing, evaluating writing, ethical issues, lecturing effectively, and using audio-visual aids.

591. Practicum in the Teaching of Psychology

(1) STAFF

Prerequisites: open only to students who have completed their doctoral candidacy examinations; consent of department and instructor.

Preparation for the teaching of an undergraduate course in psychology conducted under the guidance of a faculty member in the department. Students wishing to enroll must prepare a short plan of study.

592AA-ZZ. Special Interest Group Research Seminar

(1) STAFF

Research seminar for special interest groups in psychology. Each special interest group has its own letter designation available in department office.

593. Professional Skills for Academic Psychologists

(3) ETTEBERG

Priority will be given to students who have

successfully completed their doctoral candidacy exams.

A discussion of practical issues related to securing and maintaining an academic position within a university/college environment. Topics may include writing grants, preparing a vitae, the job interview, tenure, conference presentations, lecture preparation and presentation.

594AA-ZZ. Special Topics

(3) STAFF

Prerequisite: graduate standing.

Special seminar on research subjects of current interest. Each faculty member has their own letter designation available in department office.

595. Independent Readings for M.A.

(2-12) STAFF

No more than 8 units total may be taken toward credit for the M.A.

The purpose of this course is to provide supervised readings on selected topics.

596. Directed Reading and Research

(2-12) STAFF

Required of all first-, second-, and third-year psychology graduate students. Minimum of 2 units per quarter. No more than half the units necessary for the master's degree may be taken in Psychology 596.

The purpose of this course is to provide supervised experience in experimental design and laboratory procedures on selected topics, including the formulation of experimental problems, discussion of relevant literature, and the analysis and interpretation of experimental results.

597. Individual Study for Ph.D. Examinations

(1-12) STAFF

No unit credit allowed toward advanced degree.

Preparation for Ph.D. examinations under supervision of chair of student's doctoral committee.

598. Master's Thesis Research and Preparation

(2-12) STAFF

No unit credit allowed toward advanced degree.
Research and preparation for the master's thesis.

599. Dissertation Research and Preparation

(2-12) STAFF

Empirical and theoretical investigations of special problems in psychology in relation to dissertation research.

Religious Studies

Department of Religious Studies
Division of Humanities and Fine Arts
Humanities and Social Sciences 3001E
Telephone: (805) 893-7136

E-mail: relst@religion.ucsb.edu

Web site: www.religion.ucsb.edu

Department Chair: *Catherine L. Albanese*

Faculty

Ahmad A. Ahmad, Ph.D., Harvard University, Assistant Professor (Islamic intellectual history, Islamic law, and Islamic political philosophy)

Catherine L. Albanese, Ph.D., The University of Chicago, Professor (American religious history, religion and American culture)

Rudy V. Busto, Ph.D., UC Berkeley, Associate Professor (Chicano/Latino religions, Asian American/Pacific Islander religions, American religions)

José Ignacio Cabezón, Ph.D., University of Wisconsin, Professor (Tibetan Buddhism, Indo-Tibetan Buddhist philosophy, Buddhism and popular culture, sexuality and gender studies, theoretical issues in the study of Tibet)

Juan E. Campo, Ph.D., The University of Chicago, Associate Professor (history of religions—Islam, Arabic)

Magda Campo, M.A., American University in Cairo, Lecturer (Arabic)

Thomas A. Carlson, Ph.D., The University of Chicago, Associate Professor (Christianity and culture; religion and philosophy)

Racha M. el Omari, Ph.D., Yale University, Assistant Professor (Arabic, Islamic theology, Islamic Intellectual history)

Roger Friedland, Ph.D., University of Wisconsin, Professor (sociology and religion, cultural analysis)

W. Randall Garr, Ph.D., Yale University, Professor (Northwest Semitic languages, Hebrew Bible, ancient Near East)

Richard D. Hecht, Ph.D., UC Los Angeles, Professor (history of religions, Judaic studies)

Barbara A. Holdrege, Ph.D., Harvard University, Associate Professor (comparative history of religions, South Asian religions, Judaic studies)

Gurinder Singh Mann, Ph.D., Columbia University, Professor (Sikh studies, South Asian religions)

William Powell, Ph.D., UC Berkeley, Associate Professor (history of religions—China)

Dwight F. Reynolds, Ph.D., University of Pennsylvania, Professor (Arabic languages and literatures, folklore and folklife)

Wade Clark Roof, Ph.D., University of North Carolina, Professor (sociology and psychology of religion, American religion)

Ann Taves, Ph.D., University of Chicago, Professor (Catholic Studies, history of modern Christianity, American religious history)

Inés Talamantez, Ph.D., UC San Diego, Associate Professor (Native American religions)

Stanley Tambiah, Ph.D., Cornell University, Distinguished Visiting Professor (Buddhism, comparative religion, religion and politics)

Christine M. Thomas, Ph.D., Harvard University, Associate Professor (Hellenistic religions, early Christianity, archaeology of religions)

Stephanía Tutino, Ph.D., Scuola Normale Superiore, Assistant Professor (early modern Europe, Reformation, religious and political thought)

Vesna A. Wallace, Ph.D., UC Berkeley, Associate Professor (Sanskrit languages and literature, Buddhism)

David G. White, Ph.D., The University of Chicago, Professor (South Asian religions)

Mayfair Yang, Ph.D., UC Berkeley, Professor (Anthropology, China, critical theory, media, gender, state)

Emeriti Faculty

W. Richard Comstock, Ph.D., Union Theological Seminary, Professor Emeritus (religion in western culture)

Phillip E. Hammond, Ph.D., Columbia University, Professor Emeritus (sociology of religion)

Nandini Iyer, M.A., Oxford University, Lecturer Emerita (Sanskrit)

Gerald J. Larson, Ph.D., Columbia University, Professor Emeritus

Charles H. Long, Ph.D., The University of Chicago, Professor Emeritus

Raimundo Panikkar, Ph.D., D.Sc., University of Madrid; Th.D., University of Rome, Professor Emeritus

Birger A. Pearson, Ph.D., Harvard University, Professor Emeritus

Affiliated Faculty

Geraldo Aldana, Ph.D. (Chicana and Chicano Studies)

Sarah Cline, Ph.D. (History)

Harold Drake, Ph.D. (History)

Ronald Egan, Ph.D. (East Asian Languages and Cultural Studies)

Robert Erickson, Ph.D. (English)

Simonetta Falasca-Zamponi, Ph.D. (Sociology)

Sharon Farmer, Ph.D. (History)

Mario Garcia, Ph.D. (History, Chicana and Chicano Studies)

Giles Gunn, Ph.D. (English)

Lisa Hajjar, Ph.D. (Law and Society)

Mary Hancock, Ph.D. (Anthropology)

R. Stephen Humphreys, Ph.D. (History)

Mark Juergensmeyer, Ph.D., (Global and International Studies and Sociology)

Nuha N.N. Khoury, Ph.D. (History of Art and Architecture)

Claudine Michel, Ph.D. (Black Studies)

Marianne Mithun, Ph.D. (Linguistics)

Anne Marie Plane, Ph.D. (History)

Stuart T. Smith, Ph.D. (Anthropology)

Jon R. Snyder, Ph.D. (French and Italian)

Paul R. Spickard, Ph.D. (History)

Elisabeth Weber, Ph.D. (Germanic, Slavic, and Semitic Studies)

The Department of Religious Studies at UCSB is unique among California universities, state universities, and colleges. The courses it offers address the critical issues relating to the subject of religion in its many facets: historical, cultural, literary, aesthetic, sociological, experiential, and philosophical. In introductory and advanced courses, its faculty—respected in their fields nationally and internationally—regularly teach about the religions of the world, and about the complex relationships between religion and politics, society, war, and everyday life. It is the only such department in the University of California system to offer B.A., M.A., and Ph.D. degrees.

The Department of Religious Studies at UCSB houses the prestigious Capps Center for the Study of Ethics, Religion, and Public Life; maintains close ties with the Center for Middle East Studies; boasts several endowed chairs located within it—the XIV Dalai Lama Chair in Tibetan Studies, the Virgil Cordano Chair in Catholic Studies, and the Tipton Distinguished

Visiting Chair in Catholic Studies. The department teaches a plethora of research languages, including Arabic, Targumic, Aramaic, Coptic, Hebrew, Hindi, Pali, Persian, Punjabi, Sanskrit, Syriac, Tibetan, and Turkish; oversees, besides its undergraduate major in Religious Studies, undergraduate minors in American Indian and Indigenous Studies, Jewish Studies; and offers Ph.D. students the opportunity to choose program emphases in Global Studies, European Medieval Studies, or Women's Studies to add to their degree.

All students who take a religious studies course learn both to appreciate the importance of religion to human thought, action, and creativity and to judge its character and historical impact in cultural context. Moreover, they discover how the critical study of religion leads to increased understanding of the relationships among the various fields of knowledge that constitute the humanities and social sciences. A departmental major gains sound general knowledge about religion East and West, ancient and modern. Careful selection of upper-division electives allows the undergraduate major to pursue a concentration in a variety of religious traditions. Students also become familiar with the ideas and methods employed in the critical study of religious phenomena. Enterprising students can qualify for a double major in religious studies and some other major field such as English, history, anthropology, political science, philosophy, art, or economics.

The bachelor of arts degree in religious studies is a solid liberal arts degree, providing graduates an excellent basis from which to pursue careers requiring imagination, problem-solving and communication skills, and awareness of human diversity. International studies and graduate work in the humanities and certain areas of the social sciences are other strong possibilities. Students with a bachelor's degree in religious studies who are interested in pursuing a California Teaching Credential should contact the credential advisor in the Graduate School of Education as soon as possible.

Religious studies majors are encouraged to meet with the department's undergraduate advisor periodically for assistance in planning their curriculum. Also, the department chair and other faculty are available to consult about programs and academic plans. The department provides an information sheet for undergraduate majors, an up-to-date major requirement list, and a description of courses to be offered each quarter.

Foreign Languages

Many of the greatest ideas and writings concerning the study of religions, or of a religious character, were formulated in languages other than English. Majors are strongly urged to acquire proficiency in one or more European (e.g., French, German, Spanish, Greek, Latin) or non-European (e.g., Chinese, Japanese, Hindi, Arabic, Hebrew, Sanskrit) languages. Election to the Phi Beta Kappa honor society requires proficiency in one foreign language, usually demonstrated by completion of the fifth quarter or its equivalent. Students should consult with their departmental advisor to select the most appropriate language. (Languages taught in the department of Religious Studies include Arabic,

Coptic, Hebrew, Hindi, Pali, Persian, Punjabi, Sanskrit, Syriac, Targumic Aramaic, Tibetan, and Turkish.) Also, majors should seriously consider participating in the university's Education Abroad Program, particularly in Asia, the Middle East, Africa, and Latin America.

Foreign Travel

Undergraduate majors in Religious Studies may be able to fulfill some of their major requirements through the Travel Study Program in Turkey offered by Summer Sessions each year and directed by Professor Christine Thomas. The two courses offered through this program are Religious Studies 128A, Religion and Spirituality in the Roman Empire, and Religious Studies 128C, Sacred Geography of the Ancient Mediterranean.

Undergraduate Honors

The department offers honors sections in lower-division survey courses such as Religious Studies 1, 3, 5, 7, 8, 12, and 15. Upper-division College Honors Program students may design their own contract courses and independent studies courses with religious studies faculty. Candidates for the religious studies honors program must be in residence at UCSB for at least one year (three quarters) as religious studies majors, have a cumulative grade-point average of 3.5, and a grade-point average of 3.75 in religious studies. During their senior year, students work closely with department faculty to prepare an honors thesis. The honors seminar, Religious Studies 195, is designed to facilitate research and writing of the thesis. Honors program graduates are identified separately each year at the head of the graduation list for religious studies, and receive the award of Distinction in the Major upon graduation.

Students who complete the departmental honors program are eligible for induction into Theta Alpha Kappa, the national honor society in religious studies.

Awards

The Edward C. Truman award is presented annually to a freshman, sophomore, or junior major deemed outstanding by the department and the UCSB Affiliates.

Undergraduate Program

Bachelor of Arts— Religious Studies

Preparation for the major. One lower-division religious studies course, excluding language courses.

Upper-division major. Forty-four units, distributed as described below. The same course units may not be used to fulfill the requirements in more than one of the areas listed below. Only one language course (4 units) may apply toward credit for the upper division major. A maximum of 12 units from related fields may apply towards credit for the major.

A. Methodological Approaches. Eight units from Religious Studies 106, 110, 110B, 110C, 113, 116C, 128C, 131H, 141A-B-C, 143, 145, 153, 162A, 162C, 177, 179, 180, 183, 183B, 184B; Anthropology 116B, 196; Comparative Literature 183; French 169EX; History 114A-

B-C-D, 114P, 117D, 119Q; Philosophy 112.

- B. Cultural Areas and Traditions. Twenty-four units divided into 12 units in an area of emphasis and 12 units in three other areas.
1. South Asian Religious Traditions. Religious Studies 111A, 111B, 135A-B-C-D-E-F, 146E, 158A-B-C, 159D-E-F-G-H-I-J-K-L-M-N-O, 160A, 161A-B-C-D, 162A, 162-C-D-E-F, 164A-C, 169, 171A-B-C-D, 184A-B.
 2. East Asian Religious Traditions. Religious Studies 120, 161B, 164B, 166A-B-C-E-F-H, 167A-B-D, 175, 178, 183, 183B.
 3. Jewish, Islamic, and Near Eastern Religious Traditions. Religious Studies 115A-B-C-D-E-F, 117A-B, 118J, 119A-B, 121A-B-C, 129, 130, 131A-B-C-D-E-F-H-J, 133, 140, 140A-B-C-D-E-F, 142A-B-C, 148A-B-C, 149A, 157A-B-C, 173A-B, 185, 186A-B, 189A-B-C History 117D, 119
 4. Christian, Mediterranean, and European Religious Traditions. Religious Studies 114X, 116A-B-D-E, 118J, 127A-B-C, 128A-C, 137, 138A-B-C-D, 139A-B-C-D-E; Classics 108, German 187; History 114A-B-C-D-P, 117D, 119, 119Q.
 5. Religions of the Americas. Religious Studies 101, 110B, 110D, 114B-C-D, 116E, 123, 124R, 141B-C, 147, 150, 151A-B-C, 152, 153, 155, 156, 176, 191A, 192, 193.
- C. Topics in the Study of Religion. Eight units from Religious Studies 100A, 100A-B, 101, 103B, 106, 108, 110B-C, 112, 113, 118A, 125, 128, 131H, 132, 134, 136, 143, 145, 153, 154, 155, 162C, 172B, 173, 175, 182, 190AA-ZZ, 191A, 193B; Classics 108; French 169EX; German 143, 187; History 117D, 119, 119Q, Interdisciplinary Studies 150.
- D. Problems in the Study of Religion. Four units. Religious Studies 104, or a Senior Project: Religious Studies 195, or Independent Studies: Religious Studies 199.

For major regulations refer to the Religious Studies major requirement sheet on the department's Web site www.religion.ucsb.edu.

Minor—American Indian and Indigenous Studies

All courses to be applied to the minor must be completed on a letter-grade basis. This includes preparation and upper-division courses and both courses offered by the Department of Religious Studies and those offered by other departments.

Preparation for the minor. Religious Studies 14 and History 8.

Upper-division minor. Twenty upper-division units from at least two different departments from the following list: Anthropology 104H, 116, 127, 131, 131CA, 133, 135, 136, 139, 141, 150A-B-C, 155, 163, 175, 187; Chicana/o Studies 117, 119, 120, 136, 139, 140, 144, 150, 154E, 160, 168A-B-F-R, 180, 183, 184B, 186A-B, 189B; Comparative Literature 153; English 122NE, 134NA; Environmental Studies 104, 122NE, 189; Film Studies 127, 140; History 151FQ, 151I, 154LA-LB, 156A-B-I, 168A-B-F-R, 179A-B, 189E; Law and Society 123, 124; Linguistics 134, 180; Religious Studies 110D, 114B, 124R, 191A, 193; Sociology 130LA, 130SW, 144, 154F.

Note: Substitutions and waivers are subject to approval by the department. Check catalog course descriptions for prerequisites or other departmental restrictions. See "Academic Minors" for special conditions governing minors in the College of Letters and Science.

Minor—Jewish Studies

The Jewish Studies program provides the possibility for students to complete an interdisciplinary minor in Jewish Studies. Within the minor, there is the opportunity to study either biblical Hebrew or modern Hebrew, the Hebrew Bible, in Jewish history, culture, society, literature, and religion.

The program also encourages students to take advantage of the Education Abroad program, especially the Jerusalem Study Center at the Hebrew University. Other study centers may also be appropriate for the program.

Undergraduate program: All courses to be applied to the minor must be completed on a letter-grade basis. This includes both courses offered in Jewish Studies and those offered by other departments and applied to the minor.

Preparation for the minor. Religious Studies 17A-B-C or, Hebrew 1, 2, 3 (or equivalent), or, GSS 95A-B-C

Upper division minor: Twenty-four units, including:

- A. One course in Hebrew Bible: RS 115A or English 116A (4 units)
- B. Two courses in Jewish history and religion (8 units): History 117D, 131F, 133D, 133Q, 146T, Religious Studies 105, 115B, 115D, 115E, 115D, 115E, 115F, 116A, 118J (same as Soc 118J), 130, 131B, 131C, 131D, 131E, 133
- C. Two courses in Jewish literature, culture, and society (8 units): Comparative Literature 113, 122A, 122B (same as French-Ital 122X) English 134JB, 134JL, 197 History 118B; Political Science 149; Religious Studies 24, 116B, 131F, 131H (same as Soc 131H), 131J
- D. One additional course from either of the above lists: Area B, Jewish history and religion or C, Jewish literature, culture and society (4 units).

Students wishing to concentrate in Hebrew should complete the lower-division language preparation and two of the following language courses: Hebrew 4, 5, 6, 114A-B-C, or Religious Studies 142A-B-C. In addition, students concentrating (i) in Biblical Hebrew (ii) in Yiddish may complement their work by Completing Religious Studies 121A-B or Linguistics 194, respectively.

Note: Substitutions and waivers are subject to approval by the chair of the department. Please see "Academic Minors" for special conditions governing minors in the College of Letters and Science.

Graduate Program

The Department of Religious Studies offers training in the religious dimensions of the human experience in diverse traditions and cultures around the world and through time.

All programs emphasize a cross-cultural comparative study of religions and use multi-disciplinary approaches as appropriate to religious

studies, incorporating such disciplines as philology, history, anthropology, sociology, comparative literature, psychology, and philosophy. The master's programs provide a general orientation toward religious studies; the doctoral program offers specialized training leading to professions in teaching and research.

In addition to departmental requirements, candidates for graduate degrees must meet the university degree requirements described in the chapter "Graduate Education at UCSB."

The department has available a number of fellowships to support graduate study, including the J.F. Rowley Endowment Fellowship, the Japan Bamboo Foundation Fellowship, and the Mendell Fellowship in Ethics, offered throughout the University by the Walter H. Capps Center for the Study of Ethics, Religion, and Public Life.

Admission

Applicants are admitted on a competitive basis. Undergraduate grade-point average counts heavily, and scores from the aptitude test of the Graduate Record Examination are required. In addition to departmental requirements for admission, applicants must fulfill university requirements for admission to graduate status described in the chapter "Graduate Education at UCSB." Applicants interested in pursuing a Ph.D. who have completed the M.A. degree in religious studies (or its equivalent) elsewhere may apply directly to the Ph.D. program. Others should apply to the M.A./Ph.D. program, which entails completion of the M.A. Plan 1. Applications for the M.A./Ph.D. program are accepted for fall quarter only; the deadline is December 1. The same schedule is normally required for M.A. Plan 2 applicants.

Master of Arts—Religious Studies

Plan 1 (M.A./Ph.D.). Students admitted to the M.A./Ph.D. program will undertake the M.A. Plan 1. Students are required (1) to complete Religious Studies 200A-D, Proseminar in History and Theory of Religion; (2) to pass a language exam in French or German; (3) to complete 36 units, including no fewer than 24 graduate units; and (4) to write a research thesis under the guidance of the religious studies faculty. In addition, M.A./Ph.D. students are required to enroll in six quarters of the Religious Studies Research Colloquium, RG ST 593: three quarters before the completion of their M.A., and three quarters before the defense of the Ph.D. Each quarter of participation will earn one unit of credit.

The department awards financial aid only to those students in the M.A./Ph.D. program (and not necessarily to all of them, depending upon departmental resources). Students receiving financial aid from the department must meet their degree requirements in a timely fashion. Those who do not fulfill the requirements within a two-year period may be granted a terminal M.A. provided they have completed the 36-unit requirement.

Plan 2 (Terminal M.A.). Students entering the M.A.-only program are required (1) to complete at least 36 units, of which at least 24 must be graduate-level units; and, (2) to complete Religious Studies 201, Core Issues in the Study

of Religion. The Department of Religious Studies considers the M.A.-only program to be most appropriate for individuals seeking professional or career development in fields not exclusively related to university teaching and research. (3) to pass a comprehensive examination following Religious Studies 201.

Doctor of Philosophy—Religious Studies

The Ph.D. program in the Department of Religious Studies comprises a cross-cultural and multidisciplinary approach to the study of religion. The cross-cultural component of the program is concerned with the comparative study of religious traditions from among five cultural areas: Christian, Mediterranean, and European religious traditions; East Asian religious traditions; Jewish, Islamic, and Near Eastern religious traditions; religions of the Americas; and South Asian religious traditions. Students are expected to engage with the multiple disciplinary approaches to the study of religion and their concomitant methodologies: philosophical, historical, anthropological, and sociological.

All Ph.D. students must take Religious Studies 200A, 200B, 200C, and 200D. They must also take a 4-unit course to meet a research methods requirement prior to advancing to candidacy. Ph.D. students are expected to enroll in three quarters of Religious Studies Research Colloquium, RG ST 593, before the defense of the Ph.D. Each quarter of participation will earn one unit of credit. Other courses in fulfillment of the Ph.D. requirement will be selected in consultation with the student's advisor. Students admitted directly into the doctoral program without the M.A. or its equivalent are required to take 36 units of advanced work. Doctoral students must complete a second examination in a modern or classical language in which a substantive religious studies bibliography exists: either French or German (depending on the language chosen to fulfill the M.A. requirement), or a language appropriate to their cultural area of concentration. Programs in certain cultural areas will require additional language competency. With the completion of these requirements, students will, in consultation with a doctoral advisor and committee, sit for no less than three field examinations in their areas of specialization. Students will also prepare a dissertation prospectus and pass an oral qualifying exam. In addition to required coursework and language competency, advancement to candidacy (C. Phil.) is dependent on the satisfactory completion of these three requirements.

Candidates must then write a dissertation, under the supervision of the doctoral committee, demonstrating an ability to do significant research and scholarly analysis and to present findings and conclusions with precision and clarity. The dissertation must normally be completed within two to three years after passing the qualifying examination.

Optional Ph.D. Emphasis in Women's Studies

The Women's Studies Program, with almost fifty core and affiliated faculty members in over nineteen disciplines, serves as a model of interdisciplinary work and scholarly collaboration

at UCSB. Women's Studies doctoral emphasis students are required to complete successfully four seminars that will enhance their understanding of feminist pedagogy, feminist theory, and topics relevant to the study of women, gender and/or sexuality. Women's Studies as an inter-departmental set of conversations and intellectual questions supports a multifaceted undergraduate curriculum at UCSB. Graduate emphasis students are encouraged to apply to teach Women's Studies courses as teaching assistants and associates as part of their Women's Studies training.

Applicants must first be admitted to, or currently enrolled in, a UCSB Ph.D. program participating in the Women's Studies graduate emphasis: Anthropology; Comparative Literature; Counseling, Clinical, and School Psychology; English; French and Italian; Germanic, Slavic and Semitic Studies; History; History of Art and Architecture; Political Science; Religious Studies; Sociology; Spanish and Portuguese; or Theater and Dance. Candidates complete four graduate courses and select a member of the Women's Studies faculty or affiliated faculty to serve on their dissertation committees. Applications to the Women's Studies Doctoral Emphasis may be submitted at any stage of Ph.D. work, and applications will be considered throughout the year.

The Graduate Curriculum

Students pursuing the emphasis in Women's Studies will successfully complete four graduate courses. Only one may be taken in the student's home department.

- 1. Issues in Feminist Epistemology and Pedagogy (Women's Studies 270).** A one-quarter seminar that considers Women's Studies as a distinct field. It offers an interdisciplinary exploration of feminist theories of knowledge production and teaching practices. Readings cover past and present critical debates and provide theoretical approaches through which to analyze interdisciplinary epistemological and pedagogical issues.
- 2. Special Topics in Women's Studies (594 AA-ZZ).** A one-quarter seminar offered by a Women's Studies faculty member on topics of central concern to the field of Women's Studies.
Or,
Research Practicum (Women's Studies 280). A cross-disciplinary seminar in which fundamental questions in contemporary feminist research practice are considered in light of students' own graduate projects. Students may fulfill the Area 2 requirement by taking either a Special Topics Seminar or the Research Practicum.
- 3. Feminist Theories.** A one-quarter graduate seminar in feminist theory offered by any department, including Women's Studies.
- 4. Topical Seminar.** A one-quarter graduate seminar, outside the student's home department, that addresses topics relevant to the study of women, gender, and/or sexuality.

Optional Ph.D. Emphasis in Global Studies

Students pursuing a Ph.D. in certain departments may petition to add an emphasis in

global studies. The departments for which the emphasis is available include anthropology, English, history, political science, religious studies, and sociology. To be eligible for admission to the Ph.D. emphasis, students must be admitted to the Ph.D. program in one of the departments choosing to offer this emphasis with their existing Ph.D. program and petition successfully to add the optional emphasis.

The student's dissertation committee must have one member from a participating department other than the student's own department. The student may also elect a global emphasis for his or her department field/area/specialization exam, if such an emphasis is offered within the department. The chair of the Coordinating Committee will determine when the student has successfully completed all of the requirements for the emphasis.

By "global" we refer to transnational economic, political, environmental, social, and cultural interactions and flows that operate at a global (i.e., transcontinental) scale. "Global studies" views the world as comprised of increasingly interdependent processes, rather than as shaped exclusively or even primarily by the interplay of discrete nation-states.

Petitions for adding the emphasis can be made at any time in a student's graduate career, but typically will be made after at least one successful year of study in the home department. Work completed prior to admission in the emphasis that meets emphasis requirements (as determined by the Ph.D. Emphasis Coordinating Committee) may be counted towards completion.

To satisfy the Ph.D. emphasis in global studies, students are required to take four one-quarter graduate-level courses. One course is Global 201, the introductory gateway seminar, offered by the Global and International Studies Program. Three additional courses must be chosen from among qualifying global theory and global issues courses offered by participating departments. These courses will be selected from an approved list of global theory and global issues graduate courses prepared by the Ph.D. Emphasis Coordinating Committee each spring for the following academic year. At least one of these three courses must be a global theory course, and at least one must be a global issues course. Courses will typically be taken for a letter grade.

At least one of these three courses will be taken from the student's home department, and at least two must be taken from the six other participating departments or the Global and International Studies Program. No more than one of the three seminars (excluding Global 201) can be taken from a single instructor.

For additional information, please contact the graduate advisor in one of the participating departments or global studies.

Optional Ph.D. Emphasis in European Medieval Studies

The Medieval Studies Program offers an interdisciplinary doctoral emphasis to students previously admitted to a Ph.D. program in the departments of theater and dance, English, French and Italian, history, history of art and architecture, music, religious studies, and Spanish and Portuguese. Students pursuing

the emphasis in European medieval studies must receive a grade of B or better in each of the following: Medieval Latin (Latin 103); one course in a vernacular, western European or Middle Eastern medieval language (English 205, English 230, French 206, Spanish 222A, Spanish 222B, Portuguese 222, Religious Studies 148A, Religious Studies 148 B, Religious Studies 210); Paleography and/or Diplomatics (History 215S, History 215T); Medieval Studies 200A-B-C; and 8 additional units in graduate courses on medieval topics. Students may petition to have appropriate courses from other institutions, or independent study, substituted for these requirements. Medieval Studies 200A-B-C is the program's colloquium series; graduate students in the emphasis attend the series and write brief papers on each colloquium (one per term), to be reviewed by the chair of the program (2 units). To qualify for the emphasis, at least one member of a Ph.D. candidate's dissertation committee must be an affiliated faculty member of the European Medieval Studies Program. Contact the European Medieval Studies Program for additional information on faculty interests, course offerings, and program requirements, or visit the Web site at www.medievalstudies.ucsb.edu.

Religious Studies Courses

Check the Department of Religious Studies Web site at www.religion.ucsb.edu for courses not currently listed in this publication.

LOWER DIVISION

1. Introduction to the Study of Religion

(4) STAFF

A consideration of major themes, issues, types of figures and phenomena, and traditions—all selected from the history of religion so as to illustrate the great variety of religious phenomena and to suggest some of the ways such things may be responsibly studied.

2. Islam and the West from 700-1850

(4) AHMAD

Covers Western encounters with Muslims from Islam's spread in the Near East and Europe until the mid-nineteenth century, including the depiction of the Prophet Muhammad in Western literature, positive and negative Muslim/European interactions, and their rivalry.

3. Introduction to Asian Religious Traditions

(4) POWELL, WALLACE

Same course as East Asian Cultural Studies 3.

An introduction to the basic texts, institutions, and practices of the religious traditions of South Asia and East Asia.

4. Introduction to Buddhism

(4) STAFF

Same course as East Asian Cultural Studies 5.

The historical and cross-cultural exploration of Buddhism through the examination of basic texts, institutions, and practices of diverse Buddhist traditions.

5. Introduction to Judaism, Christianity, and Islam

(4) STAFF

An introduction to the basic texts, institutions, and practices of western religious traditions: Judaism, Christianity, and Islam.

6. Islam and Modernity

(4) AHMAD

Discussion of the larger issues regarding Islamic traditions encountering modern transformations of individuals and society.

7. Introduction to American Religion**(4) ALBANESE**

Religion and religions in America. Survey of the variety of religions or religious traditions in America, including Native American, Asian American, African American, Jewish, Roman Catholic, Muslim, and notably Protestant. Focus also on such common features as "civil religion."

9. Ethnicity and Religion**(4) BUSTO**

An overview of the themes, problems and theories at the intersection of race/ethnicity and religious traditions in the United States. Focus is on racially ethnic communities and traditions.

Any two courses in the series Religious Studies 10A through 10F must be taken in sequence and not simultaneously. Also, students may not enroll in a lower level Arabic course than was previously taken in the Arabic 10A-10F series or more advanced Arabic.

10A. Elementary Arabic I**(5) REYNOLDS, CAMPO**

Introductory modern standard Arabic: pronunciation, script, conversation, and oral comprehension. Weekly sections involve cultural materials such as elementary calligraphy, Middle Eastern cooking, Arabic television shows, films, singing, and folk dance.

10B. Elementary Arabic II**(5) REYNOLDS, CAMPO**

Prerequisite: Religious Studies 10A.
Continuation of Arabic I.

10C. Elementary Arabic III**(5) REYNOLDS, CAMPO**

Prerequisites: Religious Studies 10A-B.
Continuation of Arabic II.

10D. Intermediate Arabic IV**(5) REYNOLDS, CAMPO**

Prerequisites: Religious Studies 10A-B-C.

Intermediate Arabic: complex grammar and vocabulary, readings in classical and modern Arabic literature, including short stories, newspaper articles, and poetry. Extensive use of audio-visual materials including news broadcasts, television shows, and films. Weekly conversation section.

10E. Intermediate Arabic V**(5) REYNOLDS, CAMPO**

Prerequisite: Religious Studies 10D.
Continuation of Arabic IV.

10F. Intermediate Arabic VI**(5) REYNOLDS, CAMPO**

Prerequisite: Religious Studies 10E.
Continuation of Arabic V.

10X. Egyptian Colloquial Arabic I**(2) CAMPO**

Introduction to the spoken colloquial Arabic of Egypt, the most widely understood dialect in the Arab world. Covers pronunciation, basic grammar, and vocabulary taught through conversation and selected viewing of television programs and film. Emphasis is on spoken communication.

10Y. Egyptian Colloquial Arabic II**(2) CAMPO**

Prerequisite: Religious Studies 10X.
Continuation of Egyptian Colloquial Arabic I.

10Z. Egyptian Colloquial Arabic III**(2) CAMPO**

Prerequisite: Religious Studies 10Y.
Continuation of Egyptian Colloquial Arabic II.

Any two courses in the series Religious Studies 11A through 11F must be taken in sequence and not simultaneously. Also, students may not enroll in a lower level Hindi course than was previously taken in the Hindi 11A-11F series.

11A. Elementary Hindi I**(4) STAFF**

The beginning course in Hindi. Survey of grammar. Graded exercises and readings drawn from Hindi literature, leading to mastery of grammatical structures

and essential vocabulary and achievement of basic reading and writing competence.

11B. Elementary Hindi II**(4) STAFF**

Prerequisite: Religious Studies 11B.
Continuation of Hindi I.

11C. Elementary Hindi III**(4) STAFF**

Prerequisite: Religious Studies 11B.
Continuation of Hindi II.

11D. Intermediate Hindi IV**(4) STAFF**

Prerequisite: Religious Studies 11C.
Intermediate Hindi. Selected readings in Hindi fiction and nonfiction, with exercises in grammar, composition, and conversation.

11E. Intermediate Hindi V**(4) STAFF**

Prerequisite: Religious Studies 11D.
Continuation of Hindi IV.

11F. Intermediate Hindi VI**(4) STAFF**

Prerequisite: Religious Studies 11E.
Continuation of Hindi V.

12. Religious Approaches to Death**(4) WHITE**

Surveys twenty world religious traditions in their approaches to the problem of death, care for the dead, and death-related doctrines and practices within their broader cultural, historical, and social contexts from a cross-cultural perspective.

14. Introduction to Native American Religious Studies**(4) TALAMANTEZ**

This course is designed as an introduction to the contribution that Native American religions make to the general study of religion. Metaphysical and philosophical aspects of North American native culture. Major concepts of belief systems, religion, and medicine. Theories of balance, harmony, knowledge, power, ritual, and ceremony.

15. Religion and Psychology**(4) ROOF**

A survey of theories and approaches to the study of religion from the perspective of psychology, with an emphasis on psychoanalytical, analytical, and humanistic psychology as well as on other theorists and trends emerging out of or relating to these traditions in psychology.

16. Chicano/Latino Religious Traditions**(4) BUSTO**

The religious and philosophical traditions that created and continue to influence Chicano/Latino communities.

Any two courses in the series Religious Studies 17A through 17C must be taken in sequence and not simultaneously. Also, students may not enroll in a lower level Hebrew course than was previously taken in the Hebrew 17A-17C series.

17A. Introduction to Biblical Hebrew I**(4) GARR**

Introduction to the orthography, phonology, grammar, and lexicon of Tiberian Biblical Hebrew as found in most printed Bibles. Concludes with selected Pentateuchal readings where the student applies grammatical knowledge to texts.

17B. Introduction to Biblical Hebrew II**(4) GARR**

Prerequisite: Religious Studies 17A.
Continuation of Religious Studies 17A.

17C. Introduction to Biblical Hebrew III**(4) GARR**

Prerequisite: Religious Studies 17B.
Continuation of Religious Studies 17B.

19. The Gods and Goddesses of India**(4) HOLDREGE**

Not open for credit to students who have completed Religious Studies 158A.

An introduction to the gods and goddesses of the Hindu pantheon. Consideration is given to

mythological, iconographic, and pilgrimage traditions as well as to the various types of movements - ascetic, devotional, and Tantric - associated with each deity.

21. Zen**(4) STAFF**

Same course as East Asian Cultural Studies 21.
An introduction to the history and texts of the major lineages of Ch'an Buddhism in China, and Zen Buddhism in Japan.

24. Teachings of Jesus in Comparative Perspective**(4) THOMAS**

Exploration of key interpretations of the life and teachings of Jesus, and analysis of the sources from which these are reconstructed, in historical, comparative, and contemporary perspectives.

Any two courses in the series Religious Studies 30A through 30F must be taken in sequence and not simultaneously. Also, students may not enroll in a lower level Tibetan course than was previously taken in the Tibetan 30A-30F series.

30A. Elementary Tibetan I**(4) STAFF**

An introduction to literary and spoken Tibetan, including study of classical and modern grammar, with examples drawn from a wide variety of literature. Also introduces students to the use of new digital instructional materials to develop proficiency in spoken Tibetan.

30B. Elementary Tibetan II**(4) HILLIS**

Prerequisite: Religious Studies 30A.
Continuation of Tibetan I.

30C. Elementary Tibetan III**(4) HILLIS**

Prerequisite: Religious Studies 30B.
Continuation of Tibetan II.

30D. Intermediate Tibetan IV**(4) HILLIS**

Prerequisite: Religious Studies 30C.
Intermediate literary and spoken Tibetan, including study of advanced Tibetan grammar and readings in a variety of genres of Tibetan literature. Use of programs in colloquial Tibetan to develop verbal fluency, acquire vocabulary, and master advance topics in spoken Tibetan.

30E. Intermediate Tibetan V**(4) HILLIS**

Prerequisite: Religious Studies 30D.
Continuation of Tibetan IV.

30F. Intermediate Tibetan VI**(4) HILLIS**

Prerequisite: Religious Studies 30E.
Continuation of Tibetan V.

31. The Religions of Tibet**(4) CABEZON**

Survey of Tibetan religions focusing on Tibetan Buddhism (from its origins to the present) but also touching on the Tibetan indigenous religion Bon and on Tibetan Islam. Special attention is paid to the four major schools of Tibetan Buddhism, their history, doctrines, and meditation practices.

41. Heresies**(4) THOMAS**

Study of a selection of heretical movements from a variety of religious traditions in the ancient and medieval periods. Illustrates the sociological, political, economic, and philosophical dimensions of heresy formation and self-definition within religious traditions.

42. Religion and Sexuality**(4) STAFF**

Examination and analysis of how various religious communities in different cultural settings define and prescribe sexuality and related moral issues.

43. Origins: A Dialogue Between Scientists and Humanists**(4) TUTINO, HECHT, TREU**

Same course as Physics 43.
Introduction to the ways in which different

disciplines have addressed the concept of origins. This course is organized as a dialogue between science, religion and history or more broadly construed between science and the humanities.

Any two courses in the series Religious Studies 57A through 57F must be taken in sequence and not simultaneously. Also, students may not enroll in a lower level Persian course than was previously taken in the Persian 57A-57F series.

57A. Elementary Persian I

(5) STAFF

Introduction to Persian pronunciation, script, and basic grammar, and vocabulary. Includes lessons in reading, writing, conversation, and oral comprehension. Sections involve audio-visual materials and a general introduction to the literatures and cultures of Persian-speaking Iran, Tajikistan, and Afghanistan.

57B. Elementary Persian II

(5) STAFF

Prerequisite: Religious Studies 57A.
Continuation of Persian I.

57C. Elementary Persian III

(5) STAFF

Prerequisite: Religious Studies 57B.
Continuation of Persian II.

57D. Intermediate Persian IV

(5) STAFF

Prerequisite: Religious Studies 57C.
Continuation of Persian III.

57E. Intermediate Persian V

(5) STAFF

Prerequisite: Religious Studies 57D.
Continuation of Persian IV.

57F. Intermediate Persian VI

(5) STAFF

Prerequisite: Religious Studies 57E.
Continuation of Persian V.

Any two courses in the series Religious Studies 60A through 60F must be taken in sequence and not simultaneously. Also, students may not enroll in a lower level Punjabi course than was previously taken in the Punjabi 60A-60F series.

60A. Elementary Punjabi I

(4) STAFF

Introduction to Punjabi, a major language of northern India and Pakistan. Beginning with the Gurmukhi script, the course offers an intensive study in the speaking, reading, and writing of the language.

60B. Elementary Punjabi II

(4) STAFF

Prerequisite: Religious Studies 60A.
Continuation of Punjabi I.

60C. Elementary Punjabi III

(4) STAFF

Prerequisite: Religious Studies 60B.
Continuation of Punjabi II.

60D. Intermediate Punjabi IV

(4) STAFF

Prerequisite: Religious Studies 60C.
Continuation of Punjabi III.

60E. Intermediate Punjabi V

(4) STAFF

Prerequisite: Religious Studies 60D.
Continuation of Punjabi IV.

60F. Intermediate Punjabi VI

(4) STAFF

Prerequisite: Religious Studies 60E.
Continuation of Punjabi V.

61A. Survey of Afro-American Religious Traditions

(4) STRONGMAN

Same course as Black Studies 60A.

A historical examination, beginning with West African heritage of Afro-American religious leaders and organizations in the United States during slavery and until the end of the nineteenth century.

61B. Religion in Black America (Part II)

(4) STRONGMAN

Same course as Black Studies 60B.

A historical survey of major black religious figures, organizations, movements, philosophies, and issues. Emphasis on contemporary religious phenomena in the black religious community of the United States during the twentieth century.

70. Topics in Religious Experience

(4) TAVES

An examination of a selected type of religious experience -such as possession, conversion, or mysticism - in comparative and cross-cultural perspectives. Methodological issues related to definition, comparison, and explanation of the phenomenon in question are considered.

80A. Religion and Western Civilization I: Ancient

(4) HECHT, THOMAS

The religions of classical antiquity; myths, rituals, and cults of Greece and Rome; religious dimensions of Greek and Roman philosophy; beginnings and development of Christianity to time of Theodosius the Great (379-395 C.E.)

80B. Religion and Western Civilization II: Medieval

(4) CAMPO, HECHT

The decline of classical antiquity; the emergence of medieval Christendom; religion and culture of the Middle Ages (eleventh-thirteenth centuries); subsequent development of the Renaissance and Reformation.

80C. Religion and Western Civilization III: Modern

(4) CARLSON

Religious responses to the emergence of modern science in the seventeenth century; religion in eighteenth century Europe; religion in America; the challenges of the twentieth century.

90AA-ZZ. Topics in Religious Studies

(4) STAFF

May be repeated for credit to a maximum of 12 units provided letter designations are different.

Lectures in special areas of interest in Religious Studies. Specific course titles to be announced by the department each quarter offered.

UPPER DIVISION

Please note that the letter suffixes attached to the numbers of many of the upper-division courses do not necessarily indicate a prerequisite sequence.

100A. From Ape to Cyborg: New Debates on Human Nature

(4) WEINBERGER-THOMAS

Prerequisite: A prior course in religious studies or anthropology.

Same course as Anthropology 106A.

Drawing from recent publications from the fields of ethnology, primatology, palaeoanthropology, neurobiology, cognitive science, evolutionary psychology, Neo-Darwinian studies, and robotics, artificial intelligence, genetic engineering and artificial life, this seminar examines the fundamental question of what makes us human.

100B. Ritual and Violence

(4) WEINBERGER-THOMAS

Prerequisite: A prior course in religious studies or anthropology.

Same course as Anthropology 106B.

Focuses on the link between ritual and violence in archaic and/or traditional societies. Attention is also given to the persistence of this link in the contemporary context.

101. New Religious Movements

(4) STAFF

Looks at new religious movements over the past several decades, both sectarian movements within religious traditions and other movements that are combinative and eclectic in nature. Focus is primarily on the United States, though not exclusively.

103B. Marriage in the Ancient World

(4) STAFF

Same course as Classics 115 and Women's Studies 115.

Examines marriage customs and rituals in Archaic and Classical Greece, Ptolemaic Egypt, and in the Roman Republic and Imperial Periods within the context of social history, literary, historical, and epigraphic sources.

104. Problems in the Study of Religion

(4) STAFF

Prerequisite: open to Religious Studies majors only.

Advanced research seminar treating selected topics in the study of religion. Offered at least twice a year by various faculty, and organized largely around the instructor's own work and/or intellectual interests.

106. Modernity and the Process of Secularization

(4) CARLSON

A study of sociological, psychological, and philosophical attempts to define the modern West in terms of the marginalization and/or transformation of traditional Christian thought and institutions.

108. Global Religion

(4) JUERGENSMEYER

Prerequisite: upper-division standing.

Same course as Global Studies 102 and Sociology 118GR.

Examines the globalization or religious traditions in the modern world. Topics include the polarities between homeland and diaspora, the relationships between transnational religions and nation states, and how these dynamics change the very nature of religious traditions.

110. Religion and Literature

(4) STAFF

Not open for credit to students who have taken Religious Studies 110A.

An examination of the interaction between religion and literature through the study of literary works. Figures like John Milton, William Blake, and T.S. Eliot are among those considered.

110B. Religion and Journalism

(4) HECHT

Explores how the place of religion has changed in American journalism, how journalists are involved in the articulation of religion, and how journalism of religion is related to the larger issue of the changing nature of American religious pluralism.

110C. Religion and Art

(4) HECHT

Exploration of the relationships between religion and twentieth-century art. Special attention on the symbolisms of space, body, time, word, and memory in modern artists such as Mondrian, Chagall, and O'Keefe, and in contemporary artists like Bill Viola, James Turrell, Marina Abramovic, Wolfgang Laib, Anselm Kiefer, Anish Kapoor and Christian Boltanski.

110D. Ritual Art and Verbal Art of the Pacific Northwest

(4) TALAMANTEZ

Prerequisite: Religious Studies 14.

Religious ethos of selected peoples of the Pacific Northwest, as is expressed in masking, body paint, art, and architecture. Study of mythology, ritual, symbolism, and contemporary developments.

111A. Religions of the Silk Road

(4) WALLACE

A study of the transformation of religious ideas and practices along the Central Asian trade and missionary routes that constitute the Silk Road, including an analysis of patterns of religious exchange and contestation among Buddhist, Islamic, Christian, and Hindu communities.

111B. Religions of Mongolia

(4) WALLACE

A historical analysis of the development of Shamanic, Buddhist, Islamic, and Christian traditions in Mongolia, including a consideration of the ways in which the mutual interactions of these traditions have shaped and transformed the religious and political climate of Mongolia.

113. Religion and Film**(4) STAFF**

An examination of religious themes and forms as they appear in significant works of modern film. The nature of man, the problem of suffering, the quest for meaning are among the topics considered.

114C. Myths, Symbols, and Transitions in Native American Religions**(4) TALAMANTEZ**

An exploration of the nature, structure, and meaning of ritual act and ritual language in the religious life of native cultures of the southwest. Intensive study of selected ritual oratory with particular attention to myth and symbol. The relevance of linguistic models for interpreting ritual. Approaches to symbolism including the interrelations between different media (oral, aural, tactile, plastic), and to features of formalism, redundancy, and condensation in ritual. Examination of a select number of monographs.

114D. Religion and Healing in Native America**(4) TALAMANTEZ**

An interdisciplinary and comparative study of representative Native American cultures and their religio-medico system. Emphasis on understanding the experimentation, evaluation, and sacralization of the biosphere in culture to meet human physical and spiritual needs. Examination of the special place of language in well-being. Attention is given to changes which are a result of contact with European culture.

114X. Dante's "Divine Comedy"**(4) SNYDER**

Dante's masterpiece, *The Divine Comedy*, remains among the most astonishing works of world literature. This course follows the pilgrim's progress through *Inferno*, *Purgatorio* and *Paradiso* in search of "love that moves the sun and the other stars." In English.

115A. Literature and Religion of the Hebrew Bible/Old Testament**(4) HECHT, GARR**

Introduction to the varieties of literature, traditions, and institutions of ancient Israel through the prophetic period.

115AX. Religious Texts of the Hebrew Bible**(1) HECHT**

Prerequisite: Concurrent enrollment in *Religious Studies 115A*.

Recommended Preparation: One year of either *Classical or Modern Hebrew*.

An opportunity to read selected texts from the Hebrew Bible coordinated with the lectures for *Religious Studies 115A*. Texts include I-II Samuel, I-II Kings, Genesis, Exodus, Leviticus, Deuteronomy, Amos, Esther, Ruth, and Ezra.

115B. The Prophets**(4) HECHT**

The origins, development, and enduring significance of the prophetic movement in ancient Israel.

115E. Seminar of the Pentateuch**(4) GARR**

Prerequisite: *Religious Studies 115A*.

An analysis of select Pentateuchal texts from a variety of critical perspectives.

115F. Seminar on the Hebrew Bible**(4) GARR**

Prerequisite: *Religious Studies 115A*.

An examination of select books and topics in the study of the Hebrew Bible.

116A. The New Testament and Early Christianity**(4) THOMAS**

Study of the varieties of early Christian traditions and literature of the first century, with special (but not exclusive) attention to the New Testament.

116B. Second-Century Christianity**(4) THOMAS**

Recommended preparation: *Religious Studies 116A* or any lower-division course in religious studies.

Study of the various religious trends in developing Christianity as represented in the writings of the early Fathers, the later books of the New Testament,

the New Testament Apocrypha, and "heretical" movements.

116C. Archaeology and the Study of Religion**(4) THOMAS**

Prerequisite: a prior upper-division course in *Religious Studies*.

An examination of the uses of archaeological materials to reconstruct the history of religions in the ancient world, with special attention to the relationships between material culture, religious iconography, epigraphy, and sacred texts.

116E. Evangelical Christianity in the United States**(4) BUSTO**

Prerequisite: upper division standing

Interdisciplinary approach to the experience, history, culture, and politics of "born-again" religion. Topics include development of doctrine, Pentecostalism, fundamentalism, millennial views, expressive cultural forms, subcultures, and political activism.

118A. Religious Nationalism**(4) FRIEDLAND**

Examines the conditions, course content, and consequences of religious nationalisms. Countries examined include such cases as Israel, Palestine, India, Iran, and the United States. Religious nationalism is examined in light of theories of the nation, religion, and societal organization more generally.

119A. Introduction to Islamic Law**(4) AHMAD**

Prerequisite: upper-division standing.

Addresses the Islamic legal concepts of rights and responsibilities and the relationship between the individual and the state in Islamic law. The course also provides an overview of the history and development of Islamic law and legal theories.

119B. The Qur'an and Its Interpretations**(4) AHMAD**

Prerequisite: upper-division standing.

Introduces the Qur'an from different perspectives: A source of spiritual guidance, a political document, a source of law and philosophy, an inspiration for visual and acoustic arts, and a piece of literature of interest to literary criticism.

119C. Jihad and Just War Theory**(4) AHMAD**

Prerequisite: upper-division standing.

Compares the notion of jihad in Islamic law to its counterpart (just war theory) in Western traditions and compares the conditions for a (theoretically) legitimate war in Islamic law and the actual application of war in Islamic history.

120. Shugendo: Japanese Mountain Religion**(4) GRAPARD**

Same course as Japanese 119.

Historical study of texts and practices of Japanese mountain ascetics (Yamabushi), and of their role in the formation of Japanese culture, from 700 to present.

121A. Introduction to Targumic Aramaic I**(4) GARR**

Prerequisite: *Religious Studies 17A-B-C*.

The grammar and basic vocabulary of Targumic Aramaic, concentrating on Targum Onkelos -- the "official" Jewish Aramaic translation of the Old Testament.

121B. Introduction to Targumic Aramaic II**(4) GARR**

Prerequisites: *Religious Studies 17A-B-C* and *121A*.

Continuation of *Religious Studies 121A*.

122A-B-C. Syriac (I, II & III)**(4-4-4) GARR**

Prerequisites: *Religious Studies 17A-B-C*; *Religious Studies 122A* (for 122B); *Religious Studies 122B* (for 122C).

Introduction to the grammar and literature of the Syriac language. Emphasis on the acquisition of Syriac language skills.

123. Asian American Religions**(4) BUSTO**

Same course as Asian American Studies 161.

Recommended preparation: a prior course in *Asian American studies*.

Historical and interdisciplinary approach to the themes and issues in the religious traditions of Asian Americans. Topics: civil religious context, transplantation of "Asian" traditions into the U.S., Asian American Christianity, Asian American theology.

124. The History of Religions in Aztlan**(4) HECHT**

Prerequisite: upper-division standing.

Examines the religious constituents of Chicano identities by focusing on different Chicano myths and rituals, orientations to and manifestations of the sacred, centers and peripheries, discourses, pilgrimage, sacrifice, and general modes of symbolization.

124R. Latino Religious Traditions in Historical Perspective**(4) GARCIA**

Same course as History 168R and Chicano Studies 168R.

Focuses on the role of religion in the Chicano/Latino historical experience. Includes pre-Columbian traditions, Spanish colonial traditions, religion of the U.S.-Mexico borderlands, immigrant religious traditions, the changing nature of Latino religions in the twentieth century.

125. Special Topics**(4) STAFF**

Prerequisite: upper-division standing or one prior course in *Religious Studies*.

No more than 8 units of major credit will be given, but course may be repeated up to a 12-unit maximum.

Lectures in special areas of interest in *Religious Studies*. Specific course titles to be announced by the department each quarter.

126. Roman Catholicism Today**(4) STAFF**

A survey of the history of Roman Catholic Christianity, leading to Vatican II and subsequent changes in the church.

127B. Christian Thought and Cultures of the Middle Ages**(4) CARLSON**

Exploration of some of the major intellectual and cultural developments defining medieval Christian Europe. Materials considered include both contemporary historical studies and selected primary sources in theology, philosophy, literature, and the arts.

127C. Christian Thought and Cultures of the Reformation**(4) CARLSON**

Addresses major intellectual and cultural developments relating to the disintegration of medieval Christianity and the birth of modern Europe. Attention given to both contemporary historical studies and selected primary sources in theology, philosophy, literature, and the arts.

128A. Religion and Spirituality in the Roman Empire**(4) THOMAS**

Not open for credit to students who have completed Religious Studies 128.

Introduction to "pagan" spirituality: rites marking the seasonal and life cycles, syncretism and multiculturalism, initiation into religious associations, dreams and oracles, with attention both to religious texts and to the symbolic, iconographic, and structural evidence offered by archaeological data.

128C. The Sacred Geography of the Ancient Mediterranean World**(4) THOMAS**

A survey of religious sites in polytheism and early Christianity. After general introduction to the sites, the topos of sacred space and ritual, and the methods of secondary research for archaeological materials, students produce audiovisual presentations in seminar format.

129. Religions of the Ancient Near East**(4) CAMPO, GARR**

Examination of the religious traditions of

Mesopotamia, the Hittites, and the peoples of Syria-Palestine as seen through their literary archeological remains.

130. Judaism

(4) HECHT

Elements of traditional Judaism in biblical and rabbinic times.

131A. Religion in Judea from the Maccabees to Rabbits

(4) HECHT

Study of the various religious trend in Palestine from the time of Ezra to the second revolt, with special attention to the rise and development of the apocalyptic.

131B. Judaism in the Hellenistic World

(4) HECHT

Study of the cultural and religious interactions of Judaism with Hellenism among the Greek-speaking Jews of the diaspora. Special attention is given to the writings of Philo of Alexandria.

131C. Judaism in the Medieval World

(4) HECHT

Course covers period from 650 to 1500 CE and topics: Karaitic movements; biblical and Talmudic commentaries; growth of mystical movements; disputations between Christians and Jews.

131D. Judaism in Modern Times

(4) HECHT

Challenge of the Enlightenment and emancipation movements to traditional Jewish life in Western and Eastern Europe. Religious and secular responses to these challenges (orthodox, conservative, reform, Zionism, socialism) in Europe and the United States.

131E. Contemporary Trends in Judaism

(4) HECHT

An examination of the variety of trends in Judaism from the first world war to the present. Major areas of study include the following: the philosophies of Franz Rosenzweig, Martin Buber, and Abraham Heschel, the growth of the conservative and reform movements in America, the Holocaust, the postwar disorientation and responses to the Holocaust.

131F. The History of Anti-Semitism

(4) HECHT

A systematic examination of the history of anti-Semitism, beginning with the emergence of anti-Judaism in the world of late antiquity, its transformation into theological anti-Semitism in the middle ages, and the emergence of racial anti-Semitism in the modern world. The central focus will be anti-Semitism as a religio-historical category.

131H. Politics and Religion in the City: The Case of Jerusalem

(4) HECHT

Prerequisite: upper-division standing or a prior course in Religious Studies.

Examines relationships between religion and politics in Jerusalem. As a sacred center for Judaism, Christianity, and Islam, and national center for Israelis and Palestinians, Jerusalem provides the unique opportunity to examine co-existing groups holding opposite world views.

131J. Introduction to Rabbinic Literature

(4) HOLDREGE, GARR

Prerequisite: upper division standing

An introduction to the basic texts of Rabbinic literature through an analysis of representative passages from the Mishnah, Talmud, and Midrash. Particular attention will be given to the various types of Midrash and the principles and methods of Midrashic interpretation. (Knowledge of Hebrew not required.)

132. The Contemplative Life

(4) HECHT

A comparative study of the role of contemplation in religious traditions. Exploration of the relationships between contemplation and prayer, ethics, the arts, mysticism, and community.

133. Introduction to Jewish Mysticism

(4) HOLDREGE

An introduction to the schools and texts of Jewish mysticism, with particular attention to the Zohar, Lurianic Kabbalah, and Hasidism. Examination of

conceptions of god and the Sefirot, Torah, creation, and redemption, along with consideration of the role of meditative techniques.

134. Religion and Violence

(4) HECHT

This course examines the capacity of religion to both mobilize and legitimate human destructiveness. A number of theoretical perspectives will be explored alongside of historical case studies from India, northern Ireland, Egypt, Lebanon, Israel-Palestine, and Sri Lanka.

135. Readings in Tibetan Buddhist Texts

(4) CABEZON

Prerequisite: Religious Studies 30F.

May be repeated for credit.

Close readings of the different genres of the classical texts of Tibetan Buddhism in the original Tibetan: philosophy, history, autobiography, religious poetry, ritual, etc. Also provides a hands-on introduction to available digital tools.

136. Creation Myths

(4) WHITE

Survey of cosmogonic myths within the world's mythological traditions with special attention to pervasive mythemes, historical connections between cognate traditions, and major scholarly theories relating cosmogony to broader social, psychological, ethical, and theological constructs.

138A. Church, State, and Orthodoxy

(4) TAVES

Prerequisite: upper-division standing.

A survey of the emergence and development of the Roman Catholic Church as an institution with particular attention to the ways in which church leaders defined, maintained, and transmitted a distinctively Catholic understanding of Christian orthodoxy.

138B. Catholic Practices & Global Cultures

(4) TAVES

An examination of the ways in which Catholic spirituality and religious practice have been shaped historically by encounter with various cultures and traditions, e.g. classical Greek, Old Saxon (German), Chinese, Nahua (Mexican), Cuban, Central African, South Asian, Japanese.

138C. Catholicism and Modernity

(4) TAVES

Prerequisite: upper-division standing.

Examination of key concepts in the history of Catholic thought (e.g., sacrifice, revelation, authority, supernaturalism, & mysticism) with attention to the way that these concepts were interpreted and reinterpreted by Catholic thinkers and scholars of religion in the modern era.

138D. Catholicism and U.S. History

(4) TAVES

An examination of the emergence and development of Catholicism in the U.S. from a transnational and comparative perspective with particular attention to the impact of the Catholic tradition on the cultural, political, and social life of the U.S.

139A. Early Christian Literature in Greek

(1-4) THOMAS

Not open for credit to students who have completed Religious Studies 139.

Recommended preparation: two quarters of Greek.

Reading of the New Testament and other first and second-century works as illustrations of Greek style, with attention to the development of Koine Greek, the influence of the Septuagint, textual apparatuses, and interpretational tools available to the reader of Greek.

139B. Greek and Latin Religious Texts

(1-4) THOMAS

Recommended preparation: knowledge of Greek or Latin.

Readings illustrating the range of religion in the Roman empire, from the Septuagint to Epictetus to Tertullian, from dream interpretations to the Hermetica, with attention to the texts as examples of the development of Koine Greek and later Latin.

139C. Religious Literature in Coptic

(4) THOMAS

Not open for credit to students who have completed Religious Studies 138A.

Recommended preparation: at least one year of Greek language.

An introduction to Sahidic-Coptic grammar, with special reference to the Coptic Gospel of Thomas.

139D. Religious Literature in Coptic

(4) THOMAS

Prerequisite: Religious Studies 139C.

Not open for credit to students who have completed Religious Studies 138B.

Readings from the Gospel of Thomas and the Sahidic New Testament.

139E. Religious Literature in Coptic

(4) THOMAS

Prerequisites: Religious Studies 139C-D.

Not open for credit to students who have completed Religious Studies 138C.

Readings from selected Subakhmimic Coptic texts.

140A. Islamic Traditions

(4) CAMPO

Introduction to history, doctrines, and practice of the Sunni, Shi'i, and Sufi expressions of Islam. Includes study of Qur'an, Hadith literature, religious law, and holy places.

140B. Religion, Politics, and Society in the Persian Gulf Region

(4) CAMPO

Prerequisite: upper-division standing.

History of Islam and politics in societies of Saudi Arabia, Iran, and Iraq since 1500. Emphasis on topics such as Shi'i and Sunni movements, religion and the state, Iranian revolution, economic development, and modernity.

140Bx. Readings in Persian Gulf Religious Texts

(1) CAMPO

Prerequisite: concurrent enrollment in Religious Studies 140B.

Reading and analysis of selected texts in Arabic dealing with topics covered in Religious Studies 140B, with focus on religion and politics in Iraq and Saudi Arabia, and with Shi'i Islam in the Gulf region.

140C. Islamic Mysticism and Religious Thought

(4) CAMPO

Prerequisite: upper-division standing.

Sufi mystics, ideas, practices, and movements. The relationship of Sufism to other currents of religious thought, such as theology and philosophy in the middle east, Africa, and Asia.

140D. Islam in South Asia

(4) CAMPO

Prerequisite: upper-division standing.

Examines the religious, cultural, social, and political formation of Islam in India, from the twelfth century to the present. Special consideration is given to patterns of Islamization and Hindu-Muslim encounters in pilgrimage, mysticism, and music. Religious aspects of Indian nationalist movements and the 1947 partition are also discussed.

140DX. Readings in South Asian Islamic Texts

(1) CAMPO

Prerequisite: concurrent enrollment in Religious Studies 140D.

Reading and analysis of selected texts in Arabic dealing with topics covered in Religious Studies 140D, with focus on Islam in India and Hindu-Muslim relations in the pre-modern era.

140E. Islam in America

(4) CAMPO

Prerequisite: upper-division standing.

Examines Islam in American setting, from introduction by African slaves and immigrants from Islamic countries, to transformation into the black Muslim movement, to rise as one of the leading non-Christian religions in the United States during the 1970s and 80s.

140F. Modern Islamic Movements

(4) CAMPO

Prerequisite: upper-division standing.

Analysis of the variety of movements that have emerged in the modern Muslim world: Sufi, reformist, and revolutionary. Includes comparison of Islamic political movements, leaders, and ideologies in Arabia, Africa, Iran, India, and South East Asia.

140FX. Modern Islamic Texts

(1) CAMPO

Prerequisite: Religious Studies 10E or equivalent. Concurrent enrollment in Religious Studies 140F.

Reading and analysis of brief Islamic texts in Arabic selected from the authors and intellectual traditions covered in Religious Studies 140F, with focus on the most famous reformers, ideologues, and activist organizations of the nineteenth and twentieth centuries.

141A. Sociology of Religion: The Classical Statements

(4) STAFF

Religion as it is treated by major social theorists, including Marx, Weber, Durkheim, Freud, Simmel, Malinowski.

141B. Sociology of Religion: Religious Organizations in Contemporary Society

(4) STAFF

Religion as it appears in formal institutions, including the study of religious beliefs, religious professionals, and the dynamics of religious organizations. Emphasis is on contemporary U.S.

142A. Religious Literature in Hebrew

(4) GARR

Prerequisite: Religious Studies 17A-B-C.

May be repeated for credit to a maximum of 8 units.

An application of grammatical and analytic skills acquired in introductory Hebrew to the rapid reading of Biblical Hebrew texts, complemented by an emphasis on critical and interpretive approaches to the Hebrew Bible. Texts change with each offering of the course.

142B. Religious Literature in Hebrew

(4) HECHT, GARR

Prerequisites: Religious Studies 17A-B-C.

Introduction to poetry of the Hebrew Bible with special reference to cultic songs. Texts will be selected from Psalms, Song of Songs, and Koheleth in order to examine the varieties of poetic style.

142C. Religious Literature in Hebrew

(4) HECHT, GARR

Prerequisite: Religious Studies 17A-B-C.

Continuation of Religious Studies 142A and/or 142B

145. Patterns in Comparative Religion

(4) HOLDREGE

Study of major religious issues as addressed by more than one religious tradition. The problem of comparative religion as an academic discipline.

146E. Hindu Mysticism

(4) WHITE

The history of Hindu mysticism and the lived experience of the Hindu mystic from the Vedas through the Tantras in doctrinal literature, mythology, ritual, and art.

147. Religion and the American Experience

(4) ALBANESE

Prerequisite: Upper division standing

May be repeated for credit to a maximum of 8 units.

Study of one selected topic in U.S. religious history in cultural context. Examples include evangelicalism, revivalism, fundamentalism, millennialism, communalism, Transcendentalism, new religions past and present, metaphysical traditions, religion and ethnicity, religion and healing, nature religion, New Age.

148A. Advanced Arabic

(4) REYNOLDS

Prerequisite: Religious Studies 10F.

Advanced study of grammar and vocabulary; readings in the major genres of classical and modern Arabic literature, including Qur'an, medieval poetry and prose modern short story and novels, etc.

148B. Advanced Arabic

(4) REYNOLDS

Prerequisite: Religious Studies 148A.

Continuation of Religious Studies 148A.

148C. Advanced Arabic

(4) REYNOLDS

Prerequisite: Religious Studies 148B.

Continuation of Religious Studies 148B.

149A. Introduction to Islamic Theology

(4) el OMARI

Prerequisite: upper-division standing.

Survey of major trends and schools in Islamic theology throughout the early, formative classical and post-classical periods. Attention given to formulations of Islamic theology as expressed in doctrinal, heresiographical, theological, philosophical and mystical texts in historical and social contexts.

150. American Spiritualities

(4) ALBANESE

Study of different forms of spirituality in the United States past and present. Topics include relation of past to present and relation of spirituality to religion in the context of American culture.

151A. Religion in American History to 1865

(4) ALBANESE

Prerequisite: upper-division standing.

Principal figures, groups, trends, and issues in religion in America to 1865.

151B. Religion in American History Since 1865

(4) ALBANESE

Prerequisite: consent of instructor.

Principal figures, groups, trends, and issues in religion in America since 1865.

151C. Religion in the American West

(4) BUSTO

Interdisciplinary approach to understanding religion in the western United States. How does a regional approach alter our view of American religion? Case studies of traditions transplanted to or having origin in the American west.

152. Religion in America Today

(4) ROOF, HAMMOND

Recent trends in American religion and in interrelationships between religion and American society.

153. The Religious Cultures of the Beat Generation

(4) HECHT

Examines the religious worlds of the Beat generation and the ongoing literary tradition of rebellion against conformity, the outsider, and rebel.

154. Ethics in Leadership and Enterprise

(4) STAFF

Prerequisite: upper-division standing.

Students must have a cumulative 3.0 for the preceding 2 quarter(s).

Focus on ethical principles in eastern and western civilizations as reflected in philosophical and religious texts and writings in social science and literature. Against this backdrop ethical dilemmas for leaders in business and corporate life today are examined.

155. Religion and the Impact of Vietnam

(4) HECHT

Impact of the Vietnam War upon American values, religion, and senses of national purpose.

156. African Religions in the Americas

(4) MICHEL, STRONGMAN

Prerequisite: upper-division standing.

Same course as Black Studies 138.

A study of Neo-African religions in the Americas, with special emphasis on Haitian Vodou, myths, philosophical perspectives, moral order, rituals, and practices. Social and political dynamics are examined in contemporary religious communities including women's roles and sexuality issues.

158A. Hindu Myth and Image

(4) HOLDREGE

Not open for credit to students who have completed Religious Studies 158.

A study of the myth complexes and images associated with the major gods and goddesses of the

Hindu pantheon. Consideration will be given to the appropriation and transformation of the mythology and iconography in the context of living devotional traditions.

158B. Pilgrimage Traditions of South Asia

(4) HOLDREGE

A multimedia exploration of Hindu, Buddhist, and Islamic pilgrimage traditions associated with sacred sites in South Asia, including an investigation of models of sacred space, patterns of religious exchange and contestation, mythological representations, pilgrimage accounts, ritual performances, and iconographic traditions.

158C. Consciousness and the Body in Hindu Traditions

(4) HOLDREGE

An exploration of Hindu constructions of embodiment and the relationship of the mind-body complex to consciousness. Critical analysis of discursive representations and practices in various Hindu traditions, including ritual traditions, ascetic movements, legal codes, medical discourses, devotional movements, and Tantric traditions.

Any two courses in the series Religious Studies 159A through 159F must be taken in sequence and not simultaneously. Also, students may not enroll in a lower level Sanskrit course than was previously taken in the Sanskrit 159A-159F series.

159A. Elementary Sanskrit

(4) HILLIS

An introduction to the phonology, morphology, and syntax of classical Sanskrit.

159B. Elementary Sanskrit

(4) HILLIS

Prerequisite: Religious Studies 159A.

Continuation of Elementary Sanskrit.

159C. Elementary Sanskrit

(4) HILLIS

Prerequisites: Religious Studies 159B.

Reading and analysis of classical Sanskrit religious texts.

159D-E-F. Intermediate Sanskrit

(4-4-4) HILLIS

Prerequisites: Religious Studies 159A-B-C.

Courses need not be taken in sequence.

Selected reading in intermediate level Sanskrit religious texts:

D. Bhagavad-Gita

E. Upanisads

F. Epics

159G. Religious Literature in Sanskrit

(4) HOLDREGE, WALLACE, WHITE

Prerequisites: Religious Studies 159D-E-F.

Readings in religious literature in Sanskrit.

159H. Religious Literature in Sanskrit: Vedic Literature

(4) HOLDREGE, WALLACE, WHITE

Prerequisites: Religious Studies 159D-E-F.

Readings in Vedic literature in Sanskrit.

159I. Religious Literature in Sanskrit: Mahabharata

(4) HOLDREGE, WALLACE, WHITE

Prerequisites: Religious Studies 159D-E-F.

Readings in the Mahabharata in Sanskrit.

159J. Religious Literature in Sanskrit: Puranas

(4) HOLDREGE, WALLACE, WHITE

Prerequisites: Religious Studies 159D-E-F.

Readings in the Puranas in Sanskrit.

159K. Religious Literature in Sanskrit: Yoga Literature

(4) HOLDREGE, WALLACE, WHITE

Prerequisites: Religious Studies 159D-E-F.

Readings in Yoga literature in Sanskrit.

159L. Religious Literature in Sanskrit: Philosophical Literature

(4) HOLDREGE, WALLACE, WHITE

Prerequisites: Religious Studies 159D-E-F.

Readings in philosophical literature in Sanskrit.

159M. Religious Literature in Sanskrit: Tantric Literature

(4) HOLDREGE, WALLACE, WHITE

Prerequisites: Religious Studies 159D-E-F.

Readings in Tantric literature in Sanskrit.

159N. Religious Literature in Sanskrit: Buddhist Literature

(4) HOLDREGE, WALLACE, WHITE

Prerequisites: Religious Studies 159D-E-F.

Readings in Buddhist literature in Sanskrit.

159O. Religious Literature in Sanskrit: Jain Literature

(4) HOLDREGE, WALLACE, WHITE

Prerequisites: Religious Studies 159D-E-F.

Readings in Jain literature in Sanskrit.

160A. Religious Traditions of India

(4) HOLDREGE, WALLACE, WHITE

Not open for credit to students who have completed Religious Studies 160.

An introduction to the classical religious traditions of India, with particular attention to three major areas of Indian religion and culture: the ritual, moral, and social order; philosophical perspectives and traditions; and traditions of mythology and devotion.

161A. Yoga Traditions of India

(4) WHITE

Religio-historical analysis of classical Samkhya and yoga, Jain and Buddhist yoga, and Tantric yoga. Study of the role and function of meditation in Indian religion.

161B. Buddhist Meditation Traditions

(4) GRAPARD

Same course as East Asian Cultural Studies 161B.

A consideration of major forms of Buddhist meditation, from both the South Asian and the East Asian traditions, with special attention given to determining the nature of meditation as a variety of religious experience.

161C. Buddhist Tantric Traditions

(4) WALLACE

Recommended preparation: background in South or Central Asian Buddhist traditions.

A comparative historical study of Buddhist Tantric traditions in South and Central Asia.

161D. Yoga, Alchemy, and Tantra: Three Paths to Power in Medieval India

(4) WHITE

Prerequisite: One prior course in Hinduism or Buddhism

Trace the history of tantra, yoga, and alchemy in South Asia from the origins of yoga in the first centuries CE through the medieval period.

162A. Indian Philosophy

(4) WALLACE, CABEZON

An overview of the six classical philosophical schools (darshanas) of Hinduism. May also include analysis of selected portions of the Jain and Buddhist philosophical traditions.

162C. Sikhism

(4) MANN

Focusing on the beliefs, history, literature, and society. Traces the development of the Sikh community from its inception in the sixteenth century Punjab to its present day status as a global religious community.

162D. Introduction to Jainism

(4) STAFF

Focuses on the Jain tradition with its historical roots in South Asia. Surveys the sacred writings, beliefs, religious figures, and practices integral to the Jain tradition from the time of Mahavira (fifth century B.C.E.) to the present day.

162E. Indian Civilization

(4) MANN

Prerequisite: upper-division standing.

Surveys the religious history of the subcontinent. Beginning with the Indus valley culture, and continuing to examine the rise of Hindu, Buddhist, and Jain beliefs, the arrival of Islam and Christianity, and the region's confrontation with modernity.

162F. South Asians in the U.S.

(4) MANN

Prerequisite: upper-division standing.

Traces the history of South Asian migration to the

U.S. while focusing on issues such as the reasons for leaving the region, the difficulties of transplanting religious life and institutions, and relationship with the mainstream society.

164A. Buddhist Traditions of South Asia

(4) WALLACE

A historical analysis of Buddhist ideas and practices in South Asia from the inception of Buddhist traditions to the fifteenth century CE.

164B. Buddhist Traditions in East Asia

(4) POWELL

*Same course as EACS 164B.**Recommended preparation: background in Indian Buddhism.*

A consideration of the Buddhist tradition and its evolution in China, with emphasis on the changes which Buddhism underwent in its encounter with Chinese traditions and historical circumstances.

164C. Buddhist Ethics

(4) WALLACE

A study of Buddhist ethical traditions, including a consideration of soteriological, social, political, environmental, and gender issues. Critical analysis and assessment of various ethical perspectives based on Buddhist textual sources and ethnographic evidence from the lives of contemporary Buddhist practitioners.

166A. Religion in Chinese Culture

(4) POWELL

Same course as Chinese 166A.

A survey of major periods and themes in the history of the Confucian, Taoist, and Chinese Buddhist traditions, with particular emphasis on the differences and tensions among them and on the contributions of each to the formation of the Chinese civilization.

166AX. Chinese Texts

(1) STAFF

Prerequisites: Chinese 6 or equivalent; concurrent enrollment in Religious Studies 166A.

Readings from some of the primary texts associated with various Chinese religious traditions considered in Religious Studies 166A. Texts from which selections will be drawn include the Lun Yu, the Tao Te Ching, and the Lotus Sutra.

166B. Taoist Traditions of China

(4) POWELL

Same course as Chinese 166B.

A study of the classical sources of Taoism, followed by a consideration of the varieties of religious practice which developed from those sources.

166C. Confucian Traditions: The Classical Period

(4) POWELL

Same course as Chinese 166C.

A treatment of the origins of Confucianism and of its development through the Han dynasty (to A.D. 200), with special attention to the variety of humane and spiritual disciplines which came to be called "Confucian." Emphasis on the interpretation of primary texts like the *Analects*, the *Mencius*, the *Hsun Tzu*, etc.

166E. The Flowering of Chinese Buddhism

(4) POWELL

*Same course as Chinese 166E.**Recommended preparation: Religious Studies 164B.*

A study of the distinctively Chinese forms of Buddhism which emerged in the sixth and seventh centuries A.D. Emphasis will be on the Hua-Yen, T'ien-t'ai, and Ch'an traditions, and on the features of those traditions which distinguish them most clearly from Indian Buddhism.

166F. Religious Literature in Chinese: Buddhist Texts

(4) POWELL

*Prerequisite: Consent of instructor.**Same course as Chinese 166F.*

Selected readings in important Buddhist texts which were either originally written in Chinese or translated into that language. Only texts not available in western language translation are chosen. Attention not only to the content but to the grammatical, syntactical, and terminological peculiarities of Buddhist Chinese.

166H. Religious Literature in Chinese: Taoist Texts

(4) POWELL

Same course as Chinese 166H.

Readings in the Lao Tzu (Tao-Te-Ching) and the Chuang Tzu and their latter commentaries.

167A. Religion in Japanese Culture

(4) GRAPARD

Same course as Japanese 167A.

A historical analysis of the major components of the classical and medieval religious systems of Japan, through investigation of texts, rituals, and institutions.

167B. Religion in Japanese Culture

(4) GRAPARD

*Prerequisite: Religious Studies 167A or Japanese 167A.**Same course as Japanese 167B.*

A historical analysis of the major components of premodern Japanese ideology through investigation of texts, institutions, and rituals.

167D. Shinto

(4) GRAPARD

Same course as Japanese 167D.

A systematic analysis of the principle institutions, texts, and rituals of the Shinto traditions of Japan, in historic perspective.

169. Hindu Devotional Traditions

(4) WHITE

Prerequisite: upper-division standing.

An introduction to the devotional schools and poet-saints of the Saiva, Vaisnava, and Sakta traditions. Particular attention will be given to the different paradigms of devotion represented, respectively, by the images of servant-master, child-parent, friend-companion, and lover-beloved.

171A-B-C-D. The Schools of Tibetan Buddhism

(4-4-4-4) CABEZON

A detailed treatment of one (or a combination) of the four major schools of Tibetan Buddhism, focusing on their history, major figures, texts, institutions, doctrines, and principal practices:

- A. Nyingma
- B. Sakya
- C. Kargyu
- D. Gelug

172B. Religion, Science, and the Problem of Consciousness

(4) STAFF

Prerequisite: consent of instructor.

A comparative exploration of the nature of consciousness as presented by Western scientists and philosophers and by Hindu and Buddhist philosophers and contemplatives.

173. Religious Myth and Language

(4) STAFF

A survey of contemporary studies about the nature and function of religious symbol and language.

173A-B. Aramaic Seminar

(4-4) GARR

Prerequisite: Religious Studies 17C or equivalent.

A focus on grammar and readings in select dialects of premodern Aramaic.

177. Religion and Law

(4) HECHT, POWELL

Prerequisite: consent of instructor.

A comparative study of the interrelationship of law and religion within society. Examples selected from the legal traditions of small-scale societies, the great civilizations of the past, and modern societies.

182. Ethics of the Life Cycle

(4) STAFF

A study of contrasting models of the life cycle; rites of passage; moral problems associated with birth, growth, sex, work, leisure, aging, and death.

183. The Quest for Narrative in Late Imperial China

(4) POWELL

Same course as Comparative Literature 183.

An exploration of quest themes, narrative forms and performative modes in the culture of Late Imperial China based on a reading of an English translation of the sixteenth century masterpiece, *The Journey to the West* (Monkey).

183B. Religious Practice and the State in China

(4) YANG

Same course as Chinese 183B.

Historical and anthropological approaches to the interaction between religious practice and state forces, with emphasis on popular religion and the decline and revival of religion in Chinese modernity.

184B. Tibetan Buddhist Thought

(4) CABEZON

May be repeated for credit to a maximum of 12 units, but only 4 units may be applied to the major.

A detailed thematic and text-centered investigation of an aspect of the Tibetan Buddhist religious/philosophical tradition. In any given year, focuses on a given genre of the Tibetan religious/literary corpus; e.g., the "stages of the path," "great perfection," Madhyamaka, or Tantric literature.

185. Food, Religion, and Culture in the Middle East

(4) CAMPO, CAMPO

Prerequisite: A previous course in Global Studies, Religious Studies, History, Anthropology, Sociology; upper-division standing.

Explores the significance of foods in the religious and cultural life of Middle Eastern peoples. Focuses on Jewish, Christian, and Muslim feasting, fasting, and dietary rules. Includes culinary traditions of Arab, Persian, Turkish, and Israeli ethnic groups, and related topics.

186A. The Qur'an and the Bible

(4) CAMPO

Prerequisite: upper-division standing.

Introduction to the Qur'an in relation to Jewish and Christian scriptures. Includes critical study of key themes including God, creation, sacred history, human nature, salvation, and mortality in comparative perspective. Also examines textual origins, structures, and practices.

187. Christian Asceticism

(4) STAFF

The religion of the hermitage and cloister from St. Anthony and St. Benedict. Special attention to current revivals of asceticism, east-west exchanges, and the writings of Thomas Merton.

189A. History of Arabic Literature in Translation

(4) REYNOLDS

Survey of the history of Arabic poetry and prose from the pre-Islamic era to the 20th century with emphasis on the development of specific genres and styles and changing historical perspectives on enduring themes in Arabic literature.

189AX. Arabic Texts

(4) STAFF

Prerequisite: Religious Studies 10E or equivalent; concurrent enrollment in Religious Studies 189A.

Reading and analysis of brief literary texts in Arabic selected from the authors and genres covered in Religious Studies 189A with a focus on the most famous figures and masterpieces of Arabic literary history from the fifth to twentieth centuries.

189B. Critical Readings in Medieval Arabic Literature in Translation

(4) REYNOLDS

Critical readings from a selection of medieval poetical and prose works in translation including love manuals, spiritual allegories, encyclopedias, collections of comic erotica, autobiographies, travel accounts, and others. Lectures and readings in English.

189C. Critical Readings in Modern Arabic Literature in Translation

(4) REYNOLDS

Critical readings from a selection of 19th- and 20th-century works in translation including autobiographies, novels, short stories, and poems from the Arab world. Readings will focus on issues central to modern Arab society. Lectures and readings in English.

190AA-ZZ. Topics in Religious Studies

(4) STAFF

May be repeated for credit to a maximum of 8 units.

Recommended preparation: upper-division standing.

This course features lectures by various visiting professors or adjunct lecturers on topics pertaining to the study of religions using various methodological approaches to subjects which are the speciality of the instructor. Course content will vary.

191A. Latino Religious Thought

(4) BUSTO

Prerequisite: upper division standing

Examination of the indigenous, Iberian and North American sources and influences for distinctly Latino forms of religious thought, speculation, and spiritual construction. Topics include: Nahua wisdom traditions, colonial Napanla, Chicano movement indigenismo, feminist innovation, Latino liberationist theology.

193. Religion and Ecology in the Americas

(4) TALAMANTEZ

Same course as Environmental Studies 189.

An overview of the growing field of religion and ecology in the Americas. Focus on spiritual traditions and land-based knowledge indigenous to the Western Hemisphere.

193B. Religion and Healing in Global Perspective

(4) WALLACE

Comparative and cross-cultural introduction to relationships between religion, science, and healing arts, using selected case studies and stressing alternatives to mainstream Western medicine. Attention to underlying religio-philosophical worldviews and to the ways in which they influence healing practices.

195. Senior Honors Thesis

(1-8) STAFF

Prerequisites: two upper-division courses in Religious Studies; consent of instructor and department; senior standing; open to Religious Studies majors only.

May be repeated for credit to a maximum of 12 units, but only 8 units count toward the major.

Projects for advanced work in Religious Studies in conjunction with individual members of the faculty and developed by students. For honors students who wish to graduate with the distinction in Religious Studies.

199. Independent Studies in Religion

(1-5) STAFF

Prerequisites: two prior upper-division course in Religious Studies; consent of instructor and department; open to Religious Studies majors only.

Students must have a minimum 3.0 grade-point average for the preceding three quarters and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined.

Projects for work in Religious Studies in conjunction with individual members of the faculty and developed by students.

199A. Independent Research Assistant

(1-4) STAFF

Prerequisites: two prior upper-division course in Religious Studies; consent of instructor and department; open to Religious Studies majors only.

Students must have a minimum 3.0 grade-point average for the preceding three quarters and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined.

Faculty supervised research. Written work is usually required.

GRADUATE COURSES**200A. Proseminar in History and Theory of Religion**

(4) STAFF

Critical analysis of key themes and figures in anthropology and sociology of religion, with attention to their role in the emergence and current practice of Religious Studies. Includes the works of such figures as Tylor, Frazer, Mauss, Lévi-Strauss, Douglas, Turner, Geertz, Durkheim, Weber, and Berger.

200B. Proseminar in History and Theory of Religion

(4) STAFF

Critical analysis of key themes and figures in modern philosophy and psychology of religion, with attention to their role in the emergence and current

practice of Religious Studies. Includes the works of such figures as Spinoza, Hume, Kant, Hegel, Marx, Nietzsche, Heidegger, Wittgenstein, Freud, and Jung.

200C. Proseminar in the History and Theory of Religion

(4) STAFF

Prerequisites: Religious Studies 200A-B.

Critical analysis of key themes and figures in phenomenology and history of religions, with attention to their role in the emergence and current practice of Religious Studies. Includes the works of such figures as Otto, van der Leeuw, Pettazzoni, Wach, Eliade, W.C. Smith, Smart, Long, J.Z. Smith, and Lincoln.

200D. Proseminar in the History and Theory of Religion

(4) STAFF

Critical analysis of key themes and figures in contemporary critical theory and cultural studies, with attention to their role in the current practice of Religious Studies. Includes the works of such figures as Benjamin, Foucault, Bourdieu, Derrida, Lacan, Kristeva, Butler, and Taussig.

201. Core Issues in the Study of Religion

(4) STAFF

Introduces graduate students to core issues in modern studies of religions and other world views.

202A. Religious Literature in Pali

(4) STAFF

Prerequisite: consent of instructor.

Phonology, morphology, and syntax of the Pali language with readings of early Buddhist texts from the Pali Canon.

202F. Religious Literature in Pali

(4) STAFF

Prerequisite: Consent of instructor.

Phonology, morphology, and syntax of the Pali language with readings of early Buddhist texts from the Pali Canon.

206A. Seminar in South Asian Religious Studies

(4) HOLDREGE, MANN, WALLACE, WHITE

Course content varies. May be repeated for credit.

Historical, textual, and critical analyses of selected topics in South Asian religious traditions.

206B. Seminar on Vedic Traditions

(4) HOLDREGE

An examination of the mythological and ritual traditions of Vedic India, focusing on the Samhitas, Brahmanas, and Srauta Sutras. Includes consideration of the canonical authority of Veda, cosmogonic and cosmological speculations, the discourse of ritual, and issues of social hierarchy.

206C. Seminar on Epic Traditions

(4) WHITE

An examination of classical Hindu traditions as reflected in the two Sanskrit epics, *the Mahabharata* and the *Ramayana*. Includes an exploration of literary genres, cosmological speculations, ritual practices, devotional traditions, and didactic material.

206D. Seminar on Bhakti Traditions

(4) MANN, HOLDREGE

A study of medieval bhakti traditions in India, including an examination of the devotional schools and poet-saints of Saiva, Vaisnava, and Sakta traditions as well as devotional movements in Islamic and Sikh traditions.

206E. Seminar on Tantric Traditions of South Asia

(4) WHITE, WALLACE

An exploration of the varieties and forms of Tantric traditions in South Asia. Includes a consideration of the various schools, literary genres, forms of worship, and esoteric practices associated with Hindu and Buddhist Tantra.

206F. Seminar on Philosophical Traditions of South Asia

(4) WALLACE, CABEZÓN

An examination of selected topics in South Asian philosophical traditions, including consideration of the six classical Hindu philosophical schools (Darsanas) as well as Jain and Buddhist philosophical traditions.

206G. Seminar on Hindu Discourses of the Body**(4) HOLDREGE**

An exploration of the contributions of Hindu discourses of the body to scholarship in Religious Studies and the human sciences generally. Particular attention to modalities of embodiment: ritual body, ascetic body, purity body, medical body, devotional body, and tantric body.

206H. Seminar on Pilgrimage Traditions of South Asia**(4) HOLDREGE**

A study of Hindu, Buddhist, and Islamic pilgrimage traditions in South Asia, including an analysis of models of sacred space, patterns of religious exchange and contestation, mythological representations, pilgrimage accounts, ritual performances, and iconographic traditions associated with particular sacred sites.

206I. Seminar on Comparative Ethics in South Asia**(4) WALLACE**

A comparative historical study of Hindu, Jain, and Buddhist ethics, including an analysis of classical textual sources as well as ethnographic accounts of ethical disciplines among contemporary practitioners of the three traditions.

206J. Seminar on Contemporary Issues in South Asian Religions**(4) HOLDREGE, JUERGENSMEYER, MANN, WHITE**

Course content varies. May be repeated for credit.

Analyses of selected topics concerning contemporary South Asian religions. Possible topics include issues in post-colonial studies, religious nationalisms, responses to globalization, diaspora and the homeland, constructions of gender, and vernacular traditions.

208. Seminar on South Asian Buddhist Traditions**(4) WALLACE**

Historical, textual, and critical analyses of selected topics in Buddhist traditions of South Asia.

209A. Seminar on South Asian Islamic Traditions**(4) CAMPO**

Historical, textual, and critical analyses of selected topics in Islamic traditions of South Asia.

209B. Seminar on Hindus and Muslims in South Asia**(4) CAMPO**

An inquiry into the interactions of Hindus and Muslims in South Asian history and cultures. Topics include religious beliefs and rituals, social and political issues, mystical traditions, science and medicine, music, art, and literature.

210. Guided Readings in Arabic Religious Texts**(4) CAMPO**

Prerequisites: Religious Studies 10A-F.

Selected readings on Islamic subjects in Arabic. Focus on scripture, interpretation, and religious biography.

211. Orality, Literacy, and the Study of Religion**(4) REYNOLDS**

A survey of differing theories of orality and literacy in the writings of Havelock, Parry, Lord, Luria, Vygotsky, Ong, Goody, Graff, Stock, Tedlock, and others. The significance of these ideas for the study of religious texts, practices, and world views.

213A. Seminar in Sikh Studies**(4) MANN**

Historical, textual, and critical analyses of selected topics in Sikh traditions.

213B. Seminar on Religion and Society in the Punjab**(4) MANN**

Focusing on the selected compositions of Farid (Sufi), Gorakh (Nath Yogi), Kabir (Hindu), and Nanak (Sikh), examination of the rich diversity of religions and cultural beliefs prevalent in medieval Punjab.

214. Guided Readings in Medieval North Indian Religious Literature**(4) MANN**

Prerequisites: Religious Studies 11D-E-F or 60D-E-F or equivalent.

Selected readings in medieval North Indian religious texts, including the works of Kabir, Ravidas, Nanak, Surdas, and Mirabai.

215. Proseminar on Islamic Studies**(4) CAMPO**

Survey and critical analysis of key scholarly trends in Islamic studies. Includes the works of Goldziher, Massignon, Gibb, Schimmel, W.C. Smith, Hodgson, Rahman, Lewis, Said, Grabar, Esposito, Haddad, Mernissi, and Abou El Fadl.

216A. Seminar on South Asian Buddhist Traditions**(4) WALLACE**

Historical, textual, and critical analyses of selected topics in Buddhist traditions of South Asia.

216B. Seminar on Theravada Buddhist Traditions**(4) WALLACE**

Historical, textual, and critical analyses of selected topics in Theravada Buddhist traditions.

216C. Archaeology and the Study of Religion**(4) THOMAS**

Prerequisite: an upper-division course in religious studies.

An examination of the uses of archaeological materials to reconstruct the history of religions in the ancient world, with special attention to the relationships between material culture, religious iconography, epigraphy, and sacred texts.

223. Religion and the Question of Subjectivity in Contemporary European Thought**(4) CARLSON**

Exploration of critical responses within contemporary European thought to modern conceptions of subjectivity (from Luther and Descartes through Hegel and Nietzsche). Writers may include Husserl, Heidegger, Levinas, Derrida, and Marion.

224. Sacred/Profane**(4) CARLSON, FRIEDLAND**

Course content variable; may be repeated.

Through a close reading of texts in philosophy, theology, and social theory, this seminar explores understandings of "sacred" and "profane" in economic, political, scientific, and technological contexts.

238. Seminar in Catholic Studies**(4) TAVES**

An examination of selected topics in Catholic Studies with particular attention to theory and methods that relate the study of Catholicism to larger questions in Religious Studies, American history, and global studies.

240. Seminar in the Sociology of Religion**(4) HAMMOND, ROOF**

Course content variable; may be repeated.

Detailed examination of major figures, schools, and types of research.

241. Graduate Seminar in Global Religion**(4) HECHT, JUERGENSMEYER**

A reading seminar on theories and case studies of global religion. Covers the adaptation of religion to multicultural societies, new converts and diaspora communities, and religious responses to globalization, including religious rebellions and the ethical and spiritual dimension of global civil society. Readings include original sources and anthropological, sociological, literary, and other perspectives.

242. Seminar in European Christianity**(4) TUTINO**

May be repeated for credit.

Examines selected aspects of the history of Christianity in Europe in its cultural, intellectual, and political context. Course content variable.

247. Seminar in Native American Religious Traditions**(4) TALAMANTEZ**

Course content variable; may be repeated.

Historical and critical examination of selected figures, categories, and phenomena pertaining to the diversity of Native American religious traditions.

250. Seminar in the History of Religions**(4) HECHT**

Course content variable; may be repeated.

Comparative study of selected religious structures or symbols, from eastern and/or western religious traditions.

252A. Seminar in Christian Origins**(4) THOMAS**

Prerequisite: Religious Studies 116A.

Course content variable; may be repeated. Not open for credit to students who have completed Religious Studies 252.

Historical and critical examination of selected figures, ideas, and movements pertaining to nascent Christianity.

252B. Asceticism and the Construction of Self**(4) THOMAS**

Survey of the relationship between humanity and holiness, self and other, in the focal point of the physical body and its disciplined management, beginning with Christian late antiquity and employing examples from a variety of religious traditions.

254A. Seminar on Tibetan Buddhist Traditions**(4) CABEZÓN**

May be repeated; course content variable.

Overview of the history and major schools/doctrines of Tibetan Buddhism leading to a more detailed analysis of one or more selected topics in the philosophy, history, or ethnography of Buddhist Tibet.

254B. The Study of Tibet from the Missionaries to Cultural Studies**(4) CABEZÓN**

Historiographical exploration of the ways in which Tibet (and especially Tibetan Buddhism) has been studied from the eighteenth century to the present. Explores the missionary accounts, the adventure-travel literature, as well as philology, philosophy, and cultural studies as vehicles for understanding Tibet.

254C. Seminar on Indo-Tibetan Buddhist Philosophy**(4) CABEZÓN**

May be repeated for credit.

A text-centered, critical analysis of the philosophical literature of Buddhist Tibet. In any given year the course may focus on the doxographical literature as a whole, or on one or more of the classical philosophical schools (e.g., Abhidharmika, Pramanika, Yogacara, or Madhyamaka).

256. Seminar in Jain Studies**(4) WALLACE**

Historical, textual, and critical analyses of selected topics in Jain traditions.

257. Seminar in Buddhist Studies**(4) STAFF**

May be repeated for credit.

Historical, philosophical, methodological, and/or bibliographical analysis of different aspects of Buddhism or of selected areas in the study of Buddhism.

258. Seminar in Religion in America**(4) ALBANESE**

Prerequisite: graduate standing.

May be repeated.

Examination of selected topics in American religion to investigate its basic religious structures and to explore the relationship of religious phenomena to their cultural context. Course content variable.

259A. Introduction to Islamic Theology**(4) RACHA EL OMARI**

Survey of major trends and schools in Islamic theology throughout the early, formative, classical, and post-classical periods. Attention given to formulations of Islamic theology as expressed in doctrinal, heresiographical, theological, philosophical, and mystical texts in historical and social contexts.

265. Problems in the Study of Chinese Religions**(4) POWELL***May be repeated for credit up to 8 units.*

Consideration of basic problems and methodological issues in the study of Chinese religions.

266R. Seminar in Race and Religion**(4) BUSTO***May be repeated; course content variable.*

Examination of theories and case studies at the intersection of religion and race/ethnicity in the United States.

267. Ethnographic Approaches to Religion**(4) YANG**

Fieldwork and ethnographic writing in the study of religious practices, discourses, and institutions.

268. Religion, the State, and Modernity**(4) YANG***Same course as Chinese 268.*

Explores how a state that was highly ritualized in late imperial China underwent a radical secularization in semi-colonialism and modernity. Also examines the state campaigns against both religious institutions and popular local religiosities, as well as their contemporary revival.

269. Religion and Media**(4) YANG**

Explores the history, culture, and politics of religious dissemination through various media: art, music, writing, print, film, radio, television, cassette, VCR, and the Internet. Emphasis on modernity, media theory, and ethnography.

270. Seminar in Myth and Symbol**(4) HOLDREGE**

A critical examination of the categories of myth, symbol, language, meaning, text, and discourse from a variety of disciplinary perspectives, including a consideration of the theoretical approaches of historians of religions, philosophers, anthropologists, psychologists, and social theorists.

272. Seminar in Comparative Methods in the Study of Religion**(4) HOLDREGE**

A study of current issues in the comparative study of religions, including postmodern critiques of the comparative enterprise. A critical assessment of various methodological approaches to comparative study drawn from the history of religions, philosophy, anthropology, sociology, psychology, and literary theory.

273. Sovereignty and Governmentality: Religious Dimensions**(4) YANG**

Explores religious and ritual dimensions of two modes of power: an archaic state power based on fear of death, and a modern power based on promotion and regulation of life. Diverse religious traditions and their modern practices are discussed.

274. Capps Seminar on Religion and Public Life**(4) STAFF***May be repeated for credit.*

The Capps seminar on religion and public life varies in them from year to year but always addresses religious, moral, or ethical issues of major importance in contemporary life.

277. Literature and the Sacred**(4) STAFF***Prerequisite: graduate standing.**Same course as Comparative Literature 237.*

Explores theories of the sacred, and its radical otherness, in relation to writing and poetics, in twentieth century French and Italian thought. Authors include: Caillois, Bataille, Paulhan, Eco, Ricoeur, Cacciari, Blanchot, Vattimo, Kristeva, Derrida, Lacan, Irigaray. In English.

287. Apostasy and Heresy in Islam**(4) AHMAD**

The vague line between heresy and apostasy has been kept unadjudicated by jurists. This course delves into the complexities of the issues of heresy and apostasy that interest students of Islamic law and philosophy and of Islamic history in general.

288. Classical Arabic Theological Texts**(4) EL-OMARI***Prerequisite: third-year Arabic.**Course content variable; may be repeated if the topic is different.*

Examines Islamic theological texts from the formative and classical periods. Attention is given to content, terminology, language, and style. The close reading is combined with discussion of secondary literature on content and contexts.

289A. Guided Readings in the History of Arabic Literature**(4) REYNOLDS***Prerequisites: Religious Studies 10A-F or 148A-C.*

Survey of the history of Arabic poetry and prose from the Pre-Islamic era to the twentieth century with emphasis on the development of specific genres and styles and changing historical perspectives on enduring themes in Arabic literature. Lectures in English.

289B. Guided Readings in Medieval Arabic Literature**(4) REYNOLDS***Prerequisites: Religious Studies 10A-F or 148A-C.*

Critical readings from a selection of medieval poetical and prose works in Arabic including love manuals, spiritual allegories, encyclopedias, collections of comic erotica, autobiographies, travel accounts, and others. Lectures in English.

289C. Guided Readings in Modern Arabic Literature**(4) REYNOLDS***Prerequisites: Religious Studies 10A-F or 148A-C.*

Critical readings from a selection of 19th- and 20th-century works in Arabic, including autobiographies, novels, short stories, and poems from the Arab world. Readings will focus on issues central to modern Arab society. Lectures in English.

292. Special Topics**(4) STAFF**

Seminar in special areas of interest in Religious Studies. Specific course titles to be announced by the department each quarter offered. Course content will vary.

294. Seminar on Cultural Analysis**(4) FRIEDLAND**

Using religion as its primary site, exploration of interpretations and explanations of the structure and practice of sacred phenomena, including embodiment, symbol, narrative, myth and ritual, architecture and technology, and power and institution. Theories and topics will vary.

591. T.A. and Associate Training Program**(1-4) STAFF***May be repeated; no unit credit allowed toward advanced degree.*

Required orientation and on-the-job training of teaching assistants and associates through consultations with instructors, evaluation of their teaching through videotapes or other means of observation, follow-up consultations, teaching, evaluation.

592. Directed Reading**(1-12) STAFF***Course content variable; may be repeated.*

Special readings selected under guidance of individual instructor to help students make up particular gaps in their intellectual backgrounds that are pertinent to their graduate program.

593. Colloquium**(1-4) STAFF***Course content variable; may be repeated.*

A series of discussions involving panels, debates, special speakers, etc. at which the presence of all enrolled graduate and selected faculty is required.

594AA-ZZ. Special Topics**(1-12) STAFF**

Special seminar on research subjects of current interest.

595AA-ZZ. Group Studies**(1-12) STAFF**

Critical review of research in selected fields.

596. Directed Reading and Research**(1-12) STAFF**

Research and preparation of dissertation.

597. Individual Study for Master's or Ph.D. Examinations for Advancement to Candidacy**(1-12) STAFF***No unit credit allowed toward advanced degree.***598. Master's Project Research and Preparation****(1-12) STAFF***No unit credit allowed toward advanced degree.*

For research underlying the project, writing the project.

599. Ph.D. Dissertation Preparation**(1-12) STAFF**

Terminal preparation of the dissertation.

Jon Snyder, Ph.D. (French and Italian)

Stefania Tutino Ph.D. (History and Religious Studies)

Robert J. Williams, Ph.D. (History of Art and Architecture)

The interdisciplinary major in Renaissance studies is intended to serve students interested in an undergraduate liberal arts major, as well as those who plan to pursue graduate studies in the field. Just as individuals during the Renaissance period (1300-1650) became adept in many areas of study, such as the arts, literature, history, and classics, the student majoring or double-majoring in Renaissance studies will have the opportunity and flexibility to design his or her own program of study in which he or she will be able to make connections across disciplines. Therefore, coursework leading to a B.A. in Renaissance studies may be done in English and European literatures, history, art, music, religious studies, and classics. With the assistance of members of the advisory committee, students will set up individual programs structured by their special interests. Students should consult with their advisors each quarter from the beginning of their junior year to have their programs formally approved and to learn about special Renaissance studies courses. Students are also encouraged to consider spending one or more of their undergraduate quarters in a European university through the Education Abroad Program.

Students with a bachelor's degree in Renaissance Studies who are interested in pursuing a California Teaching Credential should contact the Credential Advisor in the Graduate School of Education.

Undergraduate Program

Bachelor of Arts— Renaissance Studies

Preparation for the major. History 4A-B or Art History 6A-B or Religious Studies 80A-B. A reading knowledge of Latin and a modern European language will be necessary for those who plan to continue their studies on the graduate level. However, it is not required for the major. Recommended: Classics 37, 38; English 116 A-B; French 50AX; Music 12.

Upper-division major. Forty upper-division units are required from the following list, with at least 8 units from at least three departments. The selection of courses is also to form a coherent program to be approved by a member of the advisory committee. Courses other than those listed below, with appropriate focus and content, may be petitioned to apply with the approval of the program chair.

Art History 107A-B, 109A-B-C-D-E-G, 111B-C-E-F, 113A-B-D-F, 141D, 184B-C; Classics: A maximum of 12 upper-division units to be chosen in consultation with a faculty advisor; Comp. Lit 107; English 101, 105A-B, 144, 157, 162; French 101A, 148D, 154A, 154B; History 106A-B, 114C, 121A-B-C-M-P-Q, 122A-B-P, 140A-B-P, 145B, 153, 155A, 156A; Italian 102,

114X, 124X; Music 102, 112AB, 180; Portuguese 105B; Religious Studies 127C; Renaissance Studies 100, 199; Spanish 110B, 123A, 131, 132, 137A-B, 140A-B, 142A-B; Theater 160B.

Renaissance Studies Courses

UPPER DIVISION

100. Studies in Renaissance Civilization (4) STAFF

May be repeated for credit with consent of program chair.

An introduction to the interdisciplinary study of Renaissance civilization. Specific topics vary from year to year and may include such subjects as Medici Florence, fifteenth-century Burgundy, Renaissance neoplatonism, Renaissance humanism, or Renaissance petrarchism.

199. Independent Studies in the Renaissance (1-5) STAFF

Prerequisites: upper-division standing; completion of two upper-division courses in renaissance studies.

Students must have a minimum 3.0 grade-point average for the preceding three quarters and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined. Not more than 12 units total of Renaissance Studies 199 may be taken.

Study or research under the guidance of a member of the advisory committee for seniors of high scholastic standing. Students wishing to enroll should prepare a short plan of study for their coursework.

Department Chair: Verta Taylor

Faculty

Richard P. Appelbaum, Ph.D., University of Chicago, Professor (global political economy and development, labor and resistance movements, science, technology, and economic development)

Janice I. Baldwin, Ph.D., UC Santa Barbara, Lecturer (human sexuality, gender, AIDS)

John D. Baldwin, Ph.D., Johns Hopkins University, Professor (G. H. Mead, human sexuality, socialization, capitalism, micro-macro synthesis)

Kum-Kum Bhavnani, Ph.D., Cambridge University, Professor (third-world women, cultural studies, feminist studies, critical ethnography, critical psychology)

Denise D. Bielby, Ph.D., University of Wisconsin, Professor (gender, culture, work, aging and the life course)

Jon D. Cruz, Ph.D., UC Berkeley, Associate Professor (social theory, culture, race and ethnicity, knowledge)

G. Reginald Daniel, Ph.D., UC Los Angeles,

Associate Professor (race and ethnic relations, comparative and historical sociology, comparative race and culture)

Jennifer Earl, Ph.D., University of Arizona, Associate Professor (social movements, law, quantitative methods, political sociology)

Simonetta Falasca-Zamponi, Ph.D., UC Berkeley, Associate Professor (sociology of culture, political sociology, historical sociology, Western European studies)

Sarah Fenstermaker, Ph.D., Northwestern University, Professor (work and gender, feminist inquiry, feminist theory, research methods)

John Foran, Ph.D., UC Berkeley, Professor (development and social change, Middle Eastern studies, Latin American studies, comparative historical methods, social theory, political sociology, social movements, cultural studies)

Noah E. Friedkin, Ph.D., University of Chicago, Professor (social psychology, social networks, sociology of education)

Roger O. Friedland, Ph.D., University of Wisconsin, Professor (cultural theory; architecture; religious nationalism; institutional theory; space, time, and social theory)

Avery F. Gordon, Ph.D., Boston College, Professor (social theory, race, culture, feminist studies)

Nikki Jones, Ph.D., University of Pennsylvania, Assistant Professor (urban ethnography, race and ethnicity, gender and crime, criminology and criminal justice, qualitative research methods)

Mark Juergensmeyer, Ph.D., UC Berkeley, Professor (South Asian religion and society, sociology of religion, religious nationalism, terrorism, moral community, and social ethics)

Gene H. Lerner, Ph.D., UC Irvine, Professor (conversation analysis, social life of very young children, social aspects of syntax)

George Lipsitz, Ph.D., University of Wisconsin, Professor (race, culture and social identities, 20th-century U.S. history, urban history and culture, social movements)

Fernando Lopez-Alves, Ph.D., UC Los Angeles, Professor (comparative historical sociology, comparative politics, globalization, Latin American politics, organized labor)

John Mohr, Ph.D., Yale University, Associate Professor (complex organizations, historical sociology, welfare state, culture)

Melvin Oliver, Ph.D., Washington University, Professor (poverty, inequality and social policy, race and interethnic relations)

Carolyn Pinedo Turnovsky, Ph.D., City University of New York Graduate Center, Assistant Professor, (race and ethnicity, Latina and Latino studies, immigration studies, inequality, urban ethnography)

Geoffrey Raymond, Ph.D., UC Los Angeles, Associate Professor (conversation analysis, ethnomethodology, interaction in institutional settings, social theory, medical sociology, sociology of science and technology)

Victor M. Rios, Ph.D., UC Berkeley, Assistant Professor, (juvenile justice, race and penalty, Latina and Latino sociology)

William I. Robinson, Ph.D., University of New Mexico, Professor (globalization, development, political economy, macrosociology, political sociology, Latin America)

Beth E. Schneider, Ph.D., University of Massachusetts, Professor (sexuality, feminist and gender theory, social movements, health/AIDS, lesbian/gay studies)

Denise Segura, Ph.D., UC Berkeley, Professor (Chicana and Chicano Studies, feminist studies, gender, family, work, race-ethnic relations)

John R. Sutton, Ph.D., UC Davis, Professor (organizations, law/social control/deviance, comparative sociology, culture)

Verta Taylor, Ph.D., Ohio State University, Professor (social movements, gender, sexuality, culture, mental health)

France Winddance Twine, Ph.D., UC Berkeley, Professor (girls, sexuality, feminist theory, critical race theory, racism/anti-racism, visual sociology, transracial/multiracial families, Brazil, U.S. and Western Europe)

Howard Winant, Ph.D., UC Santa Cruz, Professor (race and racism, political sociology, comparative/historical sociology, social theory)

Raymond Sin-Kwok Wong, Ph.D., University of Wisconsin, Professor (social stratification, comparative sociology, methods and statistics, sociology of economic change, demography)

Emeriti Faculty

William T. Bielby, Ph.D., University of Wisconsin, Professor Emeritus

Sethard Fisher, Ph.D., UC Berkeley, Professor Emeritus

Richard Flacks, Ph.D., University of Michigan, Professor Emeritus

Morris F. Friedell, Ph.D., University of Chicago, Associate Professor Emeritus

David Gold, Ph.D., University of Chicago, Professor Emeritus

Harvey L. Molotch, Ph.D., University of Chicago, Professor Emeritus

Ilene H. Nagel, Ph.D., New York University, Professor Emeritus

Thomas J. Scheff, Ph.D., UC Berkeley, Professor Emeritus

Gary I. Schulman, Ph.D., Stanford University, Associate Professor Emeritus

John A. Sonquist, Ph.D., University of Chicago, Professor Emeritus

Bruce C. Straits, Ph.D., University of Chicago, Professor Emeritus

Thomas P. Wilson, Ph.D., Columbia University, Professor Emeritus

Don H. Zimmerman, Ph.D., UC Los Angeles, Professor Emeritus

Affiliated Faculty

Ralph J. Armbruster, Ph.D. (Chicana and Chicano Studies)

William R. Freudenburg, Ph.D. (Environmental Studies)

Mary E. Hancock, Ph.D. (Anthropology)

Lisa Hajjar, Ph.D. (Law and Society)

Laury Oaks, Ph.D. (Women's Studies)

John S.W. Park, Ph.D. (Asian American Studies)

Wade Clark Roof, Ph.D. (Religious Studies)

Leila J. Rupp, Ph.D. (Women's Studies)

Sociology is the systematic study of social life. Through empirical inquiry, sociologists seek

to understand the process by which societies, communities, institutions, and organizations are created, maintained, undermined, and transformed, and the ways in which social life shapes individuals.

The Department of Sociology is composed of scholars who are internationally recognized contributors to the discipline. It is known for its diversity of perspective and particularly for its support for emerging areas of study and innovative approaches to theory, method, and empirical inquiry. The department has distinctive strength in quantitative methods of research and analysis. It participates in the Social Science Computing Facility (SSCF) which provides instructional computing support. The SSCF offers access to computers, the Internet, software consultation, and technical assistance. The department is also affiliated with the Institute for Social, Behavioral, and Economic Research, which conducts global policy related research in the social sciences.

The requirements for the sociology major are designed to provide students with a thorough grounding in the theory and methodology of the discipline and their rigorous application to empirical inquiry. In addition to providing the core of a liberal arts education, the sociology major can also serve as preparation for graduate study for a career as a professional sociologist. Finally, the major may be used as preparation for a career in such fields as law, management, urban and environmental planning, corrections, journalism, teaching, social work, and other service professions.

Students with a bachelor's degree in sociology who are interested in pursuing a California Teaching Credential should contact the Credential Advisor in the Graduate School of Education as soon as possible.

Honors Program in Sociology

As part of our participation in the College of Letters and Science Honors Program, the department offers introductory-level sociology honors classes (Sociology 1H), which are taught by the course professor, thus providing students with a unique opportunity for small group interaction with the instructor. In addition, eligible undergraduates may, with consent of the instructor, elect to fulfill an honors contract for any course. Eligible upper-division honors students may also participate in graduate courses numbered 200-299 by petition.

In addition to the general honors program, the Department of Sociology offers a three-quarter honors research practicum (196H-HR-HT). Students enrolled in this seminar complete an original research project on a topic of their choice. To be eligible for the honors practicum in sociology, students must have completed Sociology 1 and a statistics course, must have a minimum 3.5 cumulative grade-point average with a 3.5 grade-point average in upper-division sociology courses. In addition, it is strongly recommended that students interested in the honors research practicum acquire competency in the methodological area related to their specific research topic.

All qualified students are invited to apply at the Department of Sociology office before the end of the spring quarter prior to the year of requested admission to the practicum series.

All students must submit a writing sample from a social science course, excluding take-home examinations. All final decisions for admission to the honors program will be made by the program coordinator and will be based on the writing sample, standing in the major, and cumulative grade-point average. Students not meeting the minimal requirements may be nominated for consideration by a member of the faculty.

Graduation with Distinction

To be eligible to graduate with Distinction in the Major, honors students must complete, with a grade of B or better, a minimum of two graduate seminars in sociology and the three quarter honors research practicum which includes the presentation of an honors thesis. Students must also maintain a 3.5 cumulative grade-point average and a 3.5 grade-point average in upper-division sociology courses.

Alpha Kappa Delta. The Department of Sociology also sponsors the Tau of California Chapter of Alpha Kappa Delta, the national sociology honors society. Membership in Alpha Kappa Delta is restricted to outstanding graduating seniors with a cumulative grade-point average of at least 3.5, and with a 3.5 grade-point average in sociology units taken at UCSB.

Undergraduate Program

Prospective majors are expected to consult the department undergraduate academic advisor about all aspects of planning a program in sociology. Before admission to the sociology major, students must complete all sociology preparation for the major courses as specified below. Preparation for the major courses may not be taken on a passed/not passed basis. Students may declare the pre-sociology major after completion of at least one course in area(s) A and/or B of the pre-major with at least a 2.3 GPA. Students who declare the pre-major are responsible for satisfying degree requirements in effect at the time they declare the major. Pre-major status does not, however, guarantee admission to full major status. When pre-major requirements are satisfied, students should complete a change of major petition, available in the sociology undergraduate advising office, to declare full major status.

Bachelor of Arts—Sociology

Preparation for the major. To qualify for admission into the sociology major, students must complete Sociology 1; Communication 87; Psychology 5, or PSTAT 5AA-ZZ; History 17C; and History 2C, 4C, 8, or 17B with a grade-point average of 2.3 or above.

In addition, students must complete two courses from the following (excluded as part of the pre-major grade-point average computation but must be taken for letter grades): Anthropology 2, 7; History 7, 17A; Economics 2 or 109; Political Science 1, 6, 7, or 12; Environmental Studies 2, 3; Psychology 1; Geography 5, Philosophy 3, 4, 6, and 7.

The concepts of diversity and ethnicity are fundamentally related to many of the sociological theories and issues considered in upper-division sociology courses. Therefore, the department requires that students take a diversity

course from the following list (excluded as part of the pre-major grade-point average computation but must be taken for a letter grade): Asian American Studies 1, 2, 3, 8; Black Studies 1, 3, 4, 5, 6, 15, 20, 50; Chicana/o Studies 1A, 1B, 1C; History 11A, 11B; Women's Studies 10, 20, 30, 40, 60, 70, 80.

Upper-division major. Thirty-six upper-division sociology units are required, distributed as follows:

One methods and research course. Understanding how empirical evidence about social life is systematically gathered and analyzed is a crucial part of a liberal arts education, and the opportunity to engage in hands-on research is the best way to understand how sociologists develop knowledge about the social world. The department requires one course that has a methods and data analysis component, from the following list: Sociology 104A, 108, 108A-ZZ, 136B, 136V, 141S, 143, 148MA.

One theory course. Theories are the conceptual frameworks sociologists use to think about and analyze the social world we inhabit. Students are exposed to theories in all their upper-division work; in addition, the department requires one course from the following list: Sociology 185A-Z.

One social inequality and stratification course. From its founding to the present, sociology has been preoccupied with understanding how societies are structured and stratified along lines of class, gender, race/ethnicity, age, and other criteria. The department requires every major to complete one course on stratification and inequality from the following list: Sociology 122, 122GI, 126U, 128, 130, 130GR, 130LA, 130ME, 130SA, 130SG, 131, 134, 134R, 137E, 139A-B-C-D, 139RN, 140, 144, 153, 154F, 155A-B, 155M, 155R, 155T, 155W, 156A-B, 156LA, 159LG.

Two courses chosen from one of the following nine subject areas:

1. Culture. Sociology 108C, 118C, 118G, 118J, 118L, 118M, 118JR, 133, 185C.
2. Law, Deviance, and Social Control. Sociology 170, 170J, 172, 173, 174, 175, 176A, 176D, 178
3. Feminist and Gender Studies. Sociology 144S, 151, 153, 154A, 155A-B, 155T, 156LA, 159LG, 159S, 185G, 185GT.
4. Global and International Studies. Sociology 130, 130A, 130LA, 130ME, 130SA, 130SG, 130ST, 134T, 138G, 156A-B, 166W, 168E.
5. Inequality, Institutions, Networks. Sociology 102, 122, 122GI, 123, 126, 126U, 131, 148, 148MA, 148P, 164, 167, 185J.
6. Language Use and Social Interaction. Sociology 136A-B, 136I, 136M, 136V, 185E.
7. Life Course, Socialization, and Interpersonal Relations. Sociology 140, 142, 147, 152A-B, 154EC.
8. Race/Ethnicity/Nation. Sociology 128, 130SW, 137E, 139A-B-C-D-RN, 144, 154F, 155R, 155W, 185D.
9. Social Movements and Social Change. Sociology 130GR, 134, 134LA, 134R, 134RC, 155M, 157, 157S

Two additional courses chosen from any of the remaining eight subject areas.

Students may choose the remaining 8 units from upper-division sociology courses.

Note: The same course may not be used to fulfill the requirements in more than one of the areas listed above.

In certain cases where there is clear programmatic relevance, the student may propose for consideration a maximum of 8 units of upper-division work in closely related fields as part of the 40 required units; however, these may not be substituted for specifically required courses. Acceptance is contingent upon approval of the department chair. Up to 8 units combined of the following courses may be taken P/NP for major credit: Sociology 190A, 191CA, 194, 195H, 197H, 198, 199, 199RA; all other major courses must be taken for letter grades.

Recommended Programs

Students considering graduate training for careers as professional sociologists are advised to take Sociology 185A to fulfill the upper-division theory requirement. This course offers integrated perspective on the traditions of sociological theory as a whole rather than concentrating on a single subfield, and it is appropriate for graduate school preparation. Students preparing for graduate study are encouraged to complete one upper-division methods course in addition to the course they select to fulfill the methods requirement. Additionally, students should use the upper-division elective units (8) to increase their exposure to other areas in sociology. They should also seek individualized reading or research projects with faculty members. Students who anticipate applying for graduate school should discuss their programs at an early stage with the undergraduate advisor and a faculty member.

Students considering a career in public and social affairs should plan their programs with graduate study in mind, as such careers typically require study at the master's level in urban planning, social work, public affairs, business, law, or sociology. A program in public and social affairs should involve a background in methods and analysis, a foundation in computer skills, a basic knowledge of societal organization and change, a special focus on urban programs, and an in-depth knowledge of one or more additional areas of particular interest. Field experience through an internship is strongly recommended.

Students interested in acquiring technical skills in data management for careers in government, research, or business firms are advised to learn not only the technical aspects of research, but the sociological dimension as well: the institutional settings that frame policy-related problems, ways to formulate and conduct research programs, and intelligent interpretation of the results of analysis. Students should consult with an advisor to plan an appropriate program.

Graduate Program

In addition to departmental requirements, candidates for graduate degrees must meet the university degree requirements described in the chapter "Graduate Education at UCSB."

Admission

The department does not admit students for terminal M.A. degrees. Because the M.A. program in sociology is designed to prepare students for the Ph.D. program, students should

enter into the M.A./Ph.D. program. However, continuation to the Ph.D. is dependent upon the student's ability to conduct research at the Ph.D. level. Applications are accepted for fall quarter admission only; the deadline for applications and financial support is December 10.

Applicants should have training substantially equivalent to the undergraduate major in sociology at UCSB, including research methods, statistics, and the development of sociological theory. Students with inadequate background in these areas may be admitted to the M.A./Ph.D. program but will be expected to make up deficiencies during their first year of study. Students admitted with a M.A. in sociology earned elsewhere who do not have training substantially equivalent to that required for the B.A. and M.A. in sociology at UCSB must remedy deficiencies in training within two years of being admitted to the Ph.D. program.

In addition to departmental requirements for admission, applicants must fulfill university requirements for admission to graduate status described in the chapter "Graduate Education at UCSB." Applicants must submit scores on the Aptitude Test of the Graduate Record Examination (GRE) and a sample of written work in sociology.

For more information, please visit our website: www.soc.ucsb.edu.

Master of Arts—Sociology

Degree Requirements

The M.A. degree follows the university's Plan 1, culminating in a thesis, with the following additional requirements: 36 units of coursework completed with the grade of B or better, of which at least 20 must be graduate units; successful completion of the department's graduate-level theory, quantitative analysis sequences, logics of inquiry and one additional methods course or sequence. The thesis is based on empirical research. Following successful submission of the thesis, the student undergoes an oral comprehensive examination. Required coursework must be completed by the end of the quarter in which the examination is taken. The student's advisory committee supervises the thesis research, administers the comprehensive examination, and certifies completion of required coursework.

To receive an M.A. degree the student must receive a "pass" or higher grade on the comprehensive examination; to continue in the Ph.D. program, the student must receive a "high pass" or an "honor pass." The M.A. program should normally be completed by the end of the second year, but a student may petition for an extension.

Doctor of Philosophy—Sociology

Degree Requirements

Before being advanced to candidacy, the student must (1) demonstrate competence in a major area of sociology by completing three seminars on topics related to that area; (2) demonstrate current knowledge of the dissertation research field by completing a comprehensive paper; and (3) complete one additional methods course beyond that required for the M.A. This examination normally focuses on the student's major

area of specialization and proposed research. All coursework for the Ph.D. must be completed with the grade of B or better. No foreign language is required, but a student whose specialty requires knowledge of such a language will be required to demonstrate competence.

Dissertation Proposal: The student submits a dissertation proposal that is approved by the PhD Committee. The student's PhD Committee will normally require an oral hearing prior to approving the proposal.

The candidate must complete a dissertation and will be called upon for an oral defense.

Optional Ph.D. Emphasis in Human Development

Students pursuing a Ph.D. in this department may petition to add an emphasis in human development. The interdisciplinary program in human development (IHD) involves faculty from the Ph.D. programs in communication, counseling/clinical/school psychology, education, linguistics, psychology, and sociology. The program focuses on developmental theory and research across the lifespan, and may be particularly relevant to the dissertation research of some students. The program features a structured set of courses which are taught individually and collaboratively by faculty from a variety of disciplines.

Students who petition to add the emphasis in human development must fulfill the following requirements in addition to the requirements for the Ph.D. in their home department: (1) six quarters of proseminar Interdisciplinary 592; (2) four courses in addition to the proseminar, two of which must be outside the student's home department; (3) a minimum of one member of the student's doctoral committee must be a ladder faculty member officially affiliated with the interdisciplinary program in human development. Consult the department for additional information or visit: www.psych.ucsb.edu/research/ihd.

Optional Ph.D. Emphasis in Language, Interaction, and Social Organization

Students pursuing a Ph.D. in the Departments of Education, Linguistics, or Sociology may petition to add an interdisciplinary emphasis in language, interaction, and social organization (LISO). This emphasis draws upon three approaches: interactional linguistics, conversation analysis, and sociocultural linguistic analysis.

In addition to the emphasis requirements below, students must satisfy the requirements for the Ph.D. in their home department. Work in satisfaction of departmental Ph.D. requirements may also be used to satisfy emphasis requirements. The emphasis requires (1) three quarters of Education/Linguistics/Sociology 274, Proseminar in Language, Interaction, and Social Organization, for credit; (2) a minimum of three elective LISO courses from the list below, one from each of the student's non-home departments, and the third a designated methods course in any of the three departments (the designated methods courses are: Education 221A, 221B, 221G, Linguistics 212, 230 and Sociology 212R); Linguistics 201, 209, 212, 214, 227, 228, 230, 232, 237, 266, 254A-B, 258A-B;

Education 202E, 207, 209A, 221B, 221G, 270G, or 270H; Sociology 212R, 236, 236I, 236V, 242, 273A-B, (3) one presentation in Education/Linguistics/Sociology 274, which may be either a research paper or a guided data session; (4) Students must complete a research project; the project must be supervised by at least one participating faculty member. This requirement can be satisfied in either of two ways: (a) Completion of a paper reporting a post-M.A. research project which presents an analysis of interactional data and displays command of the relevant literature. It must be written up in publishable form, though actual publication is not a requirement. (b) Successfully defend a dissertation centrally addressed to questions concerning language, interaction, and social organization; at least one member of the student's qualifying examination and dissertation committee must be a faculty member affiliated with LISO.

Questions or requests for additional information may be directed either to a participating faculty member or to LISO, c/o the Department of Sociology, UCSB, Santa Barbara, CA 93106. For further information, please visit: www.liso.ucsb.edu.

Optional Ph.D. Emphasis in Quantitative Methods in the Social Sciences (QMSS)

Students pursuing a Ph.D. in this department may petition to add an interdisciplinary emphasis in quantitative methods in the social sciences (QMSS). This new interdisciplinary emphasis involves faculty from the Ph.D. programs in communication, economics, education, geography, political science, psychology, sociology, and statistics and applied probability. The areas of specialization of the participating faculty include advanced regression modeling techniques, multivariate statistics, bootstrap estimation methods, demography, econometrics, psychometrics, social network theory, mathematical psychology, spatial statistics, survey research, and educational and psychological assessment. The QMSS emphasis helps students to attain the competencies needed to conduct quantitative social science research through core design and analysis classes, courses in advanced and specialized methodologies, and participation in interdisciplinary colloquia and research projects.

Each admitted student will develop, with his or her advisor, an individual contract listing the QMSS requirements to be completed. The contract must include the following:

- Two quarters of calculus, one quarter in linear algebra, and a one-year statistics sequence (These requirements can be waived if equivalent courses have already been completed).
- Attendance for at least three quarters at the ongoing QMSS seminar series, including presentation of at least one paper.
- Completion of at least three quantitative methods courses (excluding those listed above), at least two of which are outside the student's home department.
- A Ph.D. dissertation that is centrally focused on an issue that is appropriate to the QMSS emphasis. The dissertation may make a contribution to methodological theory or may involve an advanced or innovative application.
- A dissertation committee that includes at least

one QMSS faculty member from outside the student's home department.

For additional information, please visit: www.qmss.ucsb.edu

Optional Ph.D. Emphasis in Women's Studies

The Women's Studies Program, with almost fifty core and affiliated faculty members in over nineteen disciplines, serves as a model of interdisciplinary work and scholarly collaboration at UCSB. Women's Studies doctoral emphasis students are required to complete successfully four seminars that will enhance their understanding of feminist pedagogy, feminist theory, and topics relevant to the study of women, gender and/or sexuality. Women's Studies as an inter-departmental set of conversations and intellectual questions supports a multifaceted undergraduate curriculum at UCSB. Graduate emphasis students are encouraged to apply to teach Women's Studies courses as teaching assistants and associates as part of their Women's Studies training.

Applicants must first be admitted to, or currently enrolled in, a UCSB Ph.D. program participating in the Women's Studies graduate emphasis: Anthropology; Comparative Literature; Counseling, Clinical, and School Psychology; English; French and Italian; Germanic, Slavic and Semitic Studies; History; History of Art and Architecture; Political Science; Religious Studies; Sociology; Spanish and Portuguese; or Theater and Dance. Candidates complete four graduate courses and select a member of the Women's Studies faculty or affiliated faculty to serve on their dissertation committees. Applications to the Women's Studies Doctoral Emphasis may be submitted at any stage of Ph.D. work, and applications will be considered throughout the year.

The Graduate Curriculum

Students pursuing the emphasis in Women's Studies will successfully complete four graduate courses. Only one may be taken in the student's home department.

1. **Issues in Feminist Epistemology and Pedagogy (Women's Studies 270).** A one-quarter seminar that considers Women's Studies as a distinct field. It offers an interdisciplinary exploration of feminist theories of knowledge production and teaching practices. Readings cover past and present critical debates and provide theoretical approaches through which to analyze interdisciplinary epistemological and pedagogical issues.
2. **Special Topics in Women's Studies (594 AA-ZZ).** A one-quarter seminar offered by a Women's Studies faculty member on topics of central concern to the field of Women's Studies.
Or,
Research Practicum (Women's Studies 280). A cross-disciplinary seminar in which fundamental questions in contemporary feminist research practice are considered in light of students' own graduate projects. Students may fulfill the Area 2 requirement by taking either a Special Topics Seminar or the Research Practicum.
3. **Feminist Theories.** A one-quarter graduate

seminar in feminist theory offered by any department, including Women's Studies.

- 4. Topical Seminar.** A one quarter graduate seminar, outside the student's home department, that addresses topics relevant to the study of women, gender, and/or sexuality.

Optional Ph.D. Emphasis in Global Studies

Students pursuing a Ph.D. in certain departments may petition to add an emphasis in global studies. The departments for which the emphasis is available include anthropology, English, history, political science, religious studies, and sociology. To be eligible for admission to the Ph.D. emphasis, students must be admitted to the Ph.D. program in one of the departments choosing to offer this emphasis with their existing Ph.D. program and petition successfully to add the optional emphasis.

The student's dissertation committee must have one member from a participating department other than the student's own department. The student may also elect a global emphasis for his or her department field/area/specialization exam, if such an emphasis is offered within the department. The chair of the Coordinating Committee will determine when the student has successfully completed all of the requirements for the emphasis.

By "global" we refer to transnational economic, political, environmental, social, and cultural interactions and flows that operate at a global (i.e., trans-continental) scale. "Global studies" views the world as comprised of increasingly interdependent processes, rather than as shaped exclusively or even primarily by the interplay of discrete nation-states.

Petitions for adding the emphasis can be made at any time in a student's graduate career, but typically will be made after at least one successful year of study in the home department. Work completed prior to admission in the emphasis that meets emphasis requirements (as determined by the Ph.D. Emphasis Coordinating Committee) may be counted towards completion.

To satisfy the Ph.D. emphasis in global studies, students are required to take four one-quarter graduate-level courses. One course is Global 201, the introductory gateway seminar, offered by the Global and International Studies Program. Three additional courses must be chosen from among qualifying global theory and global issues courses offered by participating departments. These courses will be selected from an approved list of global theory and global issues graduate courses prepared by the Ph.D. Emphasis Coordinating Committee each spring, for the following academic year. At least one of these three courses must be a global theory course, and at least one must be a global issues course. Courses will typically be taken for a letter grade.

At least one of these three courses will be taken from the student's home department, and at least two must be taken from the six other participating departments or the Global and International Studies Program. No more than one of the three seminars (excluding Global 201) can be taken from a single instructor.

For additional information, please contact

the graduate advisor in one of the participating departments or visit our Web site: www.global.ucsb.edu.

Optional Ph.D. Emphasis in Technology and Society

Students pursuing a Ph.D. in this department may petition to add an emphasis in technology and society. The emphasis brings together doctoral students in engineering, social sciences, and the humanities to engage in multidisciplinary coursework and research into the cultural and societal changes resulting from the use of new information technologies. The emphasis features a structured set of courses that may be taught individually and collaboratively by faculty across disciplines: Anthropology, Communication, Computer Science, English, History, Media Arts and Technology, Political Science, and Sociology.

To be eligible for admission to the emphasis, students must be enrolled in good standing in the department. Petitions for adding the emphasis can be made at any time in a student's graduate career, but typically will be made after at least one successful year of study in the home department. Work completed prior to admission that meets emphasis requirements (as determined by the Ph.D. Emphasis Faculty Executive Steering Committee) may be counted towards its completion.

Requirements for completing the optional emphasis in technology and society include:

- 1. Gateway Technology and Society Colloquium.** Students must complete a 1-unit colloquium that brings together students and faculty from multiple disciplines to explore various approaches to studying technology and society. In addition to helping students understand similarities and differences in conceptualization and knowledge production across disciplines, the seminar promotes interaction among students from different departments.
- 2. Graduate Coursework.** Students must complete four 4-unit courses with a grade of B or better, two each from Area 1 (Culture and History) and Area 2 (Society and Behavior). Area 1 courses explore the humanistic study of cultures, histories and meanings as they intersect with technology. Area 2 investigates the social scientific study of technology in relationship to human behavior, organizations, and social structures.

One course from the student's home department can be applied toward meeting this requirement. Students can petition to substitute a non-listed course, subject to approval by the Technology and Society Faculty Executive Committee.

- 3. Dissertation.** A student's dissertation must have relevance to at least one of the two Emphasis areas. In addition, the student's dissertation committee must include a member from another department participating in the emphasis. Exceptions are subject to approval by the Technology and Society Faculty Executive Committee.

For additional information and a current list of courses, please contact the graduate advisor or visit www.technology-society.ucsb.edu.

Sociology Courses

LOWER DIVISION

1. Introduction to Sociology

(4) STAFF

Basic concepts and issues in the study of human society. The structures and processes of human conduct, social organization, and social change.

1H. Introduction to Sociology—Honors

(1) STAFF

Prerequisites: concurrent enrollment in Sociology 1 and consent of instructor; students must meet departmental honors criteria.

Students receive one unit for the honors seminar for a total of 5 units in Sociology 1-1H.

Eligible students will be invited to enroll in the honors seminar which will generally be taught by the course instructor.

98. Readings in Sociology

(1-4) STAFF

Prerequisites: consent of instructor and department.

Students must have a minimum 3.0 cumulative grade-point average and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined. May be repeated for credit to a maximum of 8 units. No unit credit allowed toward the major.

Critical reviews and discussions of related topics in sociology under the guidance of a faculty member. Students wishing to enroll must prepare a short plan of study.

99. Introduction to Research in Sociology

(1-4) STAFF

Prerequisites: consent of instructor and department.

Students must have a minimum 3.0 cumulative grade-point average and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined. May be repeated for credit to a maximum of 8 units.

Independent research under the guidance of a faculty member in the department. Course offers exceptional students the opportunity to undertake independent research or work in a research group. Students wishing to enroll must prepare a short plan of study.

UPPER DIVISION

102. Sociology, the University, and Society

(4) FLACKS

Prerequisite: consent of instructor.

Among the main topics are: society, the university, and the discipline. Subtopics include: social and personal responsibility, the university and social change, departmentalization of knowledge, decision making in the university, clientele of university, concept of academic freedom, student power, ethnic and other minorities, organization of profession of sociology, and professional vs. liberal education.

104A-B. Fundamentals of Data Analysis in Sociology

(4) WONG, FRIEDKIN

Prerequisites: PSTAT 5AA-ZZ or Psychology 5 or Communications 87 or equivalent (for Sociology 104A): Sociology 104A (for Sociology 104B).

Basic techniques for the analysis of sociological data using linear models. Emphasis is on sociological application; the course covers the use of bivariate, multi-variate, and multiple-equation models in sociological research.

108. Methods of Sociological Research

(4) STAFF

Recommended preparation: an introductory research methods course.

Fundamentals of designing, conducting, and analyzing social surveys. While the main focus is on survey techniques, problems of design and interpretation in experimental and observational studies are touched upon in terms of contrasts and similarities.

108A. Sociology Research Traditions**(4) STAFF***Prerequisite: upper-division standing.**Not open to students who have completed Sociology 4.**Recommended preparation: Sociology 3 or a PSTAT 5 series course.*

Introduction to the basic language, logic, and techniques of major research traditions. Critical thinking in social science, and relation of theory to research in, for example, experiments, surveys, observational studies, historical and comparative approaches, and the use of available data.

108C. Methods of Cultural Analysis**(4) FALASCA-ZAMPONI***Recommended preparation: an introductory research methods course.*

A survey of several methodological approaches that can be applied to the analysis of culture. Methods will be chosen from among the following: interviewing, content analysis, historical methods, structuralism, survey, ethnography, etc.

108CH. Comparative and Historical Methods in Sociology**(4) FORAN***Recommended preparation: an introductory research methods course.*

A survey of the methods of comparative-historical sociology, with case studies drawn from various periods and places, including the United States, Europe, and the Third World; relationships between theory, methods, evidence, research strategies, and logic will be stressed.

108F. Studying People at Firsthand—Observational Methods in Social Science Research**(4) STAFF***Recommended preparation: an introductory research methods course.*

A vital aspect of modern sociology is the study of social activities in natural settings. This course explores the different methods a fieldworker can use to discover truths about society.

108G. Methods and Research in Global and International Sociology**(4) APPELBAUM, BHAVNANI, FORAN***Prerequisite: upper-division standing.*

An introduction to the methods of research used in comparative, global, and international research in sociology. Students engage in a group or individual research project chosen in consultation with the instructor.

108ST. Special Topics in Methods**(4) STAFF***Recommended preparation: an introductory research methods course.*

Course covers various topics in sociological methods. Topics, readings and field research will vary with instructors.

113A-B-C. MOST Research Training in Sociology**(4-4-4) GORDON, DANIEL***Prerequisite: consent of instructor.*

A year-long seminar introducing students to research specialties of the department. Students work with the instructor and with a faculty mentor to design a research project of their own.

114A-B-C. MOST Research – Second Year**(4-4-4) SCHNEIDER, GORDON***Prerequisites: Sociology 113A-B-C.*

A year-long seminar focused on data collection, analysis, writing of research projects, and presentation of results to seminar participants.

118C. Sociology of Culture**(4) FALASCA-ZAMPONI, SUTTON, CRUZ***Prerequisite: upper-division standing.*

A broad introduction to the sociological study of culture, organized around theoretical perspectives, definitional and analytical problems, the production of culture, and cultural effects on society.

118G. American Cultural Representations and Myths**(4) GORDON***Prerequisite: Upper-division standing.*

Exploration of selected range of cultural representations of America, focusing on the various dreams and myths that comprise our national identity. Attention to the impact of race, class and gender on American culture. Use of variety of mediums including film, television, ethnography, photography, and poetry.

118GR. Global Religion**(4) JUERGENSMEYER***Prerequisite: upper-division standing.**Same course as Global Studies 102 and Religious Studies 108.*

Examination of the globalization of religious traditions in the modern world. Topics include the polarities between homeland and diaspora, the relationships between transnational religions and nation-states, and how these dynamics change the very nature of religious traditions.

118L. Sociology of Art/Literature**(4) GORDON***Prerequisite: upper-division standing.*

Exploration of the relationship between art/literature and society. Focus on what art/literature teaches us about the social world and how it does so. Attention to questions of race, class, and gender. Use of variety of literary and visual mediums. Specific topics may vary.

118M. Music and Social Movements: The Culture of Protest**(4) FLACKS***Prerequisite: consent of instructor.*

A historical and comparative exploration of the ways in which music is used to express and to mobilize collective protest; the ways in which social movements affect popular culture, and the role of the artist in social movements.

122. Social Stratification**(4) WONG***Prerequisite: upper-division standing.*

The nature of social classes and class relations, emphasizing contemporary studies of American society.

122GI. Global Inequalities**(4) WONG, ROBINSON***Prerequisite: upper-division standing.*

Examines social inequality from a perspective that takes the global system as the unit of analysis. Topics include globalization, theories and methods for studying global inequality; spatial inequality, and structures and processes in the generation and persistence of inequalities at the global level.

123. Population**(4) STAFF***Prerequisite: upper-division standing.*

Population composition and change; differential fertility and mortality of sociocultural groups; internal and international migration; population theory and national policies; problems in areas of population pressure.

126. Urban Society**(4) STAFF**

Problems of the city, (e.g., congestion, homelessness, violence) are examined in light of larger economic and social forces which structure urban life. Through use of slides depicting urban settings, causes and consequences of different ways urban settlements have been organized are considered.

126U. Sociology of the Urban Underclass**(4) WONG***Prerequisite: upper-division standing.*

This course examines conservative, liberal, and radical perspectives on class, poverty, and race, and will allow a critical assessment of the social and political implications of the growing congruity between urban poverty and race.

128. Interethnic Relations**(4) DANIEL**

Patterns of racial and ethnic relations, with particular emphasis upon minorities in the United States.

130. Development and its Alternatives**(4) FORAN***Prerequisite: upper-division standing.*

Survey of development and social change,

emphasizing the Third World; modernization, dependency and other theories applied to cases drawn from Latin America, Asia, and Africa; examination of social structure, culture, social problems, and mechanisms of change.

130A. Development and Social Change in Africa**(4) ROBINSON***Prerequisite: upper-division standing.*

An exploration into Africa's experience in the global system, with particular attention to dynamics of colonialism, globalization, and African resistance. Topics include Africa before the modern era, contemporary social movements, political processes, African diaspora, class and gender, and regional case studies.

130LA. Development and Social Change in Latin America**(4) FORAN***Prerequisite: upper-division standing.*

Examines significant instances of economic, political, cultural, and social change in contemporary Latin America. Employs various perspectives to illuminate such phenomena as changing social structures, industrialization, social movements, the state, multinationals, the military, and international pressures.

130GR. Globalization and Resistance**(4) FORAN, ROBINSON***Prerequisite: upper-division standing.*

Examines current debates about the impact of globalization on political-economic, social, and cultural arrangement around the world, investigating how people are affected by it, and what forms resistance to these developments is taking in the emerging anti-globalization movements.

130SA. Development and Social Change in South and Central Asia**(4) JUERGENSMEYER***Prerequisite: upper-division standing.**Same course as Global Studies 140.*

An exploration of post-colonial social changes in India, Pakistan, Sri Lanka, and other South and Central Asia societies, with emphases on the rise of ethnic nationalism, the impact of international economic and communication systems, and indigenous forms of development.

130SG. Sociology of Globalization**(4) ROBINSON***Prerequisite: upper-division standing.*

Introduction to the sociological study of globalization. Survey of principal theories and debates in globalization studies, with a focus on economic, political, and cultural transnational processes, gender/race/class and globalization, transnational social movements, and local-global linkages.

130ST. Special Topics in Third World Studies**(4) STAFF***Prerequisite: upper-division standing.*

Covers topics in third world studies, to be chosen by the instructor, including such issues as social movements, race/ethnicity/nation, culture, development and globalization, and gender and sexuality, among others, in any of the regions of the third world.

130SW. Sociology of the Southwest**(4) ROBINSON***Prerequisite: upper-division standing.*

Examines the historical development of the U.S. Southwest in sociological perspective. Topics include the region's underlying political economy, the demographic, social, political, and symbolic processes that shape the region's ethnic and cultural makeup, gender dynamics, the family, and other social institutions.

131. Political Sociology**(4) STAFF***Prerequisite: upper-division standing.*

Social and cultural bases of the political process; the study of power and authority as reflecting the interplay of interests and values; analysis of continuities and discontinuities in the democratic political system.

133. Sociology of Mass Communications**(4) CRUZ**

Organization and processes of mass communications in American society and developing nations; effects of the mass media on social consensus, conflict, and innovation.

134. Social Movements**(4) STAFF**

Prerequisite: upper-division standing.

Causes, dynamics and consequences of protest. American social movements, particularly labor, civil rights, student and women's movements, are studied as cases in movement development. Documentary and fiction films help illustrate analytic themes and historical moments.

134R. The Sociology of Revolutions**(4) FORAN**

Prerequisite: upper-division standing.

Theories of social revolution will be presented; the causes, types, nature, processes, and outcomes of revolutions will be explored and assessed, with case studies drawn from among the French, Russian, Chinese, Mexican, Cuban, Iranian, and Nicaraguan revolutions, among others.

134RC. Radical Social Change**(4) FORAN**

Prerequisite: upper-division standing.

Covers significant cases of radical social change, such as the revolutions of Cuba, Chile, or Chiapas, the radical reforms in Kerala, India, the global justice movement, or any of the many others of the contemporary world.

134T. Social Analysis of Terrorism**(4) JUERGENSMEYER**

Prerequisite: upper-division standing.

Same course as Global Studies 134.

A study of terrorist movements and actions, especially those involving religious militants in the Middle East, South Asia, Europe, and the Americas. An exploration of their social causes and effects, and the relationship between religion and violence.

136A. The Analysis of Conversational Interaction**(4) LERNER, RAYMOND**

Prerequisite: upper-division standing.

Not open to students who have completed Sociology 136.

The analysis of naturally occurring conversations with an emphasis on understanding conversation as a form of social interaction. Focuses on systems that organize talk-in-interaction (turn taking, action sequencing, and repair of conversational troubles) and methods for analyzing single conversations.

136B. Methods of Conversation Analytic Research**(4) LERNER, RAYMOND**

Prerequisite: Sociology 136A or 136I or 136M or 136V or 185E.

Individual and group projects in the analysis of conversational interaction stressing the understanding of this approach through actual research.

136I. The Analysis of Interaction in Institutional Setting**(4) LERNER, RAYMOND**

Prerequisite: upper-division standing.

The course examines how interaction in institutional settings differs from everyday interaction, and how these differences contribute to the constitution of formal settings of social action.

136M. Communication in Medical Care**(4) RAYMOND**

Prerequisite: upper-division standing.

Examines empirical knowledge about the doctor-patient conduct, the role of expertise and power in this relationship and addresses methodological questions concerning analyses of the doctor-patient relationship.

136V. Video Study of Social Interaction**(4) LERNER, RAYMOND**

Prerequisite: upper-division standing.

Examination of the visible aspects of social interaction: the organization of gesture, gaze, and body movement in the production of social actions through a survey of relevant research and through

direct inspection of videotapes of ordinary social occasions.

138G. Global Conflict**(4) JUERGENSMEYER**

Prerequisite: upper-division standing.

Same course as Global Studies 124. Not open for credit to students who have completed Global Peace and Security 138 or Interdisciplinary 197C.

Exploration of some of the major points of tension in global society since the end of the Cold War, with emphasis on the rise of religious nationalism and ethnic strife in the Middle East, South and Central Asia, and Russia.

139A. Black and White Relations: Towards Pluralism or Integration?**(4) DANIEL**

Not open for credit to students who have completed Black Studies 139A.

A comparative-historical examination of interethnic relations between European Americans and African Americans from the colonial period to the present in terms of pluralistic and integrationist dynamics.

139C. Betwixt and Between: Multiracial Identity in the United States**(4) DANIEL**

Prerequisite: upper-division standing.

An examination of the factors that have influenced the social location of racially mixed individuals of African and European descent in the United States, in order to provide a context for understanding the complexities surrounding the newly emerging multiracial consciousness.

139RN. Race, Ethnicity, and Nation in Comparative-Historical Perspective**(4) DANIEL**

Prerequisite: upper-division standing.

Recommended preparation: Sociology 128, 139A-B-C, or 185D.

Comparative-historical analysis of varying patterns of race, ethnicity, and nation in the United States and the larger global arena.

140. Aging in American Society**(4) BIELBY**

Prerequisite: upper-division standing.

Recommended preparation: a socialization or developmental psychology course or personal experience working with the elderly.

This course will survey and analyze aspects of growing old in American society. Attention is focused on the meaning of aging to the individual as topics including physical and mental health, retirement, leisure, sexuality, death, and dying are discussed.

142. Socialization, Self-Actualization, and Creativity**(4) J.D. BALDWIN**

Prerequisite: upper-division standing.

The influence of people's social environment on their developing behavior. Attention devoted to exploration, play, creativity, self-actualization, showing how certain social environments are or are not conducive to full human development.

144. The Chicano Community**(4) SEGURA**

Prerequisite: upper-division standing.

Same course as Chicano Studies 144.

Origins of the Chicano in rural Mexico; context of contact; patterns of settlement in the United States; the Chicano community; social culture, and social change; acculturation and generational patterns; community leadership and change.

144S. Sexuality, Race, Gender, and Class**(4) SCHNEIDER**

Prerequisite: upper-division standing.

Examines interplay of sexuality, race, gender, nation, and class with focus on social processes and practices of lesbians, gays, and bisexuals of color. Raises critical intellectual issues about racialized and gendered social practices involving culture, politics, ideologies, and power relations.

146. Special Topics in Sociology**(4) STAFF**

Prerequisite: upper-division standing.

May be repeated for credit to a maximum of 16 units, but only 8 units may be applied toward the major.

Lectures in special areas of interest in contemporary sociology. Specific course titles to be announced by the department each quarter.

147. Current Issues in Social Psychology**(4) FRIEDKIN**

Prerequisite: upper-division standing.

May be repeated for credit to a maximum of 8 units.

Examination of recent developments in research and theory within selected fields of social psychology.

148. Social Networks**(4) FRIEDKIN**

Prerequisite: upper-division standing.

Recommended preparation: Sociology 1, 2, 3, and 4 or their equivalents.

Social structure as derived from patterns of micro-relation (networks of people) and macro-relations (networks of organizations, interest groups, nations, or other collectivities); consequences of network relationships for social behavior and the distribution of resources, information, power, beliefs, and social support.

148MA. Social Network Analysis**(4) FRIEDKIN**

Prerequisite: upper-division standing.

Introduction to concepts, methods, and applications of social network analysis.

151. Gender in Film and Television**(4) D. BIELBY**

Prerequisite: upper-division standing.

Examination of how structural, cultural, and historical factors shape images of gender in film and television.

152A. Sociology of Human Sexuality**(4) J.D. BALDWIN, J.I. BALDWIN**

The course covers all the main aspects of human sexuality—atomy, sexual response, pregnancy, sexual diseases including HIV, birth control, abortion, learning to be sexual, sexual orientation, gender differences, sex therapy and enrichment, love, and related sociological issues.

152B. Topics in Human Sexuality**(4) J.D. BALDWIN, J.I. BALDWIN**

Prerequisites: Sociology 152A and consent of instructor.

A seminar for advanced research on and discussion of sociology of human sexuality. Each student facilitates one class discussion on one of the main topics on sexuality.

152C. Advanced Study in the Sociology of Human Sexuality**(1-4) J.D. BALDWIN, J.I. BALDWIN**

Prerequisites: Sociology 152A-B; consent of instructor.

May be repeated for credit to a maximum of 12 units.

Covers specific details about human sexuality.

Course content determined by students and instructors.

153. Women and Work**(4) FENSTERMAKER, SEGURA**

Prerequisite: upper-division standing.

Same course as Women's Studies 153.

The course will begin with readings and discussion of the sociological features of work in society. The role of women in the labor market will be explored, as well as their lives as unpaid workers in their own homes. Finally, more global issues of sexual inequality and social change will be discussed.

154A. Sociology of the Family**(4) STAFF**

Prerequisite: upper-division standing.

Same course as Women's Studies 154A.

A lecture course on family and household organization, past and present. Attention to contemporary issues in the American family focusing on gender, class, and cultural variation.

154EC. Sociology of Early Childhood**(4) LERNER**

Prerequisite: upper-division standing.

Introduces students to young children as social actors. Examines their place in a social-interactive world and their assessment of others as independent persons. Topics include early friendship and conflict and their emergence as competent language users.

154F. The Chicano Family**(4) SEGURA***Prerequisite: upper-division standing.**Same course as Chicano Studies 154F.*

This course provides an overview of historical and contemporary research on Chicano families in the United States. Changing viewpoints on the character of Chicano families and their implications with respect to policy issues are examined.

155A. Women in American Society**(4) FENSTERMAKER***Prerequisite: upper-division standing.**Same course as Women's Studies 155A.*

The roles and life styles of women in various American subcultures and the ideologies developing around them.

155B. Sociological Perspectives on Women**(4) FENSTERMAKER, SCHNEIDER**

Same course as Women's Studies 155B. May be repeated for credit to a maximum of 8 units provided topics are different.

Recommended preparation: Sociology 155A.

Advanced study in the sociology of women course format (seminar or lecture) and topics vary from year to year. Topics may include: The analysis of the status of women in the labor force, women's class position, theoretical and practical aspects of patriarchy.

155M. Contemporary U.S. Women's Movements**(4) SCHNEIDER**

Examination of the development and transformation of the U.S. contemporary women's movement. Consideration is given to ideological and organizational differences, internal politics, and the impact of the movement on individuals, policies, and institutions.

155T. Girls Culture**(4) TWINE***Prerequisite: upper-division standing.*

Introduction to the interdisciplinary feminist literature on girls culture. Examination of how girls from a range of racial/ethnic, class, religious, and national backgrounds respond to social inequalities and cultural prescriptions of femininity. Topics may include sexuality, popular culture, economic dependence and activism.

155W. La Chicana: Mexican Women in the U.S.**(4) SEGURA***Prerequisite: upper-division standing.**Same course as Chicano Studies 155W.*

Examines existing research on native-born and immigrant Mexican women in the United States with emphasis on family, education, employment, and politics. Analysis of the Chicana experience organized by considering how interplay between class, race, and gender affects access to opportunity and equality.

156A. Introduction to Women, Culture, and Development**(4) BHAVNANI***Prerequisite: upper-division standing.**Same course as Anthropology 102A and Global Studies 180A.*

Critical examination of relations among women, culture, and development. Topics include colonialism, violence, globalization and the state, health and reproduction, biotechnology, representation, and resistance movements.

156B. Seminar in Women, Culture, and Development**(4) BHAVNANI***Prerequisites: Sociology 156A; upper-division standing.**Same course as Global Studies 180B and Anthropology 102B.*

Critical examination of the interrelationship between women, culture and development through individual research projects.

157. Radicalism in Contemporary Life**(4) STAFF***Prerequisite: upper-division standing.*

A multidisciplinary approach to investigating radicalism as a form of thought and practice. Examines different models and sources of radicalism cross-

nationally.

157S. Seminar in Radicalism in Contemporary Life**(4) GORDON***Prerequisites: Sociology 157; upper-division standing.*

A multidisciplinary approach to the investigation of models of contemporary radicalism through individual research projects.

159LG. Sociology of Lesbian and Gay Communities**(4) SCHNEIDER***Prerequisite: upper-division standing.**Same course as Women's Studies 159LG.*

Origins and transformation of lesbian and gay communities and social movements, with special attention to ideological development, major social problems, cultural production, race, ethnic and gender differences, organizational formation and political conflict.

159S. Sociology and Sexual Politics**(4) STAFF***Prerequisite: upper-division standing.*

Recent approaches to the study of sexuality through the work of gay and lesbian scholars, social historians, feminists, and discourse theorists. Emphasis on recent changes in sexuality, sexual suffering, and sexual politics. Topics vary with instructor.

164. Sociology of Education**(4) FRIEDKIN**

Changing character of education in complex societies; its relation to political, economic, and technological institutions; and its effect on individual and community behavior and development.

166W. The Contemporary World System**(4) APPELBAUM***Prerequisite: upper-division standing.**Same course as Global Studies 122.*

Seminar addressing various theoretical perspectives and empirical issues and aspects of the world system, with emphasis on political, economic, cultural, and social processes and relations.

170. Sociology of Deviant Behavior**(4) SUTTON***Prerequisite: upper-division standing.*

Introduction to the sociological study of conformity and deviance, with emphasis on processes of social control.

170J. Juvenile Justice: Youth Offenders and the Criminal Justice System in the New Millennium**(4) RIOS***Prerequisite: upper-division standing.*

Analysis of the structure and agency of juvenile justice. The history and function of the juvenile justice system (structure) and the experience and behavior (agency) of juveniles who are "deviant" or "delinquent" is examined.

172. Sociology of Crime and Delinquency**(4) SUTTON***Prerequisite: upper-division standing.*

Theories of the genesis of delinquency and crime; factors in the organization of delinquent and criminal behavior from the points of view of the person and group; delinquent and criminal behavior systems.

173. Sociology of Law**(4) SUTTON, EARL***Prerequisite: upper-division standing.*

Study of the social and cultural factors underlying the development, maintenance, and change of legal structures and processes, and analysis of theories of jurisprudence.

174. Criminal Justice and the Community**(4) EARL, JONES***Prerequisite: upper-division standing.*

Sociological analysis of law enforcement systems and court systems; police discretion, differential implementation of the criminal law; negotiation in criminal justice decisions.

175. Sociology of Punishments and Corrections**(4) STAFF***Prerequisite: upper-division standing.*

Theories of punishment and treatment used in

dealing with convicts and juvenile delinquents; analysis of the systems of behavior modification used by probation, prison, and parole workers.

176A. Sociology of AIDS**(4) SCHNEIDER***Prerequisite: upper-division standing.*

Sociological analysis of AIDS: the social history of disease; social construction of AIDS as a social problem; stigma, illnesses, and sexuality; impact of AIDS on selected groups and communities; legal, medical, and political institutions' response to AIDS.

176D. Sociology of Drug Use**(4) STAFF***Prerequisite: upper-division standing.*

Deals with such topics as the demographic patterns of drug usage, socialization into and out of drug subcultures, criminalization and decriminalization of various drugs, and drugs as they pertain to women, youth, and minorities. Cross-cultural approaches to drug use and treatment modes. (SS)

178. The Prisoner**(4) GORDON***Prerequisite: upper-division standing.*

Examines the history and current condition of prisoners in the United States and elsewhere in the world and studies the prison abolition movement through a multidisciplinary approach.

185A. Development of Sociological Thought**(4) APPELBAUM, CRUZ, FRIEDLAND***Prerequisite: upper-division standing.*

The outstanding European and American figures and idea systems in the development of sociological thought are discussed.

185C. Cultural Theory**(4) FRIEDLAND***Prerequisite: upper-division standing.*

An introduction to functionalist, semiotic, dramaturgical, Weberian, Durkheimian, Marxian and post-structuralist approaches to cultural analysis.

185D. Theories of Race and Ethnic Relations: United States Sociological Perspectives**(4) DANIEL, WINANT***Prerequisite: upper-division standing.*

A comparative-historical survey of classical and contemporary United States sociological theories of race and ethnic relations.

185E. Introduction to Ethnomethodology**(4) RAYMOND***Prerequisite: upper-division standing.*

Fundamental processes of social interaction and social organization. Accountability of action and the fundamental mechanisms of interaction; co-implication of institutional context and individual agency in interaction; reproduction of individual identities and social structure as trans-situational realities.

185F. French Social Theory**(4) FALASCA-ZAMPONI, FORAN***Prerequisite: upper-division standing.*

An examination of major developments in French social theory both from the historical and the thematic point of view. Authors studied may include: Comte, Durkheim, Mauss, Althusser, Foucault, Bourdieu, Sartre, Levi-Strauss, and Baudrillard.

185G. Theories of Gender and Inequality**(4) GORDON, BHAVNANI, TWINE***Prerequisite: upper-division standing.*

Varying theoretical perspectives on causes of gender inequality, maintenance and reproduction of gender systems, social consequences of gender stratification, and dynamics of change in systems of inequality.

185GT. Gender Theory/Transgender Experience**(4) FENSTERMAKER***Prerequisite: Upper-division standing.*

Focuses on theories of gender with specific application and relevance to transgender and transsexual experience. Gender's cultural, social structural, and interpersonal aspects are considered as they are destabilized, pushed, and crossed.

185J. Power in Social Institutions**(4) MOHR***Prerequisite: upper-division standing.*

Exploration of both classical and contemporary theories about social power. Application of these ideas to two or three special topics each quarter such as gender, organizations, work, and the state. Emphasis on explaining historical foundations of institutional arrangements.

185P. G.H. Mead's Theory of Pragmatism**(4) J.D. BALDWIN**

George Herbert Mead's theory of pragmatism provides a major foundation for sociological theory. It is also a very useful theory for contemporary social life. It integrates personal and interpersonal issues with larger macro-social concerns to create a unified theory.

185R. Special Topics in Social Theory**(4) STAFF***Prerequisite: upper-division standing.*

Exploration of various theorists, schools of thought, particular theories, and special problems and issues in social theory. Topics and readings will vary.

190A. Group Studies in Organizational Settings**(1-4) STAFF***Prerequisite: consent of instructor.*

Students must have an overall grade-point average of 3.0; student proposal required.

Systematic exploration of the problems of institutional and community development, the dilemmas of social service institutions and helping occupations, the potentialities and constraints on the creation of social and cultural alternatives.

191CA. Instructional Laboratory in Sociology**(1-4) STAFF***Prerequisites: upper-division standing; consent of instructor and department.*

Students must have a 3.0 overall grade-point average and a 4.0 grade-point average in relevant course(s); may be repeated for credit to a maximum of 12 units but only 4 units of all 191AA-ZZ may be applied toward the major.

Designed for outstanding students who intern as course assistants under the supervision of the assigned faculty member.

193. Senior Seminar**(4) STAFF***Prerequisite: consent of instructor.*

Open only to sociology majors who have completed 20 or more units of upper-division coursework in the major. May be repeated once for credit if topic and instructor are different.

A seminar intended to represent a culminating experience for majors. The focus will be on a topic or theme that permits intensive analysis of methods and problems of social inquiry. Topics will vary with the instructor.

194. Group Studies for Advanced Students**(2-5) STAFF***Prerequisite: consent of instructor.*

May be repeated for credit to a maximum of 12 units.

Intensive study and research.

195H. Sociology Honors Colloquium**(2) STAFF***Prerequisite: Must meet departmental honors criteria.*

May be repeated for credit to a maximum of 6 units.

In conjunction with the sociology colloquium series, this course will address issues and topics presented by the speakers. Participating students will be expected to read assigned materials and participate in discussions.

196H-HR-HT. Honors Research Practicum in Sociology**(4-4-4) STAFF***Prerequisites: open to upper-division sociology majors only; consent of instructor.*

Students must have a minimum grade-point average of 3.5 in sociology and overall. A three-quarter in-progress sequence course leading to the preparation and presentation of the honors thesis. Grades issued upon completion of Sociology 196HT.

H. Students will develop research topics and appropriate methodologies. General issues of sociological research will be raised and discussed, including the relationship between theory and method.

HR. Students will concentrate on data collection and analysis.

HT. Students will complete their research, write their theses, and present their results orally to the seminar.

197H. Honors Sociology**(4) STAFF***Prerequisites: Sociology 1, 2, and 3; a prior upper-division sociology course; students must meet sociology honors criteria.*

May be repeated to a maximum of 8 units.

An undergraduate seminar for honors students. Topics will vary by instructor.

198. Readings in Sociology**(1-5) STAFF***Prerequisites: upper-division standing; completion of two upper-division courses in sociology.*

Students must have a minimum 3.0 grade-point average for the preceding three quarters and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined. Students may apply a maximum of 12 units of Sociology 198/199 courses combined to the sociology major.

Readings in sociology under the guidance of a faculty member in the department. Students wishing to enroll should prepare a short plan of study.

199. Independent Studies in Sociology**(1-5) STAFF***Prerequisites: upper-division standing; completion of two upper-division courses in sociology.*

Students must have a minimum 3.0 grade-point average for the preceding 3 quarters and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined. Students may apply a maximum of 12 units of Sociology 198/199 courses combined to the sociology major.

Independent studies in sociology under the guidance of a faculty member in the department. Students wishing to enroll should prepare a short plan of study.

199RA. Independent Research Assistance in Sociology**(1-5) STAFF***Prerequisites: upper-division standing; completion of two upper-division courses in sociology.*

Students must have a minimum 3.0 grade-point average for the preceding three quarters and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199DC/199RA courses combined. Students may apply a maximum of 12 units of Sociology 198/198H/199/199AA-ZZ courses combined to the sociology major.

Coursework shall consist of faculty supervised research assistance.

GRADUATE COURSES**203. Logics on Inquiry****(4) SUTTON***Recommended preparation: Sociology 270A-B.*

Explores the connection between data and theory as they are developed in the major research traditions in sociology. Approaches that may be discussed are the quasi-experimental model, comparative-historical research and/or relational methods.

204A-B-C. Topics in Advanced Data Analysis**(4-4-4) WONG***Prerequisites: Sociology 103 and 104.*

Sociology 204C may be repeated twice providing the topics are different.

This seminar will deal with topics of current interest in the area of data analysis and will give participants "hands-on" experience in using the new techniques with real data. Participants will analyze data of their choosing and will write up the results in journal article form. Technical assistance and some data archives will be provided by the sociology computing facility.

205A-B. Data Analysis in Sociology**(4) WONG, FRIEDKIN***Prerequisite: Political Science 205 or PSTAT 5A-Z.**Sociology 205A is a prerequisite to Sociology 205B.*

Basic techniques for the analysis of sociological data using linear models. Emphasis is on sociological application; the course will cover the use of bivariate, multi-variate, and multiple-equation models in sociological research.

207A-B-C. Sociological Theory**(4-4-4) APPELBAUM, CRUZ, GORDON***Material covered equivalent to that offered in Sociology 200A-B.*

Fundamental issues in contemporary social theory from their emergence in the Enlightenment, through the writings of Marx, Durkheim, and Weber, to present day controversies.

211A-B. Field Research in Sociology**(4-4-4) TWINE**

The organization and execution of research in natural settings; analysis of field data and documentary evidence; problems of comparative history and analytic induction.

212A-B. Seminar in Comparative-Historical Sociology**(4-4) FORAN***Sociology 212B may be repeated for credit.*

- Theoretical and methodological bases of comparative-historical sociology. Use of theories and concepts, logic of comparison and contrast, types of evidence, and other issues raised by classic works and methodological writings.
- Students pursue research projects applying historical and/or comparative methods.

212F. Feminist Research Methodologies**(4) FENSTERMAKER, BHAVNANI, TWINE**

Fundamental issues in the philosophy, process, and tools of feminist research inquiries.

212P. Gender Research Practicum**(4) FENSTERMAKER, BHAVNANI**

A research practicum in which students apply the fundamentals of feminist research methodologies to current projects.

212Q. Quantitative Methods in the Social Sciences Seminar**(2) STAFF***Same course as Geography 201Q, PSTAT 250, and ED 212. May be repeated for credit.*

Required course for students in the Interdisciplinary Quantitative Methods in the Social Sciences emphasis.

212R. Introduction to the Analysis of Recorded Interaction**(4) LERNER***Prerequisite: consent of instructor.*

Methods for analyzing talk in interaction in a computerized multimedia environment. Methods for producing an action analysis, locating recurrent features, building a data collection, and developing a data collection into a formal research paper.

212W. Writing Practicum in Sociology**(4) FORAN***Prerequisite: must have a current research project that is in the writing stage.*

Designed to hone research and writing skills; the main work involves students' research projects, and giving feedback to each other. The group discusses a number of issues to do with the craft of writing.

214A-B. Introduction to Race, Ethnicity, Nation**(4-4) CRUZ, GORDON, DANIEL, WINANT, TWINE***Recommended preparation: Sociology 214A for Sociology 214B.*

Focus on the influential and paradigmatic theoretical and conceptual scholarship in the field. Emphasis on comparative framework, cultural approaches, intersection of race, class, and gender, and on interdisciplinary scholarship.

215. Contemporary Themes in Race and Migration**(4) PARK**

Using a comparative perspective, the course examines contemporary scholarship on race and migration from a multidisciplinary perspective,

including historical American immigration policies and patterns, the socio-political impact of American immigration law, and the complex processes of transnational and international migration.

218CP. Topics on Cultural Sociology

(4) FALASCA-ZAMPONI

May be repeated for credit

Selected topics in the sociological analysis of the relationship between culture and politics.

218P. Seminar on Popular Culture

(4) BIELBY

This seminar focuses on theories, research, and debates regarding the sociological analysis of popular culture.

218PA. Advanced Seminar on Popular Culture

(4) CRUZ, BIELBY

Prerequisite: consent of instructor.

Focuses on selected topics in the sociology of popular culture.

224. Seminar in Collective Behavior and Social Movement

(4) STAFF

Advanced study of theory and research on protest, collective mobilization, collective behavior, grass roots activism, and related topics.

230A-B-C. Proseminar in Social Movements and Political Consciousness (4-4-4) STAFF

A proseminar on current research and theory in social movement studies and related fields.

231. Seminar in Political Sociology

(4) STAFF

Study of the social and cultural bases of the political process.

233. Problems in Radical Thought

(4) GORDON

Explores some of the challenges facing radical thought today. Particular emphasis placed on the relationship between the critical and utopian functions of radical thought.

236. The Analysis of Conversational Interaction

(4) LERNER, RAYMOND

Prerequisite: consent of instructor.

This seminar focuses on the structure of naturally occurring conversational interaction with an emphasis on problem formulation and methods of analysis.

236I. The Analysis of Interaction in Institutional Settings

(4) LERNER, RAYMOND

Prerequisite: Sociology 236.

This seminar focuses on how the dynamics of interactional processes contribute to the constitution of formal settings of social action.

245A-B. Seminar on Gender

(4-4) STAFF

Current research, theories and concepts of gender will be considered. Topics vary from quarter to quarter and by instructor.

246. Seminar on the Life Course

(4) D. BIELBY

Examines theoretical and methodological approaches to the study of the lifecourse. The dynamic relation between changing social structures, institutions, and life patterns is emphasized.

248MA. Social Network Analysis

(4) FRIEDKIN

Prerequisite: consent of instructor.

Introduction to concepts, methods, and applications of social network analysis.

255R. Seminar on Gender, Race, and Class

(4) STAFF

An examination of the intersection of race, class, and gender in empirical and theoretical sociological work.

256S. Seminar on Sexualities

(4) SCHNEIDER

Research and theory on sexual meanings, identities, behavior, and communities.

261A-B-C. Comparative Institutions

(4-4-4) MOHR, SUTTON

An advanced seminar focusing on research development in broad area of comparative institutions within related political, social, economic, and cultural frameworks.

265. Development and its Alternatives

(4) FORAN, BHAVNANI, APPELBAUM

Explores a range of theories issues and case studies in the sociology of development and social change, primarily in the Third World. Topics and cases covered vary according to students' and instructor's interests.

265G. Sociology of Globalization

(4) ROBINSON

Overview of the sociology of globalization and theories of globalism. Topics include: the politics of globalization, transnational state apparatuses; social movements; global civil society; transnational migrations; globalization and race/ethnicity; gender and globalization; local-global linkages.

265GS. Global Political Economy

(4) APPELBAUM

An advanced graduate seminar covering recent theory and research about global production systems, including developments in world-systems theory, flexible production, post-Fordism, and global commodity chains.

265I. Introduction to Global, International, and Development Sociology

(4) STAFF

Prerequisite: graduate standing.

Introduces students to the range of core issues and debates within the fields of global, international, and development sociology, from political economy to culture, gender to REN, social movements to micro-issues.

265W. Women, Culture And Development

(4) APPELBAUM, BHAVNANI, FORAN

Identifying, reading, and critiquing theoretical and empirical materials from all regions of the Third World that address the interrelated themes of women, culture, and development.

266LA. Sociology of Latin America

(4) ROBINSON

Examines social, political, economic, and cultural trends in Latin America in historical context, including but not limited to political economy, development processes, women, indigenous people, revolutionary movements, transnational migration, and different debates, theories and perspectives for studying Latin America.

273A-B. Language and the Body

(4-2) LERNER

Prerequisites: graduate standing (for Sociology 273A); Sociology 273A (for 273B).

Same course as Linguistics 273A-B.

Brings together the methods and findings of functional linguistics and those of conversational analysis in a dialogue centering on the visible behavior of the body in the organization of talk-in-interaction, especially gesture, gaze, and body movement.

274. Proseminar in Language, Interaction, and Social Organization

(2-4) STAFF

Prerequisite: consent of instructor.

Same course as Education 274 and Linguistics 274. May be repeated for credit.

Discussion of current research, literature, and theoretical and methodological issues in language and social interaction.

275. Proseminar in Race, Ethnicity, and Nation

(2) WINANT

Prerequisite: consent of instructor.

Proseminar attached to the Race/Ethnicity/Nation area of the graduate program in Sociology. Focus on student research and emerging literature in REN related areas. Periodic colloquia by visitors. Meets biweekly.

290A-B. Teaching Assistant Training Seminar

(4-4) STAFF

This two-quarter sequence is required of all entering graduate students. Attendance at the departmental colloquia series is required as part of this course. SIU grading only; no credit allowed toward advanced degree.

The professional roles of sociologists as teacher, researcher, and colleague will be explored. Classroom techniques will be analyzed using video self-criticism and constructive feedback. Colloquia presentations will be considered as alternative modes of teaching effectiveness. Faculty presentations on their own pedagogic methods and current research activity will be included.

294. Special Topics

(4) STAFF

May be repeated for credit on approval of department chair.

Special seminar on research subjects of current interest.

501. Apprentice Teaching

(4) STAFF

Prerequisites: Sociology 290A-B-C and teaching assistant or associate status.

May be repeated for credit; units do not fulfill M.A. unit requirements.

The application of research and theory to classroom practice in the teaching of undergraduate sociology courses. At the teaching assistant level, faculty will supervise individual students as they lead discussion sections, prepare and grade examinations, read written assignments, and engage in individual consultations with undergraduates. Associates will be responsible for courses in their entirety. Weekly meetings with instructor are required.

502. Research Assistance Practicum

(2-4) STAFF

Prerequisites: research assistant status; consent of instructor.

Units dependent upon percentage of time hired: 25% 2 units; 50% 4 units. May be repeated for credit; units do not count toward M.A. unit requirements.

Content will vary with individual students, each of whom will be instructed in the practical aspects of doing research in the area employed—bibliographical work, interviewing, statistical analyses, or questionnaire construction and analysis. Weekly group meetings with instructor are required.

591. Graduate Workshop in Sociological Research

(1-4) STAFF

May be repeated for credit; units does not fulfill M.A. unit requirements.

Presentation of research completed, in progress or proposed, with faculty in attendance. Students are expected to offer critical and useful comments on research.

595AA-ZZ. Group Studies

(4) STAFF

May be repeated for credit on approval of department chair.

Critical review of research in selected fields.

596. Directed Reading and Research

(2-5) STAFF

May be repeated for credit on approval of department chair. No more than half the graduate units required for the M.A. may be taken in Sociology 596.

Individual tutorial. Plan of study must be approved by department chair.

597. Individual Study for M.A. and Ph.D. Examinations

(4-8) STAFF

Units do not count toward graduate degrees.

Maximum of 24 units per examination.

Normally taken with the student's committee chair.

598. M.A. Thesis Research and Preparation

(1-12) STAFF

Units do not count toward graduate degree.

Research and preparation for the masters thesis. Normally taken with the student's M.A. committee chair.

599. Ph.D. Dissertation Research and Preparation
(2-12) STAFF

Ph.D. dissertation preparation. Normally taken with the student's committee chair.

Department Chair: Francisco A. Lomeli

Faculty

Silvia Bermúdez, Ph.D., University of Southern California, Professor (20th-century Spanish and Latin American poetry)

Leo Cabranes-Grant, Ph.D., Harvard University, Associate Professor (Spanish Golden Age drama and poetry, Latin American drama, Latino and Spanish drama, intercultural studies)

João Camilo dos Santos, Doctorat d'Etat, Université de Haute Bretagne, Rennes, Professor, Director, Center for Portuguese Studies (19th- and 20th-century Portuguese and Brazilian literature, literary theory).

Jorge L. Castillo, Ph.D., Harvard University, Associate Professor (19th- and early 20th-century Latin American literature, Latin American poetry, history of ideas)

Jorge Checa, Ph.D., Princeton University, Professor (Golden Age Spanish literature and culture, literary theory)

Antonio Cortijo Ocaña, Ph.D., UC Berkeley, Associate Professor (Spanish Golden Age and medieval literature, humanism, Latin and vernacular)

Esperanza Jefferson, Ph.D., UC Santa Barbara, Lecturer

Suzanne Jill Levine, Ph.D., New York University, Professor (Latin American literature, comparative literature, literary translation)

Francisco A. Lomeli, Ph.D., University of New Mexico, Professor (Spanish-American literature, Chicano literature, Spanish language)

Juan Pablo Lupi, Ph.D., Harvard University, Assistant Professor (nineteenth and twentieth-century Latin American cultural and literary studies, with an emphasis on the Caribbean and comparative literature)

Viola Giulia Miglio, Ph.D., University of Maryland, Assistant Professor (phonology, language change, Romance languages)

Ellen McCracken, Ph.D., UC San Diego, Professor (comparative literature, Latin American literature and U.S. Latino literature, literary theory)

Elide Valarini Oliver, Ph.D., University of São Paulo, Associate Professor (Brazilian narrative and poetry, comparative literature, Portuguese literature, literary theory)

Giorgio Perissinotto, Ph.D., Columbia University, Professor (Hispanic linguistics, medieval literature, cultural history of the Hispanic world)

Sara Poot-Herrera, Ph.D., El Colegio de Mexico, Professor (Mexican and Spanish-American literature, literary theory)

Eduardo P. Raposo, Doutoramento, University of Lisbon, Professor (Spanish and Portuguese linguistics, comparative Romance grammar, syntax and semantics, generative grammar)

Harvey L. Sharrer, Ph.D., UC Los Angeles, Douror *honoris causa*, Universidade Nova de Lisboa, Professor (medieval Spanish and Portuguese literatures, Catalan language and culture, comparative medieval literature)

Myriam Smith, Ph.D., UC Santa Barbara, Lecturer

Emeriti Faculty

Carlos H. Albarracín-Sarmiento, P.L., University of La Plata, Professor Emeritus

Juan Bautista Avalu-Arce, Ph.D., Harvard University; D. Litt., University of Castilla-La Mancha, Professor Emeritus

Carlos García Barrón, Ph.D., UC Los Angeles, Professor Emeritus

David Bary, Ph.D., UC Berkeley, Professor Emeritus

Marta Gallo, P.L., University of Buenos Aires, Professor Emerita

Mireya Jaimes-Freyre, Ph.D., Columbia University, Professor Emerita

Víctor F. Fuentes, Ph.D., New York University, Professor Emeritus

Nélida López, B.A., Instituto Superior del Profesorado, Buenos Aires, Lecturer Emerita

Enrique Martínez-López, Ph.D., University of Madrid, Professor Emeritus

Allen W. Phillips, Ph.D., University of Michigan, Professor Emeritus

Frederick G. Williams, Ph.D. University of Wisconsin, Professor Emeritus

The Department of Spanish and Portuguese offers undergraduates an opportunity to master the four fundamental linguistic skills—speaking, understanding, reading, and writing—in Spanish and Portuguese and to study the literary, cultural, and linguistic heritages of the Spanish- and Portuguese-speaking peoples in the Iberian Peninsula and the Americas. The department offers the B.A. degree in Spanish and in Portuguese; the M.A. degree with specialties in Hispanic language and culture, Spanish and Spanish-American literature, Hispanic linguistics, and Hispanic, Portuguese, and Brazilian literatures; and the Ph.D. degree in Hispanic languages and literatures.

Students interested in a Spanish or Portuguese major or minor may meet with department advisors at the beginning of each quarter. Qualified staff in the department office are available on a regular basis to advise on academic matters.

Qualified students majoring in Spanish or

Portuguese may spend a semester or year at the university's Education Abroad center at one of the following locations: Madrid, Alcalá de Henares, Barcelona, Córdoba, Granada, Mexico City, San José, Santiago de Chile, Concepción, Rio de Janeiro, or Bahia.

Students who complete the major in Spanish or Portuguese may enter a variety of careers and graduate programs including education, government service, law, international trade and finance, travel, communications, and publishing. It is important to keep in mind that many of these professional careers require training beyond the undergraduate level, and students with such interests should discuss their plans with an advisor as early as possible.

Students with a bachelor's degree in Spanish or Portuguese who are interested in pursuing a California Teaching Credential should contact the credential advisor in the Graduate School of Education as soon as possible. Successful completion of an advanced degree in Spanish is required for issuance of the Community College Instructor's Credential. Students interested in the related professional preparation program should contact the credential advisor prior to the fall quarter of the year in which the advanced degree will be completed.

The Department of Spanish and Portuguese at UCSB is one of the first in the United States to include in its curriculum all five of the languages and literatures of the Iberian peninsula (Spanish, Portuguese, Basque, Catalan, and Galician). The curriculum also covers the whole spectrum of Hispanic literary traditions, from the Middle Ages to U.S. Chicano and Latino literature.

Center for Portuguese Studies. The Center for Portuguese Studies provides support for teaching and degree programs and promotes the study of the literatures, language, and cultures of the Portuguese-speaking world. Services and activities include awarding student scholarships and stipends; hosting colloquia; maintaining the center library; and sponsoring a publications series, as well as a scholarly journal, "Santa Barbara Portuguese Studies." The Center is made possible by an endowment from the Calouste Gulbenkian Foundation in Portugal.

Portuguese Lectureship. The Portuguese government, through the Instituto Camões, established the first Portuguese Lectureship in the United States at UCSB in 1973. It provides a visiting lecturer annually.

Basque Studies. The department has a Basque Studies program, supported by the establishment in 1993 of an endowed chair from the Autonomous Basque Government of Spain. The José Miguel de Barandiarán Chair of Basque Studies promotes the study of Basque language and culture.

Catalan Studies. The Institute Roman Lluïl provides a lectureship to support the study of Catalan language and culture.

Galician Studies. The Xunta de Galicia provides funding in support of the establishment of a Center for Galician Studies and a visiting lecturer.

Tinta, Scholarly Journal. The graduate student publication gives students the opportunity to gain valuable experience by editing and publishing their own scholarly work.

Samuel A. Wofsy and Robert E. Wilson Awards. Each year the department awards two Wofsy Fellowships to outstanding graduate students at the M.A. and Ph.D. levels. The department also awards two Wilson Scholarships to outstanding junior and senior students.

Senior Honors Program in Spanish or Portuguese

Qualified seniors will be invited to participate in an honors program, designed to allow them to pursue independent research on a topic of particular interest to them. Requirements for admission to the program include 105 units of course credits, completion of a minimum of 30 upper-division units in the major, minimum overall grade-point average of 3.0, and a grade-point average of 3.5 or better in the major. Honors graduates will be identified each year at the head of the graduation list in Spanish or Portuguese and will be designated on university records and diplomas with the legend Distinction in the Major, as well as recognized at the annual department awards ceremony.

Undergraduate Program

Bachelor of Arts—Spanish

Preparation for the major. Spanish 1, 2, 3, 4, 5, and 6 or equivalent; and Spanish 16A or 16B or 25. Spanish majors are required to earn a C or better in 16A or 16B or 25. Students who possess proficiency in the language should not take courses lower than Spanish 6. Students who receive a grade lower than C in any of the sequence Spanish 1-3 are urged to repeat the course (for no credit if necessary) or provide themselves with a tutor before proceeding to the next course in the sequence.

All upper-division and graduate courses are given in Spanish unless otherwise noted. Spanish 16A or 16B or 25, or its equivalent, is a prerequisite to all upper-division courses in which the language of instruction is Spanish. Spanish 100 (or the equivalent) is a prerequisite to all Spanish linguistics courses. Spanish 102L is a prerequisite to all Hispanic literature courses.

Upper-division major. Forty-four upper-division units are required, of which 4 must be in Spanish 100, 4 in Spanish 102L, 12 in Spanish 110A-B-C-D, and 8 in Spanish 111A-B-C, or their equivalents as approved by a departmental advisor or the department chair. By petition and upon consultation with the faculty undergraduate advisor, 8 of the remaining 16 units may be selected from Luso-Brazilian literature, or a comparative literature course in which peninsular or Latin-American literature is studied. Additionally, one course of the 8 units may be taken in Chicano/U.S. Latino literature originally written in English (e.g. Spanish 139, Spanish 179) as an upper-division elective, without petition. Spanish 119A-B and/or Spanish 177 are recommended. By petition, a course taught in English translation may be accepted toward the unit requirement with the stipulation that all work be in the Spanish language.

Minor—Spanish

All courses to be applied to the minor must be completed on a letter-grade basis. This includes both courses offered in Spanish and those of-

ferred by other departments and applied to the minor.

Preparation for the minor. Spanish 1, 2, 3, 4, 5, and 6 or equivalent; and Spanish 16A or 16B or 25 (prerequisite to all upper-division courses).

Upper-division minor. Twenty-four upper-division units, distributed as follows: Spanish 100 (prerequisite to all Spanish linguistics courses), Spanish 102L (prerequisite to all Hispanic literature courses), one course from Spanish 110A-B-C-D, one course from Spanish 111A-B-C, 8 units of upper-division Spanish electives (may include up to 4 units of the following: a Luso-Brazilian literature course, Portuguese 128, Spanish 126, 127, 174 [film course], or a comparative literature course in which peninsular or Latin-American literature is studied. A maximum of 4 units may be taken from courses taught in English.)

Note: Substitutions and waivers are subject to approval by the chair of the department. Please see page 118 for special conditions governing minors in the College of Letters and Science.

Bachelor of Arts—Portuguese

Preparation for the major. Portuguese 1, 2, 3, 4, 5, and 6, or equivalent. Portuguese 8A-B-C is strongly recommended. Students who wish to make Portuguese their major subject must have maintained at least an average grade of C in lower-division Portuguese courses. Transfer students may be tested by examination.

Upper-division major. Forty upper-division units are required, including 102A-B, 105A-B-C, and 106A-B-C. The remaining units must be divided among other courses in the 100 series (excluding Portuguese 195). Portuguese 114, 115, 120, 125A-B, and 128AA-ZZ may be accepted toward the unit requirement with the stipulation that readings be in the Portuguese language. Two courses from History 153, 155A-B, 155E-F, 157A-B-C, or Portuguese 125A-B are recommended.

Students may, by petition, substitute 4 upper-division units in Spanish literature, linguistics, or culture courses; film courses (Spanish 126, 127, 174); comparative literature courses in which Hispanic, Portuguese, or Brazilian literature is studied; or Portuguese and Brazilian history courses.

Minor—Portuguese

All courses to be applied to the minor must be completed on a letter-grade basis. This includes both courses offered in Portuguese and those offered by other departments and applied to the minor.

Preparation for the minor. Portuguese 1, 2, 3, 4, 5, and 6 or equivalent (see department).

Upper-division minor. Twenty upper-division units, distributed as follows: Portuguese 102A or 102B, one course from Portuguese 105A-B-C, one course from Portuguese 106A-B-C, 8 units of upper-division Portuguese electives. Four units may be taken from courses taught in English. For additional courses taught in English, all work must be completed in Portuguese and approved by the department in order to receive credit towards the Portuguese minor.

Note: Substitutions and waivers are subject to approval by the chair of the department. Please see page 118 for special conditions governing minors in the College of Letters and Science.

Graduate Program

In addition to departmental requirements for admission, applicants must also meet the university requirements for admission described in the chapter "Graduate Education at UCSB," including the mandatory Graduate Record Examination (GRE).

Master of Arts—Spanish Admission

The department requires a bachelor's degree in Spanish or its equivalent. Candidates who are deficient in preparation will be required to take the necessary undergraduate courses to make up deficiencies before beginning work in the M.A. program. At the end of the first year of study candidates' work will be evaluated. Those who are not making satisfactory progress toward the degree may be advised to drop out of the program.

Degree Requirements

Candidates for the M.A. in Spanish will follow one of the three programs described below. The degree for the following programs is awarded by taking a comprehensive examination (described under each program), with the exception of Program 3 for the M.A. in Spanish, which follows a different procedure, also described under that program. These programs are normally completed within two years.

Program 1: Language and Culture. This program is designed primarily for students who wish to pursue advanced studies, but do not plan to go on to the Ph.D. It emphasizes an interdisciplinary approach. Each student will have an individual course program, designed in consultation with the program director, approved by the graduate committee, and determined in part by the nature of the student's study topic in Spanish 596. The nature of the program requires proficiency in written and oral standard Spanish.

A minimum of 12 courses is required, at least six of which must be in the graduate series. With prior approval, up to three upper-division or graduate courses from pertinent courses in Portuguese or in other departments may be included. The six graduate courses will include a sequence of two tutorials (Spanish 596) in which the student carries out a study project in Spanish. Results of the project take the form of a written paper and an oral presentation. In addition, each candidate will take a two-hour oral examination, given by a departmental committee, on the study project and on a reading list of essential works of Spanish and Spanish-American literature.

Program 2: Literature. This program is designed primarily for students who plan to pursue a Ph.D. in the field of Spanish and Spanish-American literature. The student must complete a minimum of twelve graduate and upper-division courses, at least nine of which must be in the graduate series. Spanish 121 or 122A-B are required if they have not been

taken previously for the B.A. Spanish 212 and at least one two-quarter research seminar in literature (294A-B or 295A-B) are required. Up to two upper-division or graduate courses in Luso-Brazilian literature may count toward the degree. A reading knowledge of a pertinent language other than Spanish is required and tested. Portuguese is acceptable.

The student will prepare an academic program in consultation with the program director, who will provide guidance until the student is prepared to take the comprehensive examinations. The comprehensive examinations consist of six hours of written work based on a departmental reading list and an oral examination of approximately one hour. In order to be accepted to the doctoral program, the student must pass the comprehensive examinations and receive the approval of the graduate committee.

Program 3: Hispanic Linguistics. This program is designed primarily for students who plan to go on to a Ph.D. in Hispanic linguistics. The program provides the student with knowledge and research skills in synchronic and diachronic linguistics, contrastive, sociolinguistic, geographical, and historical approaches. Completion of Spanish 100 (or equivalent) is a prerequisite for entrance into Program 3.

Each student will have an individual course program, designed in consultation with the program director and approved by the graduate committee. Candidates are expected to complete a minimum of ten graduate and upper-division courses, at least six of which must be in the graduate series, including Spanish 212 and at least one two-quarter research seminar in Hispanic linguistics (296A-B). At least six of the ten courses must be taken within the department, including no fewer than two upper-division or graduate courses in one area of Hispanic literature.

The candidate, in consultation with a faculty advisor, will pursue an individual study of a specific topic and will present the results in the form of a short thesis. In lieu of the thesis, the candidate can submit two research papers of average length (5,000-7,000 words each) and covering two different areas of linguistics. In each case, the student will take an oral exam, centered on those aspects covered in the thesis or in the papers, but the candidate should be prepared to respond to questions of general linguistic knowledge, especially in the areas of current linguistic theory and mainstream linguistics that concern the department. A reading knowledge of a pertinent foreign language other than Spanish is required and tested. Portuguese is acceptable.

Master of Arts—Portuguese

Admission

The department requires a bachelor's degree in Portuguese or its equivalent. Students admitted to the program who are deficient in preparation will be required to take the necessary undergraduate work to make up deficiencies before beginning work in the M.A. program. At the end of the first year of study, students' work will be evaluated and those who are not making satisfactory progress toward the degree may be advised to drop out of the program.

Degree Requirements

The M.A. degree in Portuguese is designed for students who plan to earn a Ph.D. in the field of Portuguese and Brazilian language and literature, and it is normally completed within two years.

The student must complete a minimum of twelve graduate and upper-division courses, at least nine of which must be in the graduate series. Spanish 121, Spanish 212 and at least one two-quarter graduate research seminar in Portuguese or Brazilian literature (294A-B or 295A-B) are required. Up to two upper-division or graduate courses in Spanish or Spanish-American literature may count toward the degree. A reading knowledge of a pertinent language other than Portuguese is required and tested. Spanish is acceptable.

Each student will have an individual course program designed in consultation with the program director, who will provide guidance until the student is prepared to take the comprehensive examinations. The comprehensive examinations consist of six hours of written examinations based on a departmental reading list and an oral examination of approximately one hour.

In order to be accepted to the doctoral program, the student must pass the comprehensive examinations and receive the approval of the graduate committee.

Master of Arts— Spanish and Portuguese

Admission

Applicants wishing to combine graduate work in Hispanic and Luso-Brazilian literatures should have completed an undergraduate major in either Spanish or Portuguese, or the equivalent. Applicants who are deficient in preparation will take the necessary undergraduate work to make up deficiencies before beginning work in the M.A. program. At the end of the first year of study, students' work will be evaluated and those who are not making satisfactory progress toward the degree may be advised to drop out of the program.

Degree Requirements

The M.A. degree in Spanish and Portuguese is designed primarily for students who wish to acquire a broad background in Hispanic and Luso-Brazilian studies, including those who contemplate subsequent work toward the Ph.D.

A minimum of twelve courses is required, at least eight of which must be in the graduate series, including Spanish 212, one two-quarter research seminar and Spanish 121. A reading knowledge of a pertinent foreign language is required.

Each student will have an individual course program designed in consultation with the program director and approved by the graduate committee. Its structure will be determined in large part by the student's interests and goals. However, all students are expected to acquire knowledge of the principal works of Hispanic, Portuguese, and Brazilian literatures. The comprehensive examination is based in part on a departmental reading list of important texts; it consists of two written tests, each followed by a one-hour oral examination.

In order to be accepted to the doctoral program, the student must pass the comprehensive examination and receive the approval of the graduate committee.

Doctor of Philosophy—Hispanic Languages and Literatures

The Department of Spanish and Portuguese offers the Ph.D. degree in Hispanic languages and literatures in three areas: Spanish and Spanish-American literature, Luso-Brazilian literature, and Hispanic linguistics.

Admission

Applicants will normally have followed a course of study leading to the M.A. degree in Spanish under Programs 2 or 3, the M.A. in Portuguese, or the M.A. in Spanish and Portuguese (see above).

During the first quarter of residence, the graduate committee will specify, in the case of students who took the M.A. or equivalent on another campus, exactly which areas from our own M.A. program the student has not covered adequately. These deficiencies must be made up by taking courses specified by the graduate committee.

No later than the eighth week of the fourth quarter of residence, the student will present to the graduate committee a proposal for a program of studies which may lead to a subsequent proposal for a Ph.D. dissertation. This preliminary proposal will outline courses, readings, and methods of research aimed at a broad historical period in the field, a restricted genre, or an author or authors. Students in linguistics will outline a topic with a synchronic or diachronic approach, specific level of analysis, a corpus pertinent to the intended object of research, and a suitable method of research. Specific courses and topics set forth in the proposal will be in addition to the required courses cited below, although some overlapping is possible. A more detailed guide to this first step is available from the graduate program assistant of the department and from the departmental graduate student handbook.

Within two weeks after submission of the proposal but no later than the ninth week of the quarter, every doctoral candidate will take a Ph.D. oral candidacy examination conducted by the graduate committee, in which the student will make a brief commentary on a text, followed by a period of questions, to permit an evaluation of the student's potential. The Ph.D. candidacy examination may be repeated once upon the recommendation of the graduate committee. The doctoral committee will be formed after the oral Ph.D. candidacy examination, according to the procedures detailed in the departmental graduate student's handbook.

Degree Requirements

In addition to courses specified in the program proposal, all students will complete two two-quarter research seminars. Ph.D. students in literature will take Spanish 212, Spanish 213, Spanish 121, if not taken previously, and, if the emphasis is on Spanish or Spanish-American literature, two graduate courses in Luso-Brazilian literature which may include courses in the Portuguese 205 and 206 series. If the emphasis is Luso-Brazilian literature, the student will take

two graduate courses in Spanish or Spanish-American literature. Ph.D. students in linguistics will complete Spanish 212; Spanish 221A-B; four graduate courses in linguistics; and one graduate course in literature.

Before being admitted to candidacy, the student must demonstrate a good reading knowledge of at least one foreign language besides Spanish and Portuguese, subject to approval by the graduate committee as germane to the student's program proposal. A general command of Spanish or Portuguese will be assumed.

When the requirements are completed and work in the program of studies is sufficiently advanced, the student will submit to the doctoral committee a detailed written proposal for a Ph.D. dissertation. Within two weeks, the student will defend the proposal before the doctoral committee in a dissertation progress examination.

In order to ensure a timely completion of doctoral work, the student is urged to take the dissertation progress examination by the ninth quarter of his/her doctoral program. Note: No dissertation progress examination will be given after the eighth week of the quarter. Any pending language requirement should be completed no later than one month prior to the dissertation progress examination.

Examination Parts and Format. The examination will consist of written and oral parts:

•**Written**

(1) a substantial, detailed written abstract of the full dissertation; (2) the draft of two of the chapters that will comprise the final dissertation; and (3) an extensive and relevant bibliography of approximately six to eight pages. These will be presented to the doctoral committee at least two weeks prior to the oral examination.

•**Oral**

An oral defense of this material of approximately one to one and half hours duration.

The doctoral committee will expect the candidate to demonstrate in both the written and oral parts of the examination a clear awareness of the general goals and originality of the dissertation and a thorough knowledge of the present state of scholarship dealing with the chosen topic.

In case the doctoral committee by majority vote finds the written and/or oral part of the dissertation progress examination unsatisfactory, the student may present a modified version of the written work once and be reexamined. The repeated oral examination must take place during the quarter immediately following that in which the examination was first given.

Completion of the Degree. After passing the dissertation progress examination, the student will continue working towards completion of the dissertation in consultation with, and under the guidance of, the dissertation committee chair, and also seeking the input of the other committee members. When the first draft is completed, it will be submitted to the dissertation committee for feedback and corrections. When the corrections and revisions have been made, a final version will be submitted to the committee. After the dissertation committee has approved the dissertation and signed the signature page, the student will file the disserta-

tion according to university guidelines. The final version must meet the filing and formatting requirements spelled out in the *UCSB Guide to Filing Theses and Dissertations* available at the Graduate Division Web site: www.graddiv.ucsb.edu/pubs/filingguide.shtml.

Optional Ph.D. Emphasis in European Medieval Studies

The Medieval Studies Program offers an interdisciplinary doctoral emphasis to students previously admitted to a Ph.D. program in the Departments of Theater and Dance, English, French and Italian, History, History of Art and Architecture, Music, Religious Studies, and Spanish and Portuguese. Students pursuing the emphasis in European medieval studies must receive a grade of B or better in each of the following: Medieval Latin (Latin 103); one course in a vernacular, western European or Middle Eastern medieval language (English 205, English 230, French 206, Spanish 222A, Spanish 222B, Portuguese 222, Religious Studies 148A, Religious Studies 148 B, Religious Studies 210); Paleography and/or Diplomatics (History 215S, History 215T); Medieval Studies 200A-B-C; and 8 additional units in graduate courses on medieval topics. Students may petition to have appropriate courses from other institutions, or independent study, substituted for these requirements. Medieval Studies 200A-B-C is the program's colloquium series; graduate students in the emphasis attend the series and write brief papers on each colloquium (one per term), to be reviewed by the chair of the program (2 units). To qualify for the emphasis, at least one member of a Ph.D. candidate's dissertation committee must be an affiliated faculty member of the European Medieval Studies Program. Contact the European Medieval Studies Program for additional information on faculty interests, course offerings, and program requirements, or visit our Web site at www.medievalstudies.ucsb.edu.

Optional Ph.D. Emphasis in Applied Linguistics

The field of Applied Linguistics is a growing and vibrant one in universities nationally and internationally. Applied Linguistics is an interdisciplinary field of research and instruction that provides theoretical and descriptive foundations for the empirical investigation and solution of language-related issues, especially those of language education (first-language, second-language, foreign-language and heritage-language teaching and learning) and also issues of bilingualism and biliteracy, language planning and policy, language assessment, translation and interpretation, lexicography, rhetoric and composition.

Students pursuing a Ph.D. in the Departments of Education, French and Italian, Germanic, Slavic & Semitic Studies, Linguistics, and Spanish and Portuguese may petition to add an emphasis in applied linguistics. The interdisciplinary program in applied linguistics involves over 35 faculty members in 12 departments on campus.

Students who petition to add the empha-

sis must fulfill the following requirements in addition to the requirements for the Ph.D. in their home department: (1) a minimum of two courses taken from the core group of applied linguistics courses, which provide them with the basics of linguistics, second language acquisition theories, second/foreign language teaching methodologies, and practical applications of theory to teaching (Second Language Acquisition Theory and Research; Second Language Teaching Methodology; Foreign/Second Language Teaching Practicum; Topics in Applied Linguistics); (2) a minimum of two courses in one of five sub-areas (Linguistics, Discourse, Second Language Acquisition; Language and Society, Socio-cultural Perspectives, Multilingualism and Multiliteracy; Language, Literacy and Composition Studies; Language and Cognition, Psycholinguistics; Language Acquisition Using Technology); (3) Required independent study (4 units): Taken with an appropriate faculty member, leading to a research paper describing theoretical, empirical, or applied work in applied linguistics.

In addition to the course and unit requirements described above (including the research paper), the student's Ph.D. Qualifying Examination (or a separate exam) shall include examination of knowledge within the Applied Linguistics emphasis. At least one faculty member of the Applied Linguistics program shall participate in the qualifying (or separate) examination.

Additional information may be found at: www.appliedlinguistics.ucsb.edu. Questions may be directed either to a participating faculty member or to Applied Linguistics, c/o Department of Germanic, Slavic & Semitic Studies, UCSB, Santa Barbara, CA 93106-4130.

Optional Ph.D. Emphasis in Women's Studies

The Women's Studies Program, with almost fifty core and affiliated faculty members in over nineteen disciplines, serves as a model of interdisciplinary work and scholarly collaboration at UCSB. Women's Studies doctoral emphasis students are required to complete successfully four seminars that will enhance their understanding of feminist pedagogy, feminist theory, and topics relevant to the study of women, gender and/or sexuality. Women's Studies as an inter-departmental set of conversations and intellectual questions supports a multifaceted undergraduate curriculum at UCSB. Graduate emphasis students are encouraged to apply to teach Women's Studies courses as teaching assistants and associates as part of their Women's Studies training.

Applicants must first be admitted to, or currently enrolled in, a UCSB Ph.D. program participating in the Women's Studies graduate emphasis: Anthropology; Comparative Literature; Counseling, Clinical, and School Psychology; English; French and Italian; Germanic, Slavic and Semitic Studies; History; History of Art and Architecture; Political Science; Religious Studies; Sociology; Spanish and Portuguese; or Theater and Dance. Candidates complete four graduate courses and select a member of the Women's Studies faculty or affiliated faculty to serve on their dissertation committees.

Applications to the Women's Studies Doctoral Emphasis may be submitted at any stage of Ph.D. work, and applications will be considered throughout the year.

The Graduate Curriculum

Students pursuing the emphasis in Women's Studies will successfully complete four graduate courses. Only one may be taken in the student's home department.

- 1. Issues in Feminist Epistemology and Pedagogy (Women's Studies 270).** A one-quarter seminar that considers Women's Studies as a distinct field. It offers an interdisciplinary exploration of feminist theories of knowledge production and teaching practices. Readings cover past and present critical debates and provide theoretical approaches through which to analyze interdisciplinary epistemological and pedagogical issues.
- 2. Special Topics in Women's Studies (594 AA-ZZ).** A one-quarter seminar offered by a Women's Studies faculty member on topics of central concern to the field of Women's Studies.
Or,
Research Practicum (Women's Studies 280). A cross-disciplinary seminar in which fundamental questions in contemporary feminist research practice are considered in light of students' own graduate projects. Students may fulfill the Area 2 requirement by taking either a Special Topics Seminar or the Research Practicum.
- 3. Feminist Theories.** A one-quarter graduate seminar in feminist theory offered by any department, including Women's Studies.
- 4. Topical Seminar.** A one-quarter graduate seminar, outside the student's home department, that addresses topics relevant to the study of women, gender, and/or sexuality.

Summer Institute of Hispanic Languages and Culture

A three-summer intensive program leading to the M.A. degree in Spanish is designed primarily for secondary school teachers of Spanish. Residence at the institute and observance of a "no-English" rule are required.

In addition to the Summer Institute requirements for admission, applicants must also meet the university requirements for admission described in the chapter "Graduate Education at UCSB," including the mandatory Graduate Record Examination (GRE).

In addition to the Summer Institute requirements for the M.A. in Spanish, degree candidates must fulfill the university degree requirements described in the chapter "Graduate Education at UCSB."

Prerequisites. The applicant must have an undergraduate major in Spanish or its equivalent and must demonstrate proficiency in speaking and writing Spanish.

Coursework. The M.A. requires 40 units or ten courses across five areas including language, linguistics, culture, literature, and interdisciplinary studies. Since it is not a research-oriented degree, the Summer Institute M.A. will not completely fulfill requirements for entry into the Ph.D. program at UCSB.

Recommended preliminary readings. Students can do the reading for many courses during the winter; lists appear in the winter bulletin, published in the fall and available upon request.

For additional information and application forms, write to the Summer Sessions Office, University of California, Santa Barbara, CA 93106.

Spanish Courses

LOWER DIVISION

It is highly recommended that students who have studied Spanish previously take the placement examination administered by the department to determine proper placement in the department's language program. Students will be placed in the Spanish 1-5 sequence depending upon examination scores. Any two courses in the series Spanish 1 through 6 must be taken in sequence and not simultaneously. Also, students may not enroll in a lower level Spanish course than was previously taken in the Spanish 1-6 series.

1. Elementary Spanish

(4) STAFF

Beginning Spanish establishing fundamental auditory and oral skills, with secondary practice in reading and writing; pronunciation, intensive oral practice in short natural dialogs and drills; present tense (regular, stem-changing, and irregular verbs); "ser" and "estar;" object pronouns. Includes laboratory work.

15S. Intensive Elementary Spanish

(4) STAFF

Beginning course in Spanish establishing auditory and oral skills, with secondary practice in reading and writing Spanish. Pronunciation, intensive oral practice, dialogs, drills. (SS)

2. Elementary Spanish

(4) STAFF

Recommended preparation: Spanish 1 or equivalent.
Continues activities commenced with Spanish 1.

25S. Intensive Elementary Spanish

(4) STAFF

Recommended preparation: Spanish 15S.
Continues activities of Spanish 15S with increased communication and reading skills. Major grammatical structures studied include commands, complex sentences, subjunctive versus indicative, present and imperfect subjunctive, preterite and imperfect, reflexive. Introduction to reading skills. (SS)

3. Elementary Spanish

(4) STAFF

Recommended preparation: Spanish 2 or equivalent.
Completes the basic study of the elements of the language.

35S. Intensive Elementary Spanish

(4) STAFF

Recommended preparation: Spanish 25S.
Completes the basic study of the elements of the language. Taught during Summer Session.

4. Intermediate Spanish

(4) STAFF

Recommended preparation: Spanish 3 or equivalent.
Begins review of basic grammar and syntax.

45S. Intensive Intermediate Spanish

(4) STAFF

Recommended preparation: Spanish 3 or equivalent.
Begins review of basic grammar and syntax, designed to develop the four fundamental skills: understanding, speaking, reading, writing. Course conducted in Spanish with emphasis on vocabulary building and use of Spanish in practical situations. Refinement of reading skills. (SS)

5. Intermediate Spanish

(4) STAFF

Recommended preparation: Spanish 5 or equivalent.
Continues the review of basic grammar and syntax.

Course conducted in Spanish.

55S. Intensive Intermediate Spanish

(4) STAFF

Recommended preparation: Spanish 4, 45S, or equivalent.
Continues the review of basic grammar and syntax begun in Spanish 4, developing the fundamental skills. More vocabulary and practical situations. A play and other supplementary materials are read for discussion and for increasing vocabulary. (SS)

6. Intermediate Spanish

(4) STAFF

Recommended preparation: Spanish 5 or equivalent.
An intensive course designed to develop students' skills in reading, oral, and written expression by reading and discussing Hispanic texts and writing compositions on related topics.

65S. Intensive Intermediate Spanish

(4) STAFF

Recommended preparation: Spanish 5, 55S, or equivalent.
An intensive course designed to develop students' skills in reading as well as oral and written expression by reading and discussing Hispanic texts and writing compositions on related topics.

8A-B. Spanish Conversation

(2-2) STAFF

Prerequisites: Spanish 5 or 55S, or an Advanced Placement Score ≥ 3 , or Spanish Placement exam = 6.
Conversational practice through which students learn idioms, conversational courtesies of the language, etc., and improve facility in speaking and understanding the spoken language.

16A-B. Spanish for Heritage Speakers

(4-4) STAFF

Recommended preparation: strong speaking ability in Spanish to be confirmed by personal interview.
Addresses on university level the needs and strengths of students with Spanish speaking backgrounds but no formal language training in Spanish speaking countries. Emphasizes skill in composition, advanced reading comprehension, standard versus vernacular usages, cross language interference, etc.

25. Advanced Grammar and Composition

(4) STAFF

Recommended preparation: Spanish 6 or 65S, or an AP score greater than or equal to 4, or a Spanish placement exam equal to 6.
Intensive course taught in Spanish designed to reinforce students' comprehension and ability to express themselves in Spanish, both orally and in writing, and to develop the students' vocabulary and awareness of syntactical structures in the language.

UPPER DIVISION

Literature courses taught in English translation or courses taught in English will generally not count towards fulfilling Spanish major requirements. See "Upper-division major" section for exceptions.

100. Introduction to Hispanic Linguistics

(4) MIGLIO, PERISSINOTTO, RAPOSO

Prerequisite: Spanish 16A or 16B or 25 (may be taken concurrently).

Prerequisite to all other upper-division courses in Hispanic linguistics.

Introduction to linguistic theories, methods, and problems as applied to Spanish. Taught in Spanish with Spanish examples.

101. American Spanish

(4) PERISSINOTTO

Prerequisite: Spanish 100.

Geographical, social, and stylistic distribution of phonemic, morphosyntactic, and lexical features in Spanish as spoken in Latin America.

102A-B. Advanced Grammar and Composition

(4-4) STAFF

Prerequisite: Spanish 6.
Required for teaching credential candidates with major in Spanish.

The study of the finer points of Spanish grammar

and syntax. Stress is placed on written practice of the language.

102L. Introduction to Hispanic Literary Studies

(4) STAFF

Prerequisite: Spanish 16A or 16B or 25 or equivalent language proficiency.

Analysis and interpretation of literary texts. Conceptual tools of traditional and contemporary currents of literary criticism will be applied to a wide selection of texts that shall encompass all established literary genres.

103. Spanish Pronunciation

(4) PERISSINOTTO, MIGLIO

Prerequisite: Spanish 100.

Required for teaching credential candidates. Intensive patterned pronunciation drills and exercises in sound discrimination aimed at familiarizing the student with the mechanics of speech production.

109. Spanish in the United States: The Language and Its Speakers

(4) PERISSINOTTO

Prerequisite: upper-division standing.

Study of Spanish used in the United States by native and immigrant groups: Mexicans, Chicanos, Cubans, Puerto Ricans and others in Spanish-speaking enclaves. Focus on language and social and cultural manifestations arising in contact between linguistically different groups. Taught in English.

110A-B-C-D. Spanish Literature from the Beginnings to the Present

(4-4-4-4) STAFF

Prerequisite: Spanish 102L (may be taken concurrently).

- A. Medieval Spanish literature.
- B. Golden Age literature.
- C. Eighteenth- and nineteenth-century Spanish literature.
- D. Twentieth-century Spanish literature.

111A-B-C. Spanish-American Literature from the Beginning to the Present

(4-4-4) STAFF

Prerequisite: Spanish 102L (may be taken concurrently).

- A. Colonial Spanish-American literature.
- B. Nineteenth-century Spanish-American literature.
- C. Twentieth-century Spanish-American literature.

112A. Non-Castilian Literatures of Spain

(4) STAFF

Prerequisite: consent of instructor.

Introduction to Spain's medieval linguistic and cultural diversity through literary works written in such languages as Latin, Arabic, Hebrew, Mozarabic, Occitan, Catalan-Valencian, Galician-Portuguese and Galician. Texts read in Spanish or English translation.

112B. Non-Castilian Literatures of Spain

(4) STAFF

Introduction to Spain's linguistic and cultural diversity in modern and contemporary times through literary works written in Asturian, Basque, Catalan and Galician. Texts read in Spanish translation.

113. An Introduction to Linguistic Variation in Modern Spanish

(4) STAFF

Prerequisite: Spanish 100.

After a presentation of traditional and contemporary approaches to dialect variation, the course compares a set of different Spanish dialects from Spain and America in order to observe both common trends and diversity factors. The interrelations between regional dialects and other kinds of linguistic varieties are studied, especially social dialects and dialects in contact with other languages.

114A-B-C. The Spanish Language: A Linguistic Approach

(4-4-4) MIGLIO, PERISSINOTTO, RAPOSO

Prerequisite: Spanish 100.

Study of the systematic aspects of language structure which make communication possible. Each quarter deals with a different aspect of the Spanish system, as follows:

- A. Phonetics and phonemics

- B. Morphology and syntax
- C. Semantics

115B. Masterpieces of Spanish Literature (in English Translation)

(4) BERMÚDEZ

Prerequisite: upper-division standing.

Readings in English translation and discussion of representative works from the Middle Ages to the end of the sixteenth century, and from the seventeenth century to the end of the twentieth.

116. Juan Ruiz: the Book of Good Love (in English Translation)

(4) STAFF

Prerequisite: upper-division standing.

Reading and interpretation of the fourteenth-century Spanish masterpiece in English translation. A study of *The Book of Good Love* in the context of other great works of the period, such as *The Decameron* and *The Canterbury Tales*.

119A. Spanish Institutions and Culture

(4) CHECA

Prerequisite: Spanish 16A or 16B or 25 (may be taken concurrently).

Study of the development of the Spanish nation, with special focus on key social and political institutions, the arts, and major currents of thought.

120A-B. Contemporary Spanish-American Fiction in English Translation

(4-4) LEVINE, MCCRACKEN

A. Reading and discussion of novels and short stories by Borges, Carpentier, Cortázar, García Márquez, Vargas Llosa, and others.

B. Reading and discussion of representative works of contemporary Mexican authors, including Yañez, Rulfo, Fuentes, and others.

121. Language and History in the Hispanic World

(4) STAFF

Prerequisite: Spanish 100.

The different languages spoken in the Hispanic world: their origins, development, convergence, divergence, and diffusion in relation to historical processes.

122A-B. Medieval Spanish Literature

(4-4) SHARRER, CORTIJO

Prerequisite: Spanish 102L (may be taken concurrently).

Equivalent to Spanish 110A.

A detailed survey of the main trends in Spanish literature to 1500.

123A. Hispanic Balladry

(4) SHARRER, CORTIJO

Prerequisite: Spanish 102L (may be taken concurrently).

Spanish 123A equivalent to Spanish 110B.

History of the Spanish ballad; Hispanic balladry in Spanish America, the United States, and among the Sephardic Jews.

125. Introduction to Romance Linguistics

(4) MIGLIO, RAPOSO, PERISSINOTTO

Prerequisite: upper-division standing.

Same course as Linguistics 175. Taught in English.

Illustrates principles of comparative-historical linguistic analysis by examining Romance languages (French, Portuguese, etc.) for similarities and differences, and tracing their evolution from Vulgar Latin.

128. Creative Writing

(4) STAFF

Prerequisite: Spanish 16A or 16B or 25 (may be taken concurrently).

Designed primarily for students who are inclined to write fictional prose and/or poetry in Spanish.

130. The Fantastic and Its Development in Spanish-American Short Story

(4) CASTILLO, LEVINE, POOT-HERRERA

Prerequisite: Spanish 102L with a minimum grade of C.

Exploration of the multiple manifestations of the fantastic in Spanish American short story from its origin, linked to nineteenth-century sensationalistic journalism, up to neofantastic mode appearing circa 1950, with its more epistemological goals.

131. Spanish Golden Age Poetry I

(4) CHECA

Prerequisite: Spanish 102L (may be taken concurrently).

Equivalent to Spanish 110B.

Lyric poetry of the sixteenth century: Garcilaso, Luis de León, San Juan de la Cruz, and others.

132. Spanish Golden Age Poetry II

(4) CHECA

Prerequisite: Spanish 102L (may be taken concurrently).

Equivalent to Spanish 110B.

Spanish lyric poetry of the seventeenth century. Major trends and authors. Close readings of Lope de Vega, Gongora, Quevedo, and other poets.

135. Survey of Chicano Literature

(4) LOMELI, MCCRACKEN

Same course as Chicano Studies 180.

The course encompasses a general overview of all genres (poetry, novel, theatre, short story and essay) of Chicano literature. A people's sociohistorical experiences are examined to understand ethnicity, creativity, and world view.

136. Modern Mexican Literature

(4) LOMELI, POOT-HERRERA

Prerequisite: Spanish 102L (may be taken concurrently).

Study of texts explaining the development of Mexican culture and literature. Topics and writers include: modernism (from Gutierrez Najera to Tablada); the novel of the Mexican revolution (Azuela); and the modern essay (Alfonso Reyes and Octavio Paz).

137A. Golden Age Drama

(4) CHECA, CORTIJO, CABRANES-GRANT

Prerequisite: Spanish 102L (may be taken concurrently).

Equivalent to Spanish 110B.

The classic comedia, by Lope, Tirso, Alarcón, Calderón, and other dramatists.

138. Contemporary Mexican Literature

(4) LOMELI, POOT-HERRERA

Prerequisite: Spanish 102L (may be taken concurrently).

Equivalent to Spanish 111C.

Continued study of major trends in Mexican literature as evidenced in selected works of the following authors: the poetry of López Velarde and Octavio Paz; the Contemporáneos (Torres Bodet, Villaurrutia, Pellicer); and contemporary fiction (Yañez, Rulfo, Arreola, and Fuentes).

139. U.S. Latino Literature

(4) MCCRACKEN

Prerequisite: upper-division standing.

Taught in English.

A comparative study of the literature and culture of the diverse Latino populations of the United States, including Chicano, Puerto Rican, Cuban-American, Dominican-American, and other U.S. Latino groups. Writers, genres, and periods vary from quarter to quarter, emphasizing salient examples of fiction, poetry, drama, the essay, film or art.

140A-B. Cervantes: Don Quijote

(4-4) CHECA

Prerequisite: Spanish 102L (may be taken concurrently).

Equivalent to Spanish 110B.

Reading and discussion of the first and second parts of *Don Quijote*.

141. Cervantes: Other Works

(4) CHECA

Prerequisite: Spanish 102L (may be taken concurrently).

Reading from the minor works of Cervantes: Novelas Ejemplares, Comedias, Entremeses.

142A-B. Don Quixote (in English Translation)

(4-4) CHECA, CABRANES-GRANT

Prerequisite: upper-division standing.

Reading, examination, and discussion (all in English) of the first and second parts of Cervantes' masterpiece and its reflection on world literature.

151A. Catalan Language and Culture

(4) SHARRER

Prerequisite: upper-division standing.

Recommended preparation: proficiency in Spanish, Portuguese, or another romance language.

Catalan for advanced students. An intensive course for students with no previous study of Catalan.

151B. Catalan Language and Culture

(4) STAFF

Prerequisite: Spanish 151A.

Continues activities commenced in Spanish 151A.

152. Readings in Catalan

(4) STAFF

Prerequisite: Spanish 151 or equivalent.

Course may be repeated once for credit when readings change.

Readings in Catalan. Selected readings in Catalan prose and poetry.

153. Introduction to Basque Studies

(4) STAFF

Spanish Basque culture, the Basque language, its uniqueness, the geography of the Basque country (Euskalerría), its history, its literature, in Basque and in Spanish (in English translation).

154A-B. Basque Language and Culture

(4-4) STAFF

Prerequisite: upper-division standing (for 154A):

Spanish 154A (for 154B).

An intensive course for students with no previous study of the Basque language.

156. Introduction to Galician Studies

(4) STAFF

Prerequisite: upper-division standing.

Recommended preparation: proficiency in Spanish or Portuguese.

The uniqueness of the culture and language of Galicia, its history, ethnography, folklore, and literature, in Galician and Spanish.

157A. Galician Language and Culture

(4) STAFF

Prerequisite: upper-division standing.

An intensive course for students with no previous study of the Galician language.

157B. Galician Language and Culture

(4) STAFF

Prerequisite: Spanish 157A

An intensive course for students with no previous study of the Galician language; builds on Spanish 157A.

168. Posmodernismo

(4) CASTILLO

Prerequisite: Spanish 102L with a minimum grade of C.

Study of the Spanish and Spanish-American Postmodernistas, exploring the link between the culture of modernity and the emergence of a colloquial, prosaic, but lyrical discourse in late nineteenth- and early twentieth-century Spanish and Spanish-American poetry.

169. Literature and Cultural Identity in the Spanish Caribbean

(4) CASTILLO, LUPÍ

Prerequisite: Spanish 102L (may be taken concurrently).

Survey of Spanish Caribbean literature from the standpoint of interaction of culture and race. It traces the counterpoint among the diverse ethnic groups that populate the Caribbean and the manner in which the discourse of the oppressor and the oppressed intertwine.

170. The Generations of 1898 and 1927

(4) BERMÚDEZ

Prerequisite: Spanish 102L (may be taken concurrently).

Equivalent to Spanish 110C or 110D.

Readings of such authors as Unamuno, Baroja, Azorín, Valle-Inclán, Antonio Machado, Ortega, Gómez de la Serna, Guillén, García Lorca, and others, analyzed in their historical and social context.

174. The Hispanic Novel and Cinema

(4) CABRANES-GRANT

Prerequisite: Spanish 102L (may be taken concurrently).

Equivalent to Spanish 111C or 110D.

Study of three or four Hispanic novels vis-à-vis their movie versions, permitting analysis of narrative in

both genres, using existing films and videos based on masterpieces of Hispanic literature. Taught in Spanish.

175. Contemporary Spanish Literature

(4) BERMÚDEZ

Prerequisite: Spanish 102L (may be taken concurrently).

Spanish literature since the Civil War a study of the main trends of post-war Spanish novel, theatre, and poetry, in their historical and social context.

176. Contemporary Spanish Culture

(4) BERMÚDEZ

Prerequisite: Spanish 16A or 16B or 25 (may be taken concurrently).

A survey of the political, religious, social, and philosophical issues in twentieth-century Spanish life and letters.

177. Spanish-American Thought

(4) CASTILLO, LUPÍ

Prerequisite: Spanish 16A or 16B or 25 or equivalent language proficiency.

Leading social, institutional, intellectual, and artistic trends from the sixteenth century to the present.

178. Mexican Culture

(4) PERISSINOTTO, POOT-HERRERA

Prerequisite: Spanish 16A or 16B or 25 or equivalent language proficiency.

May not be taken for credit by students who have taken Spanish 180.

Social, institutional, intellectual, and artistic trends in the development of modern Mexico.

179. The Chicano Novel

(4) LOMELÍ, MCCRACKEN

Same course as Chicano Studies 181. Taught in English.

Reading, analysis and critique of the contemporary Chicano novel as it pertains to the Chicano experience.

181. Hispanic Poetry: 1900 to 1945 (in English Translation)

(4) BERMÚDEZ

Prerequisite: upper-division standing.

Reading and discussion of twentieth-century Spanish and Spanish-American poets and trends in their socio-historical context. Taught in English.

183AA-ZZ. Selected Authors and Topics in Hispanic Literature

(4) STAFF

Prerequisite: Spanish 102L (may be taken concurrently).

May be repeated for credit to a maximum of 20 units, provided letter designation is different.

Selected authors and topics in Hispanic literature. Topic or author chosen by faculty member.

184. Borges and the Contemporary Spanish-American Short Story

(4) LEVINE, LOMELÍ, POOT-HERRERA, CASTILLO

Prerequisite: Spanish 102L (may be taken concurrently).

The course will deal with Borges' short stories as pioneers of Spanish-American modern trends in narrative literature, and may include works from authors such as Onetti, Fuentes, García Márquez, etc.

185. The Spanish-American Nueva Novela

(4) LEVINE, LOMELÍ, POOT-HERRERA

Prerequisite: Spanish 102L (may be taken concurrently).

Equivalent to Spanish 111C.

Readings of such authors as Borges, Rulfo, Fuentes, Vargas Llosa, García Márquez, Donoso. Emphasis put on the innovative structure and language brought to Hispanic literature by the so-called *nueva novela*.

186AA-ZZ. Selected Topics in Hispanic Linguistics

(4) STAFF

Prerequisite: Spanish 100.

May be repeated for credit to a maximum of 20 units, provided letter designation is different.

Topics for the course reflect the research interests of faculty members.

187A-B. Modern Hispanic Drama

(4-4) CABRANES-GRANT

Prerequisite: Spanish 102L (may be taken concurrently).

A. Representative dramatists of Spain such as

Unamuno, Valle-Inclán, García Lorca, Buero Vallejo, and others.

B. Representative Spanish-American dramatists such as Carballido, Solórzano, Wolff, Cuzzani, Márquez, and others.

188. Modernismo

(4) CASTILLO, BERMÚDEZ

Prerequisite: Spanish 102L with a minimum grade of C.

Equivalent to Spanish 111B.

Introduction to the poetry and prose of Hispanic modernismo. Major writers and their most representative works: Martí, Darío, Rodo, Lugones. Lyric poetry, short story, novel, the essay, and other forms are studied.

189. Vanguard Poetry in Spanish America

(4) STAFF

Prerequisite: Spanish 102L (may be taken concurrently).

A survey of the poetry of the Spanish-American avant-garde focusing on its three main tendencies: colloquial or antipoetic poetry, existentially or politically committed poetry, and self-referential, narcissistic poetry.

190. Borges and his Precursors

(4) LEVINE

Prerequisite: upper-division standing.

Taught in English.

This course focuses on Borges the reader, and traces in particular his affinities with North American and European literatures.

194. Spanish American Women's Writing

(4) BERMÚDEZ, POOT-HERRERA

Prerequisite: Spanish 102L (may be taken concurrently).

Equivalent to Spanish 111A or 111B or 111C.

An introduction to nineteenth- and twentieth-century Spanish American women's writings. Themes may include women's participation in the formation of national literatures, their engagement with a tradition of women's writing, and issues of authorship and authority.

195. Senior Honors Independent Research

(4) STAFF

Prerequisite: Spanish or Portuguese majors only.

The student will engage in research leading to a paper of considerable depth and complexity on a topic dealing with the literature and/or language of Spain and Spanish America.

196. Internship

(2-3) STAFF

Prerequisites: upper-division standing; Spanish or Portuguese majors only; consent of department.

Students must have a 3.0 overall grade-point average. May be repeated for credit to a maximum of 6 units.

This course enables students to obtain credit for Spanish or Portuguese related internship experience. The course is graded P/NP and must be taken in conjunction with Spanish 199, for which a written project related to the internship experience must be completed.

199. Independent Studies in Spanish

(1-5) STAFF

Prerequisites: upper-division standing; completion of two upper division courses in Spanish; consent of department.

Students must have a minimum 3.0 grade-point average for the preceding three quarters and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined.

Independent studies in selected subjects not covered by course offerings.

GRADUATE COURSES

Note: The content of "studies" courses may vary from quarter to quarter and be repeated for credit with the consent of the department graduate advisor.

200. Studies in Synchronic Linguistics

(4) MIGLIO, PERISSINOTTO, RAPOSO

Prerequisite: graduate standing.

In-depth study on particular subjects in the field of the phonological, syntactic, or semantic component, or the lexicon, as applied to the modern Spanish.

200SS. Linguistic Analysis

(4) STAFF

Study of the phonological and syntactic structure of modern Spanish for students with a functional command of the language; emphasis placed on developing ability to analyze grammatical structures and phonetic principles related to the learning and teaching of Spanish.

210A-B-C-D. Spanish Literature for Portuguese Graduate Students

(4-4-4-4) STAFF

Prerequisite: graduate standing in Portuguese.

- A. Medieval Spanish literature.
- B. Golden Age literature.
- C. 18th- and 19th-century literature.
- D. 20th-century literature.

211B-C. Survey of Spanish-American Literature for Portuguese Graduate Students

(4-4) STAFF

Prerequisite: graduate standing in Portuguese.

Students will write an extensive paper and be responsible for additional readings to enrich their preparation and ready them for their Ph.D. examination.

- B. Nineteenth-century Spanish-American literature
- C. Twentieth-century literature

212. Approaches and Methods for Research in Hispanic and Luso Brazilian Literature and Linguistics

(4) CORTIJO, PERISSINOTTO, SHARRER, RAPOSO

Approaches and methods for research in Hispanic and Luso-Brazilian literature and linguistics. Study of main bibliographic resource with particular emphasis on computer-aided research and resulting in the production of a substantive on a field of graduate research.

213. Theory of Literary Criticism

(4) STAFF

Analysis and application of methods of current literary theory and criticism in relation to principal texts in Spanish and Spanish American literature. Techniques of literary scholarship.

215. Women Authors of the Spanish Language

(4) BERMUDEZ

An examination of women's strategies of self-figuration, traditions of female expression, women's relationship to authorship and authority, and the relationship of Spanish-language writing to contemporary feminist criticism.

218. Individual Hispanic Authors and Special Topics

(4) STAFF

May be repeated for credit to a total of 24 units (six courses, each a different author).

Intensive study of the work of an individual Hispanic author, to be chosen by the instructor.

221A. History of Spanish and Portuguese Languages

(4) PERISSINOTTO, RAPOSO

Prerequisites: Spanish 121.

Students write an extensive paper and are responsible for additional readings to enrich their preparation and ready them for their M.A. and Ph.D. examinations. Selected topics in historical phonology in light of recent scholarship.

222A-B. Studies in Medieval Peninsular Literature

(4-4) CORTIJO, SHARRER

Prerequisite: Spanish 122A (may be taken concurrently) (for 222A); Spanish 122B (may be taken concurrently) (for 222B).

May be repeated for credit with consent of departmental graduate advisor.

Selected topic studied in the light of recent scholarship. Students write an extensive paper and are responsible for additional readings to enrich their preparation and ready them for their M.A. and Ph.D. examinations.

230B. Studies in Spanish Literature of the Sixteenth and Seventeenth Centuries

(4) CHECA

May be repeated for credit with the consent of the departmental graduate advisor.

Narrative prose.

240A. Studies on Cervantes

(4) CHECA, CABRANES-GRANT

Prerequisites: Spanish 140A-B (may be taken concurrently).

May be repeated for credit with the consent of the departmental graduate advisor.

Selected topics studied in the light of recent scholarship. Students write an extensive paper and are responsible for additional reading to enrich their preparation and ready them for their M.A. and Ph.D. examinations.

260. Studies in Nineteenth-Century Spanish Literature

(4) CHECA, CABRANES-GRANT

Seminars covering selected authors, theses, or genres from the period in question.

283. El Modernismo

(4) CASTILLO

The influence of Rubén Darío and his followers on the prose and poetry of Spanish America and Spain: 1888 to 1920.

287. Literature and Culture of the Postmodern Americas

(4) MCCracken

Prerequisite: graduate standing.

A study of hybridity and postmodernity in the narrative cultural productions of Latinos in the Americas, focusing on the eroding but not yet effaced borders between various cultural and social spheres. Readings drawn from Latin American and U.S. Latino writers and theorists such as García Canclini, Cortázar, Piglia, Puig, Cisneros, Alvarez, Morales.

293. Translation: Literacy and Linguistics Approaches

(4) STAFF

Prerequisite: graduate standing.

Analysis of literacy texts from the perspective of translation; the theory and practice of translation from linguistic and literary perspectives.

294A-B. Research Seminar in Spanish-American Literature

(4-4) STAFF

In-progress grading with grading for both quarters to be given at the end of the second quarter.

- A. Primarily intended to train students in research techniques; background material and selection of topic.
- B. Completion of research paper, reporting regularly to class on progress of work.

295A-B. Research Seminar in Spanish Literature

(4-4) STAFF

In-progress grading with grading for both quarters to be given at the end of the second quarter.

- A. Primarily intended to train students in research techniques; background material, critical approach, and selection of topic.
- B. Completion of research paper, reporting regularly to class on progress of work.

296A-B. Research Seminar in Spanish Linguistics

(4-4) STAFF

In-progress grading with grading for both quarters to be given at the end of the second quarter.

- A. Primarily intended to train students in research techniques; background material, and selection of topic.
- B. Completion of research paper, reporting regularly to class on progress of work.

590. Spanish Teaching Methodology

(4) STAFF

Prerequisites: graduate standing and appointment as a teaching assistant or associate in Spanish.

Preparation of students to conduct initial research in areas related to Applied Linguistics, and the application of both theoretical and practical considerations of the current literature on actual teaching.

591. Teaching Assistant Practicum

(4) STAFF

Units earned do not apply toward completion of advanced degrees. S/U grading only. Required of all teaching assistants in Spanish.

Supervised teaching of lower-division Spanish courses at UCSB. Participation in occasional workshops related to the field of teaching will be required.

592. Teaching Associate Practicum

(4) STAFF

Units earned do not apply toward completion of advanced degrees. S/U grading only. Required of all student associates in Spanish.

Supervised teaching of lower-division Spanish courses at UCSB. Participation in occasional workshops related to the field of teaching will be required.

594. Special Topics

(1-4) STAFF

A special seminar on research subjects of current interest.

596. Directed Reading and Research

(2-4) STAFF

Prerequisites: consent of instructor; approval of department chair.

Individual tutorial. A written proposal for each tutorial must be approved by student's program advisor and by the department chair. The number of units which a student may take in this series depends on the nature of the program and the consent of the advisor or the departmental graduate committee.

597. Individual Study for M.A. Comprehensive and Ph.D. Examinations

(2-8) STAFF

Prerequisites: consent of advisor; approval of department chair.

No unit credit allowed toward advanced degrees. Individual study for M.A. comprehensive and Ph.D. examinations. Instructor should be student's major professor or chair of doctoral committee.

598A-Z. Master's Thesis Research and Preparation

(2-12) STAFF

Prerequisites: consent of instructor; approval of department chair.

No unit credit granted toward degree.

Only for research underlying the thesis and writing of the thesis.

599. Ph.D. Dissertation Research and Preparation

(2-12) STAFF

Prerequisites: approval of instructor and department chair.

S/U grading only.

Ph.D. dissertation preparation. Only for research in preparing and writing of the dissertation. Instructor should be the chair of student's doctoral committee.

SUMMER INSTITUTE OF HISPANIC LANGUAGES AND CULTURE GRADUATE COURSES

200SS. Linguistic Analysis

(4) STAFF

Study of the structure of modern Spanish in both its phonological and syntactic aspects for the student who already has a functional command of the language, with emphasis on developing ability to analyze and interpret grammatical structures.

201SS. Writing Strategies and Approaches

(4) STAFF

Development of writing skills through writing original compositions. Reading and discussion of selected masterpieces to acquaint the student with a variety of styles. Further grammar review.

203SS. Historical Evolution of Genres in Peninsular Spanish Texts

(4) STAFF

A close reading of selected modern and contemporary texts in prose and poetry, that are set in their historical contexts and carefully analyzed to bring out their meaning(s) or intention(s).

204SS. Historical Evolution of Genres in Spanish American Texts

(4) STAFF

A close reading of selected modern and

contemporary texts in prose and poetry that are set in their historical contexts and carefully analyzed so as to bring out their meaning(s) or intention(s).

206SS. The Sound Structure of Spanish
(4) STAFF

A study of the articulatory features of the sounds of Spanish, with particular attention to dialect variation and to applying phonetic principles to the learning and teaching of Spanish. Emphasis on the production and recognition of various sound patterns.

207SS. Cultural History of Spain
(4) STAFF

A survey of the major events that shaped Spain as a modern state. The intellectual movements that nurtured and sustained the contemporary Spanish state is also studied.

208SS. Cultural History of Spanish America
(4) STAFF

A panoramic but in-depth presentation of the major historical and cultural events that give coherence and diversity to the Spanish-speaking countries of the Western hemisphere.

209SS. Don Quijote (1605 and 1615)
(4) STAFF

A close reading of both parts of the novel, setting it into its historical context, with appropriate discussion of the episodes. Emphasis on Part I or Part II alternates, with the part not emphasized continually incorporated into class discussions.

210SS. The Spanish Language in the World (Origins to Present)
(4) STAFF

The origin, development, and spread of the Spanish language and culture throughout the world from pre-Roman times to current issues facing the Spanish-speaking population in the United States.

211AS-BS. Approaches to Spanish Curriculum
(4-4) STAFF

Basic concepts of modern theories of language and language acquisition. Course acquaints students with an in-depth exploration of fundamental concepts in Spanish teaching. Topics include classroom discourse, teaching approaches, principles of language testing, computer-based foreign language teaching.

216SS. Special Topics in Language and Literature
(4) STAFF

May be repeated for credit.

Studies in subjects of current interest in Spanish and/or Spanish American language and literature, and/or American literature and language written in Spanish.

299. Topics in Applied Linguistics
(4) STAFF

Same course as Education 299, EACS 299, French 299, German 299, and Linguistics 299.

Specialized topics in the study of applied linguistics.

500AS. Research Methods in Culture and Linguistics
(2-4) STAFF

Prerequisite: one quarter of coursework on M.A. in Institute of Hispanic Languages and Culture.

During the second term, students develop research skills necessary to produce a research project to conform to Institute guidelines. Students meet individually and as a group with faculty to plan the research project in language, literature, or cultural history.

500BS. Research Methods in Culture and Linguistics
(2-4) STAFF

Prerequisite: two quarters of coursework on M.A. in Institute of Hispanic Languages and Culture.

During the third term, every student completes monograph-length study on culture (including literature) or linguistics of the Hispanic world, presents it orally and submits it in printed form according to Institute guidelines.

500CS. Group and Individual Preparation for the M.A. Exit Examination
(2-4) STAFF

For students choosing the Exit Examination.

During the second term, students meet individually and as a group with faculty to execute a study plan to complete the M.A. Reading List for the Exit Examination given third term. Instruction centers on more difficult texts.

500DS. Group and Individual Preparation for the M.A. Exit Examination
(2-4) STAFF

For students choosing the Exit Examination.

During the third term, students meet individually and as a group to continue preparation for the Exit Exam. The course culminates in an oral examination based on the M.A. reading list and coursework.

Spanish Courses Taught in English

The following courses require no knowledge of a foreign language. See course descriptions above.

Spanish 109, 115B, 120A-B, 125, 126, 127, 135, 139, 142A-B, 153, 179, 181, 190

Portuguese Courses

LOWER DIVISION

1. Elementary Portuguese
(4) STAFF

Beginning course in Portuguese establishing fundamental auditory and oral skills, with secondary practice in reading and writing, pronunciation, intensive oral practice. Includes laboratory work.

2. Elementary Portuguese
(4) STAFF

Recommended preparation: Portuguese 1 or equivalent.

Continues activities commenced with Portuguese 1.

3. Elementary Portuguese
(4) STAFF

Recommended preparation: Portuguese 2 or equivalent.

Completes the basic study of the elements of the language.

4. Intermediate Portuguese
(4) STAFF

Recommended preparation: Portuguese 3 or equivalent.

Begins review of basic grammar and syntax. (F)

5. Intermediate Portuguese
(4) STAFF

Recommended preparation: Portuguese 4 or equivalent.

Continues review of basic grammar and syntax. (W)

6. Intermediate Portuguese
(4) STAFF

Recommended preparation: Portuguese 5 or equivalent.

An intensive course designed to develop students' skills in reading and oral and written expression by reading and discussing Luso-Brazilian texts and writing compositions on related topics. (S)

8A-B. Portuguese Conversation
(2-2) STAFF

Recommended preparation: Portuguese 3 or equivalent.

Portuguese conversation; courses conducted entirely in Portuguese.

16A-B. Portuguese for Spanish Speakers
(4-4) STAFF

Recommended preparation: fluency in Spanish or other romance language.

An intensive introductory sequence in Portuguese covering the first full year of Portuguese grammar and also advanced readings in Portuguese. Uses the grammatical structures of the romance languages, especially Spanish, as a point of departure. Proficiency in all areas of Portuguese (reading, writing, listening, and speaking) are emphasized.

UPPER DIVISION

Literature courses taught in English translation or courses taught in English will generally not count towards fulfilling Portuguese major requirements. See "Upper-division major" section for exceptions.

102A-B. Advanced Grammar and Composition

(4-4) STAFF

Prerequisite: upper-division standing.

Recommended preparation: Portuguese 6 or equivalent.

Study of the finer points of Portuguese grammar and syntax. Equal stress is placed on written and oral practice of the language. The work in class will consist of careful study of essays and articles.

105A-B-C. Survey of Portuguese Literature
(4-4-4) CAMILO-DOS-SANTOS, SHARRER

Prerequisite: upper-division standing.

Recommended preparation: Portuguese 6 or equivalent.

- Portuguese literature from its origins to the sixteenth century.
- Portuguese literature of the sixteenth, seventeenth, and eighteenth centuries.
- Portuguese literature of the nineteenth and twentieth centuries.

106A-B-C. Survey of Brazilian Literature
(4-4-4) CAMILO-DOS-SANTOS, OLIVER

Prerequisite: upper-division standing.

Recommended preparation: Portuguese 6 or equivalent.

- Brazilian literature of the colonial period.
- Brazilian literature from the nineteenth century to 1922.
- Brazilian literature from 1922 to present.

115AA-ZZ. Brazilian Literature (in English Translation)
(4) STAFF

Prerequisite: upper-division standing.

May be repeated for credit to a maximum of 8 units provided letter designations are different.

Significant writers and poets of nineteenth- and twentieth-century Brazil. Topic or author to be chosen by faculty member. Each course on a different topic. Taught in English.

120AA-ZZ. Portuguese Literature (in English Translation)
(4) CAMILO-DOS-SANTOS, OLIVER

Prerequisite: upper-division standing.

May be repeated for credit to a maximum of 8 units provided letter designations are different.

A presentation of major works in Portuguese to reveal the interest and the originality of Portuguese literature through the ages. Topics or author to be chosen by faculty member. Each course on a different topic.

125A-B. Culture and Civilization of Portugal and Brazil
(4-4) CAMILO-DOS-SANTOS, OLIVER

Prerequisite: upper-division standing.

The distinctive features of Portugal and Brazil as manifested in their institutions, art, music, and literature. Taught in English.

- Portugal
- Brazil

128AA-ZZ. Luso-Brazilian Cinema
(4) OLIVER

Prerequisite: upper-division standing.

May be repeated for credit to a maximum of 8 units provided letter designations are different.

Portuguese and Brazilian films of the past forty years both as an art medium and as a document of changing society. Topic or author to be chosen by faculty member. Each course on a different topic. Taught in English.

183AA-ZZ. Studies in Portuguese Literatures
(4) CAMILO-DOS-SANTOS, OLIVER, SHARRER

Prerequisite: upper-division standing.

May be repeated to a maximum of 20 units provided the letter designation is different.

Recommended preparation: Portuguese 6 or equivalent.

Topic or author chosen by faculty member; each course on a different topic.

184AA-ZZ. Studies in Portuguese Linguistics
(4) RAPOSO

Prerequisite: upper-division standing.

May be repeated for a maximum of 20 units,

provided letter designation is different. Students limited to one topic per quarter.

Topic to be chosen by faculty member.

189. Brazilian Modernism

(4) OLIVER

Prerequisite: Upper-division standing.

Recommended Preparation: Portuguese 6 or equivalent.

An introduction to the poetry and prose fiction of the Brazilian Avant-Garde of the 1920s and 1930s.

195. Senior Honors Independent Research

(4) STAFF

Prerequisite: admission to the Portuguese senior honors program.

The student will engage in research leading to a paper of considerable depth and complexity on a topic dealing with the literature and/or language of Portugal, Brazil, or Portuguese-speaking Africa.

199. Independent Studies in Portuguese

(1-5) STAFF

Prerequisites: upper-division standing; completion of two upper-division courses in Portuguese; consent of department.

Students must have a minimum 3.0 grade-point average for the preceding three quarters and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined.

Independent studies in selected subjects not covered by course offerings.

GRADUATE COURSES

Note: The content of "studies" courses may vary from quarter to quarter and may be repeated for credit with the consent of the department graduate advisor.

205A-B-C. Survey of Portuguese Literature for Spanish Graduate Students

(4-4-4) CAMILO-DOS-SANTOS, OLIVER SHARRER

Prerequisites: Portuguese 105A-B-C or concurrent attendance.

Students will write an extensive paper and be responsible for additional readings to enrich their preparation and ready them for their Ph.D. examinations.

- From origins to sixteenth century.
- Sixteenth, seventeenth, and eighteenth centuries.
- Nineteenth and twentieth centuries.

206A-B. Survey of Brazilian Literature for Spanish Graduate Students

(4-4) CAMILO-DOS-SANTOS, OLIVER

Prerequisites: Portuguese 106A-B-C or concurrent attendance.

Students will write an extensive paper and be responsible for additional readings to enrich their preparation and ready them for their Ph.D. examinations.

- Colonial period
- From nineteenth century to 1922

255. Studies on Machado de Assis and the Brazilian Novel

(4) OLIVER

Course content may vary from quarter to quarter and may be repeated for credit with the consent of the department graduate advisor.

Machado de Assis' novelistic work; its innovative approach as a basis of modern fiction. Other novelists of his time will also be studied.

265. Studies on Fernando Pessoa and the Avant-Garde

(4) STAFF

Course content may vary from quarter to quarter and may be repeated for credit with the consent of the department graduate advisor.

Pessoa's poetry, its influence on contemporary Portuguese poetry, and its relationship to the world avant-garde movement.

283AA-ZZ. Individual Luso-Brazilian Authors and Special Topics

(4) STAFF

May be repeated for a total of 24 units (six courses, each a different author or topic).

Intensive study on the work of an individual Luso-Brazilian author or topic, to be chosen by the instructor.

295A-B. Research Seminar in Portuguese and Brazilian Literature

(4-4) CAMILO-DOS-SANTOS, OLIVER

A two-quarter in-progress sequence course with grades for both quarters issued upon completion of the final quarter.

- Primarily intended to train students in research techniques, background material, and selection of topics.
- Completion of research paper, reporting regularly to class on progress of work.

590. Spanish Teaching Methodology

(4) STAFF

Prerequisites: graduate standing and appointment as a teaching assistant or associate in Spanish.

Preparation of students to conduct initial research in areas related to Applied Linguistics, and the application of both theoretical and practical considerations of the current literature on actual teaching.

591. Teaching Assistant Practicum

(4) STAFF

Units earned do not apply toward completion of advanced degrees. SJU grading only. Required of all teaching assistants in Portuguese.

Supervised teaching of lower-division Portuguese courses at UCSB. Participation in occasional workshops related to the field of teaching will be required.

592. Teaching Associate Practicum

(4) STAFF

Units earned do not apply toward completion of advanced degrees. SJU grading only. Required of all student associates in Portuguese.

Supervised teaching of lower-division Portuguese courses at UCSB. Participation in occasional workshops related to the field of teaching will be required.

594. Special Topics

(1-4) STAFF

A special seminar on research subjects of current interest.

595AA-ZZ. Directed Teaching of Literature/Linguistics

(4) STAFF

Prerequisites: doctoral candidate with teaching assistant or associate instructor status.

Individual tutorial. Application of research and theory to classroom practice in teaching of undergraduate literature or linguistics courses. The instructor of the literature or linguistics courses will supervise the student as collaborator in the planning and teaching of it.

596. Directed Reading and Research

(2-4) STAFF

Prerequisite: consent of program advisor.

Individual tutorial. A written proposal for each tutorial must be approved by student's program advisor and by the department chair. The number of units which a student may take in this series depends on the nature of the program and the consent of the advisor or the departmental graduate committee.

597AA-ZZ. Individual Study for Master's Comprehensive or Ph.D. Examinations

(2-12) STAFF

SJU grading. No unit credit allowed toward advanced degrees.

Individual study under instructor who is a member of the student's program committee.

599. Ph.D. Dissertation Research and Preparation

(2-12) STAFF

Prerequisite: graduate standing.

SJU grading only. Research and writing of the dissertation. Instructor should be the chair of the student's doctoral committee.

Portuguese Courses Taught in English

The following courses require no knowledge of a foreign language. See course descriptions above.

Portuguese 115AA-ZZ, 120AA-ZZ, 125A-B, 128AA-ZZ, 180.

Speech and Hearing Sciences

Department of Speech and Hearing Sciences
Division of Mathematical, Physical, and Life Sciences

Harder 1057

Chair: Jeffrey L. Danhauer

Faculty

Jeffrey L. Danhauer, Ph.D., Ohio University, Professor (audiology)

Janis Costello Ingham, Ph.D., University of Kansas, Professor (speech and language pathology)

Roger J. Ingham, Ph.D., University of New South Wales, Professor (speech and language pathology)

Emeriti Faculty

Sanford E. Gerber, Ph.D., University of Southern California, Professor Emeritus (pediatric audiology)

The speech and hearing sciences program is the only such program among the ten campuses of the University of California. Undergraduate work in speech and hearing sciences may be accomplished through pursuit of a minor in speech and hearing sciences or students may enroll in speech and hearing coursework as part of an Interdisciplinary Studies major (see Interdisciplinary Studies). Either of these options provides adequate preparation for admission to most of the more than 250 graduate programs in communication sciences and disorders in the United States.

Undergraduate Program

Minor—Speech and Hearing Sciences

The minor in speech and hearing sciences requires completion of four preparation for the major courses (14 units) and a minimum of five upper-division courses (20 units). It is strongly recommended that students preparing for graduate studies in communication sciences and disorders complete as many as possible of the Speech and Hearing Sciences (SHS) courses offered. All of these courses must be completed on a letter-grade basis. The speech

and hearing sciences minor may be combined with any major and makes a particularly good addition to the following: psychology, linguistics, foreign language, biological sciences, and computer science.

Preparation for the minor. Speech and Hearing Sciences 50; Linguistics 20A; Psychology 1; Interdisciplinary Studies 1.

Upper-division minor. Twenty upper-division units, distributed as follows: Speech and Hearing 120, 121*, 122, 128*, 131*, 135*, 155, 166, 167, 182, 194, 197, 199; Linguistics 137; Psychology 105. Students may choose any 20 units from the list (excluding 294, 297, 199).

* *Completion of these courses qualifies students for the State of California audiometrist credential.*

Note: Substitutions and waivers are subject to approval by the chair of the department. Please see the minor sheet for Speech and Hearing at www.registrar.ucsb.edu for special conditions governing minors in the College of Letters and Science.

Interdisciplinary Studies Major

The Interdisciplinary Studies Major at UCSB allows qualified students to plan their own major when no existing major meets their intellectual goals. Students interested in preparing for graduate studies in communication sciences and disorders often use this avenue to design a course of study that qualifies them for admission to graduate school in the discipline. Students must read the general guidelines governing an Interdisciplinary Studies major in the relevant catalog section. To incorporate Speech and Hearing Sciences (SHS) into an interdisciplinary major, students should follow this process:

1. Students select three departments whose coursework is particularly relevant to the study of speech, language, and hearing. One of those departments is always speech and hearing sciences.
2. With the help of a faculty advisor in speech and hearing sciences, and with the approval of advisors in each department, students select coursework that totals a minimum of 56 upper division units, including at least one 4 unit senior thesis or research project. (It is strongly recommended that students preparing for graduate studies in communication sciences and disorders complete as many as possible of the Speech and Hearing Sciences courses offered, beyond these minimum requirements). In addition, students are required to complete all prerequisites for those upper division courses. Typical "trios" of departments that students have selected are as follows: Speech and Hearing Sciences, Psychology, and Linguistics; Speech and Hearing Sciences, Linguistics, and Spanish; Speech and Hearing Sciences, Biology, and Psychology; Speech and Hearing Sciences, Biology, and Computer Science.
3. Students prepare a proposal to be submitted to the Dean of Undergraduate Studies for approval. The criteria for approval are (1) overall coherence and academic integrity of the proposal and (2) student's rationale for choice of departments and courses.
4. Before graduation, students complete a Senior Thesis (SHS 182) under the direction of

a faculty member. The nature of this project, to be determined by the student in consultation with faculty, ranges from a major library research paper to a databased research project.

Speech and Hearing Sciences Courses

LOWER DIVISION

50. Introduction to Communication Disorders

(4) J. INGHAM

Recommended preparation: Interdisciplinary 1.

Description and illustration of speech, language, and hearing of children and adults with a variety of communication disorders including phonology, stuttering, voice, aphasia, language, and hearing disorders. Includes consideration of precipitating and maintaining factors.

UPPER DIVISION

120. Phonemics in Communication Disorders

(4) J. INGHAM

Prerequisites: Speech and Hearing Sciences 50, and Linguistics 20A.

Identification of the phonemes of American English and their symbolic representation, including modifying symbols for deviant phonology. Acoustic, physiological, and perceptual parameters of speech sound formation.

121. Physics of Speech and Hearing

(4) DANHAUER

Recommended preparation: Speech and Hearing Sciences 50.

Introduction to the physics of sound as applicable to speech and hearing sciences; classification of different sounds; properties of sound; acoustics of tubes and its relationship to human speech sounds; psychophysics of hearing: pitch, intensity, loudness, and their measurement.

122. Anatomy, Physiology, and Neurology of the Speech Mechanism

(4) INGHAM

Prerequisite: Speech and Hearing Sciences 50.

Anatomical, physiological, and neurological bases for an understanding of speech communication.

128. Aural Anatomy and Pathology

(4) DANHAUER

Recommended preparation: Speech and Hearing Sciences 50.

Anatomy and physiology of the human auditory system; causes and types of hearing impairment; otological considerations; medical and surgical implications.

131. Assessment and Rehabilitation for Hearing-Impaired Adults

(4) DANHAUER

Prerequisite: Speech and Hearing Sciences 128 or 121.

Introduction to psychoacoustic principles as applied to audiometric diagnostics and aural rehabilitation with adults.

135. Amplification for the Hearing Impaired

(4) DANHAUER

Recommended preparation: Speech and Hearing Sciences 50, 128, and 131.

Covers methodology for rehabilitating persons with hearing loss; emphasizes recent developments in instrumentation and measurement techniques. Hearing aids and real-ear analysis are used with hands-on laboratory approach. Emphasizes interfacing amplification to the patient and family.

155. Assessment and Treatment of Child Phonologic Disorders

(4) J. INGHAM

Prerequisites: Speech and Hearing Sciences 50, 120, 166, and Linguistics 137.

A study of principles and methods for assessing children's speech production to determine existence

of phonologic disorders and a review of varieties of treatment methods for such disorders.

166. Principles of Behavior Modification

(4) R. INGHAM

Prerequisite: Psychology 1.

Recommended preparation: Speech and Hearing Sciences 50.

Basic principles of operant conditioning and their use in classroom, family, and clinical environments with special reference to speech-language pathology.

167. Introduction to Stuttering

(4) R. INGHAM

Prerequisites: Speech & Hearing Sciences 50 and 166.

Review and analysis of the features and characteristics of stuttering, the areas and causes of stuttering, conditions that modify stuttering, and current therapies for stuttering.

182. Undergraduate Thesis

(4) STAFF

Prerequisite: consent of instructor.

Independent work with faculty sponsor culminating in senior thesis.

194. Group Studies for Advanced Students

(1-4) STAFF

Prerequisites: upper-division standing and consent of instructor.

May be repeated for a maximum of 6 units.

Selected topics in accordance with instructor's area of specialization.

197. Instructional Laboratory

(1-4) STAFF

Prerequisites: senior standing; consent of instructor.

Students must have an 3.0 overall grade-point-average.

Tutoring experience for advanced undergraduate students in preparation for graduate education.

199. Independent Studies

(1-4) STAFF

Prerequisite: consent of instructor.

Students must have a minimum 3.0 GPA for the preceding three quarters and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined.

GRADUATE COURSE

594. Special Topics

(1-4) STAFF

Prerequisite: consent of instructor.

May be repeated with a different topic for a maximum of 9 units.

Selected topics in accordance with instructors' specializations.

Department Chair: Raya Feldman

Faculty

Guillaume Bonnet, Ph.D., University of North Carolina, Chapel Hill, Assistant Professor (probability, stochastic partial differential equations, mathematical models in population dynamics)

Andrew V. Carter, Ph.D., Yale University, Associate Professor (mathematical statistics)

János Engländer, D.Sc., Technion (Haifa, Israel), Assistant Professor (probability, stochastic calculus, partial differential equations)

Raya Feldman, Ph.D., Technion-IIT, Associate Professor (probability and stochastic processes)

Jean-Pierre Fouque, Ph.D. and D.Sc., Paris VI, Professor (stochastic processes, stochastic partial differential equations, financial mathematics)

David V. Hinkley, Ph.D., University of London, Professor (statistical theory and methods)

Dawn E. Holmes, Ph.D., University of Bradford, U.K., Lecturer with Security of Employment (probabilistic reasoning, Bayesian networks)

John Hsu, Ph.D., University of Wisconsin, Professor (Bayesian inference, linear models)

Sreenivasa R. Jammalamadaka, Ph.D., Indian Statistical Institute, Professor (mathematical statistics, nonparametric methods, directional data)

Wendy Meiring, Ph.D., University of Washington, Associate Professor (applied statistics, statistics of space-time processes)

Yuedong Wang, Ph.D., University of Wisconsin at Madison, Professor (biostatistics, smoothing splines)

Emeriti Faculty

Joseph Gani, Ph.D., Australian National University, D.Sc., University of London, Professor Emeritus (applied probability, biomathematics, stochastic processes)

Svetlozar Rachev, D.Sc., Steklov Mathematical Institute, Professor Emeritus (probability theory, stability, probability metrics, mathematical finance)

James B. Robertson, Ph.D., Indiana University, Professor Emeritus (probability, ergodic theory, stochastic processes)

Undergraduate Program

Statistics is basic to quantitative research in the biological, physical, and social sciences. Because its methods are based on mathematics, it requires a firm understanding of mathematical methods as well as an appreciation of scientific method, computation, and practical problems.

As preparation for entry into any of UCSB's undergraduate statistics programs, students should have completed two years of algebra and courses in plane geometry and trigonometry in high school. In the first two years of university study, students should complete the preparation requirements outlined below. Thus students should begin satisfying these requirements in the first quarter of the freshman year. At the end of the second year, students should decide which of the undergraduate degrees described below best suits their needs and should design an upper-division program in consultation with their faculty advisor. Recommended programs for each emphasis are available from the faculty advisor.

Bachelor of Arts— Statistical Science

The B.A. in statistical science is a basic degree intended for students interested in general training in statistics and the use of statistical methods in the social and decision sciences. It is suitable as a terminal baccalaureate degree, or as preparation for advanced training in business administration, management science, or operations research.

Preparation for the major. Students must complete each of Mathematics 3A-B-C, 5A-B, and 8. Note that prerequisites to these courses must be completed with a grade of C or above. In addition, students must complete Computer Science 10. (Students are advised to take Computer Science 5NM in preparation for 10.)

Upper-division requirements. Forty upper-division units in statistics and mathematics are required, excluding Mathematics 100A-B, 101A-B, 102A-B, 193. The 40 units must include PSTAT 120A-B-C, and 126, a minimum of 16 units from PSTAT 105, 122, 123, 130, 140, 160A-B, 174, 175 and a minimum of 12 units from other PSTAT courses not used above or Mathematics 104A-B-C, 108A-B, 111A-B-C, 117, 118A-B-C, 132A-B, and either Economics 100A-B or 104A-B. (With an advisor's approval, 4 of the 40 units may be courses in subjects other than statistics or mathematics, taken as part of a coherent statistics program.)

Bachelor of Science— Statistical Science

The B.S. in statistical science is a specialized statistics degree intended for students interested in the use of statistical theory and methods in the biological, physical, and technological sciences. It is suitable as a terminal baccalaureate degree, or as preparation for advanced training in actuarial statistics, applied statistics, biostatistics, or probability and statistics.

The B.S. in statistical science offers three areas of concentration: actuarial statistics, applied statistics, and probability and statistics. Completion of one of these concentrations will not be formally acknowledged on the student's official transcript or diploma.

Preparation for the major. Students must complete each of Mathematics 3A-B-C, 5A-B, and 8. Note that prerequisites to these courses must be completed with a grade of C or above. In addition, students must complete Computer Science 10. (Students are advised to take Computer Science 5NM in preparation for 10.)

Upper-division requirements. Fifty-two upper-division units in statistics and mathematics are required, excluding Mathematics 100A-B, 101A-B, 102A-B, 193. The 52 units must include PSTAT 120A-B-C, 122, 126; 8 units from PSTAT or Mathematics 104A-B-C, 108A-B, 111A-B-C, 117, 118A-B-C, 132A-B, Economics 100A-B or 104A-B, 134A-B. Students must also complete one of the following concentrations:

Actuarial statistics concentration. Twelve units from PSTAT 170, 171, 172A-B, and 12 elective units of upper-division PSTAT courses. Up to 4 of the elective PSTAT units required may be chosen from courses in related departments, if approved by the major advisor as part of a coherent statistics program.

Applied statistics concentration. PSTAT 130; 8 units from PSTAT 123, 131, 140, 174, 175; 12 units of upper-division elective PSTAT courses. Up to 4 of the elective PSTAT units required may be chosen from courses in related departments, if approved by the major advisor as part of a coherent statistics program.

Probability and statistics concentration. PSTAT 160A-B is required, with 16 elective units of upper-division PSTAT courses. Up to 4 of the elective PSTAT units required may be chosen from courses in related departments, if approved by the major advisor as part of a coherent statistics program.

Bachelor of Science—Financial Mathematics and Statistics

This is a joint major between the Department of Mathematics and the Department of Statistics and Applied Probability. This degree is intended for students who would like to learn how mathematics, probability, and statistics play a key role in pricing and hedging securities in the financial markets.

Pre-major requirements. In order to be admitted into the Financial Mathematics and Statistics major, students must complete all of the following pre-major courses with a grade-point average of 2.5 or higher. Mathematics 3A-B-C, 5A-B-C, 8, Economics 1 and 2. Also required is one course from: Computer Science 5AA-ZZ, 10, or Engineering 3. The computer science and engineering courses are excluded from the pre-major GPA calculation but will apply to the overall major GPA.

Entry into pre-major does not guarantee admission into full major status. Upon satisfactory completion of the pre-major requirements, and after meeting with a faculty advisor to discuss career opportunities and upper-division course electives, students may petition to be accepted to full major status.

Upper-division major. Fifty-six upper-division units in mathematics, statistics, and economics are required, excluding Mathematics 100A-B, 193, and 195A-B. The 48 required units must include Economics 104A, Mathematics 104A-B, 124A-B, PSTAT 120A-B, 126, 130, 160A-B, and

either PSTAT 170 or Mathematics 170. The remaining 8 elective upper-division units can be chosen from: Economics 104B, 105, 134A-B, 140B; Mathematics 104C, 108A-B, 117; PSTAT 120C, 131, 171, 173, 174.

Minor—Statistical Science

All courses to be applied to the minor must be completed on a letter-grade basis. This includes both courses offered in probability and statistics and those offered by other departments and applied to the minor.

Preparation for the minor. Mathematics 3A-B-C (12 units), 5A-B and 8 (13 units).

Upper-division minor. Twenty units, distributed as follows: PSTAT 120A, 120B-C or 160A-B; 8 units of upper-division PSTAT electives (up to 4 of the elective units may be in a related department, subject to the approval of the statistics and applied probability undergraduate advisor.)

Note: Substitutions and waivers are subject to approval by the chair or advisor of the department. Please see page 118 for special conditions governing minors in the College of Letters and Science.

Graduate Program

The following programs are available: M.A. in Statistics—Mathematical Statistics Specialization, or Applied Statistics Specialization; and Ph.D. in Statistics and Applied Probability, with two optional Ph.D. emphases (Financial Mathematics and Statistics and Quantitative Methods in the Social Sciences). Specializations are not listed on a student's transcript or diploma, however, emphases are listed on the transcript.

In addition to departmental requirements, candidates for graduate degrees must meet the university degree requirements described in the chapter "Graduate Education at UCSB."

In addition to departmental admission requirements, applicants must also meet the university requirements for admission described in the chapter "Graduate Education at UCSB."

All courses required for the graduate degrees must be completed with a grade of B or better.

The Statistical Laboratory

The Statistical Laboratory (Statlab) has been providing UCSB graduate students and faculty with statistical consulting advice since 1981. The Department of Statistics and Applied Probability is endeavoring to expand the activities of the laboratory and to establish it as a source point for statistical expertise on campus, organizing cross-disciplinary seminars on applied statistics and offering services related to statistical computing and data analysis. The Statlab offers graduate students practical experience in statistical consulting while providing the UCSB campus with professional statistical services. The Statlab may be reached at (805) 893-2007 or by email at statlab@pstat.ucsb.edu.

Admission

A candidate for admission must fulfill the scholarship requirements for graduate study and have had undergraduate coursework equivalent to PSTAT 120A-B-C, Math 108A (linear algebra) and a basic computer science course. Students may be admitted who do not satisfy all requirements, but they will be asked to take

supplementary undergraduate courses which will not count toward the graduate degree unit course requirements described below.

Master of Arts—Statistics—Mathematical Statistics Specialization Degree Requirements

Candidates must complete 42 units of approved upper-division or graduate work, including any two of the three basic graduate course sequences in statistics and probability: PSTAT 207A-B-C, 213A-B-C, and 220A-B-C. All required courses for the M.A. must be completed with a grade of B or better.

Two plans are available for completing the degree: Plan 1 (thesis), and Plan 2 (examination). Candidates in both plans must complete 42 units of approved upper-division or graduate work.

Under Plan 1, students must pass a comprehensive examination in one statistics area requirement, described under the heading "Doctor of Philosophy" below, prepare a thesis under the supervision of a faculty member, and defend it before a faculty committee. A maximum of 6 of the 42 units may be in PSTAT 596.

Under Plan 2, students must pass a comprehensive examination in two statistics area requirements. For information on area requirements, please refer to the Statistics Department's Graduate Program Policies and Procedures (www.pstat.ucsb.edu).

Master of Arts—Statistics—Applied Statistics Specialization Degree Requirements

The requirements for the applied statistics specialization will be kept flexible so that joint programs of study with other departments and schools can be worked out to suit the needs of individual students. These individualized programs should form a coherent plan and are subject to the approval of the statistics faculty. Courses that have substantial overlap will not be allowed. All required courses for the M.A. must be completed with a grade of B or better.

Candidates must complete 42 units of upper-division or graduate work approved by the graduate advisor in statistics. The 42 units must include at least 24 units of graduate courses in the 200 series and must include PSTAT 122, 220A-B-C and 230. The remaining 18 units of credit may be obtained by taking any upper-division or graduate courses from the Statistics and Applied Probability listing or any of the approved courses from the other applied disciplines, excluding 120A-B-C.

Students must pass a comprehensive written examination based on PSTAT 120A-B-C, 122, 126, and 220A-B-C, and must submit a project report on data analysis to the Applied Statistics Exam Committee.

Doctor of Philosophy—Statistics and Applied Probability Degree Requirements

Area requirements. Ph.D. students in statistics will be required to fulfill two area requirements. For information on area requirements, please refer to the Statistics Department's Graduate Program Policies and Procedures (www.pstat.

ucsb.edu). Each student has up to two attempts for each area exam and must successfully pass two area exams within three years after beginning the PSTAT graduate program, whether or not a master's degree has already been completed.

Course requirements. Students must complete 72 units of PSTAT graduate courses or approved courses from other departments. At least 60 units must be from 200-level graduate courses (except PSTAT 263) offered by the department and must include PSTAT 207A-B-C, 213A-B-C, and 220A-B-C. Students opting for the Ph.D. emphasis in Financial Mathematics and Statistics or in Quantitative Methods in Social Sciences must refer to the descriptions below. Each required course must be completed with a grade of B or better. Graduate courses in statistics from other departments may be included, but should have prior approval from the graduate advisor in statistics and/or the thesis advisor. These advanced courses should form a coherent plan and facilitate the selection of an area for dissertation research.

The student advances to candidacy after satisfactorily completing two area requirements and passing the preliminary oral examination. The student is required to complete a dissertation representing an original contribution to knowledge; the thesis is defended before a faculty committee.

Optional Ph.D. emphases in Financial Mathematics and Statistics and in Quantitative Methods in the Social Sciences are also available. See below.

Specific details about degree requirements are found in the Statistics Department's Graduate Program Policies and Procedures. Departmental requirements stated there are in addition to the minimum university requirements stated in the *General Catalog*.

Optional Ph.D. Emphasis in Financial Mathematics and Statistics (Only for Statistics Students)

Students pursuing a Ph.D. in this department may petition to add an emphasis in Financial Mathematics and Statistics. Students are required to accumulate 72 graduate units, which must include PSTAT 207 A-B-C, 213 A-B-C, and 223 A-B-C, Math 201A-B and either Econ 210A-B or Econ 235A-B. A grade of B or better must be obtained in these required courses. Twenty units of electives are required from: PSTAT 220A-B-C, 221A-B-C, 222A-B-C, 262FM, Econ 235A-B, Econ 210A-B-C, Math 201C, 228A-B-C-D, 246A-B-C, 206A-B-C-D, PSTAT 274 or Econ 245B. With prior approval from the coordinating committee for the emphasis, other courses can be chosen as electives. Students must fulfill two area requirements: probability/stochastic processes and mathematical statistics. The student's doctoral committee shall be appointed according to the same regulations governing other Ph.D. students in Statistics and Applied Probability, and must be approved by the coordinating committee for the emphasis. The dissertation topic must focus on an area of Financial Mathematics and Statistics and be approved by the student's doctoral committee.

Optional Ph.D. Emphasis in Quantitative Methods in the Social Sciences

Students pursuing a Ph.D. in statistics may petition to add an interdisciplinary emphasis in Quantitative Methods in the Social Sciences (QMSS). QMSS emphasis is intended for students who wish to develop and use cutting-edge quantitative methods in social science research. Our curriculum is designed to provide students with the rigorous mathematical and statistical background necessary for advanced quantitative work, while also providing a broad interdisciplinary perspective on the use of quantitative methods in the social sciences. To that end, students who petition to add the QMSS emphasis must complete two quarters of calculus, one quarter of linear algebra, and a one-year sequence of statistics. (These requirements can be waived if equivalent courses have already been completed.) QMSS students must also complete at least three quantitative social sciences methods courses (at least two of which are outside the student's home department), enroll in the QMSS colloquia for at least three quarters, and present their own original quantitative social science research at the QMSS colloquia at least once.

Students who add the QMSS emphasis are expected to write a Ph.D. dissertation that is focused on an issue that is appropriate to the QMSS emphasis. For instance, the dissertation could develop a quantitative method that could be applied to social science fields beyond the student's discipline, or adapt a quantitative method used in a social science field outside the student's discipline for researching a substantive problem within the student's discipline. The dissertation committee must include at least one QMSS faculty member from outside the student's home department.

For more information, please consult the QMSS Web site at www.qmss.ucsb.edu.

Statistics and Applied Probability Courses

LOWER DIVISION

5A. Statistics

(5) STAFF

Not open for credit to students who have completed PSTAT 5E, 5S, Economics 5, Psychology 5, Sociology 3, EEMB 30, or Communications 87, or other introductory statistics courses.

Recommended Preparation: high school algebra.

Random variables, sampling distribution, estimation hypothesis testing, correlation and regression, other topics from statistics. Computing labs required.

5E. Statistics With Economics And Business Applications

(5) STAFF

Not open for credit to students who have completed PSTAT 5A, 5S, Economics 5, Psychology 5, Sociology 3, EEMB 30, or Communications 87, or other introductory statistics courses.

Recommended Preparation: high school algebra.

An introduction to statistical methods applied to the analysis of economic data. Topics include basic probability, statistical inference and hypothesis testing, and regression. Computing labs with Excel.

UPPER DIVISION

105. Introduction to Nonparametric Methods

(4) STAFF

Prerequisite: PSTAT 120A and 120B or equivalent.

Statistical methods for model-free data analysis, including use of ranks in comparing means and assessing correlation, computer-based permutation and bootstrap calculations for significance tests and confidence intervals, estimation of lifetime survival curves. Emphasis on scientific applications.

120A. Probability and Statistics

(4) STAFF

Prerequisite: Mathematics 3A-B-C.

Concepts of probability; random variables; combinatorial probability; discrete and continuous distributions; joint distributions, expected values; moment generating functions; law of large numbers and central limit theorems.

120B. Probability and Statistics

(4) STAFF

Prerequisites: a grade of C or better in PSTAT 120A.

Distribution of sample mean and sample variance; t , χ^2 and F distributions; summarizing data by statistics and graphs; estimation theory for single samples: sufficiency, efficiency, consistency, method of moments, maximum likelihood; hypothesis testing: likelihood ratio, goodness of fit tests; confidence intervals.

120C. Probability and Statistics

(4) STAFF

Prerequisite: PSTAT 120B with a grade C or better.

Hypothesis tests for means of independent samples and tests for paired data; likelihood ratio tests; nonparametric hypothesis tests: sign, rank, and Mann-Whitney tests; chi-squared goodness-of-fit tests and contingency tables; Bayesian methods of estimating parameters and credible intervals.

122. Design and Analysis of Experiments

(4) STAFF

Prerequisite: PSTAT 120A-B.

Linear models; least squares theory; one-way and two-way analysis of variance; multiple comparison procedures; fixed, random, and mixed effects models; basic designs including completely randomized design, randomized blocks design, incomplete block designs, latin squares, factorial and fractional factorial designs; analysis of covariance.

123. Sampling Techniques

(4) STAFF

Prerequisite: PSTAT 120A-B.

An elementary development of the statistical methods used to design and analyze sample surveys. Basic ideas: estimates, bias, variance, sampling and nonsampling errors; simple random sampling with and without replacement; ratio and regression estimates; stratified sampling; systematic sampling; cluster sampling; sampling with unequal probabilities, multistage sampling. Examples from various fields will be discussed to illustrate the concepts including sampling of biological populations, opinion polls, etc.

126. Regression Analysis

(4) STAFF

Prerequisites: PSTAT 120A-B.

Linear and multiple regression, analysis of residuals, variable and model selection including stepwise regression, and analysis of covariance. Other topics may include logistic regression, probit analysis, nonlinear regression and nonparametric regression, and correlation methods.

130. SAS Base Programming

(4) STAFF

Prerequisite: One upper division course in PSTAT, MATH, Computer Science or ECE.

Recommended Preparation: Computer Science 10 or equivalent programming class.

In depth SAS programming course. Topics include importing/exporting raw data files, manipulating/transforming data, combining SAS data sets, generating reports, handling syntax and logic errors. Provides preparation for the SAS Institute Certified Professional (Base Programming) Examination.

131. Data Mining

(4) STAFF

Prerequisite: PSTAT 120A-B, 126, 130.

Introduction to data mining techniques. Model assessment and performance evaluation. Data preparation. Programming techniques for transforming raw data into a form suitable for predictive modeling. Extracting data to a form that predictive models can utilize. Incorporating non numeric data in predictive models. Techniques for managing exceptional and extreme data. Building predictive models using SAS Enterprise Miner 5 in SAS 9, including decision trees and neural networks.

140. Statistical Process Control

(4) STAFF

PREREQUISITE: PSTAT 120A-B.

Topics include, statistical quality control charts for mean, standard deviation, range, fraction defective, and number of defects; sampling by attributes and variables; acceptance sampling, choice of acceptable quality level, average outgoing quality limit and lot tolerance percent defective values.

160A-B. Applied Stochastic Processes

(4-4) STAFF

Prerequisites: Mathematics 5A and 8; and PSTAT 120A with a minimum grade of C.

Random walks, Markov chains, Poisson processes, Markov processes; second order processes, Wiener process stochastic differential equations, optimal prediction, spectral distributions; queueing theory, simulation and applications to mathematical finance.

170. Introduction to Mathematical Finance

(4) STAFF

Prerequisites: PSTAT 120A-B and 160A.

Same course as Mathematics 170.

Recommended preparation: PSTAT 160B and 171.

Describes mathematical methods for estimating and evaluating asset pricing models, equilibrium and derivative pricing, options, bonds, and the term-structure of interest rates. Also introduces finance optimization models for risk management and financial engineering.

171. Mathematics of Compound Interest

(4) STAFF

Prerequisites: Mathematics 3A-B.

Introduction to compound interest. Topics include: measurement of interest, annuities certain, varying annuities, amortization schedules, sinking funds, bonds and related securities, depreciation.

172A. Actuarial Statistics I

(4) STAFF

Prerequisites: PSTAT 120A and 171.

Probabilistic and deterministic contingency mathematics in life and health insurance, annuities, and pensions. Topics include: survival distributions and life tables, life insurance, life annuities, net premiums, net premium reserves.

172B. Actuarial Statistics II

(4) STAFF

Prerequisite: PSTAT 172A.

Net premium reserves, multiple life functions, multiple decrement models, valuation theory for pension plans, insurance models including expenses, nonforfeiture benefits and dividends.

173. Risk Theory

(4) STAFF

Prerequisite: PSTAT 120A.

Utility theory and the economics of insurance, individual risk models for a short term, collective risk models for a single period and for an extended period, applications.

174. Time Series

(4) STAFF

Prerequisite: PSTAT 120A-B.

Stationary and non-stationary models, seasonal time series, ARMA models: calculation of ACF, PACF, mean and ACF estimation. Barlett's formula, model estimation: Yule-Walker estimates, ML method. Identification techniques, diagnostic checking forecasting, spectral analysis, the periodogram. Current software and applications.

175. Survival Analysis**(4) STAFF***Prerequisite: PSTAT 120A-B.*

Properties of survival models, including both parametric and tabular models; methods of estimating them from both complete and incomplete samples, including the actuarial, moment and maximum likelihood estimation techniques, and the estimation of life tables from general population data.

182T. Tutorial in Actuarial Statistics**(1) STAFF***Prerequisites: upper-division standing and consent of instructor.*

May be repeated for credit to a maximum of 3 units.

Problem solving sessions to prepare students for the first four actuarial examinations. Topics corresponding to these examinations (general mathematics, mathematical statistics, applied statistics and mathematics, and actuarial mathematics) will be offered in different quarters.

190AA-ZZ. Special Topics in Statistics**(4) STAFF***Prerequisite: upper-division standing.*

May be repeated up to 12 units provided letter designation is different. Only 8 units of credit allowed for the major.

Information about the special topics to be presented may be obtained from the office of the Statistics and Applied Probability Department.

193. Internship in Statistics**(1-4) STAFF***Prerequisites: upper-division standing; consent of instructor.*

May be repeated for credit to a maximum of 4 units.

Faculty sponsored academic internship in industrial or research firms.

195. Special Topics in Statistics**(1-4) STAFF***Prerequisites: upper-division standing in statistics; consent of instructor.*

Special topics of current importance in statistical sciences. Course content will vary.

199. Independent Studies in Statistics**(1-4) STAFF***Prerequisites: upper-division standing; completion of two upper-division courses in statistics.*

Students must have a minimum grade-point average of 3.0 for the preceding three quarters and are limited to 5 units per quarter and 30 units total in all 98/199/198/199/199AA-ZZ courses combined.

199RA. Independent Research Assistance**(1-4) STAFF***Prerequisites: PSTAT 120A-B-C; a prior upper-division course in Probability and Statistics; upper-division standing; consent of instructor and department.*

Students must have a minimum 3.0 grade-point average for the preceding three quarters and are limited to 5 units per quarter and 30 units total in all 98/199/198/199/199AA-ZZ courses combined.

Coursework shall consist of faculty supervised research assistance.

GRADUATE COURSES

Students enrolling in graduate courses will be expected to have completed PSTAT 120A-B-C or equivalents.

207A-B-C. Statistical Theory**(4-4-4) STAFF***Prerequisites: PSTAT 120A-B-C.*

Univariate and multivariate distribution theory; generating functions; inequalities in statistics; order statistics, estimation theory; likelihood, sufficiency, efficiency, maximum likelihood; testing hypotheses: likelihood ratio and score tests, power; confidence and prediction intervals; Bayesian estimation and hypothesis testing; basic decision theory; linear regression; analysis of variance.

210. Measure Theory for Probability**(4) STAFF***Prerequisite: PSTAT 120A.*

Probability spaces: axioms, sigma-algebras, monotone class theorems, construction of probability measures on measurable spaces. Random variables. Expectations (integral Lebesgue). Product spaces and Fubini theorem. L_2 spaces of random variables.

213A-B-C. Introduction to Probability Theory and Stochastic Processes**(4-4-4) STAFF***Prerequisites: PSTAT 120 A-B (for PSTAT 213A); PSTAT 210 (for PSTAT 213B-C).**Recommended preparation: Mathematics 118A-B-C.*

Markov chains, random walks, branching processes, convergence concepts, laws of large numbers, characteristic functions, weak convergence, central limit theorems, conditional expectations, martingale sequences, introduction to large deviations, ergodic theory, continuous time stochastic processes and Brownian motion.

215A. Bayesian Inference**(4) STAFF***Prerequisite: PSTAT 207A or PSTAT 220A (may be taken concurrently).*

Fundamentals of the Bayesian inference, including the likelihood principle, the discrete version of Bayes theorem, prior and posterior distributions, Bayesian point and interval estimations, and predictions. Bayesian computational methods such as Laplacian approximations and Markov Chain Monte Carlo (MCMC) simulation.

215B-C. Statistical Decision Theory**(4-4) STAFF***Prerequisite: PSTAT 207A-B-C.*

Statistical inference including estimation, testing and multiple decision rules in decision theoretic framework, relationship to game theory, admissibility, optimality including Bayes and minimax rules, empirical and hierarchical Bayes, invariant decisions.

216. Multivariate Analysis**(4) STAFF***Prerequisites: PSTAT 207A-B-C or equivalent.*

Statistical theory associated with the multivariate normal, Wishart and related distributions, partial and multiple correlation, principal components. Hotelling's T^2 -statistic, multivariate linear models, classification and discriminant analysis. Other topics may include invariance, admissibility, minimax, James-Stein estimates, multivariate probability inequalities, majorization, and Schur functions.

217. Advanced Topics in Mathematical Statistics**(4) STAFF***Prerequisite: PSTAT 207A-B-C.*

Repeat Comments: May be repeated for credit provided topics are different.

Topics in mathematical statistics and decision theory including: asymptotics, nonparametric function estimation, design of experiments and linear models, sequential analysis, multiple testing problems, semiparametric inference, directional statistics.

220A. Advanced Statistical Methods**(4) STAFF***Prerequisite: PSTAT 120A-B-C, 122, 126, and Mathematics 108A or equivalents.*

General linear models; regression; analysis of variance of fixed, random, and mixed effects models; analysis of covariance; and experimental design. Discussion of each technique includes graphical methods; estimation and inference; diagnostics; and model selection. Emphasis on application rather than theory. R/SAS Computation.

220B. Advanced Statistical Methods**(4) STAFF***Prerequisite: PSTAT 120A or equivalent.*

Generalized linear models; log-linear models with application to categorical data; and nonlinear regression models. Discussion of each technique includes graphical methods; estimation and inference; diagnostics; and model selection. Emphasis on application rather than theory. R/SAS computation.

220C. Advanced Statistical Methods**(4) STAFF***Prerequisite: PSTAT 220A and Mathematics 108B or equivalents.*

Multivariate analysis. Topics selected from factor analysis; canonical correlation analysis; classification and discrimination; clustering; and data mining. Emphasis on application rather than theory. R/SAS computation.

221A-B-C. Advanced Probability Theory**(4-4-4) STAFF***Prerequisites: PSTAT 213A-B-C.*

May be repeated for credit provided topics are different.

Topics chosen from: Large deviations, random walks, weak convergence in metric spaces, empirical processes, point processes, Gaussian processes, random fields, branching processes, inference for stochastic processes. Applications.

222A-B-C. Advanced Stochastic Processes**(4-4-4) STAFF***Prerequisites: PSTAT 213A-B-C.*

May be repeated for credit provided topics are different.

Topics chosen from: Markov processes, continuous time martingales, theory of Brownian motion and diffusion processes, Lévy processes, stochastic calculus, stochastic differential equations and numerical methods, stochastic control, Applications to engineering, finance, biology, etc.

223A-B-C. Financial Modeling—An Engineering Approach**(4-4-4) STAFF***Prerequisites: PSTAT 213A-B-C.*

An introduction to stochastic models in finance. Stochastic models and applications to price determination for stocks, bonds, derivative securities, interest rate term structure. Portfolio issues, hedging, risk management and financial engineering. Numerical methods and computation.

225. Linear and Nonlinear Mixed Effects Models**(4) STAFF***Prerequisite: PSTAT 220A or equivalent.*

Linear and nonlinear mixed effects models. Topics include fixed effects, random effects, several size experimental units, design structure, treatment structure, randomized block design, nested design, split plot design, repeated measures, growth curves, longitudinal and spatial data, BLUP, ML, and REML estimates.

226. Nonparametric Regression and Classification Methods**(4) STAFF***Prerequisites: PSTAT 207A-B and 220A or equivalents.*

Introduction to some statistical regression and classification techniques including kernel smoothing, smoothing spline, local regression, generalized additive models, neural networks, wavelets, decision tree and nearest neighbor methods.

227. Bootstrap and Resampling Methodology**(4) STAFF***Prerequisites: PSTAT 207A-B and 220A or equivalents.*

Resampling methods: bootstrap and subsampling. Topics: parametric and nonparametric bootstrap simulation; confidence limit methods; resample significance tests, including Monte Carlo and bootstrap; resampling for improved regression model selection and prediction; diagnostics for bootstrap validity.

228. Spline Smoothing and Applications**(4) STAFF***Prerequisite: Statistics & Applied Probability 207A, B, C and 22A.*

Model building, multivariate function estimation and supervised learning using reproducing kernel Hilbert space, regularization and splines. Smoothing splines for Gaussian and non-Gaussian data. Bayesian models and data-driven turning parameter selection. Emphasis on methodology, computation and application.

230. Seminar and Projects in Statistical Consulting**(4) STAFF***Prerequisites: PSTAT 220A-B-C (may be taken concurrently).*

Students participate in the discussions and

consulting projects in the statistical laboratory. They are assigned project(s) to work on, and write a report on statistical aspects of the project.

231. Data Mining

(4) STAFF

Prerequisites: PSTAT 120A-B and 130; and, PSTAT 120C or 126 (may be taken concurrently).

Introduction to data mining techniques. Model assessment and performance evaluation. Data preparation. Programming techniques for transforming raw data into a form suitable for predictive modeling. Extracting data to a form that predictive models can utilize. Incorporating non-numeric data in predictive models. Techniques for managing exceptional and extreme data. Building predictive models using SAS Enterprise Miner 5 in SAS 9, including decision trees, neural networks, and Bayesian Networks.

232. Computational Techniques in Statistics

(4) STAFF

Prerequisites: PSTAT 120A-B-C, 160A-B-C or equivalent. Knowledge of at least one programming language.

Explores computationally-intensive methods in statistics. Topics covered include combinatorial optimization, EM optimization, Monte Carlo simulation, Markov Chain Monte Carlo methods and bootstrapping. Lab work is carried out using R or SAS.

250. Quantitative Methods in the Social Sciences Seminar

(2) STAFF

Same course as Geography 201Q, Sociology 212Q, and ED 212. May be repeated for credit.

Required colloquium course for students in the interdisciplinary Quantitative Methods in the Social Sciences emphasis.

262AA-ZZ. Seminars in Probability and Statistics

(1-6) STAFF

Prerequisites: PSTAT 120A-B-C; consent of instructor.

May be repeated for credit.

Topics of current research interest in probability and/or statistics, by means of lectures and informal conferences with members of staff. PSTAT 262FM is reserved for topics in financial mathematics and statistics.

263. Research Seminars in Probability and Statistics

(1) STAFF

Prerequisite: graduate standing.

Maximum of 2 units total is allowed towards MA degree. May be repeated for credit.

Research seminars presented by faculty, visiting scholars, and invited speakers on current research topics.

274. Time Series

(4) STAFF

Prerequisite: PSTAT 120A-B.

Stationary and non-stationary models, seasonal time series, ARMA models: calculation of ACF, PACF, mean and ACF estimation. Barlett's formula, model estimation: Yule-Walker estimates, ML method. Identification techniques, diagnostic checking, forecasting, spectral analysis, the periodogram. Current software and applications.

275. Survival Analysis

(4) STAFF

Prerequisites: PSTAT 120A-B and 220A.

Basic concepts: survival functions, hazard functions, cumulative hazard functions and censoring types. Kaplan-Meier and Nelson-Fleming-Harrington estimates. Log-rank test. Exponential and Weibull models. Cox proportional hazards and accelerated failure time regression models. Current software and applications.

500. Teaching Assistant Practicum

(1-4) STAFF

Prerequisite: appointment as teaching assistant.

No unit credit allowed toward advanced degree.

Supervised teaching of undergraduate probability and statistics courses.

501. Teaching Assistant Training

(1-2) STAFF

Prerequisite: Appointment as teaching assistant.

Consideration of ideas about the process of learning probability and statistics, and discussion of approaches to teaching.

502. Teaching Associate Practicum

(1-5) STAFF

Prerequisite: appointment as associate.

No unit credit allowed toward advanced degree.

Supervised teaching of undergraduate courses.

510. Readings for Area Examinations

(2-6) STAFF

Prerequisite: enrollment in M.A. or Ph.D. program.

596. Directed Reading and Research

(1-6) STAFF

Prerequisites: graduate standing and consent of instructor.

May be repeated for credit as determined by the department chair up to half the graduate units required for the M.A. degree.

598. Master's Thesis Research and Preparation

(1-6) STAFF

Only for research underlying the thesis, writing the thesis. Instructor should be the chair of the student's thesis committee.

599. Ph.D. Dissertation Preparation

(1-6) STAFF

Prerequisites: graduate standing and consent of instructor. Maximum of 12 units total.

Theater and Dance

(formerly Dramatic Art and Dance)

Department of Theater and Dance
Division of Humanities and Fine Arts
Theater and Dance Building 223
Telephone: (805) 893-3241

E-mail: theaterdance-ugradadv@mail.lsit.ucsb.edu

Web site: www.theaterdance.ucsb.edu

Chair: Simon Williams

Vice Chair & Director of Dance: Jerry Pearson

Faculty

Irwin Appel, Diploma (M.F.A. equivalent), The Juilliard School, Drama Division, Associate Professor (acting, directing)

Risa Brainin, B.F.A., Carnegie-Mellon University, Assistant Professor (acting, directing)

Leo Cabranes-Grant, Ph.D., Harvard University, Assistant Professor (Spanish Golden Age literature, Spanish and Hispanic-American drama, intercultural studies)

John V. Chapman, Ph.D., C.N.A.A., Associate Professor (dance history, criticism)

Nancy Colahan, Lecturer (modern, ballet, pedagogy)

Jody Enders, Ph.D., University of Pennsylvania, Professor (medieval Theater, French drama, performance studies)

Valerie Huston, B.F.A., University of Utah, Lecturer (ballet)

Suk-Young Kim, Ph.D., Northwestern University; Ph.D. University of Illinois at Chicago, Assistant Professor (East Asian and Russian theater)

William Davies King, D.F.A., Yale School of Drama, Professor (American drama and theater history)

Michael Morgan, B.F.A., New York University School of Arts, Lecturer with Security of Employment (voice)

Carlos Morton, Ph.D., University of Texas, Austin, Professor (playwriting, U.S. Latino Theater, Latin American theater)

Delila Moseley, M.A., UC Santa Barbara, Lecturer (student company, jazz, ballet)

Jerry Pearson, B.S., University of Minnesota, Professor (modern technique, choreography, Artistic Director of Santa Barbara Dance Theater)

Christopher Pilafian, The Juilliard School, Lecturer (modern technique, improvisation, choreography, repertory)

Tal Sanders, M.F.A., California Institute of the Arts, Lecturer with Potential Security of Employment (scenic design)

Vickie Scott, M.F.A., UC Los Angeles, Lecturer with Security of Employment (lighting design)

Thomas Whitaker, M.F.A., Carnegie Mellon University, Associate Professor (acting, directing)

Simon Williams, Ph.D., University of East Anglia, Professor (European theater history, dramatic literature)

Emeriti Faculty

Alice Condodina, B.A., Temple University, The Juilliard School, Professor Emerita (modern technique, choreography, repertory)

Stanley L. Glenn, Ph.D., Stanford University, Professor Emeritus (acting, directing)

Theodore W. Hatlen, Ph.D., Stanford University, Professor Emeritus

Dianne Holly, M.A., San Diego State University, Lecturer with Security of Employment (costume design)

Peter Lackner, Ph.D., Institute for Theater Studies, Freie Universität, Berlin, Professor Emeritus (directing, acting)

Peter Mark, M.S., The Juilliard School, Professor Emeritus (music theater)

Judith Olason, Ph.D., University of Utah, Senior Lecturer Emerita (acting, directing)

Robert Potter, Ph.D., Claremont Graduate School, Professor Emeritus (playwriting, dramatic literature)

William R. Reardon, Ph.D., Stanford University, Professor Emeritus (dramatic literature, theory)

Frank W. D. Ries, Ph.D., Indiana University, M.A., Cambridge University, Professor (history, criticism, musical Theater forms)

Rona Sande, M.Ed., College of William and Mary, The Juilliard School, Professor Emerita (modern technique, choreography, dance theory)

Tonia Shimin, Royal Academy, Professor (modern technique, improvisation, production)

Leland K. Strasburg, M.F.A., University of Utah, Senior Lecturer Emeritus (scenic and lighting design)

(In addition to the regular faculty, Dance offers a program of internationally renowned guest artists. Recent guests have included Peggy Baker, Tandy Beal, Joe Goode, Bella Lewitzky, Donald McKayle, Jennifer Muller, Risa Steinberg, Clay Taliaferro, Doug Varone, and Dan Wagoner, among others.)

The Department of Theater and Dance offers four undergraduate and two graduate degrees:

a bachelor of arts (B.A.) and a bachelor of fine arts (B.F.A.) in Dance, a bachelor of arts (B.A.) and a bachelor of fine arts (B.F.A.) in Theater, a master of arts (M.A.) in Theater, and a Doctor of Philosophy (Ph.D.) in Theater. The bachelor of fine arts degrees in dance and theater are designed to prepare students for a professional career. The bachelor of arts degrees are more broadly based, with a liberal arts orientation, which allows students wider curricular choices. All degrees provide a strong background in dance or theater studies. The master of arts program is designed to afford a strong foundation for work in educational or professional theater or for further graduate study. The Ph.D. is an intensive program concentrating in literary, critical, and historical research, designed to prepare students for careers in university teaching.

Undergraduate Program in Theater

Students in the bachelor of arts program in theater will choose an emphasis in one of the following areas: design, directing, playwriting, or theater studies. Students in the bachelor of fine arts program will complete an emphasis in acting.

The major provides ample opportunities for participation in play productions and workshop activities in three campus theaters. Auditions for departmental productions will usually be held in the first week of each quarter. Audition material and information are available in the theater and dance production office at the end of each quarter.

Initial counseling for undergraduates is given in the department office by the staff undergraduate advisor, followed by a meeting with the faculty undergraduate advisor, who will assign each student an individual advisor. Further counseling is provided by the staff undergraduate advisor, faculty undergraduate advisor and the student's individual advisor. Registration for many theater courses requires department approval.

Senior Honors Program

Candidates who are nominated by the faculty and who elect to complete their degrees with departmental honors must submit a proposal for an undergraduate thesis project to be completed during the senior year. The thesis must represent a significant advanced undertaking in an area of either academic research or creative endeavor. The student will receive 4 to 8 units of academic credit in the Theater Art 193H series. The project must be approved by a member of the faculty who will work closely with the student as project supervisor, and be evaluated by a committee including the supervisor and two additional members of the faculty. Distinction in the Major will be awarded at the time of graduation to those students whose projects are declared acceptable.

Undergraduate degrees in Theater

The aim of the department is to provide a comprehensive undergraduate education in theater based on core requirements, which include practical experience in the theater arts (acting, theater technology, and production) and coursework in dramatic theory and literature. An undergraduate major in theater may lead to

specialized creative work in the profession, to graduate work in preparation for teaching and research, or to other careers within or beyond the arts and entertainment industry.

For the B.A. in Theater, students must complete all of the requirements in their chosen emphasis. Prior to declaring an emphasis, students should meet with the faculty undergraduate advisor who will advise how students should plan their course work.

Bachelor of Fine Arts—Theater—Acting Emphasis

The acting emphasis is a highly selective three-year program which students enter in their sophomore year. An audition is required at the end of the freshman year or the beginning of the sophomore year. The program is geared toward preparation for entry into professional conservatory programs, M.F.A. programs, or professional theaters. A more comprehensive description of the philosophy and policies of the B.F.A. acting emphasis is available from the department. Continuation in the program is determined by the acting faculty, using such criteria as clear demonstration of potential talent and professional commitment to the field. Passage to advanced acting uses similar criteria, but more stringent judgment is applied. Transfer students who pass the audition will enter the B.F.A. at the first year of the training program, regardless of class standing with the university. All interested students may request information from the department.

To complete the program for the B.F.A. in acting, the following courses are required, in addition to the core courses:

Lower-division: Theater 1, 5; four units (one course) from 3, 4, or 6; 10A-B-C (must be taken concurrently with 15A-B-C), 11A-B-C (must be taken concurrently with 15A-B-C), 15A-B-C, 26; three units from 29A-B-C-D; 49* (0-4 units); two courses from Dance 44A-B-C-D-E-F; Exercise and Sports Studies 1-13A.

Upper-division: 68-70 units. Theater 110A-B-C-D, 111A-B-C, 112, 149* (0-4 units), six additional units of 149*, 151A-B-C-D-F-G, 188S; four units (one course) from 180A-B-C; four units (one course) from 182AA-ZZ; eight units (two courses) from 180D-E-F-G, 181AA-ZZ, 183AA-ZZ, 184AA-ZZ, 194L, additional courses not used above in 180A-B-C or 182AA-ZZ, and may include one from Asian American Studies 125, Chinese 137, or Japanese 149; additional Theater courses to bring total to a minimum of 68 units.

Note: A minimum of four units of Theater 49 and/or 149 is required for core requirements. An additional six units of Theater 149 in performance are required for the acting emphasis. A maximum of 25 units of Theater 49 and 149 combined will be accepted for credit.

Bachelor of Arts—Theater—Design Emphasis

The design emphasis offers a specialization for students who want intensive and practical training in areas of design and production. Objectives include preparation of students as theater artists for work in professional theater or entry into an M.F.A. program. Students who wish to enter the program should request a faculty advi-

sor in the design area.

Students in this program will select beginning and advanced courses in scenic, lighting, and costume design. Students will supplement these courses with related electives concentrating in technical areas of production and design, including drawing, graphics, rendering, stage painting, stage crafts, construction, history, computer application, and stage management.

Preparation for the emphasis: Theater 1, 3, 19, 21 or 31A, 22, 23, 25, 27A or 27B, 29A-B-C-D, 49.

Upper division requirements: 46 units: Theater 119, 124, 129, 132, 149, 196; two courses from 122, 123, 125; 4 units from 131A-B, 133A-B, 153P, 190, 191, 194D, 195, 195P, 199; two courses in 180 A-B-C-D-E-F; one course in 181AA-ZZ and 182AA-ZZ; one course from Dance 157; Theater 152A, 175, 183AA-ZZ, 184AA-ZZ, 185AA-ZZ, 187AA-ZZ, 188AA-ZZ; Film Studies 111A-B, 148AA-ZZ, 150AA, 165, 166, 169, 190AA-ZZ, 192A-B; Art History 119A-B-C-D-E-F-G; additional Theater electives to bring total to 46 units.

Bachelor of Arts—Theater—Directing Emphasis

The directing concentration is a structured and specialized area of study within the B.A. program, and is intended to provide serious experience of the director's function in today's theater. It offers a sound preparation for an M.F.A. in directing, or for a professional career in the field, which may include directing on various educational levels, including secondary school and college, as well as community and regional theater. The requirements are as follows:

Preparation for the major: Theater 1, 3, 5 and 19; one (four units) of 2, 4, 6, 7, 8, 9, 14, or 75; one unit 29D and one unit 29 A-B-C-D, 49.

Upper division requirements: 44 units: Theater 149, 152A-B-C-D-E, 195; one course from 180A-B-C-D-E-F; one course (four units) from 181 AA-ZZ or 182AA-ZZ; one course (four units) from 183AA-ZZ or 184AA-ZZ; two courses (four units) 104A-B-C, 111D, 133A-B, 140, 144A-B, 145, 175, 185AA-ZZ, 187AA-ZZ, 188AA-ZZ; additional Theater electives to bring total to 44 units.

Bachelor of Arts—Theater—Playwriting Emphasis

The playwriting emphasis is based on a series of courses that require students to practice playwriting, and includes public readings, visiting lecturers, the yearly New Works Festival, and periodic departmental productions of original scripts. All courses require permission of the instructor, and further work in this area might include additional courses in theater studies, creative writing, and theater arts, and perhaps an internship as dramaturge on a departmental production. Coursework in screenwriting is available through the Film Studies Program.

Preparation for the emphasis: Theater 1 and 2; four units (one course) from 3, 4, or 6; four units (one course) from 7 or 8; three or four units (one course) in 5, 9, 14, 19, or 75; one unit 29D and one additional unit from 29A-B-C-D

Upper division requirements: 48 units: 24 units from Theater 104A-B-C-D-E and 175 (104B and 175 may be repeated for a maximum of 8 units each); 4 units (one course) from 180A-F; 4 units (one course) from 181AA-ZZ or 182AA-ZZ; four units (one course) from 183AA-ZZ or 184AA-ZZ; 4 units (one course) from 185AA-ZZ, 187AA-ZZ, 188AA-ZZ; eight units from 111D, 133A-B, 140, 141, 142, 144A-B, 145, 149, 152A-B-C-D-E; Dance 151D, 163.

Bachelor of Arts—Theater— Studies Emphasis

The theater studies emphasis will allow students to achieve broad education in theater as it has been practiced in different historical periods and in various parts of the globe. Students will have the opportunity to engage in the critical, historical, and theoretical aspects of the theater. They will also take practical courses in theater and participate in departmental and class productions. Their studies will culminate in an upper-division seminar, taken in their senior year.

Preparation for the emphasis: Theater 1 and 2; four units (one course) from 3, 4, or 6; four units (one course) from 7 or 8; three or four units (one course) in 5, 9, 14, 19, or 75; one unit 29D and one additional unit from 29A-B-C-D

Upper division requirements: 46 units: Twelve units (three courses) from Theater 180A-B-C-D-E-F, 181AA-ZZ, 182AA-ZZ, 188S; four units (one course) from 183AA-ZZ; four units (one course) from 184AA-ZZ; four units (one course) from 185 AA-ZZ, 187AA-ZZ and 188AA-ZZ; four units from 192; ten units from 104A-B-C-D-E, 111D, 132, 133A-B, 140, 141, 142, 144A-B, 145, 149, 152A-B-C-D-E, 175, and Dance 151D, 151T, 163; eight units (two courses) from Anthropology 102; Art 125; Asian American Studies 125, 127, 142, 147; Chicana/o Studies 158, 166, 188C; Classics 102, 130; Comparative Literature 124; Dance 145A, 145B, 145H, 145M, 146, 157; East Asian Studies 149; English 120 147AA-ZZ, 157, 169; Film Studies 101A-B-C, 120, 121, 122AA-ZZ, 124, 125B, 126, 127, 127M, 134, 136, 139, 142, 144, 151AA-ZZ, 161, 163, 165, 166, 169,183; French 119, 136C. 142, 180D; Italian 121, 123X, 124, 124X; Music 113A-B; Spanish 137A-B, 159A-B, 187A-B.

Graduate Program in Theater

Admission

In addition to departmental requirements for admission, applicants must also meet the university requirements for admission described in the chapter "Graduate Education at UCSB."

Candidates for admission to the Ph.D. program must hold a M.A. or M.F.A. degree from UC Santa Barbara or another institution.

Master of Arts—Theater Studies

The M.A. program is designed to afford a strong foundation for work in educational or professional theater or for further graduate study.

Degree Requirements

Forty-eight units are required for the M.A. degree; at least 12 of these must be taken in graduate seminars (Theater 210- 273D). In addition,

16 units must be related to practical study of the theater; 8 of these units must be from the 261-266 sequence. Degree candidates must complete a satisfactory thesis project and pass a two-hour oral examination upon completion of the work. A minimum of 4 and a maximum of 8 units should be committed to the thesis project. Consult the department for details on courses taken for the master's degree. When graduate students enroll in upper-division undergraduate courses to fulfill departmental and university requirements, they are normally expected to achieve a higher standard of work than undergraduates enrolled in the same courses.

Masters candidates who have clearly revealed their scholarly and creative ability may petition the department for admission to the Ph.D. program. The deadline for petitions is the same as the deadline for outside application to the Ph.D. program.

Playwriting Program. With the approval of the program director, graduate students may undertake a playwriting project in partial fulfillment of M.A. degree requirements. Interested M.A. applicants should submit a sample of their work to the playwriting program director.

M.A./Ph.D. Track. A limited number of applicants who have only a B.A. at the time of application and who show unusual promise for doctoral study may be admitted to the combined M.A./Ph.D. program. During the first two years, they are expected to fulfill all requirements (coursework and thesis) for the M.A. program. They must also pass a written examination in the middle of the second year, at which point they are admitted to the doctoral program. Students who successfully pursue this track need to complete only one further year of coursework before taking the comprehensive examinations and writing the dissertation. All other degree requirements are as listed in the separate degree program sections.

Doctor of Philosophy— Theater Studies

The Ph.D. program, an intensive program concentrating on literary, critical, and historical research in various areas of world theater and performance, is designed to prepare students for careers in teaching in institutes of higher education.

Degree Requirements

A heavy sequence of courses in dramatic literature, theater history, theory, and criticism in various areas of world theater and performance is taken over a period of two years for students in the Ph.D. program, or three years for M.A./Ph.D. students. All doctoral students are expected to take two seminars a quarter, or the equivalent, in departmental seminars and lectures or in cognate offerings in other departments. All students in the Ph.D. program take a minimum of nine departmental seminars in the first two years; all students in the M.A./Ph.D. program take fourteen departmental seminars in the first three years. They will also have the opportunity of engaging in independent study with members of the graduate faculty in theater art. Graduate students will have the opportunity to study the history and technique of directing, and to apply to take an additional technique

course in which they may direct a one-act play. This course may be repeated for credit if space is available. Qualified students may also have the opportunity to direct in the department's mainstage season or to participate as directors in the development of new work.

All doctoral students must establish reading knowledge of at least one language other than English and proficiency in translation prior to advancing to candidacy. A grade of Pass or better in an upper-division course taught in the chosen language or a B or better in an intermediate language training course will suffice to establish basic competency. Language competency can also be established by taking the departmental translation examination or by taking a placement examination in a foreign language department and placing into the advanced level. The translation component of the requirement can be met by taking a graduate seminar in the Department of Theater and Dance (or another department when the seminar is not offered in DA), in which such issues as translation, cultural transmission, and adaptation are addressed. For those writing a dissertation on a non-English subject, demonstrated oral and written proficiency in the relevant language(s) is required. Students cannot take their comprehensive examination until they have completed the language and translation requirement. At the start of the third year for Ph.D. students and the fourth for M.A./Ph.D. students, the candidate must pass a comprehensive examination that is composed of four parts: (1) the creation of three course syllabi in theater history, dramatic literature, theory and criticism, and world theater and performance; (2) two written examinations in areas cognate to the candidate's research; (3) a preparation of a dissertation prospectus; and (4) an oral defense of the examination answers and material. Upon successful completion of this examination, the student will be recommended for advancement to candidacy.

The third and fourth years in the Ph.D. program and the fourth and fifth in the M.A./Ph.D. program are spent researching and writing the dissertation. Approximately 36 units in the third year for Ph.D. students and the fourth year for M.A./Ph.D. students will be devoted to dissertation work. Students whose dissertations are not completed by the end of the fourth year of the Ph.D. program or the fifth year of the M.A./Ph.D. program will be subject to review by the graduate faculty of the department.

Doctoral students in Theater Art are required to serve as teaching assistants for six quarters.

Optional Ph.D. Emphasis in Women's Studies

The Women's Studies Program, with almost fifty core and affiliated faculty members in over nineteen disciplines, serves as a model of interdisciplinary work and scholarly collaboration at UCSB. Women's Studies doctoral emphasis students are required to complete successfully four seminars that will enhance their understanding of feminist pedagogy, feminist theory, and topics relevant to the study of women, gender and/or sexuality. Women's Studies as an inter-departmental set of conversations and intellectual questions supports a multifaceted undergraduate curriculum at UCSB. Graduate

emphasis students are encouraged to apply to teach Women's Studies courses as teaching assistants and associates as part of their Women's Studies training.

Applicants must first be admitted to, or currently enrolled in, a UCSB Ph.D. program participating in the Women's Studies graduate emphasis: Anthropology; Comparative Literature; Counseling, Clinical, and School Psychology; English; French and Italian; Germanic, Slavic and Semitic Studies; History; History of Art and Architecture; Political Science; Religious Studies; Sociology; Spanish and Portuguese; or Theater and Dance. Candidates complete four graduate courses and select a member of the Women's Studies faculty or affiliated faculty to serve on their dissertation committees. Applications to the Women's Studies Doctoral Emphasis may be submitted at any stage of Ph.D. work, and applications will be considered throughout the year.

The Graduate Curriculum

Students pursuing the emphasis in Women's Studies will successfully complete four graduate courses. Only one may be taken in the student's home department.

- 1. Issues in Feminist Epistemology and Pedagogy (Women's Studies 270).** A one-quarter seminar that considers Women's Studies as a distinct field. It offers an interdisciplinary exploration of feminist theories of knowledge production and teaching practices. Readings cover past and present critical debates and provide theoretical approaches through which to analyze interdisciplinary epistemological and pedagogical issues.
- 2. Special Topics in Women's Studies (594 AA-ZZ).** A one-quarter seminar offered by a Women's Studies faculty member on topics of central concern to the field of Women's Studies.
Or,
Research Practicum (Women's Studies 280). A cross-disciplinary seminar in which fundamental questions in contemporary feminist research practice are considered in light of students' own graduate projects. Students may fulfill the Area 2 requirement by taking either a Special Topics Seminar or the Research Practicum.
- 3. Feminist Theories.** A one-quarter graduate seminar in feminist theory offered by any department, including Women's Studies.
- 4. Topical Seminar.** A one-quarter graduate seminar, outside the student's home department, that addresses topics relevant to the study of women, gender, and/or sexuality.

Optional Ph.D. Emphasis in European Medieval Studies

The Medieval Studies Program offers an interdisciplinary doctoral emphasis to students previously admitted to a Ph.D. program in the Departments of Theater and Dance, English, French and Italian, History, History of Art and Architecture, Music, Religious Studies, and Spanish and Portuguese. Students pursuing the emphasis in European medieval studies must receive a grade of B or better in each of the following: Medieval Latin (Latin 103); one course in a vernacular, western European or

Middle Eastern medieval language (English 205, English 230, French 206, Spanish 222A, Spanish 222B, Portuguese 222, Religious Studies 148A, Religious Studies 148 B, Religious Studies 210); Paleography and/or Diplomatics (History 215S, History 215T); Medieval Studies 200A-B-C; and 8 additional units in graduate courses on medieval topics. Students may petition to have appropriate courses from other institutions, or independent study, substituted for these requirements. Medieval Studies 200A-B-C is the program's colloquium series; graduate students in the emphasis attend the series and write brief papers on each colloquium (one per term), to be reviewed by the chair of the program (2 units). To qualify for the emphasis, at least one member of a Ph.D. candidate's dissertation committee must be an affiliated faculty member of the European Medieval Studies Program. Contact the European Medieval Studies Program for additional information on faculty interests, course offerings, and program requirements, or visit our Web site at www.medievalstudies.ucsb.edu.

Undergraduate Program in Dance

The dance major offers two degree programs, the bachelor of arts (B.A.) and the bachelor of fine arts (B.F.A.). Although the curriculum for both emphasizes performance and choreography, the bachelor of fine arts degree is highly structured and specifically designed for those students who wish to pursue a professional career in dance or gain entrance into an M.F.A. or M.A. program. The bachelor of arts option is a broadly based liberal arts degree that allows more time for students to take courses in areas other than dance, preparing them for further study in such dance career areas as therapy, administration, history, or education. Graduates from either of the degree programs can teach in a variety of situations. Students with a bachelor's degree in dance who are interested in pursuing a California Teaching Credential should contact the credential advisor in the Gevirtz Graduate School of Education as soon as possible.

Students who wish to major in dance must pass the department audition. Auditions are held on campus in January and February prior to university admission. Auditions are offered again during fall registration week for those unable to attend the earlier auditions. Admission into the university is no guarantee of admission into the dance major unless an audition has been passed. Likewise, acceptance at the dance audition does not guarantee admission to the university. Audition details may be obtained by writing directly to the Department of Theater and Dance or visiting www.dramadance.ucsb.edu.

As a dance major, a student must take a minimum of eight technique classes per week (modern and ballet). For graduation, the B.A. student must fulfill the minimum proficiency requirement in technique by passing Dance 47F (Ballet II) and Dance 156C (Modern Dance III). The minimum proficiency requirement for the B.F.A. student is Dance 147C (Ballet III) and Dance 156F (Modern Dance IV). For seniors in the B.A. degree program, an option is available

which allows a reduced course load in technique once the minimum proficiency is met.

Each student is assigned a faculty advisor, and new and continuing students are strongly urged to meet with their advisor at least once a year, preferably once each quarter. Students also receive quarterly evaluation on their progress in dance courses.

Santa Barbara Dance Theatre is a professional dance company in residence at UCSB. The company of six dancers performs locally and statewide, providing an important resource for the department as well as a valuable outreach program to the community. A select number of advanced students are chosen for the UCSB Dance Company. This student company performs both on and off campus in Santa Barbara, tours regionally, and has been invited to Mexico twice to perform. In addition, the company participates in the American College Dance Festival Association, traveling to other states throughout the U.S. to perform. The UCSB Dance Company participates in 20-25 performances each year, giving its members a chance to experience life on tour with a dance company, preparing them for the professional world.

Scholarships and Awards

The Matthew Alan Plaskett Memorial Scholarship is offered annually to an incoming male who wishes to be a dance major or a double major in theater and dance with an interest in musical theater. The Patricia Sparrow Memorial Fund is awarded to dance students to further their education at summer workshops. The annual Sherrill C. Corwin-Metropolitan Theaters Corporation Writing Awards offer prizes for outstanding choreography by UCSB students. The Condodina Award is presented annually for outstanding performance. Further information about these scholarships and awards as well as audition material and a brochure describing course offerings, major requirements, and faculty background information is available from the undergraduate advisor.

Senior Honors Program

Candidates who are nominated by the faculty, and who elect to complete their degrees with departmental honors, must submit a proposal for an undergraduate thesis project to be completed during the senior year. The project must represent a significant advanced undertaking in an area of either academic research or creative endeavor and must be approved by a member of the faculty who will serve as project supervisor. The student will receive 4 to 8 units of academic credit in the Dance 193H series. The project will be evaluated by a committee including the supervisor and two additional members of the faculty. Distinction in the Major will be awarded at the time of graduation to those students whose projects are declared acceptable.

Bachelor of Fine Arts—Dance

Preparation for the major. Dance 36, 45, 47A-B-C-D-E-F, 50, 51, 56A-B-C-D-E-F, 58, 70; Theater 5, 19, 23D, 2 units of 29 series or 49; Music 15; Exercise and Sports Studies 47

Upper-division major. *Note: Entry into the B.F.A. program is by recommendation of dance faculty for currently enrolled students, and by special audition at the beginning of the junior year*

for transfer students. Completion of the program depends upon successful progress and recommendation of the dance faculty. Assessment of a B.F.A. student's progress is made on a quarterly basis, and provision is made for students who appear unable to complete the B.F.A. program requirements to graduate with the less specialized B.A. degree providing they maintain the standards for that degree. Sixty-eight upper-division units are required, as follows: One course from Dance 145A-B-H-M-W or 157; 147A-B-C, 149 (4 units), 151A-B-C, 156A-B-C-D-E-F, 171, 172, 191, as well as 12 additional units selected from Dance 139, 145A*-B*-H*-M*-W*, 146, 147A-B-C beyond units used above, 147PA-PB-PC, 149, 151D, 151E, 151T, 157*, 158, 160, 161A, 163, 186, 189, 190, 193H, 194, 199.
* if not chosen above.

Bachelor of Arts—Dance

Preparation for the major. Dance 36, 45, 47A-B-C-D-E-F, 50, 51, 56A-B-C-D-E-F, 58, 70; Theater 19, 23D, 2 units of 29 series or 49; Music 15; Exercise and Sports Studies 47.

Upper-division major. Note: Technical ability and theoretical knowledge must be demonstrated to the satisfaction of the dance faculty before entrance to upper-division study. Students should contact the dance faculty for program planning advice, in order to insure the best possible sequence of study. Thirty-six upper-division units are required, as follows: One course from: Dance 145A-B-H-M-W or 157, 149 (1 unit), 151A-B-C, 156A-B-C, as well as 10 additional units selected from Dance 139, 145A*-B*-H*-M*-W*, 146, 147A-B-C, 147PA-PB-PC, 149, 151D-E-T, 156A-B-C beyond units used above, 156D-E-F, 157*, 158, 160, 161A, 163, 171, 172, 186, 189, 190, 193H, 194, 199.

* if not chosen above.

Theater Courses

(formerly Dramatic Art Courses)

LOWER DIVISION

1. Play Analysis

(4) STAFF

Provides the theater artist with practical tools for text analysis. Studying five major works ranging from Shakespeare to a living playwright, the course examines such concepts as language, style, period, character, themes, and structure.

2. Performance in Global Contexts

(4) CABRANES-GRANT

An introduction to theater and performance in the non-European world. Topics in any given year could include African Popular Culture, Asian Theater, Comparative World Theater, and Latin American Theater.

3. Life of the Theater

(4) APPEL

An introduction to live theater and an exploration of its components, from acting, directing and design to production, dramaturgy and playwriting. Students attend a wide variety of theatrical presentations, as well as read plays and other dramatic writings.

4. Performing the Here and Now

(4) IIZUKA

Students explore how contemporary theater responds to a twenty-first century world. Looking at the work of cutting-edge playwrights, solo performers, and ensemble theater groups, the course examines how theater grapples with political and social issues facing us at the start of a new century.

5. Introduction to Acting

(3) STAFF

Introduction for majors and nonmajors to the multiple problems of the actor's art and craft. (F,W,S)

6. Behind the Scenes

(4) STAFF

Course features guest artists ranging from producers, actors, designers, musicians, and singers. Students gain knowledge of the performers experience and process through lectures and discussion in an informal atmosphere.

6S. Acting Workshop

(2-4) STAFF

Laboratory for voice, movement, and acting.

7. Performance of the Human Body

(4) KIM

A study of how various kinds of performance genres represent the human body in modern and contemporary American culture. Material includes traditional stage performance, film, freak shows, beauty pageants, dance, sports, music videos, and fashion.

8. European Theater History

(4) WILLIAMS

A survey of European theater history from the ancient Greeks to the present day.

9. Playwriting

(4) IIZUKA

Prerequisite: open to theater majors only.

An introduction to playwriting.

10A-B-C. Movement for the Stage

(2-2-2) DONLON

Prerequisites: Theater 5; concurrent enrollment in Theater 15A (for Theater 10A); audition: concurrent enrollment in Theater 15B (for Theater 10B); audition: concurrent enrollment in Theater 15C (for Theater 10C); audition.

May be repeated once for credit with recommendation of instructor.

Intense physical training designed to produce a neutral, dynamic, and expressive bodily instrument. (F,W,S)

11A-B-C. Voice Laboratory

(2-2-2) MORGAN

Prerequisites: Theater 5; concurrent enrollment in Theater 15A (for Theater 11A); audition: concurrent enrollment in Theater 15B (for Theater 11B); audition: concurrent enrollment in Theater 15C (for Theater 11C); audition.

May be repeated once for credit with recommendation of instructor.

A fundamental approach to voice for the actor with emphasis on vocal production, articulation, and quality; plus physical relaxation techniques. (F,W,S)

14. Acting Workshop

(3) STAFF

Prerequisites: Theater 5; not open to freshmen.

Designed for nonspecialists in drama.

Exploration, performances, and criticism of scenes from a broad range of dramatic scripts with focus on the actor's perspective. Practical skills are taught to make the physical exploration of the text a valid exercise.

14S. Summer Acting Workshop

(2-4) STAFF

Laboratory for voice, movement, and acting. (SS)

15A-B-C. Fundamentals of Acting

(4-4-4) STAFF

Prerequisites: Theater 5; concurrent enrollment in Theater 10A and 11A (for Theater 15A); audition: concurrent enrollment in Theater 10B and 11B (for Theater 15B); audition: concurrent enrollment in Theater 10C and 11C (for Theater 15C); audition.

May be repeated once for credit with recommendation of instructor.

Development of the intermediate actor's foundational work in improvisation, technique, scene study, textual analysis, and characterization while exploring creative capacity.

16A. Fundamentals of Voice

(3) MORGAN

Prerequisite: not open to theater majors.

Not open for credit to students who have completed Theater 16.

A basic approach for the actor in freeing the voice, dismantling tension, centering sound, releasing breath, developing range and expressive power, culminating in an hour-long warm-up to be utilized for rehearsal and performance.

16B. Phonetics for Actors and Public Speakers

(3) MORGAN

Prerequisite: not open to theater majors; not open to freshmen.

An introduction to general American with an emphasis on the international phonetic alphabet and the rules governing standard English to be utilized in the performance of various famous speeches.

17. Fundamentals of Movement for Theater

(3) DONLON

Prerequisite: not open to theater majors.

The fundamental exploration of actor movement training for non-B.F.A. actors, directors, and dancers.

19. Design Fundamentals for Dance and Theater

(4) STAFF

Not open for credit to students who have completed Theater 19 or 19D.

Lectures, demonstrations and projects to provide an understanding of the stage design process for theater and dance. Study of the elements, principles, terminology, and basic techniques. Exploration of the communicative and collaborative process between designer and choreographer/director. Concentration in scenic, costume, and lighting design.

21. Stagecrafts

(2) STAFF

Practical introduction to technical theater and includes attention to such aspects of design and production as scenery, lights, sound, costumes, and stage management.

22. Scenic Design

(4) SANDERS

Prerequisites: Theater 1 and 19.

Projects in the interpretation of plays through scenic elements with concentration on the design process and the dramatic use of space. Drafting projects including floor plans, elevations, and basic perspective drawing.

23. Stage Lighting Design

(4) SCOTT

Prerequisite: Theater 19.

Lecture-demonstration in instrumentation, color in light, control equipment and basic lighting theories. Technical drawing including light plots, scheduling and organization for lighting design. Some practical application through laboratory and studio exercise.

23D. Dance Lighting Design

(3) SCOTT

Prerequisite: Theater 19D.

Lecture-demonstration in instrumentation, color in light, control equipment, and basic lighting theories. Practical application through laboratory assignments and studio productions.

25. Costume Design

(4) HOLLY

Prerequisite: Theater 19.

Exploration of the basic elements and principles of theater costume design. Projects in the interpretation of plays through costume elements with concentration on the design process. Emphasis on figure drawing.

26. Stage Makeup

(2) STAFF

The theory, history, and practical application of stage makeup including character, age, period, and special effects techniques.

27A. Theater Graphics and Figure Drawing

(2) HOLLY, SANDERS

Introduction to sketching and drawing styles for the theater designer. Includes light and shade, perspective, and line drawing. Focus on drawing the human form, rendering of fabric, texture and movement.

27B. Theater Drafting**(2) SANDERS, SCOTT**

Introduction to drafting conventions for the scenic and lighting designer. Includes orthographic and isometric drawings.

28. Computing For Theater Arts**(4) SANDERS**

Macintosh platform using VectorWorks software. Advanced applications for graphics and rendering software for the theater designer and a survey of specialized support software such as LightWright.

29A. Scenic Practicum**(1) STAFF**

Letter grade only.

Empirical understanding of methods of assembly and materials for stage scenery. Shop organization and operation are experienced during the construction process.

29B. Lighting Practicum**(1) SCOTT**

Letter grade only.

Empirical understanding of optical properties of lighting units, available hanging positions and apparatus, lighting control, electrical safety and stage crew organization.

29C. Costume Practicum**(1) HOLLY**

Letter grade only.

Empirical understanding of methods of assembly and materials for stage dress. Costume shop organization and operation are experienced during the construction process.

29D. Run Crew Practicum**(1) HOLLY, SCOTT**

Letter grade only.

Empirical understanding of backstage organization and operation during live performance.

31A. Costume Construction**(2-4) STAFF**

Prerequisite: Theater 29C.

Introduction to materials and construction techniques used in the production of theatrical costumes.

31B. Costume Techniques**(2-4) STAFF**

Prerequisite: Theater 29C.

Introduction to process of constructing specialized costume crafts such as millinery, masks, and theatrical wigs. Subject matter varies by quarter.

42.I.V. Live**(2) STAFF**

Prerequisite: lower-division standing.

A maximum of 16 units of Theater 42 and 142 combined may be accepted for credit in the major.

This course produces a weekly performance series in Isla Vista. Students get first-hand experience in the rigors of theatrical production, as they learn to execute all logistical, technical, and promotional details. The course is affiliated with Isla Vista Arts (www.islavista-arts.org).

49. Theater Workshop**(1-6) STAFF**

Prerequisite: lower-division standing.

A maximum of 25 units of theater 49 and 149 combined may be accepted for credit in the major.

Projects in costume, scenery, lighting, acting, directing.

65. Public Speaking**(4) ENDERS**

Practical and historical introduction to the art of public speaking in a variety of contexts (legal, political, corporate, artistic, dramatic, educational, etc.). Main lecture focuses on critical and historical analysis of actual speeches; lab offers practical training in performing them.

75. Summer Theater Laboratory**(4) IIZUKA**

Workshops in playwriting, solo performance, acting, directing, and choreography. Students develop their own projects and take master classes with nationally prominent guest artists. Students also have the opportunity to perform in projects by guest artists.

90. Community Theater**(3) STAFF**

May be repeated for credit to a maximum of 9 units, but only 3 units may be applied to the major.

Recommended preparation: Theater 5.

Preparation and creation of performances in UCSB community related to student health issues (i.e., binge drinking, sexual health, eating disorders, relationship success) adapted to campus life.

91. Summer Theater in Orientation**(3) STAFF**

May be repeated for credit to a maximum of 9 units, but only 3 units may be applied to the major.

Exploration of relationships between health, social setting, and health behaviors. Students study the principles and skills of community health using drama as a behavioral change tool. Students are trained to be peer health educators.

94. Group Studies for Lower-Division Students**(1-4) STAFF**

Prerequisite: open to freshmen and sophomores only.

May be repeated for credit to a maximum of 8 units.

Special opportunities for study, research, and project preparation.

UPPER DIVISION**104A. Essentials of Playwriting****(4) IIZUKA**

Prerequisites: Not open to freshmen; consent of instructor.

May be repeated for credit to a maximum of 8 units.

An exploration of the essential components of playwriting. Exercises focus on writing dialogue, monologue, creating three-dimensional characters, building effective story structures, and developing action through language and stage images. A series of written assignments.

104B. The Writer's Voice**(4) IIZUKA**

Prerequisite: consent of instructor.

May be repeated for up to 8 units of credit.

A continued exploration of the essential components of playwriting. Writing exercises in dialogue, monologue, character, story structure, action, and stage images. Students focus on developing their individual writing voice. A series of written assignments.

104C. From Page to Script**(4) IIZUKA**

Prerequisite: Theater 104A or 104B or 104D.

May be repeated for up to 8 units of credit.

An exploration of the ways in which plays move from the written page to the stage. Focuses on how playwrights collaborate with directors, actors, and designers in staging new plays.

104D. Story Structure**(4) IIZUKA, MORTON**

Prerequisites: not open to freshmen; consent of instructor.

May be repeated for credit to a maximum of 8 units.

An exploration of different kinds of story structures and techniques. Students look to stories from their own lives and/or to found texts for source material. A series of written assignments.

104E. Solo Performance**(4) IIZUKA**

Prerequisite: consent of instructor.

May be repeated for credit for up to 8 units.

Writing and developing solo performance texts. Analysis of different kinds of solo performance texts and writing styles. Emphasis is on non-traditional forms of storytelling and developing each writer's individual writing voice. A series of written assignments.

110A-B-C. Advanced Movement for the Stage**(2-2-2) DONLON**

Prerequisites: Theater 10C; concurrent enrollment in 151A (for Theater 110A); concurrent enrollment in

151B (for Theater 110B); concurrent enrollment in 151C (for Theater 110C).

May each be repeated once for credit by recommendation of instructor.

A continuation of the Dramatic Art 10 series with increased focus on physical characterization and technical skills.

110D. Advanced Performance Projects**(3) DONLON**

Prerequisite: Theater 110C.

Advanced studio projects utilizing the actor's physical and vocal skills to develop original theater.

111A-B-C. Advanced Voice Laboratory**(2-2-2) MORGAN**

Prerequisites: Theater 15A-B-C; concurrent enrollment in 151A (for Theater 111A); concurrent enrollment in 151B (for Theater 111B); concurrent enrollment in 151C (for Theater 111C).

May each be repeated once for credit by recommendation of instructor.

Advanced problems in voice for the actor with continued emphasis on craft, plus the creative and expressive uses of the voice with the body.

111D. Dialects for the Stage**(3) MORGAN**

Prerequisite: not open to freshmen.

The study of dialects that are often necessary for students pursuing a professional career in theater. Use of video and audio tapes as well as phonetics to analyze and physicalize a minimum of six dialects.

111E. Advanced Accents for the Stage**(3) MORGAN**

Prerequisites: not open to freshmen; consent of instructor.

Examines accents where English is a second language. Six accents are covered, which may include French, German, Italian, Japanese, Russian, Spanish, and Swedish.

112. Senior Voice Laboratory**(2) MORGAN**

Prerequisite: Theater 111C.

May be repeated once for credit.

Seminar in advanced voice work for senior students in B.F.A.-Acting program. Concentration on projects to find a personal voice in the theater.

113AA-ZZ. Advanced Speech for the Stage**(4) MORGAN**

Prerequisite: upper-division standing.

May be repeated if letter designations are different.

The Study of European based accents, varieties of American regional speech, and accents of international English through the use of phonetics, audio visual tools, monologues and scenes.

119. Design Critical Studies**(3) SCOTT**

Prerequisite: Theater 19.

May be repeated for credit to a maximum of 6 units with instructor consent.

Advanced investigation of the communication and collaboration process between designers and directors. Concentration on the script analysis process for mounting a production.

121. Advanced Theater Production**(2) STAFF**

Prerequisites: Theater 21; and, Theater 22 or 23 or 25; consent of department.

May be repeated for credit to a maximum of 6 units with consent of instructor.

An investigation of problems in planning, drafting, construction, scenic crafts, special effects, properties, automated fixtures, show control, safety, and rigging of stage scenery.

122. Advanced Scenic Design**(2-4) SANDERS**

Prerequisites: Theater 1 or 60; and Theater 19, 22 and 27B; consent of department.

May be repeated for credit to a maximum of 7 units with consent of instructor.

Concentration on various set design problems including period and style. Includes drawing, drafting of plans and elevations and rendering techniques.

123. Advanced Stage Lighting Design
(2-4) SCOTT

Prerequisites: Theater 1, 19, 23, and 27B.

May be repeated for credit to a maximum of 7 units with consent of department.

Lecture-demonstration of controllable properties and functions of light. Includes technical drawing: light plots, scheduling and organization for lighting design, drawing using light and shadow, perspective drawing. Practical application through studio exercise.

124. Design Portfolio
(2-4) HOLLY, SANDERS, SCOTT

Prerequisites: Theater 122 or 123 or 125; upper-division standing.

May be repeated for credit to a maximum of 7 units with consent of instructor.

Exploration of advanced design projects with concentration on individual portfolios.

125. Advanced Costume Design
(2-4) HOLLY

Prerequisites: Theater 1, 19, and 25.

May be repeated for credit to a maximum of 7 units with consent of instructor.

Execution of theoretical costume design projects. Concentration on various costume design problems including period, style, rendering techniques and figure drawing.

129. Painting for the Stage
(2) SANDERS

Prerequisite: consent of department.

May be repeated for credit to a maximum of 8 units with instructor consent.

Advanced work in scenic painting including special textures, foliage, trompe-l'oeil effects as used for stage.

131A. Advanced Costume Construction
(2-4) HOLLY

Prerequisites: Theater 29C and 31A.

May be repeated for credit to a maximum of 7 units with instructor consent.

Exploration of advanced draping, drafting, and tailoring techniques used in theatrical costume design.

131B. Advanced Costume Techniques
(2-4) HOLLY

Prerequisites: Theater 29C and 31A.

May be repeated for credit to a maximum of 7 units with instructor consent.

Exploration of advanced costume crafts techniques including pattern development as it relates to corset construction. Period undergarment research and construction. Subject matter varies by quarter.

132. History of Decorative Styles
(4) HOLLY, SANDERS, SCOTT

A survey of the evolution of design styles and production trends in western theater, emphasizing the history of design and designers, including a study of both interior and exterior decoration with concentration on furnishing, accessories and the changing patterns of culture.

133A. History of Costume I
(4) HOLLY

Not open for credit to students who have completed Theater 133.

A survey of the development of western clothing and costume from Biblical times to the Restoration as related to the changing patterns of culture. Short survey of non-Western clothing and costume.

133B. History of Costume II
(4) HOLLY

Not open for credit to students who have completed Theater 133.

A survey of the development of western clothing and costume from early Georgian to the present as related to the changing patterns of culture. Short survey of non-Western clothing and costume.

140. Advanced Acting Workshop
(4) STAFF

Prerequisites: Theater 5 and 14; upper-division standing.

Advanced exploration, performances, and criticism of scenes from a broad range of dramatic scripts with focus on the actor's perspective. Practical skills are taught to make the physical exploration of the text a valid exercise.

142.I.V. Live
(2) STAFF

Prerequisite: upper-division standing.

A maximum of 16 units of Theater 42 and 142 combined may be accepted for credit in the major.

This course produces a weekly performance series in Isla Vista. Students get first-hand experience in the rigors of theatrical production, as they learn to execute all logistical, technical, and promotional details. The course is affiliated with Isla Vista Arts (www.islavista-arts.org).

144A-B. Shakespeare Production**(3-3) APPEL**

Prerequisite: consent of instructor.

A 2-quarter, in-progress sequence with both grades given upon completion of Theater 144B.

Students study, rehearse and produce one of Shakespeare's plays. The class culminates with performances that are open to the public during the final week. Students can participate as actors, assistant directors, designers or stage managers. (M)

145. Oregon Shakespeare Festival Tour
(1-4) APPEL

There is a separate materials fee for this course that includes admission to all events and lodging in Oregon. Travel and meals are not included and are the responsibility of each student.

Students study one or more plays being performed at the Oregon Shakespeare Festival. While in Ashland, students attend 7-8 performances, take a backstage tour and participate in workshops and lectures led by members of the company.

149. Theater Workshop
(1-6) STAFF

Prerequisite: upper-division standing.

A maximum of 25 units of Theater 49 and 149 combined may be accepted for credit in the major.

Projects in costume, scenery, lighting, acting, directing.

151A-B-C. Advanced Acting
(4-4-4) STAFF

Prerequisites: Theater 15C and 162; and concurrent enrollment in Theater 110A and 111A (for Theater 151A); concurrent enrollment in 110B and 111B (for Theater 151B); concurrent enrollment in 110C and 111C (for Theater 151C).

May each be repeated once for credit by recommendation of instructor.

Scene work and exercises exploring various acting styles which may include Greek, Artaud, Shakespeare, period comedy and farce, and Absurd.

151D. Advanced Acting: Modern Trends
(4) STAFF

Prerequisite: Theater 151C.

Study and performance of contemporary acting developments.

151F. Senior Auditions
(3) STAFF

Prerequisites: Theater 151C.

May be repeated once for credit.

Preparation and study of material and techniques for professional and graduate school audition.

151G. Alternate Acting Styles
(4) STAFF

Prerequisite: Theater 151C.

Continued work in performance styles and other skills.

151S. Senior One-Person Shows
(3) STAFF

Prerequisite: Theater 151C.

Individually researched performance projects.

152A. Introduction to Stage Directing
(4) WHITAKER, APPLE, BRAININ

Prerequisite: Upper-division standing; consent of instructor.

Recommended Preparation: Thtr 1, 5, 14, 19, and 29A-B-C-D. This course is not open to students who have taken Theater 152.

Basic principles and practice of directing. Lectures, demonstrations, and projects to give the nonspecialist and potential directing emphasis student a general idea of the directorial process. (F)

152B. Techniques of Directing
(4) STAFF

Prerequisites: Theater 1, 14, 19, and 152.

Laboratory in directorial scene work.

152C. Advanced Directing**(4) STAFF**

Prerequisites: Theater 152B.

Advanced directing techniques and scene work, including departures of realism.

152D. Directorial Production**(4) STAFF**

Prerequisites: Theater 152C.

Study and performance of contemporary acting developments.

152E. Projects in Directing**(4) STAFF**

Prerequisites: Theater 152D.

Special projects for the advanced director.

153P. Projects in Design and Production
(1-6) STAFF

Prerequisite: upper-division standing.

Not open for credit to students who have completed Theater 153E.

Special projects in each area of concentration.

175. Summer Theater Laboratory
(4) IIZUKA

May be repeated for credit to a maximum of 8 units.

Workshops in playwriting, solo performance, acting, directing, and choreography. Students develop their own projects and take master classes with nationally prominent guest artists. Students also have the opportunity to perform in projects by guest artists.

180A. American Drama to 1940
(4) KING

Not open for credit to students who have completed Dramatic Art 155A.

History of the American drama and theater from early years to 1940. Important plays, performers, institutions, and styles of production will be given selective attention.

180B. American Drama 1940 to Present
(4) KING

Not open for credit to students who have completed Dramatic Art 155B.

History of the American drama and theater from 1940 to the present. Important plays, performers, institutions, and styles of production are given selective attention.

180C. Contemporary American Drama and Theater**(4) IIZUKA**

Not open for credit to students who have completed Dramatic Art 155C.

Close study of major playwrights, directors, solo performance artists, and other artists of the contemporary American theater, mainstream and avant-garde. Writing assignments focus on developing critical arguments about new work.

180D. Hispanic-American Theater and Performance**(4) CABRANES-GRANT**

Not open for credit to students who have completed Dramatic Art 155D.

Survey of Hispanic-American drama and theory including authors like Carballido, Gambaro, Marques, Triana, Valdez, and others.

180E. Culture Clash: Studies in U.S. Latino Theater**(4) MORTON**

Not open for credit to students who have completed Dramatic Art 155E.

A survey, in English, of the dramatic literature of U.S. Latinos from 1965 to the present. Includes history and criticism of the theater of Chicano, Puerto Rican, Cuban, and other Americans of Hispanic origin in the U.S.

180F. Asian American Theater
(4) KIM

Not open for credit to students who have completed Dramatic Art 155F.

Overview of the Asian American theater movement, its political and artistic achievements.

Issues addressed include race and ethnicity, generational difference, gender, sexuality, and relationship to root cultures. Artists covered include Frank Chin, David Henry Hwang, Elizabeth Wong, Chay Yew, and Margaret Cho.

180G. Race, Gender, and Performance
(4) COLE

Prerequisite: upper-division standing.

Not open for credit to students who have completed *Dramatic Art 163*.

Comparative analysis of contemporary American plays and performances by artists of diverse gender, sexual, ethnic, and racial backgrounds. Students learn to perceive and critically respond to race and gender issues in plays and the theatrical production.

181AA-ZZ. National Studies in European Theater and Drama

(4) STAFF

Prerequisite: upper-division standing.

May be repeated for credit provided letter designations are different.

Special topics in European theater and drama.

182AA-ZZ. Transnational Studies in European Theater and Drama

(4) STAFF

Prerequisite: upper-division standing.

May be repeated for credit provided letter designations are different.

Special topics in transnational studies in European theater and drama.

183AA-ZZ. Asian Theater and Performance

(4) STAFF

Prerequisite: upper-division standing.

May be repeated for credit provided letter designations are different.

Special topics in Asian theater and performance.

184AA-ZZ. African and Caribbean Performance

(4) STAFF

Prerequisite: upper-division standing.

May be repeated for credit provided letter designations are different.

Special topics in African and Caribbean performance.

185AA-ZZ. Cross-Cultural Studies in Theater and Drama

(4) STAFF

Prerequisite: upper-division standing.

May be repeated for credit provided letter designations are different.

Special topics in cross-cultural studies in theater and drama.

187AA-ZZ. Performance Studies

(4) STAFF

Prerequisite: upper-division standing.

May be repeated for credit provided letter designations are different.

Special topics in performance studies.

188AA-ZZ. History of Performance

(4) STAFF

Prerequisite: upper-division standing.

May be repeated for credit provided letter designations are different.

Special topics in the history of performance.

190. Production Administration

(3) STAFF

Prerequisite: upper-division standing.

May be repeated for up to 6 units of credit.

Workshop for advanced students functioning as assistants to directors, designers, and technical directors. Portfolio, promptbook, or paper required.

191. Theater Management

(4) STAFF

Business organization and management for the educational, community, and professional theater, including budgeting, publicity, public relations, and box office principles.

192. Upper-Division Seminar

(4) STAFF

Prerequisite: not open to freshmen.

Designed for majors.

A seminar course for upper-division students in the Theater Studies emphases. Topics are selected according to the interests of the students.

193H. Senior Honors Project

(4) STAFF

Prerequisite: senior standing.

Students must have a 3.0 university grade-point average and a 3.4 departmental grade-point average, unless exempt by petition; faculty nomination. This course is for students who will complete their projects in one quarter. A final grade will be assigned upon completion.

Advanced thesis project in either academic research or creative activity, supervised by a faculty advisor. Students successfully completing the project, as evaluated by a three-person committee, will graduate with Distinction in the Major.

193HA-HB-HC. Senior Honors Project

(2-4, 2-4, 2-4) STAFF

Prerequisite: senior standing; Theater 193HA for 193HB; Theater 193HA or 193HB for 193HC.

Students must have a 3.0 university grade-point average and a 3.4 departmental grade-point average, unless exempt by petition; faculty nomination. 4 to 8 units required in honors sequence; minimum of 2 units per quarter.

HA: This course is the first in the sequence for students who will complete their projects in either two or three quarters. An "in-progress" grade will be assigned; students may then enroll in either *Dramatic Art 193HB* or *193HC*.

HB: *Dramatic Art 193HA*; this course is the second in the sequence for students who will complete their projects in three quarters. An "in-progress" grade will be assigned; students will then enroll in *Dramatic Art 193HC*.

HC: *Dramatic Art 193HA* or *193HB*; this course is the final in the two or three-quarter sequence. A final grade will be assigned upon completion.

Advanced thesis project in either academic research or creative activity, supervised by a faculty advisor. Students successfully completing the project, as evaluated by a three-person committee, will graduate with distinction in the major.

194D. Group Studies in Design

(1-4) STAFF

Prerequisite: upper-division standing.

May be repeated for credit to a maximum of 16 units.

Intensive study, research, and project preparation in theatrical design.

194L. Group Studies in Literature

(1-4) STAFF

Prerequisite: upper-division standing.

May be repeated for credit to a maximum of 16 units.

Intensive study, research, and project preparation in dramatic literature.

194T. Group Studies in Theater

(1-4) STAFF

Prerequisite: upper-division standing.

May be repeated for credit to a maximum of 16 units.

Intensive study, research, and project preparation in theater.

195. Principles of Stage Management

(2) STAFF

Prerequisite: Theater 1 or 60.

Discussion and research into the duties of the stage manager from pre-production through strike. Areas covered include communication, rehearsal procedures, and performance skills. Discussions with directors, designers, and invited guests employed in the field.

195P. Stage Management Practicum

(2-4) STAFF

Prerequisite: Theater 195.

May be repeated for credit to a maximum of 16 units.

Production oriented course allowing student practical experience in stage management training. Student will serve as assistant stage manager or stage manager for main stage or student directed departmental production.

196. Dance Production

(1-4) HOLLY, SANDER, SCOTT

Prerequisites: Theater 19; 22 or 123 or 125; upper-division standing; consent of instructor.

May be repeated for credit to a maximum of 16

units, only 8 units may be applied toward the major.

Exploration of the process of collaboration between dance choreographers and theater designers in the development of designs for dance productions. Final project is a public performance of the choreographers' and designer's work.

199. Independent Studies in Dramatic Art

(1-5) STAFF

Prerequisites: upper-division standing; completion of two upper-division courses in Theater.

Students must have a minimum 3.0 grade-point average for the preceding three quarters and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined.

199RA. Independent Research Assistance in Dramatic Art

(1-5) STAFF

Prerequisites: upper-division standing; completion of two upper-division courses in Theater.

Students must have a minimum 3.0 grade-point average for the preceding three quarters and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined.

Supervised assistance in faculty research project.

GRADUATE COURSES

210A. Methodology and Historiography

(4) CABRANES-GRANT, COLE

Prerequisite: graduate standing.

By analyzing leading examples of theater scholarship, this course serves as a workshop, helping students to formulate original research questions and utilize creative interdisciplinary research methods. Course addresses how to write a dissertation prospectus and grant proposal.

210B. Advanced Critical Writing

(4) COLE, ENDERS

Prerequisite: graduate standing.

Workshop on the style, structure, and ideology of crafting persuasive critical arguments and creating authority in writing. Focus on introductions, conclusions, definitions, proofs, refutation, and interaction with sources through analysis, critique, practice, and peer review. (Offered every year in rotation with DA 210A and 210C.)

210C. Professional Studies

(4) STAFF

Prerequisite: graduate standing.

Content varies from year to year. Offerings may include preparation for publication and conference presentations, orientation to the academic job market, and issues related to pedagogy. (Offered every year in rotation with DA 210A and 210B.)

221. The History and Theory of Directing

(4) WILLIAMS

Prerequisite: graduate standing.

Readings in the major theorists of directing and in the history of directing in the modern and contemporary theater.

223. History and Theory of Acting

(4) WILLIAMS

Prerequisite: graduate standing.

The history and theory of acting in Europe and Asia from classical times to the present. Documents that address phenomenology of acting are studied.

230. Dramatic Theory: Aristotle to Nietzsche

(4) KING

Prerequisite: graduate standing.

Detailed study of theories from *The Poetics* to *The Birth of Tragedy*.

232. Modern and Contemporary Theory

(4) CABRANES-GRANT, COLE

Prerequisite: graduate standing.

A graduate-level introduction to twentieth and twenty-first century critical theory. Topics vary and may include Marxism, Brecht, Artaud, theories of the avant-garde, psychoanalysis, feminism, structuralism, post-structuralism, postmodernism, and postcolonialism.

234. Reading Intercultural Drama

(4) CABRANES-GRANT

Prerequisite: graduate standing.

Examination of intercultural theory, practice, and dramatic literature. Material may include playwrights

ranging from Shakespeare to David Henry Hwang, and practitioners and theorists such as Augusto Boal, Eugenio Barba, and Anne Bogart.

250. Topics in Dramatic Literature and Theater History

(4) STAFF

Prerequisite: graduate standing.

May be repeated for credit.

Varies in content from year to year. Recent offerings have included classics in performance, translating drama, violence in drama, dramatic genre, and literature and theater.

251. Performance Studies

(4) COLE, ENDERS

Prerequisite: graduate standing.

Varies in content from year to year, but offerings may include studies of the avant-garde and performance art, sport as ritual and performance, theater on trial, politics and war as performance.

253. Music and Theater

(4) CABRANES-GRANT, WILLIAMS

Prerequisite: graduate standing.

Studies in the use of music as a dramatic and theatrical language. Genres vary from course to course, but may include opera, operetta, the musical, burlesque, and music theater.

254. Performance of Physicality

(4) KIM

Prerequisite: graduate standing.

Explores various case studies of the theatrical representation and perception of the human body in Europe, the Americas, and Asia in the twentieth century especially related to the construction of gender, race, class, nation, and sexuality.

261. Directing for Graduate Students

(4) WHITAKER

Prerequisites: graduate standing; consent of instructor.

May be repeated for credit to a maximum of 8 units.

An investigation of the fundamentals and techniques of directing, including principles of staging, text analysis, and actor coaching.

262. Practice in Design

(2-4) STAFF

May be repeated for credit to a maximum of 8 units.

Projects and study in design; practical application projects.

263. Practice in Dramaturgy

(2) IIZUKA, KING

Prerequisites: graduate standing; consent of instructor.

May be repeated for credit to a maximum of 8 units.

Projects in dramaturgy; practical application and projects.

264. Practice in Directing

(4) STAFF

Prerequisites: Theater 221 or 261; graduate standing; consent of instructor.

May be repeated for credit to a maximum of 8 units.

Advanced problems in directing, practical application and projects. Culminates in directing one-act plays.

265A. Practice in Playwriting

(1-4) IIZUKA, MORTON

Prerequisites: graduate standing; consent of instructor.

May be repeated for credit to a maximum of 8 units.

An independent study in Playwriting. Students may work on a full-length play, a one act play, or a solo performance text.

265B. Practice in Adaptation

(4) IIZUKA, MORTON

Prerequisites: graduate standing; consent of instructor.

May be repeated for credit to a maximum of 8 units.

An independent study in adapting work to the stage. Students may adapt work from other genres, plays written in a previous era, and/or works written in other languages.

266. Practice in Theater and Dance

(1-4) STAFF

Prerequisites: graduate standing; consent of instructor.

Projects in various areas of theater and dance, including acting, stage management, production, and directing.

270A. African Theater and Drama

(4) COLE

Prerequisite: graduate standing.

May be repeated for credit.

Readings in the dramatic literature and staged theater of Africa and the African diaspora. Topics may include Soyinka, Ngugi, Fugard, Aidoo, and theater for development.

270B. African Performance Studies

(4) COLE

Prerequisite: graduate standing.

May be repeated for credit.

Examines the broad field of performance in Africa and the African diaspora, including ritual, storytelling, oral traditions, masquerades, festivals, dance, truth commissions, and spirit possession.

271A. Asian Theater and Drama

(4) KIM

Prerequisite: graduate standing.

May be repeated for credit.

Dramatic literature and staged theater of Asia. Coverage varies from traditional to contemporary dramatists and theater styles from East Asia to India and/or Southeast Asia. Reception of Asian theater in non-Asian contexts is often considered.

271B. Asian Performance Studies

(4) KIM

Prerequisite: graduate standing.

May be repeated for credit.

Performance modes examined in this course may include shaman ritual, puppetry, masked performance, religious ceremonies, mass movements, and political events from various regions of Asia and the Pacific. Performances are considered in their tourist and cross-cultural contexts as well as in terms of more conventional settings and aesthetics.

272A. European Theater and Drama

(4) CABRANES-GRANT, ENDERS, WILLIAMS

Prerequisite: graduate standing.

May be repeated for credit.

An examination of theatrical traditions of Europe. Offerings vary but may include ancient and medieval drama and theater as well as Enlightenment, Sturm and Drang and Romanticism, Realism, Naturalism, and Symbolism.

272B. European Performance Studies

(4) CABRANES-GRANT, ENDERS, WILLIAMS

Prerequisite: graduate standing.

May be repeated for credit.

Studies in ritual, ceremony, and performance in European public life.

273A. Theater and Drama of the Americas

(4) CABRANES-GRANT, KING, MORTON

Prerequisite: graduate standing.

May be repeated for credit.

An examination of pan-American trends and traditions in drama. Readings may range widely beyond national and continental borders to focus on specific countries and/or movements in Latin America, the United States, and Canada.

273B. Performance Studies of the Americas

(4) CABRANES-GRANT, KING, MORTON

Prerequisite: graduate standing.

May be repeated for credit.

An examination of pan-American trends and traditions in performance. Readings may range widely beyond national and continental borders to focus on specific countries and/or movements in Latin America, the United States, and Canada.

273C. Theater and Drama of the United States

(4) CABRANES-GRANT, IIZUKA, KING

Prerequisite: graduate standing.

May be repeated for credit.

An examination of trends and traditions in the theater of the United States. Offerings vary but may

include: Roots of Broadway, U.S. Latino theater, melodrama, the Group Theater and its legacy, multicultural theater and contemporary theater.

273D. Performance Studies of the United States

(4) COLE, KING

Prerequisite: graduate standing.

May be repeated for credit.

An examination of trends and traditions in performance in the United States. Offerings vary but may include: U.S. Latino performance, Asian American performance, intercultural performance, and the avant-garde.

500. Teaching: Methods and Practice

(4) STAFF

Prerequisites: graduate standing and current appointment as a departmental teaching assistant.

Required of all teaching assistants. May be repeated for credit. With the exception of fulfilling the teaching requirement, no credit allowed toward advanced degrees. SIU grade.

Introduction to the problems and techniques of teaching dramatic art, through teaching responsibilities in departmental courses and through consultation with supervising faculty members.

501. Pedagogy Practicum

(4) STAFF

Prerequisites: graduate standing; consent of instructor.

May be repeated for credit with consent of instructor.

Taken in conjunction with departmental upper-division undergraduate course in literature, history of theory. Graduate students conduct additional outside reading, write a substantial final paper, and receive training in pedagogy including syllabus design, lesson planning, lecture composition, and discussion facilitation.

596. Directed Reading and Research

(2-8) STAFF

Prerequisite: consent of instructor.

Individual tutorial. A written proposal for each tutorial must be approved by the department chair.

598. Master's Thesis Project, Research and Creative

(1-8) STAFF

Prerequisite: consent of instructor.

May be repeated for credit to a maximum of 8 units. SIU grade. No credit allowed toward advanced degrees.

599. Dissertation Research and Preparation

(1-12) STAFF

Prerequisite: consent of chair of student's doctoral committee.

May be repeated for credit to a maximum of 108 units. SIU grading. No credit allowed toward advanced degrees.

Dissertation research and preparation.

Dance Courses

LOWER DIVISION

35. History and Appreciation of World Dance

(4) CHAPMAN

Introduction to dance as cultural and social expression in a variety of cultures. Forms covered include Flamenco, Ballet, African, Mexican, and East Indian.

36. History of Modern Dance

(4) STAFF

Historical development of modern dance in the United States and Europe in the twentieth century. Emphasis on visionary, feminist, and radical aspects of the form.

40. Summer Ballet

(2-4) STAFF

May be repeated for credit to a maximum of 12 units.

Fundamentals of ballet techniques. (SS)

41. Summer Modern Dance**(2-4) STAFF**

May be repeated for credit to a maximum of 12 units.

Fundamentals of modern dance technique. (SS)

42A-B-C. Beginning Ballet**(1-1-1) STAFF**

May be repeated for credit to a maximum of 2 units each.

Introduction to basic elements of ballet.

42D-E-F. Beginning Ballet**(2-2-2) STAFF**

May be repeated for credit to a maximum of 4 units each.

Recommended preparation: Dance 42C.

Further study of basic elements of ballet.

44A-B-C. Beginning Modern Dance**(1-1-1) STAFF**

May be repeated for credit to a maximum of 2 units each.

Introduction to basic elements of modern dance.

44D-E-F. Beginning Modern Dance**(2-2-2) STAFF**

May be repeated for credit to a maximum of 4 units each.

Recommended preparation: Dance 44C.

Further study of basic elements of modern dance.

45. History and Appreciation of Dance**(4) STAFF**

Introduction to dance as an art form. A study of the historical periods of dance in close relationship to the other forms of cultural expression.

47A-B-C. Ballet I**(2-4, 2-4, 2-4) HUSTON, MOSELEY**

Prerequisite: audition by dance faculty.

Open to non-majors by audition. May be repeated for credit to a maximum of 8 units each by dance, dramatic art, and theatre majors only.

Analysis and exploration of technical and expressive elements of the ballet. For dance majors. (F,W,S)

47D-E-F. Ballet II**(2-4, 2-4, 2-4) HUSTON**

Prerequisite: Dance 47C.

May be repeated for credit to a maximum of 8 units each by dance, dramatic art, and theatre majors only. Open to non-majors by audition.

Further analysis and exploration of technical and expressive elements of ballet. For Dance majors. (F,W,S)

50. Fundamentals of Choreography**(3) STAFF**

Prerequisite: Dance 51.

A study of the basic elements pertaining to the craft of choreography. Emphasis on exploration of movement variation, breath rhythm, the development of dance phrases, and the use of stage space. For Dance majors.

51. Improvisation**(3) STAFF**

Prerequisites: Dance 56C; dance majors only.

May be repeated for credit to a maximum of 6 units.

The fundamental exploration of movement potential with particular focus on the individual and group dynamics.

56A-B-C. Modern Dance I**(2-4, 2-4, 2-4) STAFF**

Prerequisite: audition by dance faculty.

May be repeated for credit in combination with Dance 46A-B-C to a maximum of 8 units each by dance, dramatic art, and theatre majors only. Open to non-majors by audition.

Analysis and exploration of the technical aspects of movement as an expressive medium. For dance majors.

56D-E-F. Modern Dance II**(2-4, 2-4, 2-4) STAFF**

Prerequisite: Dance 56C.

May be repeated for credit in combination with Dance 46D-E-F to a maximum of 8 units each by dance, dramatic art, and theatre majors only. Open to non-majors by audition.

Analysis and exploration of the technical aspects of movement as an expressive medium at the intermediate level. For dance majors. (F,W,S)

58. Pedagogy I**(3) STAFF**

Prerequisites: Dance 47A and 56A.

Theory, principles, and methods of teaching dance, including study of movement concepts, communication skills and class dynamics. Includes practical experience in leading groups through movement sequences.

60. Summer Jazz Dance**(2-4) STAFF**

May be repeated for credit to a maximum of 12 units.

Fundamentals of jazz technique. (SS)

70. Music for Dance: Rhythm**(3) STAFF**

Not open for credit to students who have completed Dance 43.

The study of principles of rhythm related to dance, including historical and cultural orientations. Practical instruction in notation, rhythmic movement, and percussion instruments.

71. Digital Audio Production for Dance and Drama**(3) STAFF**

Prerequisite: open to dramatic art and dance majors only.

Focuses on techniques for recording and editing audio for use in dance and theatrical performance. Areas studied include stereo and multi-tracking editing, recording of voice, musical instruments, and non-musical sounds, and basic mastering techniques.

94. Group Studies for Lower-Division Dance Students**(1-4) STAFF**

Prerequisite: lower-division standing.

May be repeated for credit to a maximum of 16 units, but only 8 units may be applied toward the major.

Group studies in selected areas of emphasis.

UPPER DIVISION**145A. Studies in Dance History to 1789****(4) CHAPMAN**

Prerequisite: upper-division standing.

Recommended preparation: Dance 36 or 45.

The study of dance as a reflection of cultural, social, and political history and its development as a theatrical art form from primitive cultures until the eve of the French Revolution.

145B. Studies in Dance History: Ballet**(4) CHAPMAN**

Prerequisite: upper-division standing.

Recommended preparation: Dance 36 or 45.

The historical evolution of ballet from the French Revolution to the present day. Topics include the romantic and Russian ballets, the Age of Diaghilev, and the development of ballet companies in America and Europe.

145H. History and Perspectives on the Male Dancer**(4) STAFF**

Prerequisite: Dance 45.

A selective investigation into aspects of the history of the male dancer from ancient times to the present. Topics vary, mainly focusing on the male dancer within religious rituals, court politics, theatrical performance, and dealing with his sexual identity.

145M. Studies in Dance History: American Musical Theater**(4) STAFF**

Prerequisite: upper-division standing.

Recommended preparation: Dance 45.

A study of the evolution of dance in the American musical theatre from the mid-nineteenth century to the present day. Analysis of dance styles on both stage and screen and its reflection of contemporary culture.

147A-B-C. Ballet III**(2-4, 2-4, 2-4) HUSTON**

Prerequisite: Dance 47F.

May be repeated for credit to a maximum of 16 units each, but only 8 units of each may be applied toward the major. Open to non-majors by audition.

Advanced analysis and exploration of the technical

and expressive elements of ballet. For dance majors. (F,W,S)

147PA-PB-PC. Ballet: Pointe**(1-2, 1-2, 1-2) HUSTON**

Prerequisite: Dance 47C.

May be repeated for credit in combination with Dance 147P to a maximum of 10 units each, but only 6 units of each may be applied toward the major.

Basic pointe work, including barre and center practice. For dance majors.

149. Dance Workshop**(1-4) STAFF**

Prerequisite: audition by dance faculty.

May be repeated for credit to a maximum of 12 units, but only 6 units will count toward major. Open to non-majors by audition.

Projects in performance, production, choreography, and directing. (F,W,S)

151A-B-C. Choreography**(3-3-3) STAFF**

Prerequisites: Dance 50 and 51 and Dramatic Art 19D.

Analysis of the elements of choreographic form; styles and trends with experience in development of dance studies; theory and technique of advanced group choreography. (F,W,S)

151D. Environmental Choreography**(3) SHIMIN**

Prerequisite: Dance 151C.

A process-oriented study of scoring, designing, and performing dance works in natural landscapes.

151T. Digital Choreography**(3) PEARSON**

Prerequisites: Dance 50 and 151A.

May be repeated for credit to a maximum of 6 units.

Composing, shooting, and editing digital video using the principles of modern dance choreography.

156A-B-C. Modern Dance III**(2-4, 2-4, 2-4) STAFF**

Prerequisite: Dance 56F.

May be repeated for credit to a maximum of 8 units each by dance, dramatic art, and theatre majors only. Open to non-majors by audition.

Advanced analysis and exploration of the technical aspects of dance as an expressive medium. For dance majors. (F,W,S)

156D-E-F. Modern Dance IV**(2-4, 2-4, 2-4) STAFF**

Prerequisite: Dance 156C.

May be repeated for credit to a maximum of 8 units each. Designed for majors. Open to non-majors by audition.

Further analysis and exploration of the technical aspects of dance as an expressive medium. (F,W,S)

157. Writing for Dance**(4) CHAPMAN**

A creative approach to writing about dance with practical applications in viewing, reviewing, and criticism.

158. Pedagogy II**(2-3) STAFF**

Prerequisites: Dance 56F and 58.

Further analysis of the theory and practice of teaching dance, including function and esthetics in the development of movement vocabulary, application of anatomy, kinetics and musicality. Includes practical experience teaching dance classes.

161B. Musical Comedy Dance**(4) STAFF**

Recommended preparation: Dance 61A or 61B.

Dance sequences from musicals, utilizing theatrical dance styles from the 1920's to the present.

163. Advanced Improvisation**(2) NUGENT**

May be repeated for credit to a maximum of 4 units, but only 2 units may be applied to the major.

Recommended preparation: Improvisation - Dance.

Designed for students with previous dance improvisation experience. Subjects include contact improvisation (sharing of weight between partners) and ensemble improvisation (development of group awareness in choreographic and spontaneous dance performance). Kneepads are required.

171. Music for Dance: Listening Based Survey of Contemporary Aesthetics**(3) STAFF***Prerequisite:* Dance 70.

Overview of form, structure, and tonality in western music, including global and historical influences. Examination of styles of music composition and performance, related to dance and choreography.

172. Music for Dance: Structural Relationships**(3) STAFF***Prerequisite:* Dance 171.

In-depth examination of music terminology, methodology, and composition for choreographers and dancers. Musical scoring and analysis related to choreographic works. Collaborative process. Exploration of historical, multi-cultural and contemporary music resources for choreographers.

186. Dance Production**(1-4) STAFF***Prerequisites:* Dance 151C.

May be repeated for credit to a maximum of 8 units.

Exploration of the process of collaboration between dance choreographers and theatre designers in the development of designs for dance productions. Final project will be a public performance of the choreographers' and designers' work.

190. UCSB Dance Company**(2-4) MOSELEY***Prerequisite:* consent of instructor.

May be repeated for credit to a maximum of 16 units, but only 8 units may be applied toward the major.

Selected students work as dancers in the UCSB Dance Company, studying and analyzing choreography and performance. The company performs locally and/or on tour. Students experience the integral workings of a company.

191. Senior Project**(3) STAFF***Prerequisite:* Dance 151C.

Choreographic or performance project produced as the culminating presentation for the B.F.A. degree. Course includes detailed documentation of the procedure followed during the creation of the final project.

193H. Senior Honors Project**(4) STAFF***Prerequisite:* senior standing.

Students must have a 3.0 university grade-point average and a 3.4 departmental grade-point average, unless exempt by petition; faculty nomination.

This course is for students who will complete their projects in one quarter. A final grade will be assigned upon completion.

Advanced thesis project in either academic research or creative activity, supervised by a faculty advisor. Students successfully completing the project, as evaluated by a three-person committee, will graduate with Distinction in the Major. (F,W,S)

193HA-HB-HC. Senior Honors Project**(2-4,2-4,2-4) STAFF***Prerequisite:* senior standing.

Students must have a 3.0 university grade-point average and a 3.4 departmental grade-point average, unless exempt by petition; faculty nomination.

HA: Four to 8 units required in honors sequence; minimum of 2 units per quarter. This course is the first in the sequence for students who will complete their projects in either two or three quarters. An "in progress" grade will be assigned; students may then enroll in either Dance 193HB or 193HC.

HB: Four to 8 units required in the honors sequence; a minimum of 2 units per quarter. This course is the second in the sequence for students who will complete their projects in three quarters. An "in progress" grade will be assigned; students will then enroll in Dance 193HC.

HC: Four to 8 units required in honors sequence; minimum of 2 units per quarter. This course is the final in the two or three quarter sequence. A final grade will be assigned upon completion.

Advanced thesis project in either academic research or creative activity, supervised by a faculty advisor.

Students successfully completing the project, as evaluated by a three-person committee, will graduate with Distinction in the Major.

194. Group Studies in Dance**(1-4) STAFF***Prerequisite:* upper-division standing.

May be repeated for credit to a maximum of 8 units.

Group projects in selected areas of emphasis.

199. Independent Study in Dance**(1-5) STAFF***Prerequisites:* upper-division standing; completion of two upper-division courses in dance.

Students must have a minimum 3.0 grade-point average for the preceding three quarters and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined.

Projects in choreography or dance research. (F,W,S)

199RA. Independent Research Assistance in Dance**(1-5) STAFF***Prerequisites:* upper-division standing; completion of two upper-division courses in dance; consent of instructor and department.

Students must have a minimum 3.0 grade-point average for the preceding three quarters and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined.

Supervised assistance in faculty research project.

Women, Culture, and Development (WCD) Studies is an affiliated program of UCSB's Global and International Studies Program. The WCD program offers an academic minor in women, culture, and development studies. This minor presents undergraduate students with a unique opportunity to focus their studies on the role of women in Third World development. Courses comprising the minor give the program wide geographic coverage, including the regions and countries of Africa, Asia, Latin America, and the Middle East. The minor allows students to explore how gender affects and is affected by development and the ways in which the cultures of peoples in the Third World affect the origins and outcomes of development.

The WCD minor program is highly interdisciplinary. Students completing the minor take two required seminars, Global Studies 180A-B (same courses as Sociology 156A-B). The minor's remaining 16 upper-division units are chosen from a list of almost 100 courses based in 15 departments.

Minor—Women, Culture, and Development

All courses to be applied to the minor must be completed on a letter-grade basis.

Preparation for the minor. There are no required courses in preparation for the minor.

Upper-division minor. Twenty-four units, distributed as follows: Global Studies 180A and 180B (same as Sociology 156A and 156B); one course selected from Anthropology 102, 111, 116, 120, 122, 125, 130B, 146, 149, 172, 185; Asian American Studies 113, 128, 131, 132, 135, 136; Black Studies 104, 107, 161, 169AR; Chicana/o Studies 139, 151, 177, 178A, 189C; Dramatic Art 163; Film Studies 161; History 101G, 179B; History of Art and Architecture 136J; Global Peace and Security 136, 137; Political Science 147; Religious Studies 114B; Sociology 130, 130GR, 130ST, 134R, 155B, 166W, 185G, and three additional courses selected from any of the following: *Africa:* Anthropology 156; Black Studies 100, 130A-B, 133, 152, 171; French 192X; History 144, 147B, 147G; History of Art and Architecture 121D, 127A; Music 175C; *Asia:* Anthropology 117Y, 138A, 142, 142B; Chinese 141; Dramatic Art 165A-B; History 185A-B; Korean 113, 120; Music 175E, 175G; Religious Studies 140D, 160, 166B, 178; Political Science 138; Sociology 130CS, 130SA; *Latin America:* Anthropology 104H; History 154LA, 154LB, 156A-B, 156I; History of Art and Architecture 124B, 124L; Latin American and Iberian Studies 101, 102; Political Science 148A; Sociology 130LA, 134LA, 156LA; Spanish 120A-B, 177, 178, 185, 194; Portuguese 128AA-ZZ; *Middle East:* History 146A-B, 146W; Music

168X, 175F; Political Science 150A; Religious Studies 140B, 140F.

Note: Although electives from other departments are listed for the Women, Culture, and Development minor, many of the courses have prerequisites or other departmental restrictions. Check catalog course descriptions for details.

Note: Substitutions and waivers are subject to approval by the chair or advisor of the department. Please see page 118 for special conditions governing minors in the College of Letters and Science.

Xiaojuan Zhao, Ph.D. (Asian American Studies)

Women's Studies is an interdisciplinary program and major which explores the varied experiences of women over time and across the globe as well as the systematic study of gender. The Women's Studies major is designed to

provide the student with the opportunity to discover the variety and richness of women's historical, cultural, representational, and social contributions, as well as to obtain a clear understanding of the dynamics of gender, sexuality, race, class, and other markers of identity, social and political movements for change, and individual and social transformations. The Women's Studies curriculum is composed of its own core interdisciplinary courses as well as a variety of courses elected from disciplines within the humanities and social sciences.

The Women's Studies curriculum is designed to complement and elaborate the aims students pursue in traditional departments. The major can form the core of an excellent liberal arts education. It can also be used as preparation for careers in management, law, social service, the arts, publishing, and teaching, and as preparation for graduate study in the social sciences, humanities, and Women's Studies.

Students pursuing a bachelor's degree in Women's Studies who are interested in a California Teaching Credential should contact the credential advisor in the Graduate School of Education as soon as possible.

Incoming students and prospective majors are invited to consult the Women's Studies faculty and staff advisors. Further descriptions of the Women's Studies curriculum and of major requirements are available in the program office.

Honors Program

Women's Studies has an honors program that allows motivated undergraduates to undertake advanced research and work individually with a Women's Studies faculty member. Qualifying requirements include an overall grade-point average of at least 3.0, with a 3.5 in the Women's Studies major. The honors program requirements also involve two or three quarters of independent study, culminating in a final presentation of research at a symposium in the spring. Upon successful completion of the program, students will graduate with "Distinction in the Major."

Candidates must submit to the undergraduate advisor a proposal for an undergraduate thesis project to be completed during the junior or senior year, and a letter of recommendation from a Women's Studies faculty member. Interested students should make contact with the undergraduate advisor during the spring prior to their proposed enrollment. The deadline to submit application materials is September 25, 2008. Students will receive 4 to 8 units of academic credit in the Women's Studies 195H series. The project must be approved by a member of the faculty who will work closely with the student as project supervisor. Distinction in the Major will be awarded at the time of graduation to those students whose projects are declared acceptable.

Undergraduate Program

All courses to be applied to the major and the minor must be completed on a letter-grade basis, including courses offered in Women's Studies and those offered by other departments and applied to the major/minor.

Bachelor of Arts— Women's Studies

Preparation for the major. Twelve units in lower-division courses are required. Students select 12 units from course offerings in areas A, B, and C.

Area A: Introduction to Women's Studies. One course required, selected from Women's Studies 20 and 40.

Area B: Intersectionalities. One course required, selected from Women's Studies 60 and 80.

Area C: Global Feminism. One course required, selected from Women's Studies 30 and 50.

Upper-division major. Forty-four upper-division units are required, distributed as follows.

Required courses: Women's Studies 180, 181, 182, and 183A or 183B.

Elective courses: Twenty-eight units (seven courses, three must be from Women's Studies) of upper-division electives selected from the following courses: Anthropology 102A-B, 111, 116, 125, 142B, 172, 176; Art History 111E, 143B-C; Asian American Studies 112, 128, 131, 132, 134, 135, 136, 138, 146; Black Studies 106, 121, 122, 127, 133, 136; Chicana/o Studies 112, 114, 147, 148, 149, 151, 153, 154F, 155W, 167, 184A; Classics 110; Communication 124, 126; Comparative Literature 104, Dance 145W; English 114AA-ZZ; Environmental Studies 184; Film Studies 150PG, 163; French 106X, 130X, 131X, 132X, 136X, 168, 171X, 185A-B; German 164G, 170; Global Studies 180A-B, History 117C, 117D, 117Q, 146PW, 146W, 147G, 147Q, 159B-C, 163A-B-P, 175D, 188A-B; Interdisciplinary Studies 100WS; Italian 142X, 143X, 144AX-ZX; Japanese 162; Law and Society 140, 141, 166; Linguistics 132, 133; Political Science 159; Religious Studies 103B, 114D, 192; Slavic 164C; Sociology 134, 140, 144, 144S, 151, 153, 154A, 154F, 155A-B, 155M, 155T, 155W, 156A-B, 159LG, 159S, 176A, 185G; Spanish 194; Theater 180G, 187FG; Women's Studies 115, 117C, 120, 124A, 130, 131, 132, 135, 136AA-ZZ, 142, 143, 144, 146, 147G, 147Q, 150, 151AA-ZZ, 153, 154A, 155A-B, 159B-C, 159LG, 160, 162, 163A, 167, 171CN, 185AA-ZZ, 186AA-ZZ, 190, 195HC, 196, 198, 199; Writing 109WS. (Women's Studies 136AA-ZZ, 151AA-ZZ, 185AA-ZZ, 186AA-ZZ, 190, 196, 198, and 199 may be repeated for credit. See individual course listings for limitations.)

Non-Women's Studies Special Topics or Selected Topics courses, and/or courses for which the instructor varies, may fulfill Area B, depending on course content and contingent upon Women's Studies Program approval.

Women's studies majors are strongly urged to fulfill the second part of the Area A General Education requirement by taking Writing 109WS. Transfer students are urged to take Writing 109WS, even if they have already fulfilled the Writing 50 requirement. Those majors who are unable to take Writing 109WS are urged to take Writing 109SS, Writing for the Social Sciences.

Minor—Women's Studies

All courses to be applied to the minor must be completed on a letter-grade basis, including both courses offered in Women's Studies and those offered by other departments and applied to the minor.

Preparation for the minor. Twelve units in lower-division courses are required. Students select 12 units from course offerings in areas A, B, and C.

Area A: Introduction to Women's Studies. One course required, selected from Women's Studies 20 and 40.

Area B: Intersectionalities. One course required, selected from Women's Studies 60 and 80.

Area C: Global Feminism. One course required, selected from Women's Studies 30 and 50.

Upper-division minor. Twenty upper-division units, distributed as follows.

Required courses: Women's Studies 180 and 181.

Elective courses: Twelve units (three courses) of upper-division electives from the following courses (one must be from Women's Studies): Anthropology 102A-B, 111, 116, 125, 172, 176; Art History, 111E, 143B-C; Asian American Studies 112, 128, 131, 132, 134, 135, 136, 138, 146; Black Studies 106, 121, 122, 127, 133, 136; Chicana/o Studies 112, 114, 147, 148, 149, 151, 153, 154F, 155W, 167, 184A; Classics 110; Communication 124, 126; Comparative Literature 104, Dance 145W; English 114AA-ZZ; Environmental Studies 184; Film Studies 150PG, 163; French 106X, 130X, 131X, 132X, 136X, 168, 171X, 185A-B; German 164G, 170; Global Studies 180A-B; History 117C-D, 117Q, 146PW, 146W, 147G, 147Q, 159B-C, 163A-B-P, 175D, 188A-B; Interdisciplinary Studies 100WS; Italian 142X, 143X, 144AX-ZX; Japanese 162; Law and Society 140, 141, 166; Linguistics 132, 133; Political Science 159; Religious Studies 103B, 114D, 192; Slavic 164C; Sociology 134, 140, 144, 144S, 151, 153, 154A, 154F, 155A-B, 155AG, 155M, 155T, 155W, 156A-B, 159LG, 159S, 176A, 185G; Spanish 194; Theater 180G, 187FG; Women's Studies 115, 117C, 120, 124A, 130, 131, 132, 135, 136AA-ZZ, 142, 143, 144, 146, 147G, 147Q, 150, 151AA-ZZ, 153, 154A, 155A-B, 159B-C, 159LG, 160, 162, 163A, 167, 171CN, 185AA-ZZ, 186AA-ZZ, 190, 196, 198, 199; Writing 109WS. (Women's Studies 136AA-ZZ, 151AA-ZZ, 185AA-ZZ, 186AA-ZZ, 190, 196, 198, and 199 may be repeated for credit. See individual course listings for limitations.) *Note:* A combined maximum of 8 units of independent studies, Women's Studies 190, 198, and 199 may be applied to the minor.

Note: Substitutions and waivers are subject to approval by the chair of the department. Please see page 118 for special conditions governing minors in the College of Letters and Science.

Minor—Lesbian, Gay, Bisexual, Transgender, and Queer Studies

All courses to be applied to the minor must be completed on a letter-grade basis, including both courses offered in Women's Studies and those offered by other departments and applied to the minor.

Preparation for the minor. Women's Studies 80.

Upper-division minor. Twenty-four upper-division units, distributed as follows:

Area A: Women's Studies 162.

Area B: Courses on LGBTQ Topics. Twelve units (three courses) from the following: Asian American Studies 135; Chicana/o Studies 151,

153; English 134LG; History 101G; Political Science 159; Sociology 159LG, 176A; Women's Studies 159LG, 160.

Area C: Courses on Sexuality. Eight units (two courses) from Anthropology 176; Asian American Studies 112, 138; Chicana/o Studies 149; History 124A, 188S; Japanese 162; Sociology 144S, 159S; Women's Studies 124A, 150; or additional courses from Area B listed above (Asian American Studies 135; Chicana/o Studies 151, 153; English 129, 134LG; History 101G; Political Science 159; Sociology 159LG, 176A; Women's Studies 159LG, 160).

Graduate Program

In Fall 2009, the M.A./Ph.D program in Feminist Studies will admit its first class; please check the Department's Web site for additional information. In addition to program requirements, candidates for graduate degrees must meet the university degree requirements described in the chapter "Graduate Education at UCSB."

Optional Ph.D. Emphasis in Women's Studies

The Women's Studies Program, with almost fifty core and affiliated faculty members in over nineteen disciplines, serves as a model of interdisciplinary work and scholarly collaboration at UCSB. Women's Studies doctoral emphasis students are required to complete successfully four seminars that will enhance their understanding of feminist pedagogy, feminist theory, and topics relevant to the study of women, gender and/or sexuality. Women's Studies as an inter-departmental set of conversations and intellectual questions supports a multifaceted undergraduate curriculum at UCSB. Graduate emphasis students are encouraged to apply to teach Women's Studies courses as teaching assistants and associates as part of their Women's Studies training.

Applicants must first be admitted to, or currently enrolled in, a UCSB Ph.D. program participating in the Women's Studies graduate emphasis: Anthropology; Comparative Literature; Counseling, Clinical, and School Psychology; English; French and Italian; Germanic, Slavic and Semitic Studies; History; History of Art and Architecture; Linguistics; Political Science; Religious Studies; Sociology; Spanish and Portuguese; or Theater and Dance. Candidates complete four graduate courses and select a member of the Women's Studies faculty or affiliated faculty to serve on their dissertation committees. Applications to the Women's Studies Doctoral Emphasis may be submitted at any stage of Ph.D. work, and applications will be considered throughout the year.

The Graduate Curriculum

Students pursuing the emphasis in Women's Studies will successfully complete four graduate courses. Only one may be taken in the student's home department.

1. Issues in Feminist Epistemology and Pedagogy (Women's Studies 270). A one-quarter seminar that considers Women's Studies as a distinct field. It offers an interdisciplinary exploration of feminist theories of knowledge production and teaching practices. Readings cover past and present critical debates

and provide theoretical approaches through which to analyze interdisciplinary epistemological and pedagogical issues.

2. **Special Topics in Women's Studies (594 AA-ZZ).** A one-quarter seminar offered by a Women's Studies faculty member on topics of central concern to the field of Women's Studies.
Or,
Research Practicum (Women's Studies 280). A cross-disciplinary seminar in which fundamental questions in contemporary feminist research practice are considered in light of students' own graduate projects. Students may fulfill the Area 2 requirement by taking either a Special Topics Seminar or the Research Practicum.
3. **Feminist Theories.** A one-quarter graduate seminar in feminist theory offered by any department, including Women's Studies.
4. **Topical Seminar.** A one quarter graduate seminar, outside the student's home department, that addresses topics relevant to the study of women, gender, and/or sexuality.

Women's Studies Courses

A list of Women's Studies courses with descriptions will be available before the beginning of each quarter, as close to the start of registration as possible. Students are urged to consult this list before registering.

LOWER DIVISION

20. Women, Society, and Culture

(4) BORIS, OAKS, RUPP

Not open for credit to students who have completed Women's Studies 20H.

Introduction to central concepts and issues in women's studies from the perspective of the social sciences. Explores the construction of gender and sexuality and the lives of diverse groups of women in the contemporary U.S. within a global context.

20H. Women, Society, and Culture Honors

(5) BORIS, OAKS, RUPP, WILLIAMS

Prerequisite: consent of instructor.

Not open for credit to students who have completed Women's Studies 20.

Lecture is concurrent with Women's Studies 20, along with a weekly honors seminar, requiring additional assignments and intensive discussion of the readings. Intended for highly motivated and well prepared students.

30. Women, Development and Globalization

(4) CHANG, HERNÁNDEZ

Not open for credit to students who have completed Women's Studies 30H.

Examines the impact of development, policy, and globalization on women's lives. Emphasis is placed on women's activism and feminist critiques of neo-liberal measures intended to rid the third world of poverty.

30H. Women, Development and Globalization Honors

(5) CHANG, HERNÁNDEZ

Prerequisite: consent of instructor.

Not open for credit to students who have completed Women's Studies 30.

Lecture is concurrent with Women's Studies 30, along with a weekly honors seminar, requiring additional assignments and intensive discussion of the readings. Intended for highly motivated and well prepared students.

40. Women, Representation, and Cultural Production

(4) BOBO, HERNÁNDEZ, OAKS

Not open for credit to students who have completed Women's Studies 40H.

This introductory course examines cultural representations of diverse women's lives from a humanities perspective. The focus is on women as cultural producers, subjects, and critics in literature, film, the visual arts, and music.

40H. Women, Representation, and Cultural Production Honors

(5) BOBO, HERNÁNDEZ, OAKS

Prerequisite: consent of instructor.

Not open for credit to students who have completed Women's Studies 40.

Lecture is concurrent with Women's Studies 40, along with a weekly honors seminar, requiring additional assignments and intensive discussion of the readings. Intended for highly motivated and well prepared students.

50. Global Feminisms and Social Justice

(4) CHANG, OAKS, BORIS

Repeat Comments: Not open for credit to students who have completed Women's Studies 50H.

Historical and contemporary examination of women's activism around the globe in a variety of struggles, including self-named feminist movements and other movements for social justice.

50H. Global Feminisms and Social Justice Honors

(5) BORIS, CHANG, OAKS

Prerequisite: consent of instructor.

Not open for credit to students who have completed Women's Studies 50.

Lecture is concurrent with Women's Studies 50, along with a weekly honors seminar, requiring additional assignments and intensive discussion of the readings. Intended for highly motivated and well prepared students.

60. Women of Color: Race, Class, and Ethnicity

(4) CHANG, MILLER-YOUNG

Repeat Comments: Not open for credit to students who have completed Women's Studies 60H.

Examination of the interlocking dynamics and politics of gender, race, sexuality, class, and culture in the experience of U.S. women of color. Readings focus on oppositional consciousness and resistance to oppression in the scholarship and literature by women of color.

60H. Women of Color: Race, Class, and Ethnicity Honors

(5) CHANG, MILLER-YOUNG

Prerequisite: consent of instructor.

Not open for credit to students who have completed Women's Studies 60.

Lecture is concurrent with Women's Studies 60, along with a weekly honors seminar, requiring additional assignments and intensive discussion of the readings. Intended for highly motivated and well prepared students.

80. Introduction to LGBTQ Studies

(4) HERNÁNDEZ

Not open for credit to students who have completed Women's Studies 80H.

Examines LGBTQ studies from an interdisciplinary perspective. Along with historical, social, cultural, political, artistic, and literary rise to prominence of sexual minorities, the goal of the course is to integrate a discussion of the continuum of LGBTQ identities within their respective social contexts and communities.

80H. Introduction to LGBTQ Studies Honors

(5) HERNÁNDEZ

Prerequisite: consent of instructor.

Not open for credit to students who have completed Women's Studies 80.

Lecture is concurrent with Women's Studies 80, along with a weekly honors seminar, requiring additional assignments and intensive discussion of the readings. Intended for highly motivated and well prepared students.

99. Independent Studies

(1-4) STAFF

Prerequisites: Women's Studies 20 or 40; consent of instructor and department.

Students must have a minimum 3.0 cumulative grade-point average. May be repeated for credit to a maximum of 8 units. Students are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ course combined. No unit credit allowed toward the major.

Research under the direction of a faculty member. Students are offered an opportunity to conduct independent or collaborative research or to act as interns for faculty-directed research projects.

UPPER DIVISION

115. Marriage in the Ancient World

(4) STAFF

Same course as Classics 115 and Religious Studies 103B.

Examines marriage customs and rituals in Archaic and Classical Greece, Ptolemaic Egypt, and in the Roman Republic and Imperial Periods within the context of social history, literary, historical, and epigraphic sources.

117C. Women, the Family, and Sexuality in the Middle Ages

(4) FARMER

Prerequisite: History 4B or upper-division standing.

Same course as History 117C. Not open for credit to students who have completed History 117.

Family structure; perceptions and ideals of intimate and familial relations; status, perceptions, and experiences of women in western Europe circa 400-1400 A.D. Special attention on social, political, and religious contexts.

120. Women's Labors

(4) BORIS

Letter grade required for majors and minors. Not open for credit to students who have completed Women's Studies 186EB.

Recommended preparation: upper-division standing or a prior course in women's studies.

What is women's work? How has it changed over time? How is it valued? Explores wage-earning, caregiving, sex work, housework, double days, glass ceilings, and strategies of survival and resistance among America women from various demographic, racial, and ethnic groups.

124A. Women, Gender, and Sexuality in Europe, 1750-1914

(4) RAPPAPORT

Prerequisite: History 4C.

Same course as History 124A.

The roles of women, gender, and sexuality in eighteenth and nineteenth century Europe. Exploration of the nature of women and revolution: religious, legal, scientific, and popular conceptions of gender and sexuality; industrialization and family life, the rise of organized feminism.

130. Perspectives on Women's Health

(4) OAKS

Prerequisite: upper-division standing.

Investigation of the power that medicine has in shaping health experts' and lay individuals' understandings of health and health practices. Particular attention is paid to how women's health issues come to be seen as "social problems," past and present.

131. The Politics of Women's Choices: Reproduction and Reproductive Technologies

(4) OAKS

Prerequisite: upper-division standing.

Exploration of theoretical, popular, and political debates over reproductive technologies in terms of women's power and choices. Investigation of how cultural and historical changes in reproductive practices influence ideas about nature, society, and progress. Examination of case studies on current controversies.

132. Gender, Science, and Technology

(4) HARTHORN

Prerequisite: upper division standing

Repeat Comments: Same course as Women's Studies 186BH, cannot be taken for repeat credit.

Examines the role of women in science, feminist critiques of science, gendered construction of technology and technological construction of gender, cross-cultural analysis of emerging technologies, and intersections of gender, ethnicity, class, and sexuality.

136AA-ZZ. Cultural Analysis of Reproduction and Science

(4) TOMLINSON

Prerequisite: upper-division standing

Repeat Comments: May be repeated for a maximum of 8 units provided letter designations are different, with instructor permission.

Develop tools to analyze cultural productions, narratives, images, and arguments about women, gender, reproduction, and science. Topics may vary.

142. Black Women Filmmakers

(4) BOBO

Not open for credit to students who have completed Women's Studies 186JB. Letter grade required for majors and minors.

Recommended preparation: upper-division standing or a prior women's studies course.

An opportunity to view films (animation, documentary, experimental and narrative), examine the specifics of media production, compare the various works produced by black women, and acquire the skills necessary for media criticism.

143. Women's Film Narratives

(4) BOBO

Letter grade required for majors and minors. Not open for credit to students who have completed Women's Studies 186JC.

Examination of the dynamics of family, race, sexuality, resistance, and cultural transformation through women's novels and film adaptations, and other films which have had significant impact on the national consciousness.

144. Representation and Activism

(4) BOBO

Prerequisite: upper-division standing.

Not open for credit to students who have completed Women's Studies 186JB. Letter grade required for majors and minors.

Exploration of the strategies by which social groups resist systems of oppression through readings and works from independent filmmakers.

146. Women of Color Resisting Violence

(4) CHANG

Recommended preparation: upper-division standing or one prior course in women's studies. Letter grade required for majors and minors.

This is a study of women of color and other marginalized women's experiences of psychological, sexual, physical, social, economic and legal violence, and our personal and collective resistance to these forms of violence in intimate relationships and in broader society.

147G. Gender and Power in Modern African History

(4) MIESCHER

Prerequisite: History 49 or 49B or 147A or 147B or 147Q or Women's Studies 147Q or upper-division standing.

Same course as History 147G.

Examination of gender, power, and authority among and between men and women in response to socioeconomic transformations in nineteenth- and twentieth-century Africa. Themes include interpretations of gender, organization of labor, the missionary project, the state and colonial rule.

147Q. Readings on African History

(4) MIESCHER

Prerequisite: History 49 or 49B or 147A or 147B.

May be repeated for credit to a maximum of 8 units. Same course as History 147Q.

A discussion and reading seminar on selected topics in African history.

150. Sex, Love, and Romance

(4) RUPP

Not open for credit to students who have completed Women's Studies 150H.

An examination from historical and global

perspectives of sex, love, desire, and intimate relationships in diverse cultures in the contemporary U.S.

150H. Sex, Love, and Romance Honors

(5) RUPP

Prerequisite: consent of instructor.

Not open for credit to students who have completed Women's Studies 150.

Lecture is concurrent with Women's Studies 150, along with a weekly honors seminar, requiring additional assignments and intensive discussion of the readings. Intended for highly motivated and well prepared students.

151AA-ZZ. Sexual Cultures

(4) MILLER-YOUNG

Prerequisite: upper-division standing Repeat

Comments:

May be repeated for a maximum of 8 units provided letter designations are different, with instructor permission.

Seminars focus on the political, social, and cultural dynamics of sexuality in modern society. Offerings may explore sexual representations, economies, laws, identities, performances, literatures, technologies, relationships, communities, and customs in the United States or abroad. Topics may vary.

153. Women and Work

(4) FENSTERMAKER, SEGURA

Prerequisite: upper-division standing.

Same course as Sociology 153.

The course will begin with readings and discussion of the sociological features of work in society. The role of women in the labor market will be explored, as well as their lives as unpaid workers in their own homes. Finally, more global issues of sexual inequality and social change will be discussed.

154A. Sociology of the Family

(4) STAFF

Prerequisite: upper-division standing.

Same course as Sociology 154A.

A lecture course on family and household organization, past and present. Attention to contemporary issues in the family focusing on gender, class, and cultural variation.

155A. Women in American Society

(4) FENSTERMAKER

Prerequisite: upper-division standing.

Same course as Sociology 155A.

The roles and life styles of women in various American subcultures and the ideologies developing around them.

155B. Sociological Perspectives on Women

(4) FENSTERMAKER, SCHNEIDER

Recommended preparation: Women's Studies 155A.

Advanced study in the sociology of women. Course format (seminar or lecture) and topics vary year to year. Topics may include: analysis of the status of women in the labor force; women's class position; theoretical and practical aspects of patriarchy.

159B. Women in American History

(4) COHEN

Prerequisites: two quarters from History 17A-B-C or upper-division standing.

Same course as History 159B.

Social history of women in America from 1800 to 1900. Changing marriage, reproduction and work patterns, and cultural values about the female role. Attention to racial, class, and ethnic differences. Analysis of feminist thought and the several women's movements.

159C. Women in Twentieth-Century American History

(4) DEHART, COHEN

Same course as History 159C.

A continuation of Women's Studies 159A-B from 1900 to the present.

159LG. Sociology of Lesbian and Gay Communities

(4) SCHNEIDER

Prerequisite: upper-division standing.

Same course as Sociology 159LG. Not open for credit to students who have completed Sociology 146.

Origins and transformation of lesbian and gay communities and social movements, with special attention to ideological development, major social problems, cultural production, race, ethnic and gender differences, organization formation, and political conflict.

160. Sapphistries

(4) RUPP

A global exploration of female same-sex sexuality, from the historical Sappho through sapphists, roaring girls, romantic friends, and female husbands, to contemporary lesbians. Considers diverse lives and representations of women who desire and love other women.

162. Critical LGBTQ Studies

(4) HERNÁNDEZ

May be repeated for credit to a maximum of 8 units, but only 4 units can be applied to the major.

Examines the dynamics of the juridical, social, political, cultural representations of LGBTQ identities. Examines legal cases, policy issues, social matters as well as representations therein in literary and cultural expression in order to study the LGBTQ people in active resistance against dominant power structure.

180. Feminist Analysis

(4) HERNÁNDEZ, TOMLINSON, WILLIAMS

Prerequisite: Upper-division standing; open to Women's Studies majors and minors only.

Letter grade required for majors and minors.

Methods and tools for analyzing feminist theory and argument.

181. Feminist Theories

(4) BORIS, HERNÁNDEZ, TOMLINSON

Prerequisite: Upper-division standing; open to Women's Studies majors and minors only.

Recommended Preparation: Completion of Women's Studies 180 recommended.

Letter grade required for majors and minors. Introduction to feminist theorizing about gender, race, and sexuality. Focus on key thinkers, traditions, or selected theoretical frameworks.

182. Feminist Methodologies

(4) HARTHORN, MILLER-YOUNG, OAKS

Prerequisite: upper-division standing; open to Women's Studies majors only.

Recommended Preparation: Completion of Women's Studies 180 and 181 recommended.

Open to Women's Studies minors with consent of instructor. Letter grade required for majors and minors. Methods of feminist textual, theoretical, and empirical analysis, including the principles of research design.

183A. Senior Research Seminar

(4) STAFF

Prerequisites: Women's Studies 180, 181 and 182.

Develops advanced tools of feminist research, theory, and argument. Offers participants the opportunity to complete a project of textual, theoretical, or empirical research. Women's Studies 183A allows students to extend or re-envision the project originating in Women's Studies 182.

183B. Senior Topics Seminar

(4) STAFF

Recommended preparation: Women's Studies 180, 181 and 182.

Develops advanced tools of feminist research, theory, and argument. Offers participants the opportunity to complete a project of textual, theoretical, or empirical research. Focuses on different topics each year to allow students to develop a related research project.

185AA-ZZ. Gender and Culture

(4) STAFF

Prerequisite: upper-division standing.

May be repeated for credit to a maximum of 12 units provided letter designations are different. Letter grade required for majors and minors.

Seminar on selected topics in women's studies, with a humanities emphasis.

186AA-ZZ. Gender and Society

(4) STAFF

Prerequisite: upper-division standing.

May be repeated for credit to a maximum of 12 units provided letter designations are different. Letter

grade required for majors and minors.

Seminar on selected topics in women's studies, with a social studies emphasis.

190. Women's Community Organization (2-4) STAFF

Prerequisites: upper-division standing; open to women's studies majors only.

May be repeated for credit to a maximum of 8 units, but only 4 units may be applied toward the major.

Combines independent service in a community organization involved with issues relevant to women's studies with reflection and analysis under the supervision of a faculty member.

195HA. Senior Honors Project (2-4) STAFF

Prerequisite: upper-division standing.

Students must have a minimum 3.0 university GPA and a minimum 3.5 departmental GPA; 4 to 8 units required in honors sequence; minimum of 2 units per quarter.

Students design, research, write, and present original work on a topic of choice under supervision of a women's studies faculty mentor. Emphasis is placed on project design and initial research.

195HB. Senior Honors Project (2-4) STAFF

Prerequisites: Women's Studies 195HA; upper-division standing.

Students must have a minimum 3.0 university GPA and a minimum 3.5 departmental GPA; 4 to 8 units required in honors sequence; minimum of 2 units per quarter.

Students design, research, write, and present original work on a topic of choice under supervision of a women's studies faculty mentor. Emphasis is on data gathering and organization.

195HC. Senior Honors Project (2-4) STAFF

Prerequisites: Women's Studies 195HA or 195HB; upper-division standing.

Students must have a minimum 3.0 university GPA and a minimum 3.5 departmental GPA; 4 to 8 units required in honors sequence; minimum of 2 units per quarter.

Students design, research, write, and present original work on a topic of choice under supervision of a women's studies faculty mentor. Emphasis on writing thesis and preparation for presenting results to an audience of women's studies peers and faculty members.

198. Readings in Women's Studies (1-4) STAFF

Prerequisites: upper-division standing; completion of two upper-division courses in women's studies.

Students must have a minimum 3.0 grade-point average for the preceding three quarters and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined. Students may apply a maximum of 4 units of Women's Studies 198/199 courses combined to the major. Women's Studies 198 may be repeated for credit to a maximum of 12 units, but only 4 units may be applied toward the major.

Directed readings in women's studies under the guidance of a faculty member in the program. Students wishing to enroll should prepare a short written plan of study.

199. Independent Studies in Women's Studies (1-4) STAFF

Prerequisites: upper-division standing; completion of two upper-division courses in women's studies.

Students must have a minimum 3.0 grade-point average for the preceding three quarters and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined. Students may apply a maximum of 4 units of Women's Studies 198/199 courses combined to the major. Women's Studies 199 may be repeated for credit to a maximum of 12 units, but only 4 units may be applied toward the major.

Independent research and writing under the guidance of a faculty member in the program. Students wishing to enroll should prepare a short written plan of study.

GRADUATE COURSES

210. Labors

(4) BORIS

Prerequisite: graduate standing.

May be repeated with different instructor and topic.

An intensive reading course on diverse forms of labor, both productive and reproductive, in different times and places with a focus on the intersections among gender, race, class, ethnicity, life cycle, abilities, and social and political actions.

220. Genders and Sexualities

(4) RUPP, MILLER-YOUNG

Prerequisite: graduate standing.

May be repeated with different instructor and topic.

An intensive reading course on diverse sexualities and genders in different times and places with a focus on the interconnections among race, ethnicity, class, gender identities, and sexual desires and acts.

230. Race and Nation

(4) CHANG

Prerequisite: graduate standing.

May be repeated with different instructor and topic.

An intensive readings course on the experiences of women of color, both within the US and globally, with interlocking systems of racism, classism, sexism, homophobia/transphobia, ableism, and colonialism.

240. Transnational Feminisms

(4) RUPP

Prerequisite: graduate standing.

An intensive reading course on diverse manifestations of feminism and women's movements around the globe.

270. Feminist Epistemologies and Pedagogy

(4) BORIS, OAKS

Acquaints students with the scope and range of feminist epistemological critiques across disciplines and pursues issues relevant to problematizing of knowledge seeking, such as theories of agency rooted in gender, race, class, and sexuality.

280. Research Practicum

(4) STAFF

A cross-disciplinary seminar in which fundamental questions in contemporary feminist research practice are considered in light of students own graduate projects.

501. Apprentice Teaching in Women's Studies

(4) STAFF

Prerequisite: teaching assistant.

May be repeated for credit.

Students will receive faculty supervision as they lead discussion sections, assist in the preparation and evaluation of exams, and advise on written assignments. Attention will be given to the challenges posed by multidisciplinary materials and perspectives. Weekly meetings with instructor required.

594AA-ZZ. Special Topics in Women's Studies

(4) STAFF

Special seminar on research topics of current interest.

596AA-ZZ. Directed Readings and Research

(2-8) STAFF

Prerequisites: consent of instructor, current graduate enrollment.

May be repeated for credit with approval of program chair.

Individual tutorial relevant to M.A. or Ph.D. projects. Plan of study must be approved by program chair.

Leonard D. Tourney, Ph.D., UC Santa Barbara, Lecturer Emeritus

Muriel Zimmerman, Ph.D., Temple University, Senior Lecturer Emerita

The Writing Program curriculum is organized on the premise that instruction and practice in expository writing can further the university's goal of producing knowledgeable graduates capable of explaining their ideas clearly and persuasively to general or specialized audiences. Writing is a central activity in all subjects and majors at the university, and writing cannot be learned once, in the freshman year. At every level, student writers can profitably study the methods of inquiry, research, and exposition appropriate to their fields, in contexts that value clear analysis, critical thinking, and clarity in written and oral expression.

The Writing Program offers required and elective courses at freshman and advanced levels, as well as a minor in professional writing. Students must satisfy the University Entry Level Writing Requirement *during their first year at UCSB*. In addition, students in the College of Letters and Science must satisfy General Education Area A. Two courses are needed, which may be chosen from Writing 2, 2E, or 2LK (which must be completed within the first six quarters) and one additional course from the following list: Writing 50, 50E, 109AA-ZZ, or English 10, 10AC, 10EM, or 10LC. Writing 109 courses cover such topics as scientific, social science, and legal writing and writing for film studies, visual arts, and health sciences.

Writing 1LK and 2LK are referred to as LINKS courses and require co-enrollment with specific companion courses. The instructional aim of LINKS courses is to help students master academic writing and critical thinking skills within the context of a General Education or major course. Refer to the *Schedule of Classes* for a listing of LINKS writing courses.

Most freshmen in the College of Engineering take a special sequence of courses that fulfill the Entry Level and Area A General Education requirements.

Academic Communities for Excellence (ACE), a component of the UCSB Writing Program, offers sections of writing classes to fulfill the Entry Level Writing Requirement and Area A General Education requirements. The program offers a unique opportunity for EOP students to develop their writing and critical reading skills. Small class size enables students to receive intensive conferences and close communication with support services.

Graduate students employed as teaching assistants in the Writing Program are required to take a two-quarter sequence: 501A in the spring prior to and 501B in the fall concurrent with their first teaching assignment. In addition, all TAs must be enrolled in Writing 500, Directed Teaching, every quarter they teach in the program.

Advising and Information

The Writing Program office is open for student advising Monday-Friday, 8:00 a.m.-12 p.m. and 1:00-4:00 p.m. Students are encouraged to talk with Writing Program staff and faculty advisors to plan a program of writing courses that will help them to achieve their academic and professional goals.

Writing Prizes

The annual Specialty Merchandise Corporation Business Writing contest is open to individuals

and groups of students who have taken Writing 109AC and Writing 109EC. Information about the contest, with application forms and deadlines, is available in the Writing Program office. Specialty Merchandise Corporation also sponsors the Annual Lecture in International Business Communications.

Undergraduate Program

Minor—Professional Writing

The Writing Program offers a minor in professional writing for intermediate and advanced students in all majors.

Students will experience both theoretical and practical coursework via research seminars in the rhetoric of professional writing, and in editing and publishing, as well as an internship.

All courses applied to the minor must be completed on a letter-grade basis. These include both courses offered in the Writing Program and those offered by other departments and applied to the minor. Students are subject to all course prerequisites and any major restrictions in enrolling for courses as established by departments, so please consult the UCSB *General Catalog* and the quarterly *Schedule of Classes* publications to ensure eligibility to enroll.

Preparation for the minor. Writing 2 (or equivalent).

Upper-division requirements. Twenty-two to 24 units, distributed as follows:

- A. Two courses from Engineering 103, Writing 105NM, 105MW, 109AC, 109EC, 109ES, 109GS, 109ST, 109JW, 109MW, 110MK, 120, 125, 156 or 199.
- B. One course from 109AA-ZZ.
- C. Ten to 12 units from Writing 150, 151A-B or 155A-B or 157A-B (choose from either the 151 series or the 155 series or the 157 series, but not from a combination of all).

Note: Substitutions and waivers are subject to approval by the chair of the department. Please see page 118 for special conditions governing minors in the College of Letters and Science.

Students who wish to minor in professional writing may meet with a Writing Program advisor to review requirements and to plan and record their progress.

Writing 150 and 151A-B or 155A-B or 157A-B are the final courses in a sequence of upper-division requirements for the minor in professional writing. Instructor permission is required for registration in these courses. Students who will have completed at least two of the three upper-division courses (Sections A and B) for the minor may, in their senior year, be admitted to Writing 151A-B or 155A-B or 157A-B by the following process:

Present a portfolio of representative work, a statement of interest in completing the minor, and an application form which asks students to describe their familiarity with communication software and hardware, as well as with a variety of writing genres. Deadline for application is the first week in the quarter Fall quarter. (Consult the Writing Program office for the specific date at the beginning of each quarter.)

Placements in Writing 151A-B, 155A-B, and 157A-B are limited, and not all students who wish to complete the minor will be able to do so. Decisions will be based on the applicant's

promise for profiting from and contributing to Writing 151A-B or 155A-B or 157A-B as well as to the internship experience.

Writing Courses

LOWER DIVISION

1. Approaches to University Writing

(4) STAFF

Open to students who have not satisfied the Entry Level Writing Requirement. Not open for credit to students who have completed English 1 or Writing 1E or 1LK.

Principles of critical reading, thinking, and writing in the university. Students analyze academic discourse, develop rhetorical strategies for exposition and argument, practice examination writing, and write and revise papers. Completion with a grade of C or better meets the Entry Level Writing Requirement.

1E. Approaches to University Writing for Engineers

(4) STAFF

Prerequisites: freshmen only; open to ECE, Chemical Engineering, Mechanical Engineering, and Computer Engineering majors only.

Open to students who have not satisfied the Entry Level Writing Requirement. Not open for credit to students who have completed English 1 or Writing 1 or 1LK.

Principles of critical reading, thinking, and writing in the university. Students analyze academic discourse, develop rhetorical strategies for exposition and argument, practice examination writing, and write and revise papers.

1LK. Approaches to University Writing

(4) STAFF

Open to students who have not satisfied the Entry Level Writing Requirement. Concurrent enrollment required in linked companion course. Not open for credit to students who have completed English 1 or Writing 1 or Writing 1E.

Principles of critical reading, thinking, and writing in the university. Students analyze academic discourse, develop rhetorical strategies for exposition and argument, practice examination writing, and write and revise papers. Completion with a grade of C or better meets the Entry Level Writing Requirement. This course is taught in conjunction with a specified companion course. Readings and assignments are related to the subject matter of the companion course.

2. Academic Writing

(4) STAFF

Prerequisite: satisfaction of Entry Level Writing Requirement or Linguistics 12.

Not open for credit to students who have completed English 2 or Writing 2E or 2LK.

A writing course focusing on developing analytical skills, synthesizing multiple sources, sustaining coherent arguments, and revising for clarity of style. Reading and writing assignments are drawn from a range of academic disciplines.

2E. Academic Writing for Engineers

(4) STAFF

Prerequisite: satisfaction of Entry Level Writing requirement or Linguistics 12; freshmen only; open to ECE, Chemical Engineering, Mechanical Engineering, and Computer Engineering majors only.

Not open for credit to students who have completed English 2, Writing 2 or 2LK.

A writing course focusing on developing analytical skills, synthesizing multiple sources, sustaining coherent arguments, and revising for clarity of style. Reading and writing assignments are drawn from a range of engineering disciplines.

2LK. Academic Writing

(4) STAFF

Prerequisites: satisfaction of Entry Level Writing Requirement or Linguistics 12; and coenrollment in linked companion course.

Not open for credit to students who have completed English 2 or Writing 2 or 2E.

A writing course focusing on developing analytical skills, synthesizing multiple sources, sustaining

coherent arguments, and revising for clarity of style. This course is taught in conjunction with a specified companion course in such areas as classics, music, psychology, sociology. Readings and assignments are related to the subject matter of the companion course.

50. Writing and the Research Process

(4) STAFF

Prerequisite: Writing 2 or 2E or 2LK.

Not open for credit to students who have completed English 3 or Writing 50E or 50LK.

A writing course addressing the analytical skills underlying the research process of academic and professional communities. Sections vary in topic and disciplinary emphasis.

50E. Writing and the Research Process for Engineers

(4) STAFF

Prerequisite: Writing 2 or 2E or 2LK; freshmen only; open to ECE, Chemical Engineering, Mechanical Engineering, and Computer Engineering majors only.

Not open for credit to students who have completed English 3 or Writing 50 or 50LK.

A writing course addressing the analytical skills underlying the research process of academic and professional communities within engineering.

60. Tutoring Writing

(4) STAFF

Prerequisite: Writing 2 or 2E or 2LK.

Prepares students to tutor writing at the college level. Students respond to tutoring scenarios, respond to each other's writing, learn to work with OWLS (on-line writing labs), and prepare a resource notebook for tutoring.

99. Independent Studies in Writing

(1-5) STAFF

Prerequisites: lower-division standing; satisfaction of Entry Level Writing Requirement and Writing 2 requirement; consent of instructor.

Students must have a 3.0 GPA for the preceding three quarters and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined.

UPPER DIVISION

105CN. Writing Creative Nonfiction

(4) STAFF

Prerequisites: Writing 2 or 2E or 2LK; upper-division standing.

Course in creative nonfiction, a prose form whose practitioners consciously merge elements of traditional fiction and nonfiction. Students get extensive practice in reading and composing within this genre.

105IN. Applying Business Communication Concepts Through Internships

(4) STAFF

Prerequisites: upper-division standing; concurrent internship (60-70 hours); consent of instructor.

Students of all majors analyze and direct their internship practices, applying theory and communication skills to their experiential learning. Reading, discussion, and practice in business communication (the memo, letter, oral presentation, and report of findings) to develop workplace literacy.

105MW. Magazine Writing for Publication

(4) STAFF

Prerequisites: Writing 2 or 2E or 2LK; upper-division standing.

Focuses on writing interviews, reviews, and general articles for print media, and submitting them for publication. Students learn about audience and the demands of each genre, as well as editing skills and the tyranny of deadlines.

105NM. Writing in New Media

(4) STAFF

Prerequisites: Writing 2 or 2E or 2LK; upper-division standing.

Focuses on new modes of writing and publishing enabled by computer technology. Projects involve analyzing, creating, reading about, and reflecting on writing in new media. Students create works suitable for web or other digital formats.

105RW. Rhetoric and Writing

(4) STAFF

Prerequisites: Writing 2 or 2E or 2LK; upper-division

standing.

Traces the history, theory, and practice of rhetoric (effective persuasion) from classical times to the modern era. Students analyze key works and apply rhetorical strategies in written argumentation.

109AA-ZZ. Writing for the Disciplines

(4) STAFF

Prerequisites: Writing 2 or 2E or 2LK; upper-division standing.

May be repeated for credit provided letter designations are different.

Analysis and practice of various forms of academic and professional writing for and in the disciplines.

109AC. Writing for Accounting Economics

(4) STAFF

Prerequisites: Writing 2 or 2E or 2LK; upper-division standing.

Writing practices in academic and professional accounting. Research sources include publications, databases, case studies, interviews. Assignments include reports, correspondence, memorandum, presentations. Attention to critical thinking, research techniques, international context, use of information technology, and visual communications.

109EC. Writing for Economics and Business Economics

(4) STAFF

Prerequisites: Writing 2 or 2E or 2LK; upper-division standing.

Not open for credit to students who have completed English 109C.

Analysis and practice in business genres that focus on writing strategy, concise style, and visual aspects of communication. Attention to typical formats such as letters, memos, e-mail, proposals, and collaborative reports.

109ED. Writing for the Teaching Professions

(4) STAFF

Prerequisites: Writing 2 or 2E or 2LK; upper-division standing.

Not open for credit to students who have completed English 106WP.

Research, discussion, and analysis of current issues in educational theory, practice, and policy. Appropriate for prospective credential students.

109ES. Writing for Environmental Studies

(4) STAFF

Prerequisites: Writing 2 or 2E or 2LK; upper-division standing.

Not open for credit to students who have completed English 109I.

Analysis and practice of various forms of writing for environmental studies, both academic and professional. Attention to research methods, design of papers, development of graphics, stylistic clarity, and editing strategies.

109F. Writing About Film

(4) STAFF

Prerequisites: Writing 2 or 2E or 2LK; upper-division standing.

Not open for credit to students who have completed English 109K or Writing 109FS.

Analysis and practice of various forms of writing for film, including argumentative writing, film reviews, and essays of special interest to majors in film studies, English, and social sciences.

109GS. Professional Writing for Global Careers

(4) STAFF

Prerequisites: Writing 2 or 2E or 2LK; upper-division standing.

Analysis and practice of writing in global contexts related to business, government, and non-governmental organizations. Attention to typical formats such as letters, memos, proposals, and collaborative reports. Emphasis on linguistics and cultural factors affecting international research and document design.

109HP. Writing for Health Professionals

(4) STAFF

Prerequisites: Writing 2 or 2E or 2LK; upper-division standing.

Not open for credit to students who have completed English 109M.

Strategy, analysis, format for various types of academic and professional writing in the health care field. Contemporary topics/issues will be the basis of study, discussion, research, and writing.

109HU. Writing for the Humanities

(4) STAFF

Prerequisites: Writing 2 or 2E or 2LK; upper-division standing.

Not open for credit to students who have completed English 109H.

Analysis of various forms of writing for the humanities, both academic and professional. Attention to modes and methods of argumentation, research methods, design of papers, stylistic clarity, and editing strategies.

109JW. Journalistic Writing

(4) STAFF

Prerequisites: Writing 2 or 2E or 2LK; upper-division standing.

Analysis and practice of news writing for print and broadcast with focus on inverted pyramid style, interview techniques, background research, editing, writing to deadline, and ethical issues.

109L. Legal Writing

(4) STAFF

Prerequisites: Writing 2 or 2E or 2LK; upper-division standing.

Not open for credit to students who have completed English 109D.

Practice in applying rules to facts in analyzing issues and in writing clearly, succinctly, and cogently in various forms of legal discourse such as case briefs, law essays, letters, short office memoranda, and appellate briefs. Fundamentals of legal research are touched upon.

109SS. Writing for the Social Sciences

(4) STAFF

Prerequisites: Writing 2 or 2E or 2LK; upper-division standing.

Not open for credit to students who have completed English 109B.

Analysis and practice of various research methods and forms of writing in the social sciences including qualitative/ethnographic, quantitative, interpretive, and theoretical. Writing projects such as literature reviews, proposals, case studies, scientific reports, interviews. Attention to disciplinary resources, formal conventions, graphics, and style.

109ST. Writing for Science and Technology

(4) STAFF

Prerequisites: Writing 2 or 2E or 2LK; upper-division standing.

Not open for credit to students who have completed English 109A.

Analysis and practice of various forms of scientific and technical writing, both academic and professional, such as reports, proposals, journal articles, and abstracts. Attention to research methods, design of papers, development of graphics, technical style, and editing strategies.

109V. Writing for the Visual Arts

(4) STAFF

Prerequisites: Writing 2 or 2E or 2LK; upper-division standing.

Not open for credit to students who have completed English 109E.

Analysis and practice of various forms of writing for the visual arts, including reviews of film and art shows, grant proposals, and professional résumés. Of special interest to majors in the arts.

109WS. Writing for Women's Studies

(4) STAFF

Prerequisites: Writing 2 or 2E or 2LK or equivalent; upper-division standing.

Analysis and practice of various forms of writing and research methods in women's studies. Attention to strategies for argumentation, analysis, organization and documentation used in humanities and social sciences. Writing projects incorporate interdisciplinary and multimedia sources.

110L. Advanced Legal Writing

(4) STAFF

Prerequisites: Writing 109L; upper-division standing.

Not open for credit to students who have completed English 109L.

Practice for skilled writers on a variety of legal documents, such as in-depth office memoranda, discovery, pleadings, advanced motion practice and oral argument. Also addressed are intermediate techniques for gathering and applying evidence and law to hypothetical client problems.

110MK. Professional Communication in Marketing and Public Relations

(4) STAFF

Prerequisites: Writing 109EC or 109GS; upper-division standing.

Practice for skilled writers in the genres commonly used for marketing, public relations, and advertising. Instruction in creating materials to promote a product or service including press releases, brochures, print ads, and a professional marketing plan.

120. Advanced Topics in Writing

(4) STAFF

Prerequisites: Writing 2 or 2E or 2LK; upper-division standing.

Not open for credit to students who have completed English 109F. May be repeated for credit to a maximum of 12 units.

Production of complex documents; visual aspects of communication; stylistic clarity; editing for varied purposes. Each section will have a special focus, such as electronic writing or proposal writing.

121. Advanced Topics in Creative Nonfiction

(4) STAFF

Prerequisites: Writing 2 or 2E or 2LK; upper-division standing.

May be repeated for credit to a maximum of 12 units.

Readings in, and production of, texts in several creative nonfiction modes, including autobiographical narrative, segmented essay, and research supported fact pieces. Each section has a special topics focus, such as nature writing. Course is conducted in a workshop format.

125. Special Topics in Academic and Professional Writing

(4) STAFF

Prerequisites: Writing 2 or 2E or 2LK; and, Writing 50 or 50E or 50LK or 109AA-ZZ, or English 10; upper-division standing.

Directed group reading, writing, and discussion of specialized topics in writings such as manuscript preparation, editing of tables and figures, and writing of multimedia materials.

150. Internship in Writing

(2-4) STAFF

Prerequisites: upper-division standing; consent of instructor.

May be repeated for credit to a maximum of 8 units. Fieldwork experience and weekly seminar.

151A. Seminar in Professional Editing

(4) STAFF

Prerequisites: Engineering 103 or Writing 109AC or 109EC or 109ES or 109GS or 109ST; a prior course from Writing 109AA-ZZ; upper-division standing; consent of instructor. Must be admitted to the Minor in Professional Writing for enrollment.

Not open for credit to students who have completed Writing 151 or 154. Course required for credit in the minor.

Focus on grammatical and rhetorical expertise, genre and format, diction, style, tone, visuals, documentation style. Class projects include working as editors to help authors prepare texts for publication.

151B. Seminar in Professional Editing

(4) STAFF

Prerequisites: Writing 151A; concurrent enrollment in Writing 150; upper-division standing; consent of instructor.

Not open for credit to students who have completed Writing 151 or 154. Course required for credit in the minor.

Focus on grammatical and rhetorical expertise, genre and format, diction, style, tone, visuals, documentation style. Class projects include working as editors to help authors prepare texts for publication.

155A. Seminar in Technical Communication

(4) STAFF

Prerequisites: Engineering 103 or Writing 109AC or 109EC or 109ES or 109GS or 109ST; a prior course from Writing 109AA-ZZ; upper-division standing; consent of instructor. Must be admitted to the Minor in Professional Writing for enrollment.

Not open for credit to students who have completed Writing 153 or 154. Course required for credit in the minor.

Focus on grammatical and rhetorical expertise, visuals, documentation, and emphasizing information design in electronic and hardcopy documents. Topics include communication practices in the workplace; oral, graphic, and electronic literacies. Project-based course culminating in document portfolio.

155B. Seminar in Technical Communication

(4) STAFF

Prerequisites: Writing 155A; concurrent enrollment in Writing 150; upper-division standing. consent of instructor. Must be admitted to the Minor in Professional Writing for enrollment.

Not open for credit to students who have completed Writing 153 or 154. Course required for credit in the minor.

Focus on grammatical and rhetorical expertise, visuals, documentation, and emphasizing information design in electronic and hardcopy documents. Topics include communication practices in the workplace; oral, graphic, and electronic literacies. Project-based course culminating in document portfolio.

156. Grammar and Stylistics

(4) STAFF

Prerequisites: Writing 2 or 2E or 2LK; and, Writing 50 or 109AA-ZZ; upper-division standing.

Focuses on grammar and stylistics for professional writers and editors. The emphasis is practical and analytical, attending to issues of sentence structure and diction, and on the diversity of styles, formats, and audiences.

157A. Seminar in Business Communication

(4) STAFF

Prerequisites: Engineering 103 or Writing 109AC or 109EC or 109ES or 109GS or 109ST; a prior course from Writing 109AA-ZZ; upper-division standing; consent of instructor. Must be admitted to the Minor in Professional Writing for enrollment.

Practice for skilled writers in rhetorical challenges of managerial and administrative communication. Instruction in proposal development, stakeholder correspondence, case analysis, and web-based writing, with attention to audience, strategy, ethics, and organizational change.

157B. Seminar in Business Communication

(4) STAFF

Prerequisites: Writing 157A; concurrent enrollment in Writing 150; upper-division standing; consent of instructor. Must be admitted to the Minor in Professional Writing for enrollment.

Second part of the capstone series, focusing on rhetorical challenges of management strategy and public relations; investor relations; employee communication; government and non-profit communication. Students develop and complete their professional portfolio, in print and as a digital portfolio.

199. Independent Studies in Writing

(1-5) STAFF

Prerequisites: upper-division standing; consent of instructor.

Students must have at least a 3.0 grade-point average for the preceding three quarters and satisfied Area A requirements. Students are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined. Writing 199 may be repeated for credit to a maximum of 10 units.

Writing, reading, and conference with specialized research or focus topic.

199RA. Independent Research Assistance in Writing

(1-5) STAFF

Prerequisites: upper-division standing; consent of instructor.

Students must have at least a 3.0 grade-point average for the preceding three quarters and satisfied Area A requirements. Students are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199AA-ZZ courses combined. Writing 199 may be repeated for credit to a maximum of 10 units.

Faculty-supervised research assistance.

GRADUATE COURSES

250. Seminar in the Teaching of Academic Writing

(2) STAFF

Same course as Interdisciplinary 250.

Instruction in methods of teaching academic writing to undergraduates. Topics include syllabus design, sequencing of assignments, grading, and teaching students to master disciplinary conventions. Lecture plus laboratory.

251. Academic Research Writing

(2) STAFF

Same course as Interdisciplinary 251.

Instruction in the writing of graduate academic documents, including proposals, theses, course papers, articles for publication, and C.V.'s. Emphasis on writing clearly and mastering disciplinary conventions. Lecture plus laboratory.

252. Teaching Technical Communication

(2-4) STAFF

Prerequisites: graduate standing; consent of instructor.

Offers graduate students a theoretical and pedagogical foundation for teaching introductory courses in technical communication, and, in particular, UCSB's writing courses for freshman engineering majors.

270. Feminist Epistemologies and Pedagogy

(4) BORIS, OAKS

Prerequisite: Graduate standing.

Acquaints students with the scope and range of feminist epistemological critiques across disciplines and pursues issues relevant to problematizing of knowledge seeking, such as theories of agency rooted in gender, race, class, and sexuality.

272. Writing Studies Colloquium

(1-4) LUNSFORD

Prerequisite: graduate standing.

Presentations on current topics in writing studies by visiting scholars, faculty, and graduate students.

297. Graduate Studies

(4) STAFF

Prerequisites: graduate standing; consent of instructor.

Graduate credit given for an upper-division course with additional work at the graduate level.

500. Directed Teaching

(4) STAFF

Prerequisite: appointment as teaching assistant or associate.

Yields no unit credit for advanced degrees.

Teaching assistants must register during quarter of service for this course of supervision and instruction.

501A-B. Practicum in Academic Writing Instruction

(2-2) STAFF

Prerequisite: application submitted for Writing Program TA appointment.

Preparatory orientation and concurrent training for newly appointed Writing Program teaching assistants. Topics include theories of composition pedagogy, academic literacies, principles of instructional design and curriculum development, effective classroom practices, and assessment of student writing.

596. Directed Reading and Research

(1-4) STAFF

Prerequisites: graduate standing; consent of instructor.

May be repeated for credit as determined by department chair.

Group or individual tutorial.

Donald Bren School of Environmental Science & Management

Donald Bren School of Environmental Science & Management
2400 Donald Bren Hall; Telephone (805) 893-7611
Web site: www.bren.ucsb.edu

Dean: *Ernst von Weizsäcker*

UC Santa Barbara's Donald Bren School of Environmental Science & Management is a professional graduate school offering a rigorous interdisciplinary curriculum in environmental problem solving. The Bren School offers the Master of Environmental Science and Management (M.E.S.M.), a professional degree, and the Ph.D. in Environmental Science and Management, a research-oriented degree. The School's mission is to play a leading role in researching environmental issues, training research scientists and environmental management professionals, and identifying and solving environmental problems.

In the past, the diverse disciplines addressing environmental issues have developed independently. But environmental problems are inherently multidisciplinary in nature and solving them requires weaving together elements of formerly disparate disciplines and blurring traditional boundaries between them. The School brings together a range of natural and social scientists to research important environmental questions. Moreover, because environmental issues arise in legal, political, and business contexts, the School's faculty also brings together law and business professors who provide perspectives from those professional arenas. The Bren School continues to recruit faculty and will appoint several new faculty members over the next few years.

A guiding principle of the School is that the analysis of environmental problems requires quantitative training in more than one discipline and an awareness of the physical, biological, social, political, and economic decisions that arise from scientific or technological decisions. The Bren School incorporates this view of environmental science and management into its programs and equips students with the scientific

knowledge and managerial skills necessary to meet growing environmental challenges. The Bren School strives to provide a truly interdisciplinary program that goes beyond mere coursework in several disciplines to form a coherently integrated program blending teaching, research, and real-world application.

Faculty

Sarah Anderson, Ph.D., Stanford University, Assistant Professor (political science, American politics and comparative politics)

Christopher Costello, Ph.D., UC Berkeley, Associate Professor (environmental and resource economics, dynamic optimization, quantitative ecology, stochastic modeling)

Frank Davis, Ph.D., Johns Hopkins University, Professor (plant ecology, quantitative biogeography, vegetation remote sensing, ecological applications of remote sensing and geographic information systems, conservation planning, fire ecology)

Magali Delmas, Ph.D., HEC Graduate School of Management, Paris, France, Associate Professor (corporate environmental management, impact of technological and regulatory uncertainties on industry choices)

Jeff Dozier, Ph.D., University of Michigan, Professor (snow hydrology, earth system science, remote sensing and information systems)

Thomas Dunne, Ph.D., Johns Hopkins University, Professor (drainage basin and hillslope evolution, hydrology and floodplain sedimentation, applications of hydrology and geomorphology in environmental management)

James Frew, Ph.D., UC Santa Barbara, Associate Professor (applications of computing and information science to large-scale problems in environmental science, including algorithm and component development, information system specification and integration, data management, and digital libraries)

Roland Geyer, Ph.D., University of Surrey, U.K., Assistant Professor (industrial ecology and management science, green supply chain management, lifestyle assessment)

Patricia Holden, Ph.D., UC Berkeley, Associate Professor (pathogens in the environment, microbial ecology of pollutant degradation, soil microbiology)

Arturo Keller, Ph.D., Stanford University,

Professor (fate and transport of pollutants, development of technologies for containment, remediation, and monitoring)

Bruce Kendall, Ph.D., University of Arizona, Associate Professor (quantitative ecology with a focus on animal and plant population dynamics)

Charles Kolstad, Ph.D., Stanford University, Professor (industry organization and environmental/resource economics, environmental policy, structure of energy markets and environmental regulations)

Matthew Kotchen, Ph.D., University of Michigan, Assistant Professor (environmental and resource economics)

Hunter Lenihan, Ph.D., University of North Carolina at Chapel Hill, Associate Professor (community, conservation, and restoration ecology, fisheries oceanography, polar and deep-sea biology, adaptive management of marine resources)

Gary Libecap, Ph.D., University of Pennsylvania, Professor (economics, economic history, corporate environmental management)

John Melack, Ph.D., Duke University, Professor (limnology, biogeochemistry, and remote sensing with active, long-term studies in tropical Brazil and alpine and saline lakes in California)

Catherine Ramus, Ph.D., Université de Lausanne, Switzerland, Assistant Professor (environmental management, organizational behavior, negotiation, public policy)

Christina Tague, Ph.D., University of Toronto, Canada, Assistant Professor (hydrology, linkages between climate, ecology & hydrology)

Ernst von Weizsäcker, Ph.D., Freiburg University, Professor, (biology, zoology and biological cybernetics)

Oran Young, Ph.D., Yale University, Professor (environmental institutions, governance for sustainable development)

Adjunct Faculty

Lee Hannah, Ph.D., UC Los Angeles, Adjunct Assistant Professor (conservation planning, climate change)

Peter Kareiva, Ph.D., Duke University, Adjunct Professor (spatial ecology and its application to conservation planning)

Robert Wilkinson, Ph.D., University of California, Santa Barbara, Adjunct Assistant Professor (water policy, climate change, and environmental policy issues)

Affiliated Faculty

Robert Deacon, Ph.D., University of Washington, Professor (natural resources economics and public finance)

William Freudenburg, Ph.D., Yale University, Professor (environment-society relationships, resource-dependent communities)

Lorelei Moosbrugger, Ph.D., University of California, San Diego, Assistant Professor (environmental politics, public policy, comparative institutions)

Eric R.A.N. Smith, Ph.D., University of California, Berkeley, Professor (political science, environmental politics, Congress, political parties, public opinion and voting behavior)

Degree Programs

Admission

Application materials are available from the Bren School and are normally accepted for Fall quarter only. The application deadline for Ph.D. applicants who want to be considered for the campus-wide fellowship competition must apply no later than December 15. The application deadline for M.E.S.M. applicants is January 10. Applications will be accepted for both programs up until February 15, space permitting.

The Bren School welcomes applicants from prospective students from varied undergraduate majors who seek an intellectually challenging education designed to prepare them for leadership in a variety of careers in environmental problem solving. Applicants should be interested in obtaining broad and balanced training in natural science, social science, and management and participating in a program that emphasizes quantitative and analytical approaches to assessing and solving environmental problems.

Necessary background for the master's program includes one year of college-level mathematics, one year of college-level science, a course in microeconomics, and an introductory statistics course. Students lacking some of this preparation may be accepted for admission, but it is expected that deficiencies will be made up prior to entrance by means of formal course work or other arrangements agreed upon by the applicant and the School. A small number of deficiencies may be made up during the first year in residence, but these courses will not count toward the unit requirements for the MESM degree.

Admission to the Ph.D. program is highly competitive and dependent upon acceptance by a faculty sponsor with compatible research interests. To be competitive, Ph.D. applicants must have a high upper-division/graduate GPA, excellent GRE scores, and strong undergraduate/graduate preparatory coursework and/or research. Each faculty sponsor's entrance criteria beyond these minimum requirements will depend upon his or her research focus. A master's degree or equivalent is not required for admission. Applicants whose native language is not English are required to take either the Test of English as Foreign Language (TOEFL) or the International English Language Testing System (ISLTS) exam. Exemptions to this requirement will be considered for those students who have completed an undergraduate or graduate education at an institution whose primary language

of instruction is English. The minimum TOEFL score for consideration is 550 when taking the paper-based test (PBT), 213 when taking the computer-based test (CBT), and 80 when taking the internet-based test (IBT). The minimum IELTS score for consideration is an Overall Band Score of 7 or higher. TOEFL and IELTS scores must not be more than two years old at the time of application to UCSB. Requests for exceptions to this requirement will be considered for those students who have completed an undergraduate or graduate education at an institution whose primary language of instruction is English.

Master of Environmental Science and Management (M.E.S.M.)

The Master of Environmental Science and Management (MESM) is a professional degree intended for students who will enter or re-enter the work force after graduation. It is not designed as an intermediate degree for the Ph.D., although MESM graduates will be well prepared for Ph.D. study. Students are trained to work in government agencies, corporations, non-profit organizations, and consulting firms. Bren MESM graduates demonstrate clear and critical thinking, leadership skills, professionalism, and creativity that allow them to be leaders in solving the environmental problems of the 21st century.

The coursework for the master's degree is multidisciplinary, incorporating courses in natural sciences, social sciences, law, and business. The courses emphasize quantitative and analytic thinking, and train students to identify environmental problems, formulate the proper questions, and design and execute appropriate solutions, taking into account scientific knowledge (and its limits), legal constraints, and the business and social contexts of the problem. The School also brings in environmental professionals from government, business, and non-profit organizations to ensure that students' professional development reflects the integration of rigorous academic training with a sound understanding of real-world environmental problems and the needs of clients. The training not only teaches students to tackle current environmental problems, but also fosters their capacity for long-range thinking and prepares them to meet new challenges as they arise.

Degree Requirements

Each student in the MESM program must complete a minimum of 81 units distributed among three curricular components. In many cases, students take more courses than necessary to meet the 81-unit requirement in order to make up for deficiencies in preparation, fulfill course prerequisites, or build greater depth in an area of study.

Core Courses: All students in the master's program take a set of core courses to build an essential broad background. These are normally taken during the first year and currently include: *Ecology of Managed Ecosystems*, *Environmental Biogeochemistry*, *Earth System Science*, *Economics of Environmental Management*, *Data Analysis for Environmental Science & Management*, *Environmental Law & Policy*, *Business & the Environment*, *Environmental Politics & Policy*, and *Introduction to Environmental Policy*

Analysis.

Specialization: The broad understanding provided by the core classes is complemented by an in-depth specialization in an area of environmental science and management. Students choose one of the following specializations: *Coastal Marine Resources Management*, *Conservation Planning*, *Corporate Environmental Management*, *Pollution Prevention & Remediation*, *Political Economy of the Environment*, and *Water Resources Management*. With guidance from their faculty advisors, students design an individual program of study (POS) that is appropriate for the chosen specialization and their particular backgrounds and goals. Students are encouraged to include courses from other departments in their POS as appropriate.

Master's Group Project: All students pursuing the Master of Environmental Science and Management (MESM) must successfully complete a four-quarter capstone Group Project that serves as the master's thesis. Students obtain 12 units for their Group Project by enrolling in ESM 401 A, B, C, and D. Students begin the sequence in spring quarter of their first year. Students work as a team in groups of 4-5 to conduct a comprehensive analysis of an environmental problem that contains both scientific and management challenges and produce a tangible and useful product. Written and oral quarterly progress reports and participation in training workshops are required. At the end of the project, each group must submit a final report, hold a defense, and give a formal public presentation on their project. Projects involving partnerships or links with the public sector, the business community, or non-profit organizations are particularly desirable.

Doctor of Philosophy—Environmental Science and Management

The Bren School's Ph.D. program furthers the School's mission of educating high-caliber future research professors while simultaneously meeting the urgent need for innovative researchers and problem-solvers in the public and private sectors. The cornerstone of the doctoral degree is an original work of high-quality research that focuses on the diagnosis, assessment, mitigation, management, and remediation of an existing environmental problem and/or the prevention of future environmental problems. The program is designed to accommodate a wide range of research interests, from those highly focused in a particular discipline to those that are strongly interdisciplinary.

The Bren School offers a unique environment where students and faculty in many branches of environmental science and management are able to interact and create new approaches to environmental problem solving. All faculty engage in research that crosses traditional boundaries, and students are encouraged to do so as well. While crossing of boundaries is encouraged, the traditional requirement that the dissertation be of exceptional quality is upheld, which requires that students become experts in their fields (whether their fields have a multidisciplinary or disciplinary focus). Students who wish to obtain a stronger multi-disciplinary background before focusing on one research area should enroll in our MESM program and

apply to the Ph.D. program in the second year.

The Ph.D. program at the Bren School is a mentoring program. Students should choose the Bren School because their research interests are complementary to those of a specific faculty member or group of faculty.

Degree Requirements

The Ph.D. program requirements are highly individualized. However, students are required to complete a minimum of one seminar in each of the following three categories over their Ph.D. career at Bren:

Problem Based—ESM 595PB: exploration of a problem oriented-topic (e.g., management of invasive species, fisheries management, climate change, and policy responses).

Skills Based—ESM 595SB: development of such important skills as academic writing, proposal writing, and critiquing.

Speaker Series—ESM 595SS: analysis and discussion of presentations by experts about a particular environmental problem theme and its solutions.

Seminars are typically led by two Bren faculty members representing both natural and social science perspectives. The purpose of the seminars is to enhance and promote meaningful integration and to encourage students to expand their disciplinary thinking.

The Ph.D. is not a unit-count degree, but a research degree awarded upon demonstration of academic excellence and performance of original research.

Ph.D. students must form a Ph.D. committee by the beginning of fall quarter of their second year of study. The committee must include three ladder faculty; two of which must be from the Bren School, (at least one member must have greater than zero percent appointment.) The committee chair must be a member of the Bren School faculty. The Bren School faculty as a whole approves the composition of the Ph.D. committee and reviews each Ph.D. student's progress annually.

Ph.D. students complete an individual program of study determined in consultation with their Ph.D. committee. Normally, at the end of the second year, but no later than the end of the third year, the Ph.D. committee prepares a written examination that tests the student's knowledge of his/her specialization in the context of environmental science and management, as well as the student's research skills, problem-solving skills, and ability to do academic work. After passing the written exams, the student prepares a written dissertation proposal, and the Ph.D. committee conducts an oral examination. The oral examination is based on the dissertation proposal, readiness to do the required research, and preparation and aptitude for completion of the Ph.D. program. Upon successful completion of the oral examination, the student advances to candidacy. This normally occurs in the third year but must occur no later than the end of the fourth year in the program.

For the Ph.D. degree, students must present a dissertation that demonstrates their ability to contribute significant, independent, original research in their major field. Upon completion of the dissertation to the satisfaction of the student's Ph.D. committee, a public lecture on

the research must be presented, followed by a closed-door defense before the Ph.D. committee.

Environmental Science and Management Courses

GRADUATE COURSES

200. Case Studies in Interdisciplinary Environmental Problem Solving

(5) STAFF

Examination of case studies illustrating that understanding, solving, and preventing environmental problems requires pooling expertise from multiple disciplines and constructive dialogue between diverse groups.

201. Ecology of Managed Ecosystems

(4) DAVIS

Principles of individual ecology, population ecology, community ecology, and ecosystem ecology. Emphasis on applications (conservation, resources management, ecological effects of pollution and habitat fragmentation, etc.).

202. Environmental Biogeochemistry

(4) KELLER, MELACK, HOLDEN

Prerequisites: Chemistry 1A-B-C or equivalent.

Recommended preparation: ESM 203.

Biogeochemical processes as applied to the earth's atmosphere, oceans, land and inland waters, and applications to environmental issues such as eutrophication, toxic pollution, carbon sequestration and acidification.

203. Earth System Science

(4) DUNNE, DOZIER

Prerequisite: Geography 3 or equivalent.

Energy and mass transport as applied to the atmosphere, oceans, and land and models of the Earth's climate and hydrology.

204. Economics of Environmental Management

(4) KOLSTAD, COSTELLO

Prerequisite: ESM 251 or equivalent.

Environmental regulation (incentives and command control), asymmetric information (cost revelation and auditing), regulatory incidence, dynamics and discounting, exhaustible and renewable resources, valuation, environmental macroeconomics, trade and the environment, comparative regulatory analysis.

206A-B-C. Data Analysis for Environmental Science and Management (1-1-2) KENDALL, KOTCHEN

Prerequisites: Mathematics 3A-B-C or equivalent.

A three-quarter, in-progress sequence course with final grades given upon completion of ESM 206C.

Develop skills and conceptual framework to effectively use data to solve practical problems. Topics include descriptive statistics, hypothesis testing, experimental design, exploratory data analysis, probability and uncertainty, time series analysis, and spatial stats. Emphasis on case studies from environmental problems.

207. Environmental Law and Policy

(4) STAFF

Basic elements of the legal system as it specifically relates to environmental issues. Study of the different stages and different institutions involved in environmental policy making.

208. Organizational Theory and Behavior

(4) RAMUS

Individuals play an important role in leading organizations toward environmental sustainability. Participants learn about their own behaviors which can effectively influence the environmental decision-making of groups, organizations, and society. Course explores both theory and practice.

209. Financial Management

(2) STAFF

Introduction to corporate financial management

and reporting. Topics include the function of stock markets, discounted cash flows, investment appraisal, valuation of bonds and stocks, the capital structure decision, the accounting model, financial reporting to stockholders, and financial statement analysis.

210. Business and the Environment

(4) LIBECAP

Introduction to business objectives and structure, discussion of new business models and tools that incorporate principles of environmental management and corporate performance. Emphasis on corporate strategies that deliver value to shareholders while responding to environmental concerns.

211. Applied Population Ecology

(4) KENDALL

Prerequisite: ESM 201 or equivalent.

Examination of the application of population ecology to conservation of rare species and management of harvested populations. Topics include population regulation, population viability analysis, fisheries management, metapopulation dynamics, and population monitoring.

212. Biological Community Survey and Analysis

(4) DAVIS

Prerequisite: ESM 201.

Design and execution of field sampling campaigns to characterize, map and inventory plant and animal communities. Includes review of basic sampling theory, measurements for terrestrial vegetation, vertebrate and invertebrate survey methods, multivariate analysis of community data, vegetation and species habitat mapping and modeling.

213. Ecological Effects of Pollutants

(4) STAFF

Prerequisites: ESM 201 and 202.

Case study-oriented course examining the effects of pollutants in natural and human-dominated ecosystems. Topics include identification and quantification methods, contaminant sources and effects, predictive methods and restoration.

214. Bioremediation

(4) HOLDEN

Concepts and approaches to correct and alleviate the effects of environmental pollution using biological processes. Biochemical, ecological and physicochemical aspects of remediation and mitigation. Assessing and monitoring applicability/efficacy of biological treatment. Natural and engineered methods for adversely affected biological resources.

214L. Laboratory in Bioremediation

(1) HOLDEN

Prerequisite: ESM 214 (may be taken concurrently).

Familiarization with the systems used for biologically treating nonhazardous and hazardous wastes. Bench scale laboratory exercises demonstrate basic principles at work in biodegradation. Use of biological reactors applicable to both ex situ and in situ treatment.

215. Landscape Ecology

(4) DAVIS

Prerequisite: ESM 201.

Relationships between spatial patterns in landscape structure (physical, biological, and cultural) and ecological processes. Role of ecosystem pattern in mass and energy transfers, disturbance regimes, species' persistence, and applications of remote sensing and GIS for landscape characterization and modeling.

217. Restoration Ecology

(4) LENIHAN

Prerequisites: ESM 201 or equivalent; graduate standing.

Is restoration possible? What degraded ecosystems are good candidates for restoration? Use of ecology to design and implement restorations and the criteria to evaluate their success. Field labs provide students with practical tools to approach these issues.

219. Microbial Processes in the Environment

(4) HOLDEN

Prerequisite: ESM 202 or equivalent.

Microbes are the most abundant organisms on

earth and are responsible for most biogeochemical cycling. Who and where are they, what do they do, and how? This course provides an integrated understanding applicable to managing the environment and natural resources.

219L. Laboratory in Microbial Processes (1) HOLDEN

Prerequisite: *ESM 219 (may be taken concurrently).*

Introduction to laboratory based tools and techniques for detecting and numerating, and describing what microbes do in natural and polluted samples.

222. Fate and Transport of Pollutants in the Environment (4) KELLER

Prerequisite: *ESM 202.*

Transport and biogeochemical transformation of pollutants in the environment. Review of pollutant properties and media characteristics that affect transport, accumulation, and degradation of pollutants. Basic tools for managing pollutants in the environment, including prevention, detection, and remediation.

223. Soil and Groundwater Quality Management (4) STAFF

Prerequisites: *ESM 202 and 203.*

Recommended preparation: *ESM 222 and groundwater hydrology.*

Focuses on protection and remediation of contaminated aquifers. Covers the determination of groundwater quality objectives based on risk assessment, approaches for protecting or remediating aquifers and contaminated soils, and cost evaluation of management strategies.

223L. Laboratory in Management of Soil and Groundwater Quality (1) STAFF

Prerequisites: *ESM 223 (may be taken concurrently); ESM 222.*

A hands-on approach to learning how to sample and treat contaminated soil and groundwater. The series of lab modules covers field sampling, analysis, unit treatment processes and a remediation design project. Students are presented with state-of-the-art technologies for dealing with contamination.

224. Sustainable Watershed Quality Management (4) KELLER

Prerequisites: *ESM 202 and 203.*

Recommended preparation: *ESM 222, and 234 or 235.*

Sustainable management requires an evaluation of the capacity of various components of a watershed to assimilate a pollutant load without deterioration. Covers development of a watershed management plan, focused on water quality considerations for human and ecological health.

225. Water Policy (4) WILKINSON

Prerequisite: *Ph.D. and second-year MESM students only.*

Explores key water policy issues in the context of science, technology, and the practical management of water systems. Focuses on the nexus of science, technology, economics, law, and the role social and political factors play in the policy process.

228. Environmental Field Methods (4) STAFF

Prerequisite: *Ph.D. and second-year MESM students only.*

Covers various field techniques related to evaluation of water quality, sampling environmental matrices, and collection of biota. Class work focuses on experimental design and instrument theory. Field trips and labs provide exposure to sampling techniques and data manipulation.

232. Environmental Modeling (4) COSTELLO

Prerequisites: *Mathematics 3A-B-C or equivalent.*

No previous computer experience required. Introduction to the development, evaluation, interpretation and presentation of models as applied to environmental problems. Course consists of theory

and many practical examples building and interpreting models using computers.

234. River Systems (4) DUNNE

Prerequisite: *ESM 203.*

Hydrologic and geomorphic basis of environmental management problems concerning large river systems. Analysis of the processes of flooding, sedimentation, and morphological change in channels, floodplains, deltas, and alluvial fans. Effects of climate, land use, and engineering.

235. Watershed Analysis (4) DUNNE

Prerequisite: *ESM 203.*

Hydrologic and geomorphic basis of environmental management problems concerning land surfaces and channels in small drainage basins, including the effects of land use and engineering. Emphasis placed on the use of theory and field methods.

236. The Mountain Snowpack (3) DOZIER

Prerequisites: *ESM 203, intermediate skiing ability, and consent of instructor.*

Intensive field, laboratory and classroom study of physical processes in the mountain snowpack. Snow accumulation and ablation, metamorphism, physical and chemical properties, and remote sensing. Role of snow in watershed hydrology, water resources and recreation. Normally offered spring break.

237. Climate Change Impacts on Hydrology and Ecology (4) TAGUE

Global climate change may dramatically alter water resources and the ecosystems that depend upon them. Overview of research on current and projected future hydro-ecological impacts of a changing climate from local to global scales.

241. Environmental Politics and Policymaking (4) YOUNG

The politics of environmental policymaking from agenda formation to the stages of implementation, assessment, and reforms. Emphasis on national and state level policymaking in the U.S. coupled with a consideration of interactions across levels of social organization and comparisons across socio-political systems.

242. Natural Resource Economics and Policy (4) COSTELLO

Prerequisite: *ESM 204 or equivalent.*

Economic principles and policy issues of the use of exhaustible and renewable resources including fossil fuels, water, minerals, fisheries, forests, and biodiversity. Management of resource markets on regional and international scale.

243. Environmental Policy Analysis (4) ANDERSON

Prerequisites: *ESM 204 and ESM 241.*

Developing and analyzing environmental policies involves balancing social, political, and economic considerations. This process is covered, including problem identification, formation of alternative policy responses, methods of analyzing and selecting the most appropriate policy response, and effective communication of results to clients/policymakers.

245. Cost-Benefit Analysis and Nonmarket Valuation (4) KOTCHEN

Prerequisite: *ESM 204.*

Economic theory of environmental policy, with special emphasis on the role of cost-benefit analysis. Techniques for estimating economic values for nonmarket environmental resources. Case studies involving ecosystem protection, pollution control, and other topics to illustrate the necessary analytical tools.

247. Governance for Sustainable Development (4) YOUNG

Same course as Political Science 292.

Examination of the demand for governance in conjunction with efforts to achieve environmental, economic, and social goals. Special attention to alternative approaches to the supply of governance

at the global level as well as to interaction between governance systems addressing distinct issues.

248. Environmental Institutions: Rights, Rules, and Decision-Making Systems (4) YOUNG

Same course as Political Science 293.

Comparative study of management systems or regimes addressing natural resources and environmental concerns and operating at scales ranging from local to global. Topics include characterization of individual regimes and factors affecting the formation, evolution, and effectiveness of these institutional arrangements.

251. Microeconomics Principles for Environmental Management (2) KOTCHEN

INSTRUCTS students how to think like economists and to formulate policy questions using simple economic tools. Topics include: The market forces of supply and demand, efficiency of private markets, the costs of taxation, externalities and public goods.

257. Coastal Marine Policy (4) STAFF

Conceptual approaches and analytical tools used in marine ecosystems management, marine biodiversity protection, and integrative watershed planning. Review of relevant international, federal, and state marine policies and programs.

259. The Role of Law in Coastal Zone Management (4) STAFF

The role of law in protecting and allocating natural resources in the coastal zone. Property rights, market mechanisms, social norms and regulatory systems that compose California's coastal management regime and comparisons with law and practice in other jurisdictions, nationally and internationally.

260. Applied Marine Ecology (4) LENIHAN

Prerequisite: *ESM 201.*

The application of ecological principles and methods to environmental problems in marine ecosystems. Emphasis is placed on design and execution of field sampling and experiments to access biological impacts of anthropogenic disturbances and restoration activities. Concepts illustrated with case studies.

261. Management of Scientific Data (4) FREW

Theory, techniques, and tools for managing heterogenous scientific information. Database architectures and data models. Metadata standards and data characterization. Design and use of relational databases. Aspects of the science data life cycle: collection, storage, search, retrieval, analysis, presentation.

263. Geographic Information Systems (4) FREW

Advanced introduction to geographic information system (GIS) theory and technology, emphasizing spatial analysis and cartographic presentation. Typical algorithms and data structures. Role of GIS in environmental information management. Integration of GIS with other analytical tools.

266. Remote Sensing of the Environment (4) DOZIER

Prerequisites: *ESM 203.*

Advanced introduction to remote sensing theory, technology, and applications in environmental science and management. Survey of principles and analytical methods throughout the electromagnetic spectrum. Integration of remote sensing with other tools.

270. Conservation Planning and Priority Setting (4) DAVIS

Prerequisite: *ESM 201.*

Analytical approaches that can be used to direct energy and resources toward conservation that yields the greatest return on investment. Case studies of how government agencies, international multilateral institution and non-governmental agencies identify where to invest their conservation efforts.

274. Competitive Advantage Strategies

for Environmental Innovation**(4) LIBECAP**

Analysis of the competitive forces that an organization launching environmental innovations considers in devising strategies for entrepreneurial success. Technology or product benefits to society and the firm, industry and competitor analysis, production processes and nature of input supplies, identification of target markets and consumer response.

275. Principles and Practice of Environmental Planning**(4) STAFF**

Principles, concepts, and techniques of environmental planning at the state, regional, and local government levels, with emphasis on emerging trends in addressing environmental problems. Green plans, sustainable communities, coastal planning, agricultural land preservation, smart development, new urbanism, and mitigation monitoring.

276. Ethical Decision-Making for the Environment**(4) STAFF**

Ethical and legal issues surrounding environmental decision-making by individuals and in organizations. Environmental challenges facing public, non-profit and for-profit organizations. Analysis of behavior according to ethical standards; examination of opportunities for corporate social responsibility and initiatives; application of ethical frameworks to decision-making.

277. The Law of Environmental Management**(4) STAFF***Prerequisite: ESM 207.*

Knowledge and skills for regulatory analysis. How to deal with administrative materials and communicate with key players. Compliance, compliance counseling and the enforcement process. Environmental implications of product development, business or process expansion, and environmental aspects of typical business transactions.

281. Corporate Environmental Management**(4) DELMAS***Prerequisite: ESM 210.*

Prepares students to use creatively conceptual tools and management strategies to improve the environmental performances of firms. Corporate, societal, and political barriers to implementing these innovative strategies will be analyzed and methods for overcoming these constraints discussed.

282. Industrial Ecology**(4) GEYER**

Methods for evaluating the environmental performance of businesses, products, and processes are examined through case studies, including analyses of industrial material flows, energy flows, environmental performance metrics, life cycle assessments and design for environmental methodologies.

283. Environmental Negotiation**(4) RAMUS**

Strategic negotiations take place daily. Their successful outcome depends on the competence of the negotiators. Using environmental case studies and negotiation exercises, course participants gain a hands-on understanding of the negotiation process and how they can influence it.

284. Environmental Accounting and Financial Management**(4) STAFF***Prerequisite: ESM 279 or equivalent.*

Introduction to environmental accounting and its role in corporate financial management. Extensive use of case studies allows consideration of environmental accounting's role in corporate financial reporting, the management and control of enterprises and environmental accounting in long-term investment decisions.

286. Environmental Risk Management**(4) STAFF**

Theory and practice of managing exposure to environmental risks from a positive and normative perspective. Emphasis on the roles of science, politics, management, and how these forces interact. Real-

world business cases reveal decision problems faced by environmental risk managers.

288. Energy, Technology and the Environment**(4) GEYER**

Covers the main physical principles of energy conversion and the environmental impacts related to it. Also explores the balance between resource availability and demand, and the relationship between energy use and technology.

289. Green Supply Chain Management**(4) GEYER***Prerequisite: ESM 282.*

Course combines the theories of supply chain management and industrial ecology to explore the environmental and economic performances of production and consumption systems and develop and apply the evaluation methods and management tools necessary to green supply chains.

294. Advanced Special Topics in Environmental Law**(2-4) STAFF***May be repeated for credit with changes in content.*

Advanced topic in environmental law.

296. Advanced Special Topics in Environmental Management**(2-4) STAFF**

Covers advanced special topics in environmental management.

297. Advanced Special Topics in Environmental Policy**(2-4) STAFF**

Covers advanced special topics in environmental policy.

299. Advanced Special Topics in Environmental Science**(2-4) STAFF**

Advanced topics in environmental science.

401A. Group Project in Environmental Science and Management**(4) TAGUE***Prerequisite: Graduate standing. MESM students only.*

First quarter of a year-long group study of an environmental problem. Includes in-class training sessions to develop skills necessary to efficiently and effectively conduct the study.

401B. Group Project in Environmental Science and Management**(4) STAFF***Prerequisite: ESM401A - MESM students only.*

In-progress grading with final letter grade given upon completion of ESM 401C.

Second quarter of a year-long group study of an environmental problem.

401C. Group Project in Environmental Science and Management**(4) STAFF***Prerequisite: ESM401A, ESM401B. MESM students only.*

In-progress grading with final letter grade given upon completion of ESM 401C.

Final quarter of a year-long group study of an environmental problem. Requires completion of a final report, policy brief, poster, and defense, and public presentation.

410. Internship Practicum**(1) STAFF***Prerequisite: completion of a summer internship.*

Students complete a summer internship, prepare a short paper and present internship experiences to the Bren School community through an informal presentation.

430. Workshop in Environmental Science and Management**(.5-1.0) STAFF**

Workshops to develop professional skills for careers in environmental science and management.

436. Legal Issues in Environmental Problem Solving**(.5-1.0) STAFF***May be repeated for credit with changes in content.*

Workshops to expose students to a range of legal subject areas and to develop unique skills.

437. Writing Skills for Environmental Professionals**(.5-2.0) STAFF***May be repeated for credit with changes in content.*

Workshops to expose students to a range of technical and business writing.

595AA-ZZ. Group Studies**(2-4) STAFF***May be repeated for credit provided letter designations are different.*

- C. Environmental Biogeochemistry
- E. Environmental Problems—Science and Solutions
- F. Pollution Prevention and Remediation
- G. Applied Ecology
- I. Coastal Marine Science and Management
- K. Environmental Information
- M. Corporate Environmental Management
- P. Environmental Policy and Economics
- R. Research methods
- S. Speaker Series
- W. Water Resources
- AA. Hydrology/Geomorphology (PhD level)
- BB. Snow Science (PhD level)
- DD. Watershed Quality Management (PhD level)
- EE. Aquatic Ecology (PhD level)
- FF. Environmental Economics (PhD level)
- GG. Applied Ecology (PhD level)
- II. Institutions and Environment (PhD level)
- JJ. Environmental Microbiology (PhD level)
- MM. Environmental Management (PhD level)
- PB. Interdisciplinary Problem Based (PhD level)
- SB. Interdisciplinary Skills Based (PhD level)
- SS. Speaker Series (PhD level)

596. Directed Readings and Research**(1-12) STAFF***Prerequisite: consent of instructor.*

Individualized reading and research. A written proposal for each tutorial must be approved by the School.

597. Individual Study for Ph.D. Examinations**(1-12) STAFF***Prerequisite: consent of instructor and graduate advisor.**No unit credit allowed toward advanced degree.*

Individual study for Ph.D. examinations. Instructor should be student's major professor or chair of the doctoral committee.

599. Ph.D. Dissertation Research and Preparation**(1-12) STAFF***Prerequisite: consent of instructor and graduate advisor.**No credit allowed toward advanced degrees.*

Research toward and writing of dissertation. Instructor should be chair of student's doctoral committee.

Gevirtz Graduate School of Education

Gevirtz Graduate School of Education, Phelps Hall
GGSE Student Affairs Office, (805) 893-2137
Credential Advisor, (805) 893-2036
Web site: www.education.ucsb.edu

Dean: Jane Close Conoley
Associate Dean: Carol N. Dixon
Chair, Department of Education: Michael Gerber
Chair, Department of Counseling, Clinical, School Psychology: Michael Furlong
Director, Teacher Education Program: Tine Sloan

The activities of scholars and professionals in the Gevirtz Graduate School of Education are woven together by a common thread: a commitment to reshaping schooling so that all children in our diverse society have knowledge and abilities to become competent and responsible citizens. The Gevirtz Graduate School of Education (GGSE) goals are to produce and disseminate new theories and knowledge, and provide guidance and experience needed to allow our graduate students to reach their full potential as researchers and practitioners. Graduate students in the Gevirtz Graduate School of Education benefit from the wide range of multi-disciplinary faculty interests and research and from opportunities to work closely with faculty to research and study in depth a chosen area of work. The faculty, students, and staff of the Gevirtz Graduate School of Education are actively engaged in numerous P-20 and community-based research efforts, currently supported by nearly \$3 million of extramural support. These research efforts are assisted by the GGSE Office of Research and provide financial support as well as training for our students. The Gevirtz Graduate School of Education offers advanced degrees and credentials as indicated in the table in this chapter. We also offer an undergraduate minor in Education and Applied Psychology. A complete list of degrees and programs offered in the School appears in the first chapter of this catalog, under the "Academic Units" heading. Program offerings are subject to available funding.

Graduate Student Association

The Gevirtz Graduate School of Education has an active Graduate Student Association in Education (GSAE) officially representing the "student voice" to the GGSE and the UCSB community. It is a body where students work and meet together to address pertinent issues. In addition to addressing issues of an administrative, academic, or research nature, students

involved in the GSAE promote a positive "student life environment," encouraging participation and mutual support among students. The goals are to make participation rewarding, challenging, and supportive; to be a representative, democratic, and participatory organization where decisions are made by consensus, where all members have a voice in decision making, and where the body represents all student voices; to have a cooperative and open relationship with the faculty and staff, based on mutual respect; and to aid the GGSE in its responsibility to recruit and support diverse and underrepresented populations.

GGSE Diversity and Equity

The Gevirtz Graduate School of Education (GGSE), in the pursuit of academic excellence, is committed to recruiting, supporting, and retaining a community of students, faculty, and staff that reflects the diversity of our state and nation. The faculty, staff, and students of the GGSE recognize and respect the dignity and worth of all people. We value individual differences including, but not limited to, racial and ethnic backgrounds, nationality, gender, sexual orientation, disability, religion, socioeconomic status, age, and divergent perspectives. Our goal is to create a diverse community where all members feel safe and included. We welcome discussion of complex issues related to diversity and equity inside and outside the classroom. We are committed to providing all members of the GGSE community multiple opportunities for their voices to be heard. We believe a dedication to these principles of inclusion is essential to our scholarship, leadership, citizenship, and democracy.

Advising

The GGSE Student Affairs Office provides assistance to all undergraduate, master's, and doctoral candidates. Information may be obtained by calling (805) 893-2137. For information on the M.Ed. in Teaching, call (805) 893-2036.

The GGSE credential advisor provides information to prospective applicants and students in credential programs. Those interested in pursuing a teaching credential at UCSB should contact the credential advisor as soon as they begin to consider the teaching profession. Information about pre-credential advising meetings for prospective elementary or secondary teachers may be obtained from the Credential Services Office at (805) 893-2036.

Candidates who are pursuing both a cre-

denial and an advanced degree, other than the M.Ed. with an emphasis in Teaching, should consult with both the GGSE Student Affairs Office and credential advisor. Advanced credential applicants may be considered for any degree program in the Department of Education. Those interested in emphases other than a Multiple or Single subject credential should contact the GGSE Student Affairs Office or the degree emphasis in which they are most interested.

Prerequisites

Graduate school applicants must hold a bachelor's degree or its equivalent from an accredited institution and satisfy the admissions requirements of the UCSB Graduate Division. Some programs require possession of a California teaching credential or its equivalent, and may require teaching or other appropriate experience.

Graduate Admission

All GGSE programs require FALL quarter admission, except for the Credential programs and Joint Doctoral Program, which require SUMMER admission. Applicants are advised to apply well in advance of the application deadline and should contact the Students Affairs Office for general admission requirements. Specific questions regarding program/emphasis requirements and course offerings should be directed to the program or department office.

Applications and specific program/emphasis requirements may be obtained from our Web site at www.education.ucsb.edu or by contacting: Counseling, Clinical, and School Psychology, (805) 893-3375; Program in Education, (805) 893-4515 or (805) 893-3936; Teacher Education Program, (805) 893-2036; Joint Doctoral Program, (805) 893-3301.

Applicants must submit the online Application for Graduate Study through the Graduate Division (www.graddiv.ucsb.edu). Required application materials include a detailed statement of purpose, official transcripts, letters of recommendation, official Graduate Record Examination (GRE) scores (in some cases, results from the Miller's Analogies Test may be accepted), and program/emphasis-specific requirements (e.g., writing sample, credential application). Admission to the Teacher Education Program and all credential programs requires a bachelor's degree in an academic subject from a regionally accredited institution. See the Gevirtz School Web site for specific program and department admission requirements: www.education.ucsb.edu.

DEGREES, EMPHASES, AND CREDENTIALS OFFERED					
PROGRAM OF STUDY	PROGRAM OBJECTIVES				
	Credential	M.Ed.	M.A. in Education	Ed.D./Ph.D. in Education	Ph.D. in Counseling, Clinical, & School Psychology
Counseling, Clinical, & School Psychology Department					
• Emphasis in Counseling Psychology					•
• Emphasis in Clinical Psychology					•
• Emphasis in School Psychology		•			•
• Pupil Personnel Services: School Psychology	•				
Education Department					
• Emphasis in Child and Adolescent Development			•	Ph.D.	
• Emphasis in Cultural Perspectives & Comparative Education			•	Ph.D.	
• Emphasis in Educational Leadership & Organizations			•	Ph.D.	
• Emphasis in Research Methodology			•	Ph.D.	
• Emphasis in Special Education, Disabilities & Risk Studies			•	Ph.D.	
• Emphasis in Teaching and Learning			•	Ph.D.	
Joint Doctorate in Educational Leadership				Ed.D.	
Teacher Education Program					
• Multiple Subject ¹	•	•			
• Single Subject in Math, English, Science ² , or Social Science, Art, Spanish, Latin, German, French ¹	•	•			
• Education Specialist Moderate/Severe Level I & II	•	•			

¹ May be pursued in conjunction with M.Ed. in Teaching
² Science specializations include: Geoscience, Biology, Chemistry, or Physics

Application Deadlines

Applications must be received by the date established by Graduate Division:

- Department of Counseling, Clinical, and School Psychology—December 1st
- Department of Education—December 15th for fellowship consideration (final application deadline for Education Program is May 1st)
- Teacher Education Program—February 15th
- Education Specialist Program Level I—February 15th
- Level II—May 1st
- Joint Doctoral Program—February 1st

Research and Training Facilities

Graduate research and training opportunities are available through campus facilities as well as through federal and state funded faculty research grants administered by the Gevirtz Graduate School of Education Office of Research. Clinical training is offered through the Koegel Autism Clinic, the Hosford Counseling and Psychological Services Clinic, and the Psychological Assessment Center. Qualitative, quantitative, and media laboratories are available for research and instruction.

Faculty

Charles Bazerman, Ph.D., Brandeis University, Professor (teaching and learning, cultural perspectives and comparative education, research methodology, LISO, applied linguistics)

Julie Bianchini, Ph.D., Stanford University, Associate Professor (teaching and learning,

teacher education)

Sheridan Blau, Ph.D., Brandeis University, Professor (teaching and learning, teacher education, English, Joint Doctoral Program in Educational Leadership)

James H. Block, Ph.D., University of Chicago, Professor (Joint Doctoral Program in Educational Leadership)

Mary E. (Betsy) Brenner, Ph.D., UC Irvine, Professor (teaching and learning, cultural perspectives and comparative education, research methodology, cognitive science, IHD)

Michael T. Brown, Ph.D., Southern Illinois University, Carbondale, Professor (counseling psychology, Joint Doctoral Program in Educational Leadership)

J. Manuel Casas, Ph.D., Stanford University, Professor (counseling psychology, Asian-American studies, Chicano studies)

Sharon Conley, Ph.D., University of Michigan, Ann Arbor, Professor (educational leadership and organizations, research methodology, Joint Doctoral Program in Educational Leadership)

Collie W. Conoley, Ph.D., University of Texas, Austin, Professor (counseling psychology, interpersonal and systemic violence, child, adolescent and adult change; positive psychology)

Jane Close Conoley, Ph.D., University of Texas, Austin, Dean and Professor (school psychology, school mental health, teacher quality)

Jenny Cook-Gumperz, Ph.D., University of London, Professor (teaching and learning, cultural perspectives and comparative education, research methodology, LISO, applied linguistics)

Willis D. Copeland, Ph.D., University of Notre

Dame, Professor (teaching and learning, teacher education)

Merith A. Cosden, Ph.D., University of New Mexico, Professor, (clinical psychology, treatment of clients with drug/alcohol and mental health problems, prevention of family violence)

Carol N. Dixon, Ph.D., University of Delaware, Senior Lecturer with Security of Employment (teaching and learning, cultural perspectives and comparative education, research methodology, LISO)

Erin Dowdy, Ph.D., University of Georgia, Assistant Professor (school psychology, pediatric psychology, diversity training and culturally competent treatment)

Richard P. Durán, Ph.D., UC Berkeley, Professor (teaching and learning, research methodology, cultural perspectives and comparative education, teacher education, psychology, cognitive science, LISO, Chicano studies)

Michael J. Furlong, Ph.D., UC Santa Barbara, Professor (school psychology, school violence, school climate, serious emotional disturbance)

Michael M. Gerber, Ph.D., University of Virginia, Charlottesville, Professor (educational leadership and organizations, special education, disabilities and risk studies, cognitive science, IHD, Joint Doctoral Program in Educational Leadership)

Naftaly S. Glasman, Ph.D., UC Berkeley, Professor (educational leadership and organizations, Joint Doctoral Program in Educational Leadership, political science)

Judith L. Green, Ph.D., UC Berkeley, Professor (teaching and learning, research methodology, cultural perspectives and comparative education, LISO)

Danielle Harlow, Ph.D., University of Colorado, Boulder, Assistant Professor (teaching and learning, science education, teacher education)

Hsiu-Zu Ho, Ph.D., University of Colorado, Boulder, Professor (child and adolescent development, research methodology, cultural perspectives and comparative education, psychology, IHD)

Cynthia Hudley, Ph.D., UC Los Angeles, Professor (child and adolescent development, special education, disabilities and risk studies, teacher education, IHD)

Tania Israel, Ph.D., Arizona State University, Associate Professor (counseling psychology, gender issues, feminist psychology; LGBT issues, sexuality education and counseling, diversity training)

Shane R. Jimerson, Ph.D., University of Minnesota, Professor (school psychology, grade retention, child and adolescent bereavement, developmental psychopathology)

Susan Johnson, Ph.D., University of Wisconsin-Madison, Lecturer (coordinator Science & Mathematics Initiative, teacher education, conceptual models, nature of science)

Maryam Kia-Keating, Ph.D., Boston University, Assistant Professor (clinical psychology, developmental psychopathology, risk and protective factors, culture and acculturation)

Robert Koegel, Ph.D., UC Los Angeles, Professor (clinical psychology, special education, disabilities and risk studies, speech, IHD)

Onno Ron Kok, M.A., California State University Fullerton, Lecturer, Supervisor of Teacher Education (teacher education)

Amelia (Amy) Kyratzis, Ph.D., City University of New York, Associate Professor (child and adolescent development, cultural perspectives and comparative education, teaching and learning, cognitive science, IHD, applied linguistics)

Carl A. Lager, Ph.D., UC Los Angeles, Assistant Professor (teaching and learning, teacher education)

Jin Sook Lee, Ph.D., Stanford University, Assistant Professor (cultural perspectives and comparative education, teaching and learning, applied linguistics)

Ann C. Lippincott, Ph.D., UC Santa Barbara, Lecturer, Academic Coordinator (teacher education, teaching and learning)

Melissa Morgan, Ph.D., Loyola University, Chicago, Assistant Professor (counseling psychology, resilience, cross-cultural issues, immigration experiences)

Gale M. Morrison, Ph.D., UC Riverside, Professor, Dean of Graduate Division (school psychology, school safety, pupil personnel services)

Karen Nylund, Ph.D., UC Los Angeles, Assistant Professor (research methodology)

Yukari Okamoto, Ph.D., Stanford University, Associate Professor (child and adolescent development, teaching and learning, cultural perspectives and comparative education, cognitive science, IHD)

Matthew Quirk, Ph.D., University of Georgia, Assistant Professor (school psychology, remedial reading, disabilities assessment)

Jason D. Raley, Ph.D., Stanford University, Lecturer with Security of Employment (cultural perspectives and comparative education, teaching and learning, research methodology, teacher education)

Laura F. Romo, Ph.D., UC Los Angeles, Associate Professor (child and adolescent development, cultural perspectives and comparative education)

Russell W. Rumberger, Ph.D., Stanford University, Professor (educational leadership and organizations, Joint Doctoral Program in Educational Leadership, research methodology)

George H.S. Singer, Ph.D., University of Oregon, Eugene, Professor (special education, disabilities and risk studies, teacher education)

Tine Sloan, Ph.D., UC Los Angeles, Academic Coordinator (teacher education)

Steven R. Smith, Ph.D., University of Arkansas, Assistant Professor (clinical psychology, personality and neuropsychological assessment, psychodynamic/interpersonal psychotherapy)

Mian Wang, Ph.D. University of Kansas, University of Patras, Assistant Professor (special education, disabilities and risk studies, teacher education)

Julian Weissglass, Ph.D., University of Wisconsin, Professor (educational leadership and organizations, teaching and learning, teacher education)

John T. Yun, Ed.D., Harvard University, Assistant Professor (educational leadership and organizations, research methodology, Joint Doctoral Program in Educational Leadership)

Rebecca Zwick, Ph.D., UC Berkeley, Professor (research methodology, QMSS, psychology)

Emeriti Faculty

Larry E. Beutler, Ph.D., University of Nebraska, Professor Emeritus (clinical psychology, psychology)

Norman J. Boyan, Ed.D., Harvard University, Professor Emeritus (education administration)

George I. Brown, Ed.D., Harvard University, Professor Emeritus (confluent education)

John W. Cotton, Ph.D., Indiana University, Professor Emeritus (educational psychology)

Priscilla A. Drum, Ph.D., Stanford University, Professor Emeritus (educational psychology)

Laurence Iannaccone, Ed.D., Teachers College, Columbia University, Professor Emeritus (confluent education, educational administration)

Melvyn I. Semmel, Ed.D., Peabody College, Vanderbilt University, Professor Emeritus (special education)

R. Murray Thomas, Ph.D., Stanford University, Professor Emeritus (international education)

Jules M. Zimmer, Ed.D., Arizona State University, Professor and Dean Emeritus (child and adolescent development)

Affiliated Faculty

Dorothy M. Chun, Ph.D. (Germanic, Slavic, and Semitic Studies)

Karen Lunsford, Ph.D., (Writing Program)

Richard Mayer, Ph.D. (Psychology)

Claudine Michel, Ph.D. (Black Studies, Joint Doctoral Program in Educational Leadership)

Tara Yosso, Ph.D. (Chicano Studies)

Undergraduate Minor

The Gevirtz Graduate School of Education offers a Minor in Education and Applied Psychology. The minor is designed for students who want to work with research faculty and learn more about issues confronting education, for students preparing for a teaching career in elementary or secondary education or exploring a career in education, and for students exploring a career in counseling, clinical or school psychology. The minor requires a minimum of 18 units including three core courses (one of which must be a practicum) and electives. There are three tracks in the minor: Educational Studies; Teacher Preparation; and Applied Psychology (Counseling, Clinical, and School Psychology). For additional information, see our Web site at www.education.ucsb.edu.

Degree and Credential Programs

The Gevirtz Graduate School of Education offers three doctoral degrees: the doctor of philosophy in Counseling, Clinical, and School Psychology; the doctor of philosophy in education; and a doctor of education (Ed.D.) in Educational Leadership offered jointly with Cal Poly, San Luis Obispo. Students admitted to an M.A./Ph.D. program may elect to exit the program with completion of the master's, except for the Ph.D. in Counseling, Clinical, and School Psychology. The Ph.D. and Ed.D. programs prepare highly capable individuals to perform as scholars and skilled professionals in their chosen fields.

The Department of Education offers the master of arts and the master of education degrees in selected emphasis areas. Master's degree programs are designed to enhance academic and research competencies of elementary or secondary school teachers and other educational leaders. Previous teaching experience is required for some emphases. Advanced credentials may be pursued in addition to the master's degree in some emphases. The Department of Counseling, Clinical, and School Psychology offers the master of arts and the master of education degrees in selected emphasis areas.

In addition to departmental requirements, candidates for graduate degrees and credentials must meet the University degree requirements found in the "Graduate Education at UCSB" chapter of this catalog.

Degree Requirements

Students must maintain a grade-point average of 3.0 to be awarded a graduate degree. There is no language requirement. However, when advisors deem it suitable for a candidate's field of study, an appropriate level of foreign language competency may be required.

After completion of coursework, M.A. and M.Ed. candidates are expected to take a final comprehensive examination or complete a project or thesis. M.A. and M.Ed. candidates must complete 30 or more units of upper-division and graduate level course work (with a minimum of 20 graduate units) under the thesis option, or 36-48 units of upper-division and graduate level course work (with a minimum of 24 graduate units) under the non-thesis option. Independent study units numbered 597-599 are

ineligible to be counted in these totals. Students admitted to the M.A./Ph.D. are periodically evaluated for their readiness to progress to the Ph.D. level of study. Continuation is based on success in the master's program, suitability of goals, and anticipated success in the Ph.D. program.

No specific total number of course units is prescribed for a doctoral degree. Particular requirements will be made by faculty advisors in cases where students need specialized skills in foreign language or other areas. Doctoral students must pass qualifying examinations to be advanced to candidacy. Doctoral candidates must conduct original research and write an acceptable dissertation to be awarded the Ph.D. or Ed.D.

Residence Requirements

Three quarters of registration are required for the master's degree. The minimum residence requirement for the Ph.D. or Ed.D. is two years spent in full-time study and research. A minimum of three consecutive quarters of residency must be completed in regular sessions before advancement to candidacy.

Department of Counseling, Clinical, and School Psychology (CNCSP)

Chair: Michael Furlong

The Counseling, Clinical, and School Psychology Department offers courses of study leading to the Ph.D. with an emphasis in either counseling psychology, clinical psychology, or school psychology, or a master's of education (M.Ed.) in education with an emphasis in school psychology. An M.A. open only to continuing CNCSP students completing the Ph.D., is also available. The emphases in clinical psychology, counseling psychology, or school psychology share knowledge bases and core skills. The UCSB Department of Counseling, Clinical, and School Psychology has been accredited by the American Psychological Association (APA) since 1991. The Ph.D. program is designated and approved as a Combined Professional Psychology program and follows a scientist-practitioner model of training. During the first year, students take a set of courses that are designed to provide basic preparation in these common domains. Beginning in the second year and increasingly thereafter, each student selects courses that comprise a specialization in either counseling, clinical, or school psychology.

Interviews are scheduled for qualified applicants who meet admission criteria and have interests well suited to faculty interests. Alternatives to the interview may be arranged for those unable to attend due to excessive distance.

School Psychology Emphasis (M.Ed.)

Students pursuing a master's of education degree with an emphasis in school psychology focus upon the implications of research findings in psychology and education for psychological services primarily in school settings. The school psychologist is viewed as pivotal in the provision of comprehensive support services to

teachers, students, and parents. Comprehensive support service includes prevention, assessment, and intervention programs for all children. A primary objective is to train school psychologists to enhance the learning and development of students and to assist those who have academic or social-emotional challenges or need special education services. Students are admitted to an M.Ed. degree in Counseling, Clinical, and School Psychology and the Pupil Personnel Services credential with a specialization in school psychology, approved by the California Commission on Teacher Credentialing and the National Association of School Psychologists. Students enrolled in other education programs may also petition to add this credential option, with admission contingent upon space availability.

The Department of Education (EDUC)

Chair: Michael Gerber

The Department of Education is built around an active community of scholars—students, faculty, and staff—who are committed to the common goal of reshaping schooling so that all children in our diverse society will have the knowledge and abilities to become competent and productive citizens. Graduate students in the Department benefit from a wide range of faculty interests and research endeavors, and from opportunities to work closely with faculty to explore rigorously, through research and study, a chosen area of work.

The Education Department offers six different but complementary M.A. and Ph.D. emphases in the areas of research, development, and practice. The Ed.D. with Cal Poly San Luis Obispo is a joint UC-CSU program.

The Department of Education is currently considering reorganization of its program and emphases. Admitted students will follow the program approved and in operation the quarter that they are admitted.

Child and Adolescent Development Emphasis

This emphasis educates students in the study of developmental change in the context of culture, family, school, community, and society. Cultural contexts of development, adult development, cross-cultural and cross-national comparative studies, and gender studies are primary foci of faculty research. Students receive training in basic and applied research that explores educational and mental health issues, including cultural processes, family studies, intervention research, and developmental research methods. The emphasis is committed to an ecological model that examines change within multiple settings (cultural groups, historical periods, neighborhoods, and activities) to find human universals as well as context specific differences in human development. Students will be grounded in theory and research on the major domains of study: cognitive, language, and social development.

The intellectual core of the emphasis represents a diverse array of theoretical perspectives on human development. However, students are also expected to look both beyond core require-

ments and outside of the Department of Education for additional training in research and theories that address their particular research interests.

Cultural Perspectives and Comparative Education Emphasis

The major purpose of this emphasis is to foster students' understanding of how cultural processes influence learning, development, and education in both school and non-school settings. The emphasis offers a multidisciplinary perspective that brings anthropological, linguistic, psychological, and sociological theories to studies of cultural contexts of education. Areas of specific focus include studies of learning, development, and education in multilingual and multicultural populations, and in students from underrepresented groups, within national and/or international settings. Through research, teaching, and community service, the members of this emphasis seek to improve educational opportunities at a local and national level.

Educational Leadership and Organizations Emphasis

This emphasis prepares students who will fill teaching, administrative, research, academic, governmental, consultative, non-profit, or private-sector positions in local, regional, national, or international educational organizations. The emphasis stresses a balanced focus on disciplined-based theory in educational policy, organizations, leadership, and change and on practice in the design, conduct, and use of educational research. The curriculum emphasizes the theoretical, methodological, and practical knowledge that effective educational leaders need to become better scholars and/or appliers of new ideas and practices in their own organizational settings. At the same time, this curriculum thoroughly grounds that knowledge in understanding of the "real world" circumstances that shape modern educational policies, research, and practices. Graduates often fill teaching, administrative, or consultative positions in schooling (e.g., school district) or schooling-oriented (staff-development and training) settings.

Research Methodology Emphasis

This emphasis is intended to prepare students to be research methodologists who will be able to work successfully in universities, private research organizations, and government agencies. A goal of the Research Methodology emphasis is to provide students with a variety of perspectives on research methods.

The emphasis includes two basic courses of study: (1) Educational Statistics and Measurement and (2) Qualitative and Interpretive Research. Students in Educational Statistics and Measurement will learn to apply statistical analyses to educational data, including large-scale student achievement surveys, and will learn to apply psychometric theory to the development of educational and psychological measurement instruments and to the analysis of test data. Students in Qualitative and Interpretive Research will learn about such research approaches as interviewing techniques, ethnographic methods, discourse analysis, narrative analysis, and participant observation. Students who specialize in

Qualitative and Interpretive Research must also be accepted into another emphasis offered in the program.

Special Education, Disabilities, and Risk Studies Emphasis

This emphasis is concerned with educating researchers and practitioners who will be knowledgeable, and further expand our knowledge, regarding the educational needs of students with disabilities or who are at educational risk. The philosophy is that researchers and practitioners need a contextualized view of students, within their school, home, and community, to understand their individual needs as well as the needs of the systems which are serving them. In this emphasis, students will obtain a multi-disciplinary perspective on children with special needs and their schools, families, and communities, through the combined efforts and knowledge of professionals from a variety of disciplinary backgrounds. Graduate students will be grounded in theories of typical and atypical development.

Teaching and Learning Emphasis

This emphasis seeks to provide students with the knowledge and competencies needed to contribute to education in multiple ways. These roles include teaching, conducting research, and using teaching and learning theories and empirical findings to improve educational practices. Students in this emphasis learn to design and evaluate curricula, develop and research models of teacher education, research teaching methods, evaluate theories of human activity in teaching and learning settings, and attempt to understand educational reform issues from multiple perspectives. Students can further specialize in one of four areas: Language, Literacy, and Composition Studies; Mathematics Education; Science Education; and Teacher Education and Professional Development. Alternatively, students can plan their own areas of specialization in conjunction with their advisors. Through research, teaching, and community service, members of the Teaching and Learning Emphasis strive to improve educational opportunities at the local, state, and national levels.

UCSB/Cal Poly Joint Doctoral Program in Educational Leadership (Ed.D.)

The JDP's purpose is to develop regional capacity in the leadership of instruction among Central California educational professionals in P-20 school organizations and other educational agencies. The Program uses the unique strengths of UCSB and Cal Poly (i.e., research and field-based practice) to provide a learning experience that focuses on ex-urban schools; accelerates the anticipated time to degree to 3 years; operates all year round with annual summer sessions and institutes; uses a cohort learning model for working professionals; conducts research in situ at regional Professional Development Districts; and provides constant interaction with internationally, nationally, and regionally renowned faculty and practitioners.

The JDP's curriculum equips students with a broad understanding of extant research, theory, and professional knowledge of educational leadership issues and advances. Students are then trained to design, develop, implement, evaluate, and manage instructional leadership policies and programs affecting the Central California schools. Ed.D. graduates hold or seek positions as: Superintendents, Assistant Superintendents, High-, Middle-, or Elementary-School Principals, other School-Site Administrators, Community-College and University Deans and Administrators, County and State Educational Agents, Non-Profit Educational Leaders, and Public and Private Educational Consultants. Applications are accepted for summer quarter only. Applicants must already possess a Master's degree. Adjunct faculty associated with the Joint Doctoral Program: Dr. Julian Crocker, San Luis Obispo County Superintendent of Schools; Dr. James L. Gentilucci, Assistant Professor, Cal Poly SLO; Dr. Kathleen C. Harris, Associate Professor, Cal Poly SLO; Dr. Bonnie Konopak, Dean, College of Education, Cal Poly SLO; Dr. Jose Montelongo, College of Education Librarian, Cal Poly SLO; Dr. Michael Ruef, Associate Professor, Cal Poly SLO; Dr. Elizabeth Truesdell, Assistant Professor, Cal Poly SLO; Dr. George Petersen, Professor, Cal Poly SLO

Teacher Education Program

The Graduate School of Education offers programs leading to the recommendation for the multiple subject (elementary) teaching credential (MST) and the single subject (secondary) teaching credential (SST). The single subject teaching credential is offered in English, Mathematics, Science, Social Science, Art, Spanish, Latin, German, and French. Both credentials are offered in conjunction with an optional master of education with an emphasis in teaching.

Admission to the Teacher Education Program requires a bachelor's degree in an academic subject from a regionally accredited institution. UCSB offers a large number of undergraduate majors that are appropriate preparation for teaching at the elementary and secondary school levels.

Students who wish to apply to the Teacher Education Program should contact (805) 893-2084 at least one year prior to when they wish to apply.

The professional preparation occurs during a post-baccalaureate year with teaching credential programs beginning only in summer. The program consists of a five-quarter (summer, fall through spring quarters, summer) progressive sequence of courses integrated with field experience in local schools. In addition to meeting the usual University standards of scholarship, candidates must clearly demonstrate their teaching aptitude and leadership abilities. In the 2005-2006 Title II Accountability Report, the passing rate for the University of California, Santa Barbara, Teacher Preparation Program was 100%. Detailed information regarding this report is available at:

www.ctc.ca.gov/reports/TitleII_2005-2006_AnnualRpt.pdf

M.Ed. with Emphasis in Teaching

This emphasis focuses on the preparation of educational leaders for the teaching profession. Students who enroll in the M.Ed. with an emphasis in teaching must concurrently pursue a multiple subject (elementary) or single subject (secondary) teaching credential or education specialist credential. (See "Admissions" above.)

Multiple Subject Teaching Credential

Prerequisites

The following prerequisites must be completed before beginning the teaching credential program.

- Subject-matter competency** in the subjects taught at the elementary level is required by passing scores on the CSET Exam.
- Mathematics 100A-B (Mathematics for Elementary Teaching):** These courses must be completed with a grade of C, Pass, or better.
- U.S. Constitution:** A three quarter-unit course or approved examination covering the provisions and principles of the United States Constitution is required. At UCSB, Political Science 12 meets this requirement. This course must be completed with a grade of C, Pass, or better.

d. Education 103: Tools for Technology:

During the credential program, students complete the Level I Technology requirement. To prepare candidates to meet this requirement, students take Education 103: Tools for Technology offered at UCSB in the winter, spring, or summer quarters. Students who cannot take ED 103 before the program begins will take this course in the summer quarter of the program concurrently with the other required teaching credential courses.

e. Education 109M (Health Education): This course must be completed with a grade of C, Pass, or better.

f. Field experience: Applicants are required to complete a minimum of 60 hours of field experience in an elementary school. For more information contact the field placement coordinator in the Gevirtz Graduate School of Education; (805) 893-3976.

g. Basic Skills: Candidates are required to take a Basic Education Skills Test (CBEST) or equivalent before beginning the credential program. Candidates must pass the exam to begin student teaching.

h. Certificate of Clearance and TB Clearance: Students must have a Certificate of Clearance and a TB Clearance before the program begins.

Single Subject Teaching Credential

Prerequisites

The following prerequisites must be completed before a student begins the teaching credential program.

- Subject-matter competency** in the teaching field is required. This is achieved by either completing an undergraduate single subject matter preparation program in the subject area at the candidate's undergraduate institu-

tion or by passing the CSET state exams in the subject to be taught.

- b. U.S. Constitution:** A three quarter-unit course or approved examination covering the provisions and principles of the United States Constitution is required. At UCSB, Political Science 12 meets this requirement. This course must be completed with a grade of C, Pass, or better.
- c. Education 103: Tools for Technology:** During the credential program, students complete the Level I Technology requirement. To prepare candidates to meet this requirement, students take Education 103. Students who cannot take ED 103 before the program begins will take this course in the fall quarter of the program concurrently with the other required teaching credential courses.
- d. Education 109M (Health Education):** This course must be completed with a grade of C, Pass, or better.
- e. Field experience:** Applicants are required to complete a minimum of 60 hours of field experience in a junior or senior high school. For more information contact the field placement coordinator in the Gevirtz Graduate School of Education; (805) 893-3976.
- f. Basic Skills:** Candidates are required to take a Basic Education Skills Test (CBEST) or equivalent before beginning the credential program. Candidates must pass the exam to begin student teaching.
- g. Certificate of Clearance and TB Clearance:** Students must have a Certificate of Clearance and a TB Clearance before the program begins.

Standards of Scholarship

During the teaching credential program, students must complete a minimum of 45 post-baccalaureate units. Students must earn the grade of B or better in all required courses for the credential. Students must maintain a cumulative grade-point average of at least 3.0 to remain in good standing and to be awarded graduate degrees at UCSB. Students with cumulative grade-point averages below 3.0 are subject to dismissal. In addition to state and program requirements, students in the Teacher Education Program must meet university requirements as described in the chapter “Graduate Education at UCSB.”

Education Specialist Credential

The Gevirtz Graduate School of Education offers the Education Specialist: Moderate/Severe Level I and II Credential Programs. Special Education Credentials permit teachers to work with students with moderate and severe disabilities. Admission to the programs require a bachelor's degree in an academic subject from a regionally accredited institution. Students who wish to apply to the Programs should contact (805) 893-2036 at least one year prior to when they plan to apply.

The Professional Preparation occurs during a post-baccalaureate year with the programs beginning in the summer. The programs consist of a five quarter (summer, fall through spring quarters, summer) progressive sequence of courses integrated with field experience in local

schools.

Prerequisites: The following prerequisites must be completed:

- a. Subject matter competency** in the subject by attaining passing CSET Exam scores. Please call the Credential Services Office at (805) 893-2036 for more information.
 - b. U.S. Constitution:** A three quarter unit course or approved examination covering the provision and principles of the United States Constitution is required. At UCSB, Political Science 12 meets this requirement. This course must be completed with a C, Pass or better.
 - c. Field Experience.** Applicants are required to complete a minimum of 60 hours of field experience. Contact the Coordinator at (805) 893-7811.
 - d. Basic Skills:** Candidates are required to take a Basic Education Skills Test (CBEST) or equivalent before beginning the credential program. Candidates must pass the exam to begin student teaching.
 - e. Certificate of Clearance and TB Clearance.** Students must have a Certificate of Clearance and a TB Clearance before the program begins.
- For more information and an application contact the Credential Services Office at (805) 893-2036. The application deadline is February 15.

Service Credentials

For additional information regarding the state certification and program requirements for the following service credential, contact the Gevirtz Graduate School of Education credential advisor at (805) 893-2036. Prerequisites: Applicants must (a) have a degree in an academic subject from an accredited institution; (b) pass the CBEST (California Basic Education Skills Test); (c) take the GRE; (d) satisfy UCSB's admission requirements. Service Credentials can be combined with M.A. or Ph.D. programs.

Pupil Personnel Services Credential—School Psychology

The Pupil Personnel Services credential with specialization in school psychology is committed to a scientist-practitioner model of training emphasizing the role of school psychologists as highly qualified practitioners and also as leader/innovators in comprehensive support services to schools. This program of study is approved by the National Association of School Psychologists and the California Commission on Teacher Credentialing.

Interdisciplinary Emphases

Optional Interdisciplinary Ph.D. Emphasis in Applied Linguistics

The field of Applied Linguistics is a growing and vibrant one in universities nationally and internationally. Applied Linguistics is an interdisciplinary field of research and instruction that provides theoretical and descriptive foundations for the empirical investigation and solution of language-related issues, especially those of language education (first-language, second-

language, foreign-language, and heritage-language teaching and learning), but also issues of bilingualism and biliteracy, language planning and policy, language assessment, translation and interpretation, lexicography, rhetoric and composition.

Students pursuing a Ph.D. in the Departments of Education, French & Italian, Germanic, Slavic & Semitic Studies, Linguistics, and Spanish & Portuguese may petition to add an emphasis in applied linguistics. The interdisciplinary program in applied linguistics involves over 35 faculty members in 12 departments on campus.

Students who petition to add the emphasis must fulfill the following requirements in addition to the requirements for the Ph.D. in their home department: (1) a minimum of two courses taken from the core group of applied linguistics courses, which provide them with the basics of linguistics, second language acquisition theories, second/foreign language teaching methodologies, and practical applications of theory to teaching (Second Language Acquisition Theory and Research; Second Language Teaching Methodology; Foreign/Second Language Teaching Practicum; Topics in Applied Linguistics); (2) a minimum of two courses in one of five sub-areas (Linguistics, Discourse, Second Language Acquisition; Language and Society, Socio-cultural Perspectives, Multilingualism and Multiliteracy; Language, Literacy and Composition Studies; Language and Cognition, Psycholinguistics; Language Acquisition Using Technology); (3) Required independent study (4 units): Taken with an appropriate faculty member, leading to a research paper describing theoretical, empirical, or applied work in applied linguistics.

In addition to the course and unit requirements described above (including the research paper), the student's Ph.D. Qualifying Examination (or a separate exam) shall include examination of knowledge within the Applied Linguistics emphasis. At least one faculty member of the Applied Linguistics program shall participate in the qualifying (or separate) examination.

Additional information may be found at: www.appliedlinguistics.ucsb.edu. Questions may be directed either to a participating faculty member or to Applied Linguistics, c/o Department of Germanic, Slavic & Semitic Studies, UCSB, Santa Barbara, CA 93106-4130.

Optional Interdisciplinary Ph.D. Emphasis in Cognitive Science

Students pursuing a Ph.D. in the Gevirtz Graduate School of Education may petition to add an emphasis in cognitive science. The interdisciplinary program in cognitive science involves faculty from the Ph.D. programs in Anthropology, Computer Science, Education, English, Electrical and Computer Engineering, Geography, Linguistics, Psychology, and Sociology. Its goal is to give students an appreciation of the interdisciplinary study of thinking, perception, and intelligent behavior, as determined jointly by the nature of the environment and by the internal architecture of the intelligent agent, whether human, animal, or machine. The program features a structured set of courses, which are taught individually and collaboratively by

faculty from a variety of disciplines.

Students who petition to add the emphasis in cognitive science must fulfill the following requirements in addition to the requirements of the Ph.D. in their home department: (1) participation for at least three quarters in Proseminar Interdisciplinary 200; (2) completion of at least three cognitive science elective courses with one each in three different departments; (3) completion of either (a) a research project, completed before the dissertation, resulting in a publishable paper, or (b) an extramural grant proposal for a study in cognitive science suitable for submission to an identified granting agency; (4) presentation of a research paper in a suitable academic forum, such as an emphasis or departmental colloquium, or a professional meeting; and (5) a Ph.D. dissertation centrally focused on a question emerging from cognitive science with at least two committee members representing faculty participating in the cognitive science interdisciplinary emphasis.

Optional Interdisciplinary Ph.D. Emphasis in Human Development

Students pursuing a Ph.D. in the GGSE may petition to add an interdisciplinary emphasis in human development. The Interdisciplinary Program in Human Development involves faculty from the Ph.D. programs in Anthropology, Communication, Counseling, Clinical, and School Psychology, Education, Linguistics, Psychology, and Sociology. The program focuses on developmental theory and research across the lifespan.

Students who petition to add the emphasis in human development must fulfill the following requirements in addition to the requirements for the Ph.D. in their home department: (1) six quarters of proseminar Interdisciplinary 592; (2) four courses in addition to the proseminar, two of which must be outside the student's home department; (3) a minimum of one member of the student's doctoral committee must be a ladder faculty member officially affiliated with the Interdisciplinary Program in Human Development. Consult the department for additional information.

Optional Interdisciplinary Ph.D. Emphasis in Language, Interaction, and Social Organization

Students pursuing a Ph.D. in the Departments of Education, Linguistics, or Sociology may petition to add an interdisciplinary emphasis in language, interaction, and social organization. This emphasis draws upon three approaches: interactional linguistics, ethnomethodology and conversational analysis, and interactional sociolinguistics.

In addition to the emphasis requirements, students must satisfy the requirements for the Ph.D. in their home department. Work in satisfaction of departmental Ph.D. requirements may also be used to satisfy emphasis requirements.

The emphasis requires three quarters of Education/Linguistics/Sociology 274, Proseminar in Language, Interaction, and Social Organization, for credit; a minimum of three elective courses from the list below, one from each of

the student's non-home departments, and the third a designated methods course in any of the three departments (for designated methods courses, please see a faculty member in the emphasis): Linguistics 201, 209, 212, 214, 227, 228, 230, 237, 263, 266, or 273A-B, Education 221B-C, 270G, or 270H, Sociology 236, 236I, 236V, 242, 263, 273A-B (note that Sociology 236 is a prerequisite to the subsequent courses in the Sociology series); one presentation in Education/Linguistics/Sociology 274, which may be either a research paper or a guided data session; Students must complete a research project; the project must be supervised by at least one participating faculty member. This requirement can be satisfied in either of two ways: (a) Completion of a paper reporting a post-M.A. research project which presents an analysis of interactional data and displays command of the relevant literature. It must be written up in publishable form, though actual publication is not a requirement. (b) Successfully defend a dissertation centrally addressed to questions concerning language, interaction, and social organization; at least one member of the student's qualifying examination and dissertation committee must be a faculty member affiliated with the emphasis.

Questions or requests for additional information may be directed either to a participating faculty member or to LISO, c/o the Department of Sociology, UCSB, Santa Barbara, CA 93106-9430.

Optional Interdisciplinary Ph.D. Emphasis in Quantitative Methods for the Social Sciences

Students pursuing a Ph.D. in Education may petition to add an interdisciplinary emphasis in Quantitative Methods in the Social Sciences. This interdisciplinary emphasis involves faculty from the Ph.D. programs in Anthropology, Communication, Economics, Education, Geography, Political Science, Psychology, Sociology, and Statistics and Applied Probability. The areas of specialization of the participating faculty include advanced regression modeling techniques, multivariate statistics, bootstrap estimation methods, demography, econometrics, psychometrics, social network theory, mathematical psychology, spatial statistics, survey research, and educational and psychological assessment. This emphasis helps students to attain the competencies needed to conduct quantitative social science research through core design and analysis classes, courses in advanced and specialized methodologies, and participation in interdisciplinary colloquia and research projects.

Each admitted student will develop, with his or her advisor, an individual contract listing the requirements to be completed. The contract must include the following:

- Two quarters of calculus, one quarter of linear algebra, and a one-year statistics sequence. Note: these requirements can be waived if equivalent courses have already been completed.
- Attendance for at least three quarters at the emphasis' on-going seminar series, including the presentation of at least one paper.
- Completion of at least three quantitative methods courses (excluding those listed above), at least two of which are outside the

student's home department.

- A Ph.D. dissertation that is centrally focused on an issue that is appropriate to the emphasis. The dissertation may make a contribution to methodological theory or may involve an advanced or innovative application.
- A dissertation committee that includes at least one faculty member from outside the student's home department.

Optional Interdisciplinary Ph.D. Emphasis in Women's Studies

The Women's Studies Program, with almost fifty core and affiliated faculty members in over nineteen disciplines, serves as a model of interdisciplinary work and scholarly collaboration at UCSB. Women's Studies doctoral emphasis students are required to complete successfully four seminars that will enhance their understanding of feminist pedagogy, feminist theory, and topics relevant to the study of women, gender and/or sexuality. Women's Studies as an inter-departmental set of conversations and intellectual questions supports a multifaceted undergraduate curriculum at UCSB. Graduate emphasis students are encouraged to apply to teach Women's Studies courses as teaching assistants and associates as part of their Women's Studies training.

Applicants must first be admitted to, or currently enrolled in, a UCSB Ph.D. program participating in the Women's Studies graduate emphasis: Anthropology; Comparative Literature; Counseling, Clinical, and School Psychology; English; French and Italian; Germanic, Slavic and Semitic Studies; History; History of Art and Architecture; Political Science; Religious Studies; Sociology; Spanish and Portuguese; or Theater and Dance. Candidates complete four graduate courses and select a member of the Women's Studies faculty or affiliated faculty to serve on their dissertation committees. Applications to the Women's Studies Doctoral Emphasis may be submitted at any stage of Ph.D. work, and applications will be considered throughout the year.

Department of Education Courses

LOWER DIVISION

3A. California Teach 1: Mathematics (2) LAGER, MILLETT

Introduction to big ideas in mathematics learning and development in grades K-8. Through observation, student interviews, and analysis of student work, undergraduates study how children learn, think about, and do mathematics in classrooms. Includes field experience in schools.

3B. California Teach 2: Mathematics (2) LAGER, MILLETT

Prerequisite: Education 3A.

Introduction to mathematics learning and teaching in grades 7-12. Undergraduates study how adolescents learn, think about, and do mathematics in classrooms. Through observation and interviews, undergraduates study interactions between teaching and learning. Course includes a field experience in schools.

4A. California Teacher 1: Science (2) BIANCHINI, SEARS

Introduction to big ideas in science learning and development in grades K-8. Through observation, student interviews, and analysis of student work,

undergraduates study how children learn, think about, and do science in classrooms. Includes a field experience in schools.

4B. California Teach 2: Science

(2) BIANCHINI, SEARS

Prerequisite: Education 4A.

Introduction to science learning and teaching in grades 7-12. Undergraduates study how adolescents learn, think about, and do science in classrooms. Through observation and interviews, undergraduates study interactions between teaching and learning. Course includes a field experience in schools.

UPPER DIVISION

103. Technology Tools for Teachers

(3) COPELAND

Prerequisites: consent of instructor; upper-division standing.

Intended for upper-division undergraduates who contemplate entering a teacher credential program. It will teach for and certify their competency in selected Technology Proficiencies required for the California Level I Teaching Credential.

109M. Health Education

(1) STAFF

Prerequisites: admission to the Teacher Education Program; upper-division standing.

Introduces physiological, psychological, and sociological factors that promote health and prevent disease including alcohol, narcotic, drug, and tobacco abuse: nutrition, chronic and infectious diseases; reproductive health and stress management. General educational applications lectures.

109S. Health Education

(4) STAFF

Prerequisites: consent of instructor; upper-division standing.

Applicants to the UCSB Credential Program have priority.

Students learn about health education, theories of behavior change, and wellness resources related to nutrition, alcohol, drugs, tobacco, and sexuality. Students demonstrate their understanding of course concepts by critical analysis, papers, reports, and objective tests.

109SS. Health Education

(4) STAFF

Prerequisites: consent of instructor; upper-division standing.

Applicants to the UCSB Credential Program have priority.

Students learn about health education, theories of behavior change, and wellness resources related to nutrition, alcohol, drugs, tobacco, and sexuality. Students demonstrate their understanding of course concepts by critical analysis, papers, reports, and objective tests.

111. Introduction to Child and Adolescent Development

(4) HUDLEY, KYRATZIS, OKAMOTO, ROMO

Prerequisites: consent of instructor; upper-division standing.

An introductory course on the development of children from infancy to adolescence. Examines developmental changes and basic developmental theories (e.g., Piaget, Vygotsky) in four general areas: cognitive, social, language, and physical development. Fulfills TEP developmental course prerequisite or Education minor.

118. The Research University and The Transfer Student Experience

(4) STAFF

Prerequisites: consent of instructor; must be a new transfer student.

Introduces new transfer students to the mission of the research university, the role of higher education in society and their role, as students, within the community of scholars. Topics cover academic, social and personal issues relevant to college students, specifically transfer students.

120. Practicum in Teaching in Higher Education

(4) STAFF

Prerequisites: consent of instructor; upper-division

standing.

Must be elected to serve as a student co-leader for INT 20. Taught by affiliated faculty employed by the Division of Student Affairs.

Designed for outstanding students who intern as course assistants for INT 20. Students learn about a variety of issues affiliated with higher education including student development theories, different pedagogical techniques, and assessing learning outcomes. Students gain experience creating lesson plans, facilitating discussion, grading assignments and fostering positive learning environments.

121. Techniques of Field Observation in School Settings

(3) STAFF

Prerequisites: prior or concurrent experience working in an elementary or secondary school setting with a certified teacher; consent of instructor.

May be repeated for credit to a maximum of 6 units.

Designed to examine issues, practices, values common to most elementary and secondary classrooms. Students acquire a set of skills useful for working within elementary and secondary classrooms, as well as identify concepts and methodology that assist them in applying the California Teaching Standards.

122. Practicum in Field Observation in School Settings

(2) DURAN

Prerequisites: consent of instructor; prior experience working in a school setting with a certified teacher.

Students must attend the first meeting of Education 121 and get a pre-professional assignment. May be repeated for credit to a maximum of 4 units.

Provides individuals with an opportunity to experience the real world of teaching, to examine themselves in the role of potential teacher, to develop first-hand knowledge of the school environment, and to render service.

123. Culture, Development, and Education

(4) HUDLEY, BRENNER

Prerequisites: consent of instructor; upper-division standing.

Priority enrollment will be given to seniors.

An examination of culturally constructed beliefs, attitudes, and values. Course examines how culture shapes human development, behavior, and interpersonal relations in culturally pluralistic environments, with an emphasis on educational settings.

124. Research on Teaching and Learning in Sociocultural Contexts

(4) BRENNER, DURAN

Prerequisites: consent of instructor; upper-division standing.

May be repeated for credit to a maximum of 12 units.

Introduction to theory and research on teaching and learning from a sociocultural perspective. Students will examine data and findings emanating from research projects grounded in the local community and schools.

125. Social Foundations of Education

(4) RALEY

Prerequisites: consent of instructor; upper-division standing.

Priority enrollment will be given to seniors.

A study of the relationship between school and society. Social and political influences on education historically and currently are examined as well as schools as complex organizations and their unique roles in society.

126B. Content and Pedagogy: Secondary

(2) STAFF

Prerequisite: consent of instructor.

Course includes both research into the content knowledge needed and used by secondary school teachers as well as an assessment of the content knowledge of the students through a portfolio development process.

130. California Teach 2: Mathematics

(2) LAGER, ROSS

Prerequisite: Consent of instructor.

Introduction to mathematics learning and

teaching in grades 7-12. Undergraduates study how adolescents learn, think about, and do mathematics in classrooms. Through observation and interviews, undergraduates study interactions between teaching and learning. Course includes a field experience in schools.

164. Introduction to Educational and Vocational Guidance

(4) STAFF

Prerequisites: consent of instructor; upper-division standing.

An overview of the theories and concepts involved in career decision making. Develop working knowledge of career information and field survey techniques for understanding the job market in relation to economic trends.

165. Introduction to Applied Psychology

(4) STAFF

Prerequisite: upper-division standing.

The lab for this course, Education 165L, is optional.

Designed for those considering or beginning applied psychology as a career. The scientific and clinical aspects of the field, along with the historical development and new directions are covered.

166. Practicum in Applied Psychology

(2) STAFF

Prerequisites: upper-division standing; consent of instructor.

Students gain experience in applied psychology by serving as a practice counseling/assessment client or completing a placement in a relevant volunteer service setting. Students meet to discuss their experiences.

171A. Psychology of Gender

(4) ISRAEL

Prerequisite: upper-division standing.

Preference given to Education and Applied Psychology minors students.

Provides an overview of psychological theory and research related to gender issues. Topics include bias in psychology, gender socialization, communication styles, lifespan development, ethnicity, education, careers, relationships, violence and victimization, health, and mental health.

173. Introduction to Leadership Development

(4) BUFORD, ANDREATTA

Prerequisite: upper-division standing.

This course is an overview of theoretical constructs and practical applications of leadership. Through lectures, readings, discussions, and projects, the course will assist students in developing individual approaches to effective leadership.

176B. Practicum in Individual Differences

(4) GERBER

Prerequisites: upper-division standing; consent of instructor.

May be repeated for a maximum of 12 units. Class attendance is mandatory. Students must have access to an e-mail account and web-browser.

Students study and discuss important educational policy issues while tutoring with elementary school students with learning problems in mathematics, reading, and language development.

190. Introduction to Autism

(4) KOEGEL

Prerequisites: Psychology 1; upper-division standing.

Students must have a minimum 3.0 GPA.

Overview of diagnostic, clinical, and educational approaches used for autism. Intervention procedures in clinical, school, and family settings are discussed in relation to language development, social development, and self-stimulatory behavior, self-injury, and pivotal behaviors related to a favorable prognosis.

191A. Sex and Relationships

(4) STAFF

Prerequisites: consent of instructor; not open to seniors. Final enrollment determined by student's qualifications.

Provides internship training in sexual health, including life skills (i.e., self-awareness and assertive communication); health skills; and peer education skills (i.e., group facilitation and motivational interviewing). Students who complete training are eligible to apply for the Sex and Relationship internships.

191B. Alcohol and Drugs**(4) STAFF**

Prerequisites: consent of instructor; not open to seniors. Final enrollment determined by student's qualifications.

Provides internship training in alcohol and drugs, including life skills (i.e., self-awareness and assertive communication); health skills; and peer education skills (i.e., group facilitation and motivational interviewing). Students who complete training are eligible to apply for the Alcohol and Drug internships.

191C. Healthy Eating and Living**(4) STAFF**

Prerequisites: consent of instructor; not open to seniors. Final enrollment determined by student's qualifications.

Provides internship training in healthy eating and living (HEAL), including life skills (i.e., self-awareness and assertive communication); health skills; and peer education skills (i.e., group facilitation and motivational interviewing). Students who complete training are eligible to apply for HEAL internships.

191D. Peer Health Education Internship**(3) STAFF**

Prerequisite: Education 191A or 191B or 191C; consent of instructor.

Students who have completed Education 191A, 191B, or 191C may apply for placement as a Peer Health Education intern. Under supervision, interns provide health education services to UCSB students through informational, educational, environmental, and motivational activities.

197. Special Topics in Education and Applied Psychology**(2-4) STAFF**

Prerequisite: consent of instructor.

May be repeated for credit to a maximum of 8 units. Topics vary by instructor.

199. Independent Studies**(1-5) STAFF**

Prerequisites: upper-division standing; completion of two upper-division courses in education; departmental approval.

Students must have a minimum 3.0 grade-point average for the preceding three quarters and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199DC/199RA courses combined.

Study of special problems in various fields of education.

199RA. Independent Research Assistance**(1-5) STAFF**

Prerequisites: upper-division standing; completion of two upper-division courses in education; instructor and departmental approval.

Students must have a minimum 3.0 grade point average for the preceding three quarters and are limited to 5 units per quarter and 30 units total in all 98/99/198/199/199DC/199RA courses combined.

Coursework consists of faculty supervised research assistance.

Note: Graduate sections below include:

Counseling, Clinical, School Psychology, and Education

GRADUATE COURSES — DEPARTMENT OF COUNSELING, CLINICAL, SCHOOL PSYCHOLOGY**200. Research Design and Methods in Professional Psychology****(4) BROWN**

Prerequisite: consent of instructor.

Not open for credit to students who have completed Education 277B.

Examination of both clinical and statistical approaches to professional psychology research. Special attention devoted to conceptualizing and developing research proposals in the area of professional psychology.

209A. Research Practicum I**(4) STAFF**

Prerequisite: consent of instructor.

Student works with research team to develop or conduct an on-going research study. Focus on learning the process of planning and carrying out a research program.

209B. Research Practicum II**(4) STAFF**

Prerequisite: consent of instructor.

Student works with research team to develop a research idea and carry it out. Focus on implementing research plans and writing research reports in a collaborative group.

209C. Research Practicum III**(4) STAFF**

Prerequisite: consent of instructor.

Student works with faculty member to develop and carry out a research project of particular interest. Focus on planning and conducting research projects of particular interest to student.

210. Neuroanatomy and Psychopharmacology**(4) SMITH, COSDEN**

Prerequisite: consent of instructor.

Introduces students to basic neuroanatomy and neurological functioning across lifespan. Relationship of neurological structure to psychiatric disorder is highlighted. Also serves to give students a background in clinical psychopharmacology. Biomedical treatments for child and adult disorders are explored.

212. Cognitive Development in Autism and Other Severe Disabilities**(4) KOEGEL, SINGER**

Prerequisite: consent of instructor.

An overview of diagnostic and treatment methods in the area of autism and other severe disabilities. Discussion topics include research on language, social behavior, self-injury, self-stimulation, research on physiological, educational, and behavioral interventions used in clinical, school and family settings.

214. Social Bases of Behavior for Applied Psychology**(4) SMITH**

Prerequisite: consent of instructor.

Course introduces the social bases of behavior. Students have the opportunity to read classics in the field of social psychology, social influence, and social cognition. Application to clinical work, group psychotherapy, and interpersonal behavior are highlighted.

216. Historical and Philosophical Foundations of Professional Psychology**(4) CASAS**

Prerequisite: consent of instructor.

Facilitates a selective and critical analysis of the historical/philosophical foundations of western psychology. To this end, attention is directed to those individuals, ideas and events that have shaped the history of psychology.

220. Human Development**(4) JIMERSON**

Prerequisite: consent of instructor.

Theory and research regarding processes/dimensions of human development (e.g., cognitive, social, emotional, individual processes, interpersonal processes, the self and gender roles). Special attention is given to social relationships and their developmental significance.

222A. Descriptive Diagnosis**(1) STAFF**

Prerequisite: consent of instructor.

Course is the first in the assessment sequence and provides an introduction to descriptive diagnosis via the DSM-IV. It is designed as an introduction to courses in psychopathology, cognitive assessment, and personality assessment.

223B. Developmental Psychopathology**(4) JIMERSON, MORRISON**

Prerequisite: consent of instructor.

An introduction to the domain of developmental psychopathology, the study of psychological problems in the context of human development. Emphasis on the developmental origins and developmental consequences of social, emotional, and behavioral disturbances during childhood and adolescence.

224A. Professional Organizations**(1) FURLONG, ISRAEL**

Prerequisite: consent of instructor.

Explores issues related to professional training

and practice in scientific-professional psychology. Topics include internship, graduate training models, history of scientific-professional psychology, professional organizations, credentialing, licensure and employment settings.

225. Ethical Standards in Professional Psychology**(4) STAFF**

Prerequisite: consent of instructor.

Course examines scientific and professional ethics in applied psychology. In addition to reviewing existing standards, the course focuses on a range of ethical and legal issues such as confidentiality, dual relationships, and client rights.

227. Social and Cultural Bases of Diversity**(4) STAFF**

Prerequisite: consent of instructor.

Acquaints students with the social and cultural bases of diversity and to enhance multicultural competence. Designed to enhance awareness, knowledge, and skills for providing culturally relevant, sensitive, and effective services to diverse populations.

250. Cognitive Assessment in Professional Psychology**(4) JIMERSON**

Prerequisite: consent of instructor.

Provides in-depth coverage of the Wechsler series, the Stanford Binet (4th ed) and other major tests of cognitive ability. A general approach to test administration and interpretation is stressed. General issues in test bias are used to guide class discussion.

251. Personality and Emotional Assessment**(4) SMITH, FURLONG**

Prerequisite: consent of instructor.

Introduces students to the major tools and techniques for conducting comprehensive psychological assessments, appropriate for adult, children, and adolescents. Self-report, projective techniques, and behavior ratings are discussed in-depth.

252. Advanced Personality Assessment**(4) SMITH, KOEGEL**

Prerequisite: consent of instructor.

Students learn to score and interpret the Rorschach Inkblot Test at a level required for independent practice. Also covered are advanced techniques for integrating assessment results and using assessment in psychological treatment planning.

254. Career and Life Development Appraisal**(4) BROWN**

Prerequisite: consent of instructor.

Examination of the structure, administration, and interpretation of career and life development assessment instruments. Also examination of instruments commonly used in counseling, clinical, or school psychology research.

255. Neuropsychological Assessment**(4) SMITH, FURLONG**

Prerequisite: consent of instructor.

Students are exposed to the methods and techniques of applied neuropsychology. Course material covers the administration, scoring, and interpretation of measures of memory, executive functioning, speech and language, and motor processing.

256. Behavioral Assessment and Intervention for Children and Adolescents**(4) KOEGEL**

Prerequisite: consent of instructor.

History and philosophy of behavior management approaches, behavioral assessment procedures, treatment delivery paradigms, parent-training, nonaversive/aversive issues, generalization and maintenance of treatment gains, causes, evaluation of behavior changes, medicine, self-management.

257B. Psychoeducational Assessment and Intervention**(4) STAFF**

Prerequisite: consent of instructor.

Method of psychoeducational assessment and evaluation for identification, intervention, progress monitoring, and educational decision-making

planning, and review of progress of children in the public schools. Consideration of screening and diagnostic instruments and procedures, plus instruments and materials to assure nondiscriminatory assessment.

260A. Theories of Counseling and Psychotherapy

(4) CASAS, ISRAEL

Prerequisite: consent of instructor.

Develops an understanding and appreciation of the major philosophies and theories in the field of professional psychology. Special attention directed toward examination of applicability of theories and inherent techniques to racial/ethnic minority populations.

260B. Basic Practicum I

(4) STAFF

Prerequisite: admission to M.Ed. or Ph.D. in Counseling/Clinical/School Psychology program or School Psychology Credential.

Initial practicum in counseling focuses on building a counseling relationship. Students learn theory and practice of basic counseling skills, the working alliance, and multicultural adaptations.

260C. Basic Practicum II

(4) STAFF

Prerequisite: consent of instructor.

Focuses on case conceptualization of clients. Students learn to plan treatment on the basis of an initial interview, a formal intake, history, and present symptoms and client goals.

261. Counseling Psychology Seminar

(4) ISRAEL, CONOLEY

Prerequisite: consent of instructor.

Course covers key aspects of counseling psychology, such as social justice, positive psychology, and prevention. The course covers professional and research literature and skill development to prepare students to implement these approaches in research and practice.

261A. Theories of Career Development

(4) STAFF

Prerequisite: consent of instructor.

Focuses on theories of career development, current trends in research and the input of technological and social changes in the society on the role of work in life span development.

261B. Theory and Research of Group Counseling

(4) STAFF

Prerequisite: consent of instructor.

Reviews current theory, research, and practices related to group counseling. Special attention is given to comparisons of theoretical approaches and accompanying research strategies used in assessing the effectiveness of group counseling modalities.

262A. Consultation in the Schools and Community

(4) STAFF

Prerequisite: consent of instructor.

Review of consultation theory and problem-solving models, role of consultant as a systems-change agent. Students utilize data-based decision-making to identify system targets, develop solutions, and facilitate solution implementation to bring about systems change.

262B. School-Based Mental Health Services

(4) MORRISON, FURLONG

Prerequisite: consent of instructor.

Group, individual and system strategies for evidence-based prevention and intervention with children and adolescents in the schools and communities. Problems and processes involved in the implementation of these strategies and programs are also explored.

262C. Counseling Children and Families

(4) COSDEN, MORRISON

Prerequisite: consent of instructor.

Covers counseling and psychotherapy for children, adolescents, and families. CBT, play therapy, and family systems therapies are examined.

262D. School Safety, Violence, and Crisis Response

(4) JIMERSON, FURLONG, MORRISON

Prerequisites: consent of instructor.

Seminar offers foundation knowledge regarding school safety, school violence, and school crisis response to contribute to scholarship and practice emphasizing understanding and implementation of prevention and intervention programs that promote the mental health and physical well-being of students.

263A. Advanced Psychotherapy Techniques

(4) COSDEN, KOEGEL, SMITH

Prerequisite: consent of instructor.

Exploration of techniques of major psychotherapy theories, evidence-based practices, and application to diverse populations.

264A. Supervision Theory

(4) STAFF

Prerequisite: consent of instructor.

An overview of theory and research on the process and outcomes of supervision of professional psychologists.

264B. Promoting Optimal Psychological Functioning Across the Lifespan

(4) ISRAEL

Prerequisites: consent of instructor; must be enrolled in the Counseling/Clinical/School Psychology Program.

Introduces students to concepts and interventions related to lifespan development, prevention of mental health problems, social justice, and optimal psychological functioning.

268A. Gender Issues in Counseling

(4) ISRAEL

Prerequisite: consent of instructor.

Familiarizes students with theoretical approaches to working with gender in counseling, course reviews scholarship related to psycho-social concerns that disproportionately affect women and men, and demonstrates clinical approaches to working with gender issues in therapy.

268B. Counseling LGBT Clients

(4) ISRAEL

Prerequisites: consent of instructor; must be enrolled in the Counseling/Clinical/School Psychology Program.

Course equips students with the knowledge, attitude awareness, and skills necessary to work effectively with lesbian, gay, bisexual, and transgender clients on a variety of issues.

268C. Racial/Ethnic Minority Counseling Interventions

(4) CASAS

Prerequisite: consent of instructor.

Critical examination of prevailing counseling intervention strategies with racial/ethnic minorities. Focus on identification of ways to improve the quality and utility of the interventions.

268D. Advanced Fieldwork: Clinical Psychology

(4) KOEGEL

Prerequisite: consent of instructor.

Advanced supervised fieldwork in an approved clinical setting under the supervision of a licensed psychologist. A minimum of two full days in an approved setting is required.

270. Advanced Fieldwork: General

(4) COSDEN, ISRAEL

Prerequisite: consent of instructor.

Course involves supervised work with adults, children, adolescents, and families in the Hosford Clinic. Supervised work includes intakes, assessment, counseling & psychotherapy. Related readings, case notes, written case conceptualizations, and other written assignments and clinic responsibilities are required.

271A. Hosford Clinic Practicum

(1-4) STAFF

Prerequisites: consent of instructor; limited to CCSP students only.

CCSP students see 1-4 community clients on a weekly basis for psychotherapy in the Gevirtz Graduate School of Education Hosford Counseling Clinic. Students are supervised by clinic supervisors and professionals from the field.

271B. Advanced Practicum: Psychology Assessment Center

(1-4) SMITH

Prerequisites: consent of instructor; limited to CCSP students only.

CCSP students see 1-4 community clients on a weekly basis for psychotherapy in the Gevirtz Graduate School of Education Hosford Counseling Clinic. Students are supervised by clinic supervisors and professionals from the field.

272. Advanced Fieldwork: Counseling Psychology

(4) STAFF

Prerequisites: three quarters of CNCS 270; consent of instructor.

Advanced supervised fieldwork in an approved counseling setting under the supervision of a licensed psychologist. A minimum of two full days each week in an approved setting is required.

273. Advanced Fieldwork: Clinical Psychology

(4) KOEGEL

Prerequisite: consent of instructor.

Advanced supervised fieldwork in an approved clinical setting under the supervision of a licensed psychologist. A minimum of two full days each week in an approved setting is required.

274A. Contemporary Issues in Student Services: School Psychology First Year Induction

(4) FURLONG, MORRISON

Prerequisite: consent of instructor.

Course is for first-year school psychology students. University-based supervision, school placements.

A seminar course discussing contemporary issues in student services; includes practica.

274B. Contemporary Issues in Special Education Process: School Psychology First Year Induction

(4) FURLONG, MORRISON

Prerequisite: consent of instructor.

Course is for first-year school psychology students. University-based supervision and school placements.

A seminar course discussing contemporary issues in special education process; including practica.

274C. School Discipline and Alternative Schooling: Psychology First Year Induction

(4) FURLONG, MORRISON

Prerequisite: consent of instructor.

Course is for first-year school psychology students. University-based supervision, school placements.

A seminar course discussing school discipline and alternative schooling; includes practica.

274D. Assessment and Data-Based Decision-Making in the Schools: School Psychology Practicum

(4) STAFF

Prerequisites: enrollment in the school psychology credential program; consent of instructor.

Introduction to the school's instructional setting. Core instructional features and pro-social prevention efforts are operationalized and examined in schools. Students learn to identify system-level intervention targets.

274E. Ethics, Diversity, and Specialized Assessment and Intervention: School Psychology Practicum

(4) STAFF

Prerequisites: enrollment in the school psychology credential program; consent of instructor.

Participation in didactic instruction and practical experiences in working with culturally and linguistically diverse children. Examination of issues in working with children of different ages, in different settings, risk factors and disabilities. Specialized assessment models using single-subject design assessing intervention effectiveness.

274F. The School Psychologist as the Intervention Consultant: School Psychology Practicum

(4) STAFF

Prerequisites: enrollment in the school psychology credential program; consent of instructor.

Planning and implementing interventions in the school. Students monitor progress, provide feedback, engage in data-based decision-making in collaboration with teachers, parents and system administrators to facilitate improved child outcomes.

275. Internship in School Psychology
(4-12) FURLONG, JIMERSON, MORRISON

Prerequisite: consent of instructor.

Advanced internship in school psychology in a setting approved by faculty. Twenty to forty hours weekly of fieldwork under the supervision of a credentialed school psychologist are required.

276A. Advanced Fieldwork: Clinical Supervision
(4) STAFF

Prerequisites: at least 6 quarters of practicum experience in a clinical, counseling, or school setting; consent of instructor.

Supervised fieldwork experience in the supervision of beginning therapists. A minimum of three hours/week of classroom experience and three hours/week of supervision in individual group sessions are required.

279A-B-C. Internship in Professional Psychology

(6-12, 6-12, 6-12) COSDEN

Prerequisites: consent of instructor and advancement to candidacy.

A three-quarter in progress sequence course with grades for all quarters issued upon completion of CNCSP 279C. May take for 12 units/quarter for one year, or 6 units/quarter for two years. Total of 36 units required.

Advanced fieldwork internship in an approved setting. Twenty to forty hours weekly (minimum of 1500 hours) of fieldwork under supervision of a licensed psychologist. Setting must be approved by CCSP faculty.

290. Seminar in Professional Psychology
(4) ISRAEL, MORRISON

Prerequisite: consent of instructor.

Consideration of emerging topics in counseling, clinical, and/or school psychology. Course content may vary.

291A. Human Sexuality for Applied Psychologists

(1) STAFF

Prerequisites: consent of instructor; must be enrolled in the Counseling/Clinical/School Psychology Program.

Introduces graduate students in applied psychology to physiological and socio-cultural variables associated with sexual identity, sexual behavior, and sexual functioning.

291B. Alcohol and Other Drug Abuse
(2) STAFF

Prerequisite: consent of instructor.

Course addresses causes, prevention, and treatment of drug and alcohol abuse. Designed to meet the requirements for licensure as a psychologist in the State of California.

291C. Family Violence
(4) STAFF

Prerequisite: consent of instructor.

Course covers theories relating to the reasons for child abuse and domestic violence as well as theories and research on family violence and its treatment.

292. Resiliency, Strengths, and Youth Development

(4) FURLONG, MORRISON

Prerequisite: consent of instructor.

An in-depth review of research literature related to risk and resiliency concepts based on research from fields of developmental psychopathology, developmental delay, school drop-out, and substance abuse prevention.

596. Directed Reading and Research
(2-12) STAFF

Prerequisite: consent of instructor.

Individual tutorial in doctoral and masters' degree subprogram special fields.

597. Individual Study for Comprehensive Examinations

(2-12) STAFF

Prerequisite: consent of instructor.

Preparation for master's or Ph.D. comprehensive examinations.

598. Master's Thesis Research and Preparation

(2-12) STAFF

Prerequisite: consent of instructor.

Supervised research and writing of the thesis in doctoral and masters' degree subprograms.

599. Ph.D. Dissertation Preparation
(2-12) STAFF

Prerequisite: consent of instructor.

Supervised research and writing of the dissertation in doctoral degree programs.

**GRADUATE COURSES—
DEPARTMENT OF EDUCATION**

201A. Qualitative Research Design

(4) BRENNER

Prerequisite: prior qualitative research methods courses or consent of instructor.

Writing a literature review, sampling, issues of quality, ethics, writing a research proposal and other topics relevant to designing qualitative research projects.

201B. Survey Research Design

(4) OKAMOTO, RUMBERGER

Prerequisite: consent of instructor.

The design of original surveys and the use of existing surveys in educational research. Topics include sampling, questionnaire construction, scales and coding, data management, and supplemental data from school records.

201D. Single Case Experimental Design

(4) FURLONG, KOEGEL

Prerequisite: consent of instructor.

Not open for credit to students who have completed Education 213A.

Students design and critique original single case experimental projects. The course covers the internal logic of each design; internal validity; external validity; development of reliable dependent measures and observational systems, as well as issues regarding social validity.

201F. Issues in Research Methodology

(2) HO, ZWICK

Prerequisite: consent of instructor.

This course involves students in detailed and specific consideration of the methodological issues related to their own second year research projects, MA theses, or Ph.D. dissertations.

202A. Bilingual Language Development

(4) KYRATZIS

Prerequisite: consent of instructor.

This course describes theoretical and empirical accounts of the knowledge representations and psychological processes underlying language comprehension and production. Representative topics include discourse processing; conversational interaction; memory for words, sentences and text; metalinguistic skills; language development.

202C. The Development of Writing Abilities

(4) BAZERMAN, BLAU

Prerequisite: consent of instructor.

Examination of the research literature on the development of writing competence in and outside of school from early childhood through advanced adult competence.

202D. Writing Across the Curriculum and in the Disciplines

(4) BAZERMAN, BLAU

Prerequisite: consent of instructor.

Examination of research literature in writing in disciplines and professions to consider the different dynamics, functions, and forms of writing in the separate areas and different paths of skill development and socialization. Consideration of findings at university and professional levels and their application to K-12 settings.

202E. History of Literacy and Social Organization

(4) BAZERMAN, BLAU

Prerequisite: consent of instructor.

Investigation of historical emergence of literate practices in relation to social organization realized in scribal, print, and electronic media. Consideration of the rise and role of school, academic, disciplinary, professional, and information culture with implications for current literacy education.

202F. Literacy in the Information Age

(4) LUNSFORD, BAZERMAN

Prerequisite: consent of instructor.

Definitions of "literacy" are evolving and expanding as they and new information technologies (especially computers) are co-constructed. This course examines the political, pedagogical, and research consequences implied when traditional definitions of literacy are revised and when new literacies are introduced.

202G. Collaborative Learning, Collaborative Writing

(4) LUNSFORD, BAZERMAN

Prerequisite: consent of instructor.

Schools at all levels have been charged with teaching the "new basic" skills of collaborative learning and collaborative writing. This course examines what these concepts mean, how they are related, and how they manifest themselves in workplace and educational settings.

202H. Writing Program Administration
(4) BAZERMAN

Prerequisite: consent of instructor.

Examination of theory and practice of writing program administration focusing on important issues in the field. Students read about and discuss those issues and focus their research on a local instantiation of administration. An optional administrative internship may be added to the class work.

202I. Assessment of Writing

(4) BAZERMAN

Prerequisite: consent of instructor.

Issues of writing assessment from micro (student papers) to macro (large-scale assessment: NAEP, UC Subject A Examination), and writing program assessment. Exploration of different research paradigms in writing assessment: empirical and hermeneutic are also discussed.

203A. Foundations of Education

(4) STAFF

Prerequisite: admission to Single Subject Program or the Multiple Subject Program.

Students develop a rigorous way of thinking about, talking about, and practicing education for a diverse society. Explores the complex relationship among culture, society, and the organization of school. Considers the complex relations among teachers and learners within the context of U.S. schools.

203DF-DW. Applications of Computers to Educational Purposes I

(2-1) COPELAND

Prerequisites: admission to Single Subject Teaching Credential Program, and consent of instructor.

Required for students preparing for secondary school teaching.

Exploration of issues related to use of computer-based technologies in schools, including those of their access, use, and control in a democratic society; their use for development of problem solving, critical thinking, and creativity; and their integration into the school curriculum.

203EF-EW. Applications of Computers to Educational Purpose I

(2-1) COPELAND

Prerequisites: admission to Multiple Subject Teaching Credential Program, and consent of instructor.

Required for students preparing for elementary school teaching.

Exploration of issues related to use of computer-based technologies in schools, including those of their access, use, and control in a democratic society; their use for development of problem solving, critical thinking, and creativity; and their integration into the school curriculum.

204. History and Ideology of Education: Comparative Perspectives

(4) BRENNER, COOK-GUMPERZ

Prerequisite: consent of instructor.

History and ideology of U.S. education and other educational systems. Topics include: history of compulsory schooling; sociological explanations of relationships of schools to society; diversity and ideal education; professionalization of education/teaching; history of educational research.

205. Anthropological/Sociological Perspectives on Education

(4) BRENNER, COOK-GUMPERZ

Prerequisite: consent of instructor.

Examination of anthropological and sociological approaches that have education as a central theoretical issue. Use of comparative perspective to explore a series of issues of relevance to U.S. education and to education in a variety of other countries.

206. Epistemology and Education

(4) STAFF

Prerequisite: consent of instructor.

Theories of knowledge are brought to bear on educational issues such as pedagogy, research traditions, and curricular legitimization. The course treats epistemological topics such as perception, objectivity, argumentation, rationality, theories, paradigms, and the aims of social science research.

207. Sociolinguistics in Education

(4) COOK-GUMPERZ, GREEN

Prerequisite: consent of instructor.

Course addresses the origins, basic concepts and recent research in sociolinguistics. Both earlier foundational work and recent development in new topics are explored. These include, but are not limited to, interactional sociolinguistics, feminist sociolinguistics, sociolinguistics in the classroom.

208 Applied Rhetoric, Poetics, and Linguistics

(4) BLAU

Prerequisite: consent of instructor.

Examines current and seminal theory and research in the areas of literary criticism, rhetoric, composition, linguistics, and language acquisition as they apply to the teaching of English in grades 7-14.

209A. Seminar in Language Development

(4) KYRATZIS, OKAMOTO

Prerequisite: consent of instructor.

The course describes theoretical and empirical accounts of the development of the knowledge representations and psychological and social processes underlying language comprehension and use. Topics: grammatical and word meaning development, role of social-interactive routines, situational variation, child discourse, emergent literacy, relationships of oral/written discourse, atypical language development and issues of culture and language.

209B. Seminar in Social Development

(4) HUDLEY, JIMERSON

Prerequisite: consent of instructor.

Examination of theory and research on human social development from infancy to adolescence. Topics include family socialization, aggression and prosocial behavior, gender differences, peer and media influences, and social cognition.

209C. Seminar in Cognitive Development

(4) KYRATZIS, OKAMOTO

Prerequisite: consent of instructor.

Examination of current research and theories in cognitive development. Focus on young children's thinking. Special attention to biological and cultural influences on thinking as well as to implications of cognitive development research for education.

209D. Research Seminar in Human Development

(1-6) STAFF

Prerequisite: consent of instructor.

May be repeated for credit.

Seminar for students engaged in the conceptualization, conduct, or analysis of research on child and adolescent development.

209E. Seminar In Human Development

(4) STAFF

Prerequisite: consent of instructor.

May be repeated for credit.

In-depth consideration of emerging topics in human development. Course content may vary.

209F. Gender Development and Socialization

(4) KYRATZIS, COOK-GUMPERZ

Prerequisite: consent of instructor.

Examines gender development and socialization, including the study of gender differences in cognition, emotion, language, and moral reasoning from infancy through adolescence.

209G. Ethnic Identity

(4) HUDLEY, ROMO

Prerequisite: consent of instructor.

Examines the development of ethnic and racial identity among children and adolescents. Topics include self-concept, family socialization, language, peers, and inter- and intra-group relations. Specific attention is given to theories pertinent to this area of development.

210A. Human Memory and Cognitive Processes

(4) DURAN

Prerequisite: consent of instructor.

Survey of theoretical approaches and empirical findings in the areas of learning, memory, psycholinguistics, cognitive processing, and situated cognition. Topics include models of memory, information-processing and related experimental methodology and findings. Contemporary paradigm shifts in cognitive psychology also reviewed.

210B. Introduction to Children's Thinking

(4) OKAMOTO

Prerequisite: consent of instructor.

Presents a broad perspective of cognitive development and focuses on topics such as perception; problem solving; meta cognition; etc. The educational application of cognitive research is also covered.

210D. Seminar in Cultural Perspectives of Education

(1-6) STAFF

Prerequisite: consent of instructor.

May be repeated for credit.

In-depth consideration of emerging topics in cultural perspectives of education.

210E. Foundations of Sociocultural Learning Theory

(4) BAZERMAN, DURAN

Prerequisite: consent of instructor.

Examination of founding theoretical texts of sociocultural theory of learning in both Russia and the West and their application to current issues in education.

210F. Cultural Psychology: Contemporary Sociocultural Learning Theory

(4) BAZERMAN, DURAN

Prerequisite: consent of instructor.

An examination of contemporary developments in cultural psychology and applications to education and learning in diverse sociocultural settings.

210G. Crosscultural Psychology

(4) BROWN, HO

Prerequisite: consent of instructor.

Investigation of current issues in social and cognitive psychology with a crosscultural perspective.

211A. Proseminar: Introduction to Human Development

(4) HUDLEY, KYRATZIS, OKAMOTO, ROMO

Prerequisite: consent of instructor.

Introduction to on-going research on human development pursued by education faculty. Emphasis on current theory and methods guiding research in human development.

211B. Development: Infancy and Early Childhood

(4) KYRATZIS, OKAMOTO

Theoretical bases and empirical findings on the development of children from conception through pre-school age across various areas of competency; such as, social, language, moral, cognitive, and motor.

211C. Development: Middle Childhood to Adolescence

(4) HUDLEY, OKAMOTO, ROMO

Prerequisite: Education 211B.

Theoretical bases and empirical findings on the development of children from age six to adolescence

across various areas of competency, such as social, language, moral, cognitive, and motor.

211D. Development: Adolescence to Adulthood

(4) HUDLEY, ROMO

Prerequisite: consent of instructor.

Theory and research about development during adolescence. Discussion of transitions and adaptations during adolescence considering social development, cognitive development, personality development, biological development and important contexts of adolescent development (e.g. families, schools, peer groups, work and communities).

211F. Psychological Foundations of Education: Elementary

(4) STAFF

Prerequisites: admission to Multiple Subject Credential Program.

An introduction to psychological principles of learning and development of the elementary age child. Explores dimensions of development indicative of middle childhood, and ways in which development and learning are interwoven with social and cultural contexts in the educative process.

211S. Psychological Foundations of Education: Secondary

(4) STAFF

Prerequisites: admission to Secondary (Single Subject) Credential Program.

An introduction to psychological principles of learning and development of the adolescent. Explores dimensions of development indicative of adolescence, and ways in which development and learning are interwoven with social and cultural contexts in the educative process.

212. Quantitative Methods in the Social Sciences Colloquium

(2) ZWICK

Same course as Geography 201Q, Sociology 212Q, and PSTAT 250. May be repeated for credit.

Required course for students in the Interdisciplinary Quantitative Methods in the Social Sciences emphasis.

214A. Introductory Statistics

(4) BROWN, HO, OKAMOTO, RUMBERGER, YUN

Introduction to the application of descriptive and basic inferential statistics in educational research. Topics include experimental and survey design principles, measures of central tendency and variability, elementary probability concepts, basic hypothesis testing, and procedures for testing the difference between two means.

214B. Inferential Statistics

(4) HO, ZWICK

Prerequisite: Education 214A.

Hypothesis testing and interval estimation techniques for application to educational research. Includes bivariate correlation and regression, one-way analysis of variance, and elementary techniques for categorical data analysis.

214C. Linear Models for Data Analysis

(4) ZWICK

Prerequisite: consent of instructor.

Intermediate data analysis methods, all of which can be considered to be instances of a general linear model. Selected topics in multiple regression and analysis of variance (ANOVA), including regression with qualitative independent variables, logistic regression models, one- and two-way ANOVA models and analysis of covariance.

215A. Introduction to Testing and Measurement

(4) BROWN

Prerequisite: consent of instructor.

Not open for credit to students who have completed Education 219A.

An introduction to testing and assessment in education and education-related fields. Topics include basic concepts and issues in testing and assessment, and professional standards for test development and test use. Elementary notions of test design, and evaluation of reliability of tests and assessments are introduced through hands-on activities.

215B. Psychometrics

(4) ZWICK

Prerequisite: consent of instructor.

Introduction to classical test theory and item response theory which provide tools for understanding and analyzing data from educational and psychological tests. Topics include test scoring, validity, reliability, test bias, and the development of tests and questionnaires.

215C. Psychometrics: Item Response Theory

(4) ZWICK

Prerequisite: Education 215B.

Introduction to item response theory (IRT), a class of mathematical models for test scores. Description of its application to practical problems such as test construction, test scoring, the design of computerized adaptive tests, and the assessment of differential item functioning (item bias). Students learn to use a computer program that performs IRT analyses.

215D. Special Topics in Psychometrics

(4) ZWICK

Prerequisite: consent of instructor.

Exploration of an advanced or specialized topic in psychometrics.

216A. Advanced Multivariate Statistics

(4) ZWICK

Prerequisite: Education 214A or 214B or 214C.

The theory and application of multivariate statistics, including multivariate analysis of variance, discriminant analysis, and canonical correlation. Instruction in the necessary matrix algebra will be provided.

216C. Hierarchical Linear Models

(4) RUMBERGER

Prerequisite: consent of instructor.

Many educational phenomena operate at multiple levels, such as the effects of school characteristics on student achievement. This course introduces students to statistical techniques for estimating linear models involving multilevel data, including time periods, individuals, and institutions.

216E. Nonparametric Statistics

(4) ZWICK

Prerequisite: Education 214A and 214B.

Analysis of data using techniques that are appropriate when assumptions of traditional normal-theory statistical procedures are not met. Includes the Wilcoxon and Kruskal-Wallis tests, Spearman Correlation, Kendall's Tau, and methods for the analysis of frequency data.

216F. Structural Equation Models

(4) STAFF

Prerequisite: Education 214A-B-C.

The theory and application of structural equation modeling (also called analysis of covariance structures).

219A. Research on Instructional Approaches

(4) BIANCHINI, BRENNER

Prerequisite: consent of instructor.

Examination of models of research or instructional approaches used in K-12 classrooms. These include multicultural/liberatory/feminist inquiry, cooperative learning and experiential learning.

219B. Research on Classroom Teaching

(4) COPELAND, GREEN

Prerequisite: consent of instructor.

Introduction to various genre of research that have attempted to understand and improve classroom teaching over the past thirty years. Exploration of contemporary research programs and their results. Schooling.

219C. Motivating Students

(4) BLOCK

An exploration of contemporary school motivation theory. Emphasis is placed on modern cognitive and effective theories of intrinsic motivation: attribution, ability, achievement, self-worth, flow, and self-determination.

221A. Introduction to Qualitative Research Methods

(4) COOK-GUMPERZ, RALEY

Prerequisite: consent of instructor.

An overview of qualitative research methods; focus on study of techniques for data collection and analysis within various disciplinary perspectives; student participation in field research methods. Introduction to qualitative data analysis programs.

221B. Qualitative Interviewing

(4) BRENNER, COOK-GUMPERZ

Prerequisite: Education 221A.

Qualitative interviewing methods including ethnographic interviews, life histories, cognitive maps and think-a-loud interviews. How to conduct interviews with different kinds of informants.

221C. Observation in Small Group Analysis

(4) COOK-GUMPERZ, CONLEY

Prerequisite: consent of instructor.

Observational methods and small group analysis constitute the backbone of qualitative research and have a long research history. This course provides some insight into the range of methods and techniques available, and explores the thinking that has shaped the individual methods. Issues that different methods were designed to deal with, research agendas that developed as a result, and implications these have for social research in educational settings are also discussed.

221D. Classroom Ethnography

(4) DIXON, GREEN

Prerequisite: consent of instructor.

Examination of the pre-fieldwork and fieldwork phases of ethnography in school and classroom settings including issues of entry and access, theoretical frameworks, indexing data, and processes of data collection and analysis.

221F. Community Ethnography

(4) BRENNER, GREEN, RALEY

Prerequisite: Education 221A.

How to carry out ethnographic research in order to explore the relationship between schools, families, and communities.

221G. Textual Analysis

(4) BAZERMAN, BLAU

Prerequisite: consent of instructor.

Methods of examining texts, their form, their contents, and their functions in relation to the operations of educational organizations and to teaching and learning in classrooms. Special attention to student research projects.

222A. Introduction to Exceptional Children

(4) GERBER, SINGER

An overview of the historical, social, and legislative foundations of the education of the exceptional pupil. Survey of the range and nature of disabilities requiring special education.

222B. Academic and Cognitive Characteristics of Students with Mild Disabilities

(4) GERBER

Prerequisite: consent of instructor.

Study of the academic and cognitive characteristics of children who are at risk or have mild disabilities. Interventions for these students will also be covered.

222C. Social and Affective Characteristics of Students with Mild Disabilities

(4) COSDEN

Prerequisite: consent of instructor.

Study of the affective and social characteristics of children who are at risk or have mild disabilities. Interventions for these students will also be covered.

222D. Law, Ethics, and History of Special Education

(4) GERBER, SINGER

Prerequisite: consent of instructor.

Intensive look at the laws governing special education and civil rights for people with disabilities in the U.S. The ethics of special education and key historical developments are also covered. Topics include controversies and historical trends.

223H. Individual Differences and the Administrator

(4) GERBER, YUN

Prerequisite: consent of instructor.

Legal requirements and instructional leadership responsibilities of administrators who deal with special populations in educational settings. Includes consideration of resource allocations, provision of procedural safeguards to parents and initiation of innovations in organizing and administering special programs in the schools.

224A. Discourse Analysis in Educational Settings

(4) DIXON, GREEN

Prerequisite: consent of instructor.

Examination of the nature of discourse, linguistic constructs and how they apply to the study of discourse in educational settings and issues in transcribing and analyzing classroom talk.

224B. Narrative Analysis

(4) COOK-GUMPERZ, KYRATZIS

Prerequisite: consent of instructor.

Linguistic/stylistic and thematic/content analyses, and structural approaches to the classic narrative theory. Exploration of how narratives are used to shape personal shared reality and social relationships; the power of narrative; how narratives are embedded in conversations; and differences in narrative across gender and culture.

224C. Research Methods for Writing and Writing Processes

(4) BAZERMAN, BLAU

Prerequisites: Ed 214A and 221; consent of instructor.

Principles and practice in methods of investigating writing. Applicability and adaptations of standard qualitative and quantitative educational research methods. Problems of assessing writing text, skills, and processes in relation to research. Use of research techniques for reflective practice of teachers and writers.

225E. Social Foundations of Education/Elementary

(3) STAFF

Prerequisites: admission to the Elementary Credential Program in Education. Consent of instructor.

Not open to students who have completed Sociology 164 or Education 125.

A study of the relationship between school and society. Social and political influences on education, historically and currently, will be examined. Schools as a complex organization with unique roles will be studied.

226. The Nature of Subject Matter

(4) BAZERMAN, COPELAND

Prerequisite: consent of instructor.

The formation of school subjects; Views of knowledge and common contents in those subjects; Typical and atypical pedagogic goals and methods; Examination of devices used to regulate subject curriculum; Histories of issues/controversies that arise in shaping subject area learning.

227. Schooling in the United States

(4) RALEY, WEISSGLASS

Prerequisite: consent of instructor.

Examines major concepts and principles regarding the historical and contemporary purposes, roles and functions of education in United States society, especially as they relate to the twin challenges of equity and diversity.

228A. Learners with Severe Disabilities: Functional Skills Instruction

(4) SINGER

Prerequisite: consent of instructor.

Learning and motivational characteristics, assessments for screening, diagnosis, instructional planning, and functional analysis of behavioral problems. Procedures for teaching functional skills and recent research are covered.

228B. Learners with Severe Disabilities: Communication

(4) SINGER

Prerequisite: consent of instructor.

Teaching and research on instruction of communication and language competence and social competence. Research theory, and instructional practice are covered. The course is designed for masters and doctoral students.

228C. Learners with Severe Disabilities: Functional Academics and Inclusion

(4) SINGER

Prerequisite: consent of instructor.

Functional academics and social academic as well as managerial aspects of inclusion. Along with practical skills, students learn key theories and review recent research on social and academic inclusion.

228D. Direct Instruction and Strategy Instruction**(4) SINGER***Prerequisite: consent of instructor.*

Theory, practice, effectiveness, and controversy. Two of the major research-based approaches to teaching academic skills to students with learning disabilities are covered.

228E. Families and Disabilities**(4) SINGER***Prerequisite: consent of instructor.*

An overview of theories about the family, contemporary research regarding family issues, and home-school interactions. Designed for doctoral students who are interested in research and masters students who want to learn practical school-related methods.

228F. Topics in Family and Disability Research**(4) SINGER, GERBER***Prerequisite: consent of instructor.*

Focus on one important aspect of family life among families of children with disabilities. Research study on selected topics. Best suited for doctoral students.

228G. Interventions with Families and Children with Disabilities**(4) SINGER, GERBER***Prerequisite: consent of instructor.*

Theory and methods for supporting families of children with disabilities through the lifespan. Topics include theory and methods of behavioral family therapy, providing information about disabilities, stress management, support groups, and self-help organizations.

228H. Working with Stakeholders in Special Education**(4) GERBER, SINGER***Prerequisite: consent of instructor.*

Provides special educators with information and skills for working with the many stakeholders in special education. Content includes how to communicate with parents, administration, paraprofessionals, and teachers.

229C. Practicum in Special Education Programs for Severely Handicapped Pupils**(2-12) STAFF***Prerequisite: consent of instructor.*

Supervised field-based practicum in instruction and management of special education programs for severely handicapped pupils.

229D. Applied Systematic Instruction and Assessment**(2) SINGER, GERBER***Prerequisites: concurrent enrollment in Education 229C or E392; consent of instructor.*

Students read research and best practice studies, discuss current work in practicum placements, and develop documentation of performance and knowledge competencies.

229E. Field Supervision in Teacher Education for Doctoral Students**(4) SINGER, GERBER***Prerequisite: consent of instructor.*

Provides doctoral students with the opportunity to learn how to systematically observe, assess, give feedback, encourage self reflection, and coach student teachers in public schools and community settings.

234. Linguistics for Teachers**(2-4) STAFF**

Linguistic theory and its applications to the teaching of language and reading skills. The course will survey topics in phonetics, syntax, semantics, and pragmatics.

236A. Research Methods and Practice: Action Research**(4) CONLEY***Prerequisites: Ph.D. or Ed.D. students who have completed at least two quarters of qualitative research methods and have identified a research problem; consent of instructor.*

Not open for credit to students who have completed Education 249B.

Introduction to qualitative methods and exploration

of where action research fits within this research paradigm. Course material substantially overlaps ED 221A. Meets requirements for ELO and ASC, Tier II.

236B. Research Methods and Practice: Interviewing as a Research Tool**(4) CONLEY***Prerequisites: Ph.D. or Ed.D. students who have completed at least one quarter of qualitative methods; consent of instructor.*

Prepares students in interviewing as a research tool, particularly for research in school institutions. Course meets requirements for Educational Leadership and Organizations as well as the Joint Doctoral Program in Educational Leadership.

236C. Research Methods and Practice: Case Studies**(4) CONLEY***Prerequisites: Ph.D. or Ed.D. students who have completed at least two quarters of qualitative research methods and have identified a research problem; consent of instructor.*

Not open for credit to students who have completed Education 249B.

Focuses on case study methodology as one form of qualitative research design. Students learn the different types of case studies and the value of using a multiple case design. The course also provides students with the tools for preparing their dissertation proposal. Meets research requirements for ELO and ASC, Tier II.

237B. Labor Relations and School Law**(4) STAFF***Prerequisite: consent of instructor.*

Study of legal/substantive issues, cases, negotiation problems, dispute settlement techniques, and private/public sector comparison. Study of school law history including significant cases; education, administrative, welfare, institutional, and other relevant codes; and opinions of courts, attorney general, and county counsel.

240A. Education Policy**(4) RUMBERGER***Prerequisite: consent of instructor.*

An introduction to education policy that will examine both the process of education policy and a series of substantive issues that are commonly the focus of education policy at the state and federal levels.

240B. Economic Analysis and Education Policy**(4) RUMBERGER, YUN***Prerequisite: Education 240A.*

This course will examine the use of economic theory and concepts, i.e., human capital theory, public finance, and cost-effectiveness evaluation, as a basis for understanding and solving a variety of current education policy problems.

241A. Politics of Education**(4) STAFF***Prerequisite: consent of instructor.*

Same course as Political Science 295.

Examination of the relationship between politics and education in a democratic society. Focus on the role of politics in defining the public purposes of education, determining its content and distribution, and in holding educators accountable to the larger body politic.

242A. Organizational Theories**(4) CONLEY***Prerequisite: consent of instructor.*

Survey of prominent theories about how organizations function, how and why some organizations flourish while others might flounder, how organizations encourage as well as discourage innovation and creativity, and how different theories project different realities about organizations.

242C. Theories of Organizational Change and Development**(4) WEISSGLASS***Prerequisite: consent of instructor.*

Not open for credit to students who have completed Education 261B.

An overview of organizational change and development theories, with special focus on the concepts of organizational complexity and learning

and the problems of change. Students analyze and apply theories through class papers and projects.

242D. School Reform**(4) BLOCK***Prerequisite: consent of instructor.*

Not open for credit to students who have completed Education 255C.

In-depth examination of contemporary trends in schooling with special emphasis on current literature on effective schooling, mastery learning, and school reform.

243. The School Administrator and Supervisory Practice**(4) GLASMAN***Prerequisite: consent of instructor.*

The role of the school administrator through theoretical and practical contexts will be explored.

245A. Educational Finance**(4) GLASMAN***Prerequisite: consent of instructor.*

An introduction to the financing of education at the school, district, county, state, and federal levels. Emphasis will be given to the economic foundations of school financing.

246A. Evaluation in Educational Administration**(4) GLASMAN***Prerequisite: consent of instructor.*

Educational evaluation is examined as an executive function. Emphasis is on practices, models, and studies of program and personnel evaluation and the integration of educational evaluation within the context of educational decision making.

246C. Testing Students**(4) BLOCK***Prerequisite: consent of instructor.*

Introduction to student testing with special emphasis on three major schools—measurement, evaluation, assessment.

247A. Educational Leadership**(4) GLASMAN***Prerequisite: consent of instructor.*

Systematic analysis of the antecedents and consequences of administrator behavior in a variety of educational settings.

249A. Field Experience in Educational Administration**(1-8) STAFF***Prerequisite: consent of instructor.*

May be repeated for credit.

School site based field experience working with local school administrators. Eight units are required to meet California Teacher Credential requirements for the Administrative Services Credential.

249D. Practicum in Human Resource Administration**(2) STAFF***Prerequisite: consent of instructor.*

The course addresses the practical dimensions of human resource administration and the need to attract, retain, develop, and motivate school personnel in ways that enhance student learning and lead to a positive and productive school climate.

249E. Practicum in Use of Technology in Education**(2) STAFF***Prerequisite: consent of instructor.*

This course will examine and use technology for instructional and administrative purposes in schools, including acquisition, community support, faculty use, curriculum development, potential impacts on student learning. Students will develop a technology plan for a school as part of the course requirements.

249F. Creating Equitable Learning Environments**(2) STAFF***Prerequisite: consent of instructor.*

Prospective educational leaders use a problem-based model to explore policies and practices necessary for creating inclusive schools that meet the needs of diverse learners. Students examine issues of race, socioeconomic, gender, disabilities, and language including self-examination of bias and assumptions.

250A-B-C-D. Doctoral Seminar in Educational Leadership and Organizations (4-4-4-4) STAFF

Prerequisite: consent of instructor.

A seminar for post-comprehensive exam students with the intent of helping to define areas, problems, specific questions, and methodologies for doctoral research. Topics and instructors may vary from quarter to quarter.

251. Families, Schools, and Communities (4) STAFF

Prerequisite: consent of instructor.

Course explores the critical link between families, schools, community and children's school success. Examines history, theory and practice of home-school-community partnerships and addresses skills needed by educators for success with diverse families and interagency collaboration.

253D. Seminar in Teaching and Learning (1-6) STAFF

Prerequisite: consent of instructor.

May be repeated for credit.

In-depth consideration of emerging topics in teaching and learning. Course content may vary.

254. Instructional Supervision and Curriculum Design (4) STAFF

Prerequisite: consent of instructor.

A study of systematic approaches to supervision, and basic conceptions about curriculum theory, design, and evaluation. The role of the administrator as supervisor and developer of curriculum is also examined.

255A. Being a Student (4) BLOCK

This course focuses on the nature of the student role. Specifically it examines school and classroom life from the student perspective drawing on literature from educational sociology, social psychology, and anthropology.

258A. Seminar in Curriculum: Literacy (4) DIXON

Prerequisite: consent of instructor.

Recent developments, review, and evaluation of current research in curriculum is explored.

258B. Seminar in Curriculum: Mathematics (4) BIANCHINI, BRENNER, LAGER

Prerequisite: consent of instructor.

Examination of mathematics curricula from several points of view: historical, theoretical, and in practice. Special attention will be given to comparing curricula advocated by the reform movement to curricula currently used in schools.

261C. Human Resource Development (4) CONLEY

Prerequisite: consent of instructor.

Human resources as a "frame" for examining what individuals bring to their organizations, performances/experiences; what happens as various organizational systems deal with individual organizational members; choices organizational members make about jobs and careers; and the role of interpersonal and group processes.

270A. Classrooms as Cultures (4) GREEN

Prerequisite: consent of instructor.

Examines classrooms as cultures and overviews anthropological studies of classroom processes to identify factors that support and/or constrain learning in classrooms. Topics to be explored include: classroom discourse, school culture, peer culture, situated learning.

270C. Race and Ethnicity in American Education: A Comparative History (4) WEISSGLASS

Prerequisite: consent of instructor.

Offers a historical overview of minority education in our public schools with emphasis on urban multiethnic student populations and their struggle for educational equity. A research paper is required.

270D. Seminar in Crosscultural Education: Concepts and Theories (4) STAFF

Prerequisite: consent of instructor.

Presents the theoretical foundations of cross-cultural education with emphasis on its history, rationale, and objectives.

270E. Perspectives on Educational Language Policy (4) LEE, KYRATZIS

Prerequisite: consent of instructor.

Examination of the implicit and explicit language policies surrounding bilingual and ESL education and their implications for language minorities in schools and the workplace. Issues concerning language attitudes, language loyalty, language maintenance, identity and power are also discussed.

270F. Second Language Learning in Educational Contexts (4) LEE, DIXON

Prerequisite: consent of instructor.

Overview of the linguistic, psychological, cognitive, and sociocultural approaches to second language acquisition. Students critically review past and current SLA theories and research and develop an understanding of how language proficiency is conceptualized and assessed.

270H. Language, Culture and Learning (4) COOK-GUMPERZ, LEE, DIXON

Prerequisite: consent of instructor.

Explores the effect of language, culture, background, and values on learning processes and the implications for the development of appropriate instructional strategies.

271. Cultural Studies in Education (4) COOK-GUMPERZ, BRENNER

Prerequisite: Consent of instructor.

Critically explore media and popular arts' cultural influences on everyday life, including books/popular literature, music, visual arts, and architecture. Consider the importance of these cultural forms for education and community life.

274. Proseminar in Language, Interaction, and Social Organization (2-4) COOK-GUMPERZ, BAZERMAN, KYRATZIS, RALEY

Prerequisite: consent of instructor.

Same course as Sociology 274 and Linguistics 274. May be repeated for credit.

Discussion of current research, literature, and theoretical and methodological issues in language and social interaction.

279. Perspectives on Teacher Education and Professional Development (4) STAFF

Prerequisite: consent of instructor.

Course for Ph.D. candidates in Education with a focus on pre-service and inservice teacher development. Students read professional literature, research and hear from those doing the work of teacher educators.

280. Education in Diverse Societies (4) RALEY

Prerequisite: consent of instructor.

Explores various critical approaches to the theory and practice of crosscultural education in diverse societies.

282. Research on Teacher Education (4) BIANCHINI

Prerequisite: consent of instructor.

Examines research on teacher education and professional development. Course explores standards for teacher education, teacher education and professional development models, research on teacher learning communities, and enduring challenges faced by teacher educators.

283A. Seminar in Teacher Education and Professional Development (2) COPELAND, LAGER

Prerequisites: concurrent enrollment in Education 283B; consent of instructor.

Designed to provide opportunities for students to explore issues in teacher education and professional development of beginning and/or experienced teachers or other professionals (i.e., counselors, administrators, etc.).

283B. Internship in Teacher Education and Development (2) COPELAND, RALEY

Prerequisite: consent of instructor.

May be repeated for credit.

Provides students with opportunities to gain practical experience in teacher education and professional development broadly defined.

284. Teacher Learning and Knowing (4) RALEY, COPELAND

Prerequisite: consent of instructor.

Provides students the opportunity to develop a coherent conceptual framework for their study of teaching. Course considers several ways of understanding the relationship between knowledge and practice, with special attention to learning as the transformation of this relationship. Approaches used to examine current efforts to improve the quality of teaching.

286A. Contemporary and Historical Perspectives on Science Education (4) STAFF

Prerequisite: consent of instructor.

Focus on contemporary research issues in science education in relation to historical perspectives of the field. Course readings and agenda are partially set by the interests of the students.

286B. Science Education in Sociocultural Context (4) STAFF

Prerequisite: consent of instructor.

Exploration of science and school science from a sociocultural perspective drawing on scholarship from the sociology, philosophy, and discourse of science.

286C. Learning Theories and Instructional Practices in Science Education (4) BIANCHINI

Prerequisite: consent of instructor.

Exploration of contemporary theories of learning and instruction in science education. Students examine and critique research on constructivism, groupwork, inquiry, project-based science, multicultural science education and science-technology-society approaches.

286D. Issues of Gender and Ethnicity in Science and Science Education (4) BIANCHINI

Prerequisite: consent of instructor.

Examination of recent scholarship related to issues of gender and ethnicity in science and science education. Readings are drawn not only from the field of science education, but from the history, philosophy and sociology of science.

286E. Research on Science Teaching and Science Teacher Education (4) BIANCHINI

Prerequisite: consent of instructor.

Designed primarily for master's and doctoral students interested in teacher education and/or science education. Examination of current research on the professional development of science teachers. Focusing on both preservice and inservice programs.

286ST. The History, Philosophy, and Sociology of Science in Science Education (4) BIANCHINI

Prerequisite: consent of instructor.

Exploration of the nature of science—what science is, how scientific knowledge is constructed, and how science and society interact—as well as ways to teach the nature of science to students. Primarily for pre-service science teachers.

289. Professional Development Seminar for Facilitators (2) STAFF

Prerequisites: students must be serving as an M.Ed. facilitator for the Teaching Education Program; consent of instructor.

Seminar supports facilitators in their work with M.Ed. candidates. Course examines ways to guide candidates in writing theoretical frameworks, collecting and analyzing their data, and providing feedback to one another. Readings include research literature and samples of candidates work.

290. Cognitive Development in Autism and Other Severe Disabilities (4) KOEGEL, SINGER

Prerequisite: Consent of instructor.

An overview of diagnostic and treatment methods in the area of autism and other severe disabilities.

Discussion topics include research on language, social behavior, self-injury, self-stimulation, research on physiological, educational, and behavioral interventions used in clinical, school and family settings.

291. Professional Issues in Severe Developmental Disabilities (4) KOEGEL, SINGER

Prerequisite: consent of instructor.

Study of professional issues and development of projects in the areas of clinical work with children and families, experimental analyses of severe behavior problems, preparation of articles for publication, organization of national conventions and grant writing.

292B. Mathematics Development in Middle Years (4) BRENNER

Prerequisite: consent of instructor.

Course looks at how elementary school children learn mathematics in specific topical areas such as word problems and rational numbers. Implications for instruction will be discussed.

292C. Mathematics Development in Adolescents (4) BRENNER, OKAMOTO, LAGER

Prerequisite: consent of instructor.

Course examines mathematical problem solving at the secondary and college level. Different approaches to problem solving will be discussed in terms of the relevant theories, mathematics curricula and instructional delivery.

293. Mathematics: Cultural Comparisons (4) BRENNER, OKAMOTO

Prerequisite: consent of instructor.

Investigation of mathematics instructions and achievements from a cross national perspective. Both formal and informal mathematics applications will be reviewed. Sources of information will include the International Education Assessment (IEA) studies of mathematics as well as sources from anthropology, sociology, and educational journals.

295. Seminar in Instructional Leadership (4) BLOCK

Prerequisite: consent of instructor.

Seminar course which deals with a variety of topics related to leadership in instruction.

299. Topics in Applied Linguistics (4) STAFF

Same course as EACS 299, French 299, German 299, Linguistics 299, and Spanish 299.

Specialized topics in the study of applied linguistics.

400. Doctoral Seminar and Practicum in Information Technology (4) STAFF

Prerequisites: enrollment in the Joint Doctoral Program in Educational Leadership; consent of instructor; knowledge of IT fundamentals and ability to conduct online research and communication.

Examines theoretical foundations and practical skills required to effectively utilize and deploy technology and manage information in educational organizations.

401. Doctoral Seminar and Practicum in Organizational Management (4) STAFF

Prerequisite: enrollment in the Joint Doctoral Program in Educational Leadership; consent of instructor.

Application of management science and professional practice within educational organizations. Students engage in research, inquiry, and application. Teams develop a management plan, explain and defend it in context of organizational theory, "best professional practices," and expected outcomes.

402. Doctoral Seminar and Practicum in Policy, Equity, and Political Issues (4) STAFF

Prerequisite: enrollment in the Joint Doctoral Program in Educational Leadership; consent of instructor.

Explores the development and effects of state, county, and local educational policies on school leadership, instruction, and educational organizations. Students apply such organizational policy tools as agendas, debates, public presentations, and school board communications.

403. Doctoral Seminar and Practicum in Financial Leadership (4) STAFF

Prerequisites: enrollment in the Joint Doctoral Program in Educational Leadership; consent of instructor; knowledge of spreadsheet and presentation software and ability to conduct online research and communication.

Students learn how to plan, appropriate, and manage financial resources to support organizational effectiveness and student learning. Topics include macro-micro-economic theories, K-12 and higher education funding structures, public and corporate financial models, and school finance reform.

404. Doctoral Seminar and Practicum in Leadership in Learning Organizations (4) PETERSEN

Prerequisite: enrollment in the Joint Doctoral Program in Educational Leadership; consent of instructor.

Detailed exploration of leadership characteristics and impacts on learning organizations. Topics include "vision," collaboration, accountability, and leadership frames of reference. Students increase their knowledge of theory as well as evaluation strategies to identify effective leadership behaviors and characteristics.

405. Research Methods and Practicum in Education Leadership (6) GERBER, PETERSEN, BLOCK

Prerequisite: enrollment in the Joint Doctoral Program in Educational Leadership; consent of instructor.

Principles of scientific methods used in educational research explored and applied to practicum experience. Includes selection and definition of problem, comparison of research strategies for literature review and selection of measures and instrumentation, common problems of analysis and data interpretation.

406. Research in Educational Leadership (4-12) GENTILUCCI, BLOCK

Prerequisite: enrollment in the Joint Doctoral Program in Educational Leadership; consent of instructor.

Focuses on writing a research proposal in the area of educational leadership.

407. Problem Statements in Educational Leadership Research (4-12) STAFF

Prerequisite: enrollment in the Joint Doctoral Program in Educational Leadership; consent of instructor.

Supervised research and writing of problem statements and literature review in educational leadership.

408. Methodological Applications in Educational Leadership Research (4-12) GERBER, YUN, BLOCK

Prerequisite: enrollment in the Joint Doctoral Program in Educational Leadership; consent of instructor.

Supervised research and methodological applications in educational leadership.

409. Reporting Research Findings in Educational Leadership (4-12) PETERSEN, GENTILUCCI, YUN, BLOCK

Prerequisite: enrollment in the Joint Doctoral Program in Educational Leadership; consent of instructor.

Supervised research and reporting of research findings in educational leadership.

440. Education Policy for Educational Leaders (4) RUMBERGER, BLOCK, YUN

Prerequisite: consent of instructor; acceptance into the Joint Doctoral Program in Educational Leadership.

Educational policy analysis techniques are applied to specific, regional, short- and long-term educational issues identified yearly by the Professional Development Districts served by the JDP. Students work on projects on a cohort basis both inside and outside of class utilizing distance education techniques.

442. Organizational Theories for Educational Leaders (4) CONLEY, BLOCK

Prerequisite: consent of instructor; must be enrolled in the Joint Doctoral Program.

Educational organizations, change, and reform

theories are applied to specific, regional, short- and long-term educational issues identified yearly by the Professional Development Districts served by the JDP. Students work on projects on a cohort basis both inside and outside of class utilizing distance education techniques.

447. Leadership for Educational Leaders (4) BLOCK

Prerequisite: consent of instructor; must be enrolled in the Joint Doctoral Program.

Educational leadership analysis is applied to specific, regional, short- and long-term educational issues identified yearly by the Professional Development Districts served by the JDP. Students work on projects on a cohort basis both inside and outside of class utilizing distance education techniques.

ADVANCED STUDIES

Advanced study and research courses (500 series): The 596-599 series of courses are for advanced study and/or research. All students enrolling in 500-level courses must use instructor codes when registering (according to registration instructions distributed each quarter).

596. Directed Reading and Research (2-12) STAFF

Prerequisite: consent of instructor.

Individual tutorial in doctoral and masters' degree subprogram special fields.

597. Individual Study for Comprehensive Examinations (2-12) STAFF

Prerequisite: consent of instructor.

Preparation for master's or Ph.D. comprehensive examinations.

598. Master's Thesis Research and Preparation (2-12) STAFF

Prerequisite: consent of instructor.

Supervised research and writing of the thesis in doctoral and masters' degree subprograms.

599. Ph.D. Dissertation Preparation (2-12) STAFF

Prerequisite: consent of instructor.

Supervised research and writing of the dissertation in doctoral degree programs.

TEACHER PREPARATION

Professional preparation in teaching (300-393 series): These courses are designed for the professional sequence in approved credential programs. They provide theory related to field practice in teaching and cover the design of instruction, teaching strategies, development of instructional materials, and the psychology of learning. The student teaching experience provides the opportunity for application of university course work in practice. Courses in the 392 series have as a prerequisite admission to a teaching credential program at UCSB. The Education 392 series courses coincide with the calendar of the public schools.

302. Educational Renovations: Foundations of Education Revisited (2) RALEY

Prerequisite: admission to Multiple Subject, Single Subject, ESC Programs only.

Revisits the themes and issues first considered in Education 203A, the Foundations course that opened students' teacher preparation program. In conversations with colleagues, students use their recent teaching experiences to revisit-and renovate-their early statements of educational philosophy. (S)

317. Historical Thinking (4) KOK

Prerequisite: admission to Single Subject Program or the Multiple Subject Program.

Provides future history teachers with an opportunity to explore the nature of history, to investigate the interdisciplinary aspects of the subject, and to develop their own concepts of historical thinking and historical empathy. (S)

332A. Child, Family, Community I

(2) STAFF

Prerequisite: enrollment in the Multiple Subject or Single Subject Teaching Credential Program.

A 2-quarter sequence course; students must also take ED 332B in fall quarter.

Prepares teacher candidates to create a supportive and healthy learning environment for student learning. Helps candidates learn how personal, family, school, community, and environmental factors are related to student's academic, physical, emotional, and social well-being.

332B. Child, Family, Community II

(2) STAFF

Prerequisite: enrollment in the Multiple Subject or Single Subject Teaching Credential Program.

A 2-quarter sequence course; students must also take ED 332A in summer quarter.

Prepares teacher candidates to create a supportive and healthy learning environment for student learning. Helps candidates learn how personal, family, school, community, and environmental factors are related to student's academic, physical, emotional, and social well-being.

R390AF-AW-AS. ELD/SDAIE Methods and Procedures

(2-1-1) STAFF

Prerequisites: Admission to the Single Subject Credential Program.

A 3-quarter in-progress sequence course with grades for all quarters issued upon completion of Education R390AS.

Designed to help SST credential candidates begin to a core methods course required for SST Credential designed to help SST Credential candidates develop knowledge, skills, and understanding necessary in decision-making regarding instruction insuring ESL proficiency and progress for each student.

R390M-F-W. Procedures for Teaching Literacy - SST (Secondary)

(1-1-1) STAFF

Prerequisite: admission to the Single Subject Credential Program.

Application of research and theory to procedures in the teaching of reading through problem solving situations, inductive reasoning and discovery, adapting instruction to individual reading needs. Designed to coincide with semester system of public schools.

S390. Procedures Used for the Teaching of Art in Schools

(3) STAFF

Prerequisite: admission to Single Subject Credential Program in Art.

Not open for credit to students who have completed Art Studio 290.

Students are given hands-on experience in developing art instructional strategies. They are prepared to teach the art curriculum commonly taught in California schools. Recent ideas from the literature on art education are covered.

S390M. Procedures for Teaching Art: Secondary

(1) STAFF

Prerequisite: admission to Single Subject Credential Program in Art.

Not open for credit to students who have completed Art Studio 290.

Students are given "hands-on experience" in developing art instructional strategies. They are prepared to teach the art curriculum commonly taught in California schools. Recent ideas from the literature on art education are covered.

SC390. Curriculum and Instructional Procedure and Materials Used in Teaching English in the Secondary School

(3) STAFF

Prerequisite: admission to Single Subject Credential Program.

Seminar for student teachers in classroom

applications of educational theory to the teaching of English.

SC390F. Curriculum and Instructional Procedure and Materials Used in Teaching English in the Secondary School

(4) STAFF

Prerequisite: admission to Single Subject Credential Program.

Seminar for student teachers in classroom applications of educational theory to the teaching of English.

SC390M. Procedures for Teaching English: Secondary

(1) STAFF

Prerequisite: admission to Single Subject Credential.

Seminar for student teachers in classroom applications of educational theory to the teaching of English.

SL390. Curriculum and Instructional Procedures and Materials Used in Teaching of Foreign Language

(3) STAFF

Prerequisite: admission to Single Subject Credential Program. Background in foreign language.

Methodology of foreign language teaching.

SL390M. Procedures for Teaching Foreign Language: Secondary

(1) STAFF

Prerequisite: admission to Single Subject Credential Program. Background in foreign language.

Methodology of foreign language teaching.

SM390. Curriculum and Instructional Procedures and Materials Used in the Teaching of Mathematics

(3) STAFF

Prerequisite: admission to Single Subject Credential Program. Required background in mathematics.

Procedures, curriculum, research, and theory related to teaching and learning mathematics.

SM390M. Procedures for Teaching Math: Secondary

(1) STAFF

Prerequisite: admission to Single Subject Credential Program in mathematics.

Procedures, curriculum, research, and theory related to teaching and learning mathematics.

SPS390W. Special Education in Secondary Schools

(4) KOK

Prerequisites: admission to Single Subject Credential Program.

A survey course in special education for students preparing to teach at the high school level. Topics include educational policy, instructional modification, and the role of the teacher in meeting the education needs of the handicapped adolescent.

SS390M-F-W-S. Procedures for Teaching Social Studies

(1-1-1-1) KOK

Prerequisites: admission to Single Subject Credential Program; graduate standing.

Required course for candidates applying for the Single Subject Credential in one of the following social sciences: anthropology, economics, history, political science, sociology, geography, psychology, or combined social sciences.

ST390. Curriculum and Instructional Procedures and Materials Used in the Teaching of Science

(3) STAFF

Prerequisite: admission to Single Subject Credential Program. Required background in life sciences or physical sciences.

Lecture-discussion sessions considering secondary school science curriculum materials, and the objectives and teaching strategies appropriate to these materials.

ST390M. Procedures for Teaching Science: Secondary

(1) STAFF

Prerequisite: admission to Single Subject Credential Program. Required background in physical or life sciences.

Lecture-discussion sessions considering secondary

school science curriculum materials, and the objectives and teaching strategies appropriate to these materials.

ST391A. Elementary Math Procedures

(4) STAFF

Prerequisite: graduate standing and enrollment in the Multiple Subject Credential Program.

The application of research and theory to classroom practice in the teaching of mathematics.

E391AW-AS. Materials Used in Teaching of Mathematics in Elementary Schools

(2-1) STAFF

Prerequisites: graduate standing and enrollment in the Multiple Subject Credential Program.

A 2-quarter, in-progress sequence course with grades for both quarters issued upon completion of Education E391AS.

The application of research and theory to classroom practice in the teaching of mathematics.

E391BS. Elementary Science Teaching Procedures

(4) STAFF

Prerequisites: graduate standing and enrollment in the Multiple Subject Credential Program.

An application of research and theory to classroom practice in the teaching of science.

E391CW-CS. Elementary Social Studies Teaching Procedures

(3-1) STAFF

Prerequisites: graduate standing and enrollment in the Multiple Subject Credential Program.

A 2-quarter, in-progress sequence course with final grades for both given upon completion of ED E 391CS.

The application of research and theory to classroom practice in the teaching of social studies. (W,S)

E391DF-DW. Elementary Reading and Language Arts Teaching Procedures

(3-2) STAFF

Prerequisite: admission to the Multiple Subjects Credential Program. A 2-quarter, in-progress sequence course with letter grades for both quarters issued upon completion of Education E391DW.

Application of research and theory to classroom practice in the teaching of reading and language arts through problem solving situations, inductive reasoning and discovery, and adapting instruction to individual reading needs.

E391E. Foundations: Teaching English Learners

(4) STAFF

Course focuses on social, political, and legal foundations of schooling English learners. The course specifically addresses: Demographics of California, state and federal laws, schooling of English learners, theoretical frameworks of second language acquisition and bilingualism, assessment and diagnosis of language proficiency.

E391F. Teaching Strategies: Bilingual/Cross-Cultural Education

(4) STAFF

Prerequisites: consent of instructor and admission to Bilingual/Cross-Cultural Emphasis Program.

Intensive examination of effective teaching methods for Spanish-Spanish-English classroom with particular emphasis on language arts area. Students explore existing materials and applications and also learn of approaches for developing new and appropriate material.

E391G. Applications of Theory: Instruction, Assessment and Policy Implications

(4) STAFF

Prerequisites: consent of instructor and admission to Bilingual/Cross Cultural Emphasis Program.

Designed to further develop credential candidates' knowledge of pedagogical principles of second language acquisition and skills to effectively teach English learners. Goal is to enable credential candidates to apply appropriate pedagogical practices that foster high expectations and provide access to the core curricula.

E391HF-HW-HS. ELD/SDAIE Methods and Procedures

(2-1-1) STAFF

Prerequisite: enrollment in Multiple Subject Teaching

Credential Program.

A 3-quarter, in-progress sequence course with grades for all three quarters issued upon completion of Education E391HS.

Course focuses on the education of English learners. Primary goal is to prepare professional educators who can articulately advocate for and enact effective educational practices for students who are acquiring English as a new language. Designed to help MST credential candidates begin to develop skills and understanding necessary to make decisions regarding instruction that ensure English language proficiency and academic progress for each student.

E392F-W-S. Supervised Teaching: Elementary Schools

(3-12, 3-12, 3-12) STAFF

Prerequisite: admission to the Multiple Subject Credential Program.

Supervised student teaching in the elementary schools.

E392M. Supervised Teaching: Elementary Schools

(3-12) STAFF

Prerequisite: admission to the Multiple Subject Credential Program.

Supervised teaching in the elementary schools.

R392A-B. Multicultural Reading Field Experiences

(1-1) STAFF

Prerequisites: admission to Single Subject Credential Program; consent of instructor.

Supervised field experience in multicultural settings for secondary teacher candidates.

R392C. Multicultural Reading Field Experiences

(1) STAFF

Prerequisites: admission to Single Subject Credential Program; consent of instructor.

Supervised field experience in multicultural settings for secondary teacher candidates.

S392M. Supervised Teaching: Art Secondary

(3-12) STAFF

Prerequisite: admission to the Single Subject Program.

Supervised teaching in art at the secondary level.

SC392. Student Teaching: English

(3-12) STAFF

Prerequisite: admission to Single Subject Credential Program. Admission to student teaching.

Field work, teaching one or more classes in English or related fields, grades 7-12, in a local school under the supervision of a master-teacher and university field supervisor.

SC392M. Student Teaching: English Secondary

(3-12) STAFF

Prerequisite: admission to Single Subject Program.

Supervised student teaching in English at the secondary level.

SL392M. Student Teaching: Foreign Language Secondary

(3-12) STAFF

Prerequisite: admission to Single Subject Program.

Supervised student teaching in foreign language at the secondary level.

SM392. Student Teaching: Mathematics

(3-12) STAFF

Prerequisite: admission to the Single Subject Credential Program in mathematics.

Supervised teaching at the secondary level in mathematics.

SM392M. Student Teaching: Math Secondary

(3-12) STAFF

Prerequisite: admission to the Single Subject Program.

Supervised teaching in math at the secondary level.

SS392. Student Teaching: Social Studies

(3-12) STAFF

Prerequisite: admission to the Single Subject Credential Program in social studies.

Supervised teaching at the secondary level in social studies.

SS392M. Student Teaching: Social Science Secondary

(3-12) STAFF

Prerequisite: admission to the Single Subject Program.

Supervised teaching in social science at the secondary level.

ST392. Student Teaching: Science Education

(3-12) STAFF

Prerequisite: admission to the Single Subject Credential Program in science.

Supervised teaching at the secondary level in science.

ST392M. Student Teaching: Science Secondary

(3-12) STAFF

Prerequisite: admission to the Single Subject Credential Program.

Supervised teaching in science at the secondary level.

E393F-W-S. Seminar in Student Teaching

(1-2-1) STAFF

Prerequisite: admission to Multiple Subject Credential Program. Concurrent enrollment in Education E392 (for Ed E393F).

A 3-quarter, in-progress sequence course with grades for all three quarters issued upon completion of Education E393S.

This seminar covers problems related to student teaching.

E393M. Professional Seminar in Teaching: Elementary

(1) STAFF

Prerequisite: admission to Multiple Subject Program.

Seminar covers problems related to student teaching.

S393F-W-S. Seminar in Secondary Teaching Art

(1-1-2) STAFF

Prerequisite: taken concurrently with supervised teaching.

Seminar covers problems related to student teaching.

S393M. Professional Seminar in Teaching Art: Secondary

(1) STAFF

Prerequisite: taken concurrently with supervised teaching.

Seminar covers problems related to student teaching.

SC393F-W-S. Problems Seminar in Teaching English

(1-1-2) STAFF

Prerequisite: taken concurrently with supervised teaching.

Seminar covers problems related to student teaching.

SC393M. Professional Seminar in Teaching English: Secondary

(1) STAFF

Prerequisite: taken concurrently with supervised teaching.

Seminar covers problems related to student teaching.

SL393F-W-S. Problem Seminar: Teaching Foreign Languages

(1-1-2) STAFF

Prerequisite: concurrent enrollment in Education SL392.

May be repeated.

Seminar covers problems related to student teaching in foreign languages.

SL393M. Professional Seminar in Teaching Foreign Language: Secondary

(1) STAFF

Prerequisite: concurrent enrollment in Education SL 392.

May be repeated for credit.

Seminar covers problems related to student teaching in foreign language.

SM393F-W-S. Seminar in Teaching Mathematics

(1-1-2) STAFF

Prerequisite: taken concurrently with supervised

teaching in mathematics.

Seminar covers problems related to student teaching.

SM393M. Professional Seminar in Teaching Math: Secondary

(1) STAFF

Prerequisite: taken concurrently with supervised teaching in mathematics.

Seminar covers problems related to student teaching.

SS393F-W-S. Seminar in Teaching Social Studies

(1-1-2) KOK

Prerequisite: taken concurrently with supervised teaching in social studies.

Seminar covers problems related to student teaching.

SS393M. Seminar in Teaching Social Science

(1) STAFF

Prerequisite: taken concurrently with supervised teaching in mathematics.

Seminar covers problems related to student teaching.

ST393F-W-S. Seminar in Teaching Science

(1-1-2) STAFF

Prerequisite: admission to Single Subject Credential Program in science; taken concurrently with supervised teaching in science.

Seminar covers problems related to student teaching.

ST393M. Professional Seminar in Teaching Science: Secondary

(1) STAFF

Prerequisite: admission to Single Subject Credential Program in science; taken concurrently with supervised teaching in science.

Seminar covers problems related to student teaching.

E394. Ethnography and Communication Skills Development

(2) STAFF

Prerequisite: admission to secondary or elementary credential program.

Designed to teach ethnography and communication skills to student teachers in order that they might engage in peer or collegial observation of one another.

E395W. Curriculum Design

(3) TUYAY

Prerequisite: admission to Multiple Subject Program (MST).

Designed to provide MST credential candidates with the knowledge and skills necessary to provide balanced and comprehensive content area instruction in diverse K-8 classrooms. Focuses on interdisciplinary curriculum design. Credential candidates examine contemporary definitions of curricula, compare and contrast various models of integration and apply these theoretical understandings to their instructional planning and classroom practice.

S395F-W-S. Curriculum Planning and Assessment

(1-1-1) STAFF

Prerequisite: admission to the Single Subject Credential Program (SST).

Seminar in various educational issues; covers essential elements of lessons and curriculum planning as well as assessment design, implementation, and student work analysis.

SE396. Writing Project Approaches to Teaching Composition, K-College

(1-6) STAFF

Approaches to teaching composition at all levels and in all disciplines. Features demonstrations of proven techniques by fellows, staff, professional authors, and visiting scholars from the South Coast Writing Project. Includes examination of theory and research base for practices.

University Policies and Regulations

Nonresident Fee

If you have not been living in California with the intent to make it your permanent home for a minimum of 366 days immediately prior to the residence determination date of the term for which classification as a California resident is requested, you must pay a nonresident fee in addition to all other fees. The rules and regulations for establishing residency for tuition purposes are defined by the University of California Board of Regents, which is authorized by the California Legislature (SOR 110.2), to provide classification for a tuition differential between resident and nonresident students.

Reduced Nonresident Fee. Effective Fall 2006, the annual nonresident fee is reduced by 100 percent for graduate doctoral students who have advanced to candidacy, subject to the understanding that: (a) a graduate doctoral student may receive the reduced nonresident fee rate for a maximum of three years, and (b) any such student who continues to be enrolled, or who re-enrolls after receiving the reduced fee for three years, will be charged the full nonresident fee rate in effect at that time.

AB540 - California High School Students

A student who attended a high school in California for three or more years and who graduated from a California high school (or attained the equivalent) may be exempt from paying nonresident tuition and the Educational Fee differential charged to nonresidents. Eligibility for this exemption will continue until the student fulfills the University of California residency requirements or until this exemption is no longer available, whichever occurs first.

Exemption Requirements:

The student must have:

1. attended a high school in California for three or more years; **and**
2. graduated from a California high school (or attained the equivalent); **and**
3. enrolled, or be in the process of enrolling, at a University of California campus after January 1, 2002.

Non-immigrant students are not eligible for this exemption. Non-immigrants, as defined by federal immigration law, have been admitted to the United States temporarily and may have been granted one of the following visas: A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, TN, TD, and V, and TROV and NATO.

A student who does not have a lawful immigration status, but otherwise meets the requirements, will be eligible if s/he is taking steps to legalize his or her immigration status or will do so as soon as s/he is eligible.

This exemption is available to undergraduate, graduate, and professional students. Students who meet the qualifications listed above will remain nonresidents for tuition purposes, but they will not be assessed nonresident tuition or other fees paid by nonresident students.

Establishing California Residency for Fee Purposes

Please note: This summation is not a complete explanation of the laws regarding residency. Additional information is available from the Office of the Registrar. Please note that changes may be made in the residence requirements between the publication date of this statement and the relevant determination date.

An adult (at least 18 years of age) U.S. citizen or eligible non-citizen must establish a permanent residence in California before he or she is entitled to pay fees at the California resident rate. The requirements for establishing residency for fee purposes are independent from all other types of residency. A resident for fee purposes is someone who meets the requirements set forth in the University of California Board of Regents Policy Relating to Residence Matters and summarized here.

The following residence regulations apply only to the University of California. Classification as a resident at a California State University campus or California Community College campus does not guarantee that a student will be classified as a resident when transferring to a University of California campus.

All three of the following requirements must be met for classification as a California resident:

A. Physical presence.

An adult individual (18 years or older) must establish a physical presence in California more than one year (366 days) immediately prior to the residence determination date of the term for which classification as a resident is requested.

B. Intent to establish a domicile.

Objective evidence of an individual's intent to establish a permanent home in California is demonstrated by securing documentation that clearly demonstrates the establishment of residential ties in California, and a corresponding absence of ties to the former place of residence. Intent is evaluated as an independent element of residence, and must be coupled with physical presence. If implementation of the following actions is delayed, the commencement of the 366-day durational period will be extended until a concurrence of physical presence *and* intent is demonstrated.

Relevant indicia that contribute to the demonstration of intent include, but are not limited to, the following:

1. Obtaining a California Driver License or California Identification Card.
2. Registering a motor vehicle in California.
3. Registering/voting in California elections.
4. A history of employment in California.
5. Paying California State income taxes (including taxes on income earned outside California from the date California residence was established).

6. Designating a California permanent home address on all records (e.g., school, employment, military, etc.).
7. Licensing for professional practice in California.
8. Maintaining a California residence in which personal belongings are kept.

C. Financial independence.

For purposes of residence determination, financial independence is defined as the ability to support oneself financially without the help of others. A student is considered financially independent if he or she meets *all* of the following criteria:

1. Is unmarried and does not have a registered domestic partner;
2. Was not claimed as a dependent for income tax purposes by either parent or any other individual for the two tax years immediately prior to the quarter for which classification as a resident is requested;
3. Can demonstrate self-sufficiency for the current and two previous years.

The financial independence requirement will not be a factor in residence determination if the student meets *one* of the following criteria:

1. The student's parents are residents of California.
2. Is at least 24 years of age by December 31 of the calendar year for which classification as a resident is requested.
3. Is a veteran of the U.S. Armed Forces.
4. Is a ward of the court.
5. Has a legal dependent other than a spouse or registered domestic partner.
6. Is a married student or has a registered domestic partner who was not claimed as a dependent for income tax purposes by either parent, or any other individual for the tax year immediately preceding the term for which classification as a resident is requested.
7. Is a graduate or professional school student who was not claimed as an income tax deduction by either parent or any other individual for the tax year immediately prior to the term for which classification as a resident is requested.
8. Is a graduate or professional school student who is employed at the University of California 49% or more time (or receives the equivalent in departmental funding) during the quarter for which classification as a resident is requested.
9. Reached the age of majority in California while his/her parents were residents of this state *and* the California resident parents leave the state to establish a residence elsewhere *and* the student continues to reside in California after the parents' departure.

Please note that the above criteria apply to financial independence as it relates to residence determination only, and does not apply to a determination of independence for financial aid or other purposes.

General Rules Applying to Minors

If you are an unmarried minor (under age 18), the residence of the parent with whom you live is considered your residence. If you have a parent living, you cannot change your residence by your own act, by the appointment of a legal guardian, or by the relinquishment of your parent's right of control. If you do not live with either parent, your residence is that of the last parent with whom you lived. Unless you are a minor alien present in the U.S. under the terms of a nonimmigrant visa which precludes you from establishing a domicile in the U.S., you may establish your own residence when both of your parents are deceased and a legal guardian has not been appointed. If you derive California residence from a parent, that parent must satisfy the 366 day durational requirement.

Exemptions From Nonresident Fee

Students for whom the following conditions apply may be eligible for an exemption or waiver from the Nonresident Fee:

- 1. Active Duty Member of U.S. Military, their spouses, registered domestic partner, and dependent children.** For additional information and qualifications, contact the Residence Deputy at (805) 893-3033.
- 2. Child, Spouse, Registered Domestic Partner of a Faculty Member.** To the extent that funds are available, a student who is the unmarried, dependent child under the age of 21, or the spouse, or registered domestic partner of a University of California faculty member who is a voting member of the Academic Senate.
- 3. Child, Spouse, Registered Domestic Partner of a University Employee.** A student who is the spouse, registered domestic partner, or dependent child of a full-time employee of the University of California who is permanently assigned to work outside the state of California (e.g., Los Alamos National Laboratory).
- 4. Child of a Deceased Public Law Enforcement or Fire Suppression Employee.** A student who is the child of a deceased public law enforcement or fire suppression employee, who was a California resident and was killed in the course of law enforcement or fire suppression duties.
- 5. Dependent Child of a California Resident.** A student who has not been an adult resident of California for more than one year, and is the natural or adopted, dependent child of a California resident who has been a resident for more than one year immediately prior to the residence determination date. The student must also maintain full-time attendance in a California public post-secondary institution.
- 6. Graduate of a California School Operated by the Federal Bureau of Indian Affairs (B. I. A.).** A student who is a graduate of a California school operated by the B. I. A. (e.g., Sherman Indian High School) and who enrolls at the University of California.
- 7. Student Athlete.** Any amateur athlete in training at the U. S. Olympic Training Center in Chula Vista, California, is entitled to resident classification until he/she has resided in

PERSISTENCE AND GRADUATION RATES

Years:	% Persistence at:		% Graduation at:			
	One	Two	Three	Four	Five	Six
Freshmen	90%	83%	3%	61%	75%	79%
Junior Transfers*	87%	81%	76%	79%	83%	83%

*Two-year persistence rate for Transfer students includes students graduating in two years.

Persistence is the percentage of originally enrolled students still enrolled at UCSB after one and two years. Graduation rates indicate the percentage of students graduating after three, four, five and six years at UCSB. Rates reflect a Fall-to-Summer academic year.

UCSB SALARY AND EMPLOYMENT INFORMATION (approximately one year after graduation)

Undergrad. Discipline	Average Salary		
Computer Science	\$ 67,000	Interdisciplinary Studies	35,700
Engineering	\$54,000	Social Science/History	35,200
Business	47,700	Foreign Language/Linguistics	33,300
Mathematics	45,000	English/Literature	33,200
Physical Science	41,700	Arts	31,900
Law and Legal Studies	36,400	Philosophy/Religion	26,400
Biological/Life Science	36,200		
Communications	36,100	Other/Unknown	41,200
Psychology	36,600	All full-time workers	37,200

Source: "Undergraduate Alumni Survey – Spring/Summer 2004 Graduates" conducted by the UCSB Office of Budget & Planning. The above table presents average full-time salary by undergraduate discipline. Sixty-seven percent (67%) of alumni responding to the survey were employed full-time. It should be noted that variation in starting salaries exists within each discipline, based on job location, field of employment, type of employer, and personal qualifications of the individual.

- the state the minimum time necessary (366 days) to become a resident.
- 8. UC Tuition Exemption for California High School Students.** Students enrolled or in the process of enrolling at a University of California campus after January 1, 2002, who attended a high school in California for three or more years, and who graduated from a California high school (or attained the equivalent), may qualify for an exemption from the nonresident tuition. Undergraduate, graduate, and professional students are eligible to apply for this exemption. For additional information and qualifications, contact the Residence Deputy at (805) 893-3033.
 - 9. Surviving Dependents of California Residents killed in the September 11, 2001 terrorist attacks** (effective January, 2003).
 - 10. Recipients of Congressional Medal of Honor and their children under age 27** (effective January, 2003).

Oakland, CA 94607-5200

No other University personnel are authorized to provide information relative to residence requirements for tuition purposes. Any student who believes that an incorrect residence classification

has been made by the Residence Deputy may appeal in writing to the Principal Legal Analyst-Residence Matters within 30 days of notification of the Residence Deputy's final decision.

Incorrect Classification

If you were incorrectly classified as a resident, you are subject to reclassification and to payment of all unpaid nonresident fees. If you concealed information, or furnished false information and were classified incorrectly as a result, you are also subject to University discipline.

Change of Classification

If you are a continuing student, and wish to change your residence classification from nonresident to resident, you must file a *Petition for Resident Classification* at the Office of the Registrar. All changes of classification must be initiated on or before the published deadline as indicated in the *Schedule of Classes*.

Student Grievance Procedure

UCSB is in compliance with all legislation which seeks to eliminate discrimination toward students. Titles VI and VII of the Civil Rights Act of 1964 prohibit discrimination on the basis of race, color, national origin, and religion. Title IX of the Educational Amendments of 1972 prohibits discrimination on the basis of sex. Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990 prohibit discrimination on the basis of disability. Policy action by the Regents of the University of California prohibits discrimination on the basis of age and sexual orientation.

Members of the UCSB campus staff are available to answer students' questions about nondiscrimination policies and procedures. Information and copies of the grievance procedure are available from these offices:

Office of Vice Chancellor—Student Affairs

Michael D. Young, Vice Chancellor
 Allyn Fleming, Director, Student Affairs Planning
 and Administration
 Cheadle Hall 5203, (805) 893-8784

**Sexual Harassment Complaint Resolution
 Officer/Title IX Coordinator**

Paula Rudolph
 Phelps Hall 3213, (805) 893-2546

Office of Student Life

Yonie Harris, Dean of Students
 Student Resource Building (SRB) 2nd floor,
 (805) 893-4569

Administrative Services

Farfalla Borah, Americans with Disabilities
 Act Compliance Officer
 North Hall 1135, (805) 893-2184

Women’s Center

Sharon Hoshida, Acting Director
 Student Resource Building (SRB) 1st floor,
 (805) 893-3778

Disabled Students Program

Gary White, Director
 Student Resource Building (SRB) 2nd floor,
 (805) 893-2668

Office of the Ombuds

Priscilla Mori, Girvetz Hall 1205-K
 (805) 893-3285

Office of Equal Opportunity

Ricardo A. Alcaïno, Director
 Phelps Hall 3217A, (805) 893-4504

Associated Students

Main Office
 UCen, Room 1523, (805) 893-2566

Graduate Division

Jodi Anderson, Assistant Dean
 Cheadle Hall 3117, (805) 893-7109

Educational Opportunity Program

Yolanda Garcia, Assistant Vice Chancellor,
 Student Resource Building (SRB) 2nd floor,
 (805) 893-3720

Any student who wishes to file a grievance arising from alleged discrimination (other than a contested grade) must do so at the Office of the Vice Chancellor—Student Affairs, (805) 893-3651, Cheadle Hall 5203. The chart below summarizes the steps in the university’s formal grievance procedure for discrimination.

Sexual Harassment

One form of sex discrimination is sexual harassment. UCSB has a policy prohibiting sexual harassment and providing a grievance procedure specifically for this form of discrimination. Copies of the grievance procedure for sexual harassment may be obtained from each of the above mentioned offices as well as the Web site at www.shot9.ucsb.edu. In addition, the Chancellor has appointed a Sexual Harassment Complaint Resolution Officer. The task of the Complaint Resolution Officer is to assist individuals with their complaints of sexual harassment through the informal and formal procedures described in the sexual harassment policy. Individuals who file a complaint should know that civil law remedies, including but not limited to injunctions, restraining orders, or other orders, may also be available to them. Further information and/or assistance can be obtained from the Sexual Harassment Complaint Resolution Officer, Paula Rudolph, Phelps Hall 3213. Telephone (805) 893-2546.

In addition, UCSB provides sexual harassment prevention training to the university community. In September of 2004, Governor

Arnold Schwarzenegger signed Assembly Bill 1825, which requires all employers to train supervisors about sexual harassment prevention every two years. Therefore, effective January of 2005, all UCSB supervisors and faculty must fulfill a two-hour interactive sexual harassment training requirement. To fulfill this requirement, supervisors and faculty can choose to participate in either in-person or on-line training. For more information about this mandatory training, visit <http://shpe.sa.ucsb.edu>. UCSB students and non-supervisory staff members are also encouraged to learn about sexual harassment prevention. Those interested in training options should check the Sexual Harassment Prevention Education Web site (<http://shpe.sa.ucsb.edu>) for available trainings. In-person trainings also are available for departments and student organizations at any time. To schedule a training contact Carol Saucedo, Sexual Harassment Prevention Education Coordinator, at (805) 893-3778.

Equity in Athletics Disclosure Act

In compliance with the Equity in Athletics Disclosure Act, an annual report containing data concerning gender equity in our Intercollegiate Athletics Program is available upon request. Please call (805) 893-2701 to obtain a free copy.

Taxpayer Relief Act of 1997

The Taxpayer Relief Act of 1997 includes a number of educational tax benefits that may have an impact on students and their families. The act includes the following sections that involve the University reporting information on students to the Internal Revenue Service.

Hope Scholarship Tax Credit: a nonrefundable credit equal to a maximum of \$1500 in out-of-pocket qualified tuition and fee expenses paid by or on behalf of a student for two tax years during which the student is enrolled at least half time in the first or second year of postsecondary education leading to a recognized degree or certificate.

Lifetime Learning Credit: a nonrefundable credit equal to 20% of the \$5000 of qualified out-of-pocket tuition and fee expenses paid by or on behalf of a student enrolled in postsecondary course work at the undergraduate or graduate level leading to a recognized degree or certificate or to improved job skills.

Student Loan Interest Deduction: a deduction from income of up to \$1000 in qualified education loan interest due and paid during the first 60 months of repayment.

To find out if you qualify for benefits under these or other provisions of the Taxpayer Relief Act, please contact a tax consultant or call the Internal Revenue Service. The University of California is not authorized to respond to tax questions.

For more information about the Taxpayer Relief Act, refer to this Web site maintained for students at the University of California campuses: www.1098-T.com.

STUDENT GRIEVANCE PROCEDURE			
Who	What	Where	When*
Student	Files formal complaint	Office of the Vice Chancellor-Student Affairs	Within 90 days of grievable action
Vice Chancellor-Student Affairs	Forwards complaint	1. To designated investigator(s) 2. To head of department where alleged violation occurred 3. Affirmative Action Coordinator 4. Title IX Compliance Officer, if sex related	Within 5 days of receipt of complaint
Department Head	Files written answer to charges	With designated investigator(s)	Within 10 days
Investigator(s)	Examines circumstances of charge and reports findings	1. To Vice Chancellor-Student Affairs 2. Department 3. Student 4. Copies to Affirmative Action Coordinator and/or Title IX Officer	Within 10 days of department head reply or 20 days after receipt of complaint
Student	Presents written request for formal hearing	To Vice Chancellor-Student Affairs	Within 10 days of receipt of investigator(s) report
Vice Chancellor-Student Affairs	Arranges for impartial hearing; student chooses hearing entity	Campus location	Within 30 days
Vice Chancellor-Student Affairs	Notifies grievant and department head of hearing time and date	Personally or by registered mail	15 days before hearing date
Each party	Exchanges evidence	To be agreed upon	Within 7 days before hearing
Hearing entity	Reports findings; makes recommendations	To Vice Chancellor-Student Affairs	Within 30 days after hearing
Vice Chancellor-Student Affairs	Makes decision based on report and recommendations	To both parties and their representatives; To Affirmative Action Coordinator and/or Title IX Officer	Within 15 days from receipt of report
Student	Files appeal	To Chancellor	Within 30 days from date of report
Campus	Keeps all hearing records	As designated by the chancellor and subject to privacy and disclosure legislation	For 3 years

*All time referred to shall be working days.

Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act

The University of California, Santa Barbara, is committed to assisting all members of the UCSB community—students, faculty, staff and visitors—in providing for their own safety and security. The complete UCSB campus safety report, *Dedicated to the Safety of Our Community: The Clery Act Campus Security Report*, including campus crime statistics, campus policies, and substance abuse, sexual harassment, and sexual assault complaint procedures, is available online at: www.sa.ucsb.edu/policies/cleryact/cleryactcampussecuritreport.asp, or you can request a copy by calling the Office of Student Life at (805) 893-7884.

This information is made available in accordance with the “Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act,” formerly the “Student Right to Know and Campus Security Act.” The Web site contains information regarding campus security and personal safety, including topics such as crime prevention, university police law enforcement authority, crime reporting policies, disciplinary procedures, and other matters of importance related to security on campus. The Web site contains information about crime statistics for the three previous calendar years concerning reported crimes that occurred on campus; in certain off-campus buildings or property owned or controlled by UCSB; and on public property within, or immediately adjacent to and accessible from the campus.

This information is required by law, provided by the Office of Student Life and the campus Police Department, and upholds the campus belief that a well-informed community is better served and safer. UC Santa Barbara makes continual efforts to reduce crime on campus and supports a reporting philosophy that encourages victims or witnesses to report all incidents immediately to either the UCSB Police or anonymously to a Campus Security Authority. However, in cases of sexual assault, the University recognizes that reporting to law enforcement is a personal decision and respects the right of the survivor to make that decision.

Average Persistence and Graduation Rates

At 61%, UCSB takes great pride in having one of the highest four-year graduation rates among public universities. At six years, over 79% of UCSB's entering freshman class has graduated.

Privacy of Student Records

The Federal Family Educational Rights and Privacy Act (FERPA) and the University of California Policies Applying to the Disclosure of Information from Student Records afford students certain rights with respect to their educational records. They have the right:

1. To inspect and review records pertaining to themselves in their capacity as students;
2. To seek correction of their student records through a request to amend the records or a request for a hearing;
3. To file complaints with the Department of Education regarding alleged violations of the rights accorded them by the Federal Act; and
4. To request that personally identifiable information from their student records be withheld from disclosure except to the extent that FERPA authorizes disclosure without consent.

The following information is designated as “directory information” and normally will be released by the campus without the consent of the student: name, current local and permanent address and telephone number, electronic mail address, date (MM/DD) of birth, major, number of units currently enrolled in, class level, dates of attendance, degree/honors awarded, most recent school attended, athletic information including height and weight, and participation in officially recognized organizations. Students have the right to restrict the disclosure of this information. A form to restrict disclosure of any or all of this information may be submitted at the Office of the Registrar. A student requesting such restrictions should be aware, however, of the implications of such a request.

One exception, which permits disclosure without consent, is disclosure to campus officials with legitimate educational interests. A campus official is a person employed by the University in an administrative, supervisory, academic or research, or support staff position; a person or company with whom the University has contracted (such as an attorney, auditor, or collection agent); or a student serving on an official committee, such as disciplinary or grievance committee, or assisting another school official in performing his or her tasks.

A school official has a legitimate educational interest if the official needs to review an educational record in order to fulfill his or her professional responsibility.

Upon request, UCSB may disclose education records without consent to officials of another school in which a student intends to enroll.

Copies of the university's policies and campus implementation procedures can be obtained from and questions regarding various privacy regulations can be addressed to the Office of the Registrar.

Each fall, a free UCSB Associated Students *Student & Faculty Directory* is made available to all students. The directory lists the name, local address and telephone number, and permanent address of any enrolled student who has (a) answered affirmatively that he or she consents to be listed in the directory; and (b) not requested that directory information be withheld by submission of the appropriate form to the Office of the Registrar. A negative response to the Student Directory Option will result only in the withholding of the student's name and address information from the Student Directory. Any student who wishes to have directory information withheld for purposes other than the Student Directory must complete a Not for Release form at the Office of the Registrar as described above.

Students are given an opportunity to examine and update their personal information at any time upon request at the Office of the Registrar or through the GOLD System accessible through my.ucsb.edu.

Campus Regulations Applying to Campus Activities, Organizations, and Students

Campus Regulations Applying to Campus Activities, Organizations, and Students is available, free of charge, in the Office of Student Life, Student Resource Building (SRB), and through the Office of Student Life homepage at www.sa.ucsb.edu/Regulations. This document includes regulations relating to student activities as well as to academic misconduct. It also specifies conditions for the application of sanctions for unsatisfactory conduct.

Contested Grades Regulation 25

In the Santa Barbara division the term grade assigned to an individual student, or in the College of Creative Studies the number of units assigned, may be challenged by that student on the grounds that the grade (or the number of units) was based on an evaluation of the student's work by criteria that were not clearly and directly related to the student's performance in the course for which the grade was assigned.

The procedures are set forth in Appendix V of the Academic Senate manual, as follows:

Student Grade Appeal Procedures (Appendix V)

(A) If after speaking to the faculty member in charge of the course and department chair, a student wishes to contest a grade on such grounds, he/she must present a written appeal to an official designated by the Executive Committee, usually the Dean of Undergraduate Studies (or equivalent) of the appropriate school(s) or college(s) offering the undergraduate course or the graduate dean in the case of a graduate course (hereinafter, “the dean(s)”). This appeal must be submitted before the end of the term following the term in which the grade was assigned. Upon receipt of this appeal, the dean(s) shall promptly seek to resolve the issue by consulting the parties involved and the chair of the instructor's department. If the chair was the instructor involved he/she shall not participate in these deliberations in any way except as one of the parties. In such cases, the dean shall proceed to attempt to resolve the dispute independently. If the dean was the instructor involved, he/she shall not participate in these deliberations except as one of the parties. In such cases, the immediate supervisor of the dean(s) shall recommend to the Executive Committee an appropriate alternate for the dean. If the complaint is resolved, the dean(s) shall provide a letter describing the resolution to the student(s), instructor(s), and chair(s) involved.

(B) If these efforts are unavailing within 30 days following receipt of the student's initial written

complaint by the dean(s), the student may within the next 15 days present a final written appeal to the Executive Committee(s) of the respective college(s) or the Graduate Council, a copy of which shall also be given to the dean(s). If a member of the Executive Committee or the Graduate Council was the instructor involved, that person shall not participate in the case in any way except as one of the parties. As soon as feasible, the dean(s) shall prepare a report for the Executive Committee or the Graduate Council providing the details of (i) the prior investigations, including information as to the allegations and the evidence produced by the student to establish the case; (ii) the instructor's response to the student's allegations; (iii) all other information the dean may have gathered in the course of the investigation that bears on the credibility of the student's complaint. Copies of the dean's report shall be sent to the instructor and the student, both of whom submit written comments to the Executive Committee/Graduate Council within 30 days of receipt of the dean's report. Having granted both parties a reasonable opportunity, the committee shall make a final determination within 60 days after receipt of the complaint. Should the dean's investigation tend to demonstrate a pattern of faculty misconduct extending beyond the particular case, the dean shall inform the Executive Committee/Graduate Council which is then responsible for assuring that appropriate corrective actions are taken including but not limited to grade changes as specified in (C) below and referral of the case to other appropriate committees and agencies.

(C) If the Executive Committee/Graduate Council decides that the grade (or units) assigned is (are) not reflective of the student's course performance, it shall authorize one of the actions stated below.

The committee/council may act only as follows:

1. authorize retroactive withdrawal from the course;
2. authorize a change of contested grade;
3. for courses offered in the College of Creative Studies, the Executive Committee shall determine the number of units to be assigned.

The committee shall report its decision to the Registrar for recording.

Regulation 10

(A) (SR 542) No student may enter upon any organized instructional activity until he or she has registered and his or her enrollment has been approved by the appropriate study-list authority. No student may begin or continue a course if the officer of instruction in charge considers him or her unqualified by lack of preparation. Late registration may not be used to justify inadequate performance in a course.

(B) In the Santa Barbara division an instructor's refusal to permit a student to begin or continue a course may be challenged by the student on grounds that such refusal arises from discrimination on political grounds, or for reasons of race, religion, sex, ethnic origin, or for other arbitrary or personal reasons. The procedure for the initiation of such a challenge is set forth in Appendix V. However, the only final recommendations and decisions to be made by the officers

and the committees therein specified shall be to deny or authorize the student's entry into or continuation in the course concerned.

Extension of Jurisdiction

In certain circumstances campus regulations may apply to the off-campus residence halls (Tropicana Gardens and Fontainebleu). Some regulations (e.g., physical and sexual assault, arson, sexual harassment, stalking, and hazing) may apply to UCSB students anywhere they commit these offenses.

UCSB Substance Abuse Policy

- Employees and students are prohibited from the unlawful manufacture, distribution, dispensation, possession or use of a controlled substance and/or alcohol in the workplace, on University premises, at University activities, or while conducting University business.
- Employees and students shall not use illegal substances and shall not abuse legal substances in a manner that impairs job performance, scholarly activities, or student life.
- Employees directly or indirectly involved in work on or for a federal grant or contract are required, as a condition of employment on the grant or contract, to notify the University within five (5) calendar days if they are convicted of any criminal drug statute violation for activity occurring at the workplace, at the location of any grant/contract activity, or while on University business.

Substances Definition

The term "substances" includes both illegal and legal substances:

1. Illegal substances are those controlled substances (narcotics, barbiturates, amphetamines, cocaine, cannabis, hallucinogens, and synthetic drugs) listed in the Federal Controlled Substances Act.
2. Legal substances are:
 - a. Alcoholic beverages,
 - b. Tobacco products,
 - c. Controlled substances as listed in the Federal Controlled Substances Act that are prescribed or administered by a licensed physician or health-care professional or are purchased and used for approved scientific research,
 - d. Over-the-counter drugs and products.

Health Risks

Substance abuse may result in serious health problems, or even sudden death, which in the case of some drugs (e.g., cocaine) can occur after first-time use. The following is a partial list of other potential health risks:

Acute problems

Heart attack
Stroke

Long-lasting effects

Disruption of normal heart rhythm
High blood pressure
Destruction of brain cells
Permanent memory loss
Infertility and impotency
Immune system impairment

Kidney failure
Cirrhosis of the liver
Pulmonary damage

Drug use during pregnancy may result in fetal damage and birth defects causing hyperactivity, neurological abnormalities, and developmental difficulties. For more information on health risks, students may contact the UCSB Alcohol and Other Drugs Program and employees may contact the Academic and Staff Assistance Program.

Counseling Services

Employees and students are encouraged to voluntarily seek assistance for substance abuse and dependency problems. Supervisors may also refer individuals with substance abuse problems to campus counseling services. UCSB offers the following programs:

Employees—Academic and Staff Assistance Program (ASAP) counselors help identify community treatment programs.

Students—Counselors from Student Health Alcohol and Other Drugs Program and from Counseling Services offer short-term counseling and referral.

Information obtained during these counseling sessions is confidential and will not be released without the written consent of the employee or student except as authorized or required by federal or state law.

Employees

Employees may use approved vacation or sick leave, or may request leaves of absence, to seek assistance for drug- and alcohol-related problems.

When an employee's job performance appears impaired from the use of an illegal substance or abuse of a legal substance, including alcohol, the supervisor must take appropriate action, which may include referral to ASAP, corrective action, or UCSB Police Department intervention. Supervisors are encouraged to seek assistance from their department head, Human Resources (Labor and Employee Relations or ASAP), or Academic Personnel.

Employees found to be in violation of the UCSB substance abuse policy may be subject to corrective action, up to and including dismissal, and/or referral for prosecution. An employee may also be required to participate in an approved counseling or treatment program.

Employees Involved with a Federal Grant/Contract

If an employee is directly or indirectly involved in work on a federal grant or contract and is convicted of violating any criminal drug statute for activity occurring in the workplace or while on University business, the following provisions apply:

1. The employee must notify his or her supervisor within five (5) calendar days of the conviction. Failure to do so may result in corrective action, up to and including dismissal.
2. A supervisor who is aware that an employee has been convicted must immediately report the conviction to the UCSB Office of Research.

3. The Office of Research will in turn report the conviction to the federal agency administering the contract or grant within ten (10) calendar days of receiving notice of a conviction.
4. The employing department is required by law to do one of the following within thirty (30) days of notification of the conviction:
 - a. Take appropriate personnel action, up to and including termination, or
 - b. Require the employee to participate satisfactorily in a substance abuse program.

Students

All students are accountable to the University discipline provisions of the *Campus Regulations Applying to Campus Activities, Organizations, and Students*.

Students found guilty of violating the UCSB policy on substance abuse are subject to disciplinary sanctions, up to and including suspension or dismissal, and/or referral for prosecution. A student may also be required to participate in an approved counseling or treatment program.

Legal Sanctions

The list below does not include all applicable laws; moreover, laws may change over time. Individuals are expected to be aware of current federal, state, and local laws. For more information on the state and federal laws governing controlled substances, see the UCSB Police Department Web site at www.police.ucsb.edu, or call (805) 893-3446.

Laws and Ordinances Governing Controlled Substances and Alcohol

Controlled Substances (Federal)

- Manufacture, sale, or distribution is a felony.
- Possession can result in a \$10,000 fine per violation and jail sentence.
- Conviction can result in preclusion from all federal monetary benefits.
- Aliens are subject to deportation and exclusion from entry.
- Health-care providers can be barred from receiving federal insurance program payment.
- Personal property traceable to controlled substance transaction is subject to forfeiture.

Marijuana (California)

- Cultivation, possession for sale, or sale is a felony and may result in a prison term.
- Possession of marijuana is a misdemeanor and may result in driving license suspension for one year if a vehicle is involved, and a fine of \$500 (one ounce or more) or \$100 (less than one ounce).

Paraphernalia (Santa Barbara County)

- Possession of drug paraphernalia is a misdemeanor and may result in a fine of \$108 for the first conviction.

Alcohol (Santa Barbara County)

- Possession of an open container on public streets, sidewalks, highways, parking lots or alleys can result in a \$108 fine, plus \$125 to the Victim's Relief Fund for a first conviction.

Alcohol (California)

- To sell or furnish alcohol to a person under 21 or to an obviously intoxicated person is a misdemeanor.
- Attempting to purchase alcohol using false ID can result in jail time and a minimum fine of \$200.
- Public intoxication is unlawful and can result in jail time.
- Possession of alcohol by anyone under 21 on a street, highway, or place open to public view can result in a citation, mandatory court appearance, driver's license suspension, fines up to \$650, and proof of completion of a Youth Offender Program.
- Selling alcohol without a license is a misdemeanor.
- Driving under the influence with a blood alcohol content (BAC) level of .08 or higher applies to alcohol, illegal drugs, or a combination of alcohol and drugs.
- Drivers under 21 with a BAC of .01 or higher can have their vehicles towed and driver's license suspended, and be sentenced to not less than 96 hours in jail nor more than 6 months, a fine not less than \$390 nor more the \$1000, a driver's license suspension of 6 months, and completion of an alcohol program and three years' probation.
- Bicycling under the influence (BAC of .08 or higher) can result in overnight jail time and a \$250 fine. Riders under 21 may also lose their driver's licenses for one year.

References

Information about the documents used as references for this policy are available at Academic and Staff Assistance Program (ASAP), Student Health Service—Alcohol/Drug Awareness Program, and Human Resources—Labor and Employee Relations.

Parent Notification

UCSB conducts a Parent Notification Program as one way to address the negative consequences of high-risk drinking and substance abuse in the community of Isla Vista (located adjacent to campus). Using public records, UCSB informs parents of undergraduates by letter if their son or daughter is arrested or cited for an alcohol or drug offense in Isla Vista. However, in an effort not to discourage students from seeking needed medical attention, parents are not notified if students receive emergency medical treatment in conjunction with the citation or arrest. Through this notification program both students and parents are provided with resource and referral information, as well as suggestions for how to address and reduce high-risk behaviors. For additional information or questions about UCSB parent notification, please call the Office of Student Life at (805) 893-4569.

Register to Vote

The 1998 reauthorization of the federal Higher Education Act includes a requirement that higher education institutions make a "good faith effort" to make mail voter registration forms available to all enrolled students. This federal legislation supports the campus's long-standing goals of engendering leadership and citizenship among the student body. UCSB provides students with several options for registering to vote. Voter registration forms are available at numerous campus locations, including the Office of Student Life (2260 Student Resource Building (SRB)), and the U.S. Post Office (UCen), or may be requested on-line at www.sa.ucsb.edu/voterreg or by calling (800) 345-VOTE. Students must re-register to vote if they have moved, changed names, or wish to change party affiliation. For further information on registration and voting, contact the Office of Student Life at (805) 893-7884.
